

PROGRAM OVERVIEW

The economics major provides flexibility and opportunity and can take you in many directions, both inside and outside of the field of economics. In fact, most economics majors do not work as economists, but in business careers of all varieties. The analytical and quantitative skills that one acquires as an economics major are much in demand in the job market and are also highly attractive to law schools and MBA programs. Whatever your career plans, economics training can give you the edge you need to further your long-term goals.

The principal areas of study in finance are financial management in small and large businesses, investments, financial institutions, and international finance. The study of finance is intended to provide an understanding of fundamental theory and practice pertaining to finance; to make sound financial decisions. Students are taught to think logically about financial problems, so that they can formulate and implement value maximizing decisions and policies for the business. For this purpose, it is necessary to understand the importance of finance in the economy and the functions and purposes of monetary systems, credit, prices, money markets, and financial institutions. Emphasis is placed on financial policy, management, control, analysis, and decision making.

ACADEMIC ADVISING

The College of Liberal Arts and Sciences (CLAS) supports students to graduation using a shared advising system. CLAS students have two academic advisors with whom they should meet regularly to discuss academic and degree progress: a CLAS Academic Advisor and a major advisor. Additionally, CLAS students in the Economics B.A. and Finance B.S. Dual Degree will have a third advisor from the Business School.

SAMPLE ACADEMIC PLAN OF STUDY

The following academic plan is a *sample* pathway to completing degree requirements for this major. Students should tailor this plan based on previously completed college coursework (e.g., AP, IB, CLEP, dual/concurrent enrollment, and transfer credit), course availability, and individual preferences related to course load, schedules, or add-on programs such as certificates, minors, double-majors, or dual-degrees. **Students must meet with the Economics & Finance major advisors to create an individualized plan of study. Students who carefully follow the recommended curriculum will be able to apply several courses to multiple requirements.**

Note: this plan assumes students have completed Business School Second Language proficiency requirement. Students should consult a CU Denver Business School Advisor to discuss their options to fulfill this requirement. **Students who have not fulfilled this requirement must work with a CU Denver Business School Academic Advisor to modify this plan.**
