

Mechanical Engineering

Bachelor of Science (B.S.) – Catalog Year 2023-2024

PROGRAM OVERVIEW

Mechanical engineering offers interesting and challenging career opportunities in research, design development, manufacturing, testing and marketing for either private or government. As a mechanical engineer, you may work on products such as engines, transmissions, compressors, pumps, computer disk drives, CAD/CAE software, oil field drilling rigs, missiles, space satellites, earth moving equipment, container manufacturing machines and medical equipment.

Bachelor of Science (BS) in mechanical engineering curriculum begins with a strong emphasis on mathematics, physics and chemistry. It continues with a concentration in engineering sciences, including solid and fluid mechanics; thermodynamics, heat and mass transport; materials; and systems analysis and control. It concludes with laboratory and design courses which demonstrate the ways in which scientific knowledge is applied in the design and development of useful devices and manufacturing processes.

ACADEMIC ADVISING

Advising in the College of Engineering, Design and Computing (CEDC) depends on your student standing—undergraduate students either are preengineering or are admitted to the college, depending on degree progress. *Pre-engineering* students must meet Natalya Semyonova, ME Program Manager natalya.semyonova@ucdenver.edu each semester before they can register for classes.

Mechanical engineering students must meet with one of the ME faculty advisors (<u>mechanical@ucdenver.edu</u> 303 315 7500) each semester before they can register for classes.

Students admitted to the College of Engineering, Design and Computing (CEDC) who have declared a major are required to meet with an advisor in their specific department and should contact that department to schedule an appointment.

Students admitted to the College of Engineering and Applied Science who have not declared a major are required to meet with the CEDC advisor.
