Global History Graduate Certificate

Introduction

Please click here (p. 413) to see the History department’s information.

The Global History Graduate Certificate provides CU Denver graduate students and the wider community the opportunity to explore topics in Global History while simultaneously learning professional skills in historical research and historical dissemination. This Certificate is designed for students interested in pursuing a graduate-level education in Global History and for professionals seeking accreditation and/or promotion in the fields of education, museums, historic preservation, government, law, and the arts.

The certificate can stand on its own or it can serve as a stepping stone to a Master’s Degree in History.

Upon successful completion of the certificate, students will:

- Be able to pursue independent historical research projects
- Be able to analyze debates among historians
- Be able to analyze historical documents and develop arguments from them

Program Delivery

- This program has one on-campus requirement and the remainder of the certificate can be completed on campus or online.

Declaring This Certificate

- Applicants must have a B.A. or B.S. degree.
- Interested students must register their intent to complete the certificate with the History Department Graduate Advisor, Peter Kopp (peter.kopp@ucdenver.edu). Students already enrolled in a graduate program at CU Denver can begin their certificate work at any point during their studies. Non-degree students must apply to the university as a non-degree seeking student.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Global History advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 12 HIST credit hours.
2. Students must complete all HIST credit hours at the graduate level (5000 and above).
3. Students must earn a minimum grade of B- (2.7) in all courses that apply to the certificate and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Courses taken using P+/P/F or S/U grading cannot apply to certificate requirements.
4. Students must complete all certificate credit hours with CU Denver faculty.

To learn more about the Student Learning Outcomes for this program, please visit our website (https://clas.ucdenver.edu/history/global-history-certificate/).
U.S. History Graduate Certificate

Introduction
The U.S. History Graduate Certificate provides CU Denver graduate students and the wider community the opportunity to explore topics in United States History while simultaneously learning professional skills in historical research and historical dissemination. This Certificate is designed for students interested in pursuing a graduate-level education in United States History and for professionals seeking accreditation and/or promotion in the fields of education, museums, historic preservation, government, law, and the arts.

The certificate can stand on its own or it can serve as a stepping stone to a Master’s Degree in History.

1 may be taken as an elective, if not taken in this category

To learn more about the Student Learning Outcomes for this program, please visit our website (https://clas.ucdenver.edu/history/us-history-certificate/).
Overview
The Master of Humanities degree program offers graduate interdisciplinary studies designed for recent university graduates or those who have graduated less recently and are now seeking intellectual enrichment, career change or preparation for a PhD or professional school. Some students are teachers or other professionals seeking additional training to expand their expertise. Many enroll in the program for the sheer satisfaction of intellectual enrichment. It is ideal for students whose professional and personal obligations require flexibility and accessibility. Whether they are part-time or full-time students, students are able to pursue their interests across disciplinary boundaries and enroll in courses from a number of departments. Students who pursue the Master of Humanities will take courses from disciplines traditionally included in the category of liberal arts, such as literature, philosophy, history, communication, fine arts, art history, theatre and music. But they may also include appropriate coursework from the social sciences or other areas. Each student’s program is supervised by an MH faculty advisor.

Requirements for Admission
General rules for graduate admission, as well as the following apply to admission into the MH program:

- evidence of a bachelor’s degree
- an official copy of transcripts from all community colleges, colleges, and universities attended
- overall GPA of at least 3.2 out of 4.0
- a 15-20 page writing sample
- three letters of recommendation (at least two from academic sources)
- appropriate undergraduate training or professional background, or experience that provide evidence of ability to pursue the MH degree
- a typed statement specifying the goal of advanced study in the humanities expressed in clear, correct, and effective English. Applicants should provide a statement of their background (education and experience) and its relevance to their proposed interdisciplinary graduate work, and why this graduate program is relevant to their interests.
- standardized test scores are not required, but will be considered if submitted

After meeting all other requirements for admission, applicants may be required to have an interview to discuss their interest in the program and their plans for study.

Provisional Admission
Applicants may be admitted as provisional-status graduate students if their GPA is low and their complete record indicates a high probability of success.

NOTE: Prospective students are in no way required to pursue graduate courses as a non-degree student in order to merit acceptance to the MHMSS program. Taking graduate courses at CU Denver does not guarantee a prospective student acceptance into the MHMSS program.

Up to 12 semester hours of CU Denver graduate-level work taken as a non-degree student or taken from another university may be accepted by the program once a student has been admitted to the program. For further information on non-degree graduate student status, see the Information for Graduate Students (p. 37) section of this catalog. In the case of CU Denver graduate students transferring to the MH program, previous coursework may be accepted as appropriate to the MH plan of study.

International Students
International students must also meet CU Denver requirements for international (p. 43) admission. See the Information for International Students section of this catalog or call 303-315-2230 for further information.

Humanities (HUMN) Courses
HUMN 5000 - 19th and 20th Century Continental Philosophy (3 Credits)
A seminar on key problems and thinkers in the nineteenth & twentieth century continental philosophical traditions and their contemporary significance. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4000/5000 and SSCI 5000. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HUMN 5013 - Methods and Practices of Graduate Interdisciplinary Humanities (3 Credits)
The second of three required Master of Humanities core courses, this course introduces beginning graduate students to methodologies and intellectual frameworks for gathering, organizing, and developing interdisciplinary research. Focus is on the application of theories and methods of research, interpretation and analysis in humanistic research through readings that explore philosophical and cultural discourses have altered theory and method. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Restriction: Restricted to Graduate Level Students. Cross-listed with PHIL/SSCI 5013. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring.
HUMN 5020 - Foundations and Theories of Interdisciplinary Social Science (3 Credits)
The first of the Master of Social Science core courses, this course exposes beginning graduate student to critical, key analytic models, and their application in disciplines that comprise the social sciences (classical anthropology, sociology, sociology of religion, philosophy of history, political theory, classical psychology, etc.) for the purpose of graduate-level interdisciplinary social science research. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 5020 and PHIL 5020. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

HUMN 5025 - Foundations and Theories of Interdisciplinary Humanities (3 Credits)
Exposes the beginning graduate student to exemplary works and methodologies of disciplines oriented to humanities and social sciences, such as philosophy, sociology, history, communication, fine arts, and literature. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 5025. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

HUMN 5101 - Pragmatism: Classical American Philosophy (3 Credits)
The most significant philosophical tradition born in the United States is pragmatism. Examines several of the most important classical works of this tradition, the influence of thinkers who have helped pragmatism, and the contemporary relevance of this tradition. Figures who may be included in this course are: Emerson, Pierce, Royce, James, Dewey, Mead, Rorty. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4101, 5101, SSCI 5101. Term offered: fall. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

HUMN 5220 - Art, Beauty, and Aesthetic Criticism: Philosophy of Art (3 Credits)
What makes something a work of "art"? How should art be interpreted or evaluated? Can we really debate about "taste" or beauty? Why do we call some people "artists" or some experiences "aesthetic"? Where does creativity come from? This course investigates such questions, offering a range of historical and contemporary answers, and examines the social, political, and philosophical roles of art in contemporary society. Methods of engaging these questions may include multimedia technologies as well as individual and group field trips to local art venues. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4220 and PHIL 5220. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HUMN 5242 - Medicine, Health Care, and Justice: Bioethics (3 Credits)
Anyone entering a medical profession must confront tough ethical issues and dilemmas. These often arise suddenly, so practitioners best preparation is to think ahead about what will likely occur. This course introduces students to a variety of cases and philosophical theories useful to healthcare careers. For example, What is "health" and who determines it? Is there a right to health care? How should medical scarcity (vital organs, vaccines, supplies, etc.) be addressed? What duties are owed to patients by healthcare providers, and why? On what grounds may medical treatment be demanded — or refused? The goal of the class is to train students to be nimble and imaginative in how they reason about the difficult cases they will face in their career. Suggested prerequisite one or two previous courses in philosophy, and a minimum grade of C in each course are strongly recommended; if the student lacks this coursework, consult with the professor prior to registration. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4242, PHIL 5242, SSCI 5242. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

HUMN 5251 - First Amendment: Theory and Context (3 Credits)
First Amendment jurisprudence including free speech/responsibility, sedition/ seditious libel/dissent, prior restraints, time/place/manner restrictions, hate/intimidating speech, defamation, privacy/security tensions, intellectual property/public good, advertising, corporate speech, sexual expression, and public status of religion. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 4251/SSCI 4251/SSCI 5251. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

HUMN 5325 - How to think green: Environmental Ethics (3 Credits)
Is it wrong to extinguish a species? What makes cruelty to animals wrong? Do trees have rights? Is the earth a resource we can use any way we want? Is vegetarianism a more ethical way to live — or just another lifestyle choice? As citizens of the world, we are bombarded by such questions. Understanding what is fundamental clarifies thinking and coordinates action. This course introduces ethical theories relevant to problems such as animal and species welfare, deforestation, pollution, climate change, and the sustainability of the planet. By examining multiple perspectives, students gain confidence judging which issues and data are significant and deciding what kind of world we should create with our actions and inactions. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4325, PHIL 5325 and PSCI 4325 and PSCI 5325. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.
HUMN 5540 - Law, Diversity and Community in United States History (3 Credits)
Engaging extensive primary and secondary source material, course applies an interdisciplinary approach to diversity and conflict that often surrounds the quest for economic, moral and social inclusion in the United States. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 5540. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HUMN 5600 - Questioning Religious Belief and Practice: Introduction to Philosophy of Religion (3 Credits)
Does God exist? Can the existence of God be proved? When is believing on faith acceptable? How or why is there a “problem of evil”? What are the attributes of a “god” and how can they be known, if at all? What is the relation of God to the world we experience? How does morality relate to religious belief and practice? The goal of the course is to broaden and deepen our understanding of key philosophical debates within religious traditions as we study prominent thinkers in the history of philosophy. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4600, PHIL 5600, RLST 4060, RLST 5060, PHIL 5060, and SSCI 5600. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

HUMN 5650 - Visual Arts: Interpretations and Contexts (3 Credits)
Provides graduate-level interdisciplinary study in the historiography, methodologies, and theories used to understand how visual arts, including painting, sculpture, photography, film and performance art influence the making of culture. Students gain critical skills for analyzing a variety of visual and aesthetic products of culture. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

HUMN 5720 - Sexuality, Gender and Their Visual Representation (3 Credits)
Studies sexuality, gender and identity representation from classical antiquity through the present in the visual arts. Uses the literature of visuality, feminism, race and queer theory. Explores representations of femininity, masculinity and androgyny and their reinforcement and challenge to gender-identity norms. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 5720 and WGST 5720. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HUMN 5770 - Selling Empires: The Art of Visual Propaganda (3 Credits)
Western empires disseminate political, social, economic & cultural practices through complex interplay of cultural practices. Visual production is a complex site for meaning making within imperialism. Examines how visual discourses operated to create meaning for audiences, through focus on postcolonial critique. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SJUS 5770, SSCI 5770, WGST 5770, HUMN 4770, SJUS 4770, SSCI 4770, and WGST 4770. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HUMN 5833 - Existentialism (3 Credits)
Examines one of the most influential movements in recent European thought, beginning with existentialism’s 19th century roots, and continuing on to the existentialist philosophers of the 20th century. Figures covered may include Dostoyevsky, Kierkegaard, Nietzsche, Heidegger, Sartre and de Beauvoir. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 3833, PHIL 5833, and SSCI 5833. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HUMN 5840 - Independent Study: HUMN (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

HUMN 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

HUMN 5920 - Philosophy of Media and Technology (3 Credits)
A philosophical examination of interrelationships between contemporary media, technology, and their impacts upon character of contemporary life and values. Topics may include ethics, epistemology, democracy, advertising, media literacy and criticism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4920, 5920, SSCI 5920. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HUMN 5924 - Directed Research and Reading in Interdisciplinary Humanities (3 Credits)
The first of the Master of Humanities core courses, this course provides beginning graduate students grounding in critical theorists, key analytic models, and their application in disciplines which comprise the humanities (philosophy, literature, art history, visual studies, history, communication) for the purpose of graduate-level, interdisciplinary humanities research. Examines questions about reality, knowledge, ethics that affect research and writing in the humanities. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Term offered: spring, fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.
HUMN 5933 - Philosophy of Eros (3 Credits)
What does it mean to understand philosophy as an erotic activity? This question will be examined, first by studying Plato's dialogues—such as Lysis, Symposium and Republic—and then by reading texts from Sigmund Freud, Michael Foucault and others. Cross-listed with PHIL 4933, WGST 4933/5933 and SSCI 5933. Max Hours: 3 Credits.
Grading Basis: Letter Grade

HUMN 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

HUMN 5950 - Master's Thesis (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

HUMN 5960 - Master's Project (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

HUMN 5984 - Topics: Interdisciplinary Humanities (3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Term offered: fall, spring. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HUMN 6010 - Methods and Theories of Feminism and Gender (3 Credits)
This course provides graduate-level interdisciplinary study in historiography, methodologies and theories of women’s, gender, and sexuality studies and considers how culture is constructed around these categories. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with WGST and SSCI 6010. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
Overview

Please click here (p. 430) to see more information about the program.

The Master of Humanities degree offers students the opportunity to individually tailor their studies to meet their needs and interests. In consultation with a faculty advisor, students develop a unique plan of studies by combining fields, such as History, Philosophy, Cultural Studies, Film, Women’s and Gender Studies, Public Policy, American Studies, Fine Arts, Sociology, Literature, Anthropology, Communications, Political Science, and Economics.

Our degree programs are designed for part-time or full-time students whose professional and personal obligations require a program that is flexible.

Why Interdisciplinary Studies?

While most colleges and universities are organized around traditional disciplines, academic institutions are increasingly recognizing the importance of interdisciplinary research in an emerging global economy and culture. By approaching knowledge and learning through an interdisciplinary model, students integrate and synthesize the methods, tools, theories and concepts of diverse disciplines to tackle questions and research from new angles. By bringing together sometimes disparate and contrasting disciplines, new possibilities for dialog and interaction arise that can address the complex questions and issues that characterize the world today.

Explore the possibilities!

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their advisor to confirm the best plans of study before finalizing them.

Program Requirements

1. Students must complete a minimum of 36 approved credit hours.
2. Students must complete a minimum of 30 graduate (5000-level and above) approved credit hours.
3. Students must earn a minimum grade of B- (2.7) in all courses applied to the degree and must achieve a minimum cumulative program GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Courses taken using P+/P/F or S/U grading cannot apply to degree requirements.
4. Students must complete all coursework with CU Denver faculty. Students may concurrently pursue graduate-level coursework at other CU system campuses with the approval of their MHMSS graduate advisor.

Program Restrictions, Allowances and Recommendations

1. Courses credited toward the MH degree must typically be taken at CU Denver (a maximum of 12 graduate credit hours may be transferred from other institutions after matriculating into the MH program, subject to the MH director’s approval).
2. Each student’s program is supervised by MHMSS faculty. All independent study, project, and thesis contracts must be approved in advance by the program director. A total of two independent study courses and one internship may count toward the degree.
3. A maximum of two 4000-level undergraduate courses may apply, with faculty approval.
4. Students wishing to count credits accrued from a study abroad program while pursuing the MH must follow graduate education policies and procedures and must have approval of the program director in advance of studying abroad.
5. An oral exam defending the project or thesis before a committee of three faculty members must be passed in order to graduate.
6. A grade below B- in any given course will not be counted toward the degree.
7. Students make take up to three graduate-level online courses (up to 9 credits) towards the degree, with prior approval.
8. All students must complete and pass a final project or thesis and an oral comprehensive defense of that work, in order to graduate.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>

</table>
| Complete the following Core Seminar courses | 9
| HUMN/SSCI/PHIL 5000  | Methods and Practices of Graduate Interdisciplinary Humanities 1 |
| HUMN/SSCI 5025       | Foundations and Theories of Interdisciplinary Humanities 2 |
| or SSCI/PHIL 5025    | Foundations and Theories of Interdisciplinary Social Science |
| HUMN 5924            | Directed Research and Reading in Interdisciplinary Humanities 3 |

Complete a minimum of 21 credit hours of elective courses. Students may choose to create their own curriculum from at least two disciplines addressing their specific research interest.

Students may choose to follow an approved specialized track. Prior to taking electives, students must meet with a MHMSS program faculty advisor and establish their course of study. If students decide to change their course of study or want to substitute approved coursework, they must meet with a MHMSS program advisor in advance and gain pre-approval.

General MH Track (p. 435)
Ethnic Studies Track (p. 435)
Health Humanities Track (p. 435)
Philosophy and Theory Track (p. 436)
Social Justice Track (p. 436)
Visual Studies Track (p. 437)
Women’s and Gender Studies Track (p. 437)

Complete a Thesis or Project and an oral comprehensive defense of that work, in order to graduate.

In order to proceed with a project or thesis, all students must submit a proposal and gain approval from three faculty members and the program directors. Students who opt to complete a thesis will submit a thesis proposal after completing 30 credit hours of course work. In the case of a project, students will submit a project proposal after 33 credit hours.

HUMN 5950 Master’s Thesis

Students who complete a thesis will complete 21 credit hours of electives and six credit hours of Master’s Thesis.

HUMN 5960 Master’s Project
Students who complete a project will complete 24 credit hours of electives and three credit hours of Master's Project.

| Total Hours | 36 |

1. Must be taken during the first year, offered in the spring only.
2. Must be taken during the first year, offered in the fall only.
3. Students should take this course after they have completed 21-24 credit hours and are ready to write a proposal for their thesis or project. This course is always offered in the spring and occasionally in the fall, as needed.

**General MH Track**

Students pursuing the general MH degree track create a course of study based on their individual interests and goals. In consultation with a faculty advisor, students choose two or three academic disciplines as areas of concentration.

**Ethnic Studies Track**

Students pursuing the Ethnic Studies track explore the construction of race and ethnicity by governments and communities through the intersection of popular culture and public policy in both the historical and contemporary contexts.

Social Justice Track

The Social Justice Track encourages graduate students to broaden and deepen their intellectual tools as well as their practical knowledge as to how democracy, education, consumerism, media, race, class, gender, policy, and law intersect.

It is highly recommended that students in this track take at least one quantitative and/or one qualitative research methods course as part of their plan of study. There are quantitative and qualitative methods courses offered in Anthropology, Environmental Science, Political Science, Sociology, and Research, Evaluation, and Statistical Methodology (RESM), which can be approved by students MHMSS program faculty.

Complete a minimum of 12 credit hours of approved social justice related elective coursework from the list below, substitutions may be approved by the student’s advisor:

Complete a project or thesis on an approved social justice related topic.

Visual Studies Track

The Visual Studies Track provides students focused studies in disciplines that apply critical analysis to our visual world, such as art history, museum studies, film studies, new media studies, and cultural studies. In a world whose work force and creative citizenry are focused on the growth and use of visual technologies, visual literacy with sophisticated analytic skills is critical.

Complete 3 credit hours of a methods/theory course:

Denver, CO 80217-3664

Overview

The Master's program in Integrated Sciences (MIS) is designed to provide a broad-based, content-rich curriculum that integrates knowledge and methods from natural and physical sciences, mathematics, and computer science disciplines. MIS is a 30 semester-hour interdisciplinary program in which students take courses from two or three disciplines, identify a faculty mentor, and complete a Master's project or thesis. The signature aspect of the program is that the capstone experience must truly integrate the interdisciplinary content into a unified program of research.

Specifically, students are required to complete a coherent selection of classes in a minimum of two areas and a maximum of three areas within the disciplines of biology, chemistry, computer science, environmental sciences, geology, mathematics or physics. An interdisciplinary area of study (including but not limited to fields such as biochemistry, biophysics, or computational biology) may also be considered, upon approval by the Program Director. Each student must meet with the Program Director within the first semester of study to create a program goal statement, which is used to guide the development of their individualized curriculum. All classes applied toward the degree must be related to the student's stated program goal and receive prior approval for inclusion in the program of study.

The MIS curriculum is ideal for students interested in bridging the traditional barriers of science disciplines. It is perfect preparation for a broad range of careers that require skills in multiple areas, disciplines, and fields. Students pursuing an undergraduate BS in Physics (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/physics/physics-pure-applied-physics-option-bs/#degreerequirementstext) from the University of Colorado are also eligible for an accelerated 4+1 program in which they will complete 12 credit hours of their graduate coursework in their undergraduate career and those credits will apply to both degrees.

MIS students are as diverse as our curriculum. Some are already working in a technical environment with an interest in higher-level research activities. Others are educators looking to enhance their proficiency across disciplines that will prepare them for teaching opportunities such as CU Succeed and other concurrent enrollment programs.

Our program is especially attractive to graduating double majors seeking a Master's program that will allow them to further explore their dual interests through graduate school. Health science professionals have used the program to enhance their existing credentials with a Master's degree designed around biochemistry, biophysics, or computational biology, thus increasing their desirability to PhD and MD programs.

Admission Requirements

Admission into the Integrated Sciences program is competitively based. Minimum requirements for an application to be considered are:

- the graduate application form for the University of Colorado Denver, including all application fees
- a statement of purpose specifying why the applicant wishes to be admitted to the program, the applicant's intended primary and secondary disciplines of interest, and their academic and professional goals
- three letters of recommendation from individuals who can speak to the applicant's academic qualifications, of which at least two must be from academic sources
- transcripts from all institutions of higher learning attended by the applicant
- a bachelor's degree from an accredited college or university
- a minimum cumulative undergraduate GPA of 3.0 on a 4.0 scale; however, applicants with an undergraduate GPA below 3.0 may be considered if they have taken the Graduate Record Examination (GRE) and if the scores are forwarded to the program office
- 40 semester hours of undergraduate courses in biology, chemistry, computer science, environmental sciences, geology, mathematics, and/or physics

Possessing the minimum requirements will guarantee that the application is considered. It does not, however, guarantee admission. The admissions committee will select students competitively to create a high-quality and balanced cohort of participants entering the program each year.

Application Deadline

Students are admitted for the spring and fall semesters. Applications are reviewed on a rolling basis. Priority deadlines for completed applications are April 15 for fall admission and October 15 for spring admission.

Physics, BS 4+1, Master of Integrated Sciences, MIS

Students pursuing the 4+1 track must apply and be accepted for participation in the BS/MIS program prior to completion of the BS degree in consultation with both the undergraduate and graduate advisors. Students must complete a 4+1 intent form (http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/integrated-sciences/BMA_form_1_1_.pdf) to formally declare this program, as they work very closely with undergraduate and graduate advisors to ensure they are on track and completing requirements as necessary. Students must apply and be accepted to the Integrated Sciences, MIS during the last semester of their undergraduate career. A maximum of 12 credit hours of graduate
level courses that are applied to the undergraduate degree will apply to the graduate degree.

**Programs**

- Integrated Sciences, MIS (p. 441)

### Master of Integrated Sciences (MINS)

#### Courses

**MINS 5000 - Topics** (3-4 Credits)
With prior approval by a candidate's advisor, an MIS candidate may enroll in an upper division course in science, computer science, mathematics, and complete additional work for graduate credit. Prereq: MIS candidate with 12 hours of upper division (4000 level) or graduate level work completed. Term offered: fall, spring, summer. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Prereq: MIS candidate with 12 hours of approved coursework completed and Program Director approval.
Typically Offered: Fall, Spring, Summer.

**MINS 5200 - Research Methods in Interdisciplinary Science** (3 Credits)
This course introduces methods used in interdisciplinary research in the physical and natural sciences, mathematics, and computer science and prepares students for developing research-based Master's project/thesis proposals. Topics include the scientific method and ethics, experimental design, data collection and analysis, literature searches, evaluation of scientific literature, scientific writing, and oral presentation. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MIS Candidate and Program Director approval (consent required). Typically Offered: Fall.

**MINS 5840 - Independent Study** (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: fall, spring, summer. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MIS Candidate and Program Director approval (consent required). Typically Offered: Fall, Spring, Summer.

**MINS 5880 - Directed Research** (1-3 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: MIS Candidate and Program Director approval (consent required). Typically Offered: Fall, Spring, Summer.

**MINS 5939 - Internship** (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: fall, spring, summer. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Prereq: MIS Candidate and Program Director approval (consent required).
Typically Offered: Fall, Spring, Summer.

**MINS 5950 - Master's Thesis** (1-4 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Prereq: MIS Candidate and Program Director approval (consent required).
Addtional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

**MINS 5960 - Master's Project** (1-4 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: fall, spring, summer. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Prereq: MIS Candidate and Program Director approval (consent required).
Addtional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
Integrated Sciences, MIS

Please click here (p. 439) for more information on the Integrated Sciences program.

Introduction

Students in the Integrated Sciences program have the opportunity to take courses from a variety of areas in mathematics, the natural and physical sciences (biology, chemistry, environmental sciences, geology, and physics), and computer science in an interdisciplinary STEM program designed for professional growth in their area of interest. These areas are further explored through a required project or thesis that includes focused independent research on a topic that integrates two or three of the disciplines mentioned above.

The length of time it takes to complete the degree is determined by the student’s own schedule flexibility; many finish within two years of full-time work. In accordance with Graduate Education Policies and Procedures, the degree must be completed within seven years of matriculation.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with the Program Director to confirm the best plans of study before finalizing them.

Students pursuing the 4+1 track must apply and be accepted for participation in the BS/MIS program prior to completion of the BS degree in consultation with both the undergraduate and graduate advisors. Students must complete a 4+1 intent form (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/physics/physics-bs/BMA_form_1_1_pdf) to formally declare this program, as they work very closely with undergraduate and graduate advisors to ensure they are on track and completing requirements as necessary. Students must apply and be accepted to the Integrated Sciences, MIS during the last semester of their undergraduate career. A maximum of 12 credit hours of graduate level courses that are applied to the undergraduate degree will apply to the graduate degree.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 30 credits from approved coursework.

2. Students must complete a minimum of 24 graduate (5000 level and above) credit hours. Under exceptional circumstances and only with approval of the Program Director, a maximum of 6 credit hours may be at the 4000-level, as long as those credits have not been applied to another degree.

3. Students must earn a minimum grade of B- (2.7) in those courses applied to the degree and taken at CU Denver, and must maintain a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Students cannot complete program requirements as P+/P/F or S/U.

4. All credits for the program must be completed with CU Denver faculty. The Graduate Education policies allow concurrent enrollment at CU Boulder or UCCS to be counted in residence, and allow up to 12 credit hours in transfer courses, with approval of the Program Director.

Program Restrictions, Allowances and Recommendations

1. For students who are completing the Physics, BS 4+1 track, a maximum of 12 credit hours of graduate level courses that are applied to the undergraduate degree will apply to the graduate degree. Students must also earn a B- or higher in graduate level coursework, for it to apply to the Integrated Science, MIS.

2. Graduate education policies will allow up to 12 hours of graduate transfer credits (dependent on a B grade or better). However these credits must fit the student’s program goal in order to apply to the MIS degree and be approved by the Program Director.

3. No coursework may be applied that will be older than seven years on the day of graduation. For more information please contact the Program Director.

4. Students must complete a minimum of nine credit hours in the primary concentration and a minimum of six credit hours in a secondary concentration (all 5000+ level).

Graduate Research Advisor and Examination Committee

All candidates for the MIS degree must select a faculty research advisor and arrange for two other faculty members to serve with the research advisor as the candidate’s graduate examination committee. The committee members must have graduate standing at the University of Colorado Denver and be approved by the Program Director. The name of the faculty research advisor must be submitted to the Program Director at the start of the third semester following matriculation to the program.

Concentration and Breadth Requirements

Students must designate one area of concentration (the primary area of study) and one or two breadth areas (the secondary and, if applicable, tertiary areas of study) within the disciplines of biology, chemistry, computer science, environmental sciences, geology, mathematics or physics. An interdisciplinary area of study (including but not limited to fields such as biochemistry, biophysics, or computational biology) may also be considered, upon approval by the Program Director.

Students must complete a minimum of nine semester hours in the chosen area of concentration and a minimum of six semester hours in each breadth area.

In consultation with their program advisor, students will complete additional concentration/ breath or elective courses to reach their minimum required credit hours.

Students who are admitted through the Physics, BS 4+1 track, will complete the following courses in their undergraduate career. These 12 credits will also apply to their Masters degree.

One graduate STEM (MATH, PHYS, ELEC, BIOL, etc.) course chosen to meet the student's MIS Program Goals, in consultation with the MIS Program Director.

**Project or Thesis**

The program provides students with two options as their capstone experience, either a project or a thesis, depending on their academic and professional goals. All students must conduct independent research integrating coursework from the disciplines in their program of study. The research is conducted as either a project (requiring 3-4 semester-hours of MINS 5960 Master's Project) or a thesis (requiring 4-6 semester-hours of MINS 5950 Master's Thesis), and is presented to their examination committee in both written and oral forms. The student must successfully defend their project/thesis in an oral examination (defense) in order to graduate. Prior to enrolling in Project or Thesis hours, all students must submit a proposal approved by three faculty members (one of whom is their graduate faculty research advisor) and the Program Director.

**Integrative Biology**

**Chair:** Amanda Charlesworth  
**Program Assistant:** Barbara Schmidt, Barbara McClure  
**Administrative Assistant:** Jacki Craig  
**Graduate Program Director:** Michael Wunder  
**Health Careers Advising:** Trishia Vasquez, Kenneth English  
**BA/BS-MD Program Coordinator:** Kenneth English  
**Lab Coordinator:** James Salmen  
**Office:** Science, 2071  
**Telephone:** 303-556-8440  
**Fax:** 303-556-4352  
**Website:** clas.ucdenver.edu/biology/ (http://clas.ucdenver.edu/biology/)

**Overview**

**MS in Biology**

The MS in Biology program offers students the opportunity to receive advanced training and research experience in an area of specialization of one of our nationally and internationally recognized faculty members. The master's program is designed to prepare graduate students for careers in research and teaching; for employment in business, industry and government; for existing career advancement; and for continuing post-baccalaureate work in PhD and professional programs. Students in the program specialize in fields ranging from cell and molecular biology to ecology and evolution.

The master's program is a research-based program. Applicants to the program must have a declared area of specialization that aligns with the research focus of a biology graduate faculty member. Faculty expertise can be found undergraduate faculty profiles on the Department of Integrative Biology website (clas.ucdenver.edu/biology/ (http://clas.ucdenver.edu/biology/)). Students must contact prospective faculty advisors to determine if openings are available within the faculty member's research group.

Click here (p. 449) to learn about the Biology MS requirements.

**PhD in Integrative and Systems Biology**

The PhD program in Integrative and Systems Biology at the University of Colorado Denver is a multidisciplinary, dual campus program that offers students opportunities to address complex questions in biology using computational, laboratory, and field approaches. The more than 40 program faculty members allow students to participate on a diversity of projects at all levels of biological organization, ranging from ecology and environmental microbiology to biochemistry, developmental biology and neuroscience. Depending on the track an incoming student chooses, the approach will either be to explore the problem at multiple levels of biological organization (integrative biology) or to explore the multi-component nature of a biological system (systems biology).

The PhD program is research-based. Applicants to the program must have a declared area of specialization that aligns with the research focus of a program graduate faculty member. Faculty expertise can be found undergraduate faculty profiles on the Department of Integrative Biology website (clas.ucdenver.edu/biology/ (http://clas.ucdenver.edu/biology/)). Students must contact prospective faculty advisors to determine if openings are available within the faculty member’s research group.

Click here (p. 450) to learn about the Integrative and Systems Biology PhD requirements.

**Requirements for Admission MS**

- A BA/BS from an accredited institution awarded within the last 10 years (validation of current content may be required)  
- Minimum undergraduate GPA: 3.0  
- TOEFL: required for international applicants from countries in which English is not the official language  
- 3 letters of recommendation  
- Official transcripts from all attended institutions  
- Students are required to contact faculty in advance. Prior to application, applicants must have identified and contacted an available Faculty Advisor to ensure the availability of a position and appropriate research interests

**Prerequisite courses required:**

- One year of general biology (lecture and laboratory)  
- One year of any combination of chemistry, physics or mathematics  
- One course in applied or biological statistics (through regression and ANOVA)  
- Additional prerequisite requirements may be set by individual faculty

Application deadline is December 1 for both domestic U.S. and international students. Application to the master's in biology program is through CU Denver Admissions.

**Requirements for Admission PhD**

- A BA/BS or MS from an accredited institution awarded within the last 10 years (validation of current content may be required). Minimum undergraduate GPA: 3.0  
- TOEFL: required for international applicants from countries in which English is not the official language  
- 3 letters of recommendation  
- Official transcripts from all attended institutions  
- Students are required to contact faculty in advance. Prior to application, applicants must have identified and contacted an available Faculty Advisor to ensure availability of a position and appropriate research interests

**Prerequisite courses required:**

- One year of General Biology is preferred. Where needed, supplementary courses or reading programs may be designed to provide background information of sufficient depth for the Program curriculum  
- One course in applied or biological statistics (through regression and ANOVA)  
- Additional prerequisite requirements may be set by individual faculty

Applications will be considered annually starting December 1 for both domestic US students and international students. Application to the PhD program is through CU Denver Admissions.

- Biology, MS (p. 449)  
- Integrative and Systems Biology, PhD (p. 450)

**Faculty**

**Professors:**

Michael J. Greene, PhD, Oregon State University
Medical campus. downtown campus as well as the School of Medicine on the Anschutz Medical campus. Cross-listed with BIOL 4125. Term offered: spring. Max hours: 3 Credits.

**BIOL 5024 - Introduction to Biotechnology** (3 Credits)

Introduces aspects of biotechnology within a historical context, including medical, forensic, agricultural and microbial biotechnology. Addresses principles behind state-of-the-field techniques in recombinant DNA technology, bioinformatics, proteomics and genomics. Biotechnology regulations and ethics will also be discussed. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4024. Max hours: 3 Credits.

Grading Basis: Letter Grade

**BIOL 5025 - Molecular Biology Lab** (3 Credits)

Provides hands-on experiences in molecular biology and an appreciation for using the tools of molecular biology to study biological systems. Emphasis is placed on DNA cloning, PCR, mRNA and protein detection in the context of gene editing. Experimental design and the theories underlying the techniques are also discussed. Restriction: Restricted to degree-granting graduate programs on the downtown campus as well as the School of Medicine on the Anschutz Medical campus. Cross-listed with BIOL 4125. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

**BIOL 5125 - Molecular Biology Lab** (3 Credits)

Provides hands-on experiences in molecular biology and an appreciation for using the tools of molecular biology to study biological systems. Emphasis is placed on DNA cloning, PCR, mRNA and protein detection in the context of gene editing. Experimental design and the theories underlying the techniques are also discussed. Restriction: Restricted to degree-granting graduate programs on the downtown campus as well as the School of Medicine on the Anschutz Medical campus. Cross-listed with BIOL 4125. Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade

**BIOL 5050 - Advanced Biology Topics** (1-8 Credits)

Examines current topics in the field of biology. Topics vary from term to term. See Schedule Planner for current topics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4050. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.

**BIOL 5053 - Disease Ecology** (3 Credits)

The study of the underlying principles that influence the spatio-temporal patterns of infectious disease in environments. Students will apply ecological theories about concepts such as biodiversity, trophic interactions, landscape structure, and nutrient cycling to the study of disease. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4053. Max hours: 3 Credits.

Grading Basis: Letter Grade

**BIOL 5055 - Virology** (3 Credits)

This is an upper level undergraduate/graduate class providing an in-depth study of the history of virology, different types of viruses, viral disease, research to combat viral infections, and different uses of viruses in biotechnology. Note: Students will not earn credit for this course if they have already earned credit for BIOL 4051 or BIOL 5051. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4055. Max hours: 3 Credits.

Grading Basis: Letter Grade

**BIOL 5064 - Cell Biology of Disease** (3 Credits)

Builds on the foundations laid in the prerequisite courses. How alterations in membrane transport, autophagy, mitochondria, lysosomes, cilia, unfolded protein response and autophagy lead to major human diseases. A major emphasis is the control and integration of cellular activities. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4064. Max hours: 3 Credits.

Grading Basis: Letter Grade

**BIOL 5052 - Advanced Ecology** (3 Credits)

This combination seminar and lecture course focuses on state-of-field knowledge, current theories and recent models in selected areas of ecology, such as theoretical ecology, evolutionary ecology, population biology and ecosystems ecology. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4052. Max hours: 3 Credits.

Grading Basis: Letter Grade

**BIOL 5057 - Integrative Biology** (3 Credits)

The study of the underlying principles that influence the spatio-temporal patterns of infectious disease in environments. Students will apply ecological theories about concepts such as biodiversity, trophic interactions, landscape structure, and nutrient cycling to the study of disease. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4057. Max hours: 3 Credits.

Grading Basis: Letter Grade

**BIOL 5059 - Advanced Biology** (3 Credits)

Reviews current topics in the field of biology. Topics vary from term to term. See Schedule Planner for current topics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4059. Repeatable. Max hours: 9 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 9.
BIOL 5126 - Molecular Genetics (3 Credits)
Examines molecular techniques and their application to experimental genetics, specifically organization and mapping of genomes, application and model systems in defining hereditary components of disease, and mechanisms of identifying mutations and their implications for disease. Also addresses application of recombinant DNA technology. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4126. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5134 - Human Genetics (3 Credits)
Advanced survey of the current status of the field. Emphasis on understanding, diagnosis and treatment of genetic disease and on the impact of molecular biology on human genetics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4134. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5144 - Medical Microbiology (3 Credits)
Provides an understanding of the relationship between pathogenic organisms and their host. Emphasis is placed on the area of medical bacteriology, with attention given to mechanisms of pathogenesis, genetics of disease, serology and treatment. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4144. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5154 - Conservation Biology (3 Credits)
Basic concepts and theories in population biology and genetics as they apply to issues relating to the preservation of biodiversity, such as the genetics of small populations, captive propagation, restoration ecology and the design of nature reserves. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4154. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5165 - Neurobiology (3 Credits)
Overview of neuroscience, covering the cellular basis of neuronal activity, sensory structures and the structure and function of the human brain. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4165. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5225 - Genomics and Bioinformatics (3 Credits)
Explores how genome-wide data are collected and analyzed. Example applications include human disease, microbial evolution, ecological genomics, and parasite drug resistance. Students implement projects based on real DNA sequencing data. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4225. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5250 - Mechanisms of Animal Behavior (3 Credits)
The proximate and ultimate mechanisms of animal behavior are analyzed using comparative animal examples from the scientific literature. Proximate mechanisms include genetic and physiological processes. Ultimate mechanisms include the role of natural and sexual selection in the evolution of behavior. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4250. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5335 - Plant Structure and Development (4 Credits)
Inclusive and in-depth study of functional anatomy and biology of vascular plants. Topics include: plant biochemistry, biology of the plant cell, simple and complex tissues, secretory structures, functional anatomy, primary and secondary growth, angiosperm reproduction and life cycles, development and additional topics. Responsibilities include lectures, lab, and potential field trips. Course must be taken with both lecture and lab together. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4335. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

Typically Offered: Spring.

BIOL 5345 - Flora of Colorado (4 Credits)
Inclusive and in-depth study of functional anatomy and biology of vascular plants. Topics include: plant biochemistry, biology of the plant cell, simple and complex tissues, secretory structures, functional anatomy, primary and secondary growth, angiosperm reproduction and life cycles, development and additional topics. Responsibilities include lectures, lab, and potential field trips. Course must be taken with both lecture and lab together. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4345. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5415 - Applied Microbial Ecology (3 Credits)
An in-depth study of ecology as it relates to microorganisms; abiotic and biotic interactions within microbial populations in macro- and microhabitats; and the role of microorganisms in influencing and responding to environmental conditions in natural and anthropogenic ecosystems. Emphasis is placed on how the ecology of microorganisms impacts how we engage with our environment. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4415. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall, Spring.

BIOL 5425 - Biogeography (3 Credits)
An in-depth study of biological populations through analysis of geographic distribution patterns in space and time. Emphasis on how biogeography informs studies of evolution and ecology and on applied studies in conservation, sustainability, epidemiology, and disease dynamics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4425. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 5430</td>
<td>Introduction to Spatial Ecology</td>
<td>3</td>
<td>Focuses on patterns of life and ecological interactions in space. Emphasis on drivers of patterns, practical application of spatial ecology software, programming, and introductory spatial statistics on the quantification of patterns. Main topics: Scale and scaling, pattern development, detecting and characterizing patterns, temporal dynamics, and implications of spatial structure to conservation biology, resilience, and ecosystem functioning. Cross-listed with BIOL 4430.</td>
</tr>
<tr>
<td>BIOL 5460</td>
<td>Environmental Toxicology</td>
<td>3</td>
<td>Text and literature-based course provides students with background knowledge concerning environmental toxins, the nature and extent of environmental contamination, and toxicant effects on individual organisms and populations. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4460. Max hours: 3 Credits.</td>
</tr>
<tr>
<td>BIOL 5464</td>
<td>Exercise Physiology</td>
<td>3</td>
<td>This course addresses the dynamic physiological changes associated with exercise. Where human physiology addresses physiological processes at rest, this course explores how the cardiovascular, respiratory, nervous and endocrine systems support increased energy transfer as skeletal muscle becomes more active. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4464. Max hours: 3 Credits.</td>
</tr>
<tr>
<td>BIOL 5494</td>
<td>Population and Evolutionary Genetics</td>
<td>3</td>
<td>Introduces the genetic processes underlying evolutionary change in microbial, plant and animal populations. Topics include: sources of variation, Hardy-Weinberg equilibrium, population genetic structure, natural selection and other evolutionary forces, quantitative genetics and molecular phylogenetics. Emphasis on experimental data. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4494. Max hours: 3 Credits.</td>
</tr>

Special focus is given to lakes, reservoirs, wetlands, streams, rivers, and groundwater. Learning is facilitated through lectures, discussions, student presentations, laboratory and data exercises, and periodic (often virtual) field excursions. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4780, ENVS 4780, and ENVS 5780. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to degree-granting graduate programs.</td>
</tr>
</tbody>
</table>
BIOL 5840 - Independent Study: BIOL (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall, Spring.

BIOL 5910 - Field Studies (3 Credits)
Field studies of individuals, populations and communities comprising a specified ecosystem. Emphasis on field identification of vascular plants and vertebrate animals. Topics include the physical environment, biotic and abiotic interactions, life history, ecological adaptations and biogeography. Note: Lectures and a week-long field trip. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4910. Max hours: 3 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to degree-granting graduate programs

BIOL 5939 - Internship (1-6 Credits)
Designed experience involving application of specific, relevant concepts and skills in supervised employment situations. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

Restriction: Restricted to degree-granting graduate programs

BIOL 5974 - Advanced Evolution (3 Credits)
A capstone course that draws upon concepts from all fields of biology. Topics include the fossil record mass extinctions, the historical development of the modern synthesis, principles and mechanisms of evolution, current viewpoints and controversies. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4974. Max hours: 3 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to degree-granting graduate programs

BIOL 6002 - Biology Skills Sets - Pedagogy (2 Credits)
The purpose is to introduce sound practice in teaching and innovation in pedagogy. Topics covered will include assessment techniques, creation of learning goals, and research methods in biological education. Restriction: Restricted to degree-granting graduate programs. Term offered: fall. Max hours: 1 Credit.
Grading Basis: Letter Grade

Restriction: Restricted to degree-granting graduate programs

BIOL 6655 - Seminar (1 Credit)
Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4990. Term offered: fall, spring. Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 2.

Restriction: Restricted to degree-granting graduate programs

BIOL 6670 - Biological Research Workshop (2 Credits)
For graduate and advanced undergraduate students who are directly engaged in original research. Provides introduction to the discovery dissemination and peer review process associated with writing research proposals, manuscripts, and grants, as well as poster and oral presentations. Students will workshop each other's original research. Graduate students enroll in 6705; research-active undergraduates enroll in 5705. Cross-listed with BIOL 5705. Prereq: Students involved in original research and permission of instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall, Spring.

BIOL 6764 - Biological Data Analysis (4 Credits)
Addresses quantitative aspects of research design, data collection and analysis in the biological sciences. Emphasizes relationships among probability theory, estimation, testing, inference, and interpretation. Includes intensive computer lab using the statistical programming software R to demonstrate both traditional analytical and contemporary simulation based (permutation, bootstrap, and Bayesian) approaches for inference in biology. Restriction: Restricted to degree-granting graduate programs. Max hours: 4 Credits.
Grading Basis: Letter Grade

Typically Offered: Fall, Spring, Summer.

BIOL 6705 - Biological Research Workshop (2 Credits)
For graduate and advanced undergraduate students who are directly engaged in original research. Provides introduction to the discovery dissemination and peer review process associated with writing research proposals, manuscripts, and grants, as well as poster and oral presentations. Students will workshop each other's original research. Graduate students enroll in 6705; research-active undergraduates enroll in 5705. Cross-listed with BIOL 5705. Prereq: Students involved in original research and permission of instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall, Spring.

BIOL 6880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall, Spring, Summer.

BIOL 6950 - Master’s Thesis (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 9.

Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall, Spring, Summer.

Additional Information: Report as Full Time.

Typically Offered: Fall, Spring, Summer.
BIOL 7010 - Integrative and Systems Biology (3 Credits)
Addresses current research problems in integrative biology and system biology by surveying the peer-reviewed literature. Particular attention will be paid to research topics that integrate multiple levels of biological organization and that investigate how properties of systems emerge from interactions of sub-units. Note: New students in the Integrative and Systems Biology PhD program will enroll in this course during their first year. Restriction: Restricted to degree-granting graduate programs. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 7050 - Special Topics (1-3 Credits)
Readings in current biology topics. Specific topics vary and may be proposed by groups of graduate students who identify a suitable faculty instructor or by a faculty member who identifies a need for advanced study in a specialized topic of biology. Restriction: Restricted to degree-granting graduate programs. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to degree-granting graduate programs

BIOL 7650 - Research in Integrative and Systems Biology (1-10 Credits)
Designed to allow doctoral students to conduct research for course credit prior to advancement to candidacy. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Ph.D. student and permission of instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 10.
Restriction: Restricted to degree-granting graduate programs

BIOL 7920 - Directed Reading/Grant Writing (3 Credits)
Allows students to examine current literature related to their specialty area of biological research and to work in collaboration with a research mentor to develop a grant-based dissertation proposal in preparation for the comprehensive review examination. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Students must be in the Integrative and Systems Biology PhD program and have permission from the instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring, Summer.

BIOL 8990 - Doctoral Dissertation (1-10 Credits)
Designed to allow doctoral students to conduct research for course credit prior to advancement to candidacy. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Students must be in the Integrative and Systems Biology PhD program and have permission from the instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 60 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 60.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring, Summer.

Additional Information: Report as Full Time.
Biology, MS

Graduate Program Director: Michael Wunder
(michael.wunder@ucdenver.edu)
Website: https://clas.ucdenver.edu/integrative-biology/academics/graduate-programs (https://clas.ucdenver.edu/integrative-biology/academics/graduate-programs/)

Introduction

Please click here (p. 443) to see Integrative Biology department information.

The MS in Biology program offers students the opportunity to receive advanced training and research experience in an area of specialization of one of our nationally and internationally recognized faculty members. The master's program is designed to prepare graduate students for careers in research and teaching; for employment in business, industry and government; for existing career advancement; and for continuing post-baccalaureate work in PhD and professional programs. Students in the program specialize in fields ranging from cell and molecular biology to ecology and evolution.

The master's program is a research-based program. Applicants to the program must have a declared area of specialization that aligns with the research focus of a biology graduate faculty member. Faculty expertise can be found undergraduate faculty profiles on the Department of Integrative Biology website (clas.ucdenver.edu/biology/). Students must contact prospective faculty advisors to determine if openings are available within the faculty member's research group.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Biology advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

Students matriculate into the research-based MS degree program. Under unusual circumstances, students and/or advisors may petition for a student to switch into the coursework-based MS degree program. The research-based MS program requires a minimum of 30 credits, and the coursework-based MS program requires a minimum of 32 credits. No double-counted courses will be applied to the degree. A maximum of 12 hours of graduate level courses may be transferred and counted toward the degree in either program. Both programs additionally require the student to meet minimum academic residency requirements, to form an advisory committee and to deliver and orally defend written work before the advisory committee, which constitutes the final exam for both programs as required by the Graduate Education Policies and Procedures. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to degree requirements.

Research-based MS degree program requires

1. Completing 30 credits including 3-6 thesis
2. Meeting minimum academic residency requirements

Complete the following required courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 6002</td>
<td>Biology Skills Sets - Pedagogy (required only for students supported by a Graduate Teaching Assistantship)</td>

</tr>
</tbody>
</table>

Total Hours: 30

Complete a minimum of 12 elective credits from graduate level Biology coursework.

Complete a thesis, unless approved to complete coursework-based MS

To learn more about the Student Learning Outcomes for this program, please visit our website. (https://clas.ucdenver.edu/integrative-biology/sites/default/files/attached-files/biology_ms_learning_goals_2020_0.pdf)
**Integrative and Systems Biology, PhD**

**Graduate Program Director:** Michael Wunder  
**Website:** [https://clas.ucdenver.edu/integrative-biology/academics/graduate-programs](https://clas.ucdenver.edu/integrative-biology/academics/graduate-programs/)

### Introduction

Please click here to see Integrative Biology department information

The PhD program in Integrative and Systems Biology at the University of Colorado Denver is a multidisciplinary, dual campus program that offers students opportunities to address complex questions in biology using computational, laboratory and field approaches. The more than 40 program faculty members allow students to participate on a diversity of projects at all levels of biological organization, ranging from ecology and environmental microbiology to biochemistry, developmental biology and neuroscience. Depending on the track an incoming student chooses, the approach will either be to explore the problem at multiple levels of biological organization (integrative biology) or to explore the multi-component nature of a biological system (systems biology).

The PhD program is research-based. Applicants to the program must have a declared area of specialization that aligns with the research focus of a program graduate faculty member. Faculty expertise can be found undergraduate faculty profiles on the Department of Integrative Biology website ([clas.ucdenver.edu/biology/](http://clas.ucdenver.edu/biology/)). Students must contact prospective faculty advisors to determine if openings are available within the faculty member’s research group.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Biology advisor to confirm the best plans of study before finalizing them.

**Graduate Education Policies and Procedures apply to this program.**

**Program Requirements**

The PhD degree requirements comprise six phases. First, students must complete a minimum of 60 credits, including 30 dissertation credits. Up to 30 hours of graduate level courses from other programs may be transferred and counted toward the degree. Students must also pass the Preliminary Exam, form an Advisory Committee and an Examination Committee, meet the academic residency requirement, pass the comprehensive exam, and write and orally defend a dissertation.

Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to degree requirements.

Research-based PhD degree program requires:

1. Completing 60 credits including 30 of dissertation  
2. Meeting minimum academic residency requirements  
3. Passing the Preliminary Exam  
4. Forming Advisory and Examination committees  
5. Writing and defending research proposal  
6. Passing the Comprehensive Exam

Department Email: mathstats-staff@ucdenver.edu

Overview

The Department of Mathematical and Statistical Sciences at the University of Colorado Denver offers degrees and certificates at the undergraduate and graduate levels in mathematics, applied mathematics, data science, and statistics through coursework, research and industrial collaboration. Traditional courses such as calculus, linear algebra, probability, statistics and discrete mathematics are offered regularly by the department. In addition, contemporary subjects such as high-performance computing, numerical analysis, optimization, statistical methods, and operations research are also well represented by course offerings and faculty interests. In all of its activities, the department embodies the outlook that mathematics, statistics, computing and data science are powerful tools that can be used to solve problems of immediate and practical importance.

Apart from the specialized mathematical and statistical skills acquired through coursework, the degrees and certificates also provide general skills that are valued by many employers. These skills include problem solving, critical thinking, analysis, facility with data, the ability to process quantitative information, and perhaps most important of all, the ability to learn new skills and concepts quickly.

Center for Computational Mathematics

Director: Jan Mandel
Website: http://ccm.ucdenver.edu

The Center for Computational Mathematics is composed of faculty members who have an interest in computational mathematics, the study of solving mathematical problems with computers. The center resides in the Department of Mathematical and Statistical Sciences and includes faculty members from various other departments. The primary goal of the center is to foster research in computational mathematics and to maintain a strong educational program at all levels. It has extensive ties with industry along the Front Range and with government laboratories throughout the nation. It offers students an excellent opportunity to receive training and experience in this exciting new field. The center operates several supercomputing clusters.

Math Clinic

Each semester, the Department of Mathematical and Statistical Sciences conducts math clinics that are open to both undergraduate and graduate students. Each clinic is sponsored by a business, government agency or research organization. The clinic sponsor provides a specific project on which students work with the supervision of a faculty member and a sponsor representative. Every clinic produces a final report to the sponsor and provides participating students with an opportunity to apply mathematics to relevant problems. Recent math clinic sponsors include Raytheon, Lockheed Martin, Xenometrix, Budget Truck Rental and United Launch Alliance.

Statistical Consulting Service

The Department of Mathematical and Statistical Sciences regularly offers a graduate course in statistical consulting in which students work on problems provided by researchers and clients at CU Denver and in the Denver metropolitan area. Potential clients should contact the department at 303-315-1700.

Graduate Program

Director: Steffen Borgwardt

The Department of Mathematical and Statistical Sciences offers the MS degrees in Applied Mathematics and Statistics and the PhD degree in Applied Mathematics. Each of these degree programs conforms to the rules and policies of the Graduate Education Policies and Procedures.

Detailed descriptions of the requirements for the MS and PhD degrees are maintained at www.math.ucdenver.edu (http://www.math.ucdenver.edu). The following is an abbreviated summary of these requirements.

Financial Support

PhD students are encouraged to apply for teaching assistantships. A variety of other opportunities for financial support are also available.

Applied Statistics Certificate

Director: Joshua French
Website: https://clas.ucdenver.edu/mathematical-and-statistical-sciences/graduate-certificate-applied-statistics (https://clas.ucdenver.edu/mathematical-and-statistical-sciences/graduate-certificate-applied-statistics/)
Click here (p. 473) to learn about the requirements for the Graduate Certificate in Applied Statistics.

Requirements for Admission

To begin graduate work toward the MS or PhD degrees in Applied Mathematics, a student should have at least the following preparation: 30 semester hours of mathematics with each course grade at B- or better and an overall GPA of 3.0 or better, at least 24 of which are upper-division courses. These courses should include one semester of advanced calculus or introduction to analysis, one semester of linear algebra and one semester of either differential equations, abstract algebra, discrete mathematics or probability.

To begin graduate work toward the MS in Statistics, a student should have at least the following preparation: a baccalaureate (not necessarily in mathematics or statistics) from an accredited college or university with a grade point average (GPA) of 3.0 or above. Students must have taken three semesters of calculus (through multivariate calculus), linear algebra, and a calculus-based statistics course that covers basic probability and statistical distributions. Admitted students are generally expected to have completed several additional upper-division mathematics courses on top of the minimum requirements, though students from non-mathematics backgrounds who meet minimum requirements and have exceptional track records will be considered on a case-by-case basis.
Students who do not have all the prerequisites may be admitted with prerequisite deficiencies with the understanding that those deficiencies must be removed after admission. Students who have a cumulative undergraduate GPA that is less than 3.0 may be eligible for provisional admission to the master's program (see also the Graduate (https://www.ucdenver.edu/graduate-programs/admissions/) student admission requirements).

Application Deadlines

Applications to the MS or PhD programs should be considered for admission on the following target dates to be guaranteed full consideration. International students should submit their applications at least one month prior to these target dates.

<table>
<thead>
<tr>
<th>Target Dates for PhD Program</th>
<th>Target Dates for MS Program</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 15: fall semester</td>
<td>July 15: fall semester</td>
</tr>
<tr>
<td>No summer admissions for the PhD program</td>
<td>March 1: summer semester</td>
</tr>
<tr>
<td>No spring admissions for the PhD program</td>
<td>Nov 1: spring semester</td>
</tr>
</tbody>
</table>

Applications received after the target dates may still be considered for admission, depending on space availability.

Applied Statistics Graduate Certificate

The minimum admission requirements for students applying for the Graduate Certificate in Applied Statistics are:

- A bachelor's degree (not necessarily in mathematics or statistics) from an accredited college or university
- A grade point average (GPA) of 3.0 or above during their bachelor's degree.
- Students must have taken three semesters of calculus (through multivariate calculus), linear algebra, and a calculus-based statistics course that covers basic probability and statistical distributions.

Subject to approval by the Director of the Statistical Programs and the Graduate Committee, students with prerequisite deficiencies may be admitted with the understanding that those deficiencies must be removed after admission. Courses taken to fulfill admission deficiencies may not be counted toward the certificate.

Programs

- Applied Mathematics, PhD (p. 469)
- Statistics, MS (p. 471)
- Applied Statistics Graduate Certificate (p. 473)

Faculty

Professors:
Stephen Hartke, PhD, Rutgers University
Michael S. Jacobson, PhD, Emory University
Julien Langou, PhD, Institute National Polytechnique of Toulouse, France
Weldon A. Lodwick, PhD, Oregon State University
Jan Mandel, PhD, (equivalent), Charles University, Czechoslovakia
Florian Pfender, PhD, Emory University
Stephanie A. Santorico, PhD, North Carolina State University

Associate Professors:
Stephen Billups, PhD, University of Wisconsin-Madison
Steffen Borgwardt, PhD, Technische Universität München
Troy Butler, PhD, Colorado State University
Joshua French, PhD, Colorado State University
Burton Simon, PhD, University of Michigan, Ann Arbor
Diana White, PhD, University of Nebraska

Assistant Professors:
Erin Austin, PhD, University of Minnesota
Yaning Liu, PhD, Florida State University
Farhad Pourkamali Anaraki, PhD, University of Colorado Boulder
Emily Speakman, PhD, University of Michigan

Associate Professors, Clinical Teaching Track:
RaKissa Manzanares, PhD, University of Northern Colorado
Dmitry Ostrovskiy, PhD, State University of New York at Stony Brook
Adam Spiegler, PhD, University of Arizona

Senior Instructors:
Robert Rostermundt, PhD, University of Colorado Denver

International College of Beijing Faculty:
Thomas Dunn, PhD, North Dakota State University
Joseph Quarcoo, PhD, University of South Florida

Research Faculty:
Aime Fournier, PhD, Yale University

Emeritus Faculty:
William Briggs, PhD, Harvard University
William E. Cherowitzo, PhD, Columbia University
Kathryn L. Fraughnaugh, PhD, University of Houston
Andrew Knyazev, PhD, Russian Academy of Sciences
J. Richard Lundgren, PhD, Ohio State University
Stanley E. Payne, PhD, Florida State University

Mathematics (MATH) Courses

MATH 5010 - History of Mathematics (3 Credits)
A history of the development of mathematical techniques and ideas from early civilization to the present, including the inter-relationships of mathematics and sciences. Note: this course assumes that students have mathematical knowledge equivalent to MATH 1401. Prereq: Graduate standing. Not open to students who have had MATH 4010. No credit for applied math graduate students. Cross-listed with MATH 4010. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
 Typically Offered: Spring.

MATH 5012 - An Advanced Perspective on Number and Operation (2 Credits)
Advanced study of number and operation, including why the various procedures from arithmetic work and connections to algebraic reasoning. Focuses on using rigorous mathematical reasoning and multiple representations to explain concepts. Note: Does not count toward graduate degrees in applied mathematics. Note: this course assumes that students have taken MATH 3000 or an equivalent course. Prereq: Graduate standing. Cross-listed with MATH 4012. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
MATH 5013 - An Inquiry-based Approach to Geometry (1 Credit)
An inquiry-based approach to middle-level and Euclidean geometry.
Topics include: polygons and the angle relationships, constructions, Pythagorean theorem and perimeter, area and volume, similarity and congruence, circles. Note: Does not count toward a graduate degree in applied mathematics. Note: this course assumes that students have taken MATH 3000 or an equivalent course. Prereq: Graduate standing. Cross-listed with MATH 4013. Max hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MATH 5014 - Statistical Knowledge for Teaching (1 Credit)
A problem-based statistics seminar aimed at secondary teachers. Topics include: the central limit theorem, the law of large numbers, probability, measures of central tendency and variability, sampling distributions, regression, and hypothesis testing. Note: Does not count toward a graduate degree in applied mathematics. Note: this course assumes that students have taken MATH 3800 or an equivalent course. Prereq: Graduate standing. Cross-listed with MATH 4014. Max hours: 1 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MATH 5015 - Capstone Course for Secondary Teachers (3 Credits)
High school mathematics from an advanced perspective: analyses of alternative definitions, extensions and generalizations of familiar theorems; discussions of historical contexts in which concepts arose; applications of mathematics. Note: Does not count toward a graduate degree in applied mathematics. Note: this course assumes that students have taken MATH 3210, 4310 and 3140 or equivalent. Prereq: Graduate standing. Cross-listed with MATH 4015. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MATH 5016 - RM-MSMSP Research Experience for Teachers - Math Cohort (1-6 Credits)
The Research Experience for Teachers (RET) program is a five-week research exploration in which twelve RM-MSMSP teachers will raise their level of relevant mathematics understanding by engaging in a "hands on" workshop, transforming what they have learned into new curricular materials that will improve the mathematics abilities of their students and hopefully stimulate them to consider a STEM career. Note: Credit may not apply toward any CLAS degree. Department consent required. Max hours: 6 Credits.
Grading Basis: Letter Grade

MATH 5017 - Topics in Mathematics for Teachers (0.3-50 Credits)
Topics vary from semester to semester. Designed for professional mathematics teachers. Note: This course will not count toward a degree in applied mathematics. Prereq: permission of instructor. Repeatable. Max Hours: 50 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 50.

MATH 5027 - Topics in Applied Mathematics (3 Credits)
Selected topics in mathematical problems arising from various applied fields such as mechanics, electromagnetic theory, economics and biological sciences. Prereq: Graduate standing in Applied Mathematics, Statistics, or Dual MATH MA/ECON MA, or permission of the instructor. Repeatable. Term offered: fall, spring. Max hours: 18 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 18.
Restriction: Graduate standing in Applied Mathematics, Statistics, or Dual MATH MA/ECON MA.
Typically Offered: Fall, Spring.

MATH 5070 - Applied Analysis (3 Credits)
Metric spaces, uniform convergence, elements of Banach spaces, elements of functions of complex variable. Problem solving and independent proof writing. Review of selected advanced topics in analysis for the PhD preliminary examination. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of two semesters of undergraduate real analysis (e.g., MATH 4310 and MATH 4320). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 5110 - Theory of Numbers (3 Credits)
Every other year. Topics include divisibility, prime numbers, congruences, number theoretic functions, quadratic reciprocity, and special diophantine equations, with applications in engineering. Prereq: Graduate Standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate-level course in mathematical proof (e.g. MATH 3000). Cross-listed with MATH 4110. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 5135 - Functions of a Complex Variable (3 Credits)
Infrequent. The complex plane, infinite series and products, elementary special functions, Cauchy-Riemann equations, conformal mapping, complex integration, Cauchy integral theory, and residue theory. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have mathematical knowledge equivalent to two semesters of undergraduate-level real analysis (e.g. MATH 4310, MATH 4320) or to a semester of graduate-level real analysis (e.g., MATH 5070). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5198 - Mathematics for Bioscientists (3 Credits)
Infrequent. Develops mathematical reasoning: introduces linear algebra, discrete structures, graph theory, probability, and differential equations, using applications to molecular biology. Note: No credit for mathematics or engineering students. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have mathematical knowledge equivalent to two semesters of calculus (e.g., MATH 1401, MATH 2411). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5310 - Probability (3 Credits)
The course covers axioms of probability, combinatorial probability, conditional probability, random variables (discrete, continuous, and multivariate), expected value (mean, moments, variance, covariance, etc.), limit theorems (laws of large numbers, Central Limit Theorem), Poisson processes and Markov chains. Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Fall.
MATH 5320 - Statistical Inference (3 Credits)
Methods for constructing sampling distributions; sufficient, minimal
sufficient, ancillary and complete statistics; methods for constructing
and evaluating point estimators; estimator optimality; methods for
constructing and evaluating hypothesis tests; methods for constructing
and evaluating confidence interval estimators; asymptotic properties of
estimators. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5337 - Intro to Statistical and Machine Learning (3 Credits)
This is an applied, hands-on course in statistical and machine learning.
This course will introduce students to the general framework, best
practices, model training, and assessment for machine learning methods
from the viewpoint of statistics. Both supervised and unsupervised
methods are covered including penalized regression, k-nearest neighbors,
clustering, and neural networks. Additional machine learning topics such
as random forests and support vector machines are included as time
permits. Ultimately, students will learn how and why to use a particular
method, how to validate and explain the results, and apply the methods
to real data. Note: It is recommended that students have the equivalent of
programming experience such as R or Python as these will be taught alongside the course material. Students with minimal
programming experience should expect to spend more time learning
the programming language throughout the course. Prereq: MATH 4387
or MATH 5387 or MATH 4830 or MATH 5830 or BIOL 3763 with a C- or
higher. Students who have completed a different statistics course that
contains regression and computing may seek instructor permission to
enroll. Cross-listed with MATH 4337. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MATH 4387 or MATH 5387 or MATH 4830 or MATH 5830 or
BIOL 3763 with a C- or higher.

MATH 5350 - Mathematical Theory of Interest (3 Credits)
Rates of interest, term structure of interest rates, force of interest, yield
rate, principal, equation of value, annuity, perpetuity, stocks, bonds, other
financial instruments. Prereq: Graduate standing in Applied Mathematics
or permission of the instructor. Note: This course assumes that students
have the equivalent of an undergraduate-level course in probability (e.g.,
MATH 4810). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5351 - Actuarial Models (3 Credits)
Severity models, frequency models, aggregate models, risk measures,
ruin theory, construction and selection of empirical models, credibility,
simulation. Prereq: Graduate standing in Applied Mathematics or
permission of the instructor. Note: This course assumes that students
have the equivalent of undergraduate-level courses in probability and
statistics (e.g., MATH 4810, MATH 4820, MATH 3382). Max Hours: 3
Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5357 - Statistical Inference (3 Credits)
Topics include simple and multiple linear regression, model diagnostics
and remediation, and model selection. Emphasis is on practical aspects
and applications of linear models to the analysis of data in business,
economics, engineering and behavioral, biological and physical sciences.
Prereq: Graduate standing in Applied Mathematics or Statistics or instructor
permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes
that students have the equivalent of an undergraduate-level course in
statistics (e.g., MATH 4820). No co-credit with MATH 4830/5830. Cross-
listed with MATH 4387. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics.

MATH 5387 - Applied Regression Analysis (3 Credits)
Typically Offered: Spring.

MATH 5390 - Game Theory (3 Credits)
Zero-sum and non-zero-sum games; Nash equilibrium and the principle
of indifference; Shapley value and other concepts of fair division;
Evolutionary game theory, ESS, and evolutionary population dynamics.
Applications in economics, business, and biology. Note: this course
assumes that students have the equivalent of MATH 2421, 3191 and
3800 or 4810. Prereq: Graduate standing in Applied Mathematics. Cross-
listed with MATH 4390. Term offered: fall, spring, summer. Max hours: 3
Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Fall, Spring, Summer.

MATH 5394 - Experimental Designs (3 Credits)
Typically Offered: Spring.

MATH 5397 - Machine Learning Methods (3 Credits)
Regression, neural networks, clustering, support vector machines,
random forests, and other prediction/classification techniques will
be used to solve supervised and unsupervised learning problems.
This course will connect each topic with the underlying mathematical
foundation such as optimization methods and statistical inference. A
key focus is deriving the methods and their properties to guide proper
application. Students will learn how to apply methods using standard
libraries from Python, R, or Matlab. Prereq: Graduate standing in Applied
Mathematics or Statistics or in one of the 4+1 BS-MS programs. Cross-
listed with MATH 4388. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics or in one
of the 4+1 BS-MS programs. (AMEN-MS, AMEN-PHD, STAT-MS, MATH BS-
BMA).

MATH 5399 - Experimental Designs (3 Credits)
Designs covered will include: completely randomized, complete block,
split plot, incomplete block, factorial and fractional factorial designs.
Additionally, power and study design for non-experimental studies
will be covered. Prereq: Graduate standing in Applied Mathematics or
Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This
course assumes that students have the equivalent of an undergraduate-
level course in regression analysis (e.g., MATH 4387). Cross-listed with
MATH 4394. Term offered: spring of even years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-
MS/PHD/STAT-MS
Typically Offered: Spring.
MATH 5410 - Modern Cryptology (3 Credits)
Every other year. Deals with the mathematics that underlies modern cryptography. Topics include: classical cryptography, public and private key cryptosystems, secret sharing schemes, authentication schemes, linear feedback shift registers, discrete logarithm and elliptic curve-based schemes. Note: This course assumes that students have the equivalent of a course in linear algebra (e.g., MATH 3191). Prereq: Graduate standing in Applied Mathematics. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5432 - Computational Graph Theory (3 Credits)
Infrequent. Algorithmic techniques in graph theory and other discrete mathematics areas. Typical topics include: branch-bound algorithms, matching, colorings, domination, min-plus algebra, simulated annealing and related heuristics, NP-completeness theory. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate-level course in graph theory (e.g., MATH 4408). Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5446 - Theory of Automata (3 Credits)
Infrequent. Studies the relationships between classes of formal languages (regular, context-free, context-sensitive, phrase-structure) and classes of automata (finite-state, pushdown, Turing machines). Additional topics include decidability and computability issues. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate-level course in abstract algebra (e.g., MATH 4140). Cross-listed with CSCI 5446. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5490 - Network Flows (3 Credits)
Every other year. Begins with the classical min-cost flow problem, defined on an ordinary network. Other problems, such as shortest path, are also shown in this class. Both theory and algorithms are presented. Extensions include generalized networks, nonlinear costs, fixed charges, multi-commodity flows and additional applications, such as in communications networks. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Term offered: spring of even years. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

Typically Offered: Spring.

MATH 5576 - Mathematical Foundations of Artificial Intelligence I (3 Credits)
Infrequent. A fundamentals course that complements other approaches, such as in engineering, psychology, and business administration. Here the emphasis is on the mathematical foundations. Topics include logical inference, problem solving, heuristic search, neural nets, analogical reasoning and learning. Models and paradigms are considered from different measures of uncertainty. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate course in data structures (e.g., CSCI 2511) and a course in linear algebra (e.g., MATH 3191). Cross-listed with MATH 4576. Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5593 - Linear Programming (3 Credits)
A linear program is an optimization problem that seeks to minimize or maximize a linear function subject to a system of linear inequalities and equations. This course begins with examples of linear programs and variations in their representations. Basic theoretical foundations covered include polyhedra, convexity, linear inequalities and duality. Two classes of solution algorithms are given: simplex methods and interior point methods. The primary emphasis of this course is on mathematical foundations, and applications are used to illustrate the main results. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a course in linear algebra (e.g., MATH 3191). Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5610 - Computational Biology (3 Credits)
Every other year. Basic introduction and mathematical foundations. Topics include comparative genomics; proteomics; phylogeny; dynamic programming and sequence alignment; gene expression arrays and clustering; Bayesian networks; structure prediction and hidden Markov models. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have some programming experience or the equivalent of a programming course (e.g., CSCI 1410) and linear algebra (e.g., MATH 3191 or 3195). Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5661 - Numerical Analysis II (3 Credits)
A second semester course in numerical methods and analysis fundamental to many algorithms encountered in scientific computing, data science, machine learning, and computational models in science and engineering. Numerical differentiation and integration; random numbers and stochastic modeling; Fast Fourier Transform; data compression; eigenvalues and singular value decompositions with application to regression and dimension reduction. This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411), linear algebra (e.g., MATH 3191 or 3195), and computer programming (e.g., MATH 1376 or CSCI 1410). Cross-listed with CSCI 4650, 5660, and MATH 4650. Term offered: fall, spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

Typically Offered: Fall, Spring.

MATH 5660 - Numerical Analysis I (3 Credits)
A first semester course in numerical methods and analysis fundamental to many algorithms encountered in scientific computing, data science, machine learning, and computational models in science and engineering. Rounding errors and numerical stability of algorithms; solution of linear and nonlinear equations; data modeling with interpolation and least-squares; and optimization methods. This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411), linear algebra (e.g., MATH 3191 or 3195), and computer programming (e.g., MATH 1376 or CSCI 1410). Cross-listed with CSCI 4650, 5660, and MATH 4650. Term offered: fall, spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

Typically Offered: Fall, Spring.
MATH 5674 - Parallel Computing and Architectures (3 Credits)
Infrequent. Examines a range of topics involved in using parallel operations to improve computational performance. Parallel architectures, parallel algorithms, parallel programming languages, interconnection networks, and their relation to specific computer architectures. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course has the equivalent of a course in numerical analysis (e.g., MATH 4650). Cross-listed with MATH 4674. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5718 - Applied Linear Algebra (3 Credits)
Topics include: Vector spaces, practical solution of systems of equations, projections, eigenvalues and eigenvectors, unitary transformations, Schur QR, singular value decompositions, similarity transformations, Jordan forms, and positive definite matrices. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate-level course in linear algebra (e.g., MATH 3191). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Fall.

MATH 5733 - Partial Differential Equations (3 Credits)
Infrequent. Initial/Boundary value problems for first-order, wave, heat and Laplace Equations; maximum principles; Fourier Series and applications. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate sequence in calculus (e.g., through MATH 2421) and differential equations (e.g., MATH 3200 or 3195). Cross-listed with MATH 4733. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 5779 - Math Clinic (3 Credits)
The clinic is intended to illustrate the applicability and utility of mathematical concepts. Research problems investigated originate from a variety of sources--industry, government agencies, educational institutions, or nonprofit organizations. Prereq: Graduate standing in Applied Mathematics or Statistics or permission of instructor. Cross-listed with MATH 4779. Term offered: fall, spring. Repeatable. Max Hours: 99 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 99.
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Fall, Spring.

MATH 5791 - Continuous Modeling (3 Credits)
Every other year. Surveys mathematical problems that arise in natural sciences and engineering. Topics may include population models, epidemic models, mechanics, heat transfer and diffusion, tomography, pharmacokinetics, traffic flow, fractal models, wave phenomena, and natural resource management. Most models discussed are based on differential and integral equations. Emphasis is formulation and validation of models as well as methods of solution. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of undergraduate-level courses in differential equations and linear algebra (e.g., MATH 3200 and 3191). Cross-listed with MATH 4791. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5792 - Probabilistic Modeling (3 Credits)
Every other year. Markov chains, Poisson processes, continuous time Markov chains, elementary topics in queuing theory, and some mathematical aspects of Monte Carlo simulation, including random variate generation, variance reduction, and output analysis. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate-level course in probability (e.g., MATH 4810) and some programming experience. Cross-listed with MATH 4792. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Fall.

MATH 5793 - Discrete Math Modeling (3 Credits)
Every other year. Focuses on the use of graph theory and combinatorics to solve problems in a wide variety of disciplines. Applications are selected from computer science, communication networks, economics, operations research, and the social, biological and environmental sciences. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate course in linear algebra (e.g., MATH 3191) and graph theory (e.g., MATH 4408). Cross-listed with MATH 4793. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5794 - Optimization Modeling (3 Credits)
Every other year. Principles of model formulation and analysis are developed by presenting a wide variety of applications, both for natural phenomena and social systems. Examples of optimization models to represent natural phenomena include principles of least time and energy. Examples in social systems include resource allocation, environmental control and land management. Specific applications vary, but are chosen to cover a wide scope that considers dichotomies, such as discrete vs. continuous, static vs. dynamic, and deterministic vs. stochastic. Some computer modeling language (like GAMS) is taught. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a sequence in calculus (e.g., through MATH 2421) and linear algebra (e.g., MATH 3191). Cross-listed with MATH 4794. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 5830 - Applied Statistics (3 Credits)
Review of estimation, confidence intervals and hypothesis testing; ANOVA; categorical data analysis; non-parametric tests; linear and logistic regression. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Note: This course assumes that students have the equivalent of an introductory course in statistics (e.g., MATH 2830). No co-credit with MATH 4387 or 5387 and doesn’t count for Math degrees. Cross-listed with MATH 4830. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

MATH 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member; describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or Statistics and instructor permission. Repeatable. Max Hours: 9 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 9.
Prereq: Graduate standing in Applied Mathematics

MATH 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 6.

MATH 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member; describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Repeatable. Max Hours: 9 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 9.
Prereq: Graduate standing in Applied Mathematics

MATH 5950 - Master’s Thesis (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member; describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or Statistics and instructor permission. No co-credit with MATH 5960 or MATH 6960. Repeatable. Max hours: 8 Credits. Grading Basis: Letter Grade with IP Repeatable. Max Credits: 8.
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Additional Information: Report as Full Time.

MATH 5960 - Master’s Project (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or Statistics and instructor permission. No co-credit with MATH 5950 or MATH 6950. Grading Basis: Letter Grade with IP Repeatable. Max Credits: 8.
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Additional Information: Report as Full Time.

