PHILOSOPHY:
This one year, post-Pharm.D. residency focuses on the development, implementation, and management of innovative patient care services in a community pharmacy. The position allows the resident to contribute in the areas of clinical service, scholarship, and professional service. Five existing pharmacy care centers in metropolitan Denver provide education and management to patients with diabetes, hypertension, dyslipidemia, and other disease states. Further, the resident assists in the design and implementation of similar patient-care services at additional pharmacy sites. The resident is expected to develop and present a research project, and has opportunities to contribute scholarly writing for publication. Clinical and didactic teaching experiences are also available to the resident. Active involvement in community service and pharmacy organizations is encouraged. The residency provides elective experiences and flexibility to satisfy the specific interests of the resident.

The University of Colorado Skaggs School of Pharmacy and Pharmaceutical Sciences has partnered with a grocery store chain, King Soopers, to offer this residency position. King Soopers, a division of the Kroger Company, operates 140 pharmacies in Colorado and has received recognition for initiatives in community health screening, pharmacy-based immunization services, and diabetes management. A University of Colorado School of Pharmacy adjoint-faculty member serves as the primary residency preceptor, and is actively engaged in the provision of clinical services and scholarship related to community pharmacy practice. The resident should be creative, highly motivated, and passionate about the provision of pharmaceutical care services in community pharmacies.

The School of Pharmacy is part of the University of Colorado Anschutz Medical Campus, and is located just outside Denver in Aurora, Colorado. In addition to clinic responsibilities, the resident will be involved in teaching efforts focused towards didactic and clerkship teaching of Doctor of Pharmacy candidates. Residents will also gain experience in medical writing and publishing. A research project of publishable and presentable quality is required.

The residency position is generously supported by a grant awarded from King Soopers. The residency has submitted with ASHP for accreditation.

REQUIREMENTS:
- Doctor of Pharmacy Degree, and
- Passion for advancing community pharmacy practice

APPLICATION:
Interested applicants meeting the above criteria should send a letter of intent, curriculum vitae, academic transcripts, and three letters of reference by January 15, 2012 to:
