The Rhodes Scholarship

Description:

The Rhodes Scholarship is a fully-funded postgraduate award which enables talented young people from around the world to study full-time at the University of Oxford. The Rhodes Scholarship is merit-based, with the purpose of developing public-spirited leaders, and to promote international understanding and peace through an international community of Scholars.

Applying for the Scholarship is a challenge, but it is an experience which has helped generations of young people to succeed. We encourage applications from talented students everywhere.

Rhodes Scholars come to the UK for two or more years and can apply to study most full-time postgraduate courses in almost any field offered by Oxford University.

Marshall Scholarships

Description:

Marshall Scholarships finance young Americans of high ability to study for a degree in the United Kingdom. Up to fifty Scholars are selected each year to study at graduate level at a UK institution in any field of study.

As future leaders, with a lasting understanding of British society, Marshall Scholars strengthen the enduring relationship between the British and American peoples, their governments and their institutions. Marshall Scholars are talented, independent and wide-ranging, and their time as Scholars enhances their intellectual and personal growth. Their direct engagement with Britain through its best academic programmes contributes to their ultimate personal success.

Marshall Scholarship Pathways:

- **One-Year Pathway:** 1 x one-year master's degree (minimum 10-month programme)
- **Two-year pathways (including Master's and Doctoral):**
 - 2 x one-year master's degree (at the same or different universities, pursued consecutively)

- 1 x two-year master's degree (at one university)
- PhD/DPhil degree (at one university, typically 3 years in the UK)
 - For Marshall Scholars who enter as PhD/DPhil candidates, the Commission provides three years of guaranteed funding subject to academic progress.
- 1 x one-year master's degree + start PhD/DPhil in Year 2 (at the same or different universities).
 - In this scenario, the Commission will guarantee two years of funding and may provide a third year of funding on a discretionary basis. To complete their PhD/DPhil, Marshall, Scholars may need to secure external funding thereafter.

Eligibility

Selection Criteria:

- Academic Merit
- Leadership Potential
- Ambassadorial Potential

Goldwater Scholarship

Description:

The Goldwater Scholarship Program, one of the oldest and most prestigious national scholarships in the natural sciences, engineering, and mathematics in the United States, seeks to identify, encourage, and financially support college sophomores and juniors who show exceptional promise of becoming this Nation's next generation of research leaders in these fields.

The characteristics the Foundation seeks in a Goldwater Scholar include:

- strong commitment to a research career in the natural sciences, mathematics and engineering,
- effective display of intellectual intensity in the sciences, mathematics and engineering, and
- potential for a significant future contribution to research in their chosen field.

The Truman Scholarship

Description:

The Truman Foundation identifies aspiring leaders at an important inflection point in their development – when they are college juniors – and recognize and reward their commitments to careers in public service. Although certainly accomplished, many are still largely untested. Yet when you look at what the now more than 3,500 Truman Scholars have achieved, our risk-taking is paying off.

Boren Awards for International Studies

Description:

Boren Awards are scholarships and fellowships for U.S. undergraduate and graduate students committed to long-term overseas study and to public service. Boren awardees receive funding to study the languages most critical to our nation's security in the regions below:

- Africa
- Asia
- Central and Eastern Europe
- Eurasia
- Latin America
- Middle East

As a condition of their award, Boren Scholars and Fellows agree to utilize their skills within the federal government by seeking and securing national security employment for at least one year, strengthening the federal workforce and enhancing U.S. capabilities, deterrence, and readiness.

National Science Foundation Graduate Research Fellowships

Description:

The purpose of the NSF Graduate Research Fellowship Program (GRFP) is to help ensure the quality, vitality, and strength of the scientific and engineering workforce of the United States. Since 1952, the program recognizes and supports outstanding graduate students who are pursuing full-time research-based master's and doctoral degrees in science, technology, engineering, and mathematics (STEM) fields, including STEM education. NSF GRFP was established to recruit and support individuals who demonstrate the potential to make significant contributions in STEM, including STEM education. NSF encourages applications from the full spectrum of talent that the U.S. has to offer.

As the oldest graduate fellowship of its kind, the GRFP has a long history of selecting recipients who achieve high levels of success in their future academic and professional careers. The reputation of the GRFP follows recipients and often helps them become life-long leaders that contribute significantly to both scientific innovation and teaching. Past fellows include numerous Nobel Prize winners and members of the National Academy of Sciences.

Fellowships provide the student with a three-year annual stipend of \$37,000 along with a \$16,000 cost of education allowance accepted by the institution as payment in lieu of all tuition and mandatory fees (there is no cost to the student). Fellowships may only be used for an eligible graduate degree program at a non-profit academic institution accredited in, and having a campus located in, the US, its territories, possessions, or the Commonwealth of Puerto Rico.

The FAO Schwarz Fellowship

Description:

The FAO Schwarz Fellowship is an intensive, transformative two-year experience designed for recent college graduates who wish to deepen their knowledge of social equity, pursue careers in social impact, and lead the change.

The Fellowship program provides opportunities for graduating college seniors interested in social impact careers to be part of organizations that are deeply committed to social justice and equity. Through a combination of direct service and strategic project work, professional development and mentoring, Fellows gain first-hand experience leading change and learn how effective nonprofits create lasting and measurable progress.

Schwarzman Scholars Program

Description:

Schwarzman Scholars is designed to meet the challenges of the 21st century and beyond. It was inspired by the Rhodes Scholarship, which was founded in 1902 in an effort to promote international understanding and peace.