MATH 6023 - Topics in Discrete Math (3 Credits)
Topics may include graph theory, combinatorics, matroid theory, combinatorial matrix theory, finite geometry, design theory, and discrete algorithms. Note: Since topic varies by semester, students may register for this course more than once. Note: students should obtain permission from the instructor prior to enrolling in this course. Prereq: Graduate standing in Applied Mathematics. Repeatable. Max Hours: 99 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 99.
Prereq: Graduate standing in Applied Mathematics

MATH 6101 - Uncertainty Quantification (3 Credits)
The field of uncertainty quantification is evolving rapidly due to increasing emphasis on models of physical and biological systems that have quantified uncertainties for large-scale applications, novel algorithm development, and new computational architectures that facilitate implementation of these algorithms. In this course, we develop the basic concepts, theory, and algorithms necessary to quantify input and response uncertainties for a variety of simulation models. The topics will include concepts from probability and statistics, parameter selection techniques, frequentist and Bayesian model calibration, propagation of uncertainties, quantification of model discrepancy, surrogate model construction, and local and global sensitivity analysis. Note: A basic knowledge of probability, linear algebra, ordinary and partial differential equations, and introductory numerical analysis techniques is assumed. Coursework will typically consist of projects. Prereq: Graduate standing in Applied Mathematics or Statistics. AMENMS/PHD/STAT-MS. Recommended preparation MATH 5070, MATH 5718, MATH 5660, MATH 5733. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 6131 - Real Analysis (3 Credits)
Every other year. Lebesque measure and integration, general measure and integration theory, Radon-Nikodym Theorem, Fubini Theorem. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a two semester course in undergraduate analysis or advanced calculus (e.g. MATH 4310 and 4320) or introductory graduate-level coursework in analysis (e.g. MATH 5070). Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Fall.
MATH 6330 - Workshop in Statistical Consulting (3 Credits)  
Students participate as consultants in a drop-in consulting service operated by the department. Seminars provide students with supervised experience in short term statistical consulting. Note: Since problems vary each semester, students may register for this course more than once. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of graduate-level coursework in regression analysis (e.g. MATH 5387). Term offered: fall. Repeatable. Max Hours: 99 Credits.  
Grading Basis: Letter Grade  
Repeatable. Max Credits: 99.  
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS  
Typically Offered: Fall.

MATH 6360 - Exploratory Data Analysis (3 Credits)  
Every other year. Philosophy and techniques associated with exploratory (vs. confirmatory) data analysis, both as originally presented (John Tukey) and current computer-based implementations. Graphical displays, robust-resistant methods (lines, two-way fits), diagnostic plots, standardization. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have prior coursework in statistics. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS  
Typically Offered: Fall.

MATH 6376 - Statistical Computing (3 Credits)  
Computationally-intensive methods in statistics, including random number generation and Monte Carlo methods, data partitioning and resampling, numerical and graphical methods, nonparametric function estimation, statistical models and data mining methodology, analysis of large data sets. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have prior coursework in statistics (e.g. MATH 4820 or 4830 or 3382) and regression analysis (e.g. MATH 4387). Cross-listed with MATH 7376. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS  
Typically Offered: Fall.

MATH 6380 - Stochastic Processes (3 Credits)  
Every other year. Markov processes in discrete and continuous time, renewal theory, martingales, Brownian motion, branching processes, and stationary processes. Applications include queuing theory, performance evaluation of computer and communication systems and finance. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of undergraduate-level coursework in linear algebra (e.g. MATH 3191) and ordinary differential equations (e.g. MATH 3200), along with undergraduate-level coursework in probability (e.g. MATH 4810). Term offered: fall of odd years. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS  
Typically Offered: Fall.

MATH 6384 - Spatial Data Analysis (3 Credits)  
This course will cover various statistical methods for spatial data. This will include assessing cluster identification for point process and regional data, as well as quantifying spatial dependence and making predictions for regional and geostatistical spatial data. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Term offered: fall of odd years. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS  
Typically Offered: Fall.

MATH 6388 - Statistical and Machine Learning (3 Credits)  
This course covers a variety of statistical and machine learning methods. Both supervised and unsupervised methods are covered with an emphasis on model training and error estimation. Topics include penalized regression, principal components, k-nearest neighbors, clustering, and neural networks. Additional higher-level topics such as random forests, support vector machines, and boosting are also covered as time permits. Students will gain exposure to high performance computing by working on a Linux cluster. Prereq: Graduate standing in Statistics or Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in regression analysis (e.g. MATH 5387). Term offered: fall of odd years. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS  
Typically Offered: Fall.

MATH 6398 - Calculus of Variations and Optimal Control (3 Credits)  
Infrequent. Standard variational problems (geodesic, time-of-transit, isoperimetric, surface, area), Euler-Lagrange equations, variational principles in mechanics, optimal control problems, necessary conditions for optimality, Pontryagin principle. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a two semester course in undergraduate analysis or advanced calculus (e.g. MATH 4310 and 4320) or introductory graduate-level coursework in analysis (e.g. MATH 5070). Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS  
Typically Offered: Fall.

MATH 6404 - Applied Graph Theory (3 Credits)  
Every other year. Emphasis on graph theory. Topics will include trees, digraphs and networks, intersection graphs, coloring, clique coverings, distance, paths and cycles. Topics are motivated by applications. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Term offered: fall. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS  
Typically Offered: Fall.
MATH 6595 - Nonlinear Programming (3 Credits)
Every other year. Introduces fundamental algorithms and theory for
nonlinear optimization problems. Topics include Newton, quasi-Newton
and conjugate direction methods; line search and trust-region methods;
active set, penalty and barrier methods for constrained optimization;
convergence analysis and duality theory. Prereq: Graduate standing in
Applied Mathematics or permission of the instructor. Note: This course
assumes that students have the equivalent of a two semester course in
undergraduate analysis (e.g. MATH 4310 and 4320) and graduate-level
coursework in linear algebra (e.g. MATH 5718). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 6653 - Introduction to Finite Element Methods (3 Credits)
Every other year. The Finite Element Method (FEM) is introduced as a
generic tool for the approximation of partial differential equations that
model engineering and physics problems of interest. Elliptic, hyperbolic,
and parabolic equations are solved with FEM. Prereq: Graduate standing
in Applied Mathematics or permission of the instructor. Note: This course
assumes that students have the equivalent of graduate-level coursework
in numerical analysis (e.g. MATH 5660). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 6735 - Continuum Mechanics (3 Credits)
Every other year. Indicial notation. Eulerian and Lagrangian coordinates.
Deformation, strain, strain rate, stress. Conservation of mass, momentum,
and energy. Exploitation of entropy production inequality to obtain
constitutive equations for elastic, viscous, visco elastic, plastic, or
porous materials. Prereq: Graduate standing in Applied Mathematics or
permission of the instructor. Note: This course assumes that students have the equivalent of undergraduate-level coursework in numerical analysis (e.g. MATH 3191) and ordinary differential equations (e.g. MATH 3200). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 6840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely
filled out and signed by the student and faculty member, describing the
course expectations, assignments and outcomes, to the CLAS Graduate
Academic Services Coordinator for approval. Prereq: Graduate standing in
Applied Mathematics or Statistics and instructor permission. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Prereq: Graduate standing in Applied Mathematics

MATH 6960 - Research Methods in Mathematics and Statistics (3 Credits)
The goal of the course is to guide students through the process of
performing rigorous mathematical and statistical research. Topics
include performing a proper literature review, developing technical writing
skills, and learning best practices regarding oral presentations. Students
will discuss their ongoing research projects in groups and individually
with the instructor, write a research paper, and present their results in a
classroom seminar. Master's students should be entering their final
year of coursework. Prereq: Graduate standing in Applied Mathematics or
Statistics and instructor permissions. No co-credit with MATH 5950,
MATH 5960, or ECON 6073. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-
MS/PHD/STAT-MS

MATH 7101 - Topology (3 Credits)
Every other year. Topological spaces, compactness, separation properties
and connectedness. Prereq: Graduate standing in Applied Mathematics
or permission of the instructor. Note: This course assumes that students have the equivalent of a two semester undergraduate sequence in
analysis or advanced calculus (e.g. MATH 4310 and 4320) or a graduate-
level course in analysis (e.g. MATH 5070). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7132 - Functional Analysis (3 Credits)
Every other year. Linear metric and topological spaces, duality, weak
topology, spaces of functions, linear operators, compact operators,
elements of spectral theory, and operator calculus. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note:
This course assumes that students have the equivalent of graduate level
coursework in real analysis (e.g. MATH 6131). Term offered: spring of odd
years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 7376 - Statistical Computing (3 Credits)
Computationally-intensive methods in statistics, including random
number generation and Monte Carlo methods, data partitioning and re-
sampling, numerical and graphical methods, nonparametric function
estimation, statistical models and data mining methodology, analysis
of large data sets. Note: This course assumes that students have prior
coursework in statistics (e.g. MATH 4820 or 4830 or 3382) and regression
analysis (e.g. MATH 4387). Cross-listed with MATH 6376. Prereq:
Graduate standing in Applied Mathematics or Statistics or instructor
permission. AMEN-MS/PHD/STAT-MS. Cross-listed with MATH 6376. Max
Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-
MS/PHD/STAT-MS

MATH 7381 - Mathematical Statistics I (3 Credits)
Every other year. Mathematical theory of statistics. Parametric
inference: discrete and continuous distributions, methods of parameter
estimation, confidence intervals. Prereq: Graduate standing in Applied
Mathematics or Statistics or instructor permission. AMEN-MS/PHD/
STAT-MS. Note: This course assumes that students have the equivalent of
undergraduate-level coursework in linear algebra (e.g. MATH 3191) and
statistics (MATH 5320). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-
MS/PHD/STAT-MS

MATH 7382 - Mathematical Statistics II (3 Credits)
Every other year. (Continuation of MATH 7381.) Hypothesis testing,
robust estimation, tolerance intervals, nonparametric inference,
sequential methods. Prereq: Graduate standing in Applied Mathematics
or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note:
This course assumes that students have the equivalent of advanced
graduate level coursework in mathematical statistics (e.g. MATH 7381).
Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-
MS/PHD/STAT-MS
MATH 7384 - Mathematical Probability (3 Credits)
Every other year. Measurable spaces, probability measures, random variables, conditional expectations and martingales. Convergence in probability, almost sure convergence, convergence in distribution, limit theorems (law of large numbers, central limit theorem, laws of iterated logarithm). Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of undergraduate-level coursework in probability (e.g. MATH 4810) and graduate-level coursework in analysis (e.g. MATH 5070 or 6131). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7385 - Stochastic Differential Equations (3 Credits)
Brownian motion, Ito integral, Ito formula, Dynkin's formula, stochastic optimal control, boundary value problems, Girsanov theorem, mathematical finance, optimal stopping. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in mathematical probability (e.g. MATH 7384). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7386 - Monte Carlo Methods (3 Credits)
This course introduces Monte Carlo integration, variance reduction methods, quasi-Monte Carlo, Markov chain Monte Carlo, Metropolis-Hastings algorithm, Gibbs sampler, simulated annealing, expectation-maximization algorithm, sequential Monte Carlo methods. Prereq: Graduate standing in Applied Mathematics or Statistics. AMENMS/PHD/STATMS. Recommended preparation: MATH 5310 and MATH 5320. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMENMS/PHD/STATMS

MATH 7393 - Bayesian Statistics (3 Credits)
Prior and posterior distributions, conjugate models, single and multiparameter models, hierarchical models, numerical methods for evaluating posteriors, Monte Carlo methods, and Markov chain Monte Carlo. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMENMS/PHD/STATMS. Programming experience is strongly recommended. Term offered: spring of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMENMS/PHD/STATMS

MATH 7397 - Nonparametric Statistics (3 Credits)
Every three years. Statistical inference without strong model assumptions. Hypothesis testing and estimation using permutations and ranks, analysis of variance, and nonparametric model fitting. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMENMS/PHD/STATMS. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMENMS/PHD/STATMS

MATH 7405 - Advanced Graph Theory (3 Credits)
Continuation of MATH 6404. Topics to be covered include: trees and optimization, encoding and embedding of graphs, generalized colorings and applications, perfect graphs, extremal problems, substructures, connectedness’ and cycles. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in graph theory (e.g. MATH 6404). Term offered: spring of even years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 7409 - Applied Combinatorics (3 Credits)
Every other year. Emphasis is on enumerative combinatorics. Topics include multinomial coefficients, generating functions, SDRs, Polya's enumeration theory, pigeon-hole principle, inclusion/exclusion and Mobius inversion of finite posets. Topics may also include introduction to designs and finite geometry. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7410 - Combinatorial Structures (3 Credits)
Every other year. Finite combinatorial structures; existence, construction and applications. Topics include Latin squares, Hadamard matrices, block designs, finite geometries and extremal and non-constructive combinatorics. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in combinatorics (e.g. MATH 7409). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7411 - Modern Algebra I (3 Credits)
Every other year. Groups, rings and ideals, integral domains. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of undergraduate level coursework in abstract algebra (e.g. MATH 4140). It is recommended that students take MATH 5718 during the same semester as MATH 7411. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7412 - Modern Algebra II (3 Credits)
Every other year. Field theory, Galois theory, Modules over rings, especially over integral domains. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear algebra (e.g. MATH 5718) and abstract algebra (e.g. MATH 7413). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7419 - Mathematical Coding Theory (3 Credits)
Error correcting codes are used to recapture information that has been distorted in some transmission process. Various coding schemes use block codes obtained from algebraic, geometric and combinatorial structures. Topics include: fundamentals, linear, Reed-Muller, Golay, cyclic and BCH codes. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear algebra (e.g. MATH 5718). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 7421 - Projective Geometry (3 Credits)
Every other year. Synthetic and algebraic development of projective spaces. Collineation groups, representation theorems, quadratic sets and applications. Emphasis is on finite projective spaces. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear algebra (e.g. MATH 5718) and combinatorics (e.g. MATH 7409). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 7593 - Advanced Linear Programming (3 Credits)
Every three years. A Ph.D. level course that goes deeper into linear programming, starting from where a graduate-level course (5593) ends. Topics include advanced sensitivity analysis, sparse matrix techniques, and special structures. Additional topics, which vary, include deeper analysis of algorithms, principles of model formulation and solution analysis. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear programming (e.g. MATH 5593). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 7594 - Integer Programming (3 Credits)
Every three years. A Ph.D. level course that uses linear programming (5593), especially polyhedral theory, to introduce concepts of valid inequalities and superadditivity. Early group-theoretic methods by Gomory and Chvatal's rounding function are put into modern context, including their role in algorithm design and analysis. Duality theory and relaxation methods are presented for general foundation and analyzed for particular problem classes. Among the special problems considered are knapsack, covering, partitioning, packing, fx-charging, traveling salesman, generalized assignment matchings. Matroids are introduced and some greedy algorithms are analyzed. Additional topics, which vary, include representability theory, heuristic search and complexity analysis. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear programming (e.g. MATH 5593). Term offered: spring of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.
MATH 7595 - Advanced Nonlinear Programming (3 Credits)
Every three years. Focuses primarily on the fundamental theory of nonlinear programming. Topics include convex analysis, optimality criteria, Lagrangian and conjugate duality, stability and sensitivity analysis. Other topics vary depending on the research interests of the instructor. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework addressing computational methods in nonlinear programming (e.g. MATH 6595). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 7663 - Finite Difference Methods for Partial Differential Equations (3 Credits)
Every other year. Consistency, stability, and convergence for difference schemes. Derivations based on Taylor series and finite series. Methods for parabolic and hyperbolic initial value problems and initial-boundary value problems, elliptic boundary-value problems, some nonlinear problems. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in numerical analysis (e.g. MATH 5070) and partial differential equations (e.g. MATH 5733). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 7665 - Numerical Linear Algebra (3 Credits)
Every other year. Solution of linear equations, eigenvector and eigenvalue calculation, matrix error analysis, orthogonal transformation, iterative methods. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in numerical analysis (e.g. MATH 5660) and linear algebra (e.g. MATH 5718). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 7667 - Introduction to Approximation Theory (3 Credits)
Every other year. Linear normed and Banach spaces, convexity, existence and uniqueness of best approximations, least square approximation and orthogonal polynomials, Chebyshev approximation by polynomials and other related families, splines. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in analysis (e.g. MATH 5070) and linear algebra (e.g. MATH 5718). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Repeable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 7821 - Topics in Projective Geometry (3 Credits)
Infrequent. Advanced topics in projective geometry. Topics may include finite projective planes, free projective planes, derivation, collineation groups, higher dimensional projective spaces, ovals and ovoids. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in projective geometry (e.g. MATH 7821). Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics
MATH 7822 - Topics in Linear Algebra (3 Credits)
Infrequent. Topics may include canonical forms, bilinear and quadratic forms, and combinatorial matrix theory. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear algebra (e.g. MATH 5718). Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics
MATH 7823 - Topics in Discrete Math (3 Credits)
Infrequent. Advanced topics in discrete mathematics; will change from semester to semester. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: Students should contact the course instructor to determine the course focus, and to determine if any prior undergraduate- or graduate-level coursework is assumed. Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics

MATH 7824 - Topics in Computational Mathematics (3 Credits)
Infrequent. Topics include methods for differential equations, numerical optimization, approximation theory, inverse problems, and Fourier analysis. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: Students should contact the course instructor to determine the course focus, and to determine if any prior undergraduate- or graduate-level coursework is assumed. Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics

MATH 7825 - Topics in Optimization (3 Credits)
Infrequent. Some topics are extensions of those introduced in MATH 6595, while other topics are new. Examples of topics are: duality, stability, sensitivity, consistency, redundancy, principles of optimality, control theory, calculus of various global (non-convex) optimization and model reformulation. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: Students should contact the course instructor to determine the course focus, and to determine if any prior undergraduate- or graduate-level coursework is assumed. Repeatable. Max hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics

MATH 7826 - Topics in Probability and Statistics (3 Credits)
Infrequent. Topics may include generalized linear models, information theory, robust methods, spatial statistics, sequential principles of optimality, control theory, calculus of various global (non-convex) optimization and model reformulation. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: Students should contact the course instructor to determine the course focus, and to determine if any prior undergraduate- or graduate-level coursework is assumed. Repeatable. Max hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 7827 - Topics in Applied Mathematics (3 Credits)
Infrequent. Topics include problems in differential equations, optimization, mathematical modeling, Fourier analysis and approximation theory. Note: Since topics vary each semester, students may register for this course more than once. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics

MATH 7840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or Statistics and instructor permission. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Prereq: Graduate standing in Applied Mathematics

MATH 7921 - Readings in Mathematics (1 Credit)
Annual. Seven readings courses are offered regularly primarily for Ph.D. students at the research level in the designated fields. The seminar format requires significant student participation. Prereq: permission of instructor. Department consent required. Repeatable. Max hours: 99 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 99.

MATH 7922 - Rdgs:Math Fndts-Cmtr Sc (1 Credit)
Department consent required. Repeatable. Max hours: 99 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 99.

MATH 7923 - Readings: Discrete Mathematics (1 Credit)
Department consent required. Repeatable. Max hours: 99 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 99.

MATH 7924 - Rdgs:Comp Mathematics (1 Credit)
Department consent required. Repeatable. Max Hours: 99 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 99.

MATH 7925 - Readings: Optimization (1 Credit)
Department consent required. Repeatable. Max hours: 99 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 99.

MATH 7926 - Rdgs:Applied Prob/Stats (1 Credit)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or Statistics and instructor permission. Repeatable. Max Hours: 99 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 99.

MATH 7927 - Rdgs:Comp/Math Biology (1 Credit)
Department consent required. Max hours: 1 Credits.
Grading Basis: Letter Grade
MATH 8660 - Mathematical Foundations of Finite Element Methods (3 Credits)
Every other year. Theoretical foundations of finite element methods for elliptic boundary value problems, Sobolev spaces, interpolations of Sobolev spaces, variational formulation of elliptic boundary-value problems, basic error estimates, applications to elasticity, practical aspects of finite element methods. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in finite element methods (e.g. MATH 6653) or equivalent programming experience, and graduate-level coursework in analysis or functional analysis (e.g. MATH 6131 or MATH 7132). Term offered: spring of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 8664 - Iterative Methods in Numerical Linear Algebra (3 Credits)
Every other year. Preconditioned iterative methods for linear systems and eigen problems, conjugate gradients, multigrid and domain decomposition. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in numerical analysis (e.g. MATH 5660) and numerical linear algebra (e.g. MATH 7665). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 8990 - Doctoral Dissertation (1-10 Credits)
Only for students working on their Ph.D. research. Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 50 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 50.
Additional Information: Report as Full Time.
Applied Mathematics, MS

Introduction

Our MS in Applied Mathematics program offers a degree in applied mathematics along with specialization opportunities in many areas, including

- Applied Probability and Uncertainty Quantification
- Applied Statistics
- Data Science
- Discrete Mathematics
- Mathematics of Engineering and Science
- Numerical Analysis
- Operations Research

The program provides training in applied mathematics and/or statistics and opportunities for introductory research in collaboration with internationally recognized scholars. Students have the option to tailor their coursework with maximum flexibility or specialize in one of several concentrations of the degree. Students in all areas have the opportunity to participate in real-world research through our innovative Math Clinic and Statistical Consulting workshop. Some highlights of our exciting research projects include evolutionary dynamics, climate modeling, wildfire simulations, machine learning, genetic inheritance and association, optimization in data analysis, and more.

The degree is designed to give students a contemporary education in many areas of data science. In all of its activities, the department embodies the outlook that mathematics, statistics, computing, and data science are powerful tools that can be used to solve problems of immediate and practical importance. Our program emphasizes the training of skills valued by many employers. These skills include problem solving, critical thinking, analysis, facility with data, the ability to process quantitative information, and perhaps most important of all, the ability to learn and master new skills and concepts quickly. Many of our MS graduates have continued towards employment in the Denver business and research sectors and Denver area community colleges.

See our degree requirements section for further information about our concentration areas.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Applied Mathematics faculty advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 30 credit hours.
2. Students must complete a minimum of 24 graduate (5000-level or higher) MATH credit hours.
3. Students must earn a minimum grade of B- (2.7) in all courses applied to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Students cannot complete program or ancillary course requirements as P+/P/F or S/U.
4. Students must complete all coursework with CU Denver faculty.
5. Students must complete either a thesis or project, each with a written component and an oral presentation before a committee consisting of three graduate faculty members.

Program Restrictions, Allowances and Recommendations

1. The remaining six hours must be either MATH courses numbered 5000 or above or approved courses outside the department numbered 4000 or above.
2. Up to nine semester hours of prior course work may be transferred in (subject to approval); these must be at the 5000 level or above with a B- or better grade. Courses already applied toward another degree (graduate or undergraduate) cannot be used toward the MS degree in applied mathematics.
3. The following MATH courses will not count toward a graduate degree: MATH 5010 History of Mathematics, MATH 5012 An Advanced Perspective on Number and Operation, MATH 5015 Capstone Course for Secondary Teachers, MATH 5017 Topics in Mathematics for Teachers, MATH 5198 Mathematics for Bioscientists, and MATH 5830 Applied Statistics.

MATH 5070
or MATH 6131

Applied Analysis
Real Analysis

Linear Algebra Core Requirement

MATH 5718

Applied Linear Algebra

Complete a minimum of 24 additional graduate level credit hours of MATH coursework.¹

A student must satisfy the course requirements for the MS degree in one of these areas. Substitutions or changes to the requirements may be made with the written approval of a student’s academic advisor and the Graduate Committee.

MS Degree without a Concentration Area (p. 465)

Applied Probability and Uncertainty Quantification Concentration (p. 465)

Applied Statistics Concentration (p. 466)

Data Science Concentration (p. 466)

Discrete Mathematics Concentration (p. 467)

Mathematics of Engineering and Science Concentration (p. 467)

Numerical Analysis Concentration (p. 467)

Operations Research Concentration (p. 467)

A student may devote up to 6 hours (of the 30 required hours) to the writing of a thesis, or up to 3 hours to the completion of a project.

Following completion of course work, all candidates must make an oral presentation of a thesis or a project before a committee consisting of three graduate faculty members.

Total Hours
30

¹ The following MATH courses will not count toward a graduate degree: MATH 5010 History of Mathematics, MATH 5012 An Advanced Perspective on Number and Operation, MATH 5015 Capstone Course for Secondary Teachers, MATH 5017 Topics in Mathematics for Teachers, MATH 5198 Mathematics for Bioscientists, and MATH 5830 Applied Statistics.

MS Degree without a Concentration Area

Note that MATH 6131 Real Analysis can be used to satisfy both the analysis core requirement and may also count as one of the three courses satisfying this requirement.

Complete nine credit hours from the following courses:¹

Applied Mathematics, PhD

Please click here to see Mathematical and Statistical Sciences department information.

Introduction

Our PhD in Applied Mathematics program provides comprehensive training in applied mathematics and/or statistics and opportunities for cutting-edge research in close collaboration with internationally recognized scholars in the fields of

- Computational Mathematics
- Discrete Mathematics
- Optimization and Operations Research
- Probability
- Statistics

Some highlights of our exciting research projects include evolutionary dynamics, climate modeling, wildfire simulations, machine learning, genetic inheritance and association, optimization in data analysis, and more. Current research funding includes grants from NSF, NIH, DoD, and NASA.

The degree is designed to give students a contemporary, comprehensive education in subjects such as high-performance computing, numerical analysis, optimization, statistical methods, and operations research. In all of its activities, the department embodies the outlook that mathematics, statistics, computing, and data science are powerful tools that can be used to solve problems of immediate and practical importance. Our program emphasizes the training of skills valued by many employers. These skills include problem solving, critical thinking, analysis, facility with data, the ability to process quantitative information, and most important of all, the ability to learn and master new skills and concepts quickly. These strengths make our students highly marketable for careers in industry as well as in academia. Scholarships and assistantships (https://clas.ucdenver.edu/mathematical-and-statistical-sciences/graduate-student-financial-resources/) for graduate students are available and awarded competitively.

The program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 70 approved credit hours.
2. Students must complete 40 non-thesis credit hours with CU Denver faculty.
3. Students must complete a minimum of 30 dissertation credit hours.
4. Students must complete all credit hours at the graduate 5000-level and above.
5. Students must earn a minimum grade of B (3.0) or better in all core courses, a B- (2.7) in all other courses applied to the degree and must achieve a minimum cumulative program GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.

Program Restrictions, Allowances and Recommendations

1. There are six phases of the PhD program. A candidate must fulfill course requirements, pass the preliminary examinations, establish a PhD committee, meet the academic residency requirement, pass the comprehensive examination and write and defend a dissertation.
2. The following MATH courses will NOT count toward a graduate degree: MATH 5000-5009, 5010, 5012-5015, 5017, 5198, 5250 and 5830.
3. Students must complete 40 semester hours of non-thesis course work at the graduate level (up to 30 hours of this course work may be transferred in, including courses taken as part of a master's degree). In addition, 30 hours of dissertation credit must be taken. One readings course (one semester hour each) is required as part of the formal course work. Students must also satisfy a breadth requirement by completing a total of six graduate math courses from among several areas of mathematics, with no more than three of these courses from any one area.
4. The preliminary examinations are designed to determine that students who intend to pursue the PhD program are qualified to do so. These four-hour written examinations are in the areas of applied analysis and applied linear algebra. Students must pass these exams by the start of their fourth semester.
5. Six semesters of full-time scholarly work are required, as specified in the Graduate Education Policies and Procedures. All students are strongly advised to spend at least one year doing full-time course work or research with no outside employment.
6. The comprehensive examination is taken after completion of the preliminary exams, completion of at least three semesters of residency, and upon completion of essentially all non-thesis coursework. The exam is designed to determine mastery of graduate-level mathematics and the ability to embark on dissertation research. It consists of a six-hour written examination and an oral follow-up examination. Students must pass the comprehensive exam by the beginning of the 4th year. Within six months after passing the comprehensive examination, the candidate must present a dissertation proposal to their dissertation committee.
7. Each student must write and defend a dissertation containing original contributions and evidence of significant scholarship. The dissertation defense is public and must be given before an approved examining committee.

For more detailed information about the Applied Mathematics PhD, see department website (https://clas.ucdenver.edu/mathematical-and-statistical-sciences/phd-applied-mathematics/).

Statistics, MS

Please click here to see Mathematical and Statistical Sciences department information.

Introduction

The need for workers trained in the science of data analysis continues to grow in industry, government, and academia. This need spans many fields and applications: national security applications (including real-time monitoring of internet trends), environmental applications of climate modeling over space and time, medical and genomic applications that use electronic medical records to correlate demographics, genetic data and clinical outcomes over millions of individuals, and manufacturing with real-time monitoring of features over a variety of processes to both troubleshoot and optimize manufacturing.

The Master of Science in Statistics program at the University of Colorado Denver provides the training necessary to succeed in real-world analysis of data. The degree program is designed to ensure students acquire fundamental statistical knowledge while having hands-on experience in the application of state-of-the-art statistical methods—all while collaborating with world-class researchers. The program emphasizes project-related experiences, helping students to further develop skills in programming, data wrangling, data analysis, interpretation, and presentation in a more realistic environment. The degree program is highly flexible depending on student interest. Students can select from a broad range of electives focusing on different areas of mathematics and statistics or pursue electives in computer science, economics, business, or geography. Alternatively, students can choose to pursue training focused in a specific application area of statistics.

Whatever specialization students choose, graduates with a statistics degree will be prepared for a multitude of careers.

The MS in Statistics requires students to complete 30 hours of accepted coursework and a capstone project. The coursework is organized into four components: 1) core courses, 2) statistics-related electives, 3) other electives, and 4) capstone project. The capstone project is developed within the structure of a student-centered, research-focused course. Full-time students take approximately two years to complete the MS degree.

The degree requires students to complete 15 credit hours through five required courses related to probability, statistical theory, regression, consulting, and the capstone project. Students must complete an additional 15 credit hours related to elective courses, which is generally five graduate courses. For the elective courses, three must be statistics-related while two others are more general (though they are typically math-related courses).

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Statistics faculty advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 30 credit hours of accepted coursework.
2. At least 24 credit hours of accepted coursework must be graduate MATH courses numbered 5000 or above. The remaining six hours must be either MATH courses numbered 5000 or above or approved courses outside the department numbered 4000 or above.
3. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.
4. Students must complete 21 credit hours with CU Denver faculty.
5. All students must take and pass a final oral examination that includes a written report (M.S. non-thesis option) or thesis (M.S. with thesis option). Passing this final oral examination fulfills the requirements of the capstone project.

Program Restrictions, Allowances and Recommendations

1. Up to nine semester hours of prior coursework may be transferred in (subject to approval); these must be at the 5000 level or above with a B- or better grade. Courses already applied toward another degree (graduate or undergraduate) cannot be used toward the MS degree in Statistics. Credit cannot be transferred until the student has established a satisfactory record of at least six graduate credits in mathematics or statistics at CU Denver with a minimum GPA of 3.0. All transfer courses must be approved by the Graduate Program Director. Courses taken while registered as a non-degree student are considered transfer courses.
2. According to graduate education policies and procedures, Master’s students, whether enrolled full-time or part-time, must complete all degree requirements within seven years of matriculation.
3. The following courses will not count toward the degree: MATH 5010 History of Mathematics, MATH 5012 An Advanced Perspective on Number and Operation-MATH 5015 Capstone Course for Secondary Teachers, MATH 5017 Topics in Mathematics for Teachers, MATH 5198 Mathematics for Bioscientists, and MATH 5830 Applied Statistics
4. In relation to completing the capstone project, three-six credits of MATH 5950 Master’s Thesis or three credits of MATH 5960 Master’s Project can be applied toward the degree. There is no co-credit between MATH 5950 Master’s Thesis, MATH 5960 Master’s Project, and MATH 6960 Research Methods in Mathematics and Statistics.
5. Students continuing into the PhD program in Applied Mathematics are strongly encouraged to take MATH 5718 Applied Linear Algebra and either MATH 5070 Applied Analysis or MATH 6131 Real Analysis for their “other” electives.

### Course Requirements

Applied Statistics Graduate Certificate

Please click here to see the Mathematical and Statistical Sciences department information.

Introduction

There is a growing need for qualified statistical analysts of the ever-increasing amounts of data collected in business, industry, and government. The Certificate in Applied Statistics program is designed to give students a strong background in statistical methodology and data analysis in preparation for opportunities in the workforce or for graduate studies.

Students will gain competence in such topics as descriptive statistics, estimation, confidence intervals, probability and inferential techniques, simple and multiple regression, analysis of variance, and more advanced topics. Students can focus on a particular application area such as economics, psychology, sociology, geology, or environmental science through the choice of an elective course and the data analysis project.

The certificate requires 12 credits of coursework split across 4 courses. The certificate requires 2 courses related to statistical theory and regression, 1 statistics elective, and 1 other elective. Students can complete the certificate in 1-2 years depending on their knowledge coming into the program and the number of courses they take each semester.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Applied Statistics faculty advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 12 credit hours from approved courses.
2. Students must complete a minimum of 12 graduate (5000-level or higher) credit hours.
3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Students cannot complete program or ancillary course requirements as P+/P/F or S/U.
4. Students must complete all coursework with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students must be enrolled in one course per year to maintain their status in the certificate program.
2. Certificates must be completed within three years from matriculation.

Courses

Students must complete the following coursework:

Modern Languages

Chair: Devin Jenkins
Program Assistant: Niki Mott
Office: Plaza Building, Room 118
Telephone: 303-315-7234
Fax: 303-315-7233
Mailing Address:
Campus Box 178
P.O. Box 173364
Denver, CO 80217-3364

Overview
The Master of Arts Program in Spanish at the University of Colorado Denver offers an alternative to exclusively literary studies that traditionally lead to doctoral programs. By integrating language, literature, and cultural studies with ancillary work in other disciplines, the degree provides the broader expertise that will lead to or enhance careers in teaching, government, social services, business and international trade. Students will tailor the program to their specific interests and needs by developing a topical focus including courses within and outside the Department of Modern Languages. This program is not offered online.

Spanish and English Proficiency Requirements
Levels of Spanish and English proficiency will be determined through an oral interview with the Graduate Committee for each applicant. In order to successfully engage in classroom activity at the graduate level, students in the Spanish MA program at University of Colorado Denver are expected to have advanced levels of speaking, reading and writing in both Spanish and English. If the applicant proves deficient in any area or language, the Grad Committee has the right to refuse admittance.

Information for Graduate Students from the University of Colorado Denver catalog states: “A student who is noticeably deficient in the use of standard English in all oral and written work may not obtain an advanced degree from the University of Colorado Denver. Ability to use the language with precision and distinction should be cultivated as an attainment of major importance. The university reserves the right to test English proficiency for non-native speakers of English to confirm and validate sufficiency for credit-bearing course work and degree programs. Each department will judge the qualifications of its advanced students in the use of English. Reports, examinations and speech will be considered in estimating the candidate's proficiency.”

Any non-native speaker of English who has not earned a degree from a University in the United States is required by the Department of Modern Languages to take the Test of English as a Foreign Language (TOEFL) and pass it with a minimum written score of 550, internet score of 80 or a computer score of 213 in order to be admitted into the Spanish MA program.

Teaching Assistantship (TA) Position
Teaching Assistantship (TA) positions may become available in the Spanish MA program. All applicants are interviewed by the Spanish MA faculty and positions are competitive. If you are interested in applying for a TA position, please pick up an application in our office or download it online (https://clas.ucdenver.edu/modLang/home/spanish-program/master-arts-spanish/spanish-teaching-assistanships/). All applicants are interviewed by the Spanish MA faculty and positions are competitive. Included with the Teaching Assistantship is a departmental scholarship that will cover the tuition for the course in which the student is concurrently enrolled.

Financial Aid
The department offers a limited number of teaching assistantships for graduate students on a semester-by-semester basis. Appointment is competitive and is typically based on a student’s academic credentials. Contact the department for details. For information on grants, federal work-study programs, scholarships and loans, contact the Office of Financial Aid (303-556-2886).

For further information concerning the master’s degree in Spanish at the University of Colorado Denver, direct inquiries to the graduate advisor Andrés Lema-Hincapie (andres.lemahincapie@ucdenver.edu).

Requirements for Admission
In addition to the general admission requirements for graduate admission, the Spanish MA program requires:

- an undergraduate GPA of at least 2.5, with a GPA of at least 3.0 in Spanish courses
- a bachelor’s degree in Spanish is not required, although all candidates must demonstrate Spanish oral and written proficiency at the advanced level, as defined by the American Council on the Teaching of Foreign Languages
- two copies of all college transcripts
- three letters of recommendation, at least two of which should come from former college-level instructors.
- a statement of the applicant’s purpose in pursuing the degree, in Spanish; any gaps, weaknesses or special circumstances affecting an applicant’s academic record should be addressed in the statement of purpose portion of the application
- a TOEFL score higher than 550 for students whose previous academic degree was completed in a non-English-speaking country
- Application Deadlines are: for Fall & Summer Admission – March 15th, and for Spring Admission - October 15th

In special circumstances, the department may modify its admission standards.

Western Regional Graduate Program
The Spanish Master’s Program participates in the Western Regional Graduate Program (WRGP) (http://wiche.edu/wrgp/), which is a tuition-reciprocity arrangement with 15 participating states and 1 Commonwealth. The WRGP program allows students who are residents of these participating states to pay in-state tuition for the duration of the MA program.

In addition to Colorado, the participating states include: Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming, and the Commonwealth of the Northern Mariana Islands.

Students should indicate on their applications that they are requesting residence status through WRGP if applying from out of state.

Programs
- Spanish, MA (p. 482)
**Spanish Faculty**

**PROFESSOR:**
Andrés Lema-Hincapié, PhD, Cornell University and PhD, University of Ottawa

**ASSOCIATE PROFESSORS:**
Michael Abeyta, PhD, University of California-Davis
María Luisa Fernández Martínez, PhD, University of California, Irvine
Devin Jenkins, PhD, University of New Mexico

**ASSISTANT PROFESSOR:**
Alyssa Martoccio, PhD, University of Illinois

**ASSISTANT PROFESSOR-CLINICAL TRACK:**
Gabriela de Robles, PhD, Georgetown University

**INSTRUCTORS:**
Ileana Gross, MA, University of Georgia
Amanda Ritchie, MA, University of Akron

**Graduate Advisor:**
ASSOCIATE PROFESSOR:
Michael Abeyta, PhD, University of California-Davis

**Study Abroad Advisor:**
ASSOCIATE PROFESSOR:
Devin Jenkins, PhD, University of New Mexico

**Internship Director:**
PROFESSOR:
Andrés Lema-Hincapié, PhD, Cornell University and PhD, University of Ottawa

**Latin Faculty**

**LECTURERS:**
Mary De Forest, PhD, University of Colorado
Alan Sumler, PhD, City University of New York

**Linguistics Faculty**

**ASSOCIATE PROFESSOR:**
Devin Jenkins, PhD, University of New Mexico

**ASSISTANT PROFESSORS:**
Alyssa Martoccio, PhD, University of Illinois
I-hao Victor Woo, PhD, Boston University

**ASSISTANT PROFESSOR-CLINICAL TRACK:**
Gabriela de Robles, PhD, Georgetown University

**INSTRUCTOR AND ADVISOR:**
Soubeika Bahri, Ph.D, City University of New York

**Emeritus Faculty:**

**ASSOCIATE PROFESSORS:**
Kathleen Bollard
Diane Dansereau

**INSTRUCTORS:**
Tim Phillips
Ted Wendelin

**Arabic (ARAB)**

ARAB 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

**Chinese (CHIN)**

CHIN 5690 - Methods of Teaching Modern Languages (3 Credits)
Studies the methods and practices of teaching modern languages. Note: requirement for those wishing to be teaching assistants in the Department of Modern Languages, and for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. CHIN 5691 - Methods of Teaching Modern Languages II (3 Credits)
A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, SPAN 5691, FREN 4691, FREN 5691, GRMN 4691, GRMN 5691, CHIN 4691. Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690
Typically Offered: Spring.

CHIN 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

French (FREN)

FREN 5082 - Introduction to Translation (3 Credits)
Introduces the methodology and practice of written translation from English to French/French to English. Students will learn techniques on how to avoid word by word translation, faulty sentence structure and anglicisms by focusing on grammar, syntax and vocabulary. Note: Students must demonstrate third-year competence and advanced writing skills in English. Students with native or near-native level proficiency in French must consult with the French advisor before enrolling in this course. These students may, in some cases, take this course. The instructor of the course and/or the French advisor reserve the right to determine the level of linguistic proficiency of the student and his or her admission to the class by means of an oral interview and/or placement exam scores. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4082. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

FREN 5200 - French Civilization Through the Nineteenth Century (3 Credits)
Development of French culture and civilization from a historical perspective, beginning with the origins of France and continuing through the 19th century. Includes historical background, sciences and techniques, daily life, the arts, literature and philosophy, and religion. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Term offered: spring term of even years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

FREN 5210 - French Civilization - Twentieth and Twenty-First Centuries (3 Credits)
(Continuation of FREN 5200) The development of French culture and civilization in a historical perspective from the beginning of the 20th century to the present. Includes historical background, sciences and techniques, daily life, the arts, literature and philosophy, and religion. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Term offered: fall term of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

FREN 5430 - Nineteenth Century French Novel (3 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4430. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

FREN 5480 - Twentieth Century French Novel (3 Credits)
Represents novels of the 20th century, a period of great innovation in the French novel. Authors generally treated are Camus, Giono, Ernaux and Duras. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4480. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

FREN 5510 - French Women Writers (3 Credits)
Designed to explore writings by French and Francophone women from the Middle Ages to the present. Addresses the question of what it means to be a woman and want to write. The selections include a wide variety of genres: autobiographical writings, stories, poems, manifestos, letters, political and historical documents. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4510 and WGST 4511/5511. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

FREN 5520 - Voices of Haiti and the Caribbean (3 Credits)
This course explores the literary production of contemporary Haitian and Caribbean writers within varied cultural and gender contexts. It focuses on historical, societal and post-quake issues confronting both men and women writers of the French Caribbean. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4520. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
FREN 5600 - History of the French Language (3 Credits)
Studies phonological, morphological, and syntactic changes in the language of Gaul from Latin to modern French. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4600. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

FREN 5690 - Methods of Teaching Modern Languages (3 Credits)
Studies the methods and practices of teaching modern languages. Note: requirement for those wishing to be teaching assistants in the Department of Modern Languages, and for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, SPAN 5690, FREN 4690, GRMN 5690, CHIN 4690, CHIN 5690. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

FREN 5691 - Methods of Teaching Modern Languages II (3 Credits)
A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, SPAN 5691, FREN 4691, GRMN 4691, GRMN 5691, CHIN 4691, CHIN 5691. Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

FREN 5692 - Methods of Teaching Modern Languages III (3 Credits)
Studies the methods and practices of teaching modern languages. Typically offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade

FREN 5840 - Independent Study: FREN (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

FREN 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

FREN 5995 - Global Study Topics (1-15 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Term offered: summer. Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.

German (GEMN)

GRMN 5690 - Methods of Teaching Modern Languages (3 Credits)
Studies the methods and practices of teaching modern languages. Note: requirement for those wishing to be teaching assistants in the Department of Modern Languages, and for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, SPAN 5690, FREN 4690, FREN 5690, GRMN 4690, CHIN 4690, CHIN 5690. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

GRMN 5691 - Methods of Teaching Modern Languages II (3 Credits)
A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, SPAN 5691, FREN 4691, GRMN 4691, GRMN 5691, CHIN 4691, CHIN 5691. Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

GRMN 5692 - Methods of Teaching Modern Languages III (3 Credits)
Studies the methods and practices of teaching modern languages. Typically offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade

GRMN 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.
SPAN 5040 - Spanish Classroom Methods and Practice (3 Credits)
Focuses on the second language learning and teaching of Spanish in a classroom context. Looks at topics including second language vocabulary, pronunciation, grammar, and types of feedback. Practical component of activity design and learning/teaching strategies.
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SPAN 4040. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.
SPAN 5060 - Dialects of the Spanish-Speaking World (3 Credits)
Studies the Spanish language in its social context as a language of the United States. In addition to studying bilingualism and language traits, factors such as race, gender, class, education, nationality, age, generation and language attitudes are considered. Prereq: Graduate standing. Cross-listed with SPAN 4060. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.
SPAN 5070 - Spanish Applied Linguistics & Second Language Acquisition (3 Credits)
This course is a survey of various areas of the field of linguistics in general (e.g. morphology, syntax, semantics, pragmatics, etc.) as well as specific elements of the structure (and acquisition) of the Spanish language. Prereq: Graduate standing. Cross-listed with SPAN 4070. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.
SPAN 5076 - Spanish in the United States (3 Credits)
A study of the Spanish language in its social context in Colorado and New Mexico. We will study historical factors as well as current social factors that contribute to the use of the Spanish language in this region. Prereq: Graduate standing. Cross-listed with SPAN 4076. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Summer.
SPAN 5080 - Spanish in the United States (3 Credits)
A study of the Spanish language in its social context as a language of the United States. In addition to studying bilingualism and language traits, factors such as race, gender, class, education, nationality, age, generation and language attitudes are considered. Prereq: Graduate standing. Cross-listed with SPAN 4080. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.
SPAN 5099 - Special Topics in Linguistics (3 Credits)
Varying topics in Hispanic language and literature not otherwise covered by regular courses. Note: May be taken more than once provided that the topics are different each time. Prereq: graduate standing. Cross-listed with SPAN 4099. Term offered: spring, fall. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.
SPAN 5110 - Contemporary Spanish Literature (3 Credits)
Major works published since the Spanish Civil War, which ended in 1939. Prereq: Graduate standing. Cross-listed with SPAN 4110. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5130 - Medieval Spanish Literature (3 Credits)
Examines Spanish literature from the jarchas and the Cid through the Celestina in the context of the reconquest. Considers the construction of the Christian knight as a hero and the corresponding representations of women, Jews and Muslims. Prereq: Graduate standing. Cross-listed with SPAN 4130. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5150 - Masterpieces of Spanish Literature (3 Credits)
The most enduring works in the literature of Spain across the centuries. Prereq: Graduate standing. Cross-listed with SPAN 4150. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5170 - Golden Age Drama (3 Credits)
Spanish drama of the 16th and 17th centuries, the period of greatest dramatic productivity in the nation’s history. Readings include selections from Lope de Vega, Tirso de Molina, Calderon de La Barca, and others. Prereq: graduate standing. Cross-listed with SPAN 4170. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5180 - Modernism (3 Credits)
Examines the first real flowering of Spanish American literature, from about 1880 to 1910. The dominant genres of the period were the short story, the essay, and lyric poetry. Readings come from Dario, Jose Enrique Rodo, Manuel Gutierrez Najera, Manuel Diaz Rodriguez and others. Prereq: graduate standing. Cross-listed with SPAN 4180. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5190 - Nineteenth-Century Spanish Novel (3 Credits)
The Spanish novel in one of its most productive periods, beginning with浪漫ism and carrying through the realist and naturalist movements. Prereq: graduate standing. Cross-listed with SPAN 4190. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5300 - Generation of 1898 (3 Credits)
Spanish literature from around the turn of the century through the first third of the 20th century, reflecting the deep intellectual and cultural foment occasioned in part by Spain’s loss of the Spanish-American War of 1898. Prereq: Graduate standing. Cross-listed with SPAN 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5320 - Interculturalism and Transnationalism in Modern Spain (3 Credits)
Students will examine experiences of Spaniards living in different parts of the world and the circumstances of either foreigners or migrants living in Spain, through their visual and literary texts, film, photographs, documentaries and other products of current popular culture, such as contemporary television. Prereq: Graduate standing. Cross-listed with SPAN 4320. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5330 - Modern Culture of Spain through Film and Narrative (3 Credits)
Culture of modern Spain studied through Spanish film. The death of military dictator Francisco Franco opened the process for the recuperation of a usurped democratic, representational system that has become the basis of a cultural and economic resurgence. Taught in Spanish. Prereq: graduate standing. Cross-listed with SPAN 4330. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5340 - Race, Class, and Gender in Spanish Golden Age Literature (3 Credits)
Explores works of various genres in relation to their social and political contexts in 16th and 17th century Spain, emphasizing the cultural attitudes toward race, class, and gender that inform them. Prereq: graduate standing. Cross-listed with SPAN 4340 and WGST 4540/5540. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5350 - Don Quijote (3 Credits)
The complete Don Quijote in Spanish, focusing on its historical, social, and philosophic context, and its role in the emergence of the modern novel. Prereq: graduate standing. Cross-listed with SPAN 4350. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5360 - Women and the Spanish Civil War (3 Credits)
Focuses on the role of Spanish women during the Second Republic, the Civil War, the dark & starving postwar, & the inescapable exile that was a consequence of the conflict. Discusses several texts & films that portray this silenced odyssey, as well as historical, ideological & cultural documents of critical value & significance. Cross-listed with SPAN 4360. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5370 - Women and the Spanish Civil War (3 Credits)
The Spanish novel in one of its most productive periods, beginning with romanticism and carrying through the realist and naturalist movements. Prereq: graduate standing. Cross-listed with SPAN 4370. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5511 - Contemporary Argentine Short Stories (3 Credits)
The short stories by extraordinary Argentine writers, such as Jorge Luis Borges, Silvina Ocampo, Julio Cortazar, Griselda Gambaro, Adolfo Biy Casares, and Manuel Muica Laineza, among others, will be studied with the goals of teaching students to think globally as well as critically about literature and other cultures. Prereq: graduate standing. Cross-listed with SPAN 4512. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5522 - Mexican Literature II: 19th to 21st Centuries (3 Credits)
Survey of Mexican literature and culture from the early modern to contemporary literature. Prereq: graduate standing. Cross-listed with SPAN 4522. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5525 - Orientalisms In The Hispanic Traditions (3 Credits)
Advanced studies of orientalism in the Hispanic tradition: the Hispanic-Arabic cultural heritage in Early Medieval Spain and in contemporary Hispanic cultures, as well as the influence of other eastern religions and cultures, such as Judaism or Buddhism. Prereq: graduate standing. Cross-listed with SPAN 4525. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPAN 5541 - Unexpected Lives: Ibero-American Queer Cinema (3 Credits)
Provocative films, by courageous Ibero-American filmmakers, on controversial topics (homosexuality, Lesbianism, bisexuality, transgender individuals, feminism, etc.) will be studied to teach students to think globally as well as critically about LGBTQ individuals in the context of Ibero-American cultures. Prereq: graduate standing. Cross-listed with SPAN 4541. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5550 - Garcia Marquez: Words of Magic (3 Credits)
The works of Gabriel Garcia Marquez (stories, short novels, novels, newspaper articles, interviews, lectures) will be studied with the goals of teaching students to think globally as well as critically about literature and other cultures. Prereq: graduate standing. Cross-listed with SPAN 4550. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5590 - Ibero-American Thought (3 Credits)
The course examines philosophical works by essayists, literary critics, and cultural thinkers from Spanish-American countries and the Iberian Peninsula. Besides reading philosophical works in their original form, students will read scholarly commentaries to deepen their understanding of those works. Prereq: graduate standing. Cross-listed with SPAN 4590. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5599 - Ibero-American Short Stories (3 Credits)
Varying topics in Latin American literature not otherwise covered by regular courses. Note: May be taken more than once, provided that the topic is different each time. Prereq: graduate standing. Term offered: spring, fall. Repeatable. Max Hours: 6 hours.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.
SPAN 5600 - Seminar in Spanish Creative Writing: Poetry and Short Fiction (3 Credits)
A capstone writing course. Semester writing project will be collected poems and short stories. Prereq: graduate standing. Cross-listed with SPAN 4600. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5690 - Methods of Teaching Modern Languages (3 Credits)
Studies the methods and practices of teaching modern languages.
Note: requirement for those wishing to be teaching assistants in the Department of Modern Languages, and for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, FREN 4690, FREN 5690, GRMN 4690, GRMN 5690, CHIN 4690, CHIN 5690. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

SPAN 5691 - Methods of Teaching Modern Languages II (3 Credits)
A continuation of the study of modern language teaching methods.
This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, FREN 4691, FREN 5691, GRMN 4691, GRMN 5691, CHIN 4691, CHIN 5691. Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

SPAN 5840 - Independent Study: SPAN (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

SPAN 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

SPAN 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

SPAN 5950 - Master's Thesis (1-6 Credits)
This course is for students writing a master's thesis. It includes individual mentoring with one or more faculty members, individualized and library-based research. May also include field research. Students must consult with a faculty member before enrolling. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.

SPAN 5970 - Special Topics in Literature (3 Credits)
Varying topics in Hispanic literature not otherwise covered by regular courses. Prereq: Graduate standing. Cross-listed with SPAN 4970. Term offered: spring, fall. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
Spanish, MA

Introduction

Please click here (p. 474) to see Modern Languages department information.

The Master of Arts Program in Spanish at the University of Colorado at Denver and Health Sciences Center offers an alternative to exclusively literary studies that traditionally lead to doctoral programs. By integrating language, literature and cultural studies with ancillary work in other disciplines, the degree provides the broader expertise that will lead to or enhance careers in teaching, government, social services, business and international trade. Students will tailor the program to their specific interests and needs by developing a topical focus including courses within and outside the Department of Modern Languages. Students choose from two options for completion of their Master’s degree: either they complete their coursework and take a comprehensive written and oral exam in their last semester, or they complete a six credit thesis under the direction of Spanish faculty. This program is not offered online.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Spanish faculty advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete 33 credit hours, with a minimum of 21 SPAN credit hours.
2. Students must complete a minimum of 30 graduate level (5000 or above) credit hours.
3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Students cannot complete course requirements as P+/P/F or S/U.

4. All credit hours for the certificate must be earned at the University of Colorado Denver.

Program Restrictions, Allowances and Recommendations

1. Candidates in Spanish must satisfy the graduate education policies and procedures and will be required to complete 33 hours of course work distributed with respect to the Thesis or Non-Thesis Options outlined below.
2. No more than one undergraduate course (three semester hours) may be applied toward the MA degree, and that course must have been taken at the 4000 level or above and in an ancillary field outside the Department of Modern Languages.
3. Failure to maintain a 3.00 Program GPA will result in the student being placed on academic probation. Courses completed with grades below the letter grade of B- (GPA 2.7) may not be applied toward fulfillment of the requirements for any graduate (doctoral or master's) degree.
4. Students may elect to take three courses (nine semester hours) outside the department.

Political Science

Chair: Michael Berry
Digital & Print Communications Specialist: Elly Steinmetz Lewis
Undergraduate Advisor: Karen Breslin
Pre-law Advisor: Glenn Morris
Graduate Advisor: Michael Berry
Director, New Directions Program: Steve DelCastillo
Office: Student Commons, Room 3212
Telephone: 303-315-1770
Fax: 303-315-1780
Website: https://clas.ucdenver.edu/polisci/

Overview

Political science is the study of people, power and the public good. Looking at a variety of societies, institutions and interpersonal situations, the discipline asks who has power, where this power comes from, how it is used, how it promotes or impairs the public good and how the public good is defined. Political science draws from other fields, such as psychology, philosophy, economics, sociology and world literature. Finally, it explores the relationship between idealism and realism, between theory and practice, between political thought and personal action.

Opportunities for students with a degree in political science include careers in business, teaching, journalism, community organizing and government service. A political science degree also serves as good preparation for professional training in law and public administration. Students’ internship experiences increase their job opportunities. Students with an MA in political science may find careers in such areas as business, government research and administration and teaching at the community-college level. The CU Denver Political Science Master’s Program provides many opportunities for professional development through political internships, for community-based learning through a focused community organizing and development curriculum (including many teaching, research and service partnerships with local community organizations), and for international engagement through a robust international politics curriculum, study abroad opportunities, and partnerships with international organizations.

Please visit the political science department website (https://clas.ucdenver.edu/polisci/) for detailed information on programs, faculty; students, courses and syllabi, community involvement and service learning, internships and photographs.

Fourth World Center for the Study of Indigenous Law and Politics

Executive Director: Glenn T. Morris
Telephone: 303-315-1762

This center provides a research clearinghouse to students and faculty at CU Denver on legal and political issues that affect indigenous peoples (the Fourth World). In addition to supporting a modest library of rare books and periodicals on indigenous issues, the center also stocks video and audio resources on subjects of indigenous politics and a substantial news file archive on current developments in the Fourth World. The center has produced curricular materials, including the Fourth World Bulletin, for use in international relations and area-studies courses.

Center for NEW DIRECTIONS in Politics and Public Policy

Director: Steve DelCastillo
Website: https://clas.ucdenver.edu/newdirections/

This center provides academic programs, courses and research focused in the areas of politics and public policy with the purpose of developing the leadership capacities necessary to address changing public priorities for the 21st century within neighborhoods, communities, governmental jurisdictions, labor organizations, and nonprofit entities. Students in the Center’s academic programs include working professionals in public and non-profit sectors; elected officials; community activists; interest-group stakeholders; educators from a wide range of demographic, occupational, and personal backgrounds; and simply concerned citizens. The New Directions program offers professional internships with a wide variety of political jurisdictions, community-based groups, and labor organizations across Colorado, including several funded internships.

The center offers both undergraduate and graduate degrees in political science with emphases in public policy and administration.

Requirements for Admission

Students applying for admission to the MA program in political science should have an undergraduate degree in political science or related field (e.g., international affairs or public administration, among others) or have completed at least 18-credit hours of previous academic work in political science, at least 9 hours of which should be at the upper-division or graduate level. The department may make exceptions to these requirements in unusual cases (for instance, if course work in related fields such as psychology, economics and history compensates for the deficiencies in political science). Applicants should have an undergraduate GPA of at least 3.0 to be considered. In their applications, students must submit official transcripts and three letters of recommendation (academic references preferred) as specified by graduate admissions. In addition, applicants must submit a statement of academic objectives and an academic writing sample. Standardized test scores are not required of applicants but will be considered if submitted. Program applicants who face difficulties in meeting these requirements should reach out for individual discussion with our Graduate Program director (for example, if an undergraduate GPA is below 3.0, or if letters of recommendation from professors taken years ago are difficult to obtain).

In order to take graduate courses in political science, students must either be admitted to the MA program, a declared 4+1 BA/MA student, or secured permission to take courses as a non-degree student. Non-degree students interested in our certificate programs or in taking graduate courses for any reason should reach out to the Department Graduate Advisor to secure admission to courses as a non-degree seeking student.

See more about our admissions on our website (https://clas.ucdenver.edu/polisci/graduate/).

Charles Norton, JD, University of Chicago
Basim Mahmood, M.A., University of Colorado
Nicholas Rockwell, PhD, University of California, Los Angeles
Karen Sugar, MA, University of Colorado
Martin Widzer, PhD, University of Denver

Emeritus Faculty:
Mike Cummings, PhD, Stanford University
Joel Edelstein, PhD, University of California, Riverside
Jana Everett, PhD, University of Michigan
Stephen C. Thomas, PhD, Stanford University

Political Science (PSCI) Courses

PSCI 5000 - State of the Discipline (3 Credits)
Introduces graduate study in political science. Provides an overview of theories and methods in the four fields of American politics, political theory, comparative politics and international relations. Guest lectures by department faculty. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
Typically Offered: Fall.

PSCI 5001 - Theories of Capitalism (3 Credits)
Is capitalism “the legitimate racket of the ruling class”, as Al Capone argued? Is it the “system under which greed does the least harm”, as Milton Friedman suggested? Or, is it as John Keynes had it, “the astounding belief that the most wickedest of men will do the most wickedest of things for the greatest good of everyone”? This advanced undergraduate/graduate course in theories of political economy engages ideas, concepts, actors, institutions, relationships, dynamics, and structures central to a deep understanding of global industrial capitalism. The course is centered on the works of seminal theorists of capitalism from the 18th century forward, including Adam Smith, David Ricardo, Alexander Hamilton, Friedrich List, Karl Marx, CLR James, Harry Magdoff, Friedrich Hayek, Martin Luther King, Jr., Kwame Nkrumah, Jeff Sachs, Amartya Sen, and Vandana Shiva. Students in the course are provided ample opportunities, across a variety of innovative assignments, to explore the historical and social context of the theoretical perspectives presented, to compare these perspectives to one another, and to make substantive connections between theory and practice. Note: Students are not expected to have any prior coursework in political science. Students are expected to make progress in developing their reading, writing, analytical and critical thinking skills. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with PSCI 4001. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

PSCI 5008 - Graduate Topics in Political Science (1-3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
Typically Offered: Fall, Spring, Summer.

PSCI 5009 - Politics of the Budgetary Process (3 Credits)
Explores budgeting and financial management in the public and nonprofit sectors. An overview of public sector and nonprofit fiscal management is provided, along with thorough exploration of the political influences that affect financial decision-making. Note: Offered as a special topics course in an intensive three-weekend format, which is reflected in the syllabus. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5011 - GIS in Political Science (3 Credits)
Computer lab course developing methodological skills in Geographic Information Systems (GIS) in political contexts. Geospatial computerized mapping skills are important in political fields such as urban planning, electoral analysis, environmental justice, demographics, public health, and criminal justice. Designed for beginners. Cross-listed with PSCI 4011. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5014 - Seminar: American Politics (3 Credits)
Foundations of U.S. politics and contemporary political issues. Federal/state/community relations. Relationship among the three branches of the Federal government. Colorado controversies arising under the U.S. Constitution. Cross-listed with PSCI 4094. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5024 - State Politics: Focus on Colorado (3 Credits)
Analysis of unique aspects of Colorado government and politics. Political comparison of Colorado with other states. Preparation and discussion of research papers. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Term offered: fall, summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5025 - Local Governance and Globalization (3 Credits)
Introduces international political economy, consequences of globalization for localities, interplay between wealth and power among nations, multinational corporations, NGOs and the UN, and impact of their actions on local governments. Topics include development, aid, trade, outsourcing, eco-sustainability and global equity. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4025. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5044 - The Presidency (3 Credits)
An overview of the historical, constitutional, and functional aspects of the presidency. Focuses on the powers and vulnerabilities of the presidency and on the style and politics of the current president. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4044. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5054 - The Legislative Process (3 Credits)
An intensive examination of the structures and interactions through which laws are made in the United States. The major emphasis is the national level, but considerable attention is devoted to state legislatures and local lawmaking bodies. Impact of money and interest groups. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5057 - Religion and Politics (3 Credits)
Exploration of: (1) theoretical perspectives on the relationship between religion and politics; (2) causes of and justifications for the historical development of the Western separation of "church and state;" (3) contemporary responses to and analyses of this separation; and (4) several current debates about public policy in America that reveal tensions between these two spheres. Cross-listed with PSCI 4057, and RLST 4500, 5500. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5075 - Gentrification and Social Equity (3 Credits)
Study causes and consequences of urban gentrification, and explore strategies of grassroots resistance and social equity solutions that are being mobilized to challenge the forces of gentrification. Contrast common celebrations of the waves of capital reinvestment that are fueling urban revitalization with the frequent claim of many low-income neighborhoods: "Gentrification is Class War!" Cross-listed with PSCI 4075. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5084 - Local Government and Administration (3 Credits)
Policy and administrative challenges faced by local government in the 21st Century. Emphasis on cities under federalism, alternative forms of city governance, and new challenges from increasingly diverse constituents. Issues of poverty, public safety, health, transportation, environment, corruption and accountability. Cross-listed with PSCI 4084. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5085 - Comparative Governance: Environment and Society (3 Credits)
Focuses on how public & private actors at various levels of governance address pressing social & environmental issues such as aging societies, drug abuse, air pollution & global warming. Students will learn to analyze the dynamics of conflict & cooperation, using main concepts and theories of governance literature. Cross-listed with PSCI 4085.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5094 - Urban Politics, Planning, and Development (3 Credits)
For the first time in world history, humanity has passed a watershed moment as the majority of all the world's people now reside in cities, rather than rural areas. Most of the world's GDP is generated in cities, but cities also consume most of the world's resources. Technological invention and cultural innovation flourish in cities, but so too does crime and anomie. In cities, profound economic and ideological struggles over competitive neoliberalism and the sharing social economy play out in spatial struggles over the shape and use of the urban places we move through daily. Can vast and growing cities be sustainable, healthy, and just? Field tours through changing Denver neighborhoods provide case study insights. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4074.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5105 - Comparative Politics: Europe (3 Credits)
Examination and writing of research papers on selected topics of industrial democracies, especially those of Europe. Cross-listed with PSCI 4105. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5217 - Human Rights: Theory and Practice (3 Credits)
Examines the ideas of international human rights and the practical
efforts to actualize rights in societies around the world. Students
study the theories of rights and the evolution of rights in history.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4217. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5224 - Dictatorships in 21st Century (3 Credits)
Analyzes and classifies political systems of non-democratic regimes.
Reviews earlier and contemporary theories that explain the origins,
survival and death of authoritarian regimes. Discusses the impact of
dictatorial rule on domestic developments as well as on international
relations. Cross-listed with PSCI 4224. Restriction: Restricted to Graduate and
Graduate Non-Degree Majors or undergraduate majors in the
Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max
Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5225 - Democracy and Democratization (3 Credits)
Examines the conditions under which countries turn from
authoritarianism towards democracy and become stable democratic
regimes. Also examines the impact of foreign and international factors on
new democracies. Cross-listed with PSCI 4225. Restriction: Restricted to Graduate and
Graduate Non-Degree Majors or undergraduate majors in the
Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max
Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5236 - Seminar: American Foreign Policy (3 Credits)
Examines selected methodological and substantive problems. Particular
emphasis on elements of national decision making, America’s adaptation
to the changing world, and opportunities for student contributions
through research and discussion. Restriction: Restricted to Graduate and
Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5238 - Seminar: Comparative Foreign Policy (3 Credits)
Examination of the effects of leaders, groups, institutions, strategic
cultures and external influences on national foreign policy-making
processes and comparative analysis of foreign policy making of great
and emerging powers. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5245 - Gender, Development and Globalization (3 Credits)
Examining the cost and impact of globalization; not only on women and
gender but economic equality, human movement and displacement,
sustainable development and the environment. Highlighting the
complexities of a highly interconnected world and intersectional nature of
a globalized world, answering the question: Who Wins? Who Loses?
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4248, WGST 4248 and
WGST 5248. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5256 - Seminar: National Question and Self-Determination (3 Credits)
Designed to provide students with a broad theoretical and empirical
understanding of the causes of ethnic conflicts and to assess different
strategies of conflict resolution. Restriction: Restricted to Graduate and
Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5265 - Social Justice And Globalization (3 Credits)
Examines issues of justice and ethical responsibility in a globalizing
world. Do moral obligations of individuals and institutions end at national
borders or do they encompass all human beings and extend to the
environment and to future generations? Cross-listed with PSCI 4265.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5266 - International Law (3 Credits)
Investigates the body of law that regulates relations between nations
and provides a framework for solving common problems and disputes
between nations. Restriction: Restricted to Graduate and Graduate Non-
Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4266. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or
undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5274 - Conflict Resolution and Public Consent Building (3 Credits)
Alternative strategies for resolving or mediating conflicts facing public or nonprofit organizations and for building public consent, with emphasis on personal, interpersonal, organizational, interest-group, cross-cultural, and roots of conflict and bases for consent. Cross-listed with PSCI 4274.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5276 - Conflicts and Rights in International Law (3 Credits)
Explores contending interpretations and practices in international law regarding issues such as the legitimacy of humanitarian intervention, efficacy of truth commissions, tensions between truth and justice in cases of genocide and war crimes, and legal changes needed to devise viable rules. Cross-listed with PSCI 4276. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5286 - International Relations: War or Peace? (3 Credits)
Presents alternative theoretical frameworks for the explanation of war and peace. Investigations of the efficacy of international law, just-war norms and the UN in preventing or containing conflict.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4286. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5326 - Advanced International Political Economy: Globalization (3 Credits)
Engages the current debate about globalization. Conceptualizes globalization and evaluates the pros and cons of global trade and finance for developed and developing countries. Develops a model for a sustainable and just global economy. Cross-listed with PSCI 4326.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5340 - Advanced International Political Economy: Global Supply Chain (3 Credits)
Many people globally rely on long, global supply chains for jobs and incomes and to acquire the goods and services they need to survive. These chains connect people all over the world—from farmers and seamstresses to multinational corporations and investment banks—to one another as they work to bring products to our store shelves and homes. Yet, as current events clearly demonstrate, these long and complicated chains are fragile and easily disrupted, contributing to rising vulnerability, insecurity, inequality, and poverty around the world. How did it come to pass that we rely on such a complex system for the things we need? Is this kind of interdependence a good idea? What alternatives exist for restructuring trade, work, and production? These questions have occupied political economists for centuries and for good reason. Thinking about supply chains means thinking about survival and our relationships with one another and the Earth. This course tackles contemporary and historical supply chains with an eye toward thinking about the future of global production, trade, and work.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4340. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5354 - Seminar: Environmental Politics and Policy (3 Credits)
Considers competing models of the policy process in natural-resources decision making. Focus on selected case studies. Impact of environmental and pro-growth forces on the political process.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5365 - Global Ecological Crises (3 Credits)
Overview of global ecological problems such as climate change, transboundary pollutions, and loss of bio-diversity in an attempt to understand the political, economic, and cultural forces behind these problems and the status of legal and policy initiatives to address them.
Cross-listed with PSCI 4365. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5414 - Non-Profits and Social Change (3 Credits)
Explores role of non-profits in catalyzing social change. What are obstacles and opportunities to leveraging social change through nonprofits? What factors shape non-profits to be either transformational or systemstabilizing forces? Cross-listed with PSCI 4414. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5424 - The Social Economy and Sustainable Development (3 Credits)
Theory and practice of social economy initiatives like worker cooperatives, micro-credit networks, mutual aid associations and the fair trade movement. How do grass-roots activists and legal frameworks affect the direction and possibilities of the solidarity economy? Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5434 - The Cooperative Movement: Politics and Policy (3 Credits)
Explores the history, current status, and emerging developments in the cooperative movement, both domestic and global. Topics include the political, organizational, and financial challenges and opportunities facing worker, producer, and consumer cooperatives. Examines how cooperative enterprises have adopted both reformist and revolutionary responses to the capitalist system, and how legal regimes and grassroots movements shape the future of cooperative enterprises. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5446 - Advanced Indigenous Peoples' Politics (3 Credits)
Builds upon the theoretical and applied foundations of PSCI 4146. Intensive study of international legal and political developments are examined, particularly in the United Nations and the Organization of American States systems. Note: this course assumes that students have completed PSCI 4144 or 4146 or equivalent. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4446. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5457 - American Political Thought (3 Credits)
Critical examination of American political life at the intersections of social categories such as race, class, gender, sexuality, disability, and Indigeneity. Exploration of key and marginal thinkers through a variety of texts and genres. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4457, ETST 4457, and ETST 5457. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5468 - Research Methods in Political Science (3 Credits)
Analysis and evaluation of research methods, techniques, and empirical materials in political science application to Internet research. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5477 - The U.S. Constitution: Law and Politics (3 Credits)
An intensive analysis of the most recent doctrinal developments in the areas of federal jurisdiction, federalism, separation of powers, commerce, taxing and war powers, civil liberties and civil rights. Note: this course assumes that students have completed PSCI 4477 or 4487 or equivalent. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5535 - Labor and Working Class Politics (3 Credits)
Explores the status of the labor movement both in the U.S. and internationally, as well as the political, philosophical, and social implications of socioeconomic class status and identity. Cross-listed with PSCI 4535. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5545 - Immigration Politics (3 Credits)
Introduces students to central theories of migration and a survey of immigration law and policy in the 20th century. Highlights experiences of Mexican and Latin American immigrants and related topics, including U.S.-Mexican foreign relations, bilingual education, undocumented immigration and globalization. Cross-listed with PSCI 4545. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5548 - Labor Law and Collective Bargaining (3 Credits)
Explores the history, current status, and emerging developments in U.S. labor law. Examines how labor law structures worker organizing and collective bargaining efforts. Focus on labor/management relations in such processes as contract administration, workplace anti-discrimination efforts, and labor organizing rights. Explore new developments like labor law in relations to social media usage and independent contracting. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5550 - Labor, Trade Unions and the Global Economy (3 Credits)
Examines transnational trade unionism amid the global economy, with an emphasis on trade unions in a comparative perspective. How do labor activists and trade unions strive to establish institutions and mechanisms to assert worker rights and power in today's international political-economy? Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5551 - International Society: Critical Perspectives (3 Credits)
International societies are one of the main phenomena of international relations and a key concept in the field of International Relations. Far from being an inclusive and egalitarian space, as often claimed by its leading members and advocates, international societies are based on power inequalities, both material and discursive, that continuously reproduce their deep hierarchical structures. This course discusses the origins and evolution of the present international society as well as the main hierarchies within it. It focuses on the processes that led to its formation and the mechanisms used to contain and/or to defeat attempts at transforming it. It also explores the possibilities of alternative visions of order in international relations. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Term Offered: Fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5555 - International Women's Resistance (3 Credits)
Examines local and international struggles of women to build peace and justice by resisting systems of inequality such as colonialism, racism, patriarchy, globalization, and religious intolerance. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4555, WGST 4555/5555 and ETST 4555. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5561 - International Women's Resistance (3 Credits)
Examines the Middle East regional system and the region’s role in world politics. Investigates questions regarding politics in Iran, Iraq, Palestinian-Israeli relations, political Islam, and relations with the United States. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5610 - Seminar: Middle East Politics (3 Credits)
Examines the Middle East regional system and the region’s role in world politics. Investigates questions regarding politics in Iran, Iraq, Palestinian-Israeli relations, political Islam, and relations with the United States. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5615 - Seminar: Chinese Development (3 Credits)
Discussion of readings about China. Analysis of several of the following: party-government relations, ideology and political behavior, leadership, diplomacy, political and economic development and post-Mao reforms. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5726 - Seminar on U.S. and China Relations (3 Credits)
Detailed examination of historical context and current issues in U.S./China relations. Emphasis on modern period, with particular attention to changing relations in context of rising power of China. Cross-listed with PSCI 4726. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5747 - Legal Reasoning and Writing (3 Credits)
Introduces the fundamentals of legal reasoning and legal argumentation through intensive class discussion, formal debate and writing. Attention is given to the relationship between case and statutory law and their application in trial and appeals courts in the United States. Cross-listed with PSCI 4757, COMM 4750, 5750. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5807 - Seminar: Conflict Behavior and the Politics of Violence (3 Credits)
Theoretical and empirical analysis of conflict behavior with special emphasis on the explanation of political violence. Revolution, international warfare, and urban unrest are studied as forms of political violence, and the role of systematic empirical research is emphasized in the development of general theories of intergroup conflict. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5808 - Strategies of Peacebuilding (3 Credits)
The course investigates the theories and strategies of peacebuilding in societies that have endured intrastate conflict and/or massive human rights violations and asks whether peace and justice and democracy can or should work together and how forgiveness and reconciliation might develop. Cross-listed with PSCI 4808. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5837 - Contemporary Issues in Civil Liberties (3 Credits)
Conflicting rights of individuals and groups in several areas of civil liberties, including religious groups, free speech, sexual freedom, racial quotas, and anti-governmental actions and publications. This course includes case law, readings, guest speakers and case discussions. Cross-listed with PSCI 4837. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5840 - Independent Study: PSCI (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

PSCI 5878 - War, Film, & International Law (3 Credits)
This course examines interactions of culture, politics, and law by chronologically investigating 20th-century war movies and the ways experiences and norms have shaped and been shaped by cinematic representations. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4878. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

PSCI 5914 - Community Organizing and Community Development (3 Credits)
The theory and practice of community organizing strategies and community development innovations. How can social activists build power at the grassroots to build equitable, sustainable, and healthy communities? Cross-listed with PSCI 4914. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5929 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

PSCI 5944 - CU in the City (3 Credits)
Investigation of community development strategies through seminar discussions, urban walking tours, and student field placement with a local community based organization, non-profit, or public office engaged in community development work. Cross-listed with PSCI 4944. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5950 - Master's Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

PSCI 5960 - Master's Project (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Term offered: fall, spring, summer. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall, Spring, Summer.

PSCI 5999 - Master's Project Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
PSCI 5995 - Global Study Topics (1-3 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Prereq: Graduate standing or permission of the instructor. Cross-listed with PSCI 4995. Term offered: summer. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.
New Directions in Public, Non-Profit and Community Leadership, Political Science, MA

**Director:** Dr. Steve DelCastillo  
**E-mail:** steve.delcastillo@ucdenver.edu

Please click here (p. 484) to see Political Science department information.

The Public, Non-profit and Community Leadership track of the political science MA program is offered off-campus through the Center for New Directions. The Center for New Directions offers an MA program focused on public leadership, community labor organizing, and social economy innovations, in collaboration with community and labor organizations and local government jurisdictions across Colorado. The program seeks to develop the public leadership & community organizing capacities necessary to address challenges and leadership & community organizing capacities necessary to address challenges and opportunities within neighborhoods, communities, government jurisdictions, and non-profit entities.

In addition to their standard coursework, students in this Master’s program are encouraged to be involved in experiential learning through professional internships, community-based action research opportunities, and other practicums made available to students through the program’s many university-community partnerships, including the possibility of full-time, salaried internships with rural and small jurisdictions across Colorado. Through partnerships with government jurisdictions across the state, and with non-profits and community-based organizations, New Directions seeks to build community power and identify policy solutions to local challenges.

This program presents courses in an intensive weekend format, allowing students to complete their masters entirely through weekend or online courses.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their New Directions faculty advisor to confirm the best plans of study before finalizing them.

**Certificate Program**

The Center for New Directions MA program offers two certificate programs:

- Public, Non-Profit and Community Leadership  
- Labor Leadership Certificate

These certificate programs allow students to focus their studies in a particular direction and to note that particular focus on their transcript. Students do not have to be seeking a full Master’s degree to earn a certificate of completion through the certificate program.

For more information on these graduate certificates, click the links above.

**Graduate Education Policies and Procedures apply to this program.**

**Degree Requirements**

1. Students must complete a total of 33 graduate credit hours to complete the MA degree.
2. Students must complete a minimum of 33 graduate level (5000-level or higher) PSCI credit hours.
3. Students must earn a minimum grade of B- (2.7) in all courses applied to the degree and must achieve a minimum cumulative masters GPA of 3.0. All graded attempts in required and elective courses are calculated in the masters GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.
4. Students must complete all coursework with CU Denver faculty.

**Program Restrictions, Allowances and Recommendations**

1. Previously earned graduate credit may be submitted for approval to satisfy up to nine hours of the supportive elective requirement. The elective courses offered may change from time to time based on needs, interests and other factors.

