BETTER SALARY... 
BETTER OPPORTUNITIES... 
BETTER YOU.

Whatever your goal, a degree from the University of Colorado can help you achieve it.
Do you learn better by reading and writing or do you have more success with lectures and hands-on learning?

Even my note cards have pictures.

Even my note cards have pictures.

Do you manage your time well or do you chase the clock?

I already have my calendar updated for next year.

Are you self-motivated?

If I’m not in charge of me then who is?

Sometimes I need a little push...

Not if I can graduate faster!

Do you schedule classes before anything else?

No, they need to fit in with my busy schedule.

Is a traditional college experience important to you?

I’m going to college for the experience.

I like face-to-face but on my schedule.

Do you want an assignment, which do you prefer:

I want to figure it out on my own.

I only ask for help if I need it.

When you get an assignment, which do you prefer:

I like instructions to be clearly explained.

I need deadlines to get energized about my work.

WHICH TYPE OF STUDENT ARE YOU?

YOU LIKE TO COMPLETE COURSES AT YOUR OWN PACE. YOU FEEL MORE COMFORTABLE IN SMALL GROUPS. YOU TEND TO BE UNCOMFORTABLE WITH NEW TECHNOLOGIES AND CAN PICK UP THINGS QUICKLY.

YOU’RE AN ONLINE STUDENT!

YOU BELONG ON CAMPUS!

Among the other benefits of college, you enjoy the social aspect of the CU Denver community and will thrive in a classroom environment. You’re quick-witted and think on your feet.

YOU’RE A HYBRID STUDENT!

You’re a trend setter. You like to make your own rules and do what makes sense to you. Mixing online with traditional courses gives you the flexibility you need without sacrificing the face-to-face connection.
Here are some quick facts about completing your degree:

- Those with a college degree now make $17,500 more per year than those without.
- Those without a degree are 4X more likely to be unemployed.
- Over the course of a lifetime, college graduates earn $1.19 million...which is TWICE what the typical high school graduate earns, and $335,000 more than what the typical associate degree graduate earns.
WHY ONLINE?

Time.

It’s the one thing you can never get enough of.

In regard to your education, wouldn’t it be great if you could get everything you wanted from a degree – without having to give up your schedule?

To keep everything you’re doing right now – while moving ahead. Well, with online, you can.

With online courses, you can learn from the same professors who teach on campus, without ever having to come on campus.

MIX AND MATCH

But what makes CU Denver|Anschutz unique is that you can mix and match online with on campus. You don’t have to apply or register different. There is no extra step or designation to take an online course. It’s just simply one more option to choose if you want.
CU Online has been offering online courses for nearly twenty years (1996), which makes CU Denver|Anschutz one of the first (and only) public universities to allow students to interchange online and on campus courses. With such a head start, CU Online continues to lead the way with innovative online courses (over 450 and counting) and full online degree programs taught by tenured faculty and professors.

With CU Denver|Anschutz’s online courses, you’ll enjoy:

• The same professors who teach on campus.
• The same traditional 15 week semester (Fall, Spring, Summer).
• The same quality courses, for the same tuition, worth the same credit.
• The same CU degree and prestige that can help advance your career.

So, the only difference is that you can choose when, where and how you learn best.
Each online course is developed to offer everything you would expect from CU Denver|Anschutz. But you’ll learn in a format designed specifically for online delivery.

• Depending on your professor, your online courses can include: lectures, videos, slide shows, discussion boards, etc..
• You submit regular assignments online (discussions, labs, projects, papers, etc.).
• Exams are taken online, in class or proctored at another location.
• Participation varies due to the professor and the course content.

Just like a traditional classroom, you’re able to ask questions, share notes and make plans to study with the rest of your classmates.

The end result is a dynamic experience where you can send and receive feedback directly to the professor, and you can always come down to campus to talk in person.
CU Denver|Anschutz offers more than 130 degree programs. Of those, over 30 full degrees and certificates can be completed entirely online.

This means you can maintain your current commitments without having to choose one over the other. And online courses can help ensure you graduate on time and as efficiently as possible.

Since the CU Denver|Anschutz professors who teach online are the same ones who teach on campus, each online course offers the same quality, content and credit as its on campus counterpart.

Each online course is limited to an ideal student/teacher ratio, so you’ll get individual attention and will never be treated as “just a number”.

Hybrid Courses

In addition to online courses, hybrid courses are another option for schedule flexibility.

Hybrid courses blend both traditional classroom instruction with the flexibility of online learning. So typically, half of your course is on campus and the other half is online. This format allows you to learn online, and then engage with hands on help from your professor and peers in the classroom.
If you’re wondering whether or not online learning is right for you, consider these questions...

1. Do you feel you learn just as well independently as you do in a traditional face-to-face classrooms?

2. Do you manage your time well and stay on top of deadlines?

3. Are you self-motivated without someone telling you to complete a task?

4. Are you comfortable with email, computers, and new technologies?

5. Do you enjoy reading and writing?

6. Does your current schedule and responsibilities make it difficult to attend courses during the day?
TOP 10 ADVANTAGES:

You can “attend” a course at any time, from anywhere.

1. Online learning enables you to learn at your own pace.
2. Course material is accessible 24 hours a day 7 days a week.
3. It’s a great way to improve writing skills.
4. Past students often comment that online learning lets them attend class when fully alert.
5. There are potential savings by eliminating transportation and accommodation costs.
6. There are often more in-depth and honest class discussions.
7. Online classrooms can greatly facilitate team learning and building by providing chat rooms and newsgroups for meetings and joint work.
8. Professors who teach online come with practical knowledge and may be from any location across the globe.
9. With the schedule flexibility, you’ll be able to keep up academically and utilize resources.
10. Among the other benefits of taking your course online, you can also do the following ‘typical’ course related tasks all online as well: buy textbooks, find and receive tutoring, check out library resources, receive advisor assistance, conduct financial and registration tasks, etc.
For current CU Denver|Anschutz students, you can register for online and hybrid courses through UCD Access, just like you would for on campus courses. The only difference is that online and hybrid courses have a different course number.

If you’re not currently a CU Denver|Anschutz student, you must first apply, whether you take one or all of your courses online. If you’re not seeking a full degree, you’ll still have to follow the admission requirements for non-degree seeking students.
