

High School Programs at UC Anschutz Medical Campus

CU Science Discovery is partnering with the Colorado Area Health Education Center (CO AHEC) to offer several week-long high school programs at the UC Anschutz Medical Campus. Each program is limited to 20 rising 11th and 12th grade students (must be 16 years of age), so get registered today!

[Medical Research Matters | June 26-30, 2017](#)

[Medical Research Matters | July 24-28, 2017](#)

This class will introduce students to a variety of programs and facilities that are a part of the incredible Anschutz Medical Campus research center. Throughout the week, we will meet scientists in basic and clinical research, visit facilities that provide cutting-edge technologies, explore the ethics of medical research, learn about research careers, and develop a research proposal based on your specific interests. If you are interested how science can help explain and solve health problems, this class is for you!

[Pharmacy School Experience | June 19-23, 2017](#)

[Pharmacy School Experience | June 26-30, 2017](#)

During this week-long class, we'll meet different kinds of pharmacists, learn how pharmacists interact with patients, test our skills at compounding medications, practice administering vaccines and more! By the end of the week, we'll have a better understanding of what a career in pharmacy involves and whether pharmacy school might be in your future.