**Course Format**

All courses are offered in a weekend format that consists of three weekend sessions for a given course, spread out over a two or three month period. Weekend classes are held from 9:00 am to 4:00 pm on both Saturday and Sunday of each weekend session. In most cases, a student will complete all of the weekend sessions of one course before starting the weekend sessions for the next course. There is typically a two to three week break between each weekend of class-time in a given course.

Elective courses in the New Directions program are offered in three different "pathways" of study, allowing students to choose their particular interest and focus their studies on that subject. The three pathways are:

1. **Local Governance:** Curriculum focuses on educating students who are interested in working in local and state government sectors, or with public policy research and advocacy organizations. Curriculum and community partnerships in this area focus on local government and administration, the politics of government finance, state politics and public policy challenges.

2. **Community and Labor Organizing:** Curriculum focuses on developing diverse theoretical and practical courses in labor and community organizing politics, history and strategies. Courses focus on social movement theories, labor union politics, and community organizing strategies to help students develop...
theoretical foundations and practical strategies for more effective community and labor leadership.

3. **The Social Economy and Sustainable Development:** Curriculum focuses on developing an understanding of the current political-economic systems, and on exploring alternative and diverse economic strategies that might work to the benefit of less privileged communities. Courses and community partnerships allow students to explore democratic financial systems, land trusts, and worker cooperatives, and other such innovative "social economy" practices, at the local, national and global levels. In this track, students will learn of diverse economies theory, innovative economic development strategies in both rural and urban areas, the worker cooperative movement, and innovative financial strategies that work for less privileged communities.

While students are encouraged to focus their studies by taking courses within a chosen pathway, but it is *not* required that students only take courses within a single pathway (and some courses fit in more than one area). Students should work with the program director to learn more about which courses to complete for each focused pathway.

Political Science, MA

Director: Michael Berry
E-mail: michael.berry@ucdenver.edu

Please click here (p. 484) to see Political Science department information.

Introduction

The Political Science Department offers a Master of Arts (MA) degree in Political Science with an emphasis on building academic and practical skills in key areas of the discipline. Research and teaching in the department centers on the major fields of American politics, comparative politics, international relations, political theory and public policy. The department also offers more specialized training in community organizing, human rights, legal studies, gender politics, race and ethnic politics, European studies, indigenous politics and urban politics. Students pursuing the MA have the option of completing the traditional track or an “alternative” track centered on public, non-profit and community leadership. Students completing the alternative “public, non-profit and community leadership” track take most courses in weekend, off-campus locations. Students completing either track have gone on to PhD programs across the country and work in a variety of areas, including: state and local elected office, government service, community organizing and development work, nongovernmental organizations, legislative analysts, UN affiliates, lobbyists, teachers, media analysis and political consulting.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Political Science faculty advisor to confirm the best plans of study before finalizing them.

Alternative Political Science Master’s Program: The New Directions Program

In addition to its traditional, on-campus Master’s degree, the Political Science Department offers a Public, Non-Profit and Community Leadership MA program through the Center for New Directions. The Center for New Directions offers an MA program focused on 1) public leadership; 2) community and labor organizing; and/or 3) political and social economy innovations. These options are carried out in collaboration with local government jurisdictions, community and labor organizations, and advocacy groups across Colorado. The program develops public leadership & community organizing competencies for addressing social, economic, and political challenges within Colorado communities and regions.

Plan II is available both under the traditional MA track offered on the Denver campus, as well as through an alternative track offered off-campus through the Center for New Directions in Politics and Public Policy. For details about this off-campus track in politics and public policy, see New Directions, MA in Political Science (p. 494).

The Political Science graduate program offers two transcripted certificates, allowing students to focus their studies within a specific track (Public, Non-Profit, and Community Leadership; Labor Leadership; and Political and Social Economy and Innovation) and an option to have the track courses listed on their transcript. Students do not need to be seeking a full Master's degree to earn a certificate of completion through the Graduate Certificate program. These Graduate Certificates can be obtained in one of three areas: 1) Public, Non-Profit and Community Leadership; and 2) Labor Leadership.

- Public, Non-Profit and Community Leadership (p. 501)
- Labor Leadership (p. 500)

For more information on these graduate certificates, click the links above.

Graduate Education Policies and Procedures apply to this program

Program Requirements

1. Students must complete 33 PSCI credit hours.
2. Students must complete a minimum of 33 graduate (5000-level or higher) PSCI credit hours.
3. Students must earn a minimum grade of B- (2.7) in all masters courses taken at CU Denver and must achieve a minimum cumulative masters GPA of 3.0. All graded attempts in required and elective courses are calculated in the masters GPA. Students cannot complete masters or ancillary course requirements as P+P/F or S/U.
4. Students must complete a minimum of 16 credits with CU Denver Political Science faculty.

Program Restrictions, Allowances and Recommendations

1. Students who are on probation must meet regularly with the graduate advisor and must secure approval from the advisor for all course work while on probation.
2. In addition to the requirements for admission and details of the program spelled out here, graduate students in political science must also abide by department rules and procedures specified in the Graduate Education Policies and Procedures. Failure to meet these policies may result in a student being dropped from the program.
3. The total combination of independent study, graduate course work in related disciplines and internships cannot exceed 9 semester hours.
4. Under the On-Campus MA program in political science, two degree plans are available:
   a. Plan I requires the completion of nine graduate courses (27 semester hours) and a 6-credit thesis
   b. Plan II requires the completion of ten graduate courses (30 semester hours) and a 3-credit project or portfolio.

Complete the following program requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSCI 5000</td>
<td>State of the Discipline</td>
<td>6</td>

<tr>
<td>PSCI 5468</td>
<td>Research Methods in Political Science</td>
<td></td>
</tr>
<tr>
<td>PSCI 5950</td>
<td>Master's Thesis</td>
<td></td>
</tr>
</tbody>
</table>

Complete the following required courses: 6

Complete 7 graduate (5000-level or higher) PSCI courses (21 credit hours). Elective courses must include at least one graduate seminar in each of the following three areas: American Politics, Comparative Politics/International Relations, and Political Theory. 1

Complete a Thesis or Project: 6

Plan I: In addition to completing 27 credit hours of required and elective courses, students complete a six credit hour thesis.

PSCI 5950 Master’s Thesis

Plan II: In addition to completing 27 credit hours of required and elective courses, students complete three additional elective credit hours and a three credit hour project/portfolio.
In addition to taking regularly offered graduate seminars in the program, students may meet their elective requirements by taking independent study, internships, or graduate courses in related disciplines. These courses all require approval from the Graduate program director, or from a sponsoring faculty member in the Department. The total combination of independent study, graduate course work in related disciplines and internships cannot exceed 9 semester hours.

To learn more about the Student Learning Outcomes for this program, please visit our website (https://clas.ucdenver.edu/polisci/graduate/).
Political Science MA / Master of Business Administration (MBA) Dual Degree

Introduction
In the 21st century, the fields of business administration and political science intersect, in that sustainable business development requires an understanding of the political environment, while political theory and practice must address the role of the business community in economic development. Providing students with both the business foundation and political knowledge enhances their ability to succeed in our ever-changing political world.

The CU Denver Master of Arts in Political Science (MA) degree offers an in-depth understanding of the political environment, locally, nationally and globally, emphasizing the development of academic and practical skills in key areas of the discipline, and centering on the major fields of American politics, comparative politics, international relations, political theory and public policy. The CU Denver Master of Business Administration (MBA) degree provides a strong foundation in business knowledge in such areas as organizing teams, developing marketing plans, using data analysis and technology in decision making, economics, financial management and strategic planning. The MBA develops skills required for competent and responsible administration of an enterprise viewed in its entirety, within its social, political and economic environment.

The Dual Master’s Degree in Political Science (MA) and Business Administration (MBA) is designed for students whose interests overlap business and politics or business and international affairs. This program is jointly sponsored by the Department of Political Science of the College of Liberal Arts and Sciences and the Business School. This program enables students to simultaneously earn an MA in Political Science with an MBA.

The dual degree program provides a more comprehensive education to the next generation of professionals in the non-profit sector, corporate arena and governmental organizations. Dual degree students are able to complete both degree programs in less time, and with fewer total credit hours (66 for both), than if both degrees were pursued separately (48+33 = 81). The program keeps the core of each program intact, including some electives from both programs, and enables students to choose two additional electives from either business or political science to best suit their career and personal goals. Furthermore, the interactions between the students enrich the students in both programs, as well as the organizations that employ them.

Admission Requirements
Students must apply separately, meet the admission requirements of, and be accepted by each program. It is possible for students currently admitted to one program to learn about the dual degree and choose to apply after admission to the other program.

GPA Requirements
Students must maintain a cumulative GPA of 3.0 or higher across all courses that are applied to the dual degree. Any political science course in which a student receives a final grade lower than B- cannot be counted toward the total credits for the dual degree. Any business course in which a student receives a final grade lower than C cannot be counted toward the total credits for the dual degree. All graduate courses will be included in the cumulative GPA.

Transfer Credits
No more than nine semester hours of business credits from an AACSB Business School with a grade of B or better and no more than six semester hours of political science credits may be transferred into this dual degree program. The Business School will evaluate transfer hours in business and the Political Science Department will evaluate transfer hours in political science.

Graduation
Students must complete all the requirements for both programs before they apply to graduate, and must apply to graduate in the same term for both programs.

Graduate Education Policies and Procedures apply to this program.

Labor Leadership Graduate Certificate

Introduction

Please click here (p. 484) to see Political Science department information.

The Labor Leadership certificate is meant to develop the next generation of leaders in labor unions and civic organizations focused on labor and related issues of race, class and gender equity. The certificate is particularly relevant to labor union leaders, rank and file members, and community-based organizational staff who desire to receive continuing education regarding labor leadership. The labor leadership certificate will combine academic instruction with field learning and community-based research projects. The program features active partnerships with local labor organizations, such as unions and community-based groups focused on relevant labor, class and race issues (such as immigrant rights groups, workplace gender equity groups, etc.). Certificate students will join a diverse group of graduate students pursuing their full Master's degree in the Department’s community leadership program (including students focused on governmental/public leadership, and students focused on non-profit leadership) which will enhance synergetic learning in the classroom, and enlarge networking opportunities among all students.

The certificate is open to non-degree seeking as well as students formally admitted to the MA in Political Science program. The Certificate can be earned as a stand-alone University certificate, or it can be applied to a current or future degree program. Non-degree seeking students who successfully complete the certificate program would be allowed to transfer in the credits received in the certificate program to complete the Master’s Degree in Political Science.

The certificate can be earned either through our traditional on-campus graduate seminars, or entirely through classes offered in a weekend-intensive format in our New Directions graduate program. Students may take classes in either format desired.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Labor Leadership Graduate Certificate advisor to confirm the best plans of study before finalizing them.

Admissions and Declaring this Certificate

Any current or potential student wishing to declare this certificate should schedule a certificate advising appointment with either the Director of the New Directions graduate program (Dr. Steve DelCastillo) or with the Director of the On-campus Graduate Program (Dr. Michael Berry), in order to register their intent to pursue the Labor Leadership Certificate and to develop a curriculum plan.

Graduate Education Policies and Procedures apply to this program

Program Requirements

1. Students must complete a minimum of 15 credit hours from approved courses.
2. Students must complete a minimum of 15 graduate (5000-level or higher) credit hours from approved courses.
3. Students must earn a minimum grade of B- (2.7) in all courses applied to the certificate and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.
4. Students must complete all coursework with CU Denver faculty.

Public, Nonprofit and Community Leadership Graduate Certificate

Introduction

Please click here (p. 484) to see Political Science department information.

The Public, Non-Profit and Community Leadership Graduate Certificate is offered in two different formats: the traditional, on-campus format, and the New Directions weekend classes format, with classes offered in CU Denver facilities south of Denver (currently at the Liniger Building in Parker). Students can choose classes in either of these two formats to complete the certificate.

The CU Denver Political Science Department’s Public, Non-Profit and Community Leadership Certificate engages students in a focused curriculum in the local public leadership, and in the community organizing and development field, including field placements in internships with local community partners. The certificate is tailored to meet the needs of individuals in public and non-profit positions that require development of their leadership competencies and for individuals in informal community leadership positions who want to build their knowledge, skills, and effectiveness.

The program curriculum is anchored around the study and practice of local civic engagement, especially in traditionally marginalized communities. Students will be connected to meaningful work and networking opportunities in local government or in community settings, through community-based coursework, professional internships and service-learning opportunities. The certificate program provides critical education and effective skills-based training for students seeking careers in local government, in non-profit organizations, or in community organizing and development work. Students will be prepared to become change agents in their communities, while developing possible career paths in community-based advocacy/service organizations, public agencies, or international development work.

The certificate is open to non-degree seeking students (with or without an undergraduate degree) as well as students formally admitted to the MA in Political Science and to upper division undergraduates seeking to get a head start on their graduate studies. The Certificate can be earned as a stand-alone University certificate, or it can be applied to a current or future degree program. Non-degree seeking students who successfully complete the certificate program would be allowed to transfer in the credits received in the certificate program to complete the Master’s Degree in Political Science.

The certificate can be earned either through our traditional on-campus graduate seminars, or entirely through classes offered in a weekend-intensive format in our New Directions graduate program. Students may take classes in either format desired.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Public, Non-Profit and Community Leadership Graduate Certificate advisor to confirm the best plans of study before finalizing them.

Admissions and Declaring This Certificate

Overview

Psychology is the scientific study of behavior, consisting of the following major areas of study: experimental psychology, biopsychology, animal behavior, developmental psychology, social psychology, cognitive psychology, personality, industrial/organizational psychology and abnormal psychology.

Graduate Program

The Psychology department offers a Master of Arts (MA) degree in Psychology with an emphasis in clinical psychology that is earned en route to the doctor of philosophy (PhD) degree in Clinical Health Psychology. Our program trains students within the context of the scientist-practitioner model. That is, we value an integrated approach to both the science and practice of clinical psychology. Our training emphasizes the contribution of research to the understanding, treatment and prevention of human problems, and the application of knowledge that is grounded in scientific evidence.

Admissions

We strongly value diversity and encourage applications from prospective students with a variety of life backgrounds and experiences. The admissions committee looks favorably on courses in the biological and physical sciences, demonstrated interest and/or experience in health psychology research and clinical work, interest in a scientist-practitioner model of training and career, and interpersonal skills and abilities that are suitable for teaching, research, and clinical work in psychology.

Admission to CU Denver’s Clinical Health Psychology PhD Program is competitive with an average of 6 students admitted each year. Students in the program receive the highest quality training and mentoring as well as financial assistance. More information can be found on the CHP website (https://clas.ucdenver.edu/psychology/graduate-studies/phd-program-information/).

Our program has endorsed the Council of University Directors of Clinical Psychology statement on Preferred Pre-doctoral Competencies for Clinical Psychology (CUDCP preferred competencies (https://clas.ucdenver.edu/psychology/sites/default/files/attached-files/cudcp_preferred_predoctoral_competencies.pdf)). The Pre-doctoral Competencies outlined in this document represent many of the qualities that our program prefers applicants to have acquired prior to applying to our program.

Requirements for admission include coursework (or standardized assessment) in Introductory Psychology, Statistics, Research Methods, Abnormal Psychology, and History of Psychology. This must be in the last 10 years, currently being fulfilled (the Fall semester of your application year), or planned to be fulfilled (the Spring semester of your application year). Offers of admission are conditional upon completion of requirements.

These requirements can be met in the following ways:

- Introductory Psychology: B- or greater from an accredited university in Intro Psyc, or a 3 in Psychology AP Exam. If you have taken the class but have a lower score or the class is beyond the 10 year timeline, you could achieve the requirement with at least a 50th percentile in a valid (https://www.ets.org/gre/revised_general/faq/) Psychology GRE Subject Test
- Research Methods: B- or greater from an accredited university in Research Methods (social sciences or psychology specific). If you have taken the class but have a lower score or the class is beyond the 10 year timeline, you could achieve the requirement with at least a 50th percentile in a valid (https://www.ets.org/gre/revised_general/faq/) Clinical subtest of the Psychology GRE Subject Test
- Abnormal Psychology: B- or greater from an accredited university in Normal Psychology (e.g., Abnormal Psychology, Psychopathology). If you have taken the class but have a lower score or the class is beyond the 10 year timeline, you could achieve the requirement with at least a 50th percentile in a valid (https://www.ets.org/gre/revised_general/faq/) Clinical subtest of the Psychology GRE Subject Test
- History of Psychology: B- from an accredited university in History of Psychology (must be named as a separate course; a history component of Intro Psyc is not sufficient). Because some undergraduate institutions do not offer a course in History of Psychology, we will consider plans for students conditionally accepted to the program to take this course in the Summer prior to matriculation or during the program prior to Internship. The program does not pay for this course.
- We also require a BA or BS from an accredited undergraduate institution with a preferred minimum GPA of 3.5. Finally, we require a fully completed application. See Application Information (https://clas.ucdenver.edu/psychology/graduate-studies/application-information/) for details regarding what must be included in this application. We do not require the GRE at this time.

Application Materials

More information can be found at: https://clas.ucdenver.edu/psychology/graduate-studies/application-information

- Complete Graduate admissions application (e.g., contact information, other basic fields).
- Personal Statement: In the application, you will be asked to identify a core Clinical Health Psychology faculty member who would be a good fit with your research interests. If there is more than one such faculty member, you are allowed to choose up to three such faculty members. The written statement should be a total of 3-4 double-spaced pages in length and should address the following (please use the following four headers in your statement):

  1. Fit - describe your fit with our program. Specifically, discuss your (a) relevant clinical, research, and/or educational experiences, (b) why our scientist-practitioner program in Clinical Health Psychology is a good fit for you, and (c) which core faculty member(s) you most want to work with and why...
2. Accomplishment - Tell us about a project or goal you set for yourself that took you a great deal of time and/or effort to accomplish. What challenges and obstacles did you face and how did you overcome these?

3. Future Impact - What impact do you hope to have on the field in the long term (after acquiring a Ph.D.)

4. Diversity - The University of Colorado Denver’s CHP program is committed to promoting diversity and fostering an environment of inclusion within our program. This is part of our mission to equip future researchers and clinicians to be culturally responsive as they engage in the science and practice of psychology. Please comment on your commitment to fostering a culture of inclusion within the program and growth in cultural responsiveness, and how any of your experiences and/or interests might contribute to fostering a culture of inclusion in the program.

• Resume or Curriculum Vita: Include education, employment, publications, theses, research and other activities related to clinical health psychology. Applicants upload their resume or CV directly into the online application.

• Letters of Recommendation: Three letters of recommendation, at least two of which must be academic references, are required. Once applicants submit their applications, their recommenders receive email instructions from CU Denver on how to upload their letters into the online application.

• Transcripts: One official transcript from each college and university attended. Transcripts are mostly sent electronically on the applicants’ request via the online application or are scanned and uploaded into the online application. If these methods don’t work, you may use the following: Standard mail and express delivery (that requires a receiver signature: Graduate Admissions, University of Colorado Denver, Campus Box 167, 1201 Larimer Street, Suite 1005, PO Box 173364, Denver, CO 80204).

• Application Fee: $50 for US citizens; $75 for international students. Until the fee is received, your application will not be officially submitted. There are many ways applicants may be eligible for an Application Fee Waiver. Requests for waivers must be submitted at least 1 week before the final application deadline. For a list of who may be eligible for a waiver please see here (https://graduateschool.ucdenver.edu/about-us/equity-and-diversity/). Contact graduateadmissions@ucdenver.edu if you have questions or are ready to apply your application fee waiver.

• International Students - The additional admissions requirements for international students can be found at CU Denver International Graduate Admissions. (http://www.ucdenver.edu/academics/internationalprograms/oia/admissions/apply/application/graduate/Pages/default.aspx) Conditional admission is not offered.

Programs

• Psychology, Clinical Health Psychology, PhD (p. 510)

Faculty

Professors:

Elizabeth Sandlin Allen, PhD, University of North Carolina at Chapel Hill
Richard Allen, PhD, University of North Carolina at Chapel Hill
James Grigsby, PhD, University of Colorado, Boulder
Mitchell M. Handelsman, PhD, University of Kansas
Peter S. Kaplan, PhD, Indiana University

Kevin S. Masters, PhD, Brigham Young University

Associate Professors:

David Albeck, PhD, University of Colorado, Boulder
Sondra Bland, PhD, University of Texas
Benjamin Greenwood, PhD, University of Colorado, Boulder
Kristin Kilbourn, PhD, University of Miami
Erik Oleson, PhD, Wake Forest University
Krista W. Ranby, PhD, Arizona State University
Jonathan Schaffer, PhD, St. John’s University
Amy Wachholtz, PhD, Bowling Green University
Jason Watson, PhD, Washington University
Michael Zinser, PhD, University of Wisconsin, Madison

Assistant Professors:

Carly Leonard, PhD, Johns Hopkins University
Melissa Simone, Ph.D., Utah State University

Professor, Clinical Teaching Track:

Joan Bihun, PhD, Wayne State University

Associate Professor, Clinical Teaching Track:

Athena Baca-Chieza, PsyD, Chicago School of Professional Psychology
Kevin Everhart, PhD, University of South Carolina
Vivian Shyu, PhD, University of Denver

Senior Instructors:

Bethann Bierer, PhD, University of Denver

Instructors:

Christina Collins, Ph.D., Meridian University
Laurel Hyslop, Ph.D., Syracuse University
Paula Schmidtlein, Ph.D., University of Denver

Emeritus Professors:

Rick M. Gardner, PhD, University of Nevada
Barbara Walker, PhD, The Ohio State University

Psychology (PSYC) Courses

PSYC 5164 - Psychology of Perception (3 Credits)
Studies sensory processes and perceptual variables. Covers processes related to vision, audition, gustation and olfaction. Prereq: PSYC 1000 and 2220 with a C- or higher or Graduate standing. Cross-listed with PSYC 4164. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing

PSYC 5263 - Hormones and Behavior (3 Credits)
The hormonal regulation of behavior will be the primary focus of this course. Topics include: hormonal basis of sexual differentiation and behavioral differences, parental behavior, biological rhythms, aggression, mood and stress. Prereq: PSYC 1000 and 2220 with a C- or higher or Graduate standing. Cross-listed with PSYC 3263. Term offered: spring.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing
Typically Offered: Spring.
PSYC 5264 - Exercise, Brain and Behavior (3 Credits)
This course explores the impact of physical activity status-being sedentary or physically active-on brain function and behavior. Topics include effects of exercise on cognitive function, mood disorders, stress, anxiety, sleep and drug addiction. Emphasis will be placed on understanding the neurobiological mechanisms by which exercise impacts behavior. Students who have received credit for this topic listed under PSYC 3600 may not receive credit for this course. Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing. Term offered: fall. Cross-listed with PSYC 3264. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing
Typically Offered: Fall.

PSYC 5265 - Drugs, Brain and Behavior (3 Credits)
Explores the pharmacological, biological, and behavioral basis of drug effects. Topics include mechanisms of drug action, brain reward pathways, role of environment and history on drug effects, and the impact of science on drug abuse and medication development. Prereq: PSYC 1000 and 2220 with a C- or higher or Graduate standing. Term offered: fall, spring, summer. Cross-listed with PSYC 3265. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing
Typically Offered: Fall, Spring, Summer.

PSYC 5803 - Principles of Psychological Testing (3 Credits)
Principles underlying construction, validation, and use of tests of ability, intelligence, and personality and of attitude surveys. Covers statistical topics such as content and construct validity, item analysis, and reliability analysis. Prereq: Admission to psychology graduate program. Cross-listed with PSYC 4803. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 5822 - Aging, Brain and Behavior (3 Credits)
Examines the aging process, behavioral changes during senescence and the accompanying changes in the aged brain. Changes that are part of healthy aging are studied, as well age-related brain disorders. Prereq: PSYC 1000 and 2220 with a C- or higher or Graduate standing. Cross-listed with PSYC 3822. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing
Typically Offered: Fall.

PSYC 5840 - Independent Study, PSYC (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

PSYC 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

PSYC 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

PSYC 5990 - Topics in Psychology (1-3 Credits)
Advanced study of special topics to be selected by the instructor. Note: May be repeated for credit. Prereq: Permission of instructor. Cross-listed with PSYC 4990. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 6200 - Developmental Psychopathology (3 Credits)
The study and prediction of maladaptive behaviors and processes across time. Students develop a sophisticated understanding of important concepts related to emotional and behavioral problems in children and adolescents, including DSM-IV-TR diagnostic criteria and the basic tenets of successful intervention. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 6840 - Independent Study (1-3 Credits)
A structured experience, planned and implemented with the assistance of a sponsoring faculty member in ongoing programs of research or other scholarly activity. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Admission to the graduate program in psychology. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

PSYC 6841 - Independent Study: PSYC (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
PSYC 6910 - Research Practicum (3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
PSYC 6930 - Clinical Internship (1-6 Credits)
Clinical experience in a setting which provides supervision by qualified professionals. Students participate in assessment, intervention, and/or evaluation and research. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Completion of 24 hours of course work in the UCD Psychology MA, Clinical program. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
PSYC 6950 - Master's Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
PSYC 7144 - Advanced Cognition and Emotion (3 Credits)
Overview of contemporary psychological theories and research in human learning, memory, cognition, and emotion. Emphasis on cognitive and affective neuroscience and the physiological-psychological organization of functional systems. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Spring.
PSYC 7205 - Advanced Developmental Psychology (3 Credits)
A survey of neurobiological, cognitive, social and cultural processes in human development from conception through adulthood. Prereq: Admission to the Psychology MA, Clinical program or Clinical Health Psychology Ph.D. program or with permission of instructor and a graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Admission to the Clinical Health Psychology Ph.D. Program or with Permission of instructor and Graduate program director Typically Offered: Fall.
PSYC 7220 - Advanced Biological Bases of Behavior (3 Credits)
Survey course of advances in psychobiology which inform our understanding of the brain and behavior with special emphasis on perception, action, and cognition. A major goal of the course is to foster appreciation of the importance of interdisciplinary research. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.
PSYC 7262 - Health Psychology I (3 Credits)
Part I of a 2-course sequence. Presents crucial aspects of health psychology and behavioral medicine, including theoretical models, anatomy and physiology, epidemiology, health promotion and primary prevention of medical problems. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.
PSYC 7350 - Psychotherapy I (3 Credits)
Surveys some of the major schools of psychotherapy, including cognitive and cognitive-behavioral therapies as well as motivational interviewing. Coverage also includes therapy techniques, processes of therapy, and treatment-outcome research. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Spring.
PSYC 7360 - Psychotherapy II (3 Credits)
Theoretical approaches and techniques used in research, assessment and treatment of major forms of psychopathology, including anxiety, depression, schizophrenia and substance abuse, as well as marital problems and childhood disorders. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.
PSYC 7400 - Child Assessment (3 Credits)
Psychometric theory and practice in assessment of children with focus on the diagnostics, the WISC-III, and personality assessment. Restriction: Restricted to Graduate majors in PSYC and PSYH. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
PSYC 7410 - Assessment I: Personality (3 Credits)
Reviews the process of selection, evaluation, administration, utilization, and interpretation of psychological tests related to psychosocial functioning. Issues of validity, reliability, utility, clinical judgement, ethics, and cross-cultural competence are reviewed. Prereq: Admission to the Clinical Health Psychology Ph.D. program, Clinical Psychology MA program, or by permission of instructor and graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.
PSYC 7420 - Assessment I: Intellectual and Cognitive Assessment (3 Credits)
Reviews the process of selection, evaluation, administration, utilization, and interpretation of psychological tests related to cognitive functioning. Issues of validity, reliability, utility, clinical judgement, ethics, and cross-cultural competence are reviewed. Prereq: Admission to the Clinical Health Psychology Ph.D. program, Clinical Psychology MA program, or by permission of instructor and graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.
PSYC 7485 - Diversity in Clinical Psychology (3 Credits)
Designed to foster understanding of diversity and its implications for clinical practice, research, and mental health policy. Students will learn to orient to the worldviews of clients from diverse backgrounds and to tailor their interventions to competently serve individuals in a pluralistic society. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Spring.

PSYC 7490 - Topics in Health Psychology Summer Lecture Series (1-3 Credits)
Weekly lectures given by Clinical Health Psychology department faculty, advanced graduate students, alumni and area professionals on selected topics in the field. Note: This course is required for first, second and third-year graduate students. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Summer.

PSYC 7500 - Advanced Psychopathology (3 Credits)
Key features of major mental disorders in adult populations. Includes classification, DSM diagnosis, epidemiology, course and prognosis, age/culture/gender features, etiology and biological bases. Prereq: Admission to Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.

PSYC 7511 - Historical and Philosophical Foundations of Psychology (3 Credits)
Philosophical and historical antecedents to contemporary psychology, with particular emphasis on clinical psychology. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.

PSYC 7520 - Experimental Psychopathology (3 Credits)
Theories of etiology of major psychopathologies, including: personality disorders, anxiety disorders, affective disorders, substance use disorders and schizophrenia and other psychoses. Restriction: Restricted to Graduate majors in PSYC and PSYH. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.

PSYC 7525 - Clinical Research Methods (3 Credits)
Principles of research methodology in clinical psychology. Major topics include research ethics, subject recruitment, ethnic and cultural considerations, selecting and evaluating research measures, epidemiology and comorbidity, taxonomic and outcome research and research design. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Spring.

PSYC 7710 - Multivariate Statistics (3 Credits)
Topics include multiple regression, logistic regression, factor analysis, and structural equation modeling. Both experimental and non-experimental designs will be considered. Students will learn underlying theory of these techniques as well as how to perform analyses using software like SPSS and Mplus. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Spring.

PSYC 7713 - Advanced Statistics (3 Credits)
Experimental design and analysis of controlled interventions and evaluations. Emphasis on multifactor analysis of variance, orthogonal contrasts, post-hoc tests, multiple regression, and analysis of covariance. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.

PSYC 7730 - Ethics and Professional Issues in Psychology (3 Credits)
An in-depth exploration of the values and ethical ideas that guide professional practice in psychology, including philosophical ethical principles and professional codes of conduct. Specific topics include confidentiality, informed consent, competence, and respect for persons. Students are expected to be able to think about and communicate difficult ethical concepts in the form of class participation and a major paper. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall.

PSYC 7740 - Clinical Practicum (1-3 Credits)
Clinical experience under supervision of licensed, doctoral-level professionals. Students participate in assessment, intervention, and/or evaluation and research in a variety of settings. Note: All field placements must be approved by the Director of Clinical Training (DCT) in advance of registration. Students should enroll in 1 credit hour during year one (spring and summer semesters only) and 3 credit hours during years two (fall, spring, and summer semesters) and three (fall semester only). A total of 14 credit hours of PSYC 7910 are required. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall, spring, summer. Repeatable. Max hours: 14 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 14.
Restrictions: Restricted to Graduate majors in PSYC and PSYH. Typically Offered: Fall, Spring, Summer.
PSYC 7911 - Clinical Practicum II (1-6 Credits)
Clinical experience under supervision of licensed, doctoral-level professionals. Students participate in assessment, intervention, and/or evaluation and research in a variety of settings. Note: All field placements must be approved by the Director of Clinical Training (DCT) in advance of registration. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall, Spring, Summer.

PSYC 8100 - Clinical Behavioral Medicine (3 Credits)
 Presents basic assessment and psychotherapeutic techniques used for patients with various disorders, focusing on cognitive-behavioral methods and the unique needs of patients experiencing chronic disease. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.

PSYH 8200 - Teaching Skills Workshop (3 Credits)
Students will learn, explore, and practice the basic principles and strategies of good teaching. We will also explore research and theory for teaching at the college level. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.

PSYC 8262 - Health Psychology II (3 Credits)
Part II of a 2-course sequence. Further aspects of health psychology and behavioral medicine, including health service utilization, patient-provider relationships, social support, terminal illness and issues related to chronic disease states. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 8501 - Primary Care Psychology (3 Credits)
Examines emerging trends in the role of professional psychology and psychologists serving as health care providers in primary care medical settings. Knowledge, skills and attitudes as they apply to competencies unique to primary care will be covered. Prereq: PSYC 7262 and PSYC 8262 and PSYC 7730 with a B- or higher. Restriction: Restricted to PSYH-PHD majors within the College of Liberal Arts and Sciences. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PSYC 7262 and PSYC 8262 and PSYC 7730 with a B- or higher Restriction: Restricted to PSYH-PHD majors within the College of Liberal Arts and Sciences

PSYC 8502 - Cardiovascular Health Psychology (3 Credits)
The course focuses on research and clinical practice regarding psychological factors related to cardiovascular functioning and disease. The physiology of the cardiovascular system will be presented and primary and secondary prevention as related to psychological functioning will be emphasized. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 8503 - Group Interventions in Health Psychology (3 Credits)
The course will serve as an introduction to group psychotherapy and group process principles with a focus on the design, implementation and delivery of evidence-based group interventions in the field of Clinical Health Psychology. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 8504 - Advanced Psychopharmacology (3 Credits)
In this course, we explore topics in psychopharmacology that builds upon psychopathology knowledge by identifying neurological and physiological pathways that affect cognition and psychological health and how these pathways are affected by pharmacology. The focus is on examining and critically analyzing conceptual, theoretical, and practical aspects of psychopharmacology and psychophysiology as well as how to apply these concepts to medically ill patients in psychotherapy. Restriction: Admission to the Clinical Health Psychology PhD program or with permission of instructor and graduate program director. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 8505 - Existential and Spiritual Issues in Clinical Health Psychology (3 Credits)
Examination of existential and spiritual issues in clinical health psychology and behavioral medicine including philosophical and psychological foundations, applications in clinical health psychology practice, review of empirical research, and examination of contemporary topics. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSYC 8550 - Advanced Social Psychology (3 Credits)
This is a graduate level seminar that broadly covers the social bases of behavior from a social psychological perspective. It includes discussion of topics such as group processes, attribution theory, discrimination, and perspectives on attitudes. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.

PSYC 8910 - Advanced Clinical Practicum (1-4 Credits)
Advanced clinical experience under supervision of licensed, doctoral-level professionals. Students participate in assessment, intervention, and/or evaluation and research in a variety of health care settings to address the interface between physical and psychological functioning. Note: All field placements must be approved by the Director of Clinical Training (DCT) in advance of registration. Students should enroll in 3 credit hours during years three (spring and summer semesters only) and four (fall and spring semesters only). A total of 12 credit hours of PSYC 8910 are required. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall, Spring, Summer.
PSYC 8938 - Pre-Doctoral Internship (1-3 Credits)
Intensive full-time clinical experience with supervision by licensed, doctoral-level professionals. Interns participate in assessment, intervention, and/or evaluation and research in a variety of settings. Students apply through the Association of Psychology Postdoctoral and Internship Centers (APPIC) national matching process. Note: All field placements must be approved by the Director of Clinical Training (DCT) in advance of registration. Restriction: Restricted to Graduate majors in PSYC and PSYH. Department consent required. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
 Typically Offered: Fall, Spring, Summer.

PSYC 8990 - Doctoral Dissertation (1-10 Credits)
Independent research on the doctoral dissertation in Clinical Health Psychology. Prereq: Admission to the Clinical Health Psychology Ph.D. Program. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
Psychology, Clinical Health Psychology, PhD

For more information about the Psychology department, please click here. (p. 503)

Objectives of the Program

Clinical health psychology focuses on the interaction between psychological, physiological, and environmental factors as they influence health and well-being. This emphasis includes focus on:

1. the development of effective disease prevention behavioral interventions for individuals and populations at high risk for medical problems; and
2. the development of strategies to help individuals who are already ill to manage their disease and to increase their ability to collaborate with medical professionals and improve their coping skills.

A clinical health psychologist combines expertise in research on health psychology with training in clinical psychology. Students in this program are trained to work within the community to use clinical psychological skills and techniques to diagnose and treat mental health conditions, promote health and prevent illness, apply behavioral interventions in the treatment of illness, and improve the health care system. In addition to course work, students acquire expertise in research by completing both a master’s thesis and doctoral dissertation. They demonstrate competence in clinical assessment and intervention through several applied practicum experiences, successful passage of the Comprehensive Clinical Competency Examination and successfully completing a pre-doctoral psychology internship. Students can complete the program in five years and have up to eight years to complete the program according to Graduate School Policies and Procedures.

Financial Information

The University of Colorado Denver administers various forms of financial aid for graduate students: fellowships, scholarships and a number of awards from outside agencies. See the Office of Financial Aid for further information. Additionally, the psychology department offers teaching assistantships each year in such courses as introductory psychology, statistics, research methods and human development. Although we do not guarantee TA positions, we have been able to offer positions to our interested students.

Contingent upon the availability of grant money, faculty may also offer part-time research assistantships to qualified students. The typical RA position involves data collection and analysis, library research, etc. Some computer and statistical skills are usually required. RA positions are less available than TA positions, and they may arise on very short notice.

In-state tuition waivers and additional stipend monies may be available for doctoral students. We do guarantee to pay a full stipend, usually in the form of an assistantship, plus tuition for the first year. We will make every effort to do so for four years.

Note: Neither teaching nor research assistantships confer in-state tuition status.

These degree requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases.

Therefore, the College strongly urges students to consult regularly with their advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 96 PSYC credit hours.
2. Students must complete all credits at the graduate 6000-level and above.
3. Students must earn a minimum grade of B (3.0) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.
4. Students must complete all credit hours with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Courses are three units unless otherwise noted. 96 units are taken: 57 course work, 26 clinical practicum, four thesis, six dissertation and three internship (one unit in each of the three semesters of internship year).
2. Some courses are offered in alternating years or every other year so when they are taken depends on if a student entered the program in an even or odd numbered year.
3. Two electives are taken; the program offers Group Interventions in Health Psychology, Cardiovascular Health and Psychopharmacology. Outside elective(s) can be taken with the approval of the Program Director.
4. The program can be completed in five years but six years is the mean, median and mode for completion of programs of this sort. The university allows up to eight years to complete the program, according to Graduate Education Policies and Procedures.
5. Students must successfully complete their doctoral dissertation proposal prior to applying for their internship in the fifth year and are strongly encouraged to defend their dissertation prior to beginning their internship.

Complete all of the following required courses: 51
Clinical Practica

A minimum of 500 face-to-face intervention and assessment hours and 1200 total practicum hours (face-to-face intervention and assessment hours, plus supervision, plus support hours as defined by the Association of Psychology Postdoctoral and Internship Centers (APPIC)) are expected in preparation for application to pre-doctoral internships. Approximately 50% of required practica are typically conducted in medical settings. Sites for practica training, include the department’s own Psychology

Demonstration of Clinical Competency

During the first semester of their third year in the program students must demonstrate their clinical competency by completing the Comprehensive Clinical Competency Examination (CCCE). The CCCE is designed to facilitate student demonstration of clinical competence at the developmental level of readiness for application to clinical internship. This evaluation is designed to assess the developmentally appropriate broad and general clinical competencies in clinical psychology, and does not necessarily evaluate clinical health psychology competencies per se.

The CCCE comprises three sequential components conducted in phases:

1. Applied clinical diagnosis and assessment planning for a standardized patient.
2. Case conceptualization and treatment planning for a standardized patient.
3. Intervention therapy session with a standardized patient and oral defense with a faculty committee.

Dissertation

Students must complete a dissertation that involves original empirical work and is distinct from other research projects and publications. The dissertation proposal must be completed and defended prior to making application for the pre-doctoral internship. Students must have a dissertation committee composed of four members of the graduate faculty. When the dissertation is completed to the satisfaction of the primary advisor, the student must orally defend the dissertation to the committee.

Dissertation (p. 511)

Complete Internship

Clinical Internship (p. 512)

Total Hours

96

1. History can now be fulfilled by an undergraduate course taken previously, an undergraduate course taken while in the program, or the graduate course. Students must complete their history of psychology requirement before they can apply for their doctoral internship because it is an APA requirement.

2. Teaching Skills Seminar is optional for the program but required to be a lecturer.

Master's Thesis

The program has a provision for achieving a master’s degree en route to obtaining the PhD. In addition to taking PSYC 8200 Teaching Skills Workshop, a master’s degree is required for students to independently teach a course. During their time in the program, students' funding will likely require them to independently teach a course. Students must complete a master’s thesis, an empirical research project that makes a significant contribution to the field. Although the thesis must address the student’s own original question, the use of archival data and pilot studies is encouraged for this project.

Overview

The Master of Social Science (MSS) program is designed to meet the needs of students who prefer flexibility in constructing an individualized course of study in social science. Emphasis is placed on the integration of knowledge across and beyond traditional disciplinary boundaries. This is accomplished through three required seminars, electives from a variety of disciplines chosen with the approval of advisors and program directors, and a project or thesis. Courses can be chosen from the social science disciplines: anthropology, communication, economics, geography, history, law, political science, psychology and sociology, as well as from select other disciplines and programs. The MSS program is intended for students interested in developing their own interdisciplinary perspectives in such areas as social thought, public policy, women’s studies, educational reform, social justice and cross-cultural studies or politics. The program can provide: training for advancement in the professions of education, business, social service and government; a basis for further graduate studies in a specific social science discipline or professional field; a means for teachers and other working students to tailor degree programs to fit their personal career development needs; and a nontraditional approach for recent university graduates or adults re-entering the university to pursue liberal educational goals in the social sciences.

Requirements for Admission

General rules for graduate admission, as well as the following apply:

- evidence of a bachelor’s degree
- an official copy of transcripts from all community colleges, colleges, and universities attended
- overall GPA of at least 3.2 out of 4.0
- a 15-20 page writing sample
- three letters of recommendation (at least two from academic sources)
- appropriate undergraduate training or professional background, or experience that provide evidence of ability to pursue the MSS degree
- a typed statement specifying the goal of advanced study in the social sciences expressed in clear, correct and effective English. Applicants should provide a statement of their background (education and experience) and its relevance to their proposed interdisciplinary graduate work, and why this graduate program is relevant to their interests.
- standardized test scores are not required, but will be considered if submitted

After meeting all other requirements for admission, applicants may be required to have an interview to discuss their interest in the program and their plans for study.

Provisional Admission

Applicants may be admitted as provisional-status graduate students if their GPA is low and their complete record indicates a high probability of success.

Non-Degree Students

Potential applicants may take CU Denver graduate-level courses as non-degree students (unclassified student with a bachelor’s degree) if they:

1. wish to strengthen their record in order to demonstrate their potential to successfully complete courses in the program
   -or-
2. wish to start coursework in the program prior to completing their application, with the understanding that taking courses does not guarantee admission.

Up to 12 semester hours of CU Denver graduate-level work taken as a non-degree student or taken from another university may be accepted by the program once a student has been admitted to the program. For further information on non-degree graduate student status, see the Information for Graduate Students (p. 37) section of this catalog. In the case of CU Denver graduate students transferring to the MSS program, previous coursework may be accepted as appropriate to the MSS plan of study.

International Students

International students must also meet CU Denver requirements for international admission. See the Information for International Students (p. 43) section of this catalog or call 303-315-2230 for further information.

Social Sciences (SSCI) Courses

SSCI 5000 - 19th and 20th Century Continental Philosophy (3 Credits)
A seminar on key problems and thinkers in the nineteenth & twentieth century continental philosophical traditions and their contemporary significance. Restriction: Restricted to Graduate and Graduate Non-Degree majors. PHIL 3002 or PHIL 3022 are strongly recommended preparation for optimal student success. Cross-listed with PHIL 4000/5000 and HUMN 5000. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
SSCI 5013 - Methods and Practices of Graduate Interdisciplinary Humanities (3 Credits)
The second of three required Master of Humanities core courses, this course introduces beginning graduate students to methodologies and intellectual frameworks for gathering, organizing, and developing interdisciplinary research. Focus is on the application of theories and methods of research, interpretation and analysis in humanistic research through readings that explore philosophical and cultural discourses that have altered theory and method. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN/PHIL 5013. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

SSCI 5020 - Foundations and Theories of Interdisciplinary Social Science (3 Credits)
The first of the Master of Social Science core courses, this course exposes beginning graduate student to critical, key analytic models, and their application in disciplines that comprise the social sciences (classical anthropology, sociology, sociology of religion, philosophy of history, political theory, classical psychology, etc.) for the purpose of graduate-level interdisciplinary social science research. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HUMN 5020 and PHIL 5020. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

SSCI 5023 - Research Perspectives in Social Science (3 Credits)
Introduces interdisciplinary social research through a critical examination of various methodological approaches. Each student formulates a research proposal which includes a research question, a review of the literature, and methods of study. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Term offered: spring, fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SSCI 5025 - Foundations and Theories of Interdisciplinary Humanities (3 Credits)
Exposes the beginning graduate student to exemplary works and methodologies of disciplines oriented to humanities and social sciences, such as philosophy, sociology, history, communication, fine arts, and literature. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5025. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

SSCI 5050 - Topics in Social Science (1-3 Credits)
These topic seminars are concerned with specialized aspects of the social sciences from various theoretical and research perspectives. These courses are interdisciplinary and serve as a forum for discussion of individual projects and theses. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Term offered: fall. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SSCI 5101 - Pragmatism: Classical American Philosophy (3 Credits)
The most significant philosophical tradition born in the United States is pragmatism. Examines several of the most important classical works of this tradition, the influence of thinkers who have helped pragmatism, and the contemporary relevance of this tradition. Figures who may be included in this course are: Emerson, Pierce, Royce, James, Dewey, Mead, Rorty. Restriction: Restricted to Graduate and Graduate Non-Degree majors. An introductory course in philosophy is strongly recommended for optimal success. Cross-listed with PHIL 4101, 5101, HUMN 5101. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SSCI 5242 - Medicine, Health Care, and Justice: Bioethics (3 Credits)
Anyone entering a medical profession must confront tough ethical issues and dilemmas. These often arise suddenly, so practitioners best preparation is to think ahead about what will likely occur. This course introduces students to a variety cases and philosophical theories useful to healthcare careers. For example, What is “health” and who determines it? Is there a right to health care? How should medical scarcity (vital organs, vaccines, supplies, etc.) be addressed? What duties are owed to patients by healthcare providers, and why? On what grounds may medical treatment be demanded — or refused? The goal of the class is to train students to be nimble and imaginative in how they reason about the difficult cases they will face in their career. Suggested prerequisite one or two previous courses in philosophy, and a minimum grade of C in each course are strongly recommended; if the student lacks this coursework, consult with the professor prior to registration. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4242, PHIL 5242, HUMN 5242. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SSCI 5251 - Introduction to Legal Studies (3 Credits)
A survey of the United States legal system, including lawmaking powers, jurisdiction, court procedures, professional ethics and major principles of business law, contracts, estates and probate, family law, property and torts. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 4251/HUMN 4251/HUMN 5251. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
SSCI 5325 - First Amendment: Theory and Context (3 Credits)
First Amendment jurisprudence including free speech/responsibility, sedition/seditious libel/dissent, prior restraints, time/place/manner restrictions, hate/intimidating speech, defamation, privacy/security tensions, intellectual property/public good, advertising, corporate speech, sexual expression, and public status of religion. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 4325, HUMN 5325, SSCI 4325, PSCI 4325 and PSCI 5325. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

SSCI 5430 - How to think green: Environmental Ethics (3 Credits)
Is it wrong to extinguish a species? What makes cruelty to animals wrong? Do trees have rights? Is the earth a resource we can use any way we want? Is vegetarianism a more ethical way to live — or just another lifestyle choice? As citizens of the world, we are bombarded by such questions. Understanding what is fundamental clarifies thinking and coordinates action. This course introduces ethical theories relevant to problems such as animal and species welfare, deforestation, pollution, climate change, and the sustainability of the planet. By examining multiple perspectives, students gain confidence judging which issues and data are significant and deciding what kind of world we should create with our actions and inactions. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 3430, PHIL 5430 and HUMN 5430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5540 - Law, Diversity and Community in United States History (3 Credits)
Engaging extensive primary and secondary source material, course applies an interdisciplinary approach to diversity and conflict that often surrounds the quest for economic, moral and social inclusion in the United States. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5540. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SSCI 5550 - Social Construction of the Self (3 Credits)
Investigates theories that address the construction of self and how that construction is constrained by culture, politics, society and historical moment. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5560 - Reflections on Modernity (3 Credits)
Explores modernity as a historical epoch and a theoretical space, looking at the commentaries and reflections of influential 20th century thinkers including Adorno, Arendt, Levinas, Merleau-Ponty, Habermas and Foucault. Examines how the theoretical inclinations of modernity were influenced by politics, art, literature and culture. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5650 and PHIL 5650. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Summer.

SSCI 5600 - Questioning Religious Belief and Practice: Introduction to Philosophy of Religion (3 Credits)
Does God exist? Can the existence of God be proved? When is believing on faith acceptable? How or why is there a “problem of evil”? What are the attributes of a “god” and how can they be known, if at all? What is the relation of God to the world we experience? How does morality relate to religious belief and practice? The goal of the course is to broaden and deepen our understanding of key philosophical debates within religious traditions as we study prominent thinkers in the history of philosophy. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5600, PHIL 4600, PHIL 5600, RLST 4060, and RLST 5060. Term offered: summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5650 - First Amendment: Theory and Context (3 Credits)
First Amendment jurisprudence including free speech/responsibility, sedition/seditious libel/dissent, prior restraints, time/place/manner restrictions, hate/intimidating speech, defamation, privacy/security tensions, intellectual property/public good, advertising, corporate speech, sexual expression, and public status of religion. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 4325, HUMN 5325, SSCI 4325, PSCI 4325 and PSCI 5325. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

SSCI 5720 - Sexuality, Gender and Their Visual Representation (3 Credits)
Studies sexuality, gender and identity representation from classical antiquity through the present in the visual arts. Uses the literature of visuality, feminism, race and queer theory. Explores representations of femininity, masculinity and androgyny and their reinforcement and challenge to gender-identity norms. Cross-listed with HUMN 5720 and WGST 5720. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5770 - Selling Empires: The Art of Visual Propaganda (3 Credits)
Western empires disseminate political, social, economic & cultural practices through complex interplay of cultural practices. Visual production is a complex site for meaning making within imperialism. Examines how visual discourses operated to create meaning for audiences, through focus on postcolonial critique. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5770, SJUS 5770, WGST 5770, HUMN 4770, SJUS 4770, SSCI 4770, and WGST 4770. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.
SSCI 5833 - Existentialism (3 Credits)
Examines one of the most influential movements in recent European thought, beginning with existentialism’s 19th century roots, and continuing on to the existentialist philosophers of the 20th century. Figures covered may include Dostoyevsky, Kierkegaard, Nietzsche, Heidegger; Sartre and de Beauvoir. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 3833, PHIL 5833, and HUMAN 5833. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

SSCI 5840 - Independent Study: SSCI (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring.

SSCI 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

SSCI 5920 - Philosophy of Media and Technology (3 Credits)
A philosophical examination of interrelationships between contemporary media, technology, and their impacts upon character of contemporary life and values. Topics may include ethics, epistemology, democracy, advertising, media literacy and criticism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4920, 5920, HUMAN 5920. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5933 - Philosophy of Eros (3 Credits)
What does it mean to understand philosophy as an erotic activity? This question will be examined, first by studying Plato’s dialogues—such as Lysis, Symposium and Republic—and then by reading texts from Sigmund Freud, Michael Foucault and others. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4933, WGST 4933/5933 and HUMAN 5933. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

SSCI 6010 - Methods and Theories of Feminism and Gender Studies (3 Credits)
Provides graduate-level interdisciplinary study in historiography, methodologies and theories of women’s, gender and sexuality studies and considers how culture is constructed around these categories. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with WGST 6010 and HUMAN 6010. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 6950 - Master’s Thesis (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

SSCI 6960 - Master’s Project or Report (1-6 Credits)
Research which may be based on field work. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 9.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
Social Science, MSS

Overview

Please click here (p. 513) to see more information about the program.

For flexibility in constructing an individualized course of study in the social sciences, the Master of Social Science emphasizes integration of knowledge across and beyond traditional disciplinary boundaries. Courses derive primarily from the social science disciplines, like anthropology, economics, geography, history, political science, psychology, and sociology, but may be integrated with other disciplines and programs including English, philosophy, education, health sciences, public affairs, fine arts, and architecture. Students who choose the Master of Social Science program often develop interdisciplinary perspectives in areas like public policy, gender and identity studies, educational reform, cross-cultural studies, or politics.

The Social Science program provides background for advancement in business, education, social service, and government, or as a basis for further graduate or professional study. MSS students often tailor their degree program for specific career and personal needs. Many simply seek intellectual enrichment.

Students may also focus in one of several areas of concentration or formal tracks. By focusing one's studies in a track, the student is able to develop a concentrated and interdisciplinary master level expertise in a given area of interest:

- Community Health Science
- Ethnic Studies
- International Studies
- Social Justice
- Society and the Environment
- Women's and Gender Studies

These requirements are subject to periodic revision by the academic department, and the College reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their advisor to confirm the best plans of study before finalizing them.

Program Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 36 approved credit hours.
2. Students must complete a minimum of 30 graduate (6000-level and above) approved credit hours.
3. Students must earn a minimum grade of B- (2.7) in all courses applied to the degree and must achieve a minimum cumulative program GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Courses taken using P+/P/F or S/U grading cannot apply to degree requirements.
4. Students must complete all coursework with CU Denver faculty. Students may concurrently pursue graduate-level coursework at other CU system campuses with the approval of their MHMSS graduate advisor.

Program Restrictions, Allowances and Recommendations

1. Courses credited toward the MSS degree must typically be taken at CU Denver (a maximum of 12 graduate semester hours may be transferred from other institutions after matriculating into the MSS program, subject to the MSS director's approval).
2. Each student's program is supervised by MHMSS faculty. All independent study, project, and thesis contracts must be approved in advance by the program director. A total of two independent study courses and one internship may count toward the degree.
3. A maximum of two 4000-level undergraduate courses may apply, with faculty approval.
4. Students wishing to count credits accrued from a study abroad program while pursuing the MSS must follow graduate education policies and procedures and must have approval of the program director in advance of studying abroad.
5. An oral exam defending the project or thesis before a committee of three faculty members must be passed in order to graduate.
6. A grade below B- in any given course will not be counted toward the degree.
7. Students may take up to three graduate-level online courses (up to 9 credits) towards the degree, with prior approval.
8. All students must complete and pass a final project or thesis and an oral comprehensive defense of that work, in order to graduate.

Complete the following Core Seminar courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSCI/HUMN/PHIL 5013</td>
<td>Methods and Practices of Graduate Social Science (Must be taken during the first year, offered in the fall only.)</td>
<td>9</td>
</tr>
<tr>
<td>SSCI/HUMN 5020</td>
<td>Foundations and Theories of Interdisciplinary Social Science (Must be taken during the first year, offered in the fall only.)</td>
<td>3</td>

<td>3</td>
</tr>
<tr>
<td>SSCI 5023</td>
<td>Research Perspectives in Social Science</td>
<td>1</td>
</tr>
</tbody>
</table>

Complete a minimum of 21 credit hours of elective courses. Students may choose to create their own curriculum from at least two disciplines addressing their specific research interest.

Students may choose to follow an approved specialized track. Prior to taking electives, students must meet with a MHMSS program faculty advisor and establish their course of study. If students decide to change their course of study or want to substitute approved coursework, they must meet with a MHMSS program advisor in advance and gain pre-approval.

Complete a Thesis or Project and an oral comprehensive defense of that work, in order to graduate.

Students completing a project rather than a thesis take 24 credit hours of electives, while thesis students complete 21 hours of electives.
In order to proceed with a project or thesis, all students must submit a proposal and gain approval from three faculty members and the program directors. Students who opt to complete a thesis will submit a thesis proposal after completing 30 credit hours of course work. In the case of a project, students will submit a project proposal after 33 credit hours.

SSCI 6950 Master's Thesis
SSCI 6960 Master's Project or Report

Total Hours 36

1 Students should take this course after they have completed 21-24 credit hours and are ready to write a proposal for their thesis or project. This course is always offered in the spring and occasionally in the fall, as needed.

General MSS Track

Students pursuing the general MSS degree track create a course of study based on their individual interests and goals. In consultation with a faculty advisor, students choose two or three academic disciplines as areas of concentration.

Community Health Track

The Community Health track focuses coursework on social and communication theory, demographics and ethnic dimensions to public health, basic research methods, and statistics, in order to facilitate development of problem solving and critical thinking skills in the areas of epidemiology, public health and public health education, and health planning

Complete a project or thesis on an approved ethnic studies related topic.

Total Hours 15

Social Justice Track

The Social Justice track expands students’ recognition of the many ways that they are already engaged as citizens and highlights their power to effect change through theoretical and moral education, critical thinking, and community engagement.

It is highly recommended that students in this track take at least one quantitative and/or one qualitative research methods course as part of their plan of study. There are quantitative and qualitative methods courses offered in Anthropology, Environmental Science, Political Science, Sociology, and Research, Evaluation, and Statistical Methodology (RESM), which can be approved by the student’s MHMSS faculty.

Complete a minimum of 12 credit hours of approved social justice related elective coursework from the list below, substitutions may be approved by the student’s advisor:

Overview
The MA Program in Sociology at CU Denver provides a coherent, progressive, educational experience that prepares students for either immediate entry to a master's level career or continued study in a PhD program. The program requires completion of 33 total credit hours, 27 of which are obtained through coursework and 6 that comprise the student's culminating work (thesis, paper, internship & project, or additional coursework). The MA Program emphasizes training in research methods and offers concentrations in Crime, Law and Deviance; Health and Society; and Family, Social Services and Community.

Admission Requirements
Application to the MA program is open to all students holding a BA, BS or higher degree in any field. Students without prior training in sociology, but with otherwise exemplary records, may be admitted but may be required to make up undergraduate deficiencies without graduate credit in the areas of theory, methods and statistics.

Recommended Academic Standards
- A combined GPA of at least 3.3 for all courses taken at the undergraduate or graduate level prior to admission
- A combined GPA of at least 3.5 for all sociology courses taken at the undergraduate or graduate level prior to admission

Application Materials
- Complete application form
- Three letters of recommendation (at least two must be from academic/professional sources)
- One copy of official transcripts sent directly to the Department of Sociology from all schools where BA credit hours were taken
- A statement of purpose and goals of graduate study
- Writing sample
- GRE score may be optionally submitted to aid application file
- International Students: You must complete an International Student Application. Minimum TOEFL score of 525 required.
- Out-of-state students from 13 Western states qualify for in-state tuition as part of the WRGP Program.

Application Deadlines
Applications are accepted for fall admission only. All application materials are due on February 15th.

Faculty
Professors:
Jennifer A. Reich, PhD, University of California, Davis

Associate Professors:
Keith Guzik, PhD, University of Illinois at Urbana-Champaign
Esther Sullivan, PhD, University of Texas at Austin

Assistant Professors:
Brenden Beck, PhD, City University of New York - Graduate Center
Edelina Burciaga, PhD, University of California-Irvine
Adam M. Lippert, PhD, The Pennsylvania State University

Associate Professors Clinical Teaching Track:
Maren T. Scull, PhD, Indiana University

Assistant Professors Clinical Teaching Track:
Jenny Vermilya, PhD, University of Colorado Boulder

Senior Instructors:
Kari Alexander, PhD, University of Colorado Boulder

Instructors:
Carlos Reali, MA, University of Colorado Denver

Sociology (SOCY) Courses
SOCY 5000 - Professional Seminar: Sociological Inquiry (3 Credits)
Introduces sociology graduate students to sociology as a discipline and profession. Conveys practical skills and knowledge useful to the pursuit of a graduate degree. Introduces students to sociology graduate faculty members and their research interests. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

Typically Offered: Fall.

SOCY 5016 - Social Theory (3 Credits)
An overview of major theories across the social behavioral sciences examining social order, integration, conflict, and change. The course emphasizes a cross disciplinary approach, highlighting works of historical and contemporary relevance. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

Typically Offered: Fall.
SOCY 5020 - Race, Culture and Immigration (3 Credits)
In this course, we will consider the social and legal construction of race and immigration. We will also explore how immigrants have been racialized both historically and in the current moment. In addition, we will consider the role of culture in shaping the immigrant experience and immigrant outcomes. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA). Cross-listed with SOCY 4020, ETST 4020 and ETST 5020. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5022 - Federal Data for Health Research & Policy (1-3 Credits)
Students will develop the knowledge and skills required to effectively use a variety of federal and statistical data sets for health research and policy analysis. Each week is devoted to one or two federal statistical datasets—data collection methods; why they are collected and what health issues they are designed to address; what population they represent and at what geographic scale. Most critically, students will be able to distinguish between questions that can be addressed with a public version of the data and questions that require restricted versions of the data that are protected by federal law and guidelines. Students will read, discuss and present research from various perspectives (Demography, Economics, Geography, Public Health, Sociology) using these data sources and apply their knowledge of data analysis from a variety of perspectives. Students will learn how to gain access to restricted data, how to protect individual anonymity with best practice disclosure avoidance techniques and will develop a research proposal for confidential research access.
Note: Familiarity with SAS (preferable) or other statistical software such as SPSS or Stata and statistics or data analysis is recommended.
Restriction: Restricted to degree-granting graduate programs. Cross-listed with ECON 6022, HBSC 6022, and GEOG 5022. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

SOCY 5024 - Seminar: Research Methods I (3 Credits)
Problems and procedures in research design, data collection and processing. Note: Required for M.A. graduate students in sociology. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SOCY 5050 - Health Disparities (3 Credits)
This course focuses on social, economic, and political factors that shape the uneven distribution of health and illness in the United States. Social determinants of health are explored, including socioeconomic status, race and ethnicity, neighborhood environments, social relationships, and gender. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA). Cross-listed with SOCY 4050. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA)

SOCY 5100 - Sociology of Health Care (3 Credits)
Examines U.S. health care institutions and issues such as rising costs, the effects of class, racial and gender inequality, professionalization and monopolization of roles, construction of illness and health, managed care, for-profit health care, and ethics of health care decisions. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA). Cross-listed with SOCY 4110. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA)
Typically Offered: Fall.

SOCY 5183 - Seminar: Quantitative Data Analysis (3 Credits)
A research-oriented seminar stressing the utilization of social data already collected in the test or generation of sociological theory. Note: Required for M.A. graduate students in sociology. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SOCY 5193 - Seminar: Qualitative Data Analysis (3 Credits)
Develops skills for designing studies, collecting and analyzing data, and evaluating qualitative research. Concentrates on ethnography, in-depth interviewing, and content analysis. Students read examples of qualitative research and about the process of qualitative research, as well as conducting independent research. Note: Required for M.A. graduate students in sociology. Prereq: graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SOCY 5220 - Population Change and Analysis (3 Credits)
Concepts of population change, methods of analysis, and applications to contemporary social issues. Topics include age and sex distributions, fertility, mortality, and migration, and the social causes and consequences of these phenomena. Cross-listed with SOCY 4220. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA)
Typically Offered: Spring.
SOCY 5270 - Socl Meanings of Reproduction (3 Credits)
Reproduction involves more than biological processes, assuming symbolic, political, and ideological meanings. This course examines contested meanings of reproduction, including how people experience reproduction, controversies over who should reproduce (and under what circumstances), and how public policy mediates these conflicts. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Cross-listed with SOCY 4270, WGST 4270 and WGST 5270. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5290 - Aging, Society and Social Policy (3 Credits)
A sociological examination of central issues (e.g., work, retirement, family support, health) pertaining to the aging population. Heterogeneity in aging, as shaped by gender, race, ethnicity and social class is addressed, as well as policies pertaining to the adult population. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SOCY 4290. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5440 - Poverty and Social Inequality (3 Credits)
Investigates the distribution of wealth, income, and economic power in the United States with a focus on social institutions and factors that shape inequality. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA). Cross-listed with SOCY 4440. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5460 - Hate Groups and Group Violence (3 Credits)
Social sciences help us understand the phenomena of hate groups and group violence and contribute toward their elimination. Examples are examined using theoretical perspectives on different levels of analysis and within different areas of research. Cross-listed with SOCY 4460.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Fall.

SOCY 5475 - Self and Identity (3 Credits)
A course in social psychology focusing on individuals in social interaction. Focuses of self-conception, identity, presentation of self, and self and emotion management. Examines major theories and research in social psychology. Prereq: Graduate standing. Cross-listed with SOCY 4475. Term offered: summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

SOCY 5540 - Sociology of Religion (3 Credits)
This course introduces students to the nature and functions of religion in society, emphasizing western religions in the U.S. Students will develop and apply an understanding of classic and modern sociological theories of religion to current events and disciplinary developments. Cross-listed with SOCY 4610, RLST 4020, RLST 5020. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SOCY 4590. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5550 - Seminar: Sociology of the Family (3 Credits)
An intensive review and analysis of the family as a social institution. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5590 - Crime, Justice, and the City (3 Credits)
In this course, we will ask why inequality, crime, and police are unevenly spread across cities. We will examine why crime varies by neighborhood, whether place-based policing is racially biased, and why prisons are filled with people from just a few zip codes. We will study racial and economic segregation, gentrification, white flight, and suburbanization in the context of criminal justice. Spatial analysis is a growing field combining geography, sociology, and criminology. We will study it by reading cutting-edge researchers who use mapping, interviews, statistical analysis, and ethnography. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SOCY 4590. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5610 - Sociology of Religion (3 Credits)
This course introduces students to the nature and functions of religion in society, emphasizing western religions in the U.S. Students will develop and apply an understanding of classic and modern sociological theories of religion to current events and disciplinary developments. Cross-listed with SOCY 4610, RLST 4020, RLST 5020. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SOCY 4590. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5640 - Sociology of Childhood and Adolescence (3 Credits)
An in-depth overview of the theories and research regarding the life course understanding of infancy, childhood and adolescence. Children’s lives and cultures in relation to adults and their transition from childhood to adolescence are studied. Cross-listed with SOCY 4640. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA)
Typically Offered: Fall.

SOCY 5650 - Sociology of Adulthood and Aging (3 Credits)
Examination of the adult life course—post-adolescence to death, focusing on key social transitions of adulthood (e.g., independence from parents, marriage, retirement), and historical, institutional, and social factors that create variation in their timing, meaning, and individuals’ role experiences. Cross-listed with SOCY 4650. Prereq: Graduate standing. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
SOCY 5660 - Seminar: Social Psychology (3 Credits)
Sociological approaches to the study of the self, role theory, persons in situations, identifications, socialization, and other characteristics of persons in society. Prereq: Graduate standing. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Summer.

SOCY 5690 - Crime and Inequality Over the Life Course (3 Credits)
Life-course perspective on inequality and crime. Studies transitions, trajectories and turning points as key features of the life course. Considers how inequalities and criminal behavior are shaped by timing of experiences, historical and geographic contexts, others’ lives, and human agency. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Cross-listed with SOCY 4690. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA) Typically Offered: Summer.

SOCY 5740 - Courts & Society (3 Credits)
Courts are a centerpiece of modern legal systems that mediate social relationships and people's relationship to the state. This course explores the connection between courts and democratic society by considering the operation and evolution of courts in the U.S. Cross-listed with SOCY 4740. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA) Typically Offered: Spring.

SOCY 5750 - Seminar: Criminology (3 Credits)
An intensive review and analysis of the literature and research dealing with sociology of crime in modern society. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SOCY 5770 - Advanced Topics in Sociology (1-3 Credits)
Advanced study of special topics in sociology to be selected by the instructor. Note: May be repeated for credit when topics vary. Cross-listed with SOCY 4770. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)

SOCY 5780 - Violence in Relationships (3 Credits)
Course focuses on the study of violence among individuals involved in intimate relationships; factors in society such as norms, laws and institutions that are related to creating violence among intimates; and social policies, prevention, intervention and treatment programs. Prereq: Graduate standing. Cross-listed with SOCY 4780, WGST 4780 and WGST 5780. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SOCY 5840 - Independent Study SOCY (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: spring. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

SOCY 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Term offered: fall. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SOCY 5955 - Master's Thesis (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

SOCY 5964 - Master's Report (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
SOCY 5995 - Global Study Topics  (3-6 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Department consent required. Repeatable. Max hours: 12 Credits
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Sociology, MA

Introduction

The MA Program in Sociology at CU Denver provides a coherent, progressive, educational experience that prepares students for either immediate entry to a master's level career or continued study in Ph.D. programs. The program requires completion of 33 total credit hours, 27 of which are courses and 6 comprise the student's culminating project. The culminating project is either a thesis, an internship with a final paper, or an extra approved elective plus a report.

Please click here (p. 521) to see Sociology department information.

MA Program Strengths

• Emphasis on Methodology - This program distinguishes itself, in part, by its strong emphasis on methodology. All students are required to take 9 credit hours of research methodology and analysis (Research Methods, Quantitative Data Analysis, and Qualitative Data Analysis).

• An Urban Environment - The MA program in Sociology at CU Denver benefits tremendously from its location in a state capital and one of the fastest-growing urban areas in the U.S. This dynamic context provides a natural classroom for teaching our specialties: Health & Society; Crime, Law & Deviance; and, Family, Social Services & Community.

• Institutional Connections - Our proximity and institutional connection to the top-rated University of Colorado Anschutz Medical Campus (AMC) offer training opportunities as well, which are facilitated by engagement of departmental faculty with AMC medical researchers. In addition, strong integration of our faculty with the CU Denver campus community supports collaborative teaching and training efforts with faculty in the Departments of Geography, Anthropology, and Health & Behavioral Sciences.

Substantive Concentrations

In addition to education and training for sociology generalists, the program offers concentrations in three substantive areas. To receive an area concentration, students must successfully complete three courses within the area. Eligible courses are either within or outside the department, but the student may only take two courses outside the department.

Concentrations

Crime, Law and Deviance

The focus of this concentration is to provide students with an in-depth understanding of criminology including the social construction of laws, the causes of crime, reactions to law violations, and the prevention, control, and treatment of crime. Additionally, the program teaches students how deviant categories are created, how groups gain control over social definitions, and the consequences these definitions have in the form of norms, laws, and social sanctions. The concentration on crime, law, and deviance also focuses on how legal systems maintain and reproduce social inequalities. This offers an essential foundation for students pursuing careers in criminal justice, victim and community services, criminal law, and non-profit organizations in local and international contexts. Students may ultimately use this degree to conduct social research on crime, influence public policy, and inform government decisions about crime and law.

Health and Society

Enhancing the health and quality of life for individuals and communities are central goals to societies the world over. Health and medical sociology is a sub-field devoted to the study of population health, health care systems and policy, and the social dimensions of illness and healing. Health and medical sociologists study the causes of health inequalities, social constructions of health and illness, origins of medical authority, doctor-patient relationships, community influences on health, and the social forces that affect policy. The Sociology Department’s MA concentration in Health and Society provides training in the core research methodologies and theories of medical sociology, examining individual experience, institutional structures, laws and policies that affect health, and broader systems of inequality that lead to unequal rates of illness and access to care. This area of concentration provides in-depth training and is ideal for students interested in further graduate-level study and social research on health and medicine as well as those interested in careers in public health, health care services, and non-profit organizations.

Family, Social Services, and Community

Families play a significant part in individuals’ lives and society. At the micro or interpersonal level they are a setting for small-group processes such as socialization, conflict, communication and intimacy. At the meso or institutional level they interact with other major social institutions including those affecting education, law, healthcare, religion, the economy, criminal justice, and welfare. At the macro or structural level, the family—in its varied and diverse forms also is key to understanding how inequality is experienced and reproduced in society. The interplay of these multiple levels—the micro or interpersonal, the meso or institutional, and the macro or structural—is important as well as individuals influence social structures and institutions, and the latter, in turn, affect family interactions and relationships. This concentration provides in depth understanding of the complex role of families and family members at multiple levels, as well as the social systems, organizations and communities responsible for supporting families and individuals.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Sociology faculty advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

The MA program in Sociology provides a coherent, progressive educational experience that prepares students for either immediate entry to a master's level career or continued study in a PhD program. Students choose from three options for their Culminating Project that completes the master's degree: either a six credit hour thesis, a three credit hour applied experience plus a three credit hour paper, or a fifth three credit hour graduate-level elective plus a three credit hour report. The program also offers three concentration pathways (Crime, Law & Deviance; Health & Society; Family, Social Services & Community) for students seeking specialization in high-demand career areas.
1. Students must complete a minimum of 33 credit hours from approved courses.

2. Students must complete a minimum of 33 graduate (5000-level) or higher credit hours from approved courses.

3. Students must earn a minimum grade of B (3.0) or better in all required courses and a B- (2.7) in all other courses applied to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.

4. Students must complete all coursework with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Students can take an unlimited number of sociology graduate (5000-level) seminars to fulfill their 12 elective credits requirement, or a combination of the following:
   a. Independent study: maximum six semester hours
   b. Graduate level courses in other departments: maximum six semester hours
   c. Internship: maximum three semester hours

2. SOCY 5000 Professional Seminar: Sociological Inquiry must be taken in the first fall semester. SOCY 5024 Seminar: Research Methods I must be taken before SOCY 5183 Seminar: Quantitative Data Analysis and SOCY 5193 Seminar: Qualitative Data Analysis.

Women’s and Gender Studies

Overview

Women’s and Gender Studies (WGST) is an interdisciplinary program that focuses on the centrality of gender and sexuality to understanding our past and present worlds. Students and faculty probe assumptions about men and women and question structures of inequality as they play out in local and global contexts. Through a study of gender and sexuality, we expand our thinking about other relations of power, such as race, class, ethnicity, nationality and physical ability. WGST fosters connections with the local community and promotes advocacy of human rights and social justice.

Graduate Studies

At the graduate level, students may pursue Women’s and Gender Studies as a track in the Master of Social Science degree program (p. 517). Students learn to think critically about the condition of women and the role of gender in both historical and contemporary experience. Course work focuses on conceptual models for understanding women and gender, such as feminist, queer, post-colonial and race theories as they operate through culture, language, politics, visual representation and history. For more information, contact Margaret Woodhull (margaret.woodhull@ucdenver.edu).

The WGST program also offers a Graduate Certificate in Women’s and Gender Studies for students pursuing master’s degrees in departments in the College of Liberal Arts and Sciences as well as non-degree seeking students.

Click here (p. 532) to learn about the requirements for the Graduate Certificate in Women’s and Gender Studies.

Women’s Studies (WGST) Courses

WGST 5010 - Special Topics in Women's and Gender Studies (1-3 Credits)
Examines current topics in the field of Women's studies and Gender studies. Topics vary from term to term. May be repeated as long as the topic is distinct and different from courses student has already received credit for. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5225 - Urban America (3 Credits)
This course will explore how Americans experienced their rapidly growing and changing cities during the past two hundred years. This course will cover a wide range of urban themes, including segregation and gentrification, self-invention and policing, ethnic gangs and race riots, skyscrapers and suburbia, and commercial sex and Hollywood. The course will ultimately chart how a range of Americans - including immigrants, teenagers, laborers, women, LGBTQ+ people, and people of color – all fought for their own “right to the city”. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4225, HIST 5225, WGST 5225, GEOG 4625. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5230 - Women in the West (3 Credits)
Focuses on ways in which women, from the mid-19th century through the mid-20th century, of different races, classes, and ethnic background, have interacted and been active participants in the development of the Western states. Cross-listed with WGST 4230 and HIST 4230/5230.
Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5248 - Gender, Development and Globalization (3 Credits)
Examining the cost and impact of globalization; not only on women and gender but economic equality, human movement and displacement, sustainable development and the environment. Highlighting the complexities of a higher interconnected world and intersectional nature of a globalized world, answering the question: Who Wins? Who Loses? Prereq: Graduate standing. Cross-listed with WGST 4248, PSCI 4248 and PSCI 5245. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5270 - Social Meanings of Reproduction (3 Credits)
Reproduction involves more than biological processes, assuming symbolic, political, and ideological meanings. This course examines contested meanings of reproduction, including how people experience reproduction, controversies over who should reproduce (and under what circumstances), and how public policy mediates these conflicts. Cross-listed with SOCY 4270, SOCY 5270 and WGST 4270. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
WGST 5303 - Sex and Gender in Modern Britain (3 Credits)
Examines modern British history by focusing on sex and gender as central aspects in people's lives. Considers the ways gender shapes the realms of politics, economics, society, and culture in Britain from the 18th century to the present. Cross-listed with WGST 4303 and HIST 4303/5303.
Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5305 - Women of Color Feminisms (3 Credits)
This course is an overview of women of color feminist theorizing (thinking) and praxis (practice) in the U.S. We will explore these feminisms through the writing, art, and organizing efforts of women and trans, femme, and non-binary people of color with a focus on key themes and concepts including identity, difference, oppression, intersectionality, representation, violence, resistance, empowerment, solidarity, and coalition. Texts for the course highlight key issues in the feminist theorizing and praxis of Black, Latina/x, Chicana/x, Asian (American), Pacific Islander, Indigenous, and Arab (American) women and trans, femme, and non-binary people, especially the politics of identity and representation, structural oppressions and violations, and practices of survival, resistance, and activism. Not only will we examine how these feminists have critiqued oppression(s) based on race, class, gender, sexuality, nationality, and religion, but what kinds of approaches, strategies, and changes these thinkers and activists have organized for and promoted. Cross-listed with WGST 4305, ETST 4305 and ETST 5305. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

WGST 5306 - Survey of Feminist Thought (3 Credits)
Examines changes and continuities in feminist thought from the 18th century to the present, using historical and literary materials. Explores the ways that women's characteristics, experiences, and capabilities have been understood and challenged. Cross-listed with ENGL 4306, 5306, HIST 4306, 5306, WGST 4306. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5307 - History of Sexuality (3 Credits)
Explores the relationships between gender and norms, sexual practice, and ideas about sexuality in Europe and the United States. Examines how sex and sexuality have changed over time and how those changes relate to social, cultural, political, and economic history. Cross-listed with WGST 4307 and HIST 4307/5307. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5308 - Contemporary Feminist Thought (3 Credits)
This course explores contemporary feminist thought in philosophy and literature in the 20th and 21st centuries. Topics include lesbianism, black feminism, Chicana feminism, transgender identity, women and work and others. Cross-listed with ENGL 4308, ENGL 5308, PHIL 4308, PHIL 5308, WGST 4308. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

WGST 5343 - Women & Gender in US History (3 Credits)
This course will explore women and gender as drivers of US history. From politics to popular culture, jobs to sexual empowerment, civil rights to economic restructuring, we will use gender as a lens to re-envision familiar stories about American history. Cross-listed with WGST 3343, HIST 3343, and HIST 5343. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

WGST 5420 - Goddess Traditions (3 Credits)
Explores the many forms which Goddesses have assumed through history, including the Neolithic Great Mother and her heiresses in the ancient Mediterranean cultures, such as: Isis, Ishtar, Demeter, Hecate, Aphrodite, Artemis, Athena and others, and their parallels in India. Goddess traditions have encompassed a full spectrum from virgins to Great Mothers to dark underworld Goddesses of death and destruction. Cross-listed with WGST 4420 and RLST 4420/5420. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

WGST 5494 - Red and Blue America: U.S. History, 1973-Present (3 Credits)
This course explores American history during a period of immense cultural and political polarization. After 1973, the United States experienced the rise of the New Right, changing attitudes towards sexual "permissiveness," and rapid advancements in technology. These developments in the United States, meanwhile, influenced and were shaped by the nation's "hot" and "cold" conflicts in Europe, Latin America, the Middle East, and the rest of the globe. Restriction: Restricted to degree-granting graduate programs. Cross-listed with WGST 4494, HIST 4494, and HIST 5494. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall.

