

## PROGRAM OVERVIEW

The College of Liberal Arts and Sciences (CLAS) and the Colorado School of Public Health (CSPH) together created the undergraduate Public Health program. Public health professionals work to protect the environment, identify sources of illness in population groups, control disease outbreaks, evaluate the economic ramifications of changing demographics, develop interventions to promote healthy behavior and produce health policy legislation. Public health draws from a broad array of disciplines, including a range of social, behavioral, and natural sciences, each provides unique insights for the diverse set of activities involved in public health practice.

Students in the B.A. program develop a specialty in the social sciences and public health. Graduates with a B.A. in Public Health will be prepared for pursuit of graduate degrees in a broad range of fields, including the social and behavioral sciences, public health, law, social work, business administration, and health services research. The program is especially appropriate for students intending to pursue careers in public health, as well as health policy and administration.

## ACADEMIC ADVISING

The College of Liberal Arts and Sciences (CLAS) supports students to graduation using a shared advising system. CLAS students have two academic advisors with whom they should meet regularly to discuss academic and degree progress: a CLAS Academic Advisor and a major/faculty advisor.
