Are you a woman between the ages of 40 and 52?

Do you have regular periods and any one of the following symptoms of perimenopause?

- Hot flashes
- Cyclical bloating, mood changes or headache
- Trouble sleeping

The University of Colorado School of Medicine’s Department of OB/GYN is seeking women meeting these criteria for a research study on the effect of medication on perimenopausal symptoms.

Participants will receive a Mirena IUD and all study-related care free of charge.

Participants will be compensated for their time.

Women who have undergone tubal ligation or Essure® are also eligible for participation.

PI: Dr. Nanette Santoro