WGST 5500 - Feminist Philosophy (3 Credits)
Seminar on key debates & figures in historical & contemporary feminist philosophy. Topics may include: rights, embodiment, gender, sexuality, race, reason, & violence. Figures may include: Wollstonecraft, Stanton, Beauvoir, Judith Butler, and bell hooks. Cross-listed with WGST 4500, PHIL 4500 & 5500. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.
WGST 5510 - Whores and Saints: Medieval Women (3 Credits)
Studies how women are presented in texts, as well as works by women. Investigates the roles open to women and societal attitudes toward women, who were considered seductresses, saints, scholars and warriors in the middle ages. Prereq: Nine hours of literature courses or instructor permission. Cross-listed with WGST 4510, ENGL 4510/5510 and RLST 4730/5730. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

WGST 5511 - French Women Writers (3 Credits)
Designed to explore writings by French and Francophone women from the Middle Ages to the present. Addresses the question of what it means to be a woman and want to write. The selections include a wide variety of genres: autobiographical writings, stories, poems, manifestos, letters, political and historical documents. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Prereq: Graduate standing. Cross-listed with WGST 4511 and FREN 4510/5510. Term offered: fall, spring.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

WGST 5540 - Race, Class and Gender in Spanish Golden Age Literature (3 Credits)
Explores works of various genres in relation to their social and political contexts in 16th and 17th century Spain, emphasizing the cultural attitudes toward race, class, and gender that inform them. Prereq: graduate standing. Cross-listed with WGST 4540 and SPAN 4340/5340.
Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

WGST 5550 - Race, Class and Gender in Spanish Golden Age Literature (3 Credits)
Explores works of various genres in relation to their social and political contexts in 16th and 17th century Spain, emphasizing the cultural attitudes toward race, class, and gender that inform them. Prereq: graduate standing. Cross-listed with WGST 4540 and SPAN 4340/5340.
Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

WGST 5555 - International Women's Resistance (3 Credits)
Examines local and international struggles of women to build peace and justice by resisting systems of inequality such as colonialism, racism, patriarchy, globalization, and religious intolerance. Cross-listed with WGST 4555, ETST 4555 and PSCI 4555/5555. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5560 - Queer Media Studies (3 Credits)
Queer Media Studies, a discussion-based seminar, investigates the history of a variety of LGBTQ+ media — including news, film, television, comics, games, music, and the Internet. Students engage in a variety of media projects to explore LGBTQ+ histories, queer aspects of media production, reception, and media messages. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA).
Cross-listed with COMM 4660, COMM 5660, WGST 4660. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

WGST 5710 - Women and Religion (3 Credits)
A sociological exploration of the contemporary roles of women in religion. Course examines American and world religious groups with an eye to women’s involvement. Considers how women have changed these traditions as they take on leadership roles and discusses the tensions that arise within these traditions as a result of their expanded participation. Cross-listed with HUMN 5710, SSCI 4710/5710, WGST 4710, RLST 4710/5710. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5720 - Sexuality, Gender and Their Visual Representations (3 Credits)
Studies sexuality, gender and identity representation from classical antiquity through the present in the visual arts. Uses the literature of visuality, feminism, race and queer theory. Explores representations of femininity, masculinity and androgyny and their reinforcement and challenge to gender-identity norms. Cross-listed with HUMN 5720 and SSCI 5720. Prereq: Graduate standing. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

WGST 5770 - Selling Empires: The Art of Visual Propaganda (3 Credits)
Western empires disseminate political, social, economic & cultural practices through complex interplay of cultural practices. Visual production is a complex site for meaning making within imperialism. Examines how visual discourses operated to create meaning for audiences, through focus on postcolonial critique. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5770, SJUS 5770, SSCI 5770, HUMN 4770, SJUS 4770, SSCI 4770, and WGST 4770. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

WGST 5780 - Violence in Relationships (3 Credits)
Course focuses on the study of violence among individuals involved in intimate relationships; factors in society such as norms, laws and institutions that are related to creating violence among intimates; and social policies, prevention, intervention and treatment programs. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SOCY 4780, SOCY 5780 and WGST 4780. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

WGST 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: permission of instructor. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
WGST 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.

WGST 5900 - Smart Girl Coaching Training and Practicum (3 Credits)
Course provides training (lecture and role-playing) in coaching and mentoring which will be applied to support near-peer guides in delivering the Smart Girl curriculum in school settings. Following the completion of the training, students work as coaches for teams of near-peer mentors and groups of teenage girls in the Denver Community, and apply the skills learned in their training. Prereq: Graduate standing. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5933 - Philosophy of Eros (3 Credits)
What does it mean to understand philosophy as an erotic activity? This question will be examined, first by studying Plato's dialogues such as Lysis, Symposium and Republic and then by reading texts from Sigmund Freud, Michael Foucault and others. Cross-listed with PHIL 4933/5933, WGST 4933, SSCI 5933 and HUMN 5933. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 6010 - Methods and Theories of Feminism and Gender Studies (3 Credits)
Provides graduate-level interdisciplinary study in historiography, methodologies and theories of women's, gender and sexuality studies and considers how culture is constructed around these categories. Cross-listed with SSCI 6010 and HUMN 6010. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Women's and Gender Studies Graduate Certificate

Introduction

Please click here (p. 528) to see Women's and Gender Studies department information.

The Women's and Gender Studies Graduate Certificate is administered through the Women's and Gender Studies program in the College of Liberal Arts and Sciences at the University of Colorado Denver. It is designed to provide members of the CU Denver population and public with specialized knowledge of the history, politics, literature and social practices related to women's and gender concerns. Acceptance into the certificate program is subject to CU Denver Graduate Education Policies and Procedures.

The WGST certificate is available to any qualified graduate student or non-degree seeking graduate-level student at CU Denver. Students begin with a required, graduate-level methodology or foundational course before pursuing a combination of WGST-related course work. Upon completion of the certificate, students will have foundational and theoretical knowledge of the major concerns of women's and gender studies.

All prospective students must complete and submit an application to the program which can be obtained from the graduate advisor. Upon admission to the certificate program, students are eligible for the certificate.

For questions about the Women's and Gender Studies Graduate Certificate program contact Sarah Hagelin (sarah.hagelin@ucdenver.edu).

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Women's and Gender Studies advisor to confirm the best plans of study before finalizing them.

Overview
The School of Education & Human Development is a vibrant community of practicing educators and counselors, educational leaders and researchers who have a strong service ethic locally, nationally and globally and a dedication to excellence.

Mission
Leadership for Educational Equity
Prepare and inspire education and mental health leaders to have a profound impact in fostering student opportunity, achievement and success in urban and diverse communities.

Vision
A leading school of education providing national expertise on educational issues and socially-just solutions for urban and diverse communities. Through innovative research and partnerships, we strive to be passionate agents of change, inspiring upcoming generations to learn from the past and shape the future.

Our Role in the Community
We are committed to developing forward-thinking educators and counselors who have a deep sense of inquiry, a concern for pressing social problems, a great desire to live their lives purposefully, a passion for giving back to the community and the cultural competence needed to serve urban and diverse populations.

Diversity and Inclusion
At the School of Education & Human Development (SEHD), we believe strongly that all students—diverse in race, ethnicity, economic resources, language, fluency, abilities, geography, first-generation status, age, gender, and sexual identities—deserve the opportunity to learn. To advance our mission and meet the changing interests of our local and global communities, the Office of Diversity and Inclusion has been established to create positive momentum towards educational access, equity, and success.

Accreditation
The School of Education & Human Development is fully accredited by the Colorado Department of Education (CDE).

The School of Education & Human Development is fully accredited by the Council for Accreditation of Counseling and Related Education Programs (CACREP) in Clinical Mental Health Counseling and School Counseling.

The School of Education & Human Development is fully accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) in Marriage and Family Therapy.

The School of Education & Human Development is accredited on contingency by the American Psychological Association (APA) in School Psychology. We anticipate receiving full accreditation on or prior to the expiration date of April 15, 2023.

Programs Leading to Degrees, Licenses and Endorsements
The School of Education & Human Development offers three doctoral programs, one educational specialist degree, master’s degrees in seven program areas as well as undergraduate degrees with teacher licensure through a partnership with the College of Liberal Arts and Sciences. We offer a variety of endorsements and certificate programs as well. Students may pursue a variety of state licenses for teaching and school administration or may elect to earn these licenses without pursuing a graduate degree.

Counseling

Overview

The Master of Arts degree in Counseling program prepares professionals for community/mental health agencies, private practice, and public schools. Students accepted into the Counseling program follow one of two concentration areas. The clinical mental health counseling track follows state licensure requirements for Licensed Professional Counselor (LPC); the school counseling track follows the requirements for both the LPC and Colorado Department of Education (CDE) licensure requirements for the Special Services Provider license in school counseling.

Both the clinical mental health and school counseling tracks consist of 63 semester hours. Core courses that are common to both licensure areas of study are followed by courses specific to concentration area. Both specializations require a practicum (150 clock hours) and an internship (600 clock hours). The master's degree is a three to three and a half-year program with course work for two to two and a half years followed by a 12-16 months of practicum and internship.

The clinical mental health and school counseling tracks are nationally accredited by CACREP, the Council for the Accreditation of Counseling and Related Educational Programs. The school counseling track is a CDE-approved program.

Admission Requirements

Successful applicants to the Counseling program will have obtained a minimum 2.75 undergraduate GPA. Also, applicants will submit a current resume, a letter of intent, three letters of recommendation, and additional required materials. Applicants meeting these minimum standards may be invited to a half-day group interview that involves program orientation, small group interviews, a writing assignment, and a group exercise.

A prerequisite course in basic statistics (undergraduate or graduate level) is required prior to enrollment in the program or may be completed during the first year in the program.

Application materials are available at https://education.ucdenver.edu/academic-services/admissions/academic-services/admissions/. All materials must be submitted online by the appropriate deadline: September 15 for spring semester and January 15 for fall semester.

Counseling (COUN) Courses

COUN 5010 - Counseling Theories (3 Credits)
Focuses on counseling theories: Psychodynamic, Adlerian, Person-Centered, Existential, Behavioral, including DBT, Cognitive Behavioral, Gestalt, & Reality Therapy. Also includes an overview of the history of the counseling profession and the role and function of counselors in various settings. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5100 - Techniques of Counseling (3 Credits)
Students practice basic counseling skills, develop therapeutic intervention strategies, and improve the effectiveness of their communication by practicing listening and responding. Videotaped role-plays are utilized. Prereq: COUN 5010 and 5810 and COUN-MA or CAFT majors within the School of Education and Human Development. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5110 - Group Counseling (3 Credits)
Learn group theory and dynamics. Practice facilitating a group. Learn about screening, group membership and styles, roles and behavior, termination of groups. Extensive practice in laboratory setting. Prereq: COUN 5010, COUN 5100 and 5810. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5120 - Counseling Grief and Loss (3 Credits)
This elective course is an introduction and study of the field of bereavement in counseling. Studies focus on relating to client’s experience with grief, loss and/or trauma through lectures, speakers, videos, readings, experiential in-class simulations, self-discovery and introspection. Max hours: 3 Credits. Grading Basis: Letter Grade
COUN 5150 - Family Counseling/Therapy (3 Credits)
Introduces systemic and family theories and intervention strategies. Emphasis on historical development of systems theory. Prereqs: COUN 5010 and COUN 5810 or COUN-MA CFT or CAFT majors within the School of Education and Human Development. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: COUN 5010 and COUN 5810 or COUN-MA CFT or CAFT majors within the School of Education and Human Development.

COUN 5160 - Techniques in Family Counseling/Therapy (3 Credits)
This didactic and experiential course presents an overview of techniques and theories in family therapy. It will help students continue to develop a theoretical framework for engaging in theory driven therapeutic interventions via practice family therapy role plays. Prereq: COUN 5010, COUN 5100, and COUN 5150. Max hours: 3 Credits
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, and COUN 5150.

COUN 5180 - Counseling/Therapy Couples (3 Credits)
This course is didactic and experiential dealing with therapeutic techniques applied to the improvement of intimate/couple relationships. Emphasis is placed on empirically based assessment, diagnosis, and treatment of couples’ problems. Special topics include: cohabiting couples, gay and lesbian couples, remarried couples, cross-cultural couples, ethical and moral dimensions of couple counseling, unique couple issues, and the effectiveness of couple therapy. Prereq: COUN 5010, COUN 5100, COUN 5150 and COUN 5160. Max hours: 3 Credits
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, COUN 5150, COUN 5160

COUN 5280 - Addictions Counseling (3 Credits)
Includes treatment strategies for clinicians in addressing varieties of addictive behaviors including substance, abuse, eating disorders, gambling and sexual addiction. Cultural dimensions of addictions are also considered. Restricted to Graduate level students in the School of Education and Human Development. Max hours: 3 Credits
Grading Basis: Letter Grade
Restricted to Graduate level students in the School of Education and Human Development

COUN 5330 - Counseling Issues and Ethics (3 Credits)
An in-depth examination of ethical and legal issues in the field. Topics include working with individuals and family systems, licensure, professional associations, record keeping and statutory requirements. Prereq: COUN 5010 and 5810. Restriction: Restricted to COUN majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 and 5810. Restriction: Restricted to COUN majors within the School of Education and Human Development.

COUN 5400 - Career Development (3 Credits)
Development of competencies in career development counseling. Theories of work systems, psychological dynamics, information systems, and decision making models are covered. Interacting with work or family systems and other sub-systems is emphasized. Restricted to Graduate level students in the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restricted to Graduate level students in the School of Education and Human Development

COUN 5425 - Developing & Implementing a School Counseling Program: ASCA (3 Credits)
The course is specifically designed to provide training for school counselors and related professionals to develop and implement a comprehensive counseling and guidance program, which incorporates the ASCA National Model. Prereq: COUN 5110, 5400, and 5815, LDFS 6200, RSEM 5110 and 5120. Restriction: Restricted to COUN majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5110, 5400, and 5815, LDFS 6200, RSEM 5110 and 5120. Restriction: Restricted to COUN majors within the School of Education and Human Development.

COUN 5810 - Multicultural Counseling Issues for Individuals and Families (3 Credits)
Offers introduction to competent multicultural and social justice counseling. Students develop the awareness, knowledge, skills and action competences necessary for culturally responsive interventions with diverse communities. The course explores issues of ethnicity, culture, age, disability, and sexual orientation and learn about multicultural and social justice interventions for addressing these issues in counseling. Restricted to Graduate level students in the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restricted to Graduate level students in the School of Education and Human Development

COUN 5815 - Introduction to School Counseling (3 Credits)
This course emphasizes the unique and varied role of the school counselor and school counseling programs in diverse public schools. The course focus will be on learning the various skills necessary to meet the needs of school age students and others in the school community. In addition, the course will cover The ASCA model of comprehensive developmental school counseling activities, and focus on practical resources for counseling students in diverse school settings. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development

COUN 5820 - Strategies of Agency Counseling (3 Credits)
Students learn the role and function of the counselor in community agency settings. Intervention strategies, consultation, administration of community mental health agencies. Prereq: COUN 5010 and 5810. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 and COUN 5810. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5825 - The Business Of Private Practice (3 Credits)
This course is designed to teach students how to start and manage a successful private practice in counseling. Emphasis is placed on understanding and navigating the business side of professional counseling. Max hours: 3 Credits.
Grading Basis: Letter Grade

COUN 5835 - Gender And Sexual Orientation (3 Credits)
Investigates constructions of gender and sexuality in the systemic context of individuals, relationships, families, and culture. Emphasis will be placed on developing critical thinking and clinical skills that engage diverse clients in a respectful, ethical, and effective manner in therapy. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5830 - Special Topics (1-6 Credits)
Specific topics vary from semester to semester. Intervention strategies with children, issues in abuse, violence, incest, legal issues, adult counseling, grief, death and dying, private practice. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5910 - Practicum and Individual Supervision (3 Credits)
Supervised counseling practice in the counseling lab and appropriate settings with individual supervision experience (towards 150 clock hours required for graduation). Emphasis on individual and couple and family counseling techniques and therapeutic intervention strategies. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Must be taken concurrently with COUN or CMFT 5911. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: COUN 5911 or CMFT 5911. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5915 - Practicum in School Counseling (3 Credits)
This class will provide school track students with 3 credits of fieldwork at a developmental level of their choice. The course will require students to work with a school counselor activities that the counselor is assigned under supervision. Students will develop skills in needs assessment, developing classroom guidance activities and running the activities; they will sit in on IEP conferences, help conduct college fairs, administer career assessment inventories and standardized assessments, learn to place students in appropriate classes, and provide responsive counseling services on an as needed basis. Prereq: COUN 5010, COUN 5110, COUN 5400, COUN 5425, COUN 5810, COUN 5815, COUN 6230.
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Coreq: COUN 5910, COUN 5110, COUN 5400, COUN 5425, COUN 5810, COUN 5815, COUN 6230. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5840 - Independent Study: COUN (1-4 Credits)
Individually directed research activity on special topics not covered by course offerings. Degree students only, with advance approval by major, professor and department chair. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5900 - Introduction to Sex Therapy (3 Credits)
Provides an overview of human sexuality over the life cycle, addressing social, psychological, and physiological aspects of human sexuality. Etiology of human sexuality diagnoses and treatment of problems related to human sexuality are addressed. Note: This course is a component in the couple and family program and required for MFT licensure. Prereq: COUN 5010, COUN 5100, COUN 5110. Restriction: Restricted to COUN majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: COUN 5010, COUN 5100, COUN 5110. Restriction: Restricted to COUN majors within the School of Education and Human Development.

COUN 6100 - Spiritual Dimensions of Counseling (3 Credits)
A didactic and experiential course involving the following content areas: theories of spiritual development, a survey of religious traditions, assessment, ethical issues, self-of-the-therapist issues, and treatment interventions and strategies in working with clients' values. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.
COUN 6140 - Counseling/Therapy with Children, Adolescents, and their Parents (3 Credits)
This is a didactic and experiential course dealing with therapeutic techniques applied to the improvement of child functioning, and parent-child relationships. Emphasis is placed on play therapy, assessment, diagnosis and treatment of childhood and adolescent disorders, parent education, crisis intervention. Prereq: COUN 5010, COUN 5100, and LDFS 6200. Restriction: Restricted to COUN majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, and LDFS 6200. Restriction: Restricted to COUN majors within the School of Education and Human Development.

COUN 6150 - Introduction to Emotionally Focused Couple Therapy (3 Credits)
This course is designed to help students conceptualize couple distress from an attachment perspective and gain foundational knowledge in Emotionally Focused Therapy (EFT). The organization of the course includes observation of therapy sessions, presentations of theory and clinical techniques, skills training exercises, and discussion of specific cases, clinical material and issues. Prereq: COUN 5010, COUN 5100, COUN 5160. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, COUN 5150, COUN 5160

COUN 6160 - Advanced Assessment and Treatment in Family Systems (3 Credits)
This is a didactic and experiential course focusing on family assessment instruments and their use in family therapy. Emphasis is placed on the role of assessment in family therapy, the relationship of assessment to treatment planning and evaluation, gaining familiarity with a variety of assessment instruments and learning to apply assessment skills to real-world clients. Prereq: COUN 5010, 5100, 5150, 5160, 6250, and RSEM 5110 or CMFT 5150, 5150, 5160, 5161, 6180, Coreq: COUN 6250. Max hours: 3 Credits
Grading Basis: Letter Grade
Prereq: COUN 5010, 5100, 5150, 5160, 6250, and RSEM 5110 or CMFT 5150, 5150, 5160, 5161, 6180, Coreq: COUN 6250

COUN 6200 - Trauma Informed Care for Diverse Populations and Co-occurring Disorders (3 Credits)
This course will prepare students to become more trauma informed and understanding of cooccurring disorders within the realm of substance use and mental health treatment in their future careers of certified addictions counselors and other mental health positions in community and private sectors. The course will also demonstrate inclusivity in TIC. Max hours: 3 Credits.
Grading Basis: Letter Grade
COUN 6230 - Developmental Counseling in Schools: Prevention & Intervention (3 Credits)
This course offers the tools to provide developmental counseling services in the schools, including prevention through classroom counseling activities linked with the curriculum, and responsive services. Prereq: COUN 5110, 5400, 5810, LDFS 6200, RSEM 5110 and 5120. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5110, 5400, 5815, LDFS 6200, RSEM 5110 and 5120 Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development

COUN 6240 - Consultation Strategies (3 Credits)
Focuses on the development of consultation skills and implementation of strategies. Students are exposed to major theories of the consultation process. In addition, this course provides the opportunity to practice consultation and implementation strategies within a system: an agency, business setting, or educational setting. Prereq: COUN 5010 or permission of instructor. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development

COUN 6250 - Mental Health Diagnosis (3 Credits)
This course addresses individual diagnosis from a variety of perspectives: Biological, developmental, medical, neurological, psychosocial, cultural and interpersonal. It will provide students with a broad theoretical base for understanding psychopathology, from not only an individual, descriptive, symptom-based perspective as presented in the DSM-5, but also from a contextual systemic perspective including developmental hallmarks, familial patterns and socio-cultural contributors. Prereq: COUN 5010 and 5810 or CMFT 5150 and CMFT 6180. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 and 5810 or CMFT 5150 and CMFT 6180 Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.
COUN 6950 - Master’s Thesis (4 Credits)
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development
Additional Information: Report as Full Time.

COUN 7100 - Advanced Theories and Techniques in Psychotherapy (3 Credits)
Learn and practice advanced techniques for addressing adult and adolescent clinical problems. Examine efficacy research on specific counseling techniques as associated with particular approaches in counseling. Prereq: COUN 5010, 5100 and 5820. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, 5100 and 5820 Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development
**Counseling, MA**

**Introduction**

The Master of Arts degree in Counseling program prepares professionals for community/mental health agencies, private practice, and public schools. Students accepted into the Counseling program follow one of two concentration areas. The clinical mental health counseling track follows state licensure requirements for Licensed Professional Counselor (LPC); the school counseling track follows the requirements for both the LPC and Colorado Department of Education licensure requirements Licensed School Counselor.

Both the clinical mental health and school counselor tracks consist of 63 semester hours. Core courses that are common to all licensure areas of study are followed by courses specific to concentration area. Both specializations require a practicum (150 clock hours) and an internship (600 clock hours). The master's degree is a three to three and a half-year program with course work for two to two and a half years followed by a 12-16 months of practicum and internship.

The clinical mental health and school counseling tracks are nationally accredited by CACREP, the Council for the Accreditation of Counseling and Related Educational Programs.

**Program Requirements**

Students in the Counseling program are required to maintain at least a B (3.00) grade point average in all coursework attempted while enrolled. Courses in which grades below a B- (2.7) are received may only be counted toward the degree with faculty permission. Students receiving a C or below in any of the clinical skill building courses: COUN 5100 Techniques of Counseling, COUN 5110 Group Counseling, COUN 5160 Techniques in Family Counseling-Therapy, COUN 5910 Practicum and Individual Supervision, COUN 5930 Internship in Counseling, COUN 6140 Counseling/Therapy with Children, Adolescents, and their Parents, or COUN 7100 Advanced Theories and Techniques in Psychotherapy, will be required to repeat the course and follow any remediation plan that may be developed to meet the students’ specific needs. Students must also take a national comprehensive examination, the Counselor Preparation Comprehensive Exam (CPCE), after completing all core courses. Students may choose to conduct research and submit a thesis (research conducted under faculty advisement) instead of taking a comprehensive examination.

**Additional Requirements**

1 100-hour practicum is required in the schools (COUN 5915 Practicum in School Counseling). Three hundred of the 600 hours of internship must be in a concentrated environment. Full-time experience consisting of at least a four-hour block of time each day is required. Students may not do their internship in their primary employment (agency or school setting). For school counseling, three hundred (300) hours of internship are needed at the middle and secondary level for a K-12 program. COUN 5150 Family Counseling/Therapy, COUN 6140 Counseling/Therapy with Children, Adolescents, and their Parents and COUN 7100 Advanced Theories and Techniques in Psychotherapy are necessary for students to work with school-related family issues, individual counseling and children's counseling in practicum and internship.
The Professional School Counselor Praxis exam (5421) is required for the Colorado Department of Education license for school counselors.

Overview

Degree
The Master of Arts degree in Couple & Family Therapy program prepares professionals to provide services to help individuals, couples, and families to increase mental health and relationship satisfaction in settings such as mental health centers, non-profit agencies, private practices and hospitals. This program follows Colorado state licensure requirements for licensure as a Marriage and Family Therapist (MFT).

The program requires 300 hours of clinical work, 100 of which must be relational (couple and/or family therapy) clinical hours, with no distinction between practicum and internship in the collection of these clinical hours. The master's degree is a two and a half to three and a half-year program, including a 12-16 months of practicum and internship.

The program is accredited by COAMFTE, the Commission on Accreditation for Marriage and Family Therapy Education.

Admission Requirements
Successful applicants to the Couple and Family Therapy program will have obtained a minimum 2.75 undergraduate GPA. Also, applicants will submit a current resume, a letter of intent, three letters of recommendation, and additional required materials. Applicants meeting these minimum standards may be invited to a half-day group interview that involves program orientation, small group interviews, and a group exercise.

Application materials are available at https://education.ucdenver.edu/academic-services/admissions. All materials must be submitted online by the appropriate deadline: September 1 for spring semester and February 1 for fall semester.

Faculty
Rashmi Gangamma (https://education.ucdenver.edu/about-us/faculty-directory/Gangamma-Rashmi-UCD6004082503/) PhD, LMFT Program Director, Associate Professor.

Robert Allan (https://education.ucdenver.edu/about-us/faculty-directory/Allan-Robert-UCD600041679/), PhD, LMFT, LPC, Associate Professor.

Tom "YiLe" Su (https://education.ucdenver.edu/about-us/faculty-directory/Su-Tom-UCD6004089962/), PhD LMFT, Clinical Assistant Professor.

Chélynn Randolph, PhD, Clinical Coordinator, Clinical Assistant Professor.

Program Requirements
Students in the Couple and Family Therapy program are required to maintain at least a B (3.00) grade point average in all coursework attempted while enrolled.
CMFT 5161 - Individual and Contemporary Family Therapy (3 Credits)
This didactic and experiential course presents an overview of contemporary techniques and theories in family therapy. It will help students continue to develop a contemporary family theoretical framework for engaging in theory driven therapeutic interventions via practice family therapy role plays. Prereq: CMFT 5150 and CMFT 5160.
Max hours: 3 Credits.
Grading Basis: Letter Grade
PreReq: CMFT 5150 and CMFT 5160.

CMFT 5180 - Therapy with Couples/Relationships (3 Credits)
This course is didactic and experiential dealing with therapeutic techniques applied to the improvement of intimate/couple relationships. Emphasis is placed on empirically based assessment, diagnosis, and treatment of couple/relationship problems. This is a survey course covering different approaches working with couples/relationships.
Prereq: CMFT 5150, 5151, 5160 & 5161. Restriction: Restricted to CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
PreReq: CMFT 5150, 5151, 5160 and 5161. Restriction: Restricted to CAFT majors within the School of Education and Human Development. Typically Offered: Fall, Spring, Summer.

CMFT 5330 - Professional Identity & Relational Ethics (3 Credits)
This course addresses the professional identity and ethics of couple and family therapists. It concentrates on couple and family therapist’s ethical and legal responsibilities and liabilities as described in mental health and family law, insurance claims, and private practice management.
Prereq: CMFT 5150 & CMFT 5160. Restriction: Restricted to CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
PreReq: CMFT 5150 CMFT 5160. Restriction: Restricted to CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.

CMFT 5170 - Practicum and Individual Supervision (3 Credits)
Supervised counseling practice in the counseling lab and appropriate settings with individual supervision experience (towards 150 clock hours required for graduation). Emphasis on individual and couple and family counseling techniques and therapeutic intervention strategies.
Coreq: COUN 5911 or CMFT 5911. Prereq: CMFT 5150, 5151, 5160, 5161, 5180, 5180, 610, 5330, 5180, 6160, 6140, and COUN 6250. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: COUN 5911 or CMFT 5911. Prereq: CMFT 5150, 5151, 5160, 5161, 5180, 5330, 5180, 6160, 6140, and COUN 6250. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Typically Offered: Fall, Spring, Summer.

CMFT 5390 - Internship in Counseling (3-6 Credits)
Supervised internship of 600 clock hours. Intern performs activities of a regularly employed professional in an approved community site. Prereq: CMFT or COUN 5910 and 5911. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 12 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 12.
PreReq: CMFT or COUN 5910 and 5911. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Typically Offered: Fall, Spring, Summer.

CMFT 6000 - Introduction to Sex Therapy (3 Credits)
Provides an overview of human sexuality over the life cycle, addressing social, psychological, and physiological aspects of human sexuality. Etiology of human sexuality diagnoses and treatment of problems related to human sexuality are addressed. Prereq: CMFT 5150, 5151, 5160 and 5161. Max hours: 3 Credits.
Grading Basis: Letter Grade
PreReq: CMFT 5150, 5151, 5160 and 5161.

CMFT 6140 - Counseling/Therapy with Children, Adolescents, and their Parents (3 Credits)
This is a didactic and experiential course dealing with therapeutic techniques applied to the improvement of child functioning, and parent-child relationships. Emphasis is placed on play therapy, assessment, diagnosis and treatment of childhood and adolescent disorders, parent education, crisis intervention.
Prereq: CMFT 5150, 5151, 5160 and 5161. Max hours: 3 Credits.
Grading Basis: Letter Grade
PreReq: CMFT 5150, 5151, 5160 and 5161.

CMFT 6160 - Advanced Assessment and Treatment in Family Systems (3 Credits)
This is a didactic and experiential course focusing on family assessment instruments and their use in family therapy. Emphasis is placed on the role of assessment in family therapy, the relationship of assessment to treatment planning and evaluation, gaining familiarity with a variety of assessment instruments and learning to apply assessment skills to real-world clients.
Prereq: CMFT 5150, 5151, 5160, 5161, 5330, 6180, RSEM 5120, and COUN 6250. Max hours: 3 Credits.
Grading Basis: Letter Grade
PreReq: CMFT 5150, 5151, 5160, 5161, 5330, 6180, RSEM 5120, and COUN 6250. Typically Offered: Fall.

CMFT 6170 - Family Issues: Addiction and Trauma (3 Credits)
This is a family studies course that is both didactic and experiential. It is designed to assist you to become more informed about addiction, trauma and other contemporary family issues that affect beginning practitioners, their clients, and society.
Prereq: CMFT 5150, CMFT 5151, and CMFT 6180. Max hours: 3 Credits.
Grading Basis: Letter Grade
PreReq: CMFT 5150, CMFT 5151, CMFT 6180. Typically Offered: Spring.
CMFT 6180 - Family Issues: Multicultural Intersectional Systems through the Lifespan (3 Credits)
This is a family studies course designed to assist you to become more informed about multicultural and social justice issues that affect you, your clients, and families in society. The course addresses multicultural theories and critical consciousness such as decolonization theories, liberation theories, and intersection family life cycle. Restriction: Restricted to CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to CAFT majors within the School of Education and Human Development.
Culturally and Linguistically Diverse Education

Office: Lawrence Street Center, 701
Telephone: 303-315-6300
E-mail: academicianservices@ucdenver.edu

Overview

The Culturally and Linguistically Diverse Education (CLDE) program helps teachers enhance their skills and credentials to support diverse languages, cultures, and abilities in the elementary and secondary classroom. Teachers who work in CLDE programs or in other content areas (such as art, language arts, math, music, science, social studies or technology), and who wish to integrate CLDE principles and strategies into their instruction for their multilingual learners, will find the MA program relevant to their interests and goals. It provides a foundation in supporting bilingualism and teaching English as an additional language to multilingual learners in a variety of contexts in the United States.

Graduates are prepared to become leaders to serve and advocate for multilingual learners in K-12 classrooms. The CLDE program at CU Denver emphasizes a socio-cultural approach to issues of language and learning, acknowledging the legitimacy of linguistic and cultural differences, and recognizing that academic settings represent important socializing forces in students' lives. We emphasize the "whole learner" in our teaching and in teacher education, understanding that individuals do not merely add a language to their repertoire of communication but make fundamental identity adjustments as they progress in their studies.

Course work includes the topics of language, literacy, second language acquisition, bilingualism; history, law and politics around immigration and racism; race, culture, identity and community; and culturally and linguistically sustaining pedagogies and assessment for bilingual children in K-12 schools.

This program has been developed as an advanced course of study for practicing teachers or individuals with some teaching experience. Applicants who need initial licensure to teach in U.S. K-12 public school settings, should inquire about the following programs:

- Culturally and Linguistically Diverse Education, MA (p. 550)
- Culturally and Linguistically Diverse Education MA with K-12 Endorsement (p. 551)
- Culturally and Linguistically Diverse Education MA with K-12 Endorsement & Bilingual Education Specialist Endorsement (p. 552)
- Culturally and Linguistically Diverse Education, MA with Bilingual Education Specialist Endorsement (p. 553)
- Culturally and Linguistically Diverse Education Endorsement: K-12 (p. 554)
- Culturally and Linguistically Diverse Bilingual Education Specialist Endorsement (p. 555)
- Teaching for Cultural and Linguistic Diversity (TCLD) Certificate (p. 556)

Culturally and Linguistically Diverse Education (CLDE)

CLDE 5010 - Foundations of Language & Culture in Education (3 Credits)

Designed for veteran and novice teachers to gain an understanding of schooling and language education. Participants examine key social theories based on the writings of important scholars in the field, on topics such as the politics of race, schooling, language, and cultural identity. Max hours: 3 Credits. Grading Basis: Letter Grade

CLDE 5020 - Responsive Classroom Communities (3 Credits)

This course investigates how people learn and the implications of social and cultural learning for establishing engaging and culturally responsive learning communities. Through this course teacher candidates will better understand their roles in student learning and how their own cultural lenses impact their relationships with students and families, and influence student success in the classroom. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with CLDE 4020. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.
CLDE 5030 - Language Development of Multilingual Learners: Advanced (3 Credits)
This course offers a deep investigation of the relationship between language and literacy acquisition. In the context of first and second language development across the lifespan, the course focuses on bilingual and second language development, and on the acquisition of literacy by young children. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5032 - English Linguistic Foundations for SLA & TESOL (3 Credits)
Investigates Second Language Acquisition (SLA) theories and new developments in the field relevant to adult learners of English, factors that influence outcomes, and key structures in English grammar and pronunciation. Lab time with ESL learners involves teaching listening/speaking and applying grammar in writing. Max hour: 3 Credits.
Grading Basis: Letter Grade

CLDE 5035 - Connecting Multilingual Theories to Practice (3 Credits)
This course supports students in synthesizing research and theory on learning and multilingual development, and identifying their own theoretical orientation in the field. There is a specific emphasis on connecting classroom practice to their theoretical stance. Prereq: CLDE 5010, CLDE 5160, CLDE 5050, CLDE 5070, CLDE 5820, and CLDE 5825. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CLDE 5010, 5160, 5050, 5070, 5820, and 5825.

CLDE 5040 - Social Justice Liberation: A Rehearsal for the Revolution (3 Credits)
We will explore TO and CRT. Students will engage in class discussions, theatre workshops, and critically analyze the applicability of these concepts to education and community work through deep and thorough engagement of readings, TO activities, and discussions about school and community activism with peers and the greater community. Cross-listed with CLDE 7040. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5042 - Techniques for Teaching Adult ESL (3 Credits)
This course provides principles of language assessment and progress monitoring strategies for teachers of adult ESL learners to help inform their practices and decisions related to appropriate instruction and placement of, and programming for, learners. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5050 - Assessment & Advocacy for Multilingual Learners (3 Credits)
Students learn to gather and use assessment results within a strengths-based framework to advocate for appropriate programming, placement, instruction, and ongoing progress monitoring of multilingual students. Special attention is paid to linguistic and cultural bias in the field of assessment. Cross-listed with SPED 5050. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5070 - Linguistic Analysis of English (3 Credits)
A descriptive linguistic approach to English grammar with a functionalist view of language and discourse processing. The course examines the historical evolution of English from its origins and the impact this has had on its grammar and syntax. A critical applied linguistic perspective is included focusing on language variation and status. Provides a framework for understanding, identifying and describing the major features of English (in particular) and language (in general). Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5140 - Language, Culture & Educational Equity (3 Credits)
Develops an understanding of the pluralistic and intersectional nature of U.S. society (race, class, gender, sexuality, language, migration status), and the role of the school within this social context. Examines the legal and cultural history of language education in Colorado and the U.S. as well as the impact of changing demographics on schools. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5160 - History & Law of Bilingual & Immigrant Education (3 Credits)
This course includes an overview of U.S. and Colorado history and legislation related to bilingual education and second language education, as well as current and historical immigration issues as they impact students, families, communities, schools, and educators. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5190 - Culturally Responsive Pedagogy and Practices (3 Credits)
This course focuses on developing practical tools for culturally responsive, inclusive instructional strategies, classroom management and curriculum and lesson planning. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5680 - Spanish for Educators (3 Credits)
This course is designed to help teacher candidates advance their Spanish skills. Teacher candidates will clarify their motivations and purposes for studying Spanish and gain a greater understanding of language assessments and of their own Spanish abilities and increase insight and empathy for emergent bilingual students. Cross-listed with CLDE 3680. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5700 - Social Studies for Multilingual Learners (3 Credits)
Participants will use a social justice lens to investigate the content and language demands of the four disciplines of social studies: History, Civics, Geography and Economics. This class focuses on Social Studies methods as well as essential practices for teaching multilingual students. Cross-listed with CLDE 4700. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5780 - Language Variation & Implications for Teaching (3 Credits)
Provides an introduction to the field of educational sociolinguistics and research of classroom discourse. Students are introduced to the collection and analysis of oral and written language in educational contexts. Basic concepts and key issues regarding the form-function relationships of language use in instructional settings are discussed. Cross-listed with CLDE 7800. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5810 - Literacy for Bilingual Learners offered for Student Teacher Residency (STR) (3 Credits)
This course, for residents in the STR program, highlights the best practices for language and literacy development for culturally and linguistically diverse learners, including bilinguals, multilinguals, and speakers of non-standard varieties of English. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5820 - Teaching Multilingual Learners, Advanced (3 Credits)
This course focuses on the hands-on practical application of methods and techniques that support language, academic and identity development for bilingual learners. Course work includes critical perspectives on teaching techniques, investigations into the research on teaching techniques in multilingual education, as well as an emphasis on teachers taking leadership in the field of CLDE. Max hours: 3 Credits.
Grading Basis: Letter Grade
CLDE 5824 - Theories and Methods of Bilingual Education (3 Credits)
Taught in Spanish, this course explores theories and methods of effective instruction of Spanish-English bilingual children. The course addresses theories of bilingualism and bilingual language/literacy development as well as methods for teaching in bilingual classrooms. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5825 - Methods of Content Teaching for Bilingual Learners (3 Credits)
Provides an in-depth study of curriculum options for learners developing English in schools. Participants examine and apply strategies and materials for developing linguistic and academic capabilities of language learners, with optional extensions for bilingual program educators. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5827 - Developing Content Teaching Methods for Bilingual Learners through PLC (3 Credits)
Through this flexible start course, students will synthesize the professional development work done through district offered e-workshops, and relate it to the literature on best practices for culturally and linguistically diverse classrooms. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5828 - Practitioner Inquiry into the Role of Language in Teaching (3 Credits)
Participants will synthesize work done through e-workshops, and connect this practical professional development work to important scholarship in the broader field of education research, examining role of language, culture, and identity in teaching and learning. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5835 - Special Topics: Culturally and Linguistically Diverse Education (0.5-3 Credits)
Advanced study of special topics that examine multilingualism, cultural pluralism, and community in Culturally and Linguistically Diverse Education. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade

CLDE 5840 - Independent Study: CLDE (1-4 Credits)
Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade

CLDE 5850 - Culminating Experience: Bilingual Specialist (1 Credit)
In this capstone, students compose a 3-5 minute video, plus provide artifacts from teaching and coursework with explanations of how these artifacts show mastery of CDE Standards 8.23 for Bilingual Education Specialist competencies. Prereq: Completion of CLDE endorsement AND 9 units in Bilingual Specialist pathway CLDE 5824, SPAN 5020, SPAN 5060, SPAN 5076, SPAN 5080, SPAN 5099, and 5980. Max hours: 1 Credit.
Grading Basis: Satisfactory/Unsatisfactory
Prereq: Completion of CLDE endorsement (CLDE 5010, CLDE 5160, CLDE 5070, CLDE 5030, CLDE 5820, CLDE 5050, CLDE 5825, CLDE 6912) AND 9 units in Bilingual Specialist pathway (CLDE 5824, SPAN 5020, SPAN 5060, SPAN 5076, SPAN 5080, SPAN 5099, and 5980).

CLDE 5910 - Leadership Practicum in CLDE (3 Credits)
This practicum course grants credit for field significant experiences, connected to the program of study and the Colorado standards for endorsement. Teachers who can engage in, synthesize, and reflect on these experiences are eligible for this course credit. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory

CLDE 5920 - Immigration through Children’s Literature (3 Credits)
This class explores themes of immigration and multilingualism by examining children’s and young adult literature. Combines techniques for teaching literacy in multilingual environments with foundational themes in the study of immigration and multilingualism. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5935 - Immigration through Children’s Literature (3 Credits)
This course operates from three distinct disciplinary perspectives: urban planning (community and schools), education (quality teaching), and public policy (accountability). Students explore important factors related to improving K-12 student outcomes: resources, leadership, teaching and parent/community involvement from three disciplinary perspectives. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 6910 - Leadership Practicum in CLDE (3 Credits)
This practicum course grants credit for field significant experiences, connected to the program of study and the Colorado standards for endorsement. Teachers who can engage in, synthesize, and reflect on these experiences are eligible for this course credit. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory

CLDE 6912 - Teacher Inquiry in Multilingual Classrooms (3 Credits)
This seminar provides opportunities for advanced students in the M.A. program to apply an inquiry lens to the concepts of CLDE. Students design an inquiry project, where they focus on a problem of practice, create an action research question, collect student work as data, and analyze findings and results. Students work in research teams, providing feedback and observing each other’s classrooms. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 6950 - Master’s Thesis (4 Credits)
This class provides the opportunity for CLDE MA students to complete a Masters’ thesis in place of the CLDE Culminating Experience. This class is open to students with advisor support and approval. Max hours: 4 credits
Grading Basis: Letter Grade
Additional Information: Report as Full Time.

CLDE 7040 - Social Justice Liberation: A Rehearsal for the Revolution (3 Credits)
We will explore TO and CRT. Students will engage in class discussions, theatre workshops, and critically analyze the applicability of these concepts to education and community work through deep and thorough engagement of readings, TO activities, and discussions about school and community activism with peers and the greater community. Cross-listed with CLDE 5040. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7090 - Research Seminar (3 Credits)
An advanced course which focuses on specific issues in language, language acquisition and language teaching. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7210 - Introduction to Leadership for Latin@ Learners (1 Credit)
In this introductory module, students will move beyond typical discussions of leadership that are neutral with regards to the students and families being served to one that puts linguistic and cultural diversity at the center of the discussion. Students will first survey the current state of Latin@s in education and communities from a local and national perspective. We will then co-construct a set of broad questions and examine theoretical frameworks that set the stage for the remaining courses in the program. Max hours: 1 Credit.
Grading Basis: Letter Grade
CLDE 7220 - Legal And Policy Foundations For Latin@ Students (2 Credits)
This course is a comprehensive survey of the highlights and lowlights of federal, state, and local history, legislation and policy regarding the education and rights to education and language for Latin@ students. The readings and discussion are around various ideologies, philosophies, and theoretical underpinnings of education. In this class you will develop skills in critical consideration of the rights of all in US society and the responsibilities of the public institution of schools. As the performance assessment for this course you will have an opportunity to focus on a Colorado school district, community or community organization of your choosing. You will outline history, legislation, and policy for that site. Max hours: 2 Credits.
Grading Basis: Letter Grade

CLDE 7230 - Language and Literacy in Bilingual Learners (3 Credits)
This course focuses on first and second language acquisition, and its impact on literacy in young children, elementary and secondary students, and students with special needs. Topics are literacy and language development, assessment, culturally responsive teaching, and school reform policies. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7250 - Systems, Policy, and Advocacy in Latin@ Communities (2 Credits)
This hybrid, 2-credit module introduces participants to methods of policy research and analysis across levels (federal, state, local) and the historical contexts behind key policies. Participants apply studied forms of policy analysis to investigate and engage with policies affecting their communities. Max hours: 2 Credits.
Grading Basis: Letter Grade

CLDE 7260 - Synthesizing Research in Latin@ Learners and Community (1 Credit)
In this final module, students will revisit the theoretical frameworks and research questions they have examined throughout their coursework and: a) identify a problem of practice and research questions they wish to explore in greater depth; b) identify theoretical framework(s) that will guide your research; and, d) develop a comprehensive literature review. Max hours: 1 Credit.
Grading Basis: Letter Grade

CLDE 7310 - Critical Race Theory: History, Theory, and Application (3 Credits)
Students will gain knowledge of Critical Race Theory and its early origins. Key themes to be explored include interest convergence, intersectionality, revisionist history, critiques of Liberalism, and critiques of CRT. Students also explore methodological issues and the potential applicability of CRT to their own research. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7320 - (Re)Claiming Dominant Narratives: History, Education, & Activism in Latinx (3 Credits)
Students will review a condensed history of Latinx peoples in America. Working with civil rights activists, scholars, and local community members, students will utilize decolonized methodologies to conduct a community story preservation project to reclaim the dominant narrative of local movements. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7330 - Languages and Literacies in Latinx Communities (3 Credits)
This course considers language and literacy from a critical sociocultural perspective and examines the impacts of language and literacy policies in the lives of Latinx communities in the U.S. The topics covered include language policies and ideologies, language as a colonial concept, bilingualism, translanguaging, bliteracy, and assessment. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

CLDE 7410 - Communication & Control: Systemic Change (3 Credits)
Examines educational settings — classrooms, schools, school districts, corporate and clinical settings, church basements and community centers — as systems, and explores strategies for change. Participants draw on interdisciplinary perspectives of individual and group behavior as they develop personal theories of change and apply these to their own situations. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7713 - Introduction to Language Policy (3 Credits)
The legal, ideological, and historic foundations of language policies are examined. Also examined are connections with related topics such as language rights, language and power, and issues from the sociology of language, such as language loyalty. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7800 - Language Variation & Implications for Teaching (3 Credits)
Provides an introduction to the field of educational sociolinguistics and research of classroom discourse. Students are introduced to the collection and analysis of oral and written language in educational contexts. Basic concepts and key issues regarding the form-function relationships of language use in instructional settings are discussed. Cross-listed with CLDE 5800. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7840 - Independent Study: CLDE (1-4 Credits)
Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.
Culturally and Linguistically Diverse Education, MA

Introduction
The MA in Culturally and Linguistically Diverse Education (CLDE) is a 30 credit hour program that provides students with the opportunity to personalize coursework to your specific needs as a professional educator. Students take the required concentration core courses (9 credit hours). Then, in consultation and with approval from your faculty advisor, students select five courses from the Thematic Course Categories list to customize their learning (15 credit hours). Finally, students take the required research course (3 credit hours) and then complete a Capstone course (3 credit hours), for a total of 30 credits. A current teaching license is not required.

Candidates who complete the MA in CLDE will leave their programs with greater understandings of crucial ideas and skills for working with CLDE students, including:

- Asset-based dispositions toward bilingual students, their linguistic practices, their families, and their communities
- Theories of language, bilingualism, and second language acquisition and their application to the classroom
- Practices that support access to rigorous content for bilingual students, to improve assessment, to enhance language and literacy development for bilingual students, and to leverage students’ bilingualism in teaching.

Program Requirements
The Customizable degree plan does not include a license or an endorsement.

Research Course
CLDE 6912  Teacher Inquiry in Multilingual Classrooms  3

Capstone Course
CLDE 5035  Connecting Multilingual Theories to Practice  3

Total Hours 30

Culminating Experience: Final Reflection
The Culminating Experience: Final Reflection is submitted at the end of your MA course of study as part of the capstone course, CLDE 5035 Connecting Multilingual Theories to Practice. The Culminating Experience is an electronic portfolio, where you show proficiency in meeting the TESOL and CDE standards by displaying and reflecting upon work that you have completed throughout the CLDE program.

Program Requirements and Courses
To complete the CLDE program and earn a master’s degree students must complete the appropriate course work as outlined in the tables. All courses require a grade of B- or better to count to the MA and a 3.0 minimum GPA is required for graduation. If necessary, courses may be retaken for a better grade.

Course Scheduling
During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including face-to-face, hybrid, or online classes. In the summer semester, eight-week sessions are offered, and courses may be in the morning, afternoon or evening, hybrid, or online.

Planning
For practicing full-time teachers, we recommend taking one - two courses each fall and spring semester and up to two courses each summer. Some courses are offered only once per year.

Active Status
Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
Culturally and Linguistically Diverse Education MA with K-12 Endorsement

Introduction
Candidates who complete the Culturally and Linguistically Diverse Education (CLDE) MA with the CLDE K-12 endorsement will leave their programs with greater understandings of crucial ideas and skills for working with CLDE students, including:

- Asset-based dispositions toward bilingual students, their linguistic practices, their families, and their communities
- Critically informed perspectives on the history, laws, and social forces shaping the education of bilingual students in Colorado and in the United States
- Linguistic analysis of English and other languages, including Spanish
- Theories of language, bilingualism, and second language acquisition and their application to the K-12 classroom
- Practices that support access to rigorous content for bilingual students, to improve assessment, to enhance language and literacy development for bilingual students, and to leverage students’ bilingualism in teaching.

Recommendations for endorsements are made by the CLDE Program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (https://www.cde.state.co.us/cdeprof/licensure_authorization_landing/) (CDE) or another state in which they wish to be endorsed for the most updated endorsement requirements.

Culturally and Linguistically Diverse Education, MA with K-12 Endorsement & Bilingual Education Specialist Endorsement

Introduction
Candidates who complete the MA in Culturally and Linguistically Diverse Education (CLDE) and Bilingual Education Specialist (BES) endorsements will leave their program with greater understandings of crucial ideas and skills, including:

- Asset-based, positive dispositions toward bilingual students, their linguistic practices, their families, and their communities
- Critically informed perspectives on the history, laws, and social forces shaping the education of bilingual students in Colorado
- Linguistic analysis of English and Spanish
- Theories of language, bilingualism, and biliteracy development
- Practices to support access to rigorous content for bilingual students, to improve assessment and its application to instruction for bilingual students, and to leverage students’ bilingualism in teaching.

Recommendations for endorsements are made by the CLDE Program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (https://www.cde.state.co.us/cdeprof/endorsementrequirements/) (CDE) or another state in which they wish to be endorsed for the most updated endorsement requirements.

Per CDE requirements, the Bilingual Education Specialist Endorsement must be obtained after or in conjunction with the Endorsement in Culturally and Linguistically Diverse Education (CLDE). Students can concurrently complete the CLDE MA with both the CLDE and BES endorsements.

Culminating Experience: Final Reflection
The Culminating Experience: Final Reflection is submitted at the end of your MA course of study as part of the capstone course, CLDE 5035 Connecting Multilingual Theories to Practice. The Culminating Experience is an electronic portfolio, where you show proficiency in meeting the TESOL and CDE standards by displaying and reflecting upon work that you have completed throughout the CLDE program.

Course Requirements and Courses
To complete the CLDE MA with Bilingual endorsement students must complete the appropriate course work as outlined in the tables. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation. If necessary, courses may be retaken for a better grade.

Course Scheduling
Because some classes are scheduled through the Modern Languages Department (Spanish), students should work with their Faculty Advisor about course selection and scheduling.

Planning
For practicing full-time teachers, we recommend taking one to two courses each fall and spring semester and up to two courses each summer. Some courses are offered only once per year.

Active Status
Students must complete their programs within seven years, maintaining a GPA of 3.0. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
Introduction

Applicants to the MA with the Bilingual Education Specialist (BES) endorsement should be bilingual and biliterate in Spanish and English; Bilingual Specialist Endorsement courses will be taught bilingually. Candidates who complete the MA in Culturally and Linguistically Diverse Education (CLDE) with BES endorsement will leave their program with greater understandings of crucial ideas and skills, including:

- Asset-based, positive dispositions toward bilingual students, their linguistic practices, their families, and their communities
- Critically informed perspectives on the history, laws, and social forces shaping the education of bilingual students in Colorado
- Linguistic analysis of English and Spanish
- Theories of language, bilingualism, and biliteracy development
- Practices to support access to rigorous content for bilingual students, to improve assessment and its application to instruction for bilingual students, and to leverage students’ bilingualism in teaching.

Recommendations for endorsements are made by the CLDE Program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (https://www.cde.state.co.us/cdeprof/endorsementrequirements/) (CDE) or another state in which they wish to be endorsed for the most updated endorsement requirements.

Per CDE requirements, the Bilingual Education Specialist Endorsement must be obtained after or in conjunction with the Endorsement in Culturally and Linguistically Diverse Education (CLDE). Students can concurrently complete the CLDE MA with both the CLDE and BES endorsements.

Note for Elementary education BAMA students: your teacher licensure MA classes count as electives for this option.

Research Course

CLDE 6912 Teacher Inquiry in Multilingual Classrooms 3

Capstone

CLDE 5035 Connecting Multilingual Theories to Practice (Capstone to be written in Spanish for BES endorsement) 3

Total Hours 30

Program Requirements and Courses

To complete the CLDE program and earn a master’s degree with endorsement(s), students must complete the appropriate course work as outlined in the tables. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation. If necessary, courses may be retaken for a better grade.

Course Scheduling

During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, eight-week sessions are offered, and courses may be in the morning, afternoon or evening, hybrid, or online.

Planning

For practicing full-time teachers, we recommend taking one to two courses each fall and spring semester and up to two courses each summer. Some courses are offered only once per year.

Active Status

Students must complete their programs within seven years, maintaining a GPA of 3.0. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
Culturally and Linguistically Diverse Education Endorsement: K-12

Introduction

Teachers who seek to earn the stand-alone Culturally and Linguistically Diverse Education (CLDE) endorsement need to already have a Colorado K-12 teaching license. Candidates who complete 24-credit CLDE K-12 endorsement will leave their programs with greater understandings of crucial ideas and skills for working with CLDE students, including:

- Asset-based dispositions toward bilingual students, their linguistic practices, their families, and their communities
- Linguistic analysis of English and other languages, including Spanish
- Theories of language and second language acquisition and their application to the K-12 classroom
- Practices that support access to rigorous content for bilingual students, to improve assessment, to enhance language and literacy development for bilingual students, and to leverage students’ bilingualism in teaching.

Recommendations for endorsements are made by the CLDE program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (https://www.cde.state.co.us/cdeprof/endorsementrequirements/) (CDE) or another state in which they wish to be endorsed for the most updated endorsement requirements.

All courses may be applied directly toward a full master’s degree in CLDE. Additional courses and applications are required for the master’s degree. For additional information about the master’s degree, please contact academicservices@ucdenver.edu.

Program Requirements

This course plan does NOT lead to MA degree.

Program Requirements and Courses

To complete the CLDE program and earn an endorsement students must complete the appropriate course work as outlined in the tables. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation. If necessary, courses may be retaken for a better grade.
Culturally and Linguistically Diverse Bilingual Education Specialist Endorsement

Introduction

The stand-alone Bilingual Education Specialist Endorsement (BES) must be taken after or concurrent with the 24 credit hour CLDE K-12 Endorsement. Applicants to this endorsement should be bilingual and biliterate in Spanish and English; Bilingual Education Specialist Endorsement courses will be taught bilingually.

Candidates who complete the BES K-12 endorsement will leave the program(s) with greater understandings of crucial ideas and skills, including:

- Asset-based, positive dispositions toward bilingual students, their linguistic practices, their families, and their communities
- Critically informed perspectives on the history, laws, and social forces shaping the education of bilingual students in Colorado
- Linguistic analysis of English and Spanish
- Theories of language, bilingualism, and biliteracy development
- Practices to support access to rigorous content for bilingual students, to improve assessment and its application to instruction for bilingual students, and to leverage students’ bilingualism in teaching.

Recommendations for endorsements are made by the CLDE Program, but endorsement is granted by the State of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (https://www.cde.state.co.us/cdeprof/endorsementrequirements/)(CDE) or another state in which they wish to be endorsed for the most updated endorsement requirements.

All courses may be applied directly toward a full master’s degree in CLDE. Additional courses and applications are required for the master’s degree. For additional information about the master’s degree, please contact academicservices@ucdenver.edu.

Total Hours: 9

Program Requirements and Courses

To complete the Bilingual endorsement students must complete the appropriate course work as outlined in the tables. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation. If necessary, courses may be retaken for a better grade.

Course Scheduling

Because classes are scheduled through the Modern Languages Department (Spanish), students should work with their Faculty Advisor about course selection and scheduling.

Planning

For practicing full-time teachers, we recommend taking one course each fall and spring semester and up to two courses each summer. Some courses are offered only once per year.

Active Status

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
Teaching for Cultural and Linguistic Diversity (TCLD) Certificate

Introduction
The Teaching for Cultural and Linguistic Diversity (TCLD) Certificate is a graduate certificate providing a foundation in teaching content and language to bilingual or multilingual students. The program is designed for secondary content-area teachers (math, science, social studies, language arts etc.) and elementary classroom teachers who have bilingual learners in their classes. This certificate is also valuable to those who find themselves in an English Language Development (ELD) role, are reading or literacy coaches, and/or administrators who provide support for teachers with bilingual learners. The certificate is appropriate for public school and community college personnel.

All courses may be applied directly toward a full master’s degree in CLDE while also fulfilling the requirements toward a Colorado Culturally and Linguistically Diverse Education Endorsement. Additional courses and applications are required for the master’s degree and/or endorsement. For additional information about the master’s degree or CLDE endorsement, please contact academicservices@ucdenver.edu.

Certificate Requirements
The certificate totals nine credits. All courses are three graduate credit hours and may be applied directly toward a full master’s degree in CLDE while also fulfilling the requirements toward a Colorado Culturally and Linguistically Diverse Education Endorsement. Additional courses and applications are required for the master’s degree and/or endorsement. Those pursuing the TCLD certificate must complete any three of the following courses:

Curriculum and Instruction

Office: 1380 Lawrence Street Center, 701
Telephone: 303-315-5001
E-mail: ASPIRE@ucdenver.edu

Overview
The schools in your community need your skills and experience to increase the number of effective teachers in your area. We prepare our candidates to collaborate effectively at all levels - with other teachers and learning specialists, parents, students, administrators, counselors, and community members - in order to facilitate the success of all students.

Aspire to Teach® preparation also includes application of content knowledge, theory, curriculum, assessment, and research as they flexibly and reflectively make decisions that support the success of diverse learners.

Ultimately, our goal is that all candidates—whether elementary teachers, secondary teachers or special educators—will be able to have a significant positive impact in diverse educational school settings and, as teacher leaders, will act with a sense of urgency to support equity in education for all children.

Programs
• Critical Pedagogy, MA (p. 558)

Faculty
The faculty of the Curriculum & Instruction MA works with educators to adopt a pedagogy that is holistic, experiential, relational and liberatory. Students examine the political nature of schooling and the systemic inequities (social, economic, gender, ethnocultural background, racial geography, etc.) that help create unequal education opportunities for a variety of learners. The program aims to introduce participants to an approach to teaching and learning that moves beyond transmission and mastery of content towards teaching/learning that promotes the practice of freedom, liberation, justice and community.

C&I faculty also emphasize the importance of teachers as scholars and reflective practitioners. To help you transition to this graduate student role, the program requires students to leverage the text, They Say / I Say: The Moves That Matter in Academic Writing, 3rd edition (authors: Graff and Birkenstein) prior to your first course in the program. The book prepares students for the program’s academic writing expectations. Graff and Birkenstein use a metaphor of academic writing as a conversation. Each chapter describes relevant argumentative moves, examples, and templates to assist you in integrating the language, ideas, and arguments of others into your writing. Students will find the text to be a quick read and an invaluable resource throughout the program.

Faculty Director:
Julia (https://education.ucdenver.edu/about-us/faculty-directory/Kantor-Julia-UCD6000039331/) Kantor, PhD, University of Colorado Boulder | Clinical Assistant Professor

Critical Pedagogy, MA

Introduction

Designed for alumni of the ASPIRE to Teach alternative licensure program, but open to all teachers, to earn an MA in curriculum and instruction with an emphasis in critical pedagogy. Graduates collaborate effectively at all levels—with other teachers and learning specialists, parents, students, administrators, counselors, and community members—to facilitate the success of all students.

As a graduate student, you will embark on a study of curriculum and instruction in P-12 contexts. This means that you will be thinking deeply about both classroom and school practices (your own and those of others) as well as the larger theoretical frameworks that influence educational policy and pedagogical design. You will have the opportunity to continue your development as an educator under the tutelage of the ASPIRE faculty and alongside other ASPIRE alum whom you met in your licensure work. Curriculum & Instruction faculty emphasize the importance of teachers as scholars and reflective practitioners.

A thread running through all courses of the MA program is that of Critical Pedagogy. As a stance towards teaching, learning and school systems, Critical Pedagogy recognizes the political nature of education and the systemic inequities (social, economic, gender, ethnocultural background, racial geography, etc.) that help create unequal educational opportunities for a variety of learners.

Total Hours 30

1 Focus area/Elective courses may be selected from more than one content area
2 Students who successfully complete the ASPIRE to Teach alternative licensure program are eligible to convert their ASPIRE work to the 9.0 credits of the Alternative Licensure Core by registering for the credit conversion sections. All other students are required to take an additional 9.0 elective/focus area credits.

Cumulative Portfolio

The MA portfolio counts as the comprehensive exam for the master’s degree. The portfolio is an accumulation of the performance-based assessment completed during the courses and reflects on the student’s development over the degree program.

Program Requirements and Courses

To complete the Curriculum & Instruction program and earn a master’s degree, students must complete the appropriate course work as outlined in the table above. All courses require a grade of B- or better to count towards the MA and a minimum 3.0 GPA is required for graduation.
Doctoral Studies in Education

Office: Lawrence Street Center, 701
Telephone: 303-315-6300
E-mail: education@ucdenver.edu
Website: https://education.ucdenver.edu/academics/doctoral (https://education.ucdenver.edu/academics/doctoral/)

Overview

Our EdD, PhD and PsyD programs strive to provide coursework, individual supervision and mentorship to produce scholars, researchers, leaders and innovators of the highest quality: research-savvy, methodologically sophisticated, and prepared for a lifetime of contributions to their field and profession. Explore the following exciting routes. Each leads to different potential career paths and supports different learning outcomes.

Programs

The School of Education & Human Development offers three doctoral programs:

• Education and Human Development, PhD (p. 560)
• Leadership for Educational Equity, EdD (p. 562)
• School Psychology, PsyD (p. 631)
Education and Human Development, PhD

Office: Lawrence Street Center, 701
Telephone: 303-315-6300
E-mail: education@ucdenver.edu
Website: https://education.ucdenver.edu/academics/doctoral

Introduction

The PhD in Education and Human Development links an intensive research-based course of study with a content area specialization to prepare candidates to assume faculty positions in institutions of higher education or research-based organizations. Successful applicants are paired with a faculty mentor who supports the student to engage in research, develop professional skills, and other professional activities.

This full-time program is designed for those whose aspirations are to join an academic faculty at an institution of higher education for a career in higher education teaching and research. Become an expert in the field’s research literatures, contemporary policy/practice issues and research methodologies of your chosen concentration area while working in close relationship with your faculty mentors. Earning a PhD in Education and Human Development will culminate in an original dissertation; your courses and experiences will prepare you to design and conduct a dissertation study.

- Participate in teaching and research experiences early and throughout your program
- Leverage opportunities to present, write and publish with your faculty to build your dossier
- Become involved with campus faculty governance

Overview of Course Work

Students complete a plan of study that includes at least 48 semester credits of coursework (including all required core courses) and 27 semester credits of dissertation. The PhD program provides each student with an induction into university research and teaching cultures. PhD coursework is intensive and substantive, requiring significant writing, analysis, and critique of theory and professional literature.

Doctoral students complete a series of courses and professional experiences in a specified concentration area. Concentration areas focus on a defined discipline or content area in preparation for professional roles as researchers and faculty members. Students also complete a research apprenticeship and higher education teaching practicum or equivalent experience. Students in Inclusive Early Childhood Education, Early Childhood Policy, and Family Science and Human Development concentrations take an alternate set of Foundation Courses.

Total Hours 30

Concentration Area - 18 credits

The PhD concentration include the following areas. Students will work with their faculty advisor to determine concentration area courses.

Leadership for Educational Organizations. Students and faculty in this concentration area focus on leadership in schools and the crucial assumption that school leadership makes a difference in how schools succeed in improving learning outcomes for all students. The scholarship and research on school leadership focuses on understanding why leadership is successful, what the interactions are between effective leadership and effective teaching, and how best to impact the collective impact of leadership on organizational and student-learning outcomes at all levels.

Inclusive Early Childhood Education. The goal of this concentration area is to introduce students to issues and practices in early childhood special education/early childhood education and prepare students to provide leadership to improve outcomes for all children including children with disabilities across early childhood settings. Students obtain the skills and knowledge of evidence-based practices needed to address state and national leadership needs within institutions of higher education to address issues in ECSE/ECE. Graduates conduct rigorous research related to culturally responsive, evidence-based practices; translate research into practice, thus expanding the use of evidence-based practice in the field; and, create, evaluate, and improve pre-service teacher education programs in ECE and ECSE.

Early Childhood Policy. The goal of this concentration is to prepare candidates to be leaders, policymakers, policy advisors and analysts, faculty members, and researchers who successfully shape, direct, implement, and evaluate early childhood services, infrastructure, and policy and contribute to the scholarly knowledge that undergirds the discipline. Graduates enter a growing and dynamic field with burgeoning research about the critical years in children’s brain development, learning, and health. This concentration holds institutional and system reform as its unit of change and equity in opportunity and outcomes as the purpose for change.

Family Science and Human Development. The goal of this concentration is to prepare students to critically examine and understand family science within an ecological life span development lens. This program prepares students to work in academic careers as researchers and scholars in Family Science and Human Development. Students are provided a rich curriculum that centers on theoretical and scholarly knowledge in family science, human development and research inquiry. Another objective of this program is to integrate the importance of family diversity (which includes race, ethnicity, culture, class, gender, sexual orientation, age, religion, ability and language) into the curriculum as it relates to social justice in family science and child, adolescent and adult development. Central to the Family Science and Human Development concentration is the conceptual framework of family and human ecological systems and how that framework impacts research,
practice and policy with diverse families in the United States and at the
global level.

**Math Education.** Students and faculty in this concentration area focus on
teacher learning and professional development experiences. Specifically,
projects investigate the ways that particular interventions used in
professional development for mathematics teachers impacts their
content knowledge and pedagogical practices in their classrooms.
Work in this area is framed by a situative perspective of learning and
incorporates mixed methods to answer questions around the ways
particular interventions support teacher and student learning. Video
data is prominent in both the design of professional development
interventions as well as a major data source for analyses. Analytic
methods vary based on the research question and grain size.

**Research and Evaluation Methods.** The goal of this concentration area is
to prepare students to design and carry out significant applied research
on individual and organizational change in the field of education and
human development. Through problem-based pedagogy and hands-on
learning, students will be prepared to be collaborative applied researchers
who work with community, university, and school partners. Students will
learn advanced quantitative, advanced qualitative, and mixed methods
research techniques. Course content includes mixed methods, advanced
statistics, advanced qualitative data analysis, systems analysis,
collaborative team research, and practicum experiences. Graduates of
the program are prepared to work as faculty members, school district and
organizational researchers, data analysts, and assessment coordinators.

**Science Education.** The goal of this area is to prepare students to explore,
understand, and think critically about the nature of science and science
education from a research-oriented perspective. Students may elect to
focus on environmental science education as an area of specialization
within this concentration area through electives and discipline-specific
research agendas.

**Critical Studies in Education.** This concentration area includes
faculty who approach their research and teaching in education with
a transdisciplinary and critical lens, especially with respects to race,
gender, class, disability, sexuality, language, and culture. Faculty members
ground their approach in social justice in education and promote the
ideas of educational equity, transformative education, and educational
activism in nontraditional ways. Particularly, how schooling, society,
and policies are dialectical sites of oppression and liberation; and
how the role of educator is that of intellectual activist to facilitate that
liberation. Because an activist approach is necessary, this concentration
area convenes a monthly research meeting where students and
faculty collaboratively work on research, publications, conference
presentations, and theory building. The faculty of Critical Studies in
Education approach education in critical ways to ensure the futurity of
a more transformational, liberatory, and humanizing educational system
and society.

**Dissertation - 27 Credits**

Doctoral students complete a series of courses/experiences in a
specified concentration area. Concentration areas focus on a defined
discipline or content area in preparation for professional roles as
researchers and faculty members. Students also complete a research
apprenticeship and higher education teaching practicum or equivalent
experience.

The following learning outcomes guide the PhD course and program
development.

Graduates of the PhD in Education & Human Development program are
able to do the following:

1. Apply theories of learning and development to understand
   fundamental questions involving education, communities, and/or
   families;
2. Identify and analyze an issue related to equity;
3. Apply a critical lens to interrogate existing research and theoretical
   perspectives;
4. Critically apply theories, methods, and knowledge to address
   questions in their primary field;
5. Demonstrate skills and knowledge at a level required for college and
   university teaching;
6. Plan and conduct research of significance; and
7. Demonstrate skills in oral and written communication sufficient to
   publish and present work in their field or prepare grant proposals.
Leadership for Educational Equity, EdD

Introduction

Students completing this program earn a Doctorate of Education (EdD) in the area of Leadership for Educational Equity.

The EdD program is a practice-based, doctoral-level program for professional leadership in PK-20 and community-based educational contexts. The EdD prepares leaders to address complex educational challenges, effectively translate research into practice, influence policy, use data in decision-making, and organize individuals and groups to address challenges collaboratively and successfully. The EdD program's equity focus equips educational leaders to recognize, identify, and eliminate those systems that create disparities, and improve policy, structures, and practices to ensure opportunities and participation for all individuals.

The EdD program uses a cohort model. Students in the EdD program select a concentration area and work with faculty mentors with expertise in the research and traditions of practice in the concentration area.

Students follow their cohort taking the prescribed coursework and research activities in a three-year plan of study. All students complete courses that are in-person, online, and hybrid with required attendance and activities. A five-year plan of study option is available for select students who obtain permission from the EdD program manager and concentration faculty.

Concentration Areas

Executive Leadership concentration is designed for professionals in leadership positions in educational, community, and non-profit organizations who wish to acquire learning and experiences related to personnel management, finance, accountability systems, evaluation, community relations, policy development, analysis, and research. This concentration supports learning activities for individuals who hold or seek to move into senior leadership positions within school districts, community colleges, education policy organizations, and community-based education organizations. Within this concentration are two options for professional licensure:

1. Administrative Leadership Program with option for Administrative Licensure from the Colorado Department of Education (CDE) or
2. Principal Licensure Program with option for Principal Licensure from CDE.

Early Childhood Special Education/Early Childhood Education concentration is designed for educational professionals interested in issues and practices in early childhood special education and early childhood education to improve outcomes for children with disabilities across early childhood settings. The concentration supports educators and administrators in districts, agencies, and programs to effectively improve outcomes of all children, including children with disabilities.

Latinx Schools and Communities concentration focuses on leadership, organizational change and measurement, research and evidence-informed decision-making, and creating equity and excellence in schools, organizations, and communities. Students study restructuring for linguistic diversity, language education policy and politics, and research on issues affecting Latino/a students and their communities. Together with their faculty mentors, students review current research and apply their leadership skills to create real world solutions for change.

Mathematics Education concentration provides learning opportunities for education professionals focused on teacher learning and professional development experiences. Faculty and students investigate how interventions used in professional development for mathematics teachers impact their content knowledge and pedagogical practices in their classrooms. The coursework uses a situated perspective of learning and incorporates mixed methods to address research questions about interventions that support teacher and student learning.

Professional Learning and Technology (PLT) concentration supports education professionals in PK-12, higher education, and organizational settings who design and implement professional development and learning activities. Applying principles of adult learning, instructional design, and change leadership, the faculty and students in PLT use a variety of methods to support professional growth and accountability (e.g., mentoring, coaching, site-based communities, e-learning resources, and workshops). The PLT concentration courses prepare students in leadership roles in professional learning programs at all levels to apply research and best practices.

Science Education concentration prepares educators to explore, understand, and think critically about the nature of science and science education from a research-oriented perspective. Students may elect to focus on environmental science education as an area of specialization within this concentration through electives and discipline-specific research agendas.

Urban and Diverse Communities concentration is designed for practitioners in PK-12, higher education, and community-based settings. Students develop a complex view of urban and diverse educational systems, opportunities, and challenges that are influenced by policies and practices in housing, healthcare, employment, urban development, and similar fields. Students develop the skills and dispositions to work alongside communities, while developing an understanding of the historical and cultural realities facing those communities.
EdD Program with Higher Education Concentration

Students completing this program earn a Doctorate of Education (EdD) in the area of Leadership for Educational Equity in the Higher Education Concentration Area. Within this concentration, all students complete 8-week online courses with required activities and in-person one-week intensives with required attendance/activities. This is a three year program (there is not a five year option for the Higher Education Concentration).

Students in the EdD program in the Higher Education concentration work with faculty mentors with expertise in the research and traditions of practice in a variety of post-secondary and higher education settings. The Higher Education concentration also provides a unique executive coaching support service (for a maximum of 12 months post-graduation) that students may choose to receive after completion of the EdD program.

Topics of study in the Higher Education concentration include leadership skills to improve access, equity, and success for college and university students; power and privilege; law and ethics; organizational cultures; finance and strategic resource allocations; and predictive analytics.

Course Work - 54 Semester Credits

The EdD in Higher Education concentration 54 credits include the following course work and research activities:

Overview

Early Childhood Education Program Pathways
The Early Childhood Education (ECE) program area offers a variety of graduate degree, licensure and certificate pathways for students. Each pathway is grounded in a shared commitment to inclusion, equity and social justice from birth through grade three. Deep and reciprocal community-engaged partnerships support relevant learning across a variety of contexts. Faculty bring seasoned experience with teaching practice, research design and community leadership that contributes to innovative and responsive courses where students thrive. Courses are available in a variety of formats to match your learning preferences and personal circumstances.

The ECE Program outcomes are:

• Early childhood professionals who demonstrate an understanding of the interdependent relationship between sociocultural and biological aspects of child growth and development, as well as individual developmental and learning differences between and among young children with and without disabilities.
• Early childhood professionals design and implement culturally, linguistically, developmentally appropriate curricula and create inclusive learning environments for young children. They implement a variety of evidence-based, culturally sustaining practices to individualize learning opportunities for children with diverse identities and sociocultural contexts.
• Early childhood professionals observe and document child development and learning of individual children within their families’ sociocultural context. Early childhood professionals select relevant tools and processes, including formal and informal assessments of development, learning, environments, and programs.
• Early childhood professionals know, use, and advocate for ethical guidelines and professional standards related to interactions with young children, families and other professionals within early childhood contexts.
• Early childhood professionals examine and plan their leadership and advocacy toward equitable, diverse and inclusive early childhood environments. They critically analyze theories, policies, research and practices to promote all children’s development, learning and well-being.
• Early childhood professionals appreciate and value the diverse assets of children’s sociocultural contexts including families and communities. They demonstrate respectful, responsive, and reciprocal relationships that inspire belonging among children, families and professionals.

ECE Program graduate students may select from the following program options:

Master’s Degrees in Early Childhood Education
• Early Childhood Education Personalized Professional MA. The Early Childhood Education (ECE) PPMA program leads to a master’s degree in early childhood education. The program prepares teachers and leaders who will enrich the life experiences of young children (ages birth to 8 years) and their families through a variety of professional roles. The personalized design of the program of study for each graduate student allows for specialization across diverse areas of focus within a variety of early learning contexts and communities of practice.

Licensure as an Early Childhood Special Education Specialist:
• Early Childhood Special Education Specialist Endorsement (available with or without MA)
• Early Childhood Special Education Initial Licensure (available with or without MA)

The licensure programs focus on building and supporting learning and development of all children across inclusive settings in the natural environments where they live, grow and learn. The program emphasizes family-centered practices, culturally sustaining teaching and is inspired by the potential of all children and families. Field experiences are a part of each course and provide an opportunity for each student to gain knowledge, abilities and dispositions while interacting with children, families, program staff and community agencies. Culminating practicum experiences are designed for students to apply knowledge and practice skills in a closely supervised environment. Upon successful completion of a licensure program, students may apply for either an added endorsement or initial license (depending on the program completed) from the Colorado Department of Education.

Early Childhood options through Continuing Education:
• Early Childhood Education MA through Boulder Journey School Partnership (https://education.ucdenver.edu/academics/reggio-emilia/boulder-journey-school-ecce-ma/) offers the study of innovation for children birth to age 8, at Boulder Journey School, inspired by the schools for young children in Reggio Emilia, Italy. Study quality multi-media examples of learning and teaching, engage in collaborative examination of documentation, and develop interpretations and new practices to innovate the field of Early Childhood Education. This is a fully online program.

Fieldwork and Practicum Requirements
Prior experience with young children is required for enrollment in the MA program. Prospective applicants who do not have field experience can apply for and, if accepted, start the ECE program while working (or volunteering) in a setting with young children. Prior to acceptance in the ECSE licensure program, prospective applicants must provide evidence documenting at least one year of field experience with young children with delays or disabilities.

For the MA in ECE plus the ECSE specialist initial license, a total of 800 hours of fieldwork/practica is required. Approximately 300 hours of fieldwork are associated with course assignments and ongoing field work with culminating practicum experiences occurring toward the end of the second year of study.

Programs
• Early Childhood Education Coaching Certificate (p. 570)
• Early Childhood Education, MA (p. 571)
• Early Childhood Education, MA Online Partnership with Boulder Journey School (p. 572)
• Early Childhood Education, MA Teacher Education Program Residency with Boulder Journey School (p. 573)
• Early Childhood Pedagogy Graduate Certificate (p. 574)
• Early Childhood Special Education Endorsement (p. 575)
• Early Childhood Special Education Initial Licensure (p. 577)
• Early Childhood Special Education Specialist Endorsement (p. 579)

Faculty
Associate Professors:
Cristina Gillanders (https://education.ucdenver.edu/about-us/faculty-directory/Gillanders-Cristina-UCD6000037553/), PhD, University of Illinois at Urbana-Champaign | Early Childhood Education
Elizabeth Steed (https://education.ucdenver.edu/about-us/faculty-directory/Steed-Elizabeth-UCD6000013469/), PhD, University of Oregon

Clinical Associate Professors:
Lori Ryan (https://education.ucdenver.edu/about-us/faculty-directory/Ryan-Lori-UCD6000013999/), PhD, State University of New York at Buffalo | Early Childhood Education

Assistant Professor:
Diana Schaack (https://education.ucdenver.edu/about-us/faculty-directory/Schaack-Diana-UCD6000066527/), PhD, Erickson Institute/ Loyola University Chicago | Learning, Developmental & Family Sciences

Clinical Assistant Professors:
Andrea Laser (https://education.ucdenver.edu/about-us/faculty-directory/Laser-Andrea-UCD6000063472/), EdD, University of Colorado Denver | Early Childhood Education

Early Childhood Education (ECED) Courses

ECED 5010 - Curriculum in Early Childhood Education (3 Credits)
Review of principles of early childhood curriculum and program development. Linkages are made between theoretical bases of development and curriculum planning. Curriculum areas considered include language and literacy, mathematics, motor, social-emotional, science, social studies and aesthetic development. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.

ECED 5040 - Administrative Seminar (3 Credits)
Emphasizes topics required of administrators to effectively lead and manage early childhood inclusive classrooms or other related programs including leadership capacity, professionalism, administration, teaming/collaboration, communities of practice, staff management, safety, and professional development. Cross-listed with ECED 4040. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.

ECED 5060 - Working with Families and Communities (3 Credits)
Theories, practices and research related to working with families and communities. Topics include: social systems perspective, family structures and forms; family support systems; family-centered practice; family/professional partnerships; effective communication; and working with parents of children with special needs. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.

ECED 5070 - Social Competence and Classroom Supports (3 Credits)
Focus on the practical application of intervention strategies based on current research and evidence-based practices. Cross-listed with ECED 7070. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5080 - Language and Literacy in Young Children (3 Credits)
Overview of theories and research in early language and literacy development. Emphasis on sociocultural beliefs and practices associated with the use of language and literacy in the different contexts. Information about language disorders found in early childhood settings is discussed. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.

ECED 5091 - Educators as Social Change Agents (3 Credits)
Focus on developing knowledge, skills and dispositions to advance equity and social justice in classrooms, programs, and communities to activate educators as social change agents and implement quality inclusive practices for young children from diverse backgrounds. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5102 - Introduction to Developmentally Appropriate Curriculum (1-3 Credits)
Introduces developmentally appropriate curriculum and instructional practices in early education and the elementary grades. Subject areas considered include literacy, language arts; mathematics, computers, blocks; science, outdoor education; social studies, thematic units; and art, drama, music, physical activity. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.

ECED 5104 - Advanced Developmentally Appropriate Curriculum (1-3 Credits)
Extends earlier learning about developmentally appropriate curriculum and instructional practices in early education and the elementary grades. Students elaborate their knowledge of subject area materials and activities. A curriculum unit that is developmentally appropriate is planned, implemented and evaluated. Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 4.

ECED 5110 - Advanced Infant and Toddler Development: (3 Credits)
Focuses on development of infants/toddlers to inform responsive caregiving practices. Develop observation skills to understand infant/toddler behavior. A relationship-based approach to curriculum is emphasized. State requirements for licensed infant/toddler programs, accreditation and quality standards are discussed. Max hours: 3 Credits.
Grading Basis: Letter Grade
ECED 5200 - Screening and Assessment of Young Children (3 Credits)
Provides knowledge and field-based experience in the administration and scoring of screening and assessment for infants, toddlers, and preschool children. Understand and administer a variety of formal and informal measures including screening, evaluation, play-based and curriculum-based assessments. Cross-listed with ECED 7500. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 5202 - Classroom Management to Promote Positive Behavior (3 Credits)
Evidence-based classroom management strategies to promote social competence and reduce behavior problems. Includes strategies for responding to challenging behavior and developing individualized behavior support plans. Explores factors that influence the lives of young children including family disruption, stress, violence and trauma. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 5210 - Overview of Infant Toddler Autism Services (3 Credits)
This course will provide students with a general introduction to the legal and procedural elements that characterize state-of-the-art services to infants and toddlers with ASD. The course will review the Federal mandate for services, principles of practice, and evidence-based teaching strategies for children with autism. Must be accepted into the Infant Toddler Autism Certificate Program. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5211 - Applied Treatment Delivery for Infants and Toddlers with ASD (3 Credits)
The course explores current treatment methods and philosophies for young children with Autism Spectrum Disorder (ASD). Common intervention approaches are reviewed, with discussion of the evidence base of each. Intervention goals covered address language, play/socialization, early adaptive skills, and positive behavior. Must be accepted into the Infant Toddler Autism Certificate Program. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5212 - Coaching for Families: Infants/Toddlers w/ Autism (3 Credits)
This course provides the knowledge and skills necessary to implement recommended, evidence-based practices with families of infants and toddlers with or at risk for ASD. The course will review current evidence based strategies for supporting families, collaborating with families, and using evidence-based family coaching strategies. Must be accepted into the Infant Toddler Autism Certificate Program Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5300 - Child Development: Theory to Leadership Practices (3 Credits)
This course will provide an introduction to theories of child development from an interdisciplinary perspective. It examines development in the cognitive and socioemotional domains utilizing biological, social, psychological and anthropological perspectives and how theory is used to shape program models. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5311 - Equity for Leadership in Early Childhood Programs (3 Credits)
This course is designed to provide early childhood leaders with an understanding of the equity issues present in early childhood systems and how these are reflected in individual identities and programs. Theories from the academic community will be used to facilitate student growth in understanding how these issues interact with them at a personal, professional and leadership level. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5312 - Leading Learning Organizations (3 Credits)
This course will deepen student's capacity to lead effectively and learn how to create an adaptive, flexible learning organization well positioned for delivering effective and sustainable programs and services on behalf of young children and families. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5320 - Community-Based Action Research: Capstone (3 Credits)
This course is designed to foster the leader's appreciation, skills, and practice as a participatory action researcher. Students will learn these concepts by leading a participatory action-research project in their community around a challenging early childhood issue and will present their action research project culminating at a Capstone Celebration. Prereq: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5330 - Introduction to Transformational Leadership (3 Credits)
This course outlines the evolution of leadership theory over the past half-century and immerses students in an exploration of the values, leadership capacities, and practices that define transformational leadership as they apply to effecting change to support the success and well-being of young children and their families and communities. Prereq: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5340 - Strategic Leadership & Current Issues in Early Child (2 Credits)
This course addresses current issues in research, theory, policy development, and administrative leadership of programs for all young children. Strategic Leadership anchors all decisions to a shared vision through the systematic evaluation and strategic planning for program or organization growth and service. Prereq: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 2 Credits.
Grading Basis: Letter Grade

ECED 5350 - Policy and Advocacy in Early Childhood (3 Credits)
This course provides the historical and political context of early care and education in the United States. Local, state and federal mandates, public laws, and legislative procedures and initiatives will be investigated. Prereq: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5410 - Coaching for Early Childhood Professionals: Foundations (3 Credits)
The Foundations course focuses on learning, understanding and using relationship and evidence-based coaching skills in early childhood settings. Students will practice the fundamentals of coaching using a systematic, individualized, reflective approach and sharing experiences with others in the course. Cross-listed with ECED 4410. Max hours: 3 Credits.
Grading Basis: Letter Grade
ECED 4200 - Coaching Early Childhood Professionals: Awareness (3 Credits)
The Awareness course focuses on increasing coaches’ skills at introspection, thoughtful planning, intentional application of coaching knowledge and skills, and continuous improvement. Students will integrate skills with effective application in class and real life coaching experiences, managing progress and accountability. Cross-listed with ECED 4420. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 4300 - Coaching for Early Childhood Professionals: Attuning (3 Credits)
The Attuning course will integrate skills from the Foundations and Awareness courses to complete the EC Coaching Certificate. Students practice refining and altering coaching based on needs and readiness. Students learn sustainable organizational change that embed coaching in all professional practice. Cross-listed with ECED 4430. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 4550 - Dual Language Learners Learning and Development (3 Credits)
The course will review current research on the learning and development of young dual language learners (birth through 8) and the classroom environments and instruction that can promote their learning. The course uses a socio-cultural framework to view children’s learning. Cross-listed with ECED 4650. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 4800 - Workshop: Topics in Early Childhood Education (1-4 Credits)
Topics and credit hours vary from semester to semester. Cross-listed with ECED 4800. Repeatable. Max hours:12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

ECED 4840 - Independent Study (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ECED 4850 - Capstone in Early Childhood Education (3 Credits)
Capstone is a final project that demonstrates your academic and professional development. It explains professionally who you are, where you have been, how you have developed in ECE. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 4930 - Internship III & Collaborative Learning Community (2-8 Credits)
ECED 4930 is the final internship in a series of three completed during the professional year of the ECE program plan that provides the necessary learning opportunities for candidates to gradually develop their practice to be licensed as an early childhood educator. Cross-listed with ECED 4933. Repeatable. Max hours: 8 credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

ECED 6010 - Literacy and Mathematics K-2 (3 Credits)
Principles of early reading and mathematical development for grades K-2 including diverse instructional strategies and differentiation for children with disabilities. Linkages are made between child development and learning expectations for mathematics, reading and writing and curriculum planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

ECED 6100 - Perspectives of Disability (3 Credits)
This course explores multiple perspectives of disability, including: legal definitions and protections, medical models, social construction of disability, cultural perspectives, and familial perspectives of d/Disability. The course emphasizes disability as defined under the IDEA, including features of categorical definitions of disability. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

ECED 6200 - Early Intervention Strategies (3 Credits)
Explores current research, knowledge, and skills related to evidence-based intervention strategies and service delivery in high quality inclusive settings for young children with special needs from infancy through age eight. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

ECED 6300 - Contextual Curriculum I (3 Credits)
This course focuses on the role of the teacher in developing a contextual curriculum that deeply engages learners. Developing curriculum includes observing learners, documenting observations using technology, and reflecting on documentation with colleagues to intentionally implement curriculum plans. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6310 - Contextual Curriculum II (3 Credits)
This course builds upon competencies developed in ECED 6300: Contextual Curriculum I through curriculum development that relies on the cyclical process of critical observation, documentation, analysis, reflection, and provocation. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6320 - A Colorado Interpretation of Reggio Emilia Approach (3 Credits)
This course focuses on the Reggio Approach to Early Childhood Education and its interpretation in a Colorado context, Boulder Journey School. Students will experience three modules, each with cycles of inquiry, construction of understandings, application into their own context and mediation by course instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6330 - Supportive Social Learning (3 Credits)
This course will provide students with the strategies that promote social competence and reduce the potential for interactions and behaviors that often challenge teachers. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6340 - Messing About with STEM (3 Credits)
This course focuses on the role of the teacher in supporting STEM experiences in diverse contexts. Students will draw from relevant research and philosophy of science, combined with inquiry-based experiences guided by established frameworks, to strengthen their STEM mindset. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6350 - Literacy and the Hundred Languages (3 Credits)
In-depth study of scientific and theoretical foundations of communication and literacy development, the conceptual paradigm of 100 languages of children, the nature of languages, and acquisition patterns in contexts of individual variation, cultural and linguistic differences, or language challenges. Max Hours: 3 Credits.
Grading Basis: Letter Grade
ECED 6360 - Children and Teachers as Change Agents (3 Credits)
This course focuses on partnering with children and other educators around a community-based action project that will contribute to the community. Students will review literature and documentation, collaborate, design, lead, and advocate around a topic that relates to young children. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6690 - Seminar: Research and Current Issues in Early Childhood Education (3 Credits)
Research methods are reviewed and then selected topics are considered. Emphasis is on research findings and current issues of importance to teachers, administrators, specialists, collaborator/consultants, and researchers in early childhood and early childhood special education. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 6910 - Early Childhood Special Education Infancy Practicum (1-4 Credits)
Supervised field-based experiences in settings for children with disabilities and at-risk infants, toddlers, and their families. Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200

ECED 6911 - Initial Practicum and Field Experience in Early Childhood Education (1-4 Credits)
In this experience, you will be introduced to an array of skills/practices that support working effectively with young children and families in the context of their local community. You will work within the community to support children's academic/social development. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200

ECED 6912 - Early Childhood Special Education Preschool Practicum (1-4 Credits)
Supervised field-based experiences in settings for young children with disabilities and their families, including school districts and community agencies. Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200

ECED 6914 - Early Childhood Special Education Primary Practicum (1-4 Credits)
Supervised field-based experiences in kindergarten through second grade settings with typically developing children, children with special needs and special education teams. Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200

ECED 7000 - ECE Today: Examining Practices, Policies, & Key Issues (3 Credits)
This course provides in-depth understanding of the issues that shape contemporary early care and education in the U.S. The course addresses historical and contextual variables, providing a thorough overview of the pedagogy, practices, and policies framing the design and delivery of ECE. Cross-listed with EDUC 7000. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Edhd-Phd, Ldre-Edd, Edli-Phd and Spsy-Pyd majors within the School of Education and Human Development.

ECED 7002 - Early Childhood Leadership Seminar II (3 Credits)
The purpose of the course is to provide scholars with leadership knowledge and skills to implement policies, laws, programs, and systems that support the use of evidence-based practices with young children with disabilities. Restriction: Restricted to Edhd-Phd, Ldre-Edd and Edli-Phd majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Edhd-Phd, Ldre-Edd and Edli-Phd majors within the School of Education and Human Development.

ECED 7004 - Early Childhood Leadership Seminar III (3 Credits)
The purpose of this seminar is to provide the knowledge and skills to implement evidence-based practices in early childhood settings. This seminar will focus on policies and practices that support implementation, scale-up, and sustainability of evidence based practices in early childhood systems. Prereq: ECED 7002. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: Ecec 7002 Restriction: Restricted to Edhd-Phd, Ldre-Edd and Edli-Phd majors within the School of Education and Human Development.

ECED 7010 - History, Child Development, and Equity: Early Childhood (3 Credits)
This course critically considers the developmental science that informs policy and program development; the social, political and economic forces that shape the study of young children and contribute to trajectories that benefit some children while disadvantaging others; the changing roles of families; and implications of these issues for policy. Cross-listed with EDUC 7010. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 7011 - Proseminar I in Child, Youth, and Family Studies (1 Credit)
This course aims to introduce students in the Child, Youth, and Family Studies PhD pathway to doctoral studies and to faculty research. The course is also designed to support students in situating themselves in the discipline, enhancing their scholarly identity, and refining academic writing and presentation skills. Cross-listed with EDUC 7011 and HDFR 7010. Max hours: 1 Credit.
Grading Basis: Letter Grade

ECED 7020 - Proseminar II in Child, Youth, and Family Studies (1 Credit)
This course is for 2nd year students in the Child, Youth, and Family Studies PhD pathway. The course is designed to support students in developing a research agenda, exploring ethics in research, enhancing scholarly identity, and preparing for comprehensive examinations. Prereq: HDFR 7010 or ECED 7011 or EDUC 7011. Cross-listed with HDFR 7020 and EDUC 7020. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011.
ECED 7030 - ProSeminar III in Child, Youth, and Family Studies (1 Credit)
This course aims to provide third year doctoral students in the Child, Youth, and Family Studies PhD pathway with an immersive writing opportunity and professional development experience to help prepare for comprehensive examinations, the dissertation, and post graduate school life. Prereq: ProSem I and ProSem II (HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020). Cross-listed with EDUC 7030 and HDFR 7030. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 AND HDFR 7020 or ECED 7020 or EDUC 7020.

ECED 7040 - Advanced Studies in Applied Child Development (3 Credits)
Provides an intensive overview of the science of child development. A range of theoretical perspectives will be emphasized highlighting the role of context. Students will apply theory and research to programs that seek to advance equity in opportunities and outcomes. Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development. Cross-listed with HDFR 7040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development.
Typically Offered: Spring.

ECED 7070 - Social Competence and Classroom Supports (3 Credits)
Emphasizes prevention, positive behavioral interventions and support, and social/emotional development for children birth to eight. Focus on the practical application of intervention strategies based on current research and evidence-based practices. Cross-listed with ECED 5070. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 7200 - Advancing Equity and Inclusion in Early Childhood Education (3 Credits)
This doctoral course explores equity and inclusion issues in early childhood education, including historically marginalizing approaches, policies, and practices. Conceptual frameworks are examined for their usefulness in promoting positive change through socially just early childhood practices, policies, and research. Restriction: Restricted to all PhD majors, LDRE-EdD and SPSY-PsyD majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.
Typically Offered: Spring.

ECED 7500 - Screening and Assessment of Young Children (3 Credits)
Provides knowledge and field-based experience in the administration and scoring of screening and assessment for infants, toddlers, and preschool children. Understand and administer a variety of formal and informal measures including screening, evaluation, play-based and curriculum-based assessments. Cross-listed with ECED 5200. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

ECED 7830 - Special Topics in Early Childhood Education (1-3 Credits)
Study of special topics that examine community and educational settings in Early Childhood Education to be selected by the instructor. Max hours: 6 Credits.
Grading Basis: Letter Grade
Early Childhood Education Coaching Certificate

Introduction
Coaching has been shown to have a major influence on early childhood professional practice that, in turn, improves program quality and child growth outcomes in early childhood settings. Quality relationship-based teaching and learning is instrumental to positive early childhood experiences. The coach and coaching partner relationship focuses specifically on maximizing the human potential of professionals in the field.

This three-course certificate ([https://education.ucdenver.edu/academics/undergraduate/certificates/detail/graduate-certificate-in-early-childhood-education-coaching/](https://education.ucdenver.edu/academics/undergraduate/certificates/detail/graduate-certificate-in-early-childhood-education-coaching/)) will provide you with foundational coaching skills and practices, peer connections, reflection, self-awareness, and systems thinking. Strong coaching relationships will help you achieve positive results with coworkers, networks and children in your care. The unique cohort model used in this coaching certificate program inspires equity and inclusion as the group creates collective accountability in co-learning. Students have come from all over the U.S., representing a variety of cultures and languages. They work in public, private, federally/state-funded, tribal and regional early education programs.

This is the only university certificate in the U.S. that pairs the early childhood field with universal coaching strategies. It is uniquely designed to work seamlessly and in coordination with most early childhood curricular approaches and teaching practices.

Discover research-based strategies that support deepening your understanding of collaborative coaching and advance your ECE career. Learn to promote engaging and culturally supportive actions to make a difference in the lives of those in the early childhood community.

Program Requirements
This certificate totals 9 credit hours, three credit hours per course, in the specialty area of early childhood coaching. All courses can be taken at either an undergraduate or graduate level. Credit hours may be applied directly toward a full master's degree in Early Childhood Education. Additional courses and applications are required for the master's degree.

This online coaching certificate program provides the best of both worlds: a combination of online and synchronous learning. In addition to individual work that you will complete throughout the semester, each course meets virtually. Courses require fieldwork that can also be completed virtually. We strongly recommend that these courses be taken in sequence and that students commit to all three courses and to the full completion of the program. This program is unlike most courses, in that it is based on the cohort members’ individual and collective thinking and learning. Collective accountability and the relationship-based coaching approach is what makes the program dynamic and successful.
Early Childhood Education, MA

Introduction

The Early Childhood Education (ECE) program leads to a master's degree in early childhood education. The program prepares leaders who will enrich the life experience of young children (ages birth to 8 years) and their families through a variety of professional roles.

The ECE program focuses on building and supporting learning and development of all children across inclusive settings in the natural environments where they live, grow and learn. The program emphasizes family-centered practices, culturally sustaining teaching, and is inspired by the potential of all children and families. The program draws on university resources and the clinical expertise of various professionals and early childhood partners in the community. Field experiences are a part of each course and provide an opportunity for each student to gain knowledge, abilities and dispositions while interacting with children, families, program staff and community agencies. Fieldwork experiences are designed for students to apply knowledge and practice skills in a closely supervised learning environment.

The MA in ECE includes course content in:
- language and literacy development,
- child growth and development,
- teaching and learning approaches with young children,
- learning, development and education grounded in culture, context and identity of young children,
- research methods for education,
- early childhood curriculum and program development for culturally and linguistically diverse inclusive classrooms collaborative program development and supports for children with families and communities,
- leadership of programs and early childhood professionals for practice, advocacy and social change

Program Requirements

This program allows candidates to work closely with faculty advisors in specific course selection that is most relevant for them and their desired professional path, including courses outside the ECE program area. Course experiences and learning are facilitated to support the growth of each candidate toward professional competencies and outcomes for graduates of the program.

Capstone Requirement

The Early Childhood Education Capstone fulfills the COMPS requirement for MA students. The intent of the Capstone is to help candidates synthesize learning through a final project that speaks to academic and professional development in the ECE Program. The capstone should tell the story of what was learned, specific areas of interest, address ongoing barriers experienced in the field, and future professional plans. All ECE MA students must do a Capstone project, and register for the 3 credit Capstone class.

Program Requirements and Courses

To complete the Early Childhood Education program and earn a master's degree and/or license/endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

Course Scheduling

Courses are offered in various formats, including hybrid, remote or asynchronous online classes. During the fall and spring semesters, in-person courses are offered in the late afternoon and evening and meet for three hours, eight times over a 16-week semester. In the summer semester, eight week sessions are offered.

Planning

For practicing full-time educators, we recommend taking two courses each fall and spring semester, and up to two courses each summer. If you prefer a less intensive course load, we recommend one course each fall and spring semester. Please review your program plan with your faculty advisor.

Active Status

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four-six courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
Early Childhood Education, MA Online Partnership with Boulder Journey School

Introduction
An online MA in Early Childhood Education to study innovation for children birth to age 8, at Boulder Journey School, inspired by the schools for young children in Reggio Emilia, Italy. Study quality multi-media examples of learning and teaching, engage in collaborative examination of documentation, and develop interpretations and new practices to innovate the field of Early Childhood Education.

You will study the philosophy, foundational ideas and the contextualized practices from the infant toddler centers and preschools of Reggio Emilia, Italy. While exploring the Reggio Emilia Approach, you will make extensive connections between your own context and the Reggio-inspired work at Boulder Journey School, a school for young children and teacher education developed in partnership with the School of Education & Human Development at the University of Colorado Denver.

Program Delivery
• This is a fully online program

Program Requirements
This 30-credit program is designed so that students can work full-time while earning a Master’s degree in two years or less.

Early Childhood Education, MA
Teacher Education Program
Residency with Boulder Journey School

Introduction
The University of Colorado Denver and Boulder Journey School have partnered for 20 years to offer a residency master’s degree in Early Childhood Education. The Boulder Journey School Teacher Education Program includes a one-year paid teaching residency, a Colorado teaching license, director qualifications, and a trip to study in Reggio Emilia, Italy, all at a reduced tuition rate.

Program Requirements
The Residency program is a 30-credit program with 10 three-credit courses. All courses will be 8-week sessions. Fall and Spring Semesters are divided into two 8-week blocks. Please refer to the Plan of Study (p. 573) section for block information.

Early Childhood Pedagogy Graduate Certificate

Overview
This credit-bearing graduate certificate (https://education.ucdenver.edu/academics/reggio-emilia/ece-pedagogy-certificate/) offered by University of Colorado Denver’s School of Education & Human Development in partnership with Boulder Journey School cultivates student’s pedagogical understandings and practices. It supports the capacity to increase the quality of teaching and learning within early childhood programs. Students have the choice of selecting three of six online Reggio-inspired courses to complement their current competencies and experiences. They can choose to articulate their three courses into the 30 credit hour MA in Innovative ECE, also in partnership with Boulder Journey School.

Please Note: Because this is a practice-based certificate program, students are required to maintain a position in either a classroom or an ECE position where they have regular, consistent and ongoing engagement in a classroom within their context.

Students in the Early Childhood Pedagogy certificate program will:

1. Develop an understanding and articulate their personal and professional beliefs about the image of the child, family and teacher, and the teacher’s role in promoting the rights of children to quality teaching and learning.
2. Apply pedagogical and curricular practices with children and colleagues to deepen awareness and understanding of the complexities and opportunities within early childhood education.
3. Cultivate an intentional and inclusive practice of observation, documentation and assessment.
4. Engage across multiple pathways for deepening leadership actions around complex early childhood pedagogical issues and have advocate for opportunities for all young children.

Program Requirements
Prior to applying to the program, students will select three courses together with an advisor during an individual advising session.

All courses will be 8-week sessions. Fall and Spring semesters will be divided into two 8-week sessions.

Early Childhood Special Education Endorsement

Overview
The ELEVATE – ECSE added endorsement program at University of Colorado Denver is designed for experienced teachers holding a Colorado Early Childhood Education license and currently teaching in Colorado who seek to add the ECSE endorsement to their license. The program prepares educators to be leaders who will enrich the life experiences of young children (birth to eight years) with delays and disabilities and their families. It is a one-year (3 semester) added endorsement program with an option to complete the MA in Early Childhood Education.

Unique features of the ELEVATE ECSE added endorsement program include:

One-on-One Support
Students work directly with one instructor throughout the program, including monthly personalized check-ins. The instructor is your ally throughout the program, serving as your coach, mentor and trusted partner in your development as an ECSE educator.

Professional Learning Community
Students belong to a Professional Learning Community (PLC) that supports their continued development as an ECSE educator. The ELEVATE program operates fully online, including virtual PLC meetings.

Online Guided Explorations
The program curriculum is customized to match your experience and needs in the classroom. Each learning activity is linked directly to practice, focused on developing teacher effectiveness as an ECSE educator, and reviewed by your instructor, who provides written formative feedback.

Program Requirements
Classes are listed in order that they are completed as a cohort. Please note that there are specific eligibility requirements in order to be accepted into this program.

Total Hours 24

1 Course is eligible for prior learning credit

2 Up to one credit of practicum experience each semester is eligible for prior learning credit.

Fieldwork and Practicum Requirements
For the ECSE ELEVATE added endorsement, fieldwork/practica are typically required. This work is embedded each semester in practice-based experiences, and require an ongoing placement in an eligible worksite or volunteer placement. Students must pass required Praxis exams in the final semester of the program. These exams are required by the Colorado Department of Education for ECSE licensing. More information located here (https://www.cde.state.co.us/cdeprof/endorsementrequirements/).

Program Requirements and Courses
To complete the ECSE endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better to count towards the endorsement.

Course Scheduling
Courses are offered in hybrid format- including asynchronous online work and monthly PLC meetings and check in with the instructor/coach.

Planning
This program is offered in a cohort model, meaning that all students enrolled in the cohort take the same sequence of courses.

Active Status
If a student steps away/takes a break from the program, they must complete within seven years. Students enroll in 8 courses over fall, spring and summer semesters. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.

Plan of Study
Classes are listed in order that they are completed as a cohort. Please note that there are specific eligibility requirements in order to be accepted into this program.

Early Childhood Special Education Initial Licensure

Introduction
The early childhood special education (ECSE) program fulfills the Colorado Department of Education program requirements for a Colorado initial teacher license in ECSE. If you hold a current CO teaching license, information on adding an endorsement is available here (https://www.cde.state.co.us/cdeprof/endorsementrequirements/). This program prepares leaders who will enrich the life experience of young children (ages birth to 8 years) with disabilities and their families through a variety of professional roles.

The program focuses on building and supporting learning and development of all children across inclusive settings in the natural environments where they live, grow and learn. The program emphasizes family-centered practices, culturally sustaining teaching and is inspired by the potential of all children and families. It is interdisciplinary in focus, drawing on university resources and the clinical expertise of various community professionals. There is a strong emphasis on fieldwork and practicum experiences. Field experiences are a part of each course and provide an opportunity for each student to gain knowledge, abilities and dispositions while interacting with children, families, program staff and community agencies. Practicum experiences are designed to allow students to apply knowledge and practice skills in a closely supervised environment.

The early childhood special education licensure program provides specialized preparation in:
- language and literacy development
- child growth and development
- teaching and learning approaches with young children
- learning, development and education grounded in culture, context and identity of young children
- early childhood curriculum and program development for culturally and linguistically diverse and inclusive classrooms
- collaborative program development including supports for children with families and communities
- leadership of programs and early childhood professional for practice, advocacy, and social change
- screening and assessment of young children
- individualized and systematic supports for children identified with disabilities
- classroom supports and instructional strategies to promote social emotional competence
- working as a collaborative member of a transdisciplinary team
- high and low incidence disabilities

Program Requirements
Classes are listed in recommended order. Please contact your faculty advisor to map out an individual plan of study. Prerequisites: Please note that a recent Child Development course as well as an Initial Practicum are prerequisites, determined on an individual basis at admissions.

Program Requirements and Courses
To complete the Early Childhood Education program and earn a master’s degree and/or license, students must complete the appropriate coursework as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

Course Scheduling
During the fall and spring semesters, hybrid and remote courses are offered in the late afternoon and evening for up to 3 hours per week over a 16-week semester. In the summer semester, eight-week sessions are offered. Courses are offered in various formats, including hybrid, remote, or asynchronous online classes.

Planning
For practicing full-time educators, we recommend taking two courses each fall and spring semester, and up to two courses each summer. If you prefer a less intensive course load, we recommend one course each fall and spring semester. Please review your preferred plan with your faculty advisor.

Active Status
Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four-six courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
Early Childhood Special Education Specialist Endorsement

Introduction
The early childhood special education (ECSE) program fulfills the Colorado Department of Education program requirements of the ECSE specialist within the state of Colorado. If you do not hold a current teaching license, information about ECSE licensure is available here (https://www.cde.state.co.us/cdeprof/endorsementrequirements/). The program prepares leaders who will enrich the life experience of young children (ages birth to 8 years) with delays and disabilities and their families through a variety of professional roles.

The program focuses on building and supporting learning and development of all children across inclusive settings in the natural environments where they live, grow and learn. The program emphasizes family-centered practices, culturally sustaining teaching and is inspired by the potential of all children and families. It is interdisciplinary in focus, drawing on university resources and the clinical expertise of various community professionals and partners. There is a strong emphasis on fieldwork and practicum experiences. Field experiences are a part of each course and provide an opportunity for each student to gain knowledge, abilities and dispositions while interacting with children, families, program staff and community agencies. Practicum experiences are designed for students to apply knowledge and practice skills in a closely supervised environment.

The early childhood special education licensure program provides specialized preparation in:

- language and literacy development
- child growth and development
- teaching and learning approaches with young children
- learning, development and education grounded in culture, context and identity of young children
- early childhood curriculum and program development for culturally and linguistically diverse and inclusive classrooms
- collaborative program development including supports for children with families and communities
- leadership of programs and early childhood professional for practice, advocacy, and social change
- screening and assessment of young children
- individualized and systematic supports for children identified with disabilities
- classroom supports and instructional strategies to promote social emotional competence
- working as a collaborative member of a transdisciplinary team
- high and low incidence disabilities
- education supports for children identified with disabilities

Program Requirements
Classes are listed in recommended order. Please contact your faculty advisor to map out an individual plan of study. Prerequisites: Please note that a recent Child Development course as well as an Initial Practicum are prerequisites, determined on an individual basis at admissions.

### Fieldwork and Practicum Requirements
For the ECSE specialist added endorsement, a total of 800 hours of fieldwork/practica is typically required. Approximately 300 hours of fieldwork are associated with course assignments; 500 hours of intense, culminating practica occur toward the end of the second year of study. Depending on previous experience, up to one credit of practicum may be waived in the added endorsement program. Students must pass three required Praxis exams (5691, 5024, & 5205) prior to enrolling in their final practicum. These exams are required by the Colorado Department of Education for ECSE licensing. More information located here (https://www.cde.state.co.us/cdeprof/endorsementrequirements/).

### Program Requirements and Courses
To complete the Early Childhood Education program and earn a master's degree and/or endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation.
Course Scheduling

Leadership for Educational Organizations

Overview

The Leadership for Educational Organizations (LEO) program is designed to develop outstanding educational leaders. Students will develop in-depth understanding about leadership roles and responsibilities, contemporary educational issues and collaboration, as well as a thorough awareness of legal, financial and political dimensions impacting education.

The LEO program seeks students who possess:

- High intellectual ability
- Strong sense of equity and social justice
- Strong academic backgrounds, and
- Clear leadership potential.

The primary responsibility of the leadership for educational organizations (LEO) faculty is to prepare future ready leaders to make an impact for public education in Colorado and the nation. Currently, the principal license is required for people seeking building-level administrative positions in Colorado. Alternatively, the administrator license may be required for district-level leadership positions in Colorado.

Repeatable. Max Credits: 40.
EDUC 5010 - Paraeducator Supervision Academy (1 Credit)
Provides the paraeducator with knowledge and skills to work effectively in teams. Paraeducators refine their knowledge of the characteristics of paraprofessionals in education, the distinction between professional and paraprofessional roles and responsibilities, liability and ethical issues. Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5015 - Developmental Intervention Supervisor Academy (DISA) (1 Credit)
Developmental Intervention Supervisor Academy provides early intervention professionals with the knowledge and skills to work effectively in teams and to utilize and supervise Developmental Intervention Assistants (DI Assistant is the title used in Colorado for paraprofessionals in early intervention services). Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5020 - Trainers of Paraeducator Academy (1 Credit)
Provides the professional educator with the skills to provide effective presentations to paraprofessionals in schools. Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5025 - Developmental Intervention Trainers Academy (DITA) (1 Credit)
Developmental Intervention Trainer Academy (DITA) is offered to early interventional professionals who have completed EDUC 5015 (DISA). DITA provides the participants skills to become effective trainers who deliver training to Developmental Intervention Assistants (i.e. paraprofessionals in early intervention services in Colorado). Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5030 - Top Cadre of Trainers (TOPCAT) Seminar (3 Credits)
Provides CO-TOP Trainers (school professionals who have been through the PSA: EDUC 5010 and TOPA: EDUC 5020) ongoing support in their roles as supervisors and trainers of paraeducators. Through this seminar trainers receive updated information about CO-TOP Academies, find collegial support from other trainers, exchange ideas, gain presenting and adult teaching ideas, and receive feedback on their teaching of paraeducator academies. This seminar also addresses the questions and needs of the individual CO-TOP trainer with regard to CO-TOP paraeducator training materials and processes. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5040 - Mentoring Novice and Pre-Service Teachers (1 Credit)
Designed to help participants develop or enhance the skills necessary to successfully work with candidates who are completing teacher education programs. Concentrates on supervision and conference skills, adult learning theory, and communication skills. Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5060 - Higher Education in a Global World (3 Credits)
Examines the significant issues, practices, and research in higher education. Explore historical roots, evolutionary changes, and future trends for curriculum and learning modalities, organizational models, educational research, teaching and learning, equity in student outcomes, and campus environments in higher education. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5070 - Law and Ethics in Higher Ed and Student Affairs (3 Credits)
This course will introduce students to the laws that impact college students and institutions of higher education. Graduate students will obtain knowledge of and the necessary skills to apply a code of ethics to their practice in student affairs. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5080 - Resource Management in Higher Education (3 Credits)
Introduction to higher education finance, resource allocation, and evaluation practices including federal, state, and local revenue sources, institutional budgeting, and financial management. Key practices in higher education resource management include program planning and review for human, fiscal and facilities allocations. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5130 - College Student Development (3 Credits)
This course examines theories of college student development including student learning and growth during the postsecondary years. This course will provide an introduction to psychosocial, cognitive, moral, and social identity development theories used to explain college student development. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

EDUC 5401 - Leading With Social and Emotional Learning in Mind (3 Credits)
This course will enable administrators to understand, investigate, assess, and plan to increase the quality and depth of social and emotional learning (SEL) in their schools and districts. Participants will explore the theoretical frameworks and scientific findings in the growing field of SEL. Cross-listed with INTE 5401. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

EDUC 5402 - Cultivating Awareness and Resilience for Administrators (3 Credits)
CARE (Cultivating Awareness & Resilience in Education) for administrators is a program that helps administrators handle stress and build their personal leadership capacities. The goal of CARE is to offer administrators tools and resources for reducing stress, preventing burnout, enlivening their leadership to help staff and students thrive. Cross-listed with INTE 5402. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

EDUC 5403 - Systemic Implementation of SEL (3 Credits)
This course focuses on Systemic SEL in which students will examine strategies for actively engaging students in learning and practicing social emotional competencies across classrooms and school environments, and in partnership with families and communities. Cross-listed with INTE 5403. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Summer.

EDUC 5500 - Diversity, Inclusion, Social Justice in Higher Education (3 Credits)
An examination of society, media, and public and educational policy and their impact on higher education access and persistence for marginalized groups. Students are called to consider how student affairs professionals might promote social justice for marginalized student groups. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring, Summer.

EDUC 5651 - Foundations of Leadership (3 Credits)
This courses focuses on leadership and the characteristics and foundational elements of what the leaders need to think about and do while providing the opportunity for students to apply this foundational learning to leadership in their own organization. Max hours: 3 Credits.
Grading Basis: Letter Grade
EDUC 5652 - Leadership for Equity/Social Justice (3 Credits)
Understand our own experiences and experiences of historically marginalized groups, with the historical and philosophical forces that have led to inequities, critically analyze current conditions and to work to develop school policies, curriculum and relationships to create access and opportunities. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5653 - Leadership Practices for Responsive Change (3 Credits)
This course focuses on leadership and the change process of individual and organizational responsive change with opportunity for students to learn about/apply this learning to the process of leading responsive change in the context of an organization. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5654 - Leadership Practice Capstone (3 Credits)
The Capstone Experience is a culminating project that provides a way for students to demonstrate the knowledge and skills they acquired during the MA program, linked to issues of equity or social interest related to the United States educational system. Prereqs: EDUC 5651, EDUC 5652, and EDUC 5653. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereqs: EDUC 5651, EDUC 5652, and EDUC 5653.

EDUC 5655 - Leadership Practices for Transformative School Reform (3 Credits)
This course will create a community of learners who can work together to investigate constructs and principles for school turnaround and transformation. The course will draw on previous learning for the practical application of intentional leadership practices for school reform and transformation. Change theory will be considered and applied to reform and transformation. Students will have the opportunity to study current reform efforts. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5751 - Principal Licensing I (3-9 Credits)
This program section (1 of 4) combines foundational learning in leadership, school improvement, instructional leadership and equity via hybrid sessions. Clinical-practice experiences are required. Assessment is performance-based and submitted to LIVETEXT. Restriction: Restricted to LEOS majors within the School of Education and Human Development (LEOS-MA, LEOS-EDS, PRNL-LICG, LDRE-EDD). Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max hours: 9 Credits.
Restriction: Restricted to LEOS majors within the School of Education and Human Development (LEOS-MA, LEOS-EDS, PRNL-LICG, LDRE-EDD).

EDUC 5752 - Principal Licensing II (3-9 Credits)
This program section (2 of 4) combines continued learning in leadership, school improvement, instructional leadership and equity via hybrid sessions. Clinical-practice experiences are required. Assessment is performance-based and submitted to LIVETEXT. Restriction: Restricted to LEOS majors within the School of Education and Human Development (LEOS-MA, LEOS-EDS, PRNL-LICG, LDRE-EDD). Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to LEOS majors within the School of Education and Human Development (LEOS-MA, LEOS-EDS, PRNL-LICG, LDRE-EDD).

EDUC 5753 - Principal Licensing III (3-9 Credits)
This program section (3 of 4) combines Continued learning in leadership, school improvement, instructional leadership and equity via hybrid sessions. Clinical-practice experiences are required. Assessment is performance-based and submitted to LIVETEXT. Restriction: Restricted to LEOS majors within the School of Education and Human Development (LEOS-MA, LEOS-EDS, PRNL-LICG, LDRE-EDD). Max hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to LEOS majors within the School of Education and Human Development (LEOS-MA, LEOS-EDS, PRNL-LICG, LDRE-EDD).
Typically Offered: Spring.

EDUC 5754 - Principal Licensing IV (3-9 Credits)
This program section (4 of 4) combines foundational learning in leadership, school improvement, instructional leadership and equity via hybrid sessions. Clinical-practice experiences are required. Assessment is performance-based and submitted to LIVETEXT. Restriction: Restricted to LEOS majors within the School of Education and Human Development (LEOS-MA, LEOS-EDS, PRNL-LICG, LDRE-EDD). Typically Offered: Summer.

EDUC 5836 - Workshop: Educational Administration, Curriculum and Supervision (1-4 Credits)
Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.

EDUC 5840 - Independent Study: EDUC (1-4 Credits)
Master’s. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

EDUC 5950 - Master’s Thesis (1-8 Credits)
Repeatable. Max hours: 16 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 16.
Additional Information: Report as Full Time.

EDUC 6000 - Special Topics: Administrative Leadership and Policy Studies (1-10 Credits)
Specific topics vary; focus is on faculty-developed options to standard course offerings to facilitate program development and distance-learning activities. Repeatable. Max Hours: 40 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 40.

EDUC 6840 - Independent Study (1-4 Credits)
Max hours: 4 Credits.
Grading Basis: Letter Grade

EDUC 6951 - Master’s Thesis (4 Credits)
Repeatable. Max hours: 16 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 16.
Additional Information: Report as Full Time.
**EDUC 7000 - ECE Today: Examining Practices, Policies, & Key Issues (3 Credits)**
This course provides in-depth understanding of the issues that shape contemporary early care and education in the U.S. The course addresses historical and contextual variables, providing a thorough overview of the pedagogy, practices, and policies framing the design and delivery of ECE. Cross-listed with ECED 7000. Max hours: 3 Credits.
Grading Basis: Letter Grade

**EDUC 7010 - History, Child Development, and Equity. Early Childhood (3 Credits)**
This course critically considers the developmental science that informs policy and program development; the social, political and economic forces that shape the study of young children and contribute to trajectories that benefit some children while disadvantaging others; the changing roles of families; and implications of these issues for policy. Cross-listed with ECED 7010. Max hours: 3 Credits.
Grading Basis: Letter Grade

**EDUC 7020 - ProSeminar II in Child, Youth, and Family Studies (1 Credit)**
This course is for 2nd year students in the Child, Youth, and Family Studies PhD pathway. The course is designed to support students in situating themselves in the discipline, enhancing their scholarly identity, and preparing for comprehensive examinations. Prereq: HDFR 7010 or ECED 7011 or EDUC 7011. Cross-listed with HDFR 7020 and ECED 7020. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011.

**EDUC 7030 - ProSeminar III in Child, Youth, and Family Studies (1 Credit)**
This course aims to provide third year doctoral students in the Child, Youth, and Family Studies PhD pathway with an immersive writing opportunity and professional development experience to help prepare for comprehensive examinations, the dissertation, and post graduate school life. Prereq: ProSem I and ProSem II (HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020). Cross-listed with ECED 7030 and HDFR 7030. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 AND HDFR 7020 or EDUC 7020 or ECED 7020.

**EDUC 7100 - Leadership in Education (3 Credits)**
Orients students to broad periods of administrative science, philosophical and behavioral underpinnings of various models and types of leadership, and develops doctoral-level analysis and writing skills to articulate self-knowledge as leader and the application of appropriate leadership practices in context. Prereq: admission to the doctoral program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EdD, EDLI-PhD and SPsy-PsyD majors within the School of Education and Human Development.

**EDUC 7230 - Organizational Performance In Educational Contexts (3 Credits)**
Explores connections between organizational behaviors and outcomes as well as external and internal factors influencing organizational behavior. The course focuses on how education organizations learn, how they can use that learning to improve performance, and what techniques are available to help understand present performance and affect future performance. Restriction: Restricted to EDHD-PhD, LDRE-EdD, EDLI-PhD and SPsy-PsyD majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EdD, EDLI-PhD and SPsy-PsyD majors within the School of Education and Human Development.

**EDUC 7500 - Strategic Human Capital Development (3 Credits)**
This course focuses on understanding and leveraging the personnel function of an educational organization. You will learn how to strategically align and maximize your human capital with organizational strategic objectives. Max hours: 3 Credits.
Grading Basis: Letter Grade

**EDUC 7510 - Strategic Organizational Management (3 Credits)**
An effective partnership between the board, community and institutional leader is essential to fulfilling the mission of an educational organization. This course examines the importance of strategic visioning, strategic planning, and specific communication strategies. Max hours: 3 Credits.
Grading Basis: Letter Grade

**EDUC 7520 - Strategic System Improvement (3 Credits)**
The fundamental purpose of educational organizations (schools, districts, community colleges, higher education, non-profits) is to ensure high levels of learning for all. This course addresses topics such as data development and management, accountability, curriculum assessment and instruction, continuous improvement, and professional learning. Max hours: 3 Credits.
Grading Basis: Letter Grade

**EDUC 7530 - Strategic Leadership Development (3 Credits)**
Successful leaders are able to articulate, protect and promote what is important. This course will examine the challenges of educational leadership and help participants clarify the core values essential to their success as a leader. Max hours: 3 Credits.
Grading Basis: Letter Grade

**EDUC 7600 - Higher Education Policy and Governance (3 Credits)**
In this course, students are challenged to explore the governance and policy environment of Higher Education, to understand the multiple layers of governance and the complex web of policy-making, to analyze the differences among systems of governance, and to evaluate the essential components and consequences of policies. Max hours: 3 Credits.
Grading Basis: Letter Grade

**EDUC 7610 - Strategic Enrollment Management in Higher Education (3 Credits)**
Course is designed to deepen the understanding of the complexities of strategic enrollment management as research and practice, delving into the breadth of its critical issues and rapidly developing context, including the student lifecycle; the focus on equity and inclusion; emerging models for student success; and financial implications. Max hours: 3 Credits.
Grading Basis: Letter Grade
EDUC 7620 - Contemporary Issues in Higher Education (3 Credits)
This course is a study of the critical, contemporary issues in higher education and the impact on institutions' goals for equity and student success. Students in the course will reach beyond the current context, understanding the origins of critical questions, and the impact of these issues on leadership decision-making. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP

EDUC 7630 - Decision-making, Conflict Resolution, & Equity in Higher Education (3 Credits)
This course provides an approach to decision-making & conflict resolution from the viewpoint of the higher education leader, utilizing the lens of equity, drawing on cases and examples from differing contexts & a range of disciplines. The objective is to enable students to develop expertise in inclusive decision-making, rooted in theory. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7640 - Higher Education Finance and Strategic Resource Allocation (3 Credits)
This course is designed to introduce students to the complexity of higher education funding, the vast variations across systems, and the critical role of data informed decision making in strategic resource allocation its impact on student access and success. Students will enhance their own capacity to contextual decisions and consider parameters. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7650 - Data-Informed Decision-Making and Predictives in HED (3 Credits)
Course is designed to elevate the understanding of data-informed decision making and predictives as it relates to research & practice; defining leaders responsibility in creating a datadriven and ethically responsible culture using a lens of equity and inclusion. Max Hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7751 - Principal Licensure EDD Concentration Course I (3 Credits)
Course is offered for students taking the Principal Licensure EDD Concentration area. Students in 7751 will join a cohort of students in a hybrid cross-listed EDUC 5751, complete all work/assignments for PBA 1 and related PBA 5 assessments. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

EDUC 7752 - Principal Licensure EDD Concentration Course II (3 Credits)
Course is offered for students taking the Principal Licensure EDD Concentration area. Students in 7752 will join a cohort of students in a hybrid cross-listed EDUC 5752, complete all work/assignments for PBA 2 and related PBA 5 assessments. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

EDUC 7753 - Principal Licensure EDD Concentration Course III (3 Credits)
Course is offered for students taking the Principal Licensure EDD Concentration area. Students in 7753 will join a cohort of students in a hybrid cross-listed EDUC 5753, complete all work/assignments for PBA 3 and related PBA 5 assessments. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

EDUC 7754 - Principal Licensure EDD Concentration Course IV (3 Credits)
Course is offered for students taking the Principal Licensure EDD Concentration area. Students in 7754 will join a cohort of students in a hybrid cross-listed EDUC 5754, complete all work/assignments for PBA 4 and related PBA 5 assessments. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

EDUC 7830 - Special Topics in Leadership for Educational Organizations (1-3 Credits)
Study of special topics that examine educational settings in Leadership for Educational Organizations to be selected by the instructor. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

EDUC 7840 - Independent Study: EDUC (1-4 Credits)
Doctoral. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Leading for Education Organizations - Leading Change for Student Success in Higher Education, MA

Introduction
This program is designed for emerging to mid-level professionals from higher education institutions, policy and research organizations, and governmental and non-profit entities desiring to learn more about the overall connections of higher education to students, faculty, administration, other educational partners, and the community.

The program integrates current issues historical, philosophical, theoretical, and equity-minded foundations as a basis to discover, explore and lead in higher education or related organizations.

The 30-hour degree program is delivered online with planned synchronous activities including a capstone course with an applied focus on learning. The program is designed to allow students to complete in two years. The courses will be offered on a rotating schedule and not every course will be offered each term.

The program focus assists students to evolve as leaders in times of disruption and change while achieving new levels of performance.

Student Learning Outcomes

Program Outcomes:
- Understand the critical role of higher education and the required changes to support teaching and learning for student success.
- Gain inquiry skills to analyze important problems in the context of higher education.
- Connect theory to leadership practice through applied learning experiences.
- Engage in dialogue and action research promoting social justice.
- Ability to cultivate, innovate, and foster organizational change.
Leadership for Educational Organizations with Principal Licensure, EdS

Introduction
The EdS degree program affords the opportunity for advanced graduate study and is available to those who already hold a master's degree (completed prior to admission into the EdS LEO program.) For the specialist degree, students will complete 9 semester hours of faculty advisor approved graduate-level coursework that constitute an area of focus, in addition to the 32 semester hours required in the Principal Licensure program. The Leadership for Educational Organizations EdS requires a total of 41 semester hours of coursework. Candidates must also successfully complete a comprehensive exam in the final semester.

Program Requirements
The 9 semester hours beyond the 32 semester hour principal licensure program must constitute an area of focus and/or a specific advancement of knowledge and skills for the license. Students can choose 9 semester hours (3 courses) from the following options (or receive faculty approval for other relevant graduate-level coursework):

Leadership for Educational Organizations - Principal Licensure, MA

Introduction
The MA prepares district leaders for future-ready schools. Equipped with a focus on diversity and social justice and the skills and knowledge to develop a vision for a successful school, graduates pursue careers as elementary, middle, or high school principals and administrators to realize change at school and community levels. The MA is designed for those who do not already hold a graduate degree.

Program Requirements
For the MA Leadership for Educational Organizations, students will complete the 32 semester hours required in the Principal Licensure (p. 590). Candidates must also successfully complete a comprehensive exam in the final semester.

Administrator License - Executive Leadership Program

Introduction

Designed for the professional educator who, already holding a master’s degree and preferably five years leadership experience in education, wishes to apply for an initial administrator license through the Colorado Department of Education and prepare for a career as a superintendent or other district level leader. In addition to coursework, the Colorado Department of Education also requires an exam. Click here (https://www.cde.state.co.us/cdeprof/endorsementrequirements/) for information about Colorado Department of Education exam requirements.

Program Requirements

The 12-semester-hour administrator licensure program combines weekend meetings with online work and hands-on clinical practice—usually completed in participants’ home districts.

Principal Licensure

Introduction

LEO offers coursework that leads to eligibility to apply for the initial license for K-12 principal through the Colorado Department of Education. In addition to coursework, the Colorado Department of Education also requires an exam. Click here (https://www.cde.state.co.us/cdeprof/endorsementrequirements/) for information about Colorado Department of Education exam requirements.

Admission to the LEO principal licensure program is competitive. All principal licensure applicants must hold at least a bachelor’s degree and a teaching or special services license; we also recommend principal licensure applicants have a minimum of three years of post-licensure teaching or special services experience. LEO’s principal licensure program is project-based, requiring students to present evidence of meeting both state and national standards through performance based assessments. A 400-hour clinical-practice experience is integrated throughout the four-semester program.

Students submit performance-based assessment/content modules (PBAs) during the principal licensure program to an online assessment system. For successful principal licensure completion, PBAs not approved by the end of the fourth semester must obtain instructor approval to be completed within the two subsequent semesters (not including summer.)

Note: Those already holding a master’s degree and 5 years of leadership in education should also see the Administrator License - Executive Leadership (p. 589) Program for pursuing K-12 administrator (superintendent or district-level leadership) licensure.

Principal Licensure Cohort Options

Typically, cohorts are comprised of approximately 25 principal candidates who move through the four-semester principal licensure program together. We welcome applicants from all districts into our principal licensure cohorts. However, we also partner with metro-area districts to prepare leaders specifically for their schools.

Total: 32 semester hours for Principal Licensure.
Overview
The MA program in Learning, Developmental and Family Sciences (LDFS) prepares students to facilitate the teaching/learning process and to lead and work in community-based environments. Thus, many students pursue the degree to enhance their skills as professional classroom teachers or lead in the community. The degree also provides skills necessary for a variety of roles in educational and teaching settings or community environments where knowledge of learning, development, understanding family and community systems, motivation, and research is essential such as teaching at the community college and teaching-based colleges and universities levels, teaching adults, consulting, developing assessments, community-based leadership, and conducting program development and evaluation. Other students seek the MA as preparation for advanced study in educational psychology, psychology, learning sciences, family science and human development, research, or related fields.

Areas of Study
Two major areas of concentration are available: Learning and human development and family relations:

- Regardless of the concentration area selected, all students must demonstrate competence in Learning, Developmental and Family Sciences by successfully completing 30 semester hours of relevant course work;
- Students complete a capstone experience, either an applied project or a master's thesis in consultation with their faculty advisor based on the students' professional and academic goals. Please see culminating capstone experience section for more details.

Learning
The concentration is committed to the systematic study of psychological, social, and cultural processes of learning and development, and design of environments that support optimal learning and development, drawing upon multidisciplinary nature of work. The concentration examines learning in various formal and informal contexts (e.g., learning in classrooms, schools, centers, communities, homes) from multiple perspectives (e.g., psychological, sociocultural, critical, design-based, neuroscience). Within the networks of professional and academic communities, students will engage in designing adaptive learning environments that facilitate optimal learning and developmental opportunities for participants in diverse educational and community contexts, including our unique urban context. The Learning concentration offers courses such as:

- Human Learning
- Human Development Over the Life Span
- Designing Environments for Learning and Development
- Mind, Brain, and Education
- Cognition and Instruction

Human Development and Family Relations (HDFR)
Students will engage in developing their skills to work in and lead community-based organizations including, but not limited to secular, faith-based, for profit, nonprofit, school-based, and local, state, federal and international organizations. The importance of family diversity and social justice is stressed throughout the HDFR curriculum through its courses and experiences. Students can also develop their knowledge in family relations in preparation for doctorate studies in family science and human development or related areas.

The LDFS program does provide a pathway for MA students (HDFR and Learning areas) to pursue their PhD in Education and Human Development with a Family Science and Human Development concentration. For more information, please visit our School of Education and Human Development.

The HDFR area also provides classes to all School of Education and Human Development (SEHD) graduate programs, offering courses in family theories, family dynamics, and diverse family systems, Latino family, school and community systems, family resource management, leadership and organizations, grant writing and fundraising, program development and other family relations based courses.

Remi Kalir, PhD, University of Wisconsin-Madison | Learning Design & Technology

Jung-In Kim, PhD, University of Texas Austin

Assistant Professor:
Diana Schaack, PhD, Erikson Institute/Loyola University Chicago
Human Development and Family Relations (HDFR) Courses

HDFR 5002 - Family Life and Community Programming I (3 Credits)
This course teaches the principles, philosophies, models, and strategic methods of family life education for strengthening interpersonal and family relationships. Culturally competent students will learn about the development and implementation of effective educational programs and experiences within different community settings. Cross-listed with HDFR 4002. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5003 - Leadership and Organizations (3 Credits)
This course provides an understanding of leadership theory and practice in community and educational environments. Students will learn about important aspects about leading diverse community and educational organizations including staff supervision, strategic planning, advancing the organization and maintaining integrity. Cross-listed with HDFR 4003. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5004 - Family and Comm. Prog. II Grant Writing/Fundraising (3 Credits)
This course provides an understanding of developing skills on grant writing and fundraising as related to family, community and educational organizations/agencies. Students will learn about important aspects about grant writing, fundraising fundamentals and funding models for sustainability. Cross-listed with HDFR 4004. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5010 - Family and Cultural Diversity (3 Credits)
The examination of familial, gender, cultural, linguistic, social and other ecological factors on diverse family systems in the United States will be covered. An ecological theoretical analysis of minority family systems within a familial, educational and social justice perspective will be explored. Cross-listed with HDFR 4010. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5020 - Black and Latino Children in Families and Schools (3 Credits)
With a focus on application of scholarship to practice, this interdisciplinary course will introduce graduate students to scholarly literature from family sciences, sociology, education and related fields to understand Black and Latino children within family, school and community systems. Restriction: Restricted to graduate level students. Cross-listed with ETST 5021. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

HDFR 5040 - Latino Families in School and Communities (3 Credits)
This course will use ecological systems theory perspectives as a foundation for understanding diverse Latino family dynamics, the intersection between Latino families, schools and community systems and other critical issues that Latino family systems face in the United States. Cross-listed with HDFR 4040. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5045 - Abuelos (Grandparents) Latino Families (3 Credits)
The course will focus on the social gerontology of Latinos families in later life. Specifically, the course will examine how ecological factors including familial, cultural, social, economic, health, cognitive and educational, impact the lives of Latino older person’s in the contexts of family systems. Cross-listed with HDFR 4045. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5080 - Global Family Resource Management (3 Credits)
This course examines the allocation of family resources (social, financial and material assets), the influence of various ecological systems, the effect on family functioning and goal-setting from a global perspective. Practical applications for Family Relations professionals are included. Cross-listed with HDFR 4080. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5090 - Helping Profession Skills in HDFR (3 Credits)
This course is designed to provide an overview of essential skills required in a variety of helping situations and settings. Course content includes the development of accurate listening, empathy, reflection, and inquiry skills. Implications for working with individuals, families, and couples will be examined. Cross-listed with HDFR 4090. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5180 - Family and Community-Centered Classroom Practice (3 Credits)
This intensive course is designed to help teachers develop a responsive, collaborative, and theory based understanding of the interaction of schools, families and the local community. In this course, you will examine the impact that various social interactions had on yourself, a student’s family, and the community as a whole. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5260 - Family Systems Social Justice (3 Credits)
Relying on ecological systems theories, this course will introduce students to families and family systems. Students will investigate how families experience (in)justice in the areas of access to education, community services, and employment. Cross-listed with HDFR 4260. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5300 - Families in Later Life (3 Credits)
Students will become familiar with the importance of families in later life. Through family systems and ecological systems theories, this course is designed to provide an understanding of the importance of family relationships and implications for practice, research, and policy. Cross-listed with HDFR 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5830 - Special Topics in Human Development and Family Relations (1-3 Credits)
Advanced study of special topics that examine community and educational settings in Human Development and Family Relations (HDFR) to be selected by the instructor. Repeatable. Max hours: 6 Credits
Grading Basis: Letter Grade

HDFR 6000 - Family Theories (3 Credits)
Students will examine the methods of inquiry and the basic foundations of contemporary family theory. Using a family systems perspective, students will utilize and analyze theory in the exploration of diverse and changing family dynamics in a societal context. Cross-listed with HDFR 7000. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 6075 - Family Policy and Law (3 Credits)
Theoretical and practical exploration of the process of policy-making, with particular attention to the role of courts, that impact families and children to provide foundations for research and advocacy related to family policy and law. Cross-listed with HDFR 7075. Max hours: 3 Credits.
Grading Basis: Letter Grade
HDFR 7010 - Proseminar I in Child, Youth, and Family Studies (1 Credit)
This course aims to introduce students in the Child, Youth, and Family Studies PhD pathway to doctoral studies and to faculty research. The course is also designed to support students in situating themselves in the discipline, enhancing their scholarly identity, and refining academic writing and presentation skills. Cross-listed with ECED 7011 and EDUC 7011. Max Hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011. Cross-listed with EDUC 7020 and ECED 7020. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP

HDFR 7020 - ProSeminar II in Child, Youth, and Family Studies (1 Credit)
This course is for 2nd year students in the Child, Youth, and Family Studies PhD pathway. The course is designed to support students in developing a research agenda, exploring ethics in research, enhancing scholarly identity, and preparing for comprehensive examinations. Prereq: HDFR 7010 or ECED 7011 or EDUC 7011. Cross-listed with EDUC 7020 and ECED 7020. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011. Cross-listed with EDUC 7020 and ECED 7020. Max hours: 1 Credit.

HDFR 7030 - ProSeminar III in Child, Youth, and Family Studies (1 Credit)
This course aims to provide third year doctoral students in the Child, Youth, and Family Studies PhD pathway with an immersive writing opportunity and professional development experience to help prepare for comprehensive examinations, the dissertation, and post graduate school life. Prereq: ProSem I and ProSem II (HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020). Cross-listed with EDUC 7030 and ECED 7030. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 AND HDFR 7020 or ECED 7020 or EDUC 7020.

HDFR 7040 - Advanced Studies in Applied Child Development (3 Credits)
Provides an intensive overview of the science of child development. A range of theoretical perspectives will be emphasized highlighting the role of context. Students will apply theory and research to programs that seek to advance equity in opportunities and outcomes. Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development. Cross-listed with ECED 7040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development.
Typically Offered: Spring.

HDFR 7050 - Family Theories (3 Credits)
Students will examine the methods of inquiry and the basic foundations of contemporary family theory. Using a family systems perspective, students will utilize and analyze theory in the exploration of diverse and changing family dynamics in a societal context. Cross-listed with HDFR 6000. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 7075 - Family Policy and Law (3 Credits)
Theoretical and practical exploration of the process of policy-making, with particular attention to the role of courts, that impact families and children to provide foundations for research and advocacy related to family policy and law. Cross-listed with HDFR 6075. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 7100 - Family Issues in Immigration and Migration (3 Credits)
Exploration of family issues related to immigration in the US context, including how policies shape emigration and immigration of families. Focus will be on social, cultural, political, and economic factors related to early childhood, parenting, adolescent identity, marriage and family formation, health and wellbeing and integration in the US. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP

HDFR 7200 - Family Inequality and Social Change (3 Credits)
Exploration of the changing nature of family and family inequality in the contemporary US context and the effects on development and well-being. The course will focus on families from diverse ethnic, cultural backgrounds across a range of socioeconomic circumstances, and consider the changing structure of the family. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

HDFR 7240 - Latin@ Families in Schools and Communities (3 Credits)
This course will use ecological systems theory perspectives as a foundation for understanding diverse Latino family dynamics, the intersection between Latin@ families, schools and community systems, mental health systems, and other critical issues that Latin@ family systems face in the United States. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 7260 - Family Diversity and Social Justice (3 Credits)
Through this course, students will explore theory and research on the family, using interdisciplinary research and theory to inform their knowledge and generation of questions that recognize the challenges faced by diverse families in a shifting societal and national environment. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

HDFR 7270 - Advanced Study of Human Development (3 Credits)
This course is an intensive overview of major theories undergirding the study of human development. The emphasis is upon broad ecological theories that cut across different aspects of human development, including social and emotional development, cognition, and achievement within contemporary societal social structures. Max Hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 7840 - Human Development and Family Relations Independent Study (1-6 Credits)
Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 12.
Learning, Developmental and Family Sciences (LDFS) Courses

LDFS 5110 - Human Learning (3 Credits)
A review of the research on human learning, including related topics such as information processing and motivation. Various theories of learning are examined in-depth, and their applications to teaching and practices in schools (and in other educational settings) are considered. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 5240 - Cognition and Instruction (3 Credits)
Explores recent developments in cognition and their implications for instructional practices. Includes theory and research in cognitive psychology and resultant educational practices. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 5260 - Child Study and Observation (3 Credits)
Involves extensive, systematic observation of young children. Recorded observations are analyzed in terms of child development theories, children's background, setting variables, and are then presented in written and elaborated form. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 5840 - Learning, Developmental and Family Sciences Independent Study (1-6 Credits)
Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Hours: 12.

LDFS 5930 - Learning, Developmental and Family Sciences Internship (2-4 Credits)
Field-based experiences in settings (schools, businesses, governmental agencies, special projects) that are linked closely to the student's professional objectives. Requires a minimum of 150, 225 or 300 clock hours under supervision (two-four credit hours, respectively). Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Hours: 4.

LDFS 6100 - Advanced Child Growth and Development (3 Credits)
Systematic study of the major theories of child growth and development. Focuses on current research regarding infants and children and the implication of such research for education. Cross-listed with LDFS 7100. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6140 - Social Contexts of Adolescence and Schooling (3 Credits)
Systematic study of the major theories of adolescent growth in social contexts, emphasizing the social and cultural construction of the adolescent experience. Focuses on current research regarding adolescents and the implications of the research for education. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6200 - Human Development Over the Life Span (3 Credits)
An inquiry into the experience and meaning of human development over the full span of life. Both analytical and reflective modes of exploration are utilized to approach the study of personhood and the courses and themes of life. Cross-listed with LDFS 7200. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6220 - Adult Development (3 Credits)
Surveys theories and principles of adult development through an ecological perspective with an emphasis on community and educational contexts. Cross-listed with LDFS 7220. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6320 - Mind, Brain, and Education (3 Credits)
An introductory survey into contemporary theory and research in developmental cognitive neurosciences and their potential applications to education, aiming to explore how the brain learns, and what it means for learning and development. Max Hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 6400 - Observation, Documentation and Assessment (3 Credits)
This course focuses on developing competencies in observation, documentation, and assessment to inform understandings about children and teaching. Students will draw from child development and ecological theories to observe children's assets, then interpret and analyze how children learn and develop. Max Hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 6410 - Social Foundations of Family and Community (3 Credits)
In this course, students of early childhood education will learn to think and act reflectively, critically, and socially, informed by the roles of families and communities of young learners. Course readings, observation, documentation, and reflection provide foundations for the development of relational perspectives on social justice. Max Hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 6420 - The Environment as the Third Teacher (3 Credits)
This course will provide students with an understanding of the relationship between the Learning Sciences and Reggio-Inspired practices, and how this relationship can be applied to the design of engaging and dynamic learning environments. Max Hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 6600 - Motivation in Contexts (3 Credits)
Theories of human motivation are examined through social and cultural lens directed at phenomena of engagement and disengagement in activities at different levels of scale. Applications are considered for both educators and learners in various social and cultural learning contexts. Cross-listed with LDFS 7600. Max hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6750 - Designing Environment for Learning and Development (3 Credits)
Introduction to concepts, findings, and research methods relevant to theory and research in the Learning Sciences, with specific focus on how those concepts and findings apply to design learning across settings. Max Hours: 3 Credits.
Grading Basis: Letter Grade
LDFS 6840 - Learning, Developmental and Family Sciences Independent Study (1-6 Credits)
Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

LDFS 6910 - Practicum Reflections on Learning (3 Credits)
This course focuses on the pursuit of praxis within the student teacher residency. Reflection on course resources, engagement in ongoing processes of documentation, and reflection within a small group meeting format drive social construction of knowledge about learning and development. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP

LDFS 6950 - Culminating Capstone Experience (3 Credits)
This course provides a learning environment for students to complete an applied project/thesis in education and human development contexts as part of their final capstone experience in the Master's in Learning, Developmental and Family Sciences. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.

LDFS 7100 - Advanced Child Growth and Development (3 Credits)
Systematic study of the major theories of child growth and development. Focuses on current research regarding infants and children and the implication of such research for education. Cross-listed with LDFS 6100. Max hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 7120 - Family Dynamics (3 Credits)
Review and analysis of issues related to families with exceptional or at-risk young children. Topics include coping skills, family involvement, parent-child interaction, and sources of support. Special attention is given to current research and its application to early intervention.
Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 7140 - Advanced Studies in Youth Development (3 Credits)
Systematic study of the current research and major theories of youth growth, emphasizing the social and cultural construction of the youth experience. Focuses on current theories and research regarding youth within contemporary social structures in multidisciplinary perspectives.
Max hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 7200 - Human Development Over the Life Span (3 Credits)
An inquiry into the experience and meaning of human development over the full span of life. Both analytical and reflective modes of exploration are utilized to approach the study of personhood and the courses and themes of life. Cross-listed with LDFS 6200. Max hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 7220 - Adult Development (3 Credits)
Surveys theories and principles of adult development through an ecological perspective with an emphasis on community and educational contexts. Cross-listed with LDFS 62200. Max hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 7600 - Motivation in Contexts (3 Credits)
Theories of human motivation are examined through social and cultural lens directed at phenomena of engagement and disengagement in activities at different levels of scale. Applications are considered for both educators and learners in various social and cultural learning contexts.
Cross-listed with LDFS 6600. Max hours: 3 Credits.
Grading Basis: Letter Grade
Learning, Developmental and Family Sciences, MA

Introduction
The MA program in Learning, Developmental and Family Sciences (LDFS) prepares students to facilitate the teaching/learning process and to lead and work in community-based environments. Thus, many students pursue the degree to enhance their skills as professional classroom teachers or lead in the community. The degree also provides skills necessary for a variety of roles in educational and teaching settings or community environments where knowledge of learning, development, understanding family and community systems, motivation, and research is essential such as teaching at the community college and teaching-based colleges and universities levels, teaching adults, consulting, developing assessments, community-based leadership, and conducting program development and evaluation. Other students seek the MA as preparation for advanced study in educational psychology, psychology, learning sciences, family science and human development, research, or related fields.

Areas of Study
Two major areas of concentration are available: Learning and human development and family relations:

• Regardless of the concentration area selected, all students must demonstrate competence in Learning, Developmental and Family Sciences by successfully completing 30 semester hours of relevant course work;
• Students complete a capstone experience, either an applied project or a master’s thesis in consultation with their faculty advisor based on the students’ professional and academic goals. Please see culminating capstone experience section for more details.

Program Requirements
Learning
The concentration is committed to the systematic study of psychological, social, and cultural processes of learning and development, and design of environments that support optimal learning and development, drawing upon multidisciplinary nature of work. The concentration examines learning in various formal and informal contexts (e.g., learning in classrooms, schools, centers, community systems, homes) from multiple perspectives (e.g., psychological, sociocultural, critical, design-based, neuroscience). Within the networks of professional and academic communities, students will engage in designing adaptive learning environments that facilitate optimal learning and developmental opportunities for participants in diverse educational and community contexts, including our unique urban context.

Human Development and Family Relations (HDFR)

Students will engage in developing their skills to work in and lead community-based organizations including, but not limited to secular, faith-based, for profit, nonprofit, school-based, and local, state, federal and international organizations. The importance of family diversity and social justice is stressed throughout the HDFR curriculum through its courses and experiences. Students can also develop their knowledge in family relations in preparation for doctorate studies in family science and human development or related areas.

The LDFS program does provide a pathway for MA students (HDFR and Learning areas) to pursue their PhD in Education and Human Development with a Family Science and Human Development concentration. For more information, please visit our School of Education and Human Development.

The HDFR area also provides classes to all School of Education and Human Development (SEHD) graduate programs, offering courses in family theories, family dynamics, and diverse family systems, Latino family, school and community systems, family resource management, leadership and organizations, grant writing and fundraising, program development and other family relations based courses.

Total Hours 30

Culminating Capstone Experience

All students must complete a culminating capstone experience in the MA in Learning, Developmental and Family Sciences, Human Development and Family Relations and Learning tracks. Students can choose between an applied project or a thesis. Students should consult with their faculty advisor as they weigh their options for the capstone to choose the option which best matches their academic and professional goals.
Option 1: Applied Project
An applied project may take the form of an action research project, an applied development project, or an applied evaluation project. The applied project allows for considerable flexibility in the type of project undertaken.

Option 2: Thesis
The thesis provides experience in conducting an empirical investigation, but provides a great deal of flexibility based on students' interests. The investigation may be qualitative (involving interviews and observation) or quantitative (involving measured variables) or mixed-methods and should address a question of practical importance to the student and the field in general.

Students are expected to attend one of the required LDFS MA Capstone Orientation provide by the LDFS faculty during each academic year. For more specific details concerning the Capstone please contact your faculty advisor.

Registration for Capstone
All students are required to register for LDFS 6950 Culminating Capstone Experience as part of their degree requirements. LDFS 6950 Culminating Capstone Experience is offered in fall semester only and should be taken in students' final fall in the program.

Students who do not complete their applied project or defend their thesis in the fall semester they are registered for LDFS 6950 Culminating Capstone Experience are able to continue working on their applied project or thesis beyond the fall semester with faculty permission.
Learning Design and Technology

Overview

The Learning Design and Technology (LDT) MA program helps people use various digital and social media tools and technologies for learning, teaching, and professional leadership. Applying sound principles of learning, instructional and media design, and professional development, you will use a variety of learning strategies and technologies - such as digital and online media, digital storytelling, social media and networking, games, and smart and mobile tools - to support learning and development goals in school and workplace settings. Throughout the program, you will engage in assessment and evaluation activities to improve services, be accountable for outcomes, and develop professional identities as thought leaders in your professional communities of practice. The LDT MA program is fully online and may be completed in two years.

Technology Expectations

The LDT MA program relies heavily on computers and related technologies for course delivery and learning activities. Students are expected to use their campus email accounts and check them frequently. Students need convenient, consistent, and reliable access to Internet-connected computers. In addition to textbooks, software purchases may be required or recommended for specific courses.