Schwarzman Scholars supports up to 200 Scholars annually from the U.S., China, and around the world for a one-year master's in global affairs at Beijing's Tsinghua University — ranked first in Asia as an indispensable base for China's political, business, and technological leadership.

Scholars chosen for this highly selective program will live in Beijing for a year of study and cultural immersion — attending lectures, traveling around the region, and developing a better understanding of China. Admissions opened in the fall of 2015 with outstanding success, immediately making Schwarzman Scholars one of the world's most selective graduate and fellowship programs.

Udall Undergraduate Scholarship

The Scholarship Program identifies future leaders in environmental, Tribal public policy, and health care fields. It is highly competitive, with students participating in their schools' internal competitions before receiving consideration from the Udall Foundation.

In 2026, the Udall Foundation anticipates awarding up to 65 scholarships of \$7,500 each.

The Udall Undergraduate Scholarship honors the legacies of Morris K. Udall and Stewart L. Udall, whose careers had a significant impact on Native American self-governance, health care, and the stewardship of public lands and natural resources.

The Udall Foundation is committed to its core values of integrity, civility, consensus, public service, and nonpartisanship. Accordingly, Scholarship, Internship, and

Fellowship award determinations are free from discrimination based on political opinion, race, color, religion, sex, national origin, age, disability, reprisal, or genetic information, as defined by law or regulation and governed by applicable case law.

Voyager Scholarship for Public Service

Description:

The Voyager Scholarship Program is a two-year leadership development and scholarship program. Through a transformational combination of barrier-reducing financial aid, an immersive work-travel experience, and a robust network of leaders and mentors, the Voyager Scholarship is designed to inspire, empower, and connect the next generation of leaders and equip them with the tools and resources they need to launch their careers in public service.

The program identifies students in their second year of undergraduate studies who will be starting their third year in the Fall. Over the course of two years, programming will

facilitate opportunities for students to refine their values-based leadership approach, build bridges across communities, and nurture their sense of curiosity as they deepen their commitment to pursuing public service careers.

Programming Overview & Commitment:

- Up to \$50,000 in financial aid
- Summer Voyage
- 10-Year Travel Stipend
- Fall Summit
- Network of Leaders

Amgen Scholars Program

Description:

The Amgen Scholars Program aims to open the door to research opportunities at 26 host institutions for undergraduates from any four-year college or university in a given region.

Made possible through a commitment of more than \$80 million since 2006, Amgen Scholars allows undergraduates from across the globe to participate in cutting-edge research opportunities at world-class institutions. 25 premier educational and research institutions across the U.S., Europe, Asia, Australia and Canada currently host the summer program.

Undergraduate participants benefit from undertaking a research project under top faculty, being part of a cohort-based experience of seminars and networking events and taking part in a symposium in their respective region where they meet their peers, learn about biotechnology, and hear from leading scientists.

Participating Institutions:

- California Institute of Technology
- Columbia University
- Duke University
- Harvard University
- Howard University
- Johns Hopkins University
- Stanford University
- University of California, Berkeley
- University of California, Los Angeles
- University of California, San Francisco
- University of North Carolina at Chapel Hill
- UT Southwestern Medical Center
- Washington University in St. Louis
- Yale University

[The Paul & Daisy Soros Fellowships for New Americans](#)

Description:

The Paul & Daisy Soros Fellowships for New Americans provides merit-based funding for New Americans, immigrants and children of immigrants, who are poised to make significant contributions to US culture, society and academia.

For centuries, the contributions of immigrants, asylum seekers, and refugees have made our nation stronger. Since 1998, we have awarded 805 Fellows from 103 countries more than \$80 million to pursue the graduate degrees of their choosing across a breadth of areas from screenwriting to medicine; from physics to painting; from law to neuroscience and from opera to mechanical engineering. The Fellowship supports one to two years of graduate study in any field and in any advanced degree-granting program in the United States. The Fellowship involves taking part in two Fall Conferences in New York City (all expenses paid) and meeting with the Fellowship director on your campus.

DAAD-Rise Scholarships

1.) RISE Professional:

Description:

RISE stands for Research Internships in Science and Engineering. RISE Professional offers summer research internships in Germany to Master's and Ph.D. students from USA, Canada, Great Britain or Ireland at companies and non-university research institutions with strong relations to industry. Undergraduates who are RISE Germany alumni are also eligible. Depending on the internship recent graduates are also eligible. RISE Professional is funded by the German Federal Foreign Office.

- The program is open for students in the field of biology, chemistry, computer science, physics, earth science, engineering or a closely related field
- All participants receive a scholarship from DAAD and an additional stipend from their host company/institution to help cover living expenses
- Funding is possible for a period up to six months depending on the internship in summer or fall
- German language requirements vary according to the internship placement
- Undergraduates who are Alumni from the RISE Germany program and recent graduates (depending on the internship) are also eligible to apply

2.) RISE Germany:**Description:**

RISE Germany offers summer research internships in Germany for undergraduate students from North America, Ireland and UK. In their internships, students are carefully matched with doctoral students and researchers (only from universities of applied sciences, UAS) – whom they assist and who serve as their mentors. Interns receive a monthly stipend to cover everyday costs. About 300 scholarships are available each year. RISE Germany is supported by the Federal Foreign Office and by many partners.

RISE Germany internships were first offered in 2005 to applicants from the United States and Canada, with the program extended to the United Kingdom in 2009 and Ireland in 2018. Our objective remains to promote student exchange to Germany in the fields of natural science, engineering and life sciences, and to motivate undergraduate students to learn more about Germany's research landscape and study opportunities.
