

Optional Dental Benefits

Good for your Health and Your Wallet

University of Colorado Anschutz Medical Campus recognizes that good dental health is important to overall health and is pleased to offer students and their eligible dependents the option to enroll in this dental benefit option.

Did you know over 100 severe medical conditions and illnesses can be detected and treated by a dental examination of the mouth, throat and neck? With dental benefits, which promote regular visits to the dentist, serious oral health problems can be detected early and treated more economically. A healthy mouth promotes better general health and well-being.

The dental benefits provide coverage for preventive care, basic and restorative care.

ELIGIBILITY: Participants must be enrolled in the school's Student Accident and Sickness Health Insurance Plan to enroll in this Optional Dental Benefit.