The LDT 30 semester hour MA program (https://education.ucdenver.edu/academics/graduate/learning-design-technology/) offers different Plan of Study options to match various professional roles. Students work with Faculty Mentors to select an option in alignment with professional goals:

1. P-12 Educators
2. Youth Library Professionals (in K-12 settings and public libraries)
3. College Instructors
4. Instructional Designers (in workplace and P-20 settings)

Programs

- Learning Design and Technology, MA (p. 602)
- Teacher Librarian Endorsement (p. 603)
- Leadership: P-12 Library Programs Certificate
- Digital Pedagogies and New Literacies Certificate (p. 605)
- Leadership for Learning Design and Technology Certificate (p. 606)
- Learner-centered Instructional Design Certificate (p. 607)
- Online Teaching and Learning Certificate (p. 608)
- Prosocial Leader Graduate Certificate (p. 609)

Faculty

Professor:
Joni Dunlap, PhD (https://education.ucdenver.edu/about-us/faculty-directory/Dunlap-Joni-UCD12978/), University of Colorado Denver | Learning Design & Technology

Associate Professor:
Remi Kalir (https://education.ucdenver.edu/about-us/faculty-directory/Kalir-Remi-UCD6000038137/), PhD, University of Wisconsin Madison | Learning Design & Technology

Clinical Associate Professor:
Laura Summers, PhD (https://education.ucdenver.edu/about-us/faculty-directory/Summers-Laura-UCD11460/), University of Northern Colorado | Learning Design & Technology

Senior Instructors:
Brad Hinson (https://education.ucdenver.edu/about-us/faculty-directory/Hinson-Brad-UCD6000014120/), Assistant Dean | Digital Learning & Technology

Instructional Design and Technology (INTE and SCHL)

INTE 5000 - Maker Studio (3 Credits)
The maker studio is a collaborative practicum within the context of maker culture, project-based learning, and learning experience design. The course focuses on the practical translation of learning design theory to learning design reality, presenting learners with challenges to be resolved with creative solutions. Cross-listed with INTE 4000. Max hours: 3 Credits.
Grading basis: Letter Grade

INTE 5010 - Humanizing Learning Design (3 Credits)
Humanizing Learning Design considers and respects learner diversity, including differences in ability and personal background. Students critique and create course materials that are mindful of the whole person, align with accessibility standards and follow universal design guidelines. Max hours: 3 Credits.
Grading basis: Letter Grade

INTE 5100 - Learning Experience Design (3 Credits)
Instructional design is the process used to analyze, design, develop, and evaluate learning solutions. You will identify a gap in learning or performance and design a learning solution in the form of courses units, modules, and other instructional resources. Cross-listed with INTE 4100. Max hours: 3 Credits.
Grading basis: Letter Grade

INTE 5150 - Engaging in Education Advocacy (3 Credits)
This course will look at the theoretical foundations and critical issues of advocacy, elements of advocacy planning, and strategies for action. You will deepen your understanding of advocacy tools, processes and models in an effort to help you imagine how to utilize advocacy in your own practice. A primary focus will be on the connection of community organizations and schools. Cross-listed with INTE 7150. Max hours: 3 Credits.
Grading basis: Letter Grade
INTE 5200 - Designing Online Learning Experiences (3 Credits)
This course helps educators transition to teaching online. Create online learning activities, assessments, and resources. Learn how to establish a strong online teaching presence. Explore blended learning environments, use of set curriculum, open educational resources (OER), family support, communication strategies, digital citizenship, and accessibility concerns. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5250 - Teaching Strategies for Online and Blended Learning (3 Credits)
This course provides a foundation for effective online teaching strategies. Learning essentials include: affording more reflective, engaging, inventive, and successful online learning experiences; fostering improved presence; employing skilled management techniques; and unpacking tools, habits, and processes for effective learning. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5300 - Critical Digital Literacies (3 Credits)
Critical Digital Literacies surveys intersections among literacy studies, digital media, and critical education. The course blends theory with practice, and design with leadership, to immerse students among the communities, developments, and debates pertinent to critical digital literacies. Cross-listed with INTE 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5320 - Games and Learning (3 Credits)
This course examines the use of games for learning and education across formal and informal environments. Students will survey contemporary learning theory, media, trends, and challenges related to designing and playing games in informal, community-based, online, and school settings. Cross-listed with INTE 4320. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5340 - Learning with Digital Stories (3 Credits)
This course reviews the uses of digital storytelling for learning. Develop and publish a short digital story that tells something important about you and your interests. Explore ways that creating or using digital stories can aid learning and personal growth. Cross-listed with INTE 4340. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5360 - Critical Digital Pedagogy (3 Credits)
Critical Digital Pedagogy is an overview of the intersections between digital technology and critical pedagogy. The course focuses on theory, practice, design and leadership in digital learning, open education, and collaboration with the larger community of educators concerned with critical digital pedagogy. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5370 - Open Education (3 Credits)
Open Education is an overview of the open education and open pedagogy movement, both the ideology and practices associated with working in the commons. As knowledge creators and learning designers, students will gain a greater understanding of the rights and responsibilities of open access, open design, open educational resources, and the issues. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5401 - Leading With Social and Emotional Learning in Mind (3 Credits)
This course will enable administrators to understand, investigate, assess, and plan to increase the quality and depth of social and emotional learning (SEL) in their schools and districts. Participants will explore the theoretical frameworks and scientific findings in the growing field of SEL. Cross-listed with EDUC 5401. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

INTE 5402 - Cultivating Awareness and Resilience for Administrators (3 Credits)
CARE (Cultivating Awareness & Resilience in Education) for administrators is a program that helps administrators handle stress and build their personal leadership capacities. The goal of CARE is to offer administrators tools and resources for reducing stress, preventing burnout, enlivening their leadership to help staff and students thrive. Cross-listed with EDUC 5402. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

INTE 5403 - Systemic Implementation of SEL (3 Credits)
This course focuses on Systemic SEL in which students will examine strategies for actively engaging students in learning and practicing social emotional competencies across classrooms and school environments, and in partnership with families and communities. Cross-listed with EDUC 5403. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5565 - Learning with Social Media and Networking (3 Credits)
The focus of this course is on how educators leverage networked social tools, technologies, and environments to address educational needs, opportunities, and problems of practice; and establish and nurture their own professional learning through participation in digital cultures. Cross-listed with INTE 4665. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5566 - Developing Self-Paced Online Modules (3 Credits)
Students use a variety of tools and strategies to develop self-paced eLearning courseware, such as tutorials. The course covers critical aspects of the instructional development process that support the creation of effective self-paced online learning experiences, materials and resources. Cross-listed with INTE 4666. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5570 - Crafting Synchronous Learning (3 Credits)
Webinars and other live online events are an increasingly popular approach to the delivery of learning and professional development opportunities. Informed by theory and research, students plan for and facilitate live learning events delivered via synchronous online technologies. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5580 - Producing Media for Learning (3 Credits)
Students develop and integrate media resources into eLearning environments, applying principles of media selection and multimedia learning. Students explore a variety of tools for producing audio, video, and multimedia content and examine ways to enhance eLearning courses through multimedia presentation and engagement resources. Cross-listed with INTE 4680. Max hours: 3 Credits.
Grading Basis: Letter Grade
INTE 5711 - Creative Designs for Instructional Materials (3 Credits)
This course is a project-based exploration of design theories, principles, and best practices for communicating information to diverse learning audiences. Students apply unique design approaches and formats to the creation of materials for teaching, learning, and being of service to underrepresented communities. Cross-listed with INTE 4711. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5830 - Special Topics in Learning Design and Technology (0.5-4 Credits)
Topics vary depending on specific areas within learning technologies. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Typically Offered: Fall.

INTE 5840 - Independent Study: Learning Technologies (1-4 Credits)
Restriction: Restricted to graduate level students. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Graduate level students.

INTE 6720 - Research in Learning Design and Technology (3 Credits)
Analysis, evaluation, and production of research in instructional technology. Methods for observing instruction, assessing learning, and collecting participants reports to improve instruction. Development of recommendations for action based on research findings. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 6730 - Digital Pedagogy Lab (2-3 Credits)
Digital Pedagogy Lab is an international professional development gathering for educators committed to issues of diversity, equity, inclusion, critical digital pedagogy and imagining a new future for education. The Lab is a space for teachers, students, librarians, administrators, and technologists interested in inquiry, praxis, and social justice. Max hours: 6 Credits.
Grading Basis: Satisfactory/Unsatisfactory

INTE 6750 - Trends and Issues in Learning Design and Technology (3 Credits)
This course examines definitions, history, core concepts, and current trends and issues related to the practice of instructional technology. Topics include instructional systems design, theories of learning and instruction, change management, performance improvement, emerging technologies, equity and access, and mobile learning. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 6840 - Independent Study: Learning Technologies (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

INTE 6930 - Internship: Learning Technologies (3 Credits)
Placement in a business, school or field setting where professional skills are applied to assess needs, design, develop and evaluate an instructional system, and provide leadership for change. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

INTE 6950 - Experiential Thesis (3 Credits)
The Experiential Thesis course is provides the opportunity and support necessary for students to produce their final thesis project. The course gives students the freedom to design a thesis project which demonstrates their study in LDT. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

INTE 6999 - Leadership for Technology Innovation (3 Credits)
This course examines principles and strategies for leadership in a school, library, district, or organization aiming to improve its use of educational technology. Course learning essentials include how to: deal with competing voices; promote organizational change; assess and analyze technology use; pursue continuous improvement; employ strategic planning practices; implement effective programs; ensure sound professional development; wrestle with pressing leadership challenges; and secure funding (grant writing). Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7100 - Professional Learning and Technology (3 Credits)
Examines research surrounding the design and delivery of professional development (PD) programs in K20 and workplace settings. Projects and activities address: adult learning; PD models; design and; performance support and evaluation; career development and digital presence; and online tools. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7110 - Mentoring, Coaching and Training (3 Credits)
In this course students examine research surrounding the design and delivery of professional learning (PL) programs in K20 and workplace settings. Projects and activities address: adult learning; PL models; design and; performance support and evaluation; career development and digital presence; and online tools. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7130 - Professional Learning: Perspectives and Practices (3 Credits)
In this course students develop and evaluate large-scale learning initiatives in K20 and workplace settings. Topics include: frameworks for evaluating job performance based on professional learning standards; planning, delivering, and evaluating professional learning initiatives; research models; and performance improvement tools and resources. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7150 - Engaging in Education Advocacy (3 Credits)
This course will look at the theoretical foundations and critical issues of advocacy, elements of advocacy planning, and strategies for action. You will deepen your understanding of advocacy tools, processes and models in an effort to help you imagine how to utilize advocacy in your own practice. A primary focus will be on the connection of community organizations and schools. Cross-listed with INTE 5150. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7840 - Independent Study: Learning Design and Technology (1-6 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
INTE 7930 - Internship: Professional Learning (3 Credits)
Working under the direction of field and academic supervisors in field settings, contribute to projects intended to help educators and other workers improve their job performance. Apply your knowledge to complex problems of practice, thus preparing for ongoing leadership opportunities. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCHL 5030 - Cultivating Learning Skills in Library Leadership (3 Credits)
In an increasingly shifting world and work force, both our student and adults will need to demonstrate learning skills to thrive in K-12 and post-secondary world. Teacher-librarians are guides for students and staff in ALL learning skills. Collaboration, innovative thinking, critical thinking and are areas of library leadership covered. Cross-listed with SCHL 4030. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCHL 5040 - Information Storage and Utilization (2 Credits)
Provides basic principles and practices of utilizing standard methods for organizing, accessing and storing information. Includes cataloging and classification in text-based and electronic systems. Max hours: 2 Credits.
Grading Basis: Letter Grade

SCHL 5100 - School Libraries in the Digital Age (3 Credits)
An introduction to the School Library profession, including its history, standards, organizations, and current trends. Course focuses on foundational principles and roles of school librarianship, as well as methods for developing a culturally responsive resource collection, both print and electronic. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCHL 5160 - Managing School Libraries (3 Credits)
Case studies in the organization and administration of school library and instructional leadership of programs and projects. Topics include project management, personnel administration, budget development, management strategies, copyright and intellectual freedom. Cross-listed with SCHL 4160. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCHL 5200 - Promoting Literature in Schools (3 Credits)
Approaches the school library as a resource to promote literacy and development in children and young adults. Topics include genres of literature, methods for advising students towards appropriate reading and media resources, and the promotion of multiple literacies - information, new media, and transliteracy. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCHL 5830 - School Library Workshop (0.5-4 Credits)
Specific content and titles vary depending upon the particular school library skills addressed in the course. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

SCHL 5913 - School Library Field Experience (3 Credits)
Field experiences in selected K-12 school libraries that meet a high professional standard. The course serves as a capstone experience for endorsement and master's degree plans and helps induct students into the School Library profession by bridging theory and practice. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Learning Design and Technology, MA

Introduction

The courses in the Learning Design and Technology (LDT) MA program are fully online unless specified otherwise. Once admitted, students begin a plan of study that typically takes about two years to complete.

During the last semester of a MA program, students complete a professional portfolio, an online course project, or a thesis-type written project in lieu of a comprehensive exam. Each student seeking a MA in LDT will consult with their Faculty Advisor/Mentor to determine which comprehensive project best meets your professional needs. This is a step beyond the “certificate” capstone explained in some of the certificates.

Program Requirements

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTE 5360</td>
<td>Critical Digital Pedagogy</td>
<td>3</td>
</tr>
<tr>
<td>INTE 6950</td>
<td>Experiential Thesis</td>
<td>3</td>
</tr>
</tbody>
</table>

Students select 1-2 certificates from the five certificate options plus complete these required courses for the MA if not completed via a certificate:

Additional coursework to reach a total of 30 semester hours can be any graduate-level INTE course (INTE 6930 is recommended) OR from the Thematic Course Categories with Faculty Advisor approval.

Courses are offered only in certain semesters and courses should be taken in a particular sequence based on when you start the program. Advising is required prior to enrolling in a course, even as a non-degree student, in order to ensure the most effective course sequencing and availability of courses.

MA Learning Design and Technology requires a total of 30 graduate-level semester hours plus portfolio in the final semester. Course requirements for the 30 semester hours are as follows:

- Students select one or two certificates from the five certificate options:
  - Digital Pedagogies and New Literacies Certificate (p. 605)
  - Leadership: P-12 Library Program Certificate (p. 604)
  - Leadership for Learning Design and Technology Certificate (p. 606)
  - Learner-centered Instructional Design Certificate (p. 607)
  - Online Teaching and Learning Certificate (p. 608)
- INTE 5360: Critical Digital Pedagogy and INTE 6950: Experiential Thesis are required courses for the MA if not completed via a certificate
- Additional coursework to reach a total of 30 semester hours can be any graduate-level INTE course (INTE 6930 Internship: Learning Technologies is recommended) OR from the Thematic Course Categories (https://education.ucdenver.edu/academic-services/student-resources/thematic-course-categories/) plus Faculty Advisor approval
Teacher Librarian Endorsement

Introduction

The Teacher Librarian K-12 endorsement program within the Learning Design and Technology (LDT) master’s degree program is a revised and approved teacher librarian education program that leads to the Colorado Department of Education (CDE) endorsement for teacher librarians. The endorsement can be completed as a stand-alone endorsement (without the MA) or as part of the LDT MA. The program integrates 21st Century Learning Standards as approved by the American Association of School Libraries with Common CDE content standards and leadership competencies. As a teacher librarian, you will provide collaborative instructional planning, facilitation of professional learning, utilization of information literacy and media literacy, online instructional resources, and teacher leadership through the management of your library program.

The courses in this program are fully online unless specified otherwise. Once admitted, students begin a plan of study that typically takes about 18 months to complete. Consult the program website (https://education.ucdenver.edu/academic-services/student-resources/graduate/learning-design-technology/) for more information.

Program Requirements

Students have a choice between a teacher librarian endorsement-only and a full master’s program with or without a teacher-librarian endorsement. The endorsement requires a minimum of 24 graduate semester hours. Students complete a plan of study consisting of courses and professional field experience. Students must be licensed as a teacher or plan to complete a licensed teacher prior to seeking the additional endorsement as a Teacher Librarian. The teaching license is a Colorado Department of Education requirement.

Courses are offered only in certain semesters and courses should be taken in a particular sequence based on when you start the program. Advising is required, even as a non-degree student, in order to ensure the most effective course sequencing and availability of courses.

Select one of the following options.

**Option A:** The CDE-approved Teacher Librarian endorsement consists of 24 semester hours, which includes the Leadership: P-12 Library Program Certificate (p. 604) and the Digital Pedagogy and New Literacies Certificate (p. 605) plus SCHL 5913 School Library Field Experience.

**Option B:** The CDE-approved Teacher Librarian endorsement consists of 24 semester hours, which includes the Leadership: P-12 Library Program Certificate (p. 604) and two endorsement-approved courses from other SEHD or LDT certificates plus the required SCHL 5913 School Library Field Experience, INTE 5300 Critical Digital Literacies and INTE 5360 Critical Digital Pedagogy.

² Digital Pedagogy and New Literacies Certificate
Leadership: P-12 Library Programs Certificate

Introduction

Graduate Certificate
Equips teacher librarians to lead the way in digital, media, and information literacy development in their schools and create an inclusive, future-ready learning culture for building essential student skills.

Program Requirements
If you are seeking a K12 Teacher Librarian endorsement now or in the future, you will need to complete SCHL 5913 as your capstone course. Contact your Faculty Advisor if you have a question about which capstone you should be completing.

Digital Pedagogies and New Literacies Certificate

Introduction

Graduate Certificate
This credit-bearing graduate certificate equips individuals with a bachelor’s or master’s degree with the tools they need to provide students with an equitable, engaging, and meaningful digital education experience. This certificate aims to foster dynamic, inquisitive, and forward-thinking educators capable of identifying and solving the challenges facing digital education today, including issues of diversity, equity, inclusion, anti-racism, and the development of more student-centered design and instructional approaches.

*Your faculty advisor will discuss which course option best pertains to a student’s professional path. If a student is earning the K12 Teacher Librarian endorsement, there is a required field experience course (SCHL 5913) that will need to be met prior to determining your final certificate course.

Total Hours 12
Leadership for Learning Design and Technology Certificate

Introduction

CU Denver's Leadership for Learning Design and Technology certificate focuses on transformative change, culture, and initiative for modern learning organizations; with distinct themes of vision building, culture shifting, innovation nurturing, business modeling, and knowledge management.

Program Requirements

Through this 12 semester hour certificate, you will participate in a learning community that stresses inclusive values, social learning, open sharing, and knowledge construction. You will learn about emerging trends and issues and relevant research and best practices, and use a variety of digital media platforms and development tools. The course assignments focus on solving professional problems of practice in your own school and organizational settings.

Your faculty advisor will discuss which capstone course option best pertains to a student's professional path. If a student is earning the K12 Teacher Librarian endorsement, there is a required field experience course (SCHL 5913) that will need to be met prior to determining your final certificate course.

Learner-centered Instructional Design Certificate

Introduction

Graduate Certificate

CU Denver’s Learner-centered Instructional Design certificate focuses on human centered design, learning engagement and motivation, and learning frameworks. You’ll explore distinct themes of design-thinking, learning aesthetics, universal design, and system usability.

Program Requirements

Through these courses you will participate in a learning community that stresses inclusive values, social learning, open sharing, and knowledge construction. You will learn about emerging trends and issues and relevant research and best practices, use a variety of digital media platforms and development tools, and design a number of learning products and resources worthy of showcasing in a professional portfolio. The course assignments focus on solving professional problems of practice in your own school and organizational settings.

We recommend you complete the one required course (INTE 5100) before you take all of the other “application” courses. If you begin the program in Fall or Spring, please enroll in INTE 5100 as your first course in the certificate. If you begin the program in Summer, please contact your Faculty Advisor to create a plan of action for your certificate program completion (INTE 5100 isn’t typically offered in summer.) If you have paired the Learner-Centered Instructional Design Certificate with the Online Teaching & Learning (OLT) Certificate, follow the sequence for OLT first.

Online Teaching and Learning Certificate

Introduction
CU Denver’s Online Teaching and Learning certificate focuses on effective online & hybrid learning designs, high impact practices, and modern learners; with distinct themes of instructional design, inclusive pedagogies, active learning, and emerging pedagogies.

Program Requirements
Through these courses you will participate in a learning community that stresses inclusive values, social learning, open sharing, and knowledge construction. You will learn about emerging trends and issues and relevant research and best practices, and use a variety of digital media platforms and development tools. The course assignments focus on solving professional problems of practice in your own school and organizational settings.

It’s recommended you complete the three required courses in the following order because they build on each other: INTE 5200, INTE 5250, and INTE 5670. You may take the elective course at any time, including concurrently with one of the required courses. If you start the program in Summer or Fall, please enroll in INTE 5200 as your first course in the certificate. If you start the program in Spring, please contact your Faculty Advisor to create a plan of action for your certificate program completion.

Prosocial Leader Graduate Certificate

Introduction
The Prosocial Leader certificate is designed for school leaders who are interested in leading schoolwide social and emotional learning (SEL) programs. This professional learning experience consists of three non-credit courses remotely facilitated in partnership with CREATE and the Prosocial Leader Lab.

Certificate Requirements
Participants may choose the following options:

- Complete all three courses for a non-credit OR
- Participants will be able to request to convert the Prosocial Leader courses to graduate credits after the completion of each course for an additional cost per course.

Research and Evaluation Methods

Office: Lawrence Street Center, 701
TelephoneNumber: 303-315-6300
Email: academicservices@ucdenver.edu
Website: https://education.ucdenver.edu/

Overview

The MA in Research and Evaluation Methods (REM) degree prepares students to lead in professional practice in the following responsibilities:

1. Interpreting, analyzing, and applying research in educational settings;
2. Applying knowledge about research methods, statistics, and measurement; and
3. Applying inquiry skills and creative thought in solving practice-based problems.

Grading Basis: Letter Grade

Research and Evaluation Methods (RSEM)

Courses

- RSEM 5000 - Special Topics (3 Credits)
  Specific topics vary from semester to semester. Cross-listed with RSEM 4001. Max hours: 3 Credits.
  Grading Basis: Letter Grade

- RSEM 5050 - Classroom Assessment (3 Credits)
  This course strengthens educator classroom assessment practice. It provides students with a foundational understanding of quality measurement practices to support evaluation of assessment instruments and tasks, determination of appropriate scoring approaches, and interpretation of state and district assessment results. It also deepens students’ formative assessment practice supported by practical strategies and tools. Finally, it facilitates student integration of formative and summative uses of assessment with instruction and planning.
  Repeatable. Max Hours: 6 Credits.
  Grading Basis: Letter Grade

- RSEM 5080 - Research In Schools (3 Credits)
  Provides teachers with the competencies necessary for examining their professional experiences using formal and informal methods of inquiry. Teachers become more reflective practitioners who investigate questions that arise from their work in schools. The course also prepares teachers to critique published research in a thoughtful manner. The intended audience for the course is beginning and experienced P-12 teachers.
  Repeatable. Max Hours: 6 Credits.
  Grading Basis: Letter Grade

- RSEM 5100 - Basic Statistics (3 Credits)
  A first-level course on the use and interpretation of descriptive and inferential statistics. Topics covered include: frequency distributions, measures of central tendency and measures of variability; shapes of distributions; standard scores; scattergrams, correlation and regression; and t-tests.
  Repeatable. Max Hours: 6 Credits.
  Grading Basis: Letter Grade

- RSEM 5110 - Introduction to Measurement (3 Credits)
  A first-level course that examines the nature and purpose of psychological measurement. Particular attention is paid to the concepts of reliability, validity, norms, interpretation of scores, response sets, fairness in testing, and norm-referenced vs. criterion-referenced interpretation of scores.
  A variety of instruments that are used to measure human attributes and behaviors are studied.
  Repeatable. Max Hours: 6 Credits.
  Grading Basis: Letter Grade

- RSEM 5120 - Introduction to Research Methods (3 Credits)
  This is a survey course that examines the purposes of research, the methods of quantitative, qualitative, and mixed research, and the processes involved in research studies. The primary aims of this course are to improve your skills as an informed consumer of research and to provide you with the skills to conduct your own research.
  Cross-listed with RSEM 4120.
  Max Hours: 3 Credits.
  Grading Basis: Letter Grade

- RSEM 5600 - Issues in Assessment Development (3 Credits)
  This is the first course of a three-course series for a Classroom Assessment Certificate. The course focuses on developing the conceptual knowledge and technical skills required to help K-12 practitioners develop valid, reliable, and fair assessment of student learning.
  Max Hours: 3 Credits.
  Grading Basis: Letter Grade

Programs

- Research and Evaluation Methods, MA (p. 614)
- Applied Measurement Certificate (p. 615)
- Applied Statistical Modeling Certificate (p. 616)
- Classroom Assessment Certificate (p. 617)
- Program Evaluation Certificate (p. 618)

Faculty

Professors:

- Alan Davis, PhD, University of Colorado, Boulder
- Nancy Leech, PhD, Colorado State University
- Kent Seidel, PhD, University of Cincinnati
- Alan Davis, University of Denver

Clinical Assistant Professor:

- Courtney Donovan, PhD, University of Denver

Grading Basis: Letter Grade

RSEM 5610 - Formative and Summative Assessment in the Classroom (3 Credits)
This is the second course of a three-course series for a Classroom Assessment Certificate. The course focuses on developing conceptual knowledge and technical skills required to develop and implement formative and summative assessments to support student learning.
Prereq: RSEM 5600. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 5600

RSEM 5620 - Analyzing, Using, and Reporting Assessment Results (3 Credits)
This is the third course of a three-course series for a Classroom Assessment Certificate. The course focuses on developing conceptual knowledge and technical skills required to develop and implement formative and summative assessments to support student learning.
Prereq: RSEM 5610. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 5610

RSEM 5800 - Workshop: Topics in Research and Evaluation Methodology (1-4 Credits)
Topics and credit hours vary from term to term. Often workshops address a current topic in research, evaluation, or measurement by considering its scholarly foundations and its application to schools and other educational settings. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

RSEM 5840 - Independent Study: RSEM (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

RSEM 5910 - Practicum in Research and Evaluation Methodology (1-4 Credits)
Supervised work in projects that provide experience in data analysis, research, measurement, or evaluation. Requires a minimum of 75, 150, 225, or 300 clock hours under supervision (for 1, 2, 3, or 4 credit hours, respectively). Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.

RSEM 6050 - Seminar in Assessment Policy Issues (3 Credits)
Three public policy issues involving educational assessment are analyzed. The policy issues selected vary to reflect current policy debates. Sample issues are school accountability, grading and report cards, performance-based graduation standards, classification of students as having special needs, merit pay for teachers, and retaining students in grade. Each analysis examines (a) policy history; (b) value assumptions and constituency interests; (c) validity of assessment procedures; and (d) consequences of policy alternatives. Prereq: RSEM 5050 or RSEM 5110. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 5050 or RSEM 5110

RSEM 6200 - Single Case Research Design for Education (3 Credits)
This course provides an overview of Single Case research Design (SCRD) within educational settings. The course will describe single case designs (SCD), specify the types of questions that SCD's are designed to answer, discuss the internal and external validity of SCD's, outline SCD standards, and describe implementation of different SCD's. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 6500 - Teacher as Researcher (3 Credits)
Taken concurrently with Contextual Curriculum II, this course provides opportunities to engage in inquiry while analyzing professional experiences within their classroom context, sharing data/results from an action research project and critiquing and synthesizing published educational research. Max Hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 6950 - Master's Thesis (1-4 Credits)
A master's thesis is part of the degree track options. Credit hours, topic, and workload are determined by the student's advisor. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP

RSEM 7000 - Doctoral Seminar in Research Methods (3 Credits)
Designed for students beginning doctoral work, explores conducting and evaluating qualitative and quantitative research. The chain of reasoning linking the conceptualization of a research problem, the posing of questions, and the collection and interpretation of evidence is examined. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHDPhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development. Typically Offered: Fall.

RSEM 7001 - Applied Research Methods I (3 Credits)
Introduces students to principles of quality research design, and provides a conceptual and hands-on procedural introduction to quantitative and qualitative methods common in education-related research. Takes an explicit focus on understanding and mitigating potential biases in research methods and design. Restriction: Restricted to LDRE-EDd students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to LDRE EDd majors within the School of Education and Human Development

RSEM 7002 - Applied Research Methods II (3 Credits)
Prepares students with conceptual knowledge and procedural skills of designing quality, applied research from critical and pragmatic perspectives. Focus on quantitative analysis methods, including survey and assessment item development. Students continue deeper review of extant literature for intended dissertation topic. Prereq: RSEM 7001 or permission from the instructor. Restriction: Restricted to LDRE-EDd students. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7003 - Applied Research Methods III (3 Credits)
Content will focus on qualitative data collection and analysis methods, and mixed methods design including program evaluation and improvement research. Students will work with faculty on development of dissertation in practice design. Prereq: RSEM 7002 or permission from the instructor. Restriction: Restricted to LDRE-EDd students. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7500 - A Year of Research (1-4 Credits)
Coinsidered an independent study, the focus is on the development of a dissertation proposal. Regular meetings with the instructor are required to provide feedback, guidance, and review drafts of proposals. Credit hours and workload are determined by the student's advisor. Repeatable. Max Hours: 4.
Grading Basis: Letter Grade
Restriction: Restricted to LDRE-EDd students

RSEM 8050 - Practicum II: Externship in Research and Evaluation Methodology (1-4 Credits)
Interim professional experiences that provide opportunities for professional growth. Topics and credit hours vary from term to term. Repeatable. Max hours: 4.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
RSEM 7010 - Educational Assessment And Measurement (3 Credits)
This advanced course incorporates foundational knowledge and application of assessment and measurement tools in school settings. Foundational concepts are utilized to better understand student achievement and growth indicators, and inferences about school and educator effectiveness; survey measures are also addressed. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7050 - Methods of Survey Research (3 Credits)
Covers the purposes and methods of survey research. Topics included are: goals and uses of survey research, data collection methods, questionnaire and interview protocol design, reliability and validity of data collection methods, sampling, ways to reduce error in data collection and sampling, data analysis techniques commonly used in survey research studies, interpreting and reporting results, and ethical issues. Students design and conduct a survey as part of the course requirements. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

RSEM 7080 - Methods of Qualitative Inquiry (3 Credits)
Prepares graduate students to conduct field research employing qualitative methods and perspectives. Students become familiar with evolving theoretical and methodological perspectives in qualitative research. Students practice and apply observation, interview, and discourse data collection and analysis techniques. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

RSEM 7100 - Advanced Methods of Qualitative Inquiry (3 Credits)
An advanced seminar directed at individuals who have completed an introductory course in methods of qualitative research. Topics included are qualitative data collection, data analysis, and writing about data. Prereq: RSEM 7080. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 7080
Typically Offered: Spring.

RSEM 7110 - Intermediate Statistics (3 Credits)
Prepares graduate students with advanced methods of analyzing quantitative data using inferential statistics. Topics covered are chi-square; one-way ANOVA and factorial ANOVA; correlation and multiple regression; introductions to other multivariate techniques; power and effect size; and quantitative methodology. Software: SPSS, JASP, R, JAMOVI. Prereq: RSEM 5100. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 5100

RSEM 7120 - Advanced Methods in Quantitative Inquiry and Measurement (3 Credits)
Covers advanced topics in quantitative design and analysis, including advanced measurement topics. Topics include: specific types of design used in experimental, quasi-experimental, co-relational, and survey research; multivariate ANOVA, ANCOVA and MRC; factor and trend analyses; classical test theory; and IRT approaches. Students analyze their own data using techniques presented in the course. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

RSEM 7130 - Advanced Measurement: Item Response Theory (3 Credits)
This course will consider theory and methods for the educational and psychological measurement of latent variables using item response theory. Students will understand and be able to apply concepts from item response theory, specifically the Rasch model, to understand, evaluate, and construct measures. Recommended students have Introduction to Statistics and a survey design course. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7140 - Management & Secondary Analysis of Large Datasets (3 Credits)
Large education, community, and health datasets are underutilized research resources, providing large samples and longitudinal data otherwise too costly and time-consuming to collect. Students will work in their discipline area to learn to access, manage, and appropriately analyze extant datasets. Prereq: RSEM 7110 Intermediate stats or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7150 - Mixed Methods Research (3 Credits)
This seminar is directed at individuals who have completed both qualitative and quantitative research courses and are interested in combining these in the mixed-method approach. Focus will be on developing the skills and knowledge needed to formulate mixed-methodological research questions in which quantitative and qualitative data collection, analysis and interpretational techniques are utilized simultaneously or sequentially. Prereq: RSEM 6100 and RSEM 7110. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 7110

RSEM 7200 - Ethnography (3 Credits)
This course is designed for persons interested in studying the phenomenon of learning in family and community contexts. The course blends foundational readings in the learning sciences and the ethnography of education with "participant-observation" fieldwork. The fundamentals of ethics regarding studies involving human persons, building relationships with study participants, becoming an "observant participant," writing field notes, and co-authoring meaning with study participants will be covered. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7210 - Program Evaluation in Schools (3 Credits)
This advanced course incorporates foundational knowledge and application of the topic of program evaluation as it applies to inquiry and decision making in schools and other educational settings. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7220 - Program Evaluation Theory and Design (3 Credits)
This course introduces a variety of program evaluation theories, designs, approaches, and tools useful for evaluating a program or policy, including needs assessment, formative and summative evaluations, process evaluation, monitoring outputs and outcomes, impact assessment, and cost analysis. Max hours: 3 Credits.
Grading Basis: Letter Grade
RSEM 7300 - Research Grant Writing (3 Credits)
The purpose of this course is to provide students with a deep understanding of grants and writing grant proposals targeted to major funders’ requests for proposals. Students will learn the parts of a grant proposal, writing style difference, budgets, participate in a mock grant reviewer panel, and write a full grant proposal. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7400 - Culturally Responsive Research and Evaluation Methods (3 Credits)
This course introduces a variety of culturally responsive paradigms, theories, and methodologies to examine their impact on traditional research and evaluation methods. The course will examine the role of ways of addressing power, privilege, and social justice frameworks. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Summer.

RSEM 7500 - Special Topics: Research and Evaluation Methods (1-6 Credits)
Specific topics vary from semester to semester. Restriction: Restricted to graduate level students. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Graduate level students.

RSEM 7700 - Multilevel Modeling: HLM (3 Credits)
Focus is on the analysis of nested data (e.g., students within classrooms and schools, public transportation users within cities) using HLM. Applications include multilevel multiple regression, growth models, and experimental designs. Familiarity with multiple regression and factorial ANOVA is required. Prereq: RSEM 7110 Intermediate Statistics or equivalent. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 7110
Typically Offered: Fall.

RSEM 7800 - Structural Equation Modeling (3 Credits)
This course assumes no prior experience with Structural Equation Modeling, and serves as both theoretical and practical introduction. We will relate SEM to participants’ previous knowledge of multiple linear regression, then expand to examine correlated and causally related latent constructs. Prereq: RSEM 7110: Intermediate Statistics or equivalent, or instructor consent. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 7110 Restriction: Restricted to Graduate level students
Typically Offered: Fall.

RSEM 7840 - Independent Study: RSEM (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

RSEM 7900 - Thesis/Dissertation Proposal Writing (3 Credits)
This course is designed to provide you with a structure and support for developing the initial elements of your dissertation or thesis proposal. This course can be considered an 8week intensive writing session providing a framework for completing a solid first draft by week 8. Max hours: 3 Credits.
Grading Basis: Letter Grade
Research and Evaluation Methods, MA

Introduction
Students acquire skills necessary for a variety of roles that involve data-driven decisions. Students are prepared to facilitate decision-making based on evidence. Some students pursue the degree to enhance their skills as classroom teachers. Others work in environments where information and data from different sources are used to make informed decisions.

Total Hours 30

Program Requirements and Courses
To complete the REM program and earn a master’s degree, students must complete the appropriate course work as outlined in the tables above. All courses require a grade of B- or better to count to the MA and a 3.0 minimum GPA is required for graduation. Students have 7 years in which to complete the degree.

Graduate Certificates
Students may combine a graduate certificate in Applied Measurement (p. 615), Applied Statistical Modeling (p. 616), Classroom Assessment (p. 617), or Program Evaluation (p. 618) with their degree requirements.
Applied Measurement Certificate

Introduction
Measurement is vital to the social science field as we study people's aptitude, learning/achievement, experiences, personality traits, and states of being. The Measurement certificate will develop your expertise by combining measurement theories, statistical modeling techniques, and observing human behavior. Students learn to use, create, and validate measures through Classical Test Theory and Item Response Theory. Our students work with real data in applied environments with applications in education, policy, counseling, and psychology fields. Students learn to write for publication and to communicate results to practitioners, the direct users of these scales.

Program Delivery
- This is a fully online program.

Program Requirements

Certificate Structure
The certificate consists of four courses, totaling 12 credit hours, and may be earned in one year. Courses may be taken as part of the certificate as well as used toward the Master of Arts in Research and Evaluation Methods (p. 614).

Applied Statistical Modeling Certificate

Introduction

The Applied Statistical Modeling certificate is an ideal endorsement for those looking to learn advanced modeling skills. These classes will teach you to think and reason with quantitative data, especially using large scale datasets. You will learn to build model to test conceptual frameworks and communicate findings in a manner that is useful to those working in applied/field settings.

Delivery Method

- This certificate is available fully online and in a hybrid format.

Program Requirements

Certificate Structure

The certificate consists of four courses, totaling 12 credit hours, and may be earned in one year. Courses may be taken as part of the certificate as well as used toward the Master of Arts in Research and Evaluation Methods (p. 610).

Note: All students are required to meet a prerequisite in introductory statistics (RSEM 5100 Basic Statistics or equivalent) prior to taking courses in the Applied Statistical Modeling Certificate.
Classroom Assessment Certificate

Introduction

The Classroom Assessment Certificate is designed for educators such as teachers, administrators, coaches, program leaders, and curriculum leaders, who desire to learn how to develop, select, use, administer, and interpret educational assessments. The goal of this certificate is for participants to become well-informed assessment designers and developers, critical assessment consumers, assessment evaluators, and advocates of reliable, valid and fair assessments for culturally and linguistically diverse populations. Students will:

- Develop quality assessments, which provide reliable and valid information for making instructional decisions at the classroom and at the school level.
- Become aware of the role of classroom assessment in the context of high-stakes testing and how it can help to maximize student learning and achievement.
- Become critical users of assessment instruments and assessment information.
- Become users, developers, and advocates of assessments, which are fair, reliable, and valid for diverse populations.

Delivery Method

- This is a fully online program.

Program Requirements

Certificate Structure

The certificate is designed as a three-course sequence and one elective course. Each course in the three-course sequence is designed to provide knowledge and skills that are considered building blocks for the next courses. The three courses are designed around four ideas, which are spiraled in the courses and allow participants to achieve the learning goals: assessment development, evaluation of assessments (validity, reliability, and fairness), consumers of assessments (selection of assessments and interpretation of large-scale assessment data), and issues of validity, reliability, bias, and fairness of assessments for diverse populations. The elective course is chosen to complement students’ academic and professional goals and interests.

The certificate consists of four courses, totaling 12 credit hours, and may be earned in one year. Courses may be taken as part of the certificate as well as used toward the Master of Arts in Research and Evaluation Methods (p. 610).

Program Evaluation Certificate

Introduction
Evaluation specialists are in high demand! The Program Evaluation certificate provides both the theoretical knowledge and real-world experience to make our students well rounded, career-ready evaluators.

In this four-course series, students learn leading theories of program evaluation, explore evaluation design processes, and gain practical experience by developing and conducting at least one evaluation for a client. Students learn to collaborate with stakeholders to design meaningful evaluations, develop strong quantitative and qualitative analytical skills, examine ethical considerations in evaluation, and construct reports to target multiple program users. Examples and experiences provided are varied within P-12 school settings, non-profit and community settings, large scale policies, and culturally responsive evaluation.

Delivery Method
- This certificate is available fully online and in a hybrid format.

Responsive Literacy Education

Overview

The Responsive Literacy Education program provides educators with advanced knowledge and training to work with diverse student populations as they develop reading, writing, and oral language skills. Course work includes language and literacy acquisition, culturally relevant teaching practices aligned to the sciences of reading and writing, literature, literacy assessment to inform instruction, hands-on practica, and other areas.

The MA degree options in Literacy Education will enhance your literacy instruction skills and credentials while providing advanced knowledge and training to work with diverse student populations as they develop reading, writing, and oral language skills. The program requires access to students in order to complete the methods courses. We stress the importance of recognizing a variety of literacies - home, school, community, and mainstream - in both first and second languages, and the meaningful use of literacy and language to improve students’ quality of life.

By placing emphasis on the reading, writing, oral and visual language development of culturally, linguistically and academically diverse student populations, this master’s program is at the forefront of the field. Importance is placed on using theory, inquiry and personal reflection to inform classroom practice. The program prepares teachers to become decision makers capable of developing scientifically-based and learner-centered curricula where each student’s reading and writing abilities are assessed to address developmental or special needs.

Programs

- Literacy Education, MA (p. 623)
- Literacy Education in English Education, MA (p. 624)
- Early Literacy Certificate (p. 625)
- Literacy and Language Development for Diverse Learners Certificate (p. 626)

Literacy, Language, & Culturally Responsive Teaching (LCRT)

LCRT 5000 - Elementary Literacy Instruction and Assessment Part 1 (3 Credits)
This course develops an appreciation, understanding, and application of literacy assessment and instruction in PK-6 classrooms. Interns learn how to use various types of assessment and instruction for reading and writing that address the literacy needs of PK-6 Students. Cross-listed with LCRT 4000. Restriction: Restricted to students in the Teacher MA, ECE Licensure or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: TCHR-MA, BMA, ECSE-LICG, ECSO-LICG, SPCE-ENIG and SPCO-ENIG.

LCRT 5001 - Elementary Literacy Instruction and Assessment Part 2 (3 Credits)
This course develops an appreciation, understanding, and application of literacy assessment and instruction in PK-6th classrooms. Interns learn how to use various types of assessment and instruction for reading and writing that address the literacy needs of PK-6th Students. Cross-listed with LCRT 4001. Prereq: LCRT 4000 or LCRT 5000. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
PreReq: LCRT 5000 or LCRT 4000. Restriction: TCHR-MA plan or BMA subplan.

LCRT 5020 - Reading Development, Instruction and Assessment (3 Credits)
This course involves critical examination of reading process and instruction. Teachers develop an understanding of the principles of sociopsycholinguistic theory in learning and teaching. Organization options for reading instruction for native and non-native speakers of English at all ages and ability levels will be examined. Teachers become familiar with materials and methods used for reading and reading instruction in schools, including multicultural materials, students’ interaction with and response to materials; and techniques to assess and evaluate students reading. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5028 - Developing Strategic Readers, Grades 4-12 (3 Credits)
Focuses on supporting adolescents’ developing literacy understandings especially related to vocabulary, reading comprehension, writing, and student engagement across all content areas in the upper elementary grades through high school. Importance is placed on putting new teaching practices in place. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5029 - Developing 21st Century Literacy Curriculum, Gr 4-12 (3 Credits)
Focuses on adolescents’ developing literacy understandings across all content areas upper elementary grades through high school. Attention is given to comprehension and critical thinking including assessment, unit planning, problem-based learning, research cycles, technology, and putting new teaching practices into place. Max hours: 3 Credits.
Grading Basis: Letter Grade
LCRT 5055 - Literacy Assessment & Informed Instruction (3 Credits)
Focuses on reading, writing, and language assessments and their use to plan and deliver informed classroom and intervention instruction. Principles of literacy assessment, state and federal law, instructional strategies and interventions are learned through creation of student literacy profiles. Needs of both L1 and L2 learners as well as other diverse learners are considered. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5100 - Secondary Literacy Instruction and Assessment (3 Credits)
Provides knowledge and practice in using specific literacy methods to enhance students’ content learning and literacy development in middle schools and high schools. Various methods of literacy assessment to guide instruction for students are emphasized. Instructional strategies for special populations, especially speakers of English as a second language, are also addressed. Cross-listed with LCRT 4100. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5150 - Culturally Relevant & Responsive Pedagogies (3 Credits)
Provides an examination of broad cultural diversity regarding the role of culture in teaching and learning in the classroom. After examining their educational contexts, students gain skills to differentiate instruction for diverse learners; foster quality instruction that demonstrates respect for cultural pluralism; and, create equitable educational environments. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.

LCRT 5200 - Theory and Methods of English Education (3 Credits)
Focuses on teaching and learning theories and practical classroom strategies for teaching English Language Arts to students in middle school and high school. Cross-listed with LCRT 4200. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5201 - Adolescent Literature (3 Credits)
Reading and evaluating fiction and non-fiction appropriate for students in middle and senior high school. Emphasis is on modern literature. Cross-listed with LCRT 4201. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5210 - Literacy Development Pre K-3rd Grade (3 Credits)
Focuses on children’s developing literacy understandings and proficiencies beginning in the preschool years. Attention is given to language development, assessment, and instruction in pre-kindergarten through third grade, partnerships with community literacy institutions provide information on their use for literacy development. Cross-listed with LCRT 4210. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5220 - Literacy Routines and Assessment, Pre K-3rd Grade (3 Credits)
This course will focus on the routines and practices which allow for student specific instruction and assessment in the Early Literacy classroom. Participants will examine and critique current literacy routines and assessments needed to best meet the needs of culturally and linguistically diverse children. Cross-listed with LCRT 4220. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5230 - Early Literacy Instruction (3 Credits)
Participants will examine Pre K-3rd grade literacy instruction to understand how to meet the needs of young students. The course will analyze instructional practices for young gifted, special needs and English language learning students to best meet the needs of all learners. Cross-listed with LCRT 4230. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5301 - Literacy Assessment & Processing: Guided Reading (3 Credits)
The course will explore the format and components of Guided Reading. Plus, including: responsive teaching, summative and formative assessment, content/language objectives, oral language development, strategies for problem solving, comprehension, fluency, word solving strategies, and the reciprocity of reading and writing. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5320 - Teaching Students with Reading Difficulties (3 Credits)
The course will explore specific teaching moves that help children build an effective literacy processing system and become independent readers. We will study areas of reading difficulty and ways of assessing students to determine their strengths and instructional needs. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5330 - Deepening Literacy Understandings (3 Credits)
This will explore the power of formative assessment for observation and interpretation of reading behaviors. We will study the continuum of literacy learning as a foundation for learning the behaviors and understandings that must be taught at each text level. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5710 - Primary Literacy for Diverse Learners, Pre K-Grade 3 (3 Credits)
This course provides teachers with a basic understanding of reading and writing development in preschool and early primary grades, while considering specific strategies for using and teaching reading and writing in early primary grades (pre-K-3). This course is cross-listed with LCRT 4710. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5720 - Writing Development, Instruction and Assessment (3 Credits)
This course combines examination of current research into effective practices of teaching writing with students’ own writing projects. The curriculum serves teachers in all subjects and grades K-12. Readings, groupings, and discussions are differentiated according to specific grade(s) taught. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with LCRT 4720. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5724 - Colorado Writing Project I (4 Credits)
Teachers will experience participating in writers’ workshop, writing several pieces, taking them through revision and workshop groups. Teachers will also read, discuss, and respond to texts about teaching writing and preparing students to take state writing tests. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.
LCRT 5726 - Colorado Writing Project II (4 Credits)
Teachers will experience participating in writers' workshop, writing several pieces, taking them through revision and workshop groups. Teachers will also read, discuss, and respond to texts about teaching writing and preparing students to take state writing tests. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

LCRT 5728 - Colorado Writing Project III (4 Credits)
Teachers will experience participating in writers' workshop, writing several pieces, taking them through revision and workshop groups. Teachers will also read, discuss, and respond to texts about teaching writing and preparing students to take state writing tests. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

LCRT 5730 - Language and Literacy Across the Curriculum (3 Credits)
Explores the value and use of reading and writing as tools for learning across the curriculum on a K-12 basis. Specific needs and strategies for assisting at-risk and second language learners are also discussed. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5750 - Children's Literature in Spanish (3 Credits)
Taught in Spanish, this course presents children's literature from Spanish speaking countries and Spanish speaking authors, along with teaching methodologies and avenues of further research in the field. Prereq: senior-level proficiency in Spanish. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5770 - Effective Literacy Instruction for Diverse Learners (3 Credits)
Focuses on exploring, applying, and evaluating research-based instructional models and learning strategies for teaching literacy to diverse learners. Students develop a professional practice of providing instruction to support oral language, academic reading, and academic writing for native speakers of English, multilingual and bidialectal learners of English. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5780 - Connecting Cultures Through Literature (3 Credits)
This course looks at the issue of multicultural literacy for K-8th grade and how children's and young adult literature can be used to create a high quality multicultural curriculum which enhances literacy development and covers all the content areas. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5790 - Children's Literature: Grimm through Graphic Novels (3 Credits)
Children's literature course exploring the historical development of children's literature and its influence on contemporary literature and media. Emphasized are various genres including both fiction and nonfiction, choosing and critiquing children's literature, and children's book awards. Graphic novels and e-books are explored as the leading edge of this area. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5795 - Current Children's Literature (3 Credits)
This course explores children's literature, including electronic books, within the past decade. A wide range of genres will be explored with a particular emphasis on newer authors and illustrators in the field. Participants will also practice critiquing children's literature and selecting books for instruction. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5810 - Oral & Written Language & Literacy (3 Credits)
Focuses on oral/written language and literacy in educational and home settings. Addresses learners with native English, English as additional language, bi-dialectal, and multilingual. Students analyze language and literacy samples using language structures and discourse patterns to develop instructional techniques. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5815 - Family Literacies in Diverse Communities (3 Credits)
Focuses on involving and connecting with families and communities of classroom learners. Students gain practical strategies to identify resources and funds of knowledge that diverse learners and families bring to schools; and, use learners' cultural resources and references to promote all aspects of learning in the classroom. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5831 - Assessment for Early Literacy Interventions (2 Credits)
This assessment course will provide background in literacy acquisition and prepare participants to administer early literacy assessment tasks which will be used to inform teaching decisions and progress monitor student growth through the Early Literacy Intervention program. Max hours: 2 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

LCRT 5835 - Special Topics: Literacy and Language (0.5-3 Credits)
Specific topics vary but will include the exploration of literacy development and instruction in particular populations or with specific focuses. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

LCRT 5840 - Independent Study LCRT (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

LCRT 5911 - Early Literacy Intervention Practicum (3 Credits)
This is the first of 2 courses of a comprehensive field experience that extends participants' understanding of literacy acquisition by integrating theory and practice and prepares them to implement the Early Literacy Intervention program within a school or district. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

LCRT 6840 - Independent Study LCRT (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

LCRT 6910 - Seminar & Practicum in Literacy and Language (3 Credits)
Provides opportunities for advanced students in the M.A. program to apply concepts acquired in course work and other educational experiences to specific situations. Students will work in schools, classrooms, administrative offices, or community centers (according to their experiences, interests and current teaching positions; sites to be identified before course begins) to study the potential for change in schools and society and to reflect upon their roles as change agents in the field. Max hours: 3 Credits.
Grading Basis: Letter Grade
LCRT 6911 - Seminar and Practicum in Literacy and Language, 7-12+ (3 Credits)
Provides opportunities for advanced students in the M.A. program to apply concepts acquired in course work and other educational experiences to specific situations. Students will work in schools, classrooms, administrative offices, or community centers (according to their experience, interests and current teaching positions; sites to be identified before course begins) to study the potential for change in schools and society and reflect upon their own roles as change agents in the field. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 6913 - Reading Recovery Practicum (4 Credits)
A practicum which refines the participants' understanding of literacy acquisition and finalizes preparation to implement the Reading Recovery Program within their school/district. Max hours: 4 Credits.
Grading Basis: Letter Grade

LCRT 6915 - Seminar and Practicum in Literacy Professional Development (3 Credits)
This final practicum is designed for teachers to enhance their education as reading professionals in two ways. First, by continuing to reflect on and analyze their own and others' teaching, participants will deepen their understanding of how to assess and design instruction based on the needs of students. Second, through structured coaching activities, participants will improve their skills in providing literacy leadership. Max hours: 3 Credits. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 6950 - Master's Thesis (4 Credits)
Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Literacy Education, MA

Introduction
Prepares educators to work with diverse K-12 students to develop reading, writing, and oral language skills. Graduates gain in-depth knowledge about building on students' languages, abilities, cultures, and real-world experiences to design highly effective and relevant teaching practices.

Program Requirements
This degree plan does not include a license or an endorsement.

Concentration Research Course
Select one of the following:
- RSEM 5050 Classroom Assessment
- RSEM 5080 Research In Schools
- Other RSEM courses with Advisor Approval

Portfolio
Final MA Portfolio due approximately 6 weeks before graduation.

Total Hours
33

Cumulative Portfolio
The MA portfolio counts as the comprehensive exam for the master's degree. The portfolio is an accumulation of the performance based assessments completed during program courses and reflects on the student's development over the course of the degree program. The portfolio is due approximately 6 weeks before graduation.

Program Requirements and Courses
To complete the Literacy Education program and earn a master's degree and/or endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better to count to the MA or endorsement and a 3.0 minimum GPA is required for graduation.
Literacy Education in English Education, MA

Introduction
This MA degree prepares licensed Secondary English or Secondary language arts teachers to work with diverse adolescents as they develop an appreciation for literature and composition. Course work includes theory and methods of English education, linking assessment and instruction, and practicum experience. The study of contemporary, ethnic, and classic literature, reading, and writing are woven together, along with speaking, listening, and viewing.

Program Requirements
This degree plan does NOT include a license or an endorsement.

Research
Select one of the following:
- RSEM 5050 Classroom Assessment
- RSEM 5080 Research in Schools
- other RSEM course with Advisor Approval

Total Hours 30

Cumulative Portfolio
The MA portfolio fulfills the comprehensive exam requirement for the master’s degree. The portfolio is an accumulation of the performance based assessments completed during program courses and reflects on the student’s development over the course of the degree program.

Program Requirements and Courses
To complete the Literacy Education program and earn a master’s degree, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

Course Scheduling
During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

Planning
For practicing full-time teachers, we recommend taking one course each fall and spring semester, and up to two courses each summer. Plan carefully because some courses are only offered once a year.

Active Status
Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
Early Literacy Certificate

Introduction
This online certificate offers primary grade teachers, preschool teachers and para-educators greater background in the development, assessment and instruction of literacy for young children, native speakers of English and English language learners. Administrators and intermediate-grade teachers have also found this program to be a great way to solidify their understandings of initial literacy development to help them best meet the needs of struggling learners in the upper grades.

Program Overview
Developing early literacy skills is a crucial step in children's growth and development. Early literacy instruction is a national focus, and for good reason. Studies show that students who are not reading on grade level by fourth grade have decreased chances of graduating from high school. Students need educators who can help them grow their reading skills at an early age as a way of preparing them for a successful future.

The University of Colorado Denver’s Early Literacy certificate offers primary grade teachers, preschool teachers and para-educators advanced skills in the development, assessment and instruction of literacy for young learners. You will explore methods that will help all learners - including those who are linguistically or culturally diverse - gain important literacy skills.

Even though these courses are offered online, participants still become part of a learning community. You will learn and share with like-minded peers and form lasting relationships with colleagues as you learn and grow together.

After completing the program, you will have the knowledge and skills necessary to create rich environments that envelop young learners in language and literacy development opportunities, both oral and written. You will be the guide who sets young learners on a path to success and empowers them for a lifetime of learning.

Certificate Structure
This certificate totals 9 credit hours in the specialty area of early literacy. All courses are three graduate credit hours and may be applied directly toward a full master's degree in Literacy while also fulfilling the requirements toward a Colorado Reading Specialist Endorsement. Additional courses and applications are required for the master's degree and/or endorsement. Courses may be taken in any order and the certificate may be completed in one year.

Literacy and Language Development for Diverse Learners Certificate

Introduction
This online graduate certificate program offers K-12 teachers greater background in the development, assessment and instruction of literacy for diverse learners, including children and youth who speak dialects of English or are English language learners. This certificate was developed in response to public school districts' need to improve reading and writing achievement for diverse students. Teachers in K-12 grades, including content area teachers and those teaching special reading classes, as well as administrators have also found this program to help them best meet the needs of struggling learners.

All courses may be applied directly toward a full master's degree in Literacy while also fulfilling the requirements toward a Colorado Reading Specialist Endorsement. Additional courses and applications are required for the master's degree and/or endorsement. For additional information about the master's degree and/or endorsement, please contact academicservices@ucdenver.edu.

Certificate Structure
The fully online certificate totals 12 credit hours and consists of four graduate courses. All courses may be applied directly toward a full master's degree in Literacy while also fulfilling the requirements toward a Colorado Reading Specialist Endorsement. Additional courses and applications are required for the master's degree and/or endorsement. The certificate may be completed in four semesters. Students can begin in any term.

Note: Courses are subject to modification given changes in Colorado Department of Education standards.

School Psychology

Program Leader: Franci Crepeau-Hobson, PhD
Office: Lawrence Street Center, 1113
Phone: 303-315-6315
Email: franci.crepeau-hobson@ucdenver.edu (bryn.harris@ucdenver.edu)
Website: https://education.ucdenver.edu/academics/doctoral/detail/School-Psychology-PsyD/

Overview

The doctor of psychology (PsyD) degree in school psychology is a 100 graduate semester-hour program that leads to eligibility for licensure as a school psychologist by the Colorado Department of Education and licensure as a psychologist by the Colorado State Board of Psychologist Examiners.

The PsyD program at CU Denver is currently Accredited, on Contingency by the American Psychological Association (see the APA Accreditation website (https://accreditation.apa.org/about-coa/) for further details). The program is also approved by the National Association of School Psychologists (NASP).

The CU Denver School Psychology Program, guided by the belief that all children can learn, is dedicated to providing both breadth and depth of professional training in a theoretically integrated, research-based learning environment. Consistent with a practitioner-scholar model, the PsyD Program in School Psychology prepares professional school psychologists through rigorous academic study integrated with intensive supervised clinical practice. The program includes an emphasis on prevention and the ecological influences on behavior, as well as respect for all aspects of diversity. Students also receive substantial training and preparation to work in diverse environments and the program infuses the promotion of advocacy and social justice throughout training experiences.

Bilingual (Spanish/English) School Psychologist Concentration Option

This optional specialization provides School Psychology students with the knowledge and skills to effectively serve bilingual learners in the school setting. In addition to the three required courses and practicum component, the Bilingual School Psychologist concentration consists of language proficiency assessments to ensure that candidates are adequately proficient in Spanish to provide psychoeducational services. CU Denver provides one of the few bilingual school psychology concentration areas in the country making our graduates even more desirable to potential employers.

Optional NME Graduate Credential

The Neurosequential Model in Education™ (NME) is an evidence-based framework that brings a neurodevelopmental and trauma-informed approach to educational and clinical settings. It is informed by what is known about neurobiology and the impact of trauma on the brain and in its applicability. Students who complete the two required courses in the NME credential (https://education.ucdenver.edu/academics/certificates-credentials-licenses-and-endorsements/detail/graduate-credential-in-neurosequential-model-in-education/) will learn about basic brain structure and organization and the stress response system and how NME concepts can be applied in the classroom. Students will also receive an official certificate of completion in NME from the Neurosequential Network (https://www.neurosequential.com/).

School of Psychology Admission Requirements

Successful applicants to the school psychology (SPSY) program will have obtained a minimum 3.2 undergraduate GPA. Applicants will also submit a current resume or vita, a personal statement that outlines their reasons for pursuing a degree in school psychology at CU Denver, and three letters of recommendation. The highest ranked applicants will be invited to a mandatory full-day group interview that includes a program orientation, a writing assignment, small group interviews, and an optional campus tour.

Application materials are available at: http://www.ucdenver.edu/admissions/ (http://www.ucdenver.edu/admissions/Pages/). All materials must be submitted online by December 1 for fall semester admissions. Application materials include the following:

- $50 application fee for domestic students, $75 application fee for international students (may be paid via credit card, e-check or by mailing in a check)
- letter of intent/personal statement
- resume or vita
- three letters of recommendation
- one official transcript from each higher education institution attended (in the original, sealed envelope)

School Psychology (SPSY) Courses

SPSY 5010 - Introduction to Counseling in School Psychology (3 Credits)
Provides an overview of the counseling theories relevant to the practice of school psychology and an understanding of the role of theory in practice. Includes consideration of legal/ethical issues and both the cultural and developmental context of the major theories. Max Hours: 3 Credits.
Grading Basis: Letter Grade
SPSY 5100 - Introduction to the Neurosequential Model in Education™ (3 Credits)
Introduction to the core concepts of the Neurosequential Model™ (NM) that impact learning. Core concepts include basics of brain organization, brain development, understanding state-dependent learning, the stress response systems, and the impact of trauma and neglect on children. Typically offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

SPSY 5200 - Application of Neurosequential Model in Education™ (3 Credits)
Focuses on helping educators and other school personnel better understand and teach challenging children by offering practical strategies and classroom practices related to structuring classroom schedules, activities and interactions that can help all children (not just children impacted by trauma and adversity) learn in an optimal way. Prereq: SPSY 5100. Typically offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

SPSY 5600 - Behavior Analysis and Intervention (3 Credits)
This course introduces knowledge and skills necessary for school psychologists to proactively address child problem behaviors. Content includes application of Positive Behavioral Support (PBS), functional behavior analysis and intervention, evaluation of behavior change. Relevant federal, state regulations are also addressed. Restriction: Restricted to SPSY majors within the School of Education and Human Development or consent of the instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to SPSY majors within the School of Education and Human Development.

SPSY 5800 - Workshop: Topics in School Psychology (1-6 Credits)
Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.

SPSY 5840 - Independent Study: SPSY (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

SPSY 5900 - School-Based Multicultural Interventions (3 Credits)
The course will foster students’ understanding and appreciation of diversity and its applications for school psychology practice, educational contexts, and mental health policy. Students will learn to evaluate and implement school-based mental health and educational interventions with a multicultural lens. Prereq: SPSY 6100. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Prereq: SPSY 6100

SPSY 6100 - School Psychology: Professional and Legal Foundations (3 Credits)
This course covers topics related to the practice of school psychology, both past and present, including legal/ethical obligations/issues, accreditation, certification/licensure, culturally competent practice, roles/responsibilities, and evaluation and accountability. Observation in schools and related settings is required. Prereq: Admission to School Psychology Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to SPSY majors within the School of Education and Human Development.

SPSY 6150 - Psychoeducational Assessment I (3 Credits)
Focuses on assessment of cognitive ability, cognitive processes, and achievement in children and adolescents. Topics include selection, administration, and interpretation of ability and achievement tests; psychological report writing, and psychometric, historical, theoretical, and cultural issues in assessment. Test administration required. Restriction: SPSY PsyD: Restricted to SPSY PsyD majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to SPSY majors within the School of Education and Human Development.

SPSY 6160 - Psychoeducational Assessment II (3 Credits)
Focuses on the assessment of adaptive behavior, personality, and social-emotional functioning in children and adolescents. Topics include selection, administration, and interpretation of these types of measures; cultural considerations in psychological assessment, psychological report writing, and developing interventions. Test administration required. Prereq: SPSY 6150. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6150.

SPSY 6170 - Applied Developmental Science and Assessment (3 Credits)
Examines theories and research in developmental psychology to provide a foundation for clinical services to children and families in applied settings. Includes coverage of developmental assessments and services for infants/toddlers. Prereq: SPSY 6160. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6160.

SPSY 6350 - School-Based Interventions: Children, Youth and Families (3 Credits)
Provides theoretical and practice-oriented introduction to child therapy in schools. Weaves together skills and techniques essential to theory and implementation of psychotherapeutic techniques. Course activities compliment the systemic and group-based interventions examined in SPSY 6400. Prereq: SPSY 5010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 5010.

SPSY 6400 - School-Based Interventions: Groups, Classrooms and Systems (3 Credits)
Provides students with advanced study of research on and techniques of classroom and small group interventions. Includes instruction on the evaluation of intervention effectiveness. Systemic, school-wide interventions are addressed. Prereq: SPSY 5010. Restriction: Restricted to SPSY majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 5010. Restriction: Restricted to SPSY majors within the School of Education and Human Development.

SPSY 6410 - Psychoeducational Assessment of Culturally and Linguistically Diverse Students (3 Credits)
Prepares students to provide psychoeducational assessments to children who are culturally and/or linguistically diverse. Content includes differentiation of language disorders versus language acquisition, and developing recommendations for accommodations and interventions to meet the unique psychoeducational needs of diverse children and youth. Prereq: SPSY 6150. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6150.
SPSY 6420 - Crisis Prevention, Planning and Intervention (3 Credits)
Introduces students to crisis theory, prevention research, and intervention strategies. The course is designed for school mental health professionals interested in developing advanced crisis counseling and intervention skills sufficient for use in school settings. The course emphasizes the importance of practical hands-on opportunities for skills development. Prereq: COUN 5010 or SPSY 5010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 or SPSY 5010

SPSY 6450 - School-Based Consultation for Mental Health Professionals (3 Credits)
A wide range of traditional or emerging consultation models emphasizing practical application of empirically-based approaches to advance the social or academic competence of students, classrooms, schools and districts. Hands-on experience supplement course content as students develop, refine, and practice their own eclectic consultation approach. Prereq: SPSY 6100. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6100

SPSY 6500 - Affective Bases of Behavior and Psychopathology (3 Credits)
This course provides students with advanced concentrated study of the affective bases of behavior, including affect, mood, and emotion. This course also includes coverage of psychopathology and the diagnosis of mental disorders. Restriction: Restricted to SPSY majors within the School of Education and Human Development or consent of the instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to SPSY majors within the School of Education and Human Development.

SPSY 6550 - Academic Interventions in School Psychology (3 Credits)
Provides training in knowledge and skills for the use of educational intervention practices in school psychology, including the development, implementation, and evaluation of academic interventions in the areas of reading, math, and written language; curriculum based measurement and progress monitoring. Prereq: SPSY 6150. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6150

SPSY 6700 - Advanced Seminar in School Psychology (3 Credits)
This course covers advanced topics related to the practice of school psychology including applying and interviewing for internship, certification/licensure, capstone preparation and completion, and the development of a professional identity. Prereq: SPSY 6911. Restriction: Restricted to School Psychology majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6911
Restriction: Restricted to SPSY majors

SPSY 6911 - School Psychology Practicum (3 Credits)
Supervised practice in providing comprehensive psychological services to children in grades preschool to 12. Students are placed in public schools or affiliated school-related agencies and supervised by practicing, licensed school psychologists. Prereq: SPSY 5600, SPSY 6100, SPSY 6150, SPSY 6160 or consent of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade with IP
Prereq: SPSY 5600, SPSY 6100, SPSY 6150, and SPSY 6160

SPSY 6915 - Practicum with Culturally and Linguistically Diverse Students (3 Credits)
This school psychology practicum experience is focused on developing multicultural competencies with culturally and linguistically diverse students through either a cultural immersion experience in Mexico or a local practicum placement in a culturally and linguistically diverse setting. Prereq: SPSY 6100 and SPSY 6150 and consent of the instructor. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 9.
Prereq: SPSY 6100 and SPSY 6150.

SPSY 6917 - Advanced Practicum in Psychological Assessment (1 Credit)
Under faculty supervision provide psychological assessment services to clients in the UC Denver Student and Community Counseling Center. Prereq: SPSY 6150, SPSY 6160, and consent of the instructor. Max hours: 1 Credit.
Grading Basis: Letter Grade
Repeatable. Max Credits: 1.
Prereq: SPSY 6911

SPSY 6918 - Clinical Externship (1-3 Credits)
Clinical experience under supervision of licensed mental health professionals. Students participate in assessment and/or intervention in a variety of settings. Note: All field placements must be approved by the SPSY Program Director in advance of registration. Prereq: SPSY 6911. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade with IP
Prereq: SPSY 6911

SPSY 6930 - School Psychology Internship (1-6 Credits)
Supervised experience in the practice of school psychology with children and adolescents in a school or clinic setting. Prereq: SPSY 5900, SPSY 6100, SPSY 6410, SPSY 6911, SPSY 6350, SPSY 6400, SPSY 6450, SPSY 6500, or instructor consent. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Prereq: SPSY 5900, SPSY 6100, SPSY 6410, SPSY 6911, SPSY 6350, SPSY 6400, SPSY 6450, and SPSY 6500

SPSY 7500 - Biological and Neuropsychological Bases of Behavior (3 Credits)
Examines the biological basis of behavior emphasizing the relationship between the functions and structures of the brain including neuroanatomy, brain development, neurophysiology, neurochemistry, and psychopharmacology; and neuropsychological assessment principles. Prereq: SPSY 6150. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6150.

SPSY 7980 - Clinical Supervision & Admin of Psych Services (3 Credits)
Course prepares school psychologists to function in supervisory and administrative capacities in delivering mental health services. Content includes examination of clinical supervision theories, models, techniques; focus on development of skills for administrative roles, and understanding organizations from a systems perspective. Prereq: SPSY 6918. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6918
Restriction: Restricted to SPSY PsyD majors within the School of Education and Human Development
SPSY 8980 - School Psychology Doctoral Capstone Project (2 Credits)
The Capstone Project is a culminating component of the program. Production of a scholarly project that illustrates the student's understanding of relevant topics in school psychology, the scope of contemporary practice, and the various roles of the professional school psychologist. Prereq: SPSY 6911 and SPSY 6700. Restriction: Restricted to SPSY-PSYD majors within the School of Education and Human Development or consent of the instructor. Repeatable. Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 4.
Prereq: SPSY 6911 and SPSY 6700. Restriction: Restricted to SPSY-PSYD majors within the School of Education and Human Development.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
School Psychology, PsyD

Introduction

The APA accredited School Psychology Doctor of Psychology (PsyD) program offers comprehensive, supervised training and a strong foundation in school psychological theory and clinical practices that are evidence-based, culturally responsive, socially just, and collaborative. The foundational mission of the program is to train culturally responsive school psychologists. All of the courses infuse themes of equity and social justice and include an emphasis on prevention and the ecological influences on behavior. This program is one of only a handful of APA-accredited programs in the country that offers an optional bilingual (Spanish/English) school psychologist concentration and the only one to offer a graduate credential in the Neurosequential Model in Education™.

Graduates earn a Doctor of Psychology (PsyD) degree and are eligible for licensure in School Psychology by the Colorado Department of Education. Graduates also have the option of pursuing licensure by the State Board of Psychologist Examiners. Most school psychologists work in public and nonpublic school systems, but they may also be employed by hospital and medical pediatric clinics; universities; community mental health centers; and public policy, public education and health agencies.

Requirements for the Doctor of Psychology Degree in School Psychology and Licensure

Students will complete course work in affective, biological, cognitive, socio-cultural, and developmental aspects of behavior; legal and professional issues; psychological assessment; crisis intervention; counseling and other direct interventions; and consultation. Specific course requirements include two prerequisite courses, 75 credit hours of coursework, 7 credit hours of practica (minimum of 600 hours in the field), 6 credit hours of clinical externship (minimum of 500 clock hours in the field), 8 credit hours of internship (minimum of 1500 clock hours in the field), and 4 Capstone project credit hours. Successful completion of the School Psychology Praxis exam during the course of study and passing of comprehensive examinations are also required. Prerequisites include an undergraduate or graduate course in both of the following: measurement concepts and child development. Students may be admitted to the program without first completing these prerequisites; however, these courses must be completed during the first year of study.

Overview

The Special Education (SPED) program emphasizes the development of reflective practitioners through trans-disciplinary training, fosters reflective inquiry about teaching and learning, as well as the development of the skills, knowledge, and dispositions necessary to teach in elementary and secondary classrooms serving students with disAbilities. Reflection and inquiry provide an informed and integrated basis for advocating for all learners.

The Master of Arts (MA) in Special Education offers two degree paths:

1. MA in Special Education (Personalized Professional): The customizable 30 credit hour MA path provides the opportunity for you to tailor your coursework to your specific needs as an educator. Students have the flexibility to choose courses from across all SEHD programs for additional learning from the from the Thematic Course Categories list to allow for a more in-depth approach to the field. The Thematic Course Categories is a collection of courses across all SEHD disciplines designed to allow students to expand student learning. This MA does NOT lead to a license or an endorsement.

2. MA plus endorsement: The MA plus endorsement allows students to complete an MA, and add a SPED Generalist Ages 5-21 endorsement to their current teaching license. Recommendation for endorsement is made by the SPED Program, but endorsement is granted by the State of Colorado. Individual State requirements vary and may include teaching experience and in addition to a valid teaching credential. Students should consult with the Colorado Department of Education or the state in which they wish to be endorsed for the most updated endorsement requirements.

The time needed to complete the various special education program options varies based on previous experience, coursework, and needs of students. In addition to traditional on-campus offerings, a wide selection of courses are available in remote and online formats. During the academic year, core special education courses are typically scheduled in late afternoons and evenings to avoid conflict with teaching responsibilities. Course formats and offerings are subject to change.

If you are not a teacher and are seeking an initial teaching license in Special Education, please see our Master of Arts in Teaching (p. 655) program.

If you are interested in the Early Childhood Special Education Specialist (Birth-8 years) endorsement, please see the Early Childhood Special Education Specialist Endorsement (p. 579) program.

Programs

- Special Education, MA (p. 636)
- Special Education with Applied Behavior Analysis Emphasis, MA (p. 637)
- Special Education with Special Education Generalist (Ages 5-21) Endorsement, MA (p. 638)
- Special Education Generalist Endorsement Only (p. 640)
- Applied Behavior Analysis Certificate (p. 641)

This course provides instructional strategies and interventions for students with a wide variety of disabilities. Implications for targeted and intensive interventions and assessment are considered. Cross-listed with SPED 4400. Max hours: 3 Credits.

Grading Basis: Letter Grade

This course introduces Universal Design for Learning (UDL), an important educational philosophy and set of principles & techniques that focuses on strategies and tools to help ALL students by accommodating their differences in inclusive classroom settings. Cross-listed with SPED 4400. Max hours: 3 Credits.

Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with SPED 4030. Max hours: 3 Credits.

Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.

This course provides an overview of special education by examining the history of special education, construction of dis/ability, characteristics of individuals with disabilities, aspects of disproportionality, and introduction to evidence-based instructional practices. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.

Cross-listed with CLDE 5050. Max hours: 3 Credits.

Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.

Students learn to gather and use assessment results within a strengths-based framework to advocate for appropriate programming, placement, instruction, and ongoing progress monitoring of multilingual students. Special attention is paid to linguistic and cultural bias in the field of assessment. Cross-listed with CLDE 5050. Max hours: 3 Credits.

Grading Basis: Letter Grade
SPED 5120 - Negotiating The Special Education Teaching Process (3 Credits)
This course explores both theoretical and practical aspects of educating students with special needs. Students will examine the nature of disability, the history and legal basis for special education programming in American schools, as well as contemporary law governing the education of persons with disabilities. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5140 - Assessment: Inquiry, Instruction, & Intervention (3 Credits)
Using a variety of assessment tools, students will focus on the educational assessment methods and procedures used in decision making and program planning for students with exceptional learning needs, with attention to pervasive issues pertaining to students from culturally and linguistically diverse backgrounds. Cross-listed with SPED 4140. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5151 - Slashing Stigmas: Promoting Positive Behaviors (3 Credits)
This course works to transform perspectives and practices related to supporting student behavior in classrooms. Students will learn important considerations related to culture, race, gender and socioeconomic status, as they intersect with behavior and social emotional development. Cross-listed with SPED 4151. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5210 - Foundations for Understanding Behavior (3 Credits)
This course is designed to provide a foundational understanding of behaviors commonly witnessed in the classroom. It will provide strategies for assessment and guidance on legal processes which guide the development of individualized education and behavior plans. Specialize instructional methods and current events impacting the social emotional educations of students will also be discussed. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5300 - Family, Professional, and Community Collaboration (3 Credits)
Focuses on the development of competencies in consultation and collaboration. The overall purpose is to encourage the development of understanding and skills that enhance a teacher’s ability to work and communicate effectively with school personnel, including paraprofessionals and parents. The goal of collaboration is to support and determine together the instructional scenarios that best meet the needs of students. Specific competencies include problem solving, conflict resolution, data collection or observation skills, conferencing, facilitating meetings, and interacting with others while respecting diverse discourses and multicultural backgrounds. Cross-listed with SPED 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5401 - Advanced Seminar in Special Education (3 Credits)
Designed to allow an opportunity for special educators to compare and contrast the service delivery, funding mechanisms, professional ethics, and underlying assumptions of special and regular education. Trends in the field of special education are examined through review of current research. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

SPED 5440 - Ethics and Implementation ABA (3 Credits)
This course is designed to teach you ethical and professional conduct considerations in applied behavior analysis. We will review behavior change systems and implementation issues in the conduct of applied behavior analysis. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5450 - Introduction to ABA and Terminology (3 Credits)
This course will introduce the history and basics of ABA with a focus on its related terminology. In addition, ABA benefits will be discussed, and emphasis placed on ethical considerations required for practicing ABA as a board Certified Behavior Analyst. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5460 - ABA Practical Applications (3 Credits)
This course will provide a framework for the natural science of behavior. It will provide students with a systematic approach to understanding and precisely describing the behavior of individuals, and its relationship to environmental determinants. Prereq: SPED 5450. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5470 - ABA Data (3 Credits)
This course will introduce how to collect and interpret different types of data, and the importance of making data-driven decisions for behavior change procedures based on functional relationships. Prereq: SPED 5450, 5460. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5480 - ABA Advanced Data and Behavioral Plans and Applications (3 Credits)
Student will learn to use standard celeration charts and make data-driven decisions to write appropriate behavioral plans. They will also learn to use ABA strategies to enhance communication, to support individuals with ASD, and to benefit from systems supports. Prereq: SPED 5450, 5460, 5470. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5490 - Autism In Early Intervention (3 Credits)
This course will provide students with the knowledge necessary to implement recommended, evidence-based practices with young children with autism. The course will provide information on the etiology of autism, diagnostic procedures, evidence-based practices, and how to support families who have a young child diagnosed on the spectrum. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5495 - Advanced Topics in Applied Behavior Analysis (3 Credits)
Students will learn how to apply basic behavioral principles to either novel client populations or using nuanced behavioral theories, like behavioral momentum theory or behavior economics. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5500 - Transition and Secondary Methods in Special Education (3 Credits)
This course provides school leaders and practitioner with an understanding of the special education transition process as specified by federal and state guidelines, as well as effective teaching and learning strategies for secondary youth with disabilities. Cross-listed with SPED 4500. Max hours: 3 Credits.
Grading Basis: Letter Grade
SPED 5530 - Language & Literacy Acquisition Div Lrn (3 Credits)
This course investigates the relationship between language and literacy acquisition. In the context of first and second language acquisition across the lifespan, the course focuses on bilingual and second language development, and on the acquisition of literacy by young children. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5600 - Special Education Law: Ethics and Compliance (3 Credits)
Designed for school leaders and professionals to understand special education law and compare and contrast service delivery options. Cross-listed with SPED 4600. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

SPED 5740 - Intersections of Literacy, Culture, & Exceptionality (3 Credits)
This course provides a foundational understanding of the complex intersections between literacy, culture, language, learning, and students with (dis)abilities. A primary goal is to address the particular needs of culturally and linguistically diverse learners with exceptionalities, while also exploring the distinctions between language development and learning disabilities. Cross-listed with SPED 4740. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5780 - Literacy Intervention for Exceptional Learners (3 Credits)
Provides the practitioner with an understanding of research-validated approaches, strategies, assessment tools and issues related to effective literacy instruction for students performing significantly below grade level. Practitioners can expect to be able to conduct thorough literacy assessments as well as be able to develop, implement, and evaluate individual reading and writing programs for individual students with the most challenging literacy needs. Cross-listed with SPED 4780. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5835 - Special Topics (1-6 Credits)
Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

SPED 5840 - Independent Study: SPED (1-4 Credits)
Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

SPED 5898 - ABA Practicum (1 Credit)
The purpose of this practicum is to provide additional learning opportunities in the areas of working directly with clients / consumers, implementing evidence-based treatments to address behaviors of social significance, implementing treatment plans, and monitoring and analyzing data to make data-based decisions. Students must complete 1000 hours to meet BCBA requirements and 670 hours for BCA research requirements. 100 hours is equivalent to 1 credit. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.

