Your online abstract should be written for a lay audience — avoid jargon. Summarize your research, creative, or other scholarly activity in a manner that describes your work. Your title and abstract should serve to attract RaCAS attendees to your presentation. This abstract will also be used for the review process, if you are being considered for a RaCAS award. Sometimes the actual presentation at RaCAS may differ subtly from your abstract — that's OK. However, your original abstract will be published in the Symposium Proceedings. Please make sure your abstract is complete before you submit your application. If part of D2P, your abstract will not be published in the Proceedings so a draft version is acceptable.