SPED 5919 - ABA Intensive Practicum (0.5-5 Credits)
Supervised field experience with a Board Certified Behavior Analyst for time spent directly working with individuals who require behavioral support. Students must complete 750 hours to meet BCBA requirements and 500 hours for BCA requirements. 75 hours is equivalent to 1 credit. Repeatable. Max Hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.

SPED 5930 - Special Education Generalist Internship and Site Seminar I (2 Credits)
Special education teacher candidates engage in systematic observation of, participation in, design of and reflection on inclusive curricular, instruction and management practices. Graduated learning activities for each internship and time requirements are specified in the School Internship handbook and the Special Education Guidelines. In partner school, the site coordinator and site professor are responsible for coaching, supervision and site seminars. In internship outside partner school settings, cooperating teachers, district coordinators and/or university professors work with teacher candidates in the classroom and in seminars. Max hours: 2 Credits.
Grading Basis: Letter Grade

SPED 5931 - Special Education Generalist Internship and Site Seminar II (2 Credits)
Special education teacher candidates engage in systematic observation of, participation in, design of and reflection on inclusive curricular, instruction and management practices. Graduated learning activities for each internship and time requirements are specified in the School Internship handbook and the Special Education Guidelines. In partner school, the site coordinator and site professor are responsible for coaching, supervision and site seminars. In internship outside partner school settings, cooperating teachers, district coordinators and/or university professors work with teacher candidates in the classroom and in seminars. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

SPED 5932 - Special Education Generalist Internship and Site Seminar III (2 Credits)
Special education teacher candidates engage in systematic observation of, participation in, design of and reflection on inclusive curricular, instruction and management practices. Graduated learning activities for each internship and time requirements are specified in the School Internship handbook and the Special Education Guidelines. In partner school, the site coordinator and site professor are responsible for coaching, supervision and site seminars. In internship outside partner school settings, cooperating teachers, district coordinators and/or university professors work with teacher candidates in the classroom and in seminars. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

SPED 5933 - Special Education Generalist Internship and Site Seminar IV (3-8 Credits)
Special education teacher candidates engage in systematic observation of, participation in, design of and reflection on inclusive curricular, instruction and management practices. Graduated learning activities for each internship and time requirements are specified in the School Internship handbook and the Special Education Guidelines. In partner school, the site coordinator and site professor are responsible for coaching, supervision and site seminars. In internship outside partner school settings, cooperating teachers, district coordinators and/or university professors work with teachers, and candidates in the classroom and in seminars. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
SPED 5934 - Extended Internship & Learning Community  (2-8 Credits)
Teacher candidates seeking Special Education licensure engage in systematic observation of, participation in, design of, and reflection on curricular, instructional, and management practices across the full range of educational programs within a school. Additionally, they participate in the activities of a professional learning community. Repeatable. Cross-listed with SPED 4934. Max hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Typically Offered: Fall, Spring.

SPED 7840 - Independent Study: SPED  (1-6 Credits)
Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Special Education, MA

Introduction
The Master of Arts in Special Education prepares educators to deliver high-quality educational experiences for students with a range of emotional and learning needs, including gifted children. We strive to prepare compassionate leaders who are dedicated to social justice and excellence for all students and families. This degree equips you with the most impactful and effective skills for leading inclusive classrooms and collaborating with professionals in the field and the community.

Students learn from nationally and internationally recognized faculty members who are known for developing innovative practices and designing research in literacy, language, social and emotional growth, gifted and talented learners, students with learning disabilities and building a diverse teacher workforce.

The MA Special Education does not include a license or an endorsement. Students are responsible for reviewing the Special Education Resources website regularly, including the SPED Handbook and SPED course rotation: https://education.ucdenver.edu/academic-services/student-resources/graduate/special-education

Program Requirements
The 30 credit hour Personalized Professional MA path provides the opportunity for you to personalize your coursework to your specific professional goals as an educator. This MA does NOT lead to a license or an endorsement. A current teaching license is not required for the Personalized Professional MA. In consultation with the approval from your Faculty Advisor, select 3 courses (9 semester hours) of graduate-level SPED core coursework and 5 courses (15 semester hours) from the Thematic Course Categories (or any graduate-level School of Education & Human Development coursework with Faculty Advisor approval). Finally, take a research RSEM course for 3 credits (RSEM 5080 preferred or any graduate-level RSEM course with Faculty Advisor approval) and complete SPED 5401 Advanced Seminar in Special Education which fulfills the capstone requirement (3 credits) for a total of 30 credits.

Capstone Requirement
SPED 5401 Advanced Seminar in Special Education is the Special Education Capstone class, which fulfills the COMPS requirement for MA students. Plan to take the capstone course in your final Fall or Spring semester. The intent of the Capstone is to help candidates synthesize learning through a final project that speaks to academic and professional development in the SPED Program. The capstone should tell the story of what was learned, specific areas of interest, and address ongoing barriers experienced in the field. Your Capstone requirements will be fulfilled by completion of SPED 5401 Advanced Seminar in Special Education.

Program Requirements and Courses
To complete the SPED Education program and earn a master's degree, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

Course Scheduling
During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, remote, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

Planning
For practicing full-time teachers, we recommend taking one course each fall and spring semester, and up to two courses each summer. Plan carefully because some courses are only offered once a year. Several courses have case study requirements with a K-12 student population. If you are not working in a school, you will consult with your instructor for an alternative assignment.

Active Status
Students must complete their programs within seven years, maintaining a GPA of 3.0 (B average). Please refer to the Student Handbook for information on Academic Probation. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
Special Education with Applied Behavior Analysis Emphasis, MA

Introduction
The demand for special education professionals certified in Applied Behavior Analysis is growing. Children with special needs require specific and optimized learning environments created by qualified professionals to aid in their growth and skill development. University of Colorado Denver’s strengths-based/assets-based approach to teaching special education prepares you to understand the strengths of every child in every family.

Enhance your ability to work with individuals with special learning and behavior needs by earning a master’s degree in Special Education with a concentration in Applied Behavior Analysis from CU Denver.

The Special Education MA with a concentration in Applied Behavior Analysis (ABA) combines seven courses in our ABA certificate, two specific course electives and a practicum. Graduates will acquire the degree and supervision hours needed to sit for the BCBA exam.

Admissions
Application to the master’s degree in Special Education with a concentration in Applied Behavior Analysis is open to all students holding a Bachelor’s Degree from an accredited institution. Program cohorts start in January (spring) and July (summer).

1 Focus Area/Elective Guidelines: Focus area courses have been grouped to meet the professional goals of ABA candidates. These 2 courses may be offered on-campus, off-campus, online, or hybrid. Tuition for each course varies depending on the type of course it is. On campus courses are more expensive than hybrid or online.

2 Practicum: Students must secure their own fieldwork site and supervisor. Students completing the practicum course will meet the fieldwork experience as required by the Behavior Analyst Certification Board®. For more information on these requirements, please visit the Behavior Analyst Certification Board’s website (https://www.bacb.com/).
Special Education with Special Education Generalist (Ages 5-21) Endorsement, MA

Introduction
The MA in Special Education with added Special Education Generalist endorsement is designed for currently licensed teachers seeking career advancement and the expertise needed to work effectively with students with special needs and from diverse backgrounds. The program is fully accredited by the Colorado Department of Education and the Council for Exceptional Children.

Recommendations for endorsements are made by the Special Education Program, but endorsement is granted by the state of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Education (http://www.cde.state.co.us/cdeprof/licensure_authorization_landing/) or the state in which they wish to be endorsed for the most updated endorsement requirements.

Students are responsible for reviewing the Special Education Resources website regularly, including the Handbook and SPED course rotation.

SPED Courses may be offered in online, hybrid, remote, or face-to-face formats. SPED course formats can vary by semester and some courses are offered only once a year.

If you’re required to complete internship, the Praxis Exam - 5354 “Special Education Core Knowledge & Application” must be passed prior to final internship.

Click here (https://www.ets.org/praxis/prepare/materials/5354/) for information about preparing for the Praxis 5354.

Beginning Oct. 1, 2021, the Praxis 5205 will be a Colorado Department of Education required licensure exam for any teacher applying for added endorsement in special education generalist with the following allowances:

- Current elementary and special education candidates in a Colorado approved educator preparation program who have attempted and/or passed all or even one subtest of the Elementary Praxis 5001 series prior to Oct. 1, 2021, will not be required to take Praxis exams 5901 and 5205, as long as they submit for their initial license or added endorsement no later than Dec. 31, 2022.

Full information about CDE’s Praxis requirements for the Special Education Generalist Endorsement, can be found here (https://www.cde.state.co.us/cdeprof/endorsementrequirements/) by scrolling down to “Special Education Teacher Endorsements”.

² Based on a comprehensive record review (i.e. teaching experience & classroom placements), SPED 5932 Special Education Generalist Internship and Site Seminar III and/or SPED 5933 Special Education Generalist Internship and Site Seminar IV may be required at the discretion of SPED program faculty. Some students may also be required to complete prerequisite coursework in content areas, which is determined upon faculty review of program applicants.

Capstone Requirement
SPED 5401 Advanced Seminar in Special Education is the Special Education Capstone class, which fulfills the COMPS requirement for MA students. The intent of the Capstone is to help candidates synthesize learning through a final project that speaks to academic and professional development in the SPED Program. The capstone should tell the story of what was learned, specific areas of interest, and address ongoing barriers experienced in the field. Your Capstone requirements will be fulfilled by completion of SPED 5401 Advanced Seminar in Special Education.

Program Requirements and Courses
To complete the SPED Education program and earn a master’s degree and endorsement, students must complete the appropriate course work as outlined. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

Course Scheduling
During the fall and spring semesters, most courses are offered in the late afternoon and evening and meet for three hours once a week over a 16-week semester. Courses are offered in various formats, including completely face-to-face classes, hybrid, remote, or online classes. In the summer semester, three-to eight-week sessions are offered, and courses may be in the morning, afternoon or evening.

Active Status
Students must complete their programs within seven years, maintaining a GPA of 3.0 (B average). Please refer to the Student Handbook for information on Academic Probation. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
Special Education Generalist Endorsement Only

Introduction

The Special Education Generalist Endorsement is designed for currently licensed teachers seeking career advancement and the expertise needed to work effectively with students with special needs and from diverse backgrounds. The program is fully accredited by the Colorado Department of Education and guided by the Council for Exceptional Children's Professional Preparation Standards.

Recommendations for endorsements are made by the Special Education Program, but endorsement is granted by the state of Colorado. Individual state requirements vary and may include teaching experience and examinations in addition to a valid teaching credential. Students should consult with the Colorado Department of Educate (http://www.cde.state.co.us/cdeprof/licensure_authorization_landing) or the state in which they wish to be endorsed for the most updated endorsement requirements.

Students are responsible for reviewing the Special Education Resources (https://education.ucdenver.edu/academic-services/student-resources/graduate/special-education/) website regularly, including the Handbook and SPED course rotation.

SPED Courses may be offered in online, hybrid, remote, or face-to-face formats. SPED course formats can vary by semester and some courses are offered only once per year.

If you're required to complete internship, the Praxis Exam - 5354 “Special Education Core Knowledge & Application” must be passed prior to final internship.

Beginning Oct. 1, 2021, the Praxis 5205 will be a Colorado Department of Education required licensure exam for any teacher applying for added endorsement in special education generalist with the following allowances:

• Current elementary and special education candidates in a Colorado approved educator preparation program who have attempted and/or passed all or even one subtest of the Elementary Praxis 5001 series prior to Oct. 1, 2021, will not be required to take Praxis exams 5901 and 5205, as long as they submit for their initial license or added endorsement no later than Dec. 31, 2022.

Full information about CDE’s Praxis requirements for the Special Education Generalist Endorsement, can be found here (https://www.cde.state.co.us/cdeprof/endorsementrequirements/) by scrolling down to “Special Education Teacher Endorsements”.

Applied Behavior Analysis Certificate

Introduction

Enhance your ability to work with individuals with special learning and behavior needs by earning your post baccalaureate certificate in Applied Behavior Analysis from the University of Colorado Denver. This certificate program prepares professionals to follow best practices for ABA in a variety of settings.

If you already have a bachelor’s degree, earning this certificate will help you to advance or diversify in your field. You’ll build your competencies in psychology and advance your skills in working with individuals with special needs.

The seven courses (21 credits) in the CU Denver verified course sequence meet the Behavior Analyst Certification Board®’s coursework requirements toward becoming a Board-Certified Behavior Analyst or Board-Certified Assistant Behavior Analyst. However, this program does not provide the supervisory aspects as required by the Behavior Analyst Certification Board®.

Admissions

Application to the Applied Behavior Analysis Certificate is open to all students holding a Bachelor’s Degree from an accredited institution. A Master’s Degree from an accredited institution is required for students pursuing BCBA certification. Program cohorts start in January (spring) and July (summer).

Applied Behavior Analysis Certificate Applicants: please complete this application form (https://education.ucdenver.edu/academic-services/admissions/apply-cpe/)

CU Denver’s BCBA/BCaBA®’s courses comprise a seven-course sequence of 3-credit hour, fully-online courses, taught by experienced CU Denver BCBA instructors. ABA certificate students will complete a total of 315 required class hours distributed among the BACB®’s 5th Edition Task List areas.

The seven courses (SPED 5450, SPED 5460, SPED 5470, SPED 5480, SPED 5490, SPED 5440, and SPED 5495) will be offered in sequence.

Cohorts that begin with the first course (SPED 5450) start in January and July
STEM Education

**Office:** 1380 Lawrence Street Center, 701  
**Telephone:** 303-315-6300  
**E-mail:** academicservices@ucdenver.edu

**Overview**

The STEM Education program promotes elementary and secondary mathematics and science teachers’ passion, confidence, and competence in providing mathematics and science teaching-learning processes informed by insightful theories, effective learning activities, and innovative teaching strategies, as well as by international perspectives. This program focuses on the integration of theory, research, and practice to enable teachers to make instructional decisions and implement mathematics and science lessons that promote students’ conceptual understandings and problem solving, including opportunities for doing research.

**Programs**

- Mathematics Education, MSeD (p. 647)
- STEM Education with a concentration in Mathematics Education, MA (p. 648)
- STEM Education with a concentration in Math and Science Education, MA (p. 649)
- STEM Education with a concentration in Science Education, MA (p. 650)
- Middle School Math Endorsement (p. 651)
- Mathematical Content Knowledge for Teaching, Graduate Certificate (p. 652)

**Faculty**

**Professors:**

- Ron Tzur (https://education.ucdenver.edu/about-us/faculty-directory/Tzur-Ron-UCD21265/), PhD, The University of Georgia | Mathematics Education
- Geeta Verma (https://education.ucdenver.edu/about-us/faculty-directory/Verma-Geeta-UCD47006/), PhD, Kent State University | STEM Education

**Associate Professor:**

- Robert Talbot (https://education.ucdenver.edu/about-us/faculty-directory/Talbot-Robert-UCD62354/), PhD, University of Colorado Boulder | Science Education

**Clinical Assistant Professor:**

- Dennis DeBay (https://education.ucdenver.edu/about-us/faculty-directory/DeBay-Dennis-UCD600049179/), PhD, Boston College | STEM Education

**Math Education (MTED)**

MTED 5002 - Elementary Mathematics Teaching I (3 Credits)  
Prepares elementary teachers to teach mathematics to PreK-6 students while applying principles of the National Council of Teachers of Mathematics to mathematical learning. Teachers explore ways to help all elementary students become flexible and resourceful mathematical problem solvers. Cross-listed with MTED 4002. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Restriction: TCHR-MA plan or BMA subplan.

MTED 5003 - Elementary Mathematics Teaching II (3 Credits)  
Develops the mathematical and pedagogical understandings and competence of elementary teachers, focusing on instructional assessment, principles, and practices. Cross-listed with MTED 4003.  
Prereq: MTED 4002 or MTED 5002. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: MTED 5002 or MTED 4002. Restriction: TCHR-MA plan or BMA subplan.

MTED 5030 - Theories Of Mathematics Learning (3 Credits)  
Develops educators’ knowledge of foundational theories and conceptual frameworks in mathematics education. MTED 5030 and 7030 are cross-listed. Max hours: 3 Credits.  
Grading Basis: Letter Grade.

MTED 5040 - Mathematics Teaching - Theory and Practice (3 Credits)  
Develops educators’ research-based understandings and practices of PreK-12 mathematics teaching and learning. MTED 5040 and 7040 are cross-listed. Repeatable. Repeatable. Max Hours: 9 Credits.  
Grading Basis: Letter Grade  
Repeatable. Max Credits: 9.

MTED 5050 - Critique Of Mathematics Education Research (3 Credits)  
Develops educators’ understanding of various research studies in mathematics education, including research focusing on mathematics teaching and learning, attending to students’ mathematical reasoning, and teaching mathematics for social justice and equity. Increases educators’ competence, confidence and enthusiasm in critiquing research. MTED 5050 and 7050 are cross-listed. Max hours: 3 Credits.  
Grading Basis: Letter Grade.

MTED 5060 - Developmental Pathways In Students' Mathematical Thinking (3 Credits)  
Fosters educators’ development of research-based ways of determining (a) what to look for, (b) how to look for, (c) how to synthesize and report on, and (d) how to incorporate in pedagogy data-grounded inferences about children's mathematical thinking. MTED 5060 and 7060 are cross-listed. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Repeatable.

MTED 5070 - (Re)Humanizing the Teaching and Learning of Mathematics (3 Credits)  
Expands educators’ conceptions of society’s role in determining what counts as mathematics to be taught and learned. Develops understanding of historical and systemic marginalization in mathematics education. Increases abilities to address issues of privilege and oppression that impact students’ opportunities. Max hours: 3 Credits.  
Grading Basis: Letter Grade
MTED 5300 - Curriculum and Methods for Teaching Mathematics (3 Credits)
Fosters teachers’ use of task-based mathematics pedagogy, including 
orchestrating students’ mathematical discourse, to develop mathematics 
classrooms in which the teacher builds from students’ current 
understandings, accommodates for students’ differences, and has high 
expectations for all students. Cross-listed with MTED 4300. Max hours: 3 
Credits.
Grading Basis: Letter Grade

MTED 5301 - Assessment and Equity in Mathematics Instruction (3 Credits)
Examines mathematics assessment and equity from both a teacher’s and 
a student’s perspective. Focuses on assessment as a process, during 
which a teacher gathers evidence of students’ mathematical knowledge 
and understanding and then uses that evidence to make instructional 
decisions. Prereq: Concurrent enrollment in an internship or permission of 
instructor. Cross-listed with MTED 4301. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5400 - Mathematics for Elementary Teachers (3 Credits)
Key mathematical concepts for K-6 teachers informed by NCTM & 
Common Core State Standards, such as place-value number systems, 
rational, proportional, & algebraic reasoning, geometrical concepts, & 
statistical/probability ideas. Students’ meaningful, enjoyable learning 
is promoted via problem solving activities. Restriction: Restricted to 
graduate students in the SEHD or Teacher Education minors. Cross-listed 
with MTED 3040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the SEHD or Teacher 
Education minors.

MTED 5619 - Expanding Conceptions of Number: Quantity and 
Operation (3 Credits)
Teachers’ learning will focus on quantities and operations in place value 
number systems, how students understand such systems, and how 
teaching may promote students’ progress. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5620 - Developing Fractional & Proportional Reasoning (3 Credits)
Teachers’ learning will focus on quantities and operations involved 
with ratio, fraction, and proportion; and on how students understand 
Ratio, fraction and proportion; and how teaching may promote students’ 
progress. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

MTED 5621 - A World of (Different) Numbers: Quantity and Operation (3 Credits)
Develops K-12 teachers’ understanding of number systems and the ability 
to foster students’ understanding. Focuses on number, quantity, and 
operation. Applicable to teaching students at all grade levels in line with 
the K12 Common Core Standards. Restriction: Restricted to graduate 
students in the SEHD or Teacher Education minors. Cross-listed with 
MTED 4621. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the SEHD or Teacher 
Education minors.

MTED 5622 - Expanding Conceptions of Algebra (3 Credits)
Develops K-12 teachers’ understanding of algebra concepts and the ability to foster students’ understanding. Focuses on equivalence, 
variable, covariation, and function. Applicable to teaching students at all grade levels in line with the K12 Common Core Standards. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with MTED 4622. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5623 - Geometrical Ways Of Reasoning (3 Credits)
Develops K-12 teachers’ geometrical reasoning and the ability to foster students’ reasoning. Addresses transformation, measurement, 
classification, objects, imagery, formulas, and investigation. Applicable to teaching students at all grade levels in line with the K12 Common Core Standards. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with MTED 4623. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5840 - Math Education Independent Study (1-6 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

MTED 7030 - Theories Of Mathematics Learning (3 Credits)
Develops educators’ knowledge of foundational theories and conceptual frameworks in mathematics education. MTED 5030 and 7030 are cross-listed. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 7040 - Mathematics Teaching - Theory and Practice (3 Credits)
Develops educators’ research-based understandings and practices of PreK-12 mathematics teaching and learning. MTED 5040 and 7040 are cross-listed. Repeatable. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

MTED 7050 - Critique Of Mathematics Education Research (3 Credits)
Develops educators’ understanding of various research studies in mathematics education, including research focusing on mathematics teaching and learning, attending to students’ mathematical reasoning, and teaching mathematics for social justice and equity. Increases educators’ competence, confidence and enthusiasm in critiquing research. MTED 5050 and 7050 are cross-listed. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 7060 - Developmental Pathways In Students’ Mathematical Thinking (3 Credits)
Fosters educators’ development of research-based ways of determining 
(a) what to look for, (b) how to look for, (c) how to synthesize and report on, and (d) how to incorporate in pedagogy data-grounded inferences about children’s mathematical thinking. MTED 5060 and 7060 are cross-listed. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 7070 - Math Education Independent Study (1-6 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

Science Education (SCED)

SCED 5004 - Elementary Science Teaching (3 Credits)
This course explores issues in elementary school science learning and teaching. Teacher candidates will develop knowledge of the nature of science and science content, engage in scientific inquiry, work to identify student conceptions, and plan and enact science instruction. Cross-listed with SCED 4004. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade

SCED 5050 - Introduction to Science Teaching and Learning (2 Credits)
Focus on conceptual development, conceptual change, collaborative learning, students’ conceptions of various topics in science, practical issues encountered in facilitating learning, managing the classroom, formative and summative assessment, and differentiating instruction in a collaborative environment. Seminar for Learning Assistants. Student must be serving as a Learning Assistant in the CU Denver LA program.
Max hours: 2 Credits.
Grading Basis: Letter Grade

SCED 5340 - Equity & Culture in Science Education: Local/Global (3 Credits)
This course examines literature in science education related to issues of culture and equity. Topics will be framed by an understanding of equity in diverse classrooms and how it informs research, curriculum and instruction. Cross-listed with SCED 4340 and ENVS 5340. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5350 - Issues and Trends in Science Education (3 Credits)
Explores the current issues and trends in science education related to theory, pedagogy, practices, curriculum, and other contemporary topics. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with SCED 4350. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5350 - Issues and Trends in Science Education (3 Credits)
Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.

SCED 5360 - Physics Teaching and Learning (3 Credits)
In this course, we will explore how people learn physics, and how physics is and can be taught. We will read literature in physics, physics education research, education, psychology, and cognitive science and apply it to your physics teaching. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5365 - Physics Teaching as Research (3 Credits)
In this course, you will research your teaching of physics, with the explicit goals of improving your teaching practice and improving student learning of physics. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5400 - Theory and Pedagogy of Science Learning (3 Credits)
Examines current issues, strategies, materials, and technology related to the teaching and learning of science at the middle and secondary school levels. Science curriculum, teachers’ pedagogical content knowledge, and research in science education are investigated. Cross-listed with SCED 4400. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade

SCED 5401 - Inquiry Science Pedagogy and Practices (3 Credits)
An in-depth study of inquiry science pedagogy and practices and how inquiry science supports standards-based education to make science accessible to ALL learners. The course provides a review of research on pedagogy and practices that support student understanding, problem solving and creativity through the use of inquiry science. Prereq: Concurrent enrollment in an internship or permission of instructor is required. Cross-listed with SCED 4401. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5416 - Math-Science Connections: Outdoor (3 Credits)
(Primarily for pre-secondary teachers.) Explores science concepts through outdoor activities appropriate for middle-grade students. Topics include how the nature of science and mathematics informs pedagogy, national and state standards, earth science and paleontology, orienteering and map usage, water analysis, astronomy and entomology. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5500 - The Nature of Science (3 Credits)
This course is a critical exploration of science and scientific knowledge using an epistemological approach to ask (and possibly answer) questions about sociological issues in science and implications for science research, teaching and learning. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with SCED 7500. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5550 - Foundations of School Health Education (3 Credits)
This course is an overview of the principles of behavior theory as they relate to health education in both theory and practice. The course will examine the characteristics of effective school-based health education programs. Issues of ethnicity, culture, and race as they relate to health will be examined throughout the course. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5550 - Curriculum Materials in Health Education (3 Credits)
This course will support the application of behavior theory as it applies to specific health content knowledge and skills. Special attention will be given to the skills, instructional strategies, and techniques needed to develop a culturally responsive classroom to promote success for all learners. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5560 - Health Education Teaching Practices (3 Credits)
The course provides an overview of health education teaching and learning strategies for use in school settings. Action research will be introduced and utilized as a method to examine current teaching practices. Role-play, student assessment development, differentiation of instruction, and culturally responsive classroom practices will be examined. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5650 - Environmental Education (3 Credits)
This course links the theory and practice of environmental education to inform curricular development and pedagogical knowledge. Cross-listed with ENVS 4650 and ENVS 5650. Max hours: 3 Credits.
Grading Basis: Letter Grade
SCED 5660 - Energy Education (3 Credits)
Explores current energy problems. Students examine such topics as fuels from plants, fuels from wastes, fossil fuels, nuclear energy, wind energy, geothermal energy, solar energy, and energy conservation. Includes demonstration of available educations resources for grades K-12. The purpose of the course is to make technical aspects of energy accessible to the lay person. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5670 - Experiential Learning In The Parks (3 Credits)
This course guides students through their experiences in a summer field placement, using readings, discussions and other interactive tools that focus on place-based education. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5690 - Curriculum Development in Place-Based Education (3 Credits)
Students in this course apply knowledge about place-based education in schools and communities for educational purposes. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5780 - Storytelling (1-4 Credits)
Explores the history, function, philosophy, and techniques of storytelling. This class also includes collecting, selecting, preparing, developing, and delivering stories. Research and resources are emphasized. Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

SCED 5800 - Curriculum Workshop for Science Teachers (0.5-4 Credits)
Opportunity to work on curriculum projects and problems in the schools. Explore various formal and informal learning environments such as study groups and after-school activities. Prereq: 18 semester hours in education and teaching experience or permission of instructor. Repeatable. Max Hours: 36 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 36.

SCED 5840 - Independent Study (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

SCED 5920 - Readings in Elementary Education (1-4 Credits)
Max hours: 4 Credits.
Grading Basis: Letter Grade

SCED 5930 - Internship in Secondary Education (3 Credits)
Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5950 - Master's Thesis (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.

SCED 5990 - Special Topics (1-6 Credits)
Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.

SCED 7110 - Science Math Curriculum Study (3 Credits)
Students examine frameworks for curriculum design, discuss the psychological and philosophical foundations of curricula, and analyze the curriculum that they use in their own teaching. Students synthesize what teachers must do in order to effectively implement curricula. Prereq: Graduate student status. Cross-listed with SCED 6110. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

Science, Technology, Engineering & Math Education (STME)

STME 5001 - Planning for Learning in Mathematics and Science (3 Credits)
This course explores aspects of complex curriculum and instructional concepts through the lens of mathematics and science educators. A focus will include: Socio-cultural learning theory in Math and Science; standards-based instruction; instructional design; formative & summative assessment, and differentiation so that meaningful instruction becomes accessible to all students. Cross-listed with STME 4001. Max hours: 3 Credits.
Grading Basis: Letter Grade
STME 5051 - STEM Capstone: Secondary Education (3 Credits)
This course provides Secondary STEM Education students with a capstone learning experience that integrates knowledge of STEM content, students, and school context into socially-just and culturally responsive practices. Cross-listed with STME 4051. Restriction:
Restricted to students in the Teacher MA or undergraduates in the BAMA.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.
Mathematics Education, MSEd

Introduction

The MSEd in mathematics education integrates educators' learning of mathematical content, pedagogy, and research. This approach fosters educators' ability to teach effectively at the K-12 level. The program arises from collaboration between the School of Education and Human Development (SEHD) and the Department of Mathematical and Statistical Sciences in the College of Liberal Arts and Sciences (CLAS). It interweaves both mathematical and educational understandings that lead to a truly interdisciplinary program, including a possibility to conduct one's own research project.

Program Requirements

The MSEd core courses provide a sound basis in mathematics education, including learning theories and progressions, teaching approaches, and deep appreciation for diversity and philosophical foundations.

Mathematics Core

Required Mathematics Core

Select three courses in consultation with faculty advisor

Optional Course Work

Select one of the following:

- Thesis Option (if chosen)
  - SCED 5950 Master's Thesis

Non-Thesis Option: Elective Courses

- Select two courses relevant to the grade level with which the teacher works in consultation with a faculty advisor.

Total Hours: 30

1 Students may select 5000-level MATH, MCKE, MTED, or RSEM courses relevant to the grade-level with which the teacher works with approval from faculty advisor. (Note: Several mathematical content courses are taught by the mathematics education faculty.)

Program Requirements and Courses

To complete the MSEd program and earn a master’s degree, students must complete the appropriate course work as outlined above. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

Planning

Students take 1-2 courses per semester. Core courses are offered one per semester on a rotating basis.

Active Status

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
STEM Education with a concentration in Mathematics Education, MA

Introduction

The need for qualified and effective mathematics teachers has never been greater. University of Colorado Denver recognizes that impactful mathematics teaching requires a deep understanding of both student learning and mathematic content. Graduates of the STEM MA mathematics education concentration are positioned to work successfully in leadership roles in urban and diverse schools and understand the important role mathematics play in their student's lives.

Program Delivery

This degree is available on-campus or completely online.

Program Requirements

This degree plan does not include a license or an endorsement.

This degree option is available for on-campus students. Core Courses are fully online. You may choose elective courses in on-campus, hybrid, or fully online formats.

Research Course

RSEM ___

Capstone Course

MTED ___

Total Hours 30

1 To be decided by student with Faculty Advisor
2 The Capstone Project is completed in your final core course.

Capstone Project

The Capstone project fulfills the COMPS requirement for the MA Degree. The Capstone project should extend beyond your graduate coursework. The project can be on a topic of your choosing. Prior to beginning the project, get your advisor’s approval for your project topic. The project can take many forms. Most typically, students submit a written paper as a final product. Yet, we are open to a range of possibilities. We recommend that the project be something that helps to further your learning and growth in your practice of teaching students. We intentionally provide a broad range of possibilities for final projects, so that we can best tailor the projects to students’ learning and growth goals.

Program Requirements and Courses

To complete the STEM Education program and earn a master’s degree, students must complete the appropriate course work as outlined above. All courses require a grade of B- or better and a 3.0 minimum GPA is required for graduation.

Planning

Students take 1-2 courses per semester. Core courses are offered one per semester on a rotating basis.

Active Status

Students must complete their programs within seven years, maintaining a GPA of 3.0. Students typically take four courses each calendar year. Failure to enroll over three contiguous semesters will result in a requirement to submit readmission materials.
STEM Education with a concentration in Math and Science Education, MA

Introduction

Math-science educators are in high demand. CU Denver recognizes this shortage and prepares teachers to effectively guide today's learners. Math-science teachers need expertise in understanding STEM learning and highly effective assessment and teaching practices. CU Denver's MA in STEM Education with a concentration in math-science education prepares you to be a leading educator at the forefront of this field.

Program Requirements

This degree plan does not include a license or an endorsement.

This degree has both on-campus and online course options. Online courses are 100% online only. Hybrid courses are available to distance students. Distance students participate via video conference in hybrid courses and local students attend face to face sessions. Therefore, the program may be completed with online courses.

Middle School Math Endorsement

Introduction
CU Denver’s online Middle School Math endorsement is designed for currently licensed teachers who are seeking career advancement and a deeper understanding of how to engage middle school students in math. Mathematical learning opportunities matter and not all students receive the same kinds of opportunities. This endorsement will give you the unique qualifications you need to support and challenge students with diverse abilities and backgrounds.

Mathematical Content Knowledge for Teaching, Graduate Certificate

Introduction

This certificate program is focused, first and foremost, on augmenting practicing teachers’ mathematical content knowledge for teaching. Each course is organized to fit teachers at all K-12 school grade levels, including mathematics and special education teachers. Major themes for each course are informed by national and state standards, particularly the new Colorado Common Core Standards. Each course will engage the participating teachers in exploring and expanding their own comprehension of the topics while examining and increasing their understanding of how students develop such knowledge.

Certificate Requirements

Required Courses

Each course stands alone; you may want to take one class or all three. All courses are three graduate credit hours and may be applied directly toward a full master’s degree in STEM Education-Mathematics Education. Additional courses and applications are required for the master’s degree. Courses may be taken in any order.

Overview
The Graduate Teacher Education program culminates in a Master of Arts in Teaching and an initial teacher license. The program prepares educators who are culturally affirming and responsive, collaborate closely with families and communities, and have the knowledge and skills to create engaging, relevant, and rigorous classroom communities where all students can achieve and grow. We work alongside our P-12 partner educators throughout the CU Denver Professional Development School Network comprised of over 20 urban schools across numerous districts in the Denver metro region. Teacher education students live the life of a teacher for an entire academic year while enrolled in the program through a series of residency internships in a professional development school. Ultimately our goal is that all teacher candidates—whether their emphasis is elementary, secondary, or special education—have the unique knowledge and skills to positively impact urban and diverse schools and act with a sense of urgency to support equity in education for all children. The Graduate Teacher Education Program is a nationally accredited program that exceeds expectations.

Education Pathways
The graduate teacher education program at CU Denver is designed to allow individuals with a minimum of a bachelor’s degree to seek a master’s degree along with an initial Colorado teacher’s license in the following areas:

- **Elementary Education** (K-6) (approximately 48 semester hours)
- **Secondary Education** (7-12) (approximately 39 semester hours)
  - English
  - Secondary Mathematics (7-12)
  - Science (General Science, Biology, Earth Science, Physics, Chemistry)
  - Social Studies
  - World Language (K-12) (Spanish, French)
- **Middle School Math** (6-8) (approximately 39 semester hours)
- **Special Education Generalist** (Ages 5-21) (approximately 54 semester hours)

Program Structure
The program admits teacher candidates in cohort groups that begin either in the summer or fall. The cohort model provides a unique learning community for candidates and engenders significant support for success. The program includes full time 1 - 1.5 year licensure plans for regular education and a 1.5 - 2 year full-time option for initial special education and dual special education. Students enroll in course work at the university and clinical internships in one of CU Denver’s professional development schools throughout the program. By enrolling in several courses and internships together, elementary, secondary, and special education teacher candidates are well prepared to support K-12 students with a wide range of diverse needs.

Clinical Experience in Professional Development Schools
While in the program, teacher candidates intern in a professional development school for an entire academic year, gradually beginning with two days a week early on and increasing over time to five days per week by the end of the program. University courses are closely integrated with the sequence of clinical internship experiences providing teacher candidates with multiple opportunities to engage in the authentic work of teachers. Teacher candidates co-teach closely with practicing teachers in the school and gradually assume full responsibility for teaching by the end of the program. Elementary teacher candidates generally spend an entire academic year in a single partner elementary school, whereas secondary teacher candidates spend their internships in one of the partner middle schools and one of the partner high schools. Special education teacher candidates complete internships at multiple levels, P-12, due to the wide-span of their license that enables them to support students with special needs ages 5-21. The schools are located in several Denver metropolitan districts serving large populations of low-income and/or minority students, as well as a sizeable number of students for whom English is a second language as well as students with special needs. Each school is supported by a site professor from the university one day per week and by a master teacher, called a site coordinator, who supports teacher candidates through their academic year of internships.

Assessment
Both the coursework and the internship experiences have been created to align with the Colorado Teacher Quality Standards, as well as frameworks for culturally and linguistically responsive instruction and Universal Design for Learning. Students in all programs engage in a common set of learning opportunities and internship assessments. Colorado mandates that all teacher education programs be “performance-based” in order to recommend candidates completing the program for licensure; thus all candidates in the Master of Arts in Teaching program must demonstrate proficiency in both the university-based coursework and their internships.

Programs of Study
Due to the complex nature of teacher preparation that is governed by state and national accreditation and legislative mandates that can change from year to year, please see current programs of study in the teacher education Canvas handbook.

Master of Arts in Teaching Admissions Requirements

Admission Deadline: February 15 for summer and April 1 for fall start dates.

Graduate Teacher Education Admission Requirements
Competitive undergraduate cumulative GPA of 3.0 (Students with a lower GPA may be considered under certain conditions. Please see SEHD website.)

- Completion of any outstanding prerequisite content courses that are needed per a transcript evaluation. Consult with your advisor to create a plan for completing these requirements.
• A complete application which can be obtained online at https://education.ucdenver.edu/academic-services/admissions which includes transcripts, essays, recommendations, and an interview.

• **Attend an admissions interview.** All individuals who submit a complete application will receive an email with the interview invitation that contains all details approximately one week before the scheduled interview. During this group interview, prospective students participate in highly interactive group discussions and activities to further assess each applicant’s readiness as well as aid in internship placement.

Programs

• Teaching, MA (p. 655)

• Mentor Teacher Graduate Certificate (p. 657)
Teaching, MA

Introduction

The MAT + Teaching Licensure incorporates an opportunity to earn an advanced degree with Colorado teacher credential requirements in a nationally recognized preparation program focused on preparing you to be an equity-minded teacher working in diverse schools and communities. CU Denver’s long-standing P-12 Professional Development School Model ensures that you will be highly supported in a program that blends a year-long sequence of residency internships co-teaching with master practicing teachers in local schools while engaging in teacher education coursework taught by top faculty. The program is also designed as a cohort model where you will quickly create long-lasting friendships and have the support of other teacher candidates.

The program is designed as a 12-18 month program (depending on the licensure track). Licensure tracks include:

- Elementary Education (Grades K-6) – 15 months
- Special Education Generalist (Ages 5-21) – 18 months
- Secondary English (Grades 7-12) – 12 months
- Secondary Science (Grades 7-12) – 12 months
- Secondary Social Studies (Grades 7-12) – 12 months
- Secondary Mathematics (Grades 7-12) – 12 months
- Middle School Mathematics (Grades 6-8) – 12 months

Education Pathways

The graduate teacher education program at CU Denver is designed to allow individuals with a minimum of a bachelor’s degree to seek a master’s degree along with an initial Colorado teacher’s license in the following areas:

- Elementary Education (K-6) (approximately 51-54 semester hours)
- Secondary Education (7-12) (approximately 39 semester hours)
  - English
  - Secondary Mathematics (7-12)
  - Science (General Science, Biology, Earth Science, Physics, Chemistry)
  - Social Studies
  - World Language (K-12) (Spanish, French)

Mentor Teacher Graduate Certificate

Introduction

Teachers who mentor pre-service and novice educators are stepping into a role of emerging leadership. We want to honor their expertise, insight and experience by offering this professional learning opportunity developed specifically to help them advance their career and deepen their skills as a mentor and teacher leader. For teachers mentoring a pre-service teacher, this certificate also leads to the Colorado Department of Education Mentor Teacher Added Endorsement.

Program Overview

The Clinical Teacher Certificate consists of a series of online, flexibly-paced modules that combine into three graduate courses. The modules related to each course will be offered in specific semesters (see below) and the courses can be taken in any order. In addition, mentors come together in 2-hour monthly virtual community of practice via zoom in order to foster collaboration, strategy sharing, and problem-solving issues that arise in mentoring.

- UEDU 5120 Teachers as Leaders (Summer)
- UEDU 5130 Mentoring Novice Teachers (Fall)
- UEDU 5140 Model and Apprenticing Effective Practice (Spring)

Lastly, those mentors who want to earn the CDE Mentor Teacher Added Endorsement must complete the 3-course certificate, attend 10 virtual community of practice sessions, and provide evidence of effective mentoring of a pre-service or alternative licensure teacher(s) for a year. The program provides the templates needed to document ongoing, effective mentoring.

Overview

Lead. Solve. Change. The nationally-ranked School of Public Affairs at the University of Colorado Denver prepares leaders for government, nonprofit, and criminal justice professions. Driven by a public service mission, our students are committed to solving pressing public problems and improving their communities for the better. School of Public Affairs graduates work as legislators, policy analysts, nonprofit leaders, law enforcement professionals, local government managers, community advocates, university faculty and administrators, and in many other fields and professions, linked by the common goal of contributing to the greater good.

The School of Public Affairs offers degree programs with optional concentrations, as well as minors and undergraduate and graduate certificate programs. All of our programs are committed to developing the rigorous and ethical thinking necessary for public service professionals. Courses integrate theoretical knowledge with the real-world application of important skills, and students frequently have the opportunity to work on behalf of government agencies and nonprofit organizations. Programs are offered in a variety of formats to accommodate both full-time students and working professionals, all taught by the same highly-regarded faculty. The size of the school means that all students can receive individualized advising and attention, and students and alumni benefit from in-house career and alumni services.

Highlights

The MPA program is accredited by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA), the authoritative accrediting body in the field of public policy, affairs and administration.

US News & World Report 2023 Rankings in the Nation:

• #29 – Best Graduate Public Affairs Schools
• #10 – Environmental Policy and Management
• #16 – Nonprofit Management
• #19 – Public Finance and Budgeting
• #21 – Public Management and Leadership
• #25 – Local Government
• #21 - Online Master of Criminal Justice

Faculty

To learn more about our renowned faculty, please view their bios on the School of Public Affairs website (https://publicaffairs.ucdenver.edu/people/faculty/).

Criminal Justice (CRJU)

CRJU 5001 - Criminal Justice Systems, Policies, and Practice (3 Credits)
Examines current critical issues in the justice system affecting law enforcement, courts, corrections, and recent social developments related to personnel. The development, implementation, and analysis of public policy in the field of criminology are explored in depth. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
Typically Offered: Fall, Spring.

CRJU 5002 - Criminological Theory (3 Credits)
Examines the origins of criminal behavior and impact of crime on society. Theories of deviant, delinquent, and criminal behavior are examined, and practical implications and application of theoretical constructs are analyzed through current research paradigms and empirical research.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 7002. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
Typically Offered: Fall, Spring.

CRJU 5003 - Research Methods (3 Credits)
Examines applied research designs and analytical models. Research problems in the system are utilized to illustrate the application and interpretation of alternative research strategies. Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
Typically Offered: Fall, Spring.

CRJU 5004 - Statistics for Criminal Justice (3 Credits)
Introduces principles of descriptive and inferential statistics and provides tools for understanding research findings. Topics include hypothesis testing and point estimation; bivariate and multivariate measures of association; inferential statistics; ordinary least square regressions, logistic regression analyses. Prereq: CRJU 5003 with a B- or better.
Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CRJU 5003 with a B- or better. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
Typically Offered: Fall, Spring.

CRJU 5005 - Law & Society (3 Credits)
Examines topics that relate the functions and societal implications of law. The course focuses on social/ legal theory and analyzes law and legal institutions from a critical perspective. Materials provide content on how to evaluate law and legal institutions, especially in relation to equality, justice, and fairness. Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
Typically Offered: Fall, Spring.

CRJU 5010 - Seminar Nonprofit Management (3 Credits)
Provides an overview of principles and concepts unique to nonprofit management. Topics include executive management, funding diversity, human resource management, marketing, volunteer management and ethics. Students also are introduced to the history and importance of the nonprofit sector. Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 3110 and 5110.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
CRJU 5015 - Intelligence Writing and Briefing (3 Credits)
This course provides an overview of intelligence analysis and aims to provide the skills and tools necessary to effectively communicate results to consumers. Students will be familiarized with the analytical, perceptual, and cognitive pitfalls of conducting intelligence analysis and learn a variety of strategies for overcoming these problems, preparing professional intelligence products, and presenting executive-level intelligence briefings. Cross-listed with CRJU 4015. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

CRJU 5100 - Administration of Criminal Justice (3 Credits)
Analyses the policies and practices of agencies involved in the criminal justice process, from the detection of crime and arrest of suspects through prosecution, adjudication, sentencing and imprisonment, to release. The patterns of decisions and practices are reviewed in the context of a systems approach. Cross-listed with CRJU 7100 and CRJU 4100. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

CRJU 5140 - Nonprofit Financial Management (3 Credits)
Provides a grounding in financial management for the "non-accountant" by focusing on an array of knowledge and management skill areas necessary for allocating and controlling resources and for analyzing, reporting and protecting the fiscal health of the organization. Topics include key accounting principles, understanding and using financial statements, the budget development process, cash flow analysis, banking relationships, using the audit report, maximizing investment policy and strategy, and understanding the boundaries of tax exemption. Cross-listed with PUAD 4140 and 5140. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5150 - Interpersonal Violence (3 Credits)
This course examines the criminal justice systems response to intimate partner violence by focusing on the interactions between victims, offenders and the individual components of the criminal justice system. By exploring the dynamics of intimate partner violence this course addresses the theory, history, research, legislation and policy implications related to the criminal justice systems response to violence against women. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 4140. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5200 - Wrongful Convictions (3 Credits)
Explores the continuum of justice-system errors ranging from persons who are falsely accused (arrested, prosecuted, and tried) to those who are wrongly convicted and imprisoned or sentenced to death row and erroneously executed. Cross-listed with CRJU 4200. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5210 - Prisoner Reentry (3 Credits)
Focuses on prisoner reentry, including strategies to prepare inmates for release, reduce recidivism, and facilitate adjustment in the community while meeting the demands of public safety. Cross-listed with CRJU 4210. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5220 - The American Jury System (3 Credits)
Examines historical and current issues in jury decision making and dynamics. The course explores issues such as jury size, eyewitness testimony, and jury reform. Court decisions are examined as a comprehensive understanding of jurors and their role. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5240 - Gang Patterns and Policies (3 Credits)
Focuses on gangs, gang members, and gang activity in the United States. Topics include the origins and historical development of gangs, gang migration, gang related crime and violence, gang victimization, and the effects of gang involvement on communities and families. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5250 - Criminal Offenders (3 Credits)
Introduces the core principles and tools of motivational interviewing as it is used currently with the offender population. Students learn how to utilize these skills working with specific offender populations and how to motivate these often resistant clients to change their thinking patterns and behaviors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5260 - Crime and Literature (3 Credits)
This seminar focuses on nonfiction literature as it relates to criminality and the criminal justice system. Samples of social commentary, biographies/autobiographies, and other accounts presented within various types of nonfiction literature are examined in order to more fully understand and appreciate their impact in shaping public opinion of the criminal justice system. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5270 - Case Studies in Criminal Justice (3 Credits)
This seminar examines the lives of people who live on the margins of a society that perceives them as outsiders. Ethnographic studies that utilize observation, participant observations, and interviews as their primary research methodology are assigned in order to develop a critical understanding of the social marginalization and cultural aspects of the lives of real human beings living constantly on the edge of the law. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 3270. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
CRJU 5280 - Computer Crime (3 Credits)
The course is designed to enhance interest, experience and knowledge in leadership that promotes professionalism and ethical behavior. Individual and organizational dynamics are explored through a critical perspective, focusing on criminal justice roles and responsibilities. The class teaches effective leadership skills in areas such as team building, strategic planning, and decision making. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 7280. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5285 - Trauma in the Criminal Justice System (3 Credits)
This course examines trauma as widely prevalent among those who are served by the criminal justice system and experienced disproportionately among criminal justice professionals. Trauma prevalence, theory, prevention, and interventions through a trauma stewardship lens for victims of multiple forms of trauma, including vicarious traumatization and secondary traumatic stress, will be emphasized through an all-inclusive view across the criminal justice continuum. Cross-listed with CRJU 3285. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

CRJU 5290 - Capital Punishment (3 Credits)
This course examines in-depth a comprehensive range of issues surrounding capital punishment. Specifically, it looks at the history of capital punishment, methods of execution, legal issues and case law, deterrence, miscarriages of justice, discrimination in the capital charging and sentencing system, and the role of the death penalty internationally. The coverage of these issues relies on many sources, including scholarly readings, non-fiction books, court cases, websites, videos and documentaries, speeches, and media. Cross-listed with CRJU 3290. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 5301 - Crime and the Media (3 Credits)
Surveys the relationship between mass media and the U.S. criminal justice system. Special attention is given to the role of media in the social construction of reality. Emphasis is placed on the application of social constructionism to criminal justice related social problems. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5320 - Police Administration (3 Credits)
Considers the major issues confronting police executives, such as professionalism, recruitment, selection, training, deployment, innovation, evaluation, and charges of brutality, inefficiency, and corruption. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5325 - Qualitative Methods for Criminal Justice (3 Credits)
Focuses on qualitative methods applicable to research in the field of criminal justice. The primary focus is on ethnographic approaches employing such fieldwork techniques as observation, participant observation, interviews, content analysis, life histories and case studies. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5331 - Crime Analysis and GIS (3 Credits)
Serves as an introduction to the uses and applications of analysis within law enforcement, including the role of analysis in law enforcement, theories that guide analysis and police practices, commonly used data sources and technology, and techniques for various types of analysis utilized in law enforcement. Cross-listed with CRJU 4331. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: "B" or better in CRJU 5003 and 5004

CRJU 5361 - Capstone Seminar (3 Credits)
Synthesizes competencies gained throughout the course of study into a client-based research project. Students conduct independent research, complete a final written project demonstrating their qualifications and expertise, and orally present findings to a committee of faculty and criminal justice professionals. Prereq: CRJU 5000, CRJU 5100, CRJU 5120, CRJU 5321. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Prereq: CRJU 5001 or 5100, 5002 or 5120, 5003 or 5321, 5004 or 5000 and 5005
Additional Information: Report as Full Time.

CRJU 5391 - Sex Offenders and Offenses (3 Credits)
Focuses on challenges practitioners face in managing sex offenders, including the development of programs and partnerships that can effectively assess, track, control, and treat sex offenders through all phases of the system. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5410 - Victimology (3 Credits)
Examines victim-offender relationships, interactions between victims and the criminal justice system, and connections between victims and other social groups and institutions among various populations. The course addresses the theory, history, research, legislation and policy implications related to the social construction of "the victim." Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5420 - Violence in Society (3 Credits)
This course examines various aspects of violence, including distribution over time and space; situations and circumstances associated with violent victimization and offending; and how social institutions, community structure, and cultural factors shape violent events. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
CRJU 5430 - Drugs, Alcohol, and Crime (3 Credits)
This course provides an interdisciplinary overview of theory, research and policy issues surrounding the relationship between drugs, alcohol and crime, and responses of the criminal justice system. Special attention is paid to the socially constructed nature of illegal substances and connections with U.S. drug policy. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5510 - Contemporary Issues in Law Enforcement (3 Credits)
Examines current thinking and experience with respect to changing and reforming police programs and practices. The course focuses primarily on the American police experience, reviewing major innovations, exploring their rationale, and examining organizational impediments to their implementation. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5520 - Corrections (3 Credits)
Examines the development and implementation of correctional systems in America. Topics include the origins of correctional efforts and the evolution of the prison system, punishment and rehabilitation rationales in the context of sentencing models, the social organization of the prison, including inmate subcultures and staff work strategies, and the inmates' rights movement and the impact of judicial intervention in correctional settings. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5530 - Community Corrections (3 Credits)
Analyzes theories and practices of probation and parole, responses of paroling authorities to public pressures and court controls, and their implications for rehabilitation. Efforts to bridge institutional settings and community life, as well as the feasibility and effectiveness of treating individuals under sentence in the community, are reviewed. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5540 - Juvenile Justice (3 Credits)
Examines policies and practices of agencies in processing youthful offenders through the juvenile court system, reviews trends in juvenile justice policymaking, and assesses changes in response to juvenile crime by both the juvenile justice and criminal justice systems. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5550 - Criminal Justice Policy and Planning (3 Credits)
Provides a survey of conceptual and design strategies in criminal justice policy analysis. The logic and rationale of these various strategies are contrasted, and their relative merits are critiqued. Selected policy issues in the criminal justice system are utilized to illustrate the application and interpretation of alternative strategies. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5551 - Courts, Law & Justice (3 Credits)
Analyzes judicial organization, court administration, and criminal court judicial decision making practices within the context of the broader operation of the criminal justice system. Special attention is paid to the social organization of the courtroom, examining the special roles of judges, prosecutors, and defense attorneys. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5552 - Criminal Justice Ethics (3 Credits)
Offers a normative framework within which to explore ways to increase sensitivity to the demands of ethical behavior among criminal justice personnel. The application of a normative perspective enhances the possibility that moral problems are better understood, more carefully analyzed, and rendered more tractable. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5553 - Gender and Crime (3 Credits)
Explores issues surrounding women as offenders, victims, and criminal justice professionals. Investigates explanations for the involvement of women in illegal activities. Analyzes the plight of battered women, rape victims, and other female victims. Examines the participation of women in law enforcement judicial processes, corrections, and lawmaking. Cross-listed with CRJU 4190. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5555 - Profiling Criminal Behavior (3 Credits)
Examines the dynamics of individual criminal acts utilizing inductive and deductive methodology to profile criminal behavior, offender characteristics, crime scene investigation, evidence collection, and case linkage of specific categories of crimes. Topics include homicide, serial crime, stalking. Max hours: 3 Credits. Grading Basis: Letter Grade
CRJU 5571 - The Social Organization of Crime (3 Credits)
Explores the relationship between neighborhood social disorganization and crime from a social ecology perspective. The course examines the underlying social causes of phenomena such as criminal victimization, violent and property crime, neighborhood fear, neighborhood deterioration, and recidivism. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5572 - Race, Crime, and Justice (3 Credits)
Examines the influence of race in the administration of justice. Special attention is paid to the policy implications of racial disparities in the criminal justice system. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
CRJU 5574 - White Collar Crime (3 Credits)
Employs social science and legal approaches to examine crime committed by corporations as well as by individuals in white-collar occupations. Topics include how such crimes are socially defined, who commits them, which social contexts promote them, who is victimized, and how society and the criminal justice system respond. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5655. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5575 - Offenders With Mental Health Disorders (3 Credits)
Examines the offender who may be mentally disordered. Special attention is paid to the various phases of the criminal justice system where psychiatrists are involved (e.g., diversion, fitness, insanity and sentencing), dangerous sex offender legislation, "not guilty by reason of insanity" and "guilty but mentally ill" statutes, and issues concerning confidentiality, informed consent, and treatment. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 7575 and 3575. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5576 - Social Science in the Criminal Justice System (3 Credits)
Examines the use of social science as a tool for legal analysis within the criminal justice system. The course examines how social science research is used to resolve relatively simple factual disputes, then moves on to more complex issues that arise when social science is invoked to make or change law. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5644 - Environmental and Hazards Law (3 Credits)
This course provides a broad overview of issues in all hazards management as well as natural resource and environmental health law. It will convey knowledge of the statutes, regulations and court decisions governing the management of hazards by governmental agencies. The course will also cover aspects of environmental policy implementation and enforcement including the legal aspects of natural resource allocation and management and environmental protection. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5644. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5650 - Public Service in Emergency Management and Homeland Security (3 Credits)
Introduces emergency management and homeland security including: management of hazards, emergencies, disasters, and the networks of government and nonprofit organizations providing services. Focuses on principles of emergency management and homeland security at state and local jurisdictional levels. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 4010, PUAD 5650, and CRJU 4010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5655 - Principles of Emergency Management (3 Credits)
Introduces the discipline and practice of emergency management. Topics include administrative practice and processes by which public policy shapes governmental responses to hazards, emergencies, and disasters. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5655, PUAD 4012, and CRJU 4012. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5710 - Environmental Crime and Justice (3 Credits)
Environmental Crime and Justice will look at the disproportionate benefits and burdens of environmental "profits" (e.g., open spaces, clean air and water, etc.) and contamination (which results from behaviors that include, but are not limited to crime), as well as the implications of these disparities on certain areas, particularly communities of color and indigenous communities. The role of the government, the private sector, non-profit organizations, and the environmental justice movement in creating, perpetuating, and minimizing environmental crime and its disparities will be examined, with part of the focus being on theories within critical criminology that address issues of environmental crime injustices. The nature of environmental offenders and victims will be explored. Policies and programs that have been organized to address environmental crime and other injustices and their effects (e.g., quality of life, birth defects, childhood asthma, lead poisoning, cancer, etc.) will be reviewed, including responses by the criminal justice system to environmental crime. Students will examine critically the consistencies and inconsistencies in institutionalized mechanisms that are set up, either intentionally or more subtly, to create, reinforce, or minimize environmental crimes and injustices. Cross-listed with CRJU 4710. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

CRJU 5720 - Public Policies for Hazards and Disasters (3 Credits)
Examines public policymaking and administration related to homeland security and disasters in the United States, including the interplay between security and traditional hazards management concerns. Assesses the role of institutional processes, governmental and nongovernmental organizations in policy development and implementation. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5720. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5910 - Nature and Scope of Interpersonal Violence (3 Credits)
Analyzes the social, historical, political, legal, and psychological aspects of gender-based violence. Topics include definitions of the problem, demographics, children and youth exposure, and national and global perspectives. Strategies for prevention, intervention, treatment, and social change are explored. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5910. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
CRJU 5920 - The Psychology of Interpersonal Violence (3 Credits)
Addresses the contributions and limitations of current empirical and clinical psychological literatures on interpersonal violence (IPV). Special attention is paid to the effects of IPV on adult and child survivors, their psychological needs, and the contribution of psychological knowledge to understanding and addressing the problem of IPV. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5920. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5930 - Interpersonal Violence Law and Public Policy (3 Credits)
Examines public policy and law related to interpersonal violence (e.g., welfare reform, child maltreatment, criminal and civil court responses). Topics include the role of law enforcement agents, victim advocacy, and methods to change law and policy. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5930. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5940 - Interpersonal Violence Leadership, Advocacy, and Social Change (3 Credits)
Examines different models of social change and various approaches to public address, including social movements and campaigns. Strategies for engaging diverse individuals, systems and communities to address interpersonal violence will be emphasized. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5940. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5950 - Global Study Topics (3 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with CRJU 4995. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 9.

CRJU 6171 - Homicide Studies (3 Credits)
This class examines criminal homicide from all angles: the offenders, the victims, the police, prosecution, defense, jurors, and judges. It looks at investigative techniques and the latest science involved in criminal investigation, jury selection, and other criminal justice system issues. It focuses on what is arguably the most serious form of homicide, murder, exploring sensational cases that involve delving into the psyche of murderers. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 6600 - Special Topics in Criminal Justice (3 Credits)
Specialized seminar intended to provide students and faculty with the opportunity to explore significant themes, issues, and problems in the field of criminal justice. Topics vary from semester to semester. Course may be taken for credit more than once, provided subject matter is not repeated. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 18 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 18.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 6840 - Internship in Criminal Justice (3-6 Credits)
Affords the student the opportunity to pursue creative research activities under the individual supervision of a full-time faculty member. No more than six semester hours of credit for independent study may be applied toward the MCJ degree. MCJ Prereq: 12 semester hours of criminal justice course work and permission of instructor. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 9.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 6910 - Master's Thesis (3-6 Credits)
Affords the student the opportunity to pursue creative research activities under the individual supervision of a full-time faculty member. No more than six semester hours of credit for independent study may be applied toward the MCJ degree. MCJ Prereq: 12 semester hours of criminal justice course work and permission of instructor. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 6 Credits.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 6950 - Master's Thesis (3-6 Credits)
Independent original research project supervised and evaluated by a thesis committee. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 6 Credits.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 7002 - Criminological Theory (3 Credits)
Explores the origins of criminal behavior and impact of crime on society. Theories of deviant, delinquent, and criminal behavior are examined, and practical implications and application of theoretical constructs are analyzed through current research paradigms and empirical research. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Cross-listed with CRJU 5002. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.
Public Administration (PUAD)

PUAD 5001 - Introduction to Public Administration and Public Service (3 Credits)
Examines fundamental theories, structures, and processes of governance in the United States, including the evolving roles and responsibilities of public, nonprofit, and private sectors. Covers topics including public service values and ethics, cross-sector and intergovernmental partnerships, and comparative public administration. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade

PUAD 5002 - Organizational Management and Behavior (3 Credits)
Course covers elements which, when combined, create a resilient learning organization. Topics include organization theory and design, managing human capital, group development and performance, inter- and intragroup communication, information management, and ethical decision-making. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade

PUAD 5003 - Research and Analytic Methods (3 Credits)
Examines qualitative and quantitative research methods used to answer questions and inform decisions in public and nonprofit settings. Methods covered include reviewing scholarly literature; formulating research questions; selecting appropriate design, data collection and sampling strategies; and analyzing data. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade

PUAD 5004 - Economics and Public Finance (3 Credits)
Evaluates the role of government with respect to provision and financing of public goods. Explores 5 broad topics: 1) welfare & microeconomics 2) expenditure theory 3) resource mobilization (emphasis on taxation) 4) fiscal federalism 5) basic budgeting & analytical tools. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade

PUAD 5005 - The Policy Process and Democracy (3 Credits)
Introduces theoretical and applied studies of the policy process. Policy process includes how (I) issues are conceptualized and brought forward as problems needing action; (II) policies are designed and selected; and (III) enacted policies are implemented, monitored, evaluated, and revised. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade

PUAD 5006 - Public Service Leadership and Ethics (3 Credits)
Provides understanding of the role played by leaders within and across public and nonprofit organizations, and in complex social environments. Examines theories of leadership, skills and processes employed by effective leaders, and ethical conduct of leaders in shaping societal values. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade

PUAD 5007 - Qualitative Research Methods (3 Credits)
Focuses on qualitative research methods that incorporate field work techniques such as observation, interviews, and content analysis. The main objective is to discover practicalities and limitations of ethnographic methods with a comparative methodology perspective. Students are required to conduct a research project. Prereq: PUAD 5003 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 7007. Max hours: 3 Credits. Grading Basis: Letter Grade

PUAD 5008 - Evidence-Based Decision-Making (3 Credits)
Course provides opportunities for students to use skills developed in Research and Analytic Methods (including developing research/evaluation questions, designing surveys/interview guides, and analyzing data) to inform decisions and/or develop recommendations in multiple policy, management, and program evaluation scenarios. Prereq: PUAD 5003 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade

Certificate of Professional Development in Public Administration (3 Credits)

CRJU 8990 - Doctoral Dissertation (1-10 Credits)
Upon admittance to candidacy, students must be continuously registered for dissertation credit each fall and spring semester or be automatically dropped from the program. Students must register for 7.0 credit hours per semester. In cases where students will not be using any university resources during a particular semester, they may petition the PhD director to register for only 3.0 credit hours to maintain continuous enrollment. Students must be registered for dissertation credit during the semester they have a colloquium or defense. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 10 Credits. Grading Basis: Letter Grade with IP Repeatable. Max Credits: 10.

Additional Information: Report as Full Time.
PUAD 5010 - Rocky Mountain Program (3 Credits)
This program encourages participants to examine their public sector roles, develop an understanding of their leadership styles, develop communication skills, and enhance their ability to think more systematically and strategically in their positions. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5030 - Denver Community Leadership Forum (3 Credits)
Designed to increase cross sector cooperation and enhance personal leadership skills and knowledge, program is administered annually February to November. Students gain skills in conflict management, participate in Outward Bound program in July, and learn leadership theories and concepts from a variety of presenters and trainers.
Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5110 - Seminar in Nonprofit Management (3 Credits)
This course provides an overview of the principles and concepts that are unique to nonprofit management. Topics include executive management, funding diversity, human resource management, marketing, volunteer management and ethics. Students are also given an introduction to the history and the importance of the nonprofit sector. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 3110 and CRJU 5010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5115 - Effective Grant Writing for Nonprofit and Public Sector Managers (3 Credits)
This course is designed to provide students with the knowledge and skills to perform one of the most critical functions for any public or nonprofit sector agency today: gaining funds through proposals. Students learn how to locate and analyze funding opportunities through public and private funders and how to research, plan and write effective and competitive proposals. The course provides theoretical and practical knowledge about persuasive writing, the proposal submission and review process, building effective relationships with funders and how to proceed after post-funding decisions (positive or negative). Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5120 - Nonprofits and Public Policy (3 Credits)
Examines the intersection of public policy and the nonprofit world and the ways in which each affects the other. The course examines current policy issues that relate to the nonprofit sector such as conversion of nonprofit to for-profit status, regulation of the nonprofit sector, issues of financial management, the role of nonprofits in devolution and privatization of government services, tax exemptions, "charitable choice," donor control, governance and the future of the future of the sector. The course examines the ways nonprofits have affected the policy process and public policies by exploring the factors that shape social movements, nonprofit advocacy, strategies of influence, and the role of nonprofits in social movements such as Civil Rights and the environment. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5125 - Civil Society and Nongovernmental Organizations (3 Credits)
This course is designed for students interested in the international nonprofit sector. The course compares non-Western forms of civil society with the American tradition of civil society. Students will learn about the efforts of Nongovernmental Organizations (NGOs) working in Third World countries to influence democracy, free association, and/or increased political and societal pluralism. Additionally, the course will focus on NGO management and governance issues in countries where there are strict controls and limits on the activities of NGOs. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5130 - Collaboration Across Sectors (3 Credits)
The blurring of the three economic sectors - government, business and nonprofits - continues to increase as more partnerships are developed across sectors. This course focuses on collaboration and partnerships involving public, nonprofit and for-profit organizations. Additionally, students are expected to gain an understanding of the issues and policies associated with the bidding, contracting, program delivery and reporting processes when nonprofit organizations are contracted to achieve public sector goals and/or private sector objectives. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 5140 - Nonprofit Financial Management (3 Credits)
Provides a grounding in financial management for the "non-accountant" by focusing on an array of knowledge and management skill areas necessary for allocating and controlling resources and for analyzing, reporting and protecting the fiscal health of the organization. Topics include key accounting principles, understanding and using financial statements, the budget development process, cash flow analysis, banking relationships, using the audit report, maximizing investment policy and strategy, and understanding the boundaries of tax exemption. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 4140 and CRJU 5140. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5145 - Philanthropy (3 Credits)
Today, the organized field of philanthropy and its companion field, impact investing, are growing at a remarkable speed. This course will explore the origins of philanthropy and impact investing and provide students with an in-depth understanding of how philanthropy works today and the nuances that exist among different forms of philanthropy and investment: individual giving, foundations, corporate philanthropy, and impact investing. It will also explore new trends among individual and institutional investors and unpack the different approaches that funders are taking to influence how services are delivered and the striking efforts to affect systems changes. Cross-listed with PUAD 4145. Max hours: 3 Credits.
Grading Basis: Letter Grade

PUAD 5150 - Fundraising & Financial Resource Development (3 Credits)
Designed to provide a comprehensive overview of funding sources available to nonprofit organizations (e.g., foundation and governmental grants, individual and corporate donations, entrepreneurial sources of revenue and events,), as well as detailed information on how to secure support of the various sources presented. Additionally, students are expected to gain both theoretical and practical knowledge relevant to why it is important to diversify an organization's revenue streams. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5160 - Nonprofit Boards and Executive Leadership (3 Credits)
The important roles and responsibilities of a voluntary board of directors and the process of governing are often misunderstood. This course explores the special powers of a nonprofit board of directors as framed by and responsive to public policy. From the perspective of organizational behavior and theory, the course examines the leadership role and interplay between board members and the executive director. The examination includes a comparative analysis of different governing models, and explores fundamental questions of board composition, the role of advisor boards, achieving effective board meetings, the realm of liability, using committees, and the board's role in fundraising, among other special subject matter. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5170 - Strategic Management for Nonprofit and Public Managers (3 Credits)
Designed to train public and nonprofit managers in the effective use of strategic management tools and techniques traditionally used by corporations. Strategic management tools and skills, although traditionally used by business, should not be seen as the exclusive domain of corporations. The course teaches students how to adapt traditional strategic management capabilities to the particular conditions of public and nonprofit organizations. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5180 - Social Entrepreneurship (3 Credits)
Designed to introduce students to the concept of social entrepreneurship. Using nonprofit (and public) organizational examples, students gain an understanding of what it means to be an innovative manager. Students study techniques designed to advance an organization's mission and increase organizational effectiveness, accountability and efficiency through the use of for-profit techniques within a nonprofit context. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5190 - Comparative Nonprofit Sector Development (3 Credits)
Students will analyze the evolution, scope, structure, financing, and role of nonprofit sector in select countries. Through readings, lectures, case studies, students will gain a depth understanding of civil society organizations' role with respect to the market and state. Restriction: Restricted to Grad and Non-Degree Grad students only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

PUAD 5200 - Education Policy (3 Credits)
This course provides a broad overview of the history, purposes, and structure of public education in the United States, including topics such as education systems and governance, institutional actors, funding, education reform trends, and policy implementation and outcomes. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5210 - Education Finance (3 Credits)
This course provides students with a fundamental understanding of public school funding and expenditures in the United States, and the impact of school finance policy and practice in driving educational and social outcomes. Key issues addressed include revenue sources and funding mechanisms; the evaluation of school funding through the lenses of equity, adequacy, efficiency, and the achievement of desired educational outcomes; specific topics such as teacher compensation, special education, and facilities funding; the strategic use of funding to drive reform in K-12 education; and the future of public education funding. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)
PUAD 5220 - Human Resource Management (3 Credits)
Covers human resource functions in public and nonprofit agencies. Topics include job analysis, compensation, recruiting, selection, rewarding, training and development. Contemporary issues concerning civil service reforms are also presented. Cross-listed with PUAD 4220. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

PUAD 5230 - Education Systems Leadership (3 Credits)
This class uses the combined lens of history, public administration, organizational theory, and public policy analysis to better understand the complexity of public education systems in America. The class focuses heavily on recent changes to the "one best system" model that developed from the 1850s through 2000, and particularly emphasizes reforms that aim to provide greater autonomy to individual schools and encourage more of a governance role for school districts. The class is very interactive and includes a number of guest speakers and experts. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

PUAD 5250 - Intergovernmental Management (3 Credits)
Surveys the basic literature of intergovernmental management and examines the interactive role of managers at federal, state, and local levels of government. Emphasis is placed on current intergovernmental issues. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5260 - Managing for Social Equity (3 Credits)
This course uses a systems approach to analyze social equity through philosophical, societal, and organizational lenses, and explores the various ways in which public and nonprofit managers can impact social equity inside and outside their organizations through inclusive management and leadership approaches and techniques. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5271 - Managing Conflict and Change (3 Credits)
Explores the process of change in organizations, communities, society, and conflicts that arise. Through the use of relevant case studies and role playing exercises, students are provided a practical framework for looking at change and managing conflict associated with change. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5280 - American Public Service Environment (3 Credits)
The American Public Service Environment. This course, intended for students from cultures outside the United States and for whom English is a second language, introduces students to public service professionals working at area government and nonprofit organizations. Students learn about the American system of government, American political and cultural values, and the workplace context for public service in America. Through interactions with public service professionals and course assignments, students improve their language skills as well as their knowledge about government and civil society in America. Restriction: This course is restricted to International students enrolled in the International MPA (IMPA program). Max Hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restriction: This course if restricted to International students enrolled in the International MPA (IMPA program)

PUAD 5290 - Comparative Public Administration for International Students (3 Credits)
This year-long course provides mid-career international students with individualized attention as they actively compare and contrast American public administration with that of their home countries, develop their own organizational and personal leadership skills, and prepare to implement lessons learned in the U.S. in their own cultural and professional context. Restriction: Restricted to International students enrolled in the International MPA (IMPA) program only. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: This course if restricted to International students enrolled in the International MPA (IMPA program)

PUAD 5310 - Principles of Policy Design (3 Credits)
This course will explore the intricacies of designing public policy in different political and institutional contexts, the ways in which different tools of policy design influence the people and organizations targeted by policies, and criteria and mechanisms for assessing policy designs. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5320 - Public Policy Analysis (3 Credits)
Provides training in the systematic analysis of policy and program initiatives using an economics orientation and employing a case method. The course covers benefit-cost analysis, cost-effectiveness analysis, present values, and the treatment of multiple criteria in public sector program analysis. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 5325 - Public Private Partnerships (3 Credits)
This course has been designed to introduce students to public private partnerships (PPPs) as a field of study and practice using Colorado as a laboratory for current practice, policy, strategy, management and finance. Students will engage current examples of PPPs as cases, learn and exchange in class presentations with guest lecturers currently leading PPPs and evaluate projects in class assignments doing research, analysis, and field interviews. Students will enhance their knowledge as well as skills commonly used in public, private, nonprofit and enterprise management and the public policy context and narrative of PPPs in international and U.S. practice. Cross-listed with PUAD 4325. Max hours: 3 credits
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5330 - Intermediate Statistical Analysis (3 Credits)
Follows PUAD 5003/7003 and is focused on more advanced statistical techniques to be used in research. These techniques include the use of regression in time series analysis; binary response; nonlinear, logistic, and profit models; and factor and path analysis. Evaluating potential problems with model specification and the remedies are included. Students are required to test hypotheses using these models with a data set. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 7330. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5350 - Program Evaluation (3 Credits)
Describes the theory and methodology for the design of social research and demonstration projects and the application of analytic and statistical methods for evaluating public programs. Focus is on the application of evaluation methods and techniques of data interpretation. Report preparation is emphasized. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5361 - MPA Capstone Seminar (3 Credits)
Synthesizes competencies gained throughout the course of study into a client-based research project. Students conduct independent research, complete a final written project demonstrating their qualifications and expertise, and orally present findings to a committee of faculty and public policy professionals. Prereq: PUAD 5001, 5002, 5003, 5004 or 5503, 5005 and 5006 with a B- or higher. Restriction: Restricted to Graduate majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5362 - MPP Capstone Seminar (3 Credits)
Synthesizes competencies gained throughout the course of study into a client-based research project. Students conduct independent research, complete a final written project demonstrating their qualifications and expertise, and orally present findings to a committee of faculty and public policy professionals. Prereq: PUAD 5003, 5004, 5005, 5310, 5320, 5380, 5750 with a B- or higher. Restriction: Restricted to Graduate majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5370 - Public Discourse and the Policy Process (3 Credits)
This course will explore how public discourse (as found in the argumentations, frames, narratives, and debates in news and social media) shapes and is shaped by policy processes. Students will learn skills for analyzing public discourse and ways to contribute to it and develop a better understanding of how public discourse advances (or undermines) principles of democracy. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5380 - Public Participation, Political Equity, and Government (3 Credits)
This course explores issues related to the various ways the public engages in public affairs, including theoretical and practical insights about engaging in the policy process, administration of government programs and service delivery, political mobilization, self-governance, and more. The course addresses engagement at local, subnational, national, and supranational levels. Woven throughout the course are normative challenges associated with political equity and different ways to assess public participation and its impacts. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5410 - Administrative Law (3 Credits)
Examines legal aspects of policy implementation particularly the relationship between courts and administrative agencies. Covers standards of judicial review and agency action; administrative procedure and due process; selected special topics such as rights, liabilities, and immunities of public employees; and administrative discretion and scientific uncertainty. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5420 - Law and Public Policy (3 Credits)
Examines the relationship between courts and legislative assemblies. Explores how legislators use the policy process to shape and influence the exercise of judicial authority, and how the courts affect the policy process in reviewing the constitutionality of state and federal legislation. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 5440 - Negotiation and Conflict Resolution (3 Credits)
Focused on concepts and skills necessary to negotiate policy and management decisions and manage internal and external conflicts. Designed to help students understand the dynamics that affect negotiations and to apply the principles and strategies of negotiation in a variety of decision making and dispute resolution contexts. Cross-listed with PUAD 4440. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5455 - Environmental and All-Hazards Management Law (3 Credits)
Conveys knowledge of the statutes, regulations, administrative law, and court decisions governing the management of hazards, natural resources, and environmental protection, with a focus on the risk and liability that individuals and organizations face in these areas of law. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5455. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5460 - Political Advocacy (3 Credits)
Addresses advocacy & lobbying issues of public policy & govt problems. Special attention is given to how advocacy process works in the public sector & policy making bodies & how lobbying techniques & processes can be understood. General focus on practical applications at all levels of govt with primary attention to state & local govt. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5501 - Contemporary Issues in Revenue and Tax Administration and Policy (3 Credits)
This course provides a contemporary evaluation of Colorado's tax structure, revenue system, and the state budget. The interaction of politics, the initiative process, the State Constitution, and stakeholders is studied. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5502 - Public Financial Management and Policy (3 Credits)
Provides basic understanding of issues & tools relevant to financial mgmt of public & non-profit org, including managerial acct (managing resources & obligations, investing idle funds, reporting, financial statement analysis, overview of budgeting, revenue forecasting, & costing) & debt management. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5503 - Public Budgeting and Finance (3 Credits)
Covers concepts to manage the fiscal purse, prioritize resources, use financial documentation, and analyze fiscal data. Includes budget policy, content, format, processes, performance management, forecasting, inflation adjustment, time value of money, cost analysis, financial condition analysis, and spreadsheet competency. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5540 - Organization Development (3 Credits)
Studies the dynamics involved in managing and facilitating change in organizations by application of behavioral science knowledge. Emphasis is placed on both cognitive and experiential learning. A background in organization theory and administrative behavior is required. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5550 - Telemedicine, the non-profit and for-profit role (3 Credits)
Draws upon existing policy models and evaluates the status of health policy formulation and implementation. Health policy topics include Medicaid and Medicare, managed care, health care reform proposals, telemedicine, the non-profit and for-profit role in health. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5599 - Local Government Management (3 Credits)
Relates the systems, processes, and principles of public management to the local government environment. Public management concepts such as strategic planning, bureaucracy, formal and informal organizational structures, human resource planning, management control, systems theory, and administrative behavior are explored within the context of local government. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5615 - Health Policy (3 Credits)
Examines local government from the perspective of politics and public policy making. The course focuses on local government political structures, policy analysis and formulation, political forces in administrative decision making, and the relationships between professional administrators and elected officials. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5625 - Local Government Politics and Policy (3 Credits)
Examines local government from the perspective of politics and public policy making. The course focuses on local government political structures, policy analysis and formulation, political forces in administrative decision making, and the relationships between professional administrators and elected officials. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 5627 - Introduction to Smart Cities (3 Credits)
This course will explore some of the most change-making technological innovations in the 21st century and their impact on public policy in cities through a survey of best practices, model policies, and lessons learned from cities across the United States and globe. Restriction: Restricted to graduate and graduate non-degree majors within CU Denver. Cross-listed with ENGR 6299, ENVS 5660, and URPL 6299. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

PUAD 5628 - Social Problems and Policies (3 Credits)
Examines local government and nonprofit approaches to addressing common urban social problems. Topics covered may include urban poverty, crime, education, housing, and immigration. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5630 - Economic Development (3 Credits)
As governments search for new ways to be efficient, improve performance and leverage resources, they are also looking at their communities, states and regions in terms of competitiveness, international trade and globalization innovation, collaboration and partnerships. This course will look at practices where economic development includes these elements: the Colorado Innovation Network, the Colorado Office of Economic Development and International Trade, the Metro Denver and Denver South Economic Development Partnerships, Mile High Connects, the Downtown Denver Partnership, and public-private partnerships across multiple sectors in transportation, broadband, water and innovation. Students will develop an economic development strategy based on knowledge and tools learned in the course. Political and professional leadership will be part of the dialog. Cross-listed with PUAD 4630. Max hours: 3 credits
Grading Basis: Letter Grade

PUAD 5631 - Seminar in Environmental Politics and Policy (3 Credits)
Examines the fundamental principles of politics and policy that shape strategies of environmental protection. Focuses on the role of institutional processes, government organizations and nongovernmental organizations in environmental politics and policy. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5632 - Seminar in Environmental Management (3 Credits)
Examines the practical challenges facing environmental managers today, using a series of case studies. Focuses on the role of institutional processes, government organizations and nongovernmental organizations in the practice of environmental management. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5638 - Colorado Politics, Policy, and Administration (3 Credits)
This course focuses on the state-level policy-making process in Colorado, and how that process is affected by local, state, and federal politics, administration, and other policy-making constraints applicable to the state. Substantive topics covered will vary, but students will be exposed to a wide range of perspectives and experiences from practitioners and policy influencers engaged in state-level politics, policy-making, and administration. Cross-listed with PUAD 4638. Restriction: Restricted to Graduate level and Non-Degree Graduate students only. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

PUAD 5644 - Environmental and Hazards Law (3 Credits)
This course provides a broad overview of issues in all hazards management as well as natural resource and environmental health law. It will convey knowledge of the statutes, regulations and court decisions governing the management of hazards by governmental agencies. The course will also cover aspects of environmental policy implementation and enforcement including the legal aspects of natural resource allocation and management and environmental protection. Cross-listed with CRJU 5644. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5650 - Public Service in Emergency Management and Homeland Security (3 Credits)
Introduces emergency management and homeland security including: management of hazards, emergencies, disasters, and the networks of government and nonprofit organizations providing services. Focuses on principles of emergency management and homeland security at state and local jurisdictional levels. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 4010, CRJU 4010, and CRJU 5650. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5655 - Principles of Emergency Management (3 Credits)
Introduces the discipline and practice of emergency management. Topics include administrative practice and processes by which public policy shapes governmental responses to hazards, emergencies, and disasters. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5655, CRJU 4012, and PUAD 4012. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
Typically Offered: Fall.

PUAD 5710 - Public Sector Technology (3 Credits)
This course addresses the impact and current use of technology in the modern government and nonprofit sector environments, including implications for interacting with citizens and organizational stakeholders, organizational decision-making and communication, and core functions such as budgeting and human resources. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 5720 - Public Policies for Hazards and Disasters (3 Credits)
Examines public policymaking and administration related to homeland security and disasters in the United States, including the interplay between security and traditional hazards management concerns. Assesses the role of institutional processes, governmental and nongovernmental organizations in policy development and implementation. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5720. Max hours: 3 Credits. Grading Basis: Letter Grade Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5740 - Sustainable Energy Policy (3 Credits)
This course will cover the basic principles and operation of policy and regulation that impact the production and use of energy (with a focus on transportation and electricity generation) from all of the major sources currently available and used. We will analyze (and, through a sustainability lens, critically evaluate) energy from water (hydroelectric, hydrokinetic), coal, domestic and international petroleum, natural gas and nuclear reactors. A significant portion of the course will focus on electricity generation and associated policy, technologies and regulation. In the context of each energy source and use, we will review and discuss sustainability practices, policies, and, issues. Cross-listed with PUAD 5740. Max hours: 3 credits Grading Basis: Letter Grade

PUAD 5750 - Policy Workshop Seminar (1 Credit)
This seminar explores issues related to public policy and democracy. Students will design and develop a project of their choosing through regularly “workshopping” their ideas with fellow students and professors. Students will also discuss course readings, presentations, and contemporary events. The seminar content will vary by semester. Prereq: PUAD 5005. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 3 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 3. Prereq: PUAD 5005. Restriction: Restricted to Graduate and Graduate Non-Degree students. Typically Offered: Fall.

PUAD 5910 - Nature and Scope of Interpersonal Violence (3 Credits)
Analyzes the social, historical, political, legal, and psychological aspects of gender-based violence. Topics include definitions of the problem, demographics, children and youth exposure, and national and global perspectives. Strategies for prevention, intervention, treatment, and social change are explored. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5910. Max hours: 3 Credits. Grading Basis: Letter Grade with IP Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5920 - The Psychology of Interpersonal Violence (3 Credits)
Addresses the contributions and limitations of current empirical and clinical psychological literatures on interpersonal violence (IPV). Special attention is paid to the effects of IPV on adult and child survivors, their psychological needs, and the contribution of psychological knowledge to understanding and addressing the problem of IPV. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5920. Max hours: 3 Credits. Grading Basis: Letter Grade with IP Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 6910 - Internship (1-3 Credits)
For students who have not had government experience. Studies and reports are made while students have full- or part-time administrative traineeships, internships, or similar positions in government agencies or government-related organizations. Prereq: Completion of the common core courses. It is recommended that at least three of the track courses also be completed. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 6950 - Master's Thesis (3-6 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

Additional Information: Report as Full Time.

PUAD 7007 - Qualitative Research Methods (3 Credits)
Focuses on qualitative research methods that incorporate field work techniques such as observation, interviews, and content analysis. The main objective is to discover practicalities and limitations of ethnographic methods with a comparative methodology perspective. Students are required to conduct a search project. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Cross-listed with PUAD 5007. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

PUAD 7010 - Advanced Seminar in International Public Policy (3 Credits)
Explores advanced approaches and techniques in the study of public policy from international perspectives. The course includes lectures, student research presentations, and discussions with international public policy scholars. The course also includes public policy readings and writing assignments tailored to the student interests and needs. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

PUAD 8010 - Historical and Comparative Foundations of Public Administration (3 Credits)
A doctoral seminar on developments and changes in public administration as a field of study. It examines how theory and practice have evolved and how the field is defined, studied and taught. It must normally be taken during the first full semester of the doctoral program. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.
PUAD 8020 - Seminar in Public Management (3 Credits)
An in-depth examination of contemporary literature, concepts, and theories of public management. Current issues and research problems are emphasized to prepare students for their advanced research. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

PUAD 8030 - Seminar in Public Policy (3 Credits)
Offers an in-depth examination of contemporary literature, concepts, and theories of public policy, with an emphasis on policy process. Current issues and research problems are emphasized to prepare students for their advanced research. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

PUAD 8040 - Seminar In Economic and Institutional Foundations of Public Affairs (3 Credits)
Offers an in-depth examination of the economic and institutional foundations of public affairs, with an emphasis on the evolution of theory and research in these fields. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

PUAD 8050 - Quantitative Methods I (3 Credits)
Introduces foundational principles & techniques of quantitative analysis in social sciences generally & in public affairs specifically, incl statistical inference, regression analysis, other related estimation techniques, & commonly-used statistical software packages. Students should have taken master level stats course w/in last 3 yrs. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

PUAD 8060 - Seminar On The Conduct Of Empirical Inquiry (3 Credits)
Introduces basic elements of research design in the social sciences, focusing on the relationship between theories and methods, concept development and measurement, selection of observations or cases, and alternative methods of data collection and analysis. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

PUAD 8070 - Quantitative Methods II (3 Credits)
Moves beyond basic linear regression techniques by covering advanced analytic methods for improved causal inference. Students will also be introduced to data management skills and techniques for using longitudinal data. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

PUAD 8840 - Independent Study: PUAD (1-6 Credits)
(Doctoral level) Affords students the opportunity to do independent, creative work. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

PUAD 8990 - Doctoral Dissertation (1-10 Credits)
Once students are admitted to candidacy, they must be continuously registered for dissertation credit each fall and spring semester or be automatically dropped from the program. Students must register for 5 credit hours per semester. In cases where students will not be using any university resources during a particular semester, they may petition the Ph.D. director to register for fewer semester credit hours. Students must be registered for dissertation credit during the semester they have a colloquium or defense. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Repeatable. Max hours: 30 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 30.
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

Additional Information: Report as Full Time.
Criminal Justice, BA/MCJ

Introduction

Please click here (http://catalog.ucdenver.edu/cu-denver/undergraduate/ schools-colleges-departments/school-public-affairs/) to see School of Public Affairs information.

The Pathways Bachelor of Arts in Criminal Justice (BACJ)/Master of Criminal Justice (MCJ) degree allows high-performing students to earn both degrees in an accelerated timeframe. Both the BACJ and the MCJ degrees are offered fully online, providing students with the flexibility to schedule courses around family and work demands while engaging in criminal justice opportunities in their own communities.

The BACJ/MCJ degree program offered by the School of Public Affairs allows high-performing students to count 12 credit hours towards both the BACJ and the MCJ degrees. Eligible students will have completed at least 75 credits with a minimum 3.5 grade point average (GPA) in the BACJ major and a 3.0 overall GPA, completed the undergraduate Core Curriculum, and met all other requirements listed below.

Students are eligible to receive the BACJ degree once they have successfully completed 120 semester hours and all CU Denver undergraduate degree requirements. The MCJ will be conferred once the student has completed all degree requirements.

Pathways Application

Both current CU Denver BACJ majors and new transfer students are eligible to apply to the Pathways BACJ/MCJ program after meeting the following criteria:

- Currently enrolled in the School of Public Affairs as an undergraduate Criminal Justice major
- Completed the University of Colorado Denver's undergraduate core curriculum
- Completed at least 60 undergraduate credit hours
- Completed the following 12 credit hours in Criminal Justice or have an approved plan for enrolling in each class:

</table>

- All transfer courses must have been approved and accepted towards the major and degree at the time of application
- Minimum 3.0 cumulative GPA
- Minimum 3.5 cumulative GPA in the Criminal Justice major

Students will work with their assigned undergraduate academic advisor to apply for the Pathways program. Students do not apply for the Pathways program at the time of application to CU Denver.

BACJ/MCJ Program Matriculation

Students admitted to the Pathways BACJ/MCJ program will work with their assigned undergraduate academic advisor to enroll in MCJ-level courses each semester. Students can complete up to 6 credit hours of MCJ coursework per semester as an undergraduate and a maximum total of 12 graduate semester credits as an undergraduate BACJ/MCJ student overall. Students will continue to take undergraduate coursework while also completing graduate-level coursework.

Students in the Pathways BACJ/MCJ program may be eligible to complete the MCJ-level internship only after successfully passing two MCJ-level courses. The MCJ-level internship may fulfill both the BACJ and MCJ internship requirement. The BACJ-level internship will not fulfill the MCJ-level internship. Students must maintain a minimum 3.0 cumulative GPA for all coursework and a 3.5 GPA for the BACJ major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 70)
- CU Denver Undergraduate Core Curriculum (http://catalog.ucdenver.edu/cu-denver/undergraduate/graduation- undergraduate-core-requirements/)
- School of Public Affairs Graduation Requirements (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-public-affairs/#graduationrequirementstext)
- Click here (http://catalog.ucdenver.edu/cu-denver/undergraduate/ academic-policies-procedures/) for information about Academic Policies.

Program Requirements

1. Students must complete all CU Denver, School of Public Affairs, and Criminal Justice degree requirements to earn their Bachelor of Arts in Criminal Justice degree. The Bachelor of Arts in Criminal Justice is conferred once students meet all degree requirements.
2. Students seek full admission to the Master of Criminal Justice program during their final semester as an undergraduate student. This application is different than the one used to apply for the Pathways program. Students must receive a minimum of a B- grade in each required core MCJ course, whether taken as an undergraduate or a graduate student.
3. Students must maintain a 3.0 GPA overall in all graduate-level courses.
4. Students in the MCJ program must successfully complete the MCJ capstone or thesis.
5. Students must fulfill all college/school and major/program requirements.
6. The MCJ will be conferred once the student has completed all requirements of the Master of Criminal Justice degree.
7. The School of Public Affairs reserves the right to rescind a BACJ/MCJ student's admittance to the Pathways program if at any point the student's GPA falls below the requirements listed above.
Criminal Justice, MCJ

Introduction

Graduate Education Policies and Procedures apply to this program. Nonresident students from western states may qualify for reduced tuition through the Western Regional Graduate Program.

Program Director: Mary Dodge, PhD

The Master of Criminal Justice (MCJ) program is designed for students interested in comprehensive graduate education in criminology and criminal justice. It is intended to provide an in-depth understanding of existing structures, practices, and challenges within this field of study.

Part of an academic and professional field of study, the MCJ program prepares students to administer, analyze, evaluate, and facilitate improvements in the rationality and responsiveness of the criminal and juvenile justice systems. Research design capability is emphasized alongside skills required for analyzing empirical data and innovating in crime control and prevention. Students who advance through the program acquire strategies and skills necessary for promoting individual, organizational, and social change.

To learn more about our renowned faculty, please view their bios (https://publicaffairs.ucdenver.edu/people/faculty/) on the School of Public Affairs website.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

1. Students must successfully complete 36 semester hours of approved coursework.
2. Students who have not had at least one year of professional work experience in the criminal justice must complete an internship through a 3-semester-hour course, which will count as one elective course.
3. Students must maintain at least a 3.00 cumulative GPA in this program.
4. Students must earn at least a B- in all coursework to be accepted for graduate credit towards the degree.
5. No more than 6 semester hours of Independent Study may be applied toward the degree.
6. This program must be completed within 7 years.

Capstone

Select one of the following:
- CRJU 5361 Capstone Seminar (during the final semester)
- CRJU 6950 Master’s Thesis ²

Total Hours: 36

1. Students who have not had one year of criminal justice experience following the awarding of their bachelor’s degree will be required to complete CRJU 6910 Internship in Criminal Justice. A minimum of 240 hours of supervised work is required in order to earn 3 hours of credit. The internship requirement may only be waived with the permission of the MCJ Program Director. If required, the internship will count for 1 of the 6 elective courses. Students must complete 18 credit hours of MCJ coursework with at least a 3.00 cumulative GPA prior to enrolling in the internship course.
2. With approval by and in consultation with the program director prior to enrolling in the course.

Optional Concentrations

Students may select one of the concentrations below or complete the MCJ without a specified concentration. Students completing a concentration take their electives in the area of their concentration, complete the advanced seminar project in the area of their concentration, and are advised by faculty from the concentration.

Crime Analysis Concentration

The Crime Analysis concentration coursework emphasizes criminal justice and criminology related subjects; however, the analytic skills learned in this concentration can easily be applied to many fields.

Public Administration, BA/MPA

Introduction

Please click here (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-public-affairs/) to see School of Public Affairs information.

The Pathways Bachelor of Arts in Public Administration (BAPA)/Master of Public Administration (MPA) degree allows high-performing students to earn both degrees in an accelerated time frame, saving students both time and money. Students graduating with the Pathway BAPA/MPA degree are prepared for leadership and management roles in public service, including local, state, and federal governmental agencies and in nonprofit and nongovernmental organizations. Both the BAPA and the MPA degrees are offered fully online, providing students with the flexibility to schedule courses around the reality of family and work demands while also engaging both local and fully online students in public service opportunities in their own communities.

The BAPA/MPA degree program offered by the School of Public Affairs allows high-performing students to count 12 credit hours towards both the BAPA and the MPA degrees. Eligible students are those who have completed at least 75 credits with a minimum 3.5 grade point average (GPA) in the BAPA major and a 3.0 overall GPA, completed the undergraduate Core Curriculum, and who meet the other requirements listed below.

Students are eligible to receive the BAPA degree once they have successfully completed 120 semester hours and all CU Denver undergraduate degree requirements. The MPA will be conferred once the student has completed all requirements of the MPA degree.

Pathways Application

Both current CU Denver BAPA majors and new transfer students are eligible to apply to the Pathways BAPA/MPA program after meeting the following criteria:

- Currently enrolled in the School of Public Affairs as an undergraduate Public Administration major
- Completed the University of Colorado Denver’s undergraduate core curriculum
- Completed at least 75 undergraduate credit hours
- Completed the following 15 credit hours in Public Administration or have a plan on when they will take each class:

<table>

</tbody>
</table>

- All transfer courses must have been approved and accepted towards the major and degree at the time of application
- Minimum 3.0 cumulative GPA
- Minimum 3.5 cumulative GPA in the Public Administration major

Students do not apply for the Pathways program at the time of application to CU Denver. Students will work with their assigned undergraduate academic advisor to apply for the Pathways program after they have already matriculated to the university and have met the stated criteria.

BAPA/MPA Program Matriculation

After a student is admitted to the Pathways BAPA/MPA program, they will work with their assigned undergraduate academic advisor to enroll in MPA-level courses each semester. Students can complete up to 6 credit hours of MPA coursework each semester as an undergraduate and a maximum of 12 graduate semester credits can be completed as an undergraduate BAPA/MPA student overall. Students will continue to take undergraduate coursework while also completing graduate-level coursework.

Students in the Pathways BAPA/MPA program may be eligible to complete the MPA-level internship only after successfully passing two MPA-level courses. The MPA-level internship may fulfill both the BAPA and MPA internship requirement. The BAPA-level internship will not fulfill the MPA-level internship. Students must maintain a minimum 3.0 cumulative GPA for all course work and a 3.5 GPA for the BAPA major.

General Requirements

To earn a degree, students must satisfy all requirements in each of the three areas below, in addition to their individual major requirements.

- CU Denver Graduation Requirements (p. 70)
- CU Denver Undergraduate Core Curriculum (http://catalog.ucdenver.edu/cu-denver/undergraduate/graduation-requirements/)
- School of Public Affairs Graduation Requirements (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-public-affairs/#graduationrequirementstext)
- Click here (http://catalog.ucdenver.edu/cu-denver/undergraduate/academic-policies-procedures/) for information about Academic Policies

Program Requirements

1. Students must complete all CU Denver, School of Public Affairs, and Public Administration degree requirements to earn their Bachelor of Arts in Public Administration degree. The Bachelor of Arts in Public Administration is conferred once students meets all degree requirements.

2. Students seek full admission to the Master of Public Administration program during their final semester as an undergraduate student. This application is different than the one used to apply for the Pathway program. Students must receive a minimum of a B- grade in each required core MPA course, whether taken as an undergraduate or a graduate student.

3. Students must maintain a 3.0 GPA overall in all graduate-level courses.

4. In the MPA program students must successfully complete the MPA capstone or thesis.
5. Students must fulfill all college and major requirements.

6. The MPA will be conferred once the student has completed all requirements of the Master of Public Administration degree.

7. The School of Public Affairs reserves the right to rescind a BAPA/MPA student's admittance to the Pathways program if at any point the student's GPA falls below the requirements listed above.
Public Administration, BA/Master of Public Policy

Introduction
Please click here (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-public-affairs/) to see School of Public Affairs information.

The Pathways Bachelor of Arts in Public Administration (BAPA)/Master of Public Policy (MPP) degree allows high-performing students to earn both degrees in an accelerated time frame, saving students both time and money. Students graduating with the Pathways BAPA/MPP degree receive a solid grounding in the context and management of public service organizations and the knowledge and skills needed to design, advocate for, and analyze public policies relevant to those organizations and the larger democratic society. Both the BAPA and the MPP degrees are offered fully online, providing students with the flexibility to schedule courses around the reality of family and work demands while also engaging both local and fully online students in public service opportunities in their own communities.

The BAPA/MPP degree program offered by the School of Public Affairs allows high-performing students to count 12 credit hours towards both the BAPA and the MPP degrees. Public Administration, MPA

Program Director: Todd Ely, PhD

Introduction
The Master of Public Administration (MPA) degree provides graduate professional education for students interested in public service leadership positions and careers with public and nonprofit agencies and organizations. The program serves students new to public service as well as those already in the field who are interested in furthering their careers.

To learn more about our renowned faculty, please view their bios (https://publicaffairs.ucdenver.edu/people/faculty/) on the School of Public Affairs website.

The School of Public Affairs offers three ways to complete the MPA:
- Accelerated MPA
- Executive MPA
- Traditional MPA

Students pursuing the executive and traditional options may also choose to designate a concentration within one of the optional focus areas or complete the MPA without a specified concentration. Students in the accelerated format are not able to choose a concentration due to the cohort nature of the program and sequencing of classes.

Program Delivery
- Courses are offered on campus, online, and in remote and hybrid formats. The Accelerated MPA is offered in a cohort model, typically on campus.

Program Requirements
1. Students must successfully complete at least 36 credit hours of approved coursework for the Traditional and Accelerated MPA formats. Students must successfully complete at least 30 credit hours of approved coursework for the Executive MPA format.
2. Students in the Traditional and Accelerated MPA formats who have not had at least one year of professional work experience in the public or nonprofit sectors must complete an internship through an additional three-semester-hour course, bringing their total semester-hour requirements to 39.
3. Students must maintain at least a 3.00 cumulative GPA in this program.
4. Students must earn at least a B in all core coursework and at least a C in all elective coursework to be accepted for graduate credit towards the degree.
5. No more than six credit hours of Independent Study may be applied toward the degree.
6. This program must be completed within six years.

<td>3</td>
</tr>
</tbody>
</table>

MPA Options
In addition to the traditional MPA program, students may consider the accelerated and executive options.

Accelerated MPA
The Accelerated MPA (AMPA) is a fast-paced, full-time option that brings academically superior students together with a dedicated research and teaching faculty in the midst of the vibrant downtown Denver environment. The students in the cohort enjoy a unique experience as they go through all classes in the MPA together, fostering a community of scholar-practitioners.

The AMPA option enables students to focus their energies on a concentrated program of study and earn a nationally accredited, 36-hour MPA in 12 months. All coursework is completed in-person as a cohort. The online option is not available for students in the AMPA program. Students in the AMPA program are not able to choose a concentration due to the cohort nature of the program and sequencing of classes.

Students are admitted to the program in cohorts of up to 20 participants. A new cohort starts each August. The cohort format helps to increase the opportunity to become acquainted with other graduate students and increases the opportunities for interaction between program participants and faculty. It is preferred that applicants have some knowledge of...
economics, statistics, and political science prior to starting the program, although this is not required.

The AMPA option is priced at a flat rate, regardless of in-state or out-of-state student status, providing opportunities for substantial savings. Students interested in pursuing the AMPA option should designate this as their desired program on their admissions application.

Executive MPA
The Executive MPA program is designed for senior-level professionals in the nonprofit and public sectors. The Executive MPA requires a minimum of 30 credit hours to complete the degree. Professional experience counts for two courses, leaving 10 courses to complete, as opposed to the 12 courses of the Accelerated or Traditional MPA options.

Initial Leadership Experience (3 credit hours)
All students will enroll in the Rocky Mountain Leadership Program (3 credit hours), which is a six-day seminar typically held in Breckenridge. The RMLP brings together public and non-profit professionals from across the country to collaborate on current management issues while honing leadership skills.

Coursework
Required courses (15 credit hours)
Students will take two core MPA courses in sections open only to those in the Executive MPA program. These courses are held in a hybrid format, which combines a one-week intensive session (typically on the Denver campus) with additional online instruction.

- PUAD 5001 Introduction to Public Administration and Public Service (3 credit hours)
- PUAD 5002 Organizational Management and Behavior (3 credit hours)

Students take three additional MPA core course (9 credits) with students in the traditional MPA Program. The additional core courses to be taken shall be determined by the student, in consultation with their student advisor and/or the Executive MPA Faculty Advisor. These courses may be offered in formats including online, weekend intensive, or through the traditional campus-based setting. Additional core course sections open only to those in the Executive MPA program may also be offered.

Electives (9 credit hours)
In consultation with an advisor, students select three elective courses with students in the traditional MPA Program that best meet their professional goals. These courses may be offered in formats including online, weekend intensive, or through the traditional campus-based setting.

Capstone or Thesis (3 - 6 credit hours)
Students elect to take either PUAD 5361 MPA Capstone Seminar (3 credit hours) or PUAD 6950 Master’s Thesis (3 - 6 credit hours) during their final semester with Program Director approval.

Optional Concentrations
Students in the traditional MPA program may select one of the concentrations below or complete the MPA without a specified concentration. In rare cases, Executive MPA students may complete a concentration. It will require careful planning with an advisor and may require additional credit hours. All students completing a concentration take their electives in the area of their concentration, complete the advanced seminar project in the area of their concentration, and are advised by faculty from the concentration.

All MPA concentrations require a total of 12 credits hours of concentrated elective coursework and may either be taken as part of the MPA program or as a stand-alone Graduate Certificate.

Disasters, Hazards and Emergency Management Concentration
The concentration in Disasters, Hazards, and Emergency Management (DHEM) provides advanced education in the management of emergencies, hazards, disasters, and community resilience. DHEM is designed for students who work or will work in the field of natural and man-made hazards, community resilience, and emergency management. The DHEM concentration requires a total of 12 credit hours.

Education Policy Concentration
The concentration in Education Policy provides students with an understanding of how K-12 education is governed, financed and regulated in the United States. Students will become familiar with the interaction between federal, state, and local policies and with the context in which education policy is formulated and implemented. The Education Policy concentration requires a total of 12 credit hours.

#### Code
- **PUAD 5130**: Collaboration Across Sectors

#### Total Hours: 6
Nonprofit Management Concentration

The concentration in Nonprofit Management prepares students to become innovative and critical thinkers in the areas of nonprofit organizational management and public policy, with a unique approach that bridges theoretical knowledge with real-world experience. As students prepare for their careers or advancement in their current positions, they gain insight into the interdependence between the nonprofit, public, and for-profit sectors. Graduates are able to span the boundaries of these three sectors to assess community needs, navigate the realm of public policy, and strategically and effectively manage organizations that ultimately benefit society. The Nonprofit Management concentration requires a total of 12 credit hours.

The School of Public Affairs’ affiliation with the Nonprofit Leadership Alliance gives students the opportunity to earn the Certified Nonprofit Professional (https://www.nonprofitleadershipalliance.org/) (CNP) credential through completion of the Nonprofit Management concentration coursework, additional required extracurricular activities, and an examination. Contact cnp@ucdenver.edu for more information about this credential.

PUAD 5720  Public Policies for Hazards and Disasters

While many MPA students have the option to take PUAD 5503 - Public Budgeting and Finance as a core course, students pursuing a concentration in Public Policy Analysis do not take this course as a core course. They must instead take PUAD 5004 - Economics and Public Finance to earn the concentration.

| Total Hours | 12 |
Public Policy, MPP

Program Director: Chris Weible, PhD

Introduction

The Master of Public Policy (MPP) degree prepares students to design, advocate for, and evaluate public policy from positions inside or outside of government. Students will gain understanding of public policy design and analysis techniques, as well as the role of politics and power in influencing the making and implementation of public policy. Democratic norms constitute the bedrock and lodestone of this program, emphasizing principles of political equity and human dignity for all.

To learn more about our renowned faculty, please view their bios (https://publicaffairs.ucdenver.edu/people/faculty/) on the School of Public Affairs website.

Program Delivery

• Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

• Students must successfully complete at least 36 credit hours of approved coursework (or 39 credit hours if the internship is required).
• Students must maintain at least a 3.00 cumulative GPA in this program.
• Students must earn at least a B- in all core coursework and at least a C in all elective coursework to be accepted for graduate credit towards the degree.
• No more than 6 credit hours of Independent Study may be applied toward the degree.
• Students who have not had at least one year of professional work experience in the public or nonprofit sectors must complete an internship through an additional 3-semester-hour course, bringing their total semester-hour requirements to 39.
• This program must be completed within 6 years.

Optional Concentrations

Students in the MPP program may select one of the concentrations below or complete the MPP without a specified concentration. All students completing a concentration take their electives in the area of their concentration, complete the advanced seminar project in the area of their concentration and are advised by faculty from the concentration.

Education Policy Concentration

The concentration in Education Policy provides students with an understanding of how K-12 education is governed, financed, and regulated in the United States. Students will become familiar with the interaction between federal, state, and local policies and with the context in which education policy is formulated and implemented. The Education Policy concentration requires a total of 12 credit hours.

1 This is a 1-credit course that must be taken three times with different topics each time.
2 Internship: Students who have limited experience (generally defined as less than one year of experience) in public, nonprofit or relevant private-sector service must enroll in PUAD 6910 Internship. The decision to require PUAD 6910 Internship for a particular student is made by the faculty admissions committee or the student’s faculty advisor upon the student’s acceptance to the MPP program. A minimum of 300 hours of supervised work and study is required to earn the 3.00 credit hours for this course. The internship requirement raises the total credit hours needed to earn the MPP degree from 36 to 39.
3 Students completing a thesis must enroll in the 3-credit PUAD 6950 course twice, for a total of 6 credits, with approval by and in consultation with the program director prior to enrolling in the course. The thesis option increases the total number of credits to complete the program from 36 to 39.
Environmental Policy Concentration

The concentration in Environmental Policy provides additional knowledge and skills relevant to careers in environmental policy. The Environmental Policy concentration requires a total of 12 credit hours.

Public Administration/Applied Geography and Geospatial Sciences, MPA/MA

Master of Public Administration Program Director: Todd Ely, PhD

Introduction

The Dual Master of Public Administration/Master of Arts in Applied Geography and Geospatial Sciences degree offers students interested in working in the government or nonprofit sectors an opportunity to combine fundamental management and leadership training with highly sought-after skills in geospatial sciences, including geographic information systems, remote sensing, computer cartography, and spatial statistics. This degree may be particularly appealing for students interested in working in areas such as environmental management, disasters and hazards mitigation and emergency management, urban affairs, and public health. The structure of the degree allows students to complete both programs in less time and for less money.

Admission

Students interested in pursuing the dual-degree program must apply to and be admitted to each of the programs. Students admitted to one program may choose to apply to the other program at a later date. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/#ac-master-of-public-administration-3) about how to apply to the Master of Public Administration portion of the dual degree.

Program Delivery

• Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

• Students are required to take 19 courses, or 57 semester hours, to complete the dual degree.

• Students without pre-service experience in the government or nonprofit sectors will also be required to take a 3-credit internship course, bringing the total number of semester hours to 60.

• Students must earn a minimum B- grade in each required course applied to satisfy degree requirements and must maintain a 3.0 cumulative GPA.

• No more than 6 semester hours of Independent Study may be applied toward the degree.

• For more detailed information about course sequencing and requirements, contact your advisor.

2 Unless this requirement is waived by the program director because the student has more than one year of professional work experience in government or nonprofit organizations.
Public Administration/Criminal Justice, MPA/MCJ

Master of Public Administration Program Director: Todd Ely, PhD
Master of Criminal Justice Program Director: Mary Dodge, PhD

Introduction

The fields of public administration and criminal justice may intersect and complement one another. This dual-degree program provides students with the opportunity to focus on crime and criminal justice issues while learning administrative skills necessary for success in a variety of public service settings. The total number of credit hours required to earn both degrees through this program is only 12 more than the total number of credit hours required for the Master of Public Administration (p. 683) or the Master of Criminal Justice (p. 677) by itself.

Admission

Students interested in pursuing the dual-degree program must apply to and be admitted to each of the programs. Students admitted to one program may choose to apply to the other program at a later date. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/) about how to apply for each of the programs on the School of Public Affairs website.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

1. Students are required to take 16 courses, or 48 semester hours, to complete the dual degree.
2. Students without pre-service experience in the government or nonprofit sectors will also be required to take a three-credit internship course, bringing the total number of semester hours to 51.
3. Students must earn a minimum B- grade in each required course applied to satisfy degree requirements and must maintain a 3.0 cumulative GPA.
4. No more than six semester hours of Independent Study may be applied toward the degrees.
5. For more detailed information about course sequencing and requirements, contact your advisor.

Total Hours

51

1 Students who have not had one year of criminal justice experience following the awarding of their bachelor’s degree will be required to complete CRJU 6910 Internship in Criminal Justice, and this can be applied as a CRJU elective. Students who have not had at least one year of professional work experience in the public or nonprofit sectors must complete PUAD 6910 Internship, bringing the total number of credits to complete the dual-degree program to 51. One internship is required for students who are not exempt from the internship requirement.
Public Administration/Economics, MPA/MA

Master of Public Administration Program Director: Todd Ely, PhD

Introduction

The fields of public administration and economics are inextricably linked. Economists provide much of the theory and analytic foundation that administrators use to evaluate and implement policy. Given that the capital of Colorado is Denver, there is a great need for administrators that fully understand methods of program evaluation and have the theoretical background needed to forecast how individuals and institutions will respond to new proposals. Similarly, good theory and practice must take into account how the proposals will be implemented, and results interpreted. Both administrators and economists need to be engaged in constructive dialog in order to be fully effective.

The Dual Master of Public Administration/Master of Arts in Economics degree provides the opportunity to take the core courses of both programs and choose electives that best suit their career and personal goals. Electives in one program are allowed to count as an elective in the other. The net result is that while both degrees separately require 66 hours, the dual degree program provides a more comprehensive and effective education in 48 hours or 73 percent of the dual degree total.

Admission

Students interested in pursuing the dual-degree program must apply to and be admitted to each of the programs. Students admitted to one program may choose to apply to the other program at a later date. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/#ac-master-of-public-administration-3) about how to apply to the Master of Public Administration portion of the dual degree.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

- Students must complete 16 courses, or 48 semester hours, with 21 semester hours in economics and 27 semester hours in public administration, to complete the dual degree.
- Students without pre-service experience in the government or nonprofit sectors will also be required to take a 3-credit internship course, bringing the total semester hours to 51.
- Students must earn a minimum B- grade in each required course applied to satisfy degree requirements and must maintain a 3.0 cumulative GPA.
- No more than 6 semester hours of Independent Study may be applied toward the degree.
- For more detailed information about course sequencing and requirements, contact your advisor.

2 To be completed after all other core courses or with instructor and advisor consent.
Public Administration/Juris Doctorate, MPA/JD

Master of Public Administration Program Director: Todd Ely, PhD

Introduction

The School of Public Affairs and the University of Colorado at Boulder School of Law jointly sponsor the Dual Master of Public Administration/Juris Doctor program. The program may be of particular interest to students who wish to practice law within the public sector, obtain a senior administrative post, represent public-sector clients, represent private-sector clients in transactions with government agencies and institutions, and/or develop scholarly expertise in the relationship between law and public administration.

Admission

Students interested in pursuing the dual-degree program must apply to and be admitted to each of the programs. Students admitted to one program may choose to apply to the other program at a later date. Upon admission, students may begin full-time study at either the School of Public Affairs or the School of Law; however, law study must be initiated no later than the beginning of the second year of enrollment in the program, and the first year of law study must be taken in its entirety and exclusive of non-law course work. Learn more about how to apply to the Master of Public Administration portion of the dual degree.

Program Delivery

- Courses at the School of Public Affairs are offered on campus, online, and in remote and hybrid formats.

Program Requirements

- Students are required to complete 101 semester hours to complete the dual degree.
- Students without pre-service experience in the government or nonprofit sectors will also be required to take a 3-credit internship course, bringing the total number of semester hours to 104.
- Students must earn a minimum B- grade in each required course applied to satisfy degree requirements and must maintain a 3.0 cumulative GPA.
- No more than 6 semester hours of Independent Study may be applied toward the degrees.
- For more detailed information about course sequencing and requirements, contact your advisor.

Public Administration/Public Health, MPA/MPH

Master of Public Administration Program Director: Todd Ely, PhD

Introduction
The University of Colorado Denver School of Public Affairs and the Colorado School of Public Health jointly sponsor the Dual Master of Public Administration/Master of Public Health, enabling students to take core and electives courses of both programs to simultaneously count toward both programs.

Admission
Students interested in pursuing the dual-degree program must apply to and be admitted to each of the programs. Students admitted to one program may choose to apply to the other program at a later date. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/#ac-master-of-public-administration-3) about how to apply to the Master of Public Administration portion of the dual degree.

Program Delivery
• Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements
• Students are required to take 20 courses, or 60 semester hours, to complete the dual degree.
• Students without pre-service experience in the government or nonprofit sectors will also be required to take a 3-credit internship course, bringing the total number of semester hours to 63.
• Students must earn a minimum B- grade in each required course applied to satisfy degree requirements and must maintain a 3.0 cumulative GPA.
• No more than 6 semester hours of Independent Study may be applied toward the degree.
• For more detailed information about course sequencing and requirements, contact your advisor.

Public Administration/Urban and Regional Planning, MPA/MURP

Master of Public Administration Program Director: Todd Ely, PhD

Introduction

Public administration and urban and regional planning have many aspects in common. To provide students with an excellent education through an understanding of both professions, the School of Public Affairs and the College of Architecture and Planning have developed the Dual Master of Public Administration/Master of Urban and Regional Planning degree, requiring a minimum of 66 semester hours, as compared to a total of 87 semester hours to complete both degrees independently.

Admission

Students interested in pursuing the dual-degrees program must apply to and be admitted to each of the programs before completing 18 hours in their respective programs. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/#ac-master-of-public-administration-3) about how to apply to the Master of Public Administration portion of the dual degree.

Program Delivery

• Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

• Students are required to take 20 courses, or 66 semester hours, to complete the dual degree.
• Students without pre-service experience in the government or nonprofit sectors will also be required to take a 3-credit internship course, bringing the total number of semester hours to 69.
• Students must earn a minimum B- grade in each required course applied to satisfy degree requirements and must maintain a 3.0 cumulative GPA.
• No more than 6 semester hours of Independent Study may be applied toward the degree.
• For more detailed information about course sequencing and requirements, contact your advisor.

Public Affairs, PhD

Program Director: Deserai Crow, PhD

Introduction
The Doctor of Philosophy in Public Affairs program addresses the demand for scholarship in public administration, public policy, public management, and criminal justice/criminology. The program develops the conceptual, research, and analytic skills and knowledge of its students so that they will be able to advance the study and practice of public affairs in their subsequent careers. The PhD prepares its graduates for positions in academia and consulting firms, public management and administration, public policy analysis, politics and advocacy, and nonprofits.

Graduate Education Policies and Procedures apply to this program.

Time Required for the PhD Degree
The PhD program requires an intense commitment. Most core courses are offered during the late afternoon or early evenings. On average, students take 4 to 6 years to complete all of the requirements for the PhD. The PhD program is not offered online, although some elective courses may be taken online.

PhD Application Requirements
Applicants must submit the following items before they can be considered for admission. The application deadline is February 1 for domestic applicants and January 15 for international applicants. Admitted students usually begin in the fall semester.

- Application form
- Official transcripts from all degree-granting institutions
- GRE scores (no more than five years old)
- A resume or curriculum vita
- Three letters of reference attesting to a candidate’s academic promise
- A well-articulated statement of purpose demonstrating an understanding of the research orientation of the degree and a strong motivation and determination to successfully complete the program

All these items are taken into consideration in admitting applicants into the PhD Program.

Applicants whose native language is not English are required to submit TOEFL or IELTS scores. This requirement may be waived for applicants who have completed a baccalaureate or graduate-level degree program at an English-speaking college or university. In addition, applicants whose native language is not English might be required to participate in an oral interview.

Financial Assistance
The School of Public Affairs will fund a small number of doctoral research assistantships each year based on financial availability and qualifications of the applicant.

Program Requirements
- Students must complete a total of 30 credit hours of coursework and 30 credit hours of dissertation work.
- Students may complete the degree full time or part time.
- Students may transfer 3 elective credits from a prior graduate degree.
- This program must be completed within 8 years.

Students focused on criminal justice, criminology, and related fields can opt to substitute one of the foundational courses (8010, 8020, 8030, or 8040) for Criminological Theory (CRJU 7002).

</tr>
</tbody>
</table>

Total Hours 60

Comprehensive Exam, Dissertation Proposal, and Dissertation
PhD students must take and pass the comprehensive exam immediately following the completion of their core courses. Admission to candidacy (advanced to candidacy) occurs after completing in a satisfactory manner all of their coursework, passing the comprehensive examination unconditionally, and achieving a grade point average of 3.33 in doctoral coursework. Soon after they have advanced to candidacy, students must defend a dissertation proposal. Upon completing their research, students must defend their dissertation.

Questions
Applicants are encouraged to contact Dr. Deserai Crow, Director of the PhD Program, at deserai.crow@ucdenver.edu.
Crime Analysis Graduate Certificate

Introduction

Students can earn the Graduate Certificate in Crime Analysis by successfully completing 15 credit hours of approved coursework. Anyone who has completed a bachelor's degree from an accredited university is eligible to enroll in the program. The certificate emphasizes topics in Criminal Justice and Criminology, but the analytic skills learned in the certificate training can be easily transferred to other fields.

Prospective students who wish to pursue this certificate must apply as non-degree applicants. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/) on the School of Public Affairs admission web page.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

1. Students must successfully complete 15 credit hours of approved coursework.
2. Students must maintain at least a 3.00 cumulative GPA in this program.
3. This program must be completed within 7 years.

Disasters, Hazards, and Emergency Management (DHEM) Graduate Certificate

Introduction

The Graduate Certificate in Disasters, Hazards, and Emergency Management (DHEM) provides advanced education in the management of emergencies, hazards, disasters, and community resilience. The DHEM program is designed to meet the needs of students who wish to work, or are currently working, in the field of natural and man-made hazards, community resilience, and emergency management.

The DHEM certificate applies an interdisciplinary approach to education that:

• Emphasizes high-level skills of critical thinking, learning, adaptation and policy analysis
• Focuses on the all-hazards emergency management model (encompassing natural and man-made hazards, such as wildfires, hurricanes, technological or industrial risks), and community resilience.

Students completing the DHEM graduate certificate program will have the knowledge and skills necessary to assess and manage a broad range of hazards and disasters, and to understand the policy and managerial environment in which emergency management occurs. Professionals who would like to supplement their work experience with classes in this area may also find the certificate helpful for their professional goals.

Prospective students who wish to pursue this certificate must apply as non-degree applicants. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/) on the School of Public Affairs admission web page.

Program Delivery

• Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

1. Students must successfully complete 12 credit hours of approved coursework.
2. Students must maintain at least a 3.00 cumulative GPA in this program.
3. This program must be completed within 7 years.

Education Policy Graduate Certificate

Introduction

The Graduate Certificate in Education Policy provides students with an understanding of how K-12 education is governed, financed, and regulated in the United States. Students will become familiar with the interaction between federal, state, and local policies and with the context in which education policy is formulated and implemented.

Prospective students who wish to pursue this certificate must apply as non-degree applicants. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/) on the School of Public Affairs admission web page.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.

Emergency Management and Homeland Security (EMHS) Graduate Certificate

Introduction

The Graduate Certificate in Emergency Management and Homeland Security (EMHS) provides advanced education in the management of emergencies, hazards, disasters, and homeland security. The EMHS program is designed to meet the needs of students who wish to work, or are currently working, in the field of emergency management and homeland security.

The EMHS program applies an interdisciplinary approach to education that:

- Emphasizes high-level skills of critical thinking, learning, adaptation and policy analysis
- Focuses on the all-hazards emergency management model (encompassing natural hazards, technological hazards, and terrorism).

Students completing the EMHS certificate program will have the knowledge and skills necessary to assess and manage a broad range of hazards and disasters, and to understand the policy environment in which emergency management occurs. Professionals who would like to supplement their work experience with classes in this area may also find the certificate helpful for their professional goals. Students in the EMHS certificate are often more interested in security risks than students in the DHEM certificate program and coursework supports that focus.

Prospective students who wish to pursue this certificate must apply as non-degree applicants. Learn more on the School of Public Affairs admission web page.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

1. Students must successfully complete 12 credit hours of approved coursework.
2. Students must maintain at least a 3.00 cumulative GPA in this program.
3. This program must be completed within 7 years.

Local Government Graduate Certificate

Introduction

Local governments are integral to providing and producing a range of public goods and services to residents including public works, education, parks and recreation, housing, emergency medical services, broadband, local courts, vital records, and transportation. Local government officials are also crucial for assisting higher-level governments in designing, implementing, monitoring, and evaluating public policy, thereby helping to achieve broader social outcomes. Perhaps more so than any other level of government, local government officials regularly coordinate and collaborate with non-profit and grassroots organizations to alleviate local policy problems.

As demand for higher quality and quantity of public services from all levels of governments increases, the need for an educated, public-service oriented local government workforce has likewise grown. To help meet this demand, the Graduate Certificate in Local Government in the School of Public Affairs allows students to become well-versed in the forces that shape the agendas of local governments and the organizations they interact with in order to gain a richer understanding of governance and policy making.

Prospective students who wish to pursue this certificate must apply as non-degree applicants. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/) on the School of Public Affairs admission web page.

Program Delivery

Managing for Social Equity Graduate Certificate

Introduction

For public administrators, social equity has been defined as the active commitment to fair, just, and equitable distribution of public services, design and implementation of public policy, and management of all institutions serving the public.

The Graduate Certificate in Managing for Social Equity provides knowledge and skills for government and nonprofit organizational managers and leaders interested in strengthening principles and practices that support equity, diversity, and inclusion within their organizations and as their organizations interact with the larger society.

Prospective students who wish to pursue this certificate must apply as non-degree applicants. Learn more on the School of Public Affairs admission web page.

Program Delivery

Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.

Nonprofit Management Graduate Certificate

Introduction

The Graduate Certificate in Nonprofit Management prepares students to become innovative and critical thinkers in the areas of nonprofit organizational management and public policy, with a unique approach that bridges theoretical knowledge with real-world experience. As students prepare for their careers or advancement in their current positions, they gain insight into the interdependence between the nonprofit, public, and for-profit sectors. Graduates are able to span the boundaries of these three sectors to assess community needs, navigate the realm of public policy, and strategically and effectively manage organizations that ultimately benefit society.

Prospective students who wish to pursue this certificate must apply as non-degree applicants. Learn more on the School of Public Affairs admission web page.

The School of Public Affairs’ affiliation with the Nonprofit Leadership Alliance gives students the opportunity to earn the Certified Nonprofit Professional (CNP) credential through completion of the Nonprofit Management graduate certificate coursework, additional required extracurricular activities, and an examination. Contact cnp@ucdenver.edu for more information about this credential.

Program Delivery

- Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

- Students must successfully complete 12 credit hours of approved coursework.
- Students must maintain at least a 3.00 cumulative GPA in this program.
- This program must be completed within 7 years.

Public Management Graduate Certificate

Introduction

The Graduate Certificate in Public Management is designed to allow students to demonstrate to potential employers that they have the foundational knowledge and skills necessary to manage and lead in the public workplace.

Students will understand the historical, political, and legal context of government organizations in the United States. They will learn and apply concepts relevant to managing government organizations, such as organization theory and design, managing human capital, group development and performance, organizational communications, information management, and ethical and evidence-based decision-making. They will also learn and apply concepts, theories, and skills relevant to the effective leadership of government organizations in complex social environments.

Prospective students who wish to pursue this certificate must apply as non-degree applicants. Learn more on the School of Public Affairs admission web page.

Program Delivery

• Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

• Students must successfully complete 12 credit hours of approved coursework.
• Students must maintain at least a 3.00 cumulative GPA in this program.
• This program must be completed within 7 years.

Public Policy Analysis Graduate Certificate

Introduction

The Graduate Certificate in Public Policy Analysis provides an understanding of the context in which public policies are formulated, implemented, and evaluated. Graduates will have training in the tools and skills needed to assess the impact of public policies and programs, including policy analysis, cost-benefit analysis, program evaluation, multivariate regression, and other analytical techniques.

Prospective students who wish to pursue this certificate must apply as non-degree applicants. Learn more (https://publicaffairs.ucdenver.edu/prospective-and-admitted-students/admission/) on the School of Public Affairs admission web page.

Program Delivery

• Courses are offered on campus, online, and in remote and hybrid formats.

Program Requirements

• Students must successfully complete 15 credit hours of approved coursework.
• Students must maintain at least a 3.00 cumulative GPA in this program.
• This program must be completed within 7 years.

Graduate Courses A-Z
Catalog Course Information and Definitions

The courses listed here are included in the CU Denver campus catalog during the 2022–23 academic year. This listing does not constitute a guarantee that any particular course will be offered during this year. Also see the online Class Search (https://isis-cs.prod.cu.edu/psc/csprod/EMPLOYEE/HRMS/c/CU_SELFSRV_PUB.CLASS_SEARCH.GBL) functionality for details about specific class offerings and schedules. For questions/more information regarding specific course availability, programs, and major requirements, please contact each school or college.

Cross-Listed – Class that is offered along with another class that has the same topic, title, and course content. Max Hours displayed for each cross-listed class is the total number of hours allowed for all courses completed within a particular cross-listed group. See below for more information on Max Hours.

Max Hours (in Course Description) – Total number of applicable credit hours that count toward a student’s degree for a particular course or cross-listed group.

Requisite:

- **Prerequisite** – Specific course completed or “in progress” (i.e. ENGL 1020 Core Composition I or ENGL 1020 Core Composition I with C- or higher)

- **Corequisite** – Specific course taken at the same time (i.e. ENVS 1044 Introduction to Environmental Sciences taken same time as ENVS 1045 Introduction to Environmental Sciences Laboratory)

- **Restriction** – Restricted to a specific population (i.e. Restricted to MUSC majors or junior standing, etc.)

Course Number Definitions:

- **1000 - 4999 Undergraduate Level**
- **5000 - 9999 Graduate Level**

A

- Accounting (ACCT) (p. 710)

Accounting (ACCT)

ACCT 5939 - Internship (1-3 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.

ACCT 6015 - Accounting for the Public Interest (3 Credits)
Applies accounting knowledge and concepts in a not-for-profit organization. Student volunteers help with functions or special projects and are supervised by both faculty members and personnel from the agency to which they are assigned. Note: This class is rarely offered.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with ACCT 4915. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6020 - Auditing Theory (3 Credits)
Focus on the professional responsibilities of CPAs, generally accepted auditing standards, and PCAOB auditing standards, with emphasis on the theory underlying the development of standards, objectives and procedures. Students cannot receive credit for both ACCT 4620 & ACCT 6020. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 6030 or ACCT 6031 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4620. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6030 or ACCT 6031. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

Typically Offered: Fall, Spring.

ACCT 6024 - Advanced Financial Accounting (3 Credits)
Advanced financial accounting concepts and practices with an emphasis on accounting for equity investments, business combinations, and foreign currency. Prereq: ACCT 3230 or ACCT 6030 or ACCT 6032 each with a grade of C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4240. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 3230 or ACCT 6030 or ACCT 6032 each with a grade of C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

Typically Offered: Fall, Spring.

ACCT 6025 - Auditing Practice (3 Credits)
Focus on the application of generally accepted auditing standards and PCAOB auditing standards to practice. Emphasis on procedures used by CPAs to gather and document audit evidence. Prereq: ACCT 6020 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Students cannot receive credit for both ACCT 4625 and ACCT 6025.
Note: A grade of C or higher must be earned to receive credit for the CPA license. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6020 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6031 - Intermediate Financial Accounting I (3 Credits)
This course is designed to provide students with a comprehensive review and understanding of financial accounting principles, procedures, and financial statements as well as the measurement of income and assets. Skills related to problem solving, analytical thinking, and writing will also be developed. NOTE: Students who have taken ACCT 3220 (or equivalent) may not receive credit for ACCT 6031. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6032 - Intermediate Financial Accounting II (3 Credits)
Continuing the intensive coverage of financial accounting from ACCT 3220/ACCT 6031, this course covers concepts of financial accounting theory and generally accepted accounting principles not covered in 3220/6031. This typically includes detailed coverage of liabilities and equity, especially the topics of leases, deferred taxes, pensions and stock-options. Note: A grade of C or higher must be earned to receive credit for the CPA license. NOTE: Students who have taken ACCT 3230 (or equivalent) may not receive credit for ACCT 6032. Prereq: ACCT 6031 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 3230. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6033 - Advanced Managerial Accounting (3 Credits)
Critical analysis of advanced topics in managerial accounting. Note: This class is rarely offered. Prereq: ACCT 3320. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6054 - Accounting Information Systems (3 Credits)
This course focuses on the analysis, design, implementation and control of accounting information systems. Emphasis is placed on primary business processes including documentation, modeling, retrieving information to support managerial decisions and controlling risks. Topics include transaction cycles, relational database modeling, data analytics and information systems risks and controls. Must earn a grade of C or better to qualify for graduation at the UG level and to receive credit for the CPA license. Prereq: ACCT 6031 or BUSN 6550 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4054. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
ACCT 6070 - Intermediate Cost Accounting (3 Credits)
Cost accounting links financial and managerial accounting and emphasizes communication between accountants and managers. Topics include managerial uses of cost data for decision making, analysis of activities and cost behavior, the role of accounting in planning and control, and computer-assisted decision modelling. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: STUDENTS WHO HAVE TAKEN ACCT 3320 (or equivalent) MAY NOT TAKE THIS COURSE. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 3320. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6080 - Accounting for Government and Nonprofit Organizations (3 Credits)
Nonprofit Organizations. Planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting and fund accounting. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 3220 or BUSN 6550 or ACCT 6031 each with a C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4800. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 3220 or BUSN 6550 or ACCT 6031 each with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Spring.

ACCT 6140 - Fundamentals of Federal Income Tax (3 Credits)
Provisions and procedures of federal income tax laws and requirements affecting individuals and business organizations, including problems of tax planning and compliance. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: Students cannot receive credit for both ACCT 4410 and 6140. Cross-listed with ACCT 4410. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Typically Offered: Fall, Spring.

ACCT 6150 - Taxation of Business Entities (3 Credits)
A federal tax course stressing tax planning issues affecting corporations (both C corporations and S corporations) and partnerships. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: Students cannot receive credit for both ACCT 4420 and ACCT 6150. Cross-listed with ACCT 4420. Prereq: ACCT 6140 or ACCT 4410 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6140 or ACCT 4410 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6220 - Seminar: Corporate Financial Strategy and Controls (3 Credits)
This course is designed to provide a comprehensive understanding of the wide ranging responsibilities of the Controller, including the timely and accurate preparation of the periodic financial statements, maintenance of an adequate records system, a comprehensive set of internal controls and budgets in order to manage and mitigate risk, how to enhance the accuracy of the company's reported financial results and ensure compliance with GAAP or IFRS. Topics also include techniques for cash forecasting, controlling and administering budgets, and developing effective long-range plans. Prereq: ACCT 6030 or ACCT 6032 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6030 or ACCT 6032 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6225 - Controllership: Managerial Strategy and Benefits Analy (3 Credits)
This course is designed to provide a comprehensive understanding of the wide ranging responsibilities of the Controller from a managerial and tax accounting perspective. Topics include establishing a cost accounting system, planning and control of manufacturing costs, business and strategic planning, mergers and acquisitions and a variety of tax related issues such as employment tax, employee vs. contractor, and choice of entity. The course will also include a discussion of benefits analysis, stock based compensation, ISO, NQSO and 83b elections. Prereq: ACCT 6220 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6220 with a grade of C (2.0) or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6230 - Advanced Topics in Mergers and Acquisitions (3 Credits)
Mergers and acquisitions are often a key component of organizational strategy for growth and competitive advantage; yet empirical studies indicate many of these transactions fail to meet their intended objectives. This course prepares accounting students as financial leaders to positively influence the achievement of planned synergies and acculturation for more successful M&A transactions. Integrating perspectives from accounting and organizational development, course topics include transaction valuation, contingent consideration, and asset impairment testing to organizational systems theory and post-transaction integration. Prereq: Grade of C (2.0) or higher in ACCT 6020 or ACCT 4620 and ACCT 6070. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6020 or ACCT 4620 and ACCT 6070 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
ACCT 6250 - Seminar: Financial Accounting (3 Credits)
Nature and origin of accounting theory and the development of postulates, principles and practices. Methodology appropriate to development and evaluation of accounting theory, with special emphasis on accepted research standards and procedures. Note: A grade of C or higher must be earned to receive credit for the CPA license. Coreq: ACCT 6032 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: ACCT 6032. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Typically Offered: Fall, Spring.

ACCT 6260 - Seminar: Managerial Accounting (3 Credits)
Focuses on the conceptual foundations of managerial accounting. Behavioral and quantitative approaches regarding information for decision making, planning, control, performance evaluation and other issues are investigated. Note: A grade of C or higher must be earned to receive credit for the CPA license. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ACCT 6280 - Accounting Ethics (3 Credits)
This course examines the ethical responsibilities of accounting professionals from a personal and professional perspective, including examples of ethical dilemmas accounting professionals confront. The course utilizes various authoritative codes of conduct, professional standards and applied ethical theory as ethical guidance for auditors, accountants, tax professionals, and accounting management. A variety of case studies are employed to give students practice in developing a decision making approach in dealing with difficult ethical scenarios.
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6282 - Capitalism, Accounting and Ethical Choices (3 Credits)
Examines the development of the U.S. economy from 1850 to today with emphasis on the ethics of accounting, capitalism, and government controls. Prereq: ACCT 2220 or BUSN 6550 (not strictly enforced).
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6285 - Accounting and Finance for Sustainability (3 Credits)
Topics in accounting and finance related to business sustainability include the merits and challenges of a triple-bottom-line perspective, mandatory and voluntary reporting, environmental liability measurement and disclosure, emissions trading, green investments, shareholder activism, microfinance, and socially responsible investing.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6290 - Management Control Systems (3 Credits)
Focuses on the design and use of control systems which ensure that people in organizations behave consistently with the organizational goals. Controls for communication, motivation and performance evaluation (along with informational requirements) are stressed through analysis of cases and classroom discussion. Note: This class is rarely offered.
Prereq: BUSN 6550 or equivalent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6320 - White Collar and Financial Crimes (3 Credits)
Course provides an opportunity to examine criminal activity perpetrated by individuals and/or organizations in a position of trust. White collar and financial crimes are qualitatively different from street crimes or violent crimes, yet they are highly destructive. Cover: types of crime, social impact, prevention, detection, regulating etc.
Prereq: BUSN 6550 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6550 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6330 - Fraud Auditing (3 Credits)
This course provides an introduction to and guidance for creation of an effective fraud audit program in core business systems. The fraud audit is designed specifically to detect potential fraud and is vastly different than the traditional audit. Fraud auditing focuses on proven fraud methodology that allows auditors to discover fraud versus investigating it.
The course: • Explains how to create a fraud audit program • Shows auditors how to locate fraud through the use of data mining • Focuses on proven methodology for detecting fraudulent transactions • Explores fraud discovery within specific corporate F&A functions, such as disbursement, procurement, payroll, revenue misstatement, inventory, journal entries, and management override.
Prereq: ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6340 - Financial Statement Analysis (3 Credits)
Financial statements are used as an information source on which to base investment, lending potential or even employment. Designed to develop skills in using, understanding, analyzing, and interpreting financial statements and to make students aware of the value and limitations of financial statement information. Note: Should take in the third semester of the graduate program.
Prereq: BUSN 6550 or ACCT 6031 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

Typically Offered: Fall.
ACCT 6350 - Current Issues in Professional Accounting (3 Credits)
An in-depth analysis of current issues in the accounting profession, including ethics development, and validity of standards and regulations. Prereq: ACCT 3230, ACCT 4620, ACCT 6020 or permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall.

ACCT 6360 - Fraud Examination (3 Credits)
This course examines the theories and methods of the full spectrum of fraud examination including prevention, detection, investigation, and adjudication. In this course, students will explore the significant differences between fraud examination and auditing, going beyond detection into the investigative and adjudication process. Prereq: ACCT 6020 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ACCT 6020 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6370 - International Accounting (3 Credits)
Designed to expose students to the international aspects of accounting and financial management. Includes discussion of some of the different financial accounting practices across countries; financial statement analysis in a global context, international auditing practices and procedures, international tax implications and the implications of operating within the regulations of the Foreign Corrupt Practices Act, the European Union, North American Free Trade Agreement and General Agreement on Tariffs and Trade. Prereq: BUSN 6550 or equivalent. Note: Students cannot receive credit for both ACCT 6370 and INTB 6370. IFRS's are reviewed and compared with the requirements of US GAAP. Cross-listed with INTO 6370 and ACCT 4370. Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Spring.

ACCT 6380 - Forensic Accounting (3 Credits)
An examination of investigative auditing, fraud auditing, litigation support, and economic quantification of damages. Prereq: ACCT 4620 or ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ACCT 4620 or ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6400 - Taxation of C Corporations and Shareholders (3 Credits)
This course is a study of federal income tax problems facing corporations and corporate shareholders. The course addresses introductory corporate tax issues found in Subchapter C of the Internal Revenue Code, including defining a “corporation” for federal income tax purposes; tax consequences associated with the formation of a corporation; taxation of corporate operations (including an analysis of the differences that exist between earnings and profits, dividend distributions and taxable income); corporate redemption transactions; partial liquidations; complete liquidations; and the acquisition, sale and disposition of corporate entities in transactions governed by Sections 336(e) and 338 of the Internal Revenue Code. Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Typically Offered: Fall.

ACCT 6410 - Advanced Tax for Individuals (3 Credits)
This course is an advanced federal income tax course stressing the use of the Internal Revenue Code, Treasury regulations, case law, and administrative guidance to resolve federal income tax issues affecting individuals. Topics include items of gross income inclusion, exclusions, deductions, items of non-recognition, characterization of income, and tax rates. Prereq: Grade of C or higher in ACCT 6140 or ACCT 4410. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Grade of C or higher in ACCT 6140 or ACCT 4410. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.
Typically Offered: Spring.

ACCT 6442 - Accounting: Professional Research and Communications (3 Credits)
This course provides students with a structured approach to researching and communicating practice-oriented financial accounting, auditing, and tax-related issues. After completing this course, students should be able to effectively: (1) Communicate (both oral and written) solutions to practice-oriented financial accounting, auditing, and tax-related issues. (2) Navigate through U.S. and international accounting, auditing, and tax authorities. (3) Conduct systematic research for all types of accounting-related problems then reach and communicate efficient conclusions using a variety of techniques. Prereq: ACCT 6030 or ACCT 6032 or ACCT 3230 each with a grade of C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4442. Max hours:
Grading Basis: Letter Grade
Prereq: ACCT 6030 or ACCT 6032 or ACCT 3230 each with a grade of C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
ACCT 6450 - Tax Research (3 Credits)
This course provides a study of various methodologies used in tax research and tax planning and requires students to present their results through various forms of business communication. In particular, this course explores techniques (with an emphasis on electronic/on-line techniques) for locating and researching judicial cases, statutory materials and legislative histories, and administrative materials promulgated by the Internal Revenue Service applicable to tax-related issues and problems. Students must present their tax research results for various client-based hypothetical factual patterns in written formats, including memoranda and client letters, and through individual oral and group presentations. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

ACCT 6470 - Internal Auditing (3 Credits)
Intro course for business students and CIA candidates. Topics include: IA fundamentals; IA standards; internal controls; managing the IA department; IA working papers, procedures and evidences; fraud detection and prevention; ethics; evaluation of the IA function, and Sarbanes-Oxley Act of 2002. Prereq: ACCT 4620 or ACCT 6020.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 4620 or ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6480 - Partnership Taxation (3 Credits)
This course focuses on fundamental tax issues relating to partnerships and partners arising from the formation, operation, and liquidation of partnerships. Course work includes an examination of pertinent federal income tax returns of a partnership. Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

ACCT 6490 - Experiential Learning (3 Credits)
Designed to provide practical knowledge on developing a professional practice in accounting or financial management. Topics: Marketing, operating a professional practice. Lectures, guest speakers (if you are interested in being a guest lecturer for the class contact the instructor), and student projects. Prereq: ACCT 3220 or permission of instructor. Cross-listed with ACCT 4490. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6510 - Advanced Accounting Information Systems (3 Credits)
The course is designed to develop knowledge and skills used to understand and evaluate corporate accounting processes and systems. Focuses on financial and information system internal controls and the flow of corporate information through an accounting system. A financial system objective and risk assessment approach is used to present concepts and techniques for evaluating the adequacy of system processes and controls. Prereq: ACCT 6054 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6054 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Typically Offered: Fall.

ACCT 6520 - Issues in Oil and Gas Accounting (3 Credits)
The Oil and Gas Accounting course is a course designed to give students an overview of the oil and gas industry and the particular accounting issues this industry faces. The focus is on the oil and gas industry but many of the issues discussed are appropriate and applicable to all energy-related entities. This is a valuable learning experience for those interested in acquiring an understanding of the accounting issues for energy management firms in preparation for entry into public accounting. The course enjoys support from the energy industry in the form of guest speakers and project ideas. Prereq: ACCT 3220 or permission of instructor. Cross-listed with ACCT 4520. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 3220. Typically Offered: Spring.

ACCT 6620 - Seminar: Auditing and Other Assurance Services (3 Credits)
A graduate seminar course providing in-depth exposure to specialized topics in auditing and other assurance services, with an emphasis on recent developments in the profession. Includes coverage of generally accepted auditing standards and PCAOB standards. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6030 or 6031 and 6020 all with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Typically Offered: Fall, Spring.

ACCT 6800 - Special Topics (3 Credits)
Research methods and results, special topics and professional developments in accounting. Consult the current 'Schedule Planner' for semester offerings as new special topics courses are frequently added. Prereq: Varies according to topics and instructor requirements. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6800 - Special Topics (3 Credits)
ACCT 6840 - Independent Study (1-8 Credits)
Permission of instructor required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6900 - Professional Certification in Accounting (3 Credits)
This course will prepare students for the Uniform Certified Public Accountant Examination, including the Auditing and Attestation (AUD), Business Environment and Concepts (BEC), Financial Accounting and Reporting (FAR), and Regulation (REG) sections. Topical coverage will include a balance of most-tested topics, difficult topics, and exposure to topics not addressed in required accounting degree courses. Note: there will be a materials fee of $1,100 for this course. All materials will continue to be available until successful passage of the CPA Exam. Note: Undergraduate Accounting students typically perform better in this class when taking it during the final semester prior to graduation. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6939 - Internship/Cooperative Education (3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Prereq: 15 semester hours for MS students and 21 hours for MBA students and a cumulative 3.2 GPA. Repeatable. Max Hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.

ACCT 6950 - Master's Thesis (1-8 Credits)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

Anthropology (ANTH)

ANTH 5000 - Special Topics in Anthropology (1-6 Credits)
Designed to give students a chance to evaluate critically some practical or theoretical problem under faculty supervision and to present results of their thinking to fellow students and instructors for critical evaluation. Prereq: Permission of instructor. Restriction: Restricted to Anthropology graduate students. Cross-listed with ANTH 4000. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Anthropology graduate students

ANTH 5014 - Medical Anthropology: Global Health (3 Credits)
This course is concerned with the underlying biological and cultural determinants of health throughout the human life cycle in global and cross-cultural perspective. Note: The first of a two-course sequence in medical anthropology and global health studies; the second is ANTH 5024. Prereq: Graduate standing. Cross-listed with ANTH 4010. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5053 - Quantitative Methods in Anthropology (3 Credits)
Surveys the ways of deriving meaning from anthropological data by numerical means, including, but not confined to basic statistical procedure. Note: this course assumes that students have completed a college-level algebra course. Prereq: Graduate standing. Cross-listed with ANTH 4050. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5080 - Global Health Practice (3 Credits)
A travel-study course that provides students the opportunity to work on global health issues in the context of a supervised internship experience. In addition to a formal internship placement or directed research opportunity, students attend formal lectures and participate in seminars devoted to addressing those health issues most relevant to the country in which the course is being taught. Note: this course assumes that students have completed HBSC/ANTH 4010/5014, HBSC/ANTH 4020/5024, HLTH 6070 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4080 and PBHL 4080. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5121 - Zooarchaeology (3 Credits)
Introduction to the theory and methods of zooarchaeology through lectures, readings, and hands-on lab work identifying and analyzing mammalian skeletal material. Students will learn what mammalian remains indicate about biological and cultural evolution of humans. Cross-listed with ANTH 4121. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5500 - Gender in Cross-Cultural Perspective (3 Credits)
A comparative analysis of gender-based status and social roles of women and men, with women's status and roles emphasized due to their near-universal construction as the "other" sex. Examines, in cross- and sub-cultural context, the relations among women's status and their subsistence and reproductive activities; and the division of labor by sex, ideology and political economy. Prereq: Graduate standing. Cross-listed with ANTH 4200. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5200 - Fieldwork Methods (3 Credits)
This experiential course explores anthropological critiques, decolonizing approaches, and multi-media strategies to fieldwork methods with a focus on oral histories, visual narratives, community based participatory research, and indigenous ways of knowledge creation. At the end of the course, the student should have the cultural understanding and the methodological skills to complete a team-based fieldwork project successfully. Prereq: Graduate standing. Cross-listed with ANTH 4230. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.
ANTH 5260 - Human Reproductive Ecology (3 Credits)
Considers the determinants of fertility variation within and among traditional human societies. Biocultural and ecological perspectives on pubertal timing, marriage patterns, birth seasonality, duration of birth intervals and reproductive senescence. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4260. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5270 - Anthropology of the Body (3 Credits)
Explores how society, through culture, creates collective and individual bodies; embodied experience across the life course; and the body as an expression of social power, bodily modification and adornment.
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ANTH 4270. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5290 - Anthropology and Public Health (3 Credits)
This course critically explores anthropological approaches to public health problems. Through a number of key issues and case studies, we examine how public health practice can be enhanced through anthropological research, theory and methodology. Prereq: Graduate standing. Cross-listed with ANTH 4290. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5300 - Migrant Health (3 Credits)
This course examines health issues associated with transnational migration from an anthropological point of view. Drawing upon case studies, we examine the health of migrant communities in both host and sending nations. Prereq: Graduate standing. Cross-listed with ANTH 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5320 - Archaeology of Mexico and Central America (3 Credits)
Surveys the major prehistoric and protohistoric cultures and societies of that area of Mexico and Central America identified with the evolution of Meso-American civilization. Major topics include early human colonization of the Americas, the domestication of plants and animals, the emergence of regionally-based cultures and societies, trade and exchange and the evolution of urbanism and the state. Primary emphasis on such ancient cultures and societies as those of the Olmec, Zapotec, Maya, Teotihuacan, Toltec and Aztec. Note: this course assumes that students have completed an introductory archaeology course. Prereq: Graduate standing. Cross-listed with ANTH 4320. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5330 - Lithic Analysis (3 Credits)
Examines the theoretical basis and methodological tools used by archaeologists in the analysis of prehistoric stone tools. Topics of discussion include the mechanics of stone fracture, typologies, use wear analysis and core reduction techniques. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4330. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5350 - Anthropology of Globalization (3 Credits)
This course provides an overview of anthropological contributions to the study of globalization. Particular attention is devoted to: transformations in global capitalism, state and immigration policy, transnational families, health and transnationalism. Note: previous coursework in anthropology is strongly recommended for success in this course. Prereq: Graduate standing. Cross-listed with ANTH 4350. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5380 - Archaeology of Hunters-Gatherers (3 Credits)
Explores the theory and methods used by archaeologists to investigate prehistoric hunter gatherers. Topics of concern include mobility, subsistence, procurement, and socio-political organization. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4380. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5400 - Archaeology of Power and Inequality (3 Credits)
Addresses inequality and power through a long-term archaeological and theoretical perspective. Discusses explanations for the origins of power and inequality and their role in early small-scale societies and emerging complex politics. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4400. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5440 - Museums in the 21st Century (3 Credits)
This is an advanced course on natural history/anthropology museums. It will examine practical issues facing museums, and consider the complex questions that museums raise. The class includes lectures, discussions, and hands-on collection work, and exhibits/outreach development.
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ANTH 4440. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

ANTH 5500 - Advanced Issues in Human Evolution (3 Credits)
This flexible course offers an advanced treatment of issues in human biological evolution. Topics may emphasize morphological evolution, behavioral evolution, the environment of human evolution, non-human primate comparative information. Prereq: Graduate standing. Cross-listed with ANTH 4500. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5560 - Anthropology of Globalization (3 Credits)
This course provides an overview of anthropological contributions to the study of globalization. Particular attention is devoted to: transformations in global capitalism, state and immigration policy, transnational families, health and transnationalism. Note: previous coursework in anthropology is strongly recommended for success in this course. Prereq: Graduate standing. Cross-listed with ANTH 4350. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5560 - Human Ecology (3 Credits)
Studies demographic and ecological variables as they relate to human populations. Aspects of natural selection, overpopulation and environmental deterioration are considered. Note: this course assumes that students have a background in biological or physical anthropology. Prereq: Graduate standing. Cross-listed with ANTH 4560. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ANTH 5570 - Landscape Archaeology (3 Credits)
Introduces spatial archaeology through intrasite analysis and regional studies. Methods treated include site location and quantitative spatial organization. Theoretical topics include definitions of community, ancient urbanism and the impact of subsistence and politics on relations to the landscape. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4570. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5580 - Neanderthals and the Origin of Modern Humans (3 Credits)
Focuses on the human fossil record for the taxon Homo sapiens, including the earliest members of this group ("early" or "Archaic" Homo sapiens), the Neanderthals and so-called "Anatomically modern" Homosapiens. The goal of the course is to survey the major issues within the area of modern human origins, and to learn about the evolutionary relationships, lifeways and behaviors of these groups. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4580. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5590 - Primat Behavior (3 Credits)
Studies nonhuman primate behavior with emphasis on understanding social behavior, ecology and issues related to human evolution. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4590. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5600 - Medical Anthropology (3 Credits)
Introduces students to the theories and concepts of medical anthropology, the study of human health and illness. Explores conceptions of the body, modalities of healing, the clinical encounter, and new medical technologies. Prereq: Graduate standing. Cross-listed with ANTH 4600. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5650 - Disability Anthropology (3 Credits)
Drawing from anthropology and interdisciplinary disability studies, this course explores disability and impairment across time and space. Course materials integrate ethnography, archives, novels, films, podcasts, and social media to develop a holistic, empirically grounded understanding of disability as part of human diversity. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ANTH 4650. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5680 - Special Topics in Medical Anthropology (3-9 Credits)
Seminar series on current issues in medical anthropology. Faculty offer a range of different courses, including the political economy of drugs, health and human rights, and reproductive health. Prereq: graduate standing. Repeatable. Cross-listed with ANTH 4800. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5810 - Integrating Anthropology (3 Credits)
Designed to build on specialized course work in the subdisciplines of anthropology, this course emphasizes the basic concepts that integrate and unite the discipline and give it unique perspective. These are the concepts of culture, adaptation and human evolution. In the last several weeks of the course, students consider the applicability of the anthropological perspective to specific human issues. Note: Centers on the critical examination and discussion of presentations made by department faculty and graduate students. Restriction: Restricted to Anthropology graduate students. Cross-listed with ANTH 4810. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Anthropology graduate students
Typically Offered: Fall.

ANTH 5840 - Directed Research (1-6 Credits)
Directed study based on a specific subfield of anthropology. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Permission of instructor required. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

ANTH 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

ANTH 5910 - Field Experience in Archaeology (3-6 Credits)
Students participate in archaeological field research and data recovery and conduct laboratory analysis of materials recovered in the field. Emphasis is placed on excavation technique and accuracy of record keeping. Note: this course assumes that students have a background in archaeology. Prereq: Graduate standing. Cross-listed with ANTH 4910. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ANTH 5955 - Global Study Topics (3-9 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Max hours: 9 Credits.
Grading Basis: Letter Grade
Additional Information: Global Education Study Abroad.
ANTH 6000 - Seminar in Current Research Topics (1-3 Credits)
An inquiry into current research of critical and general interest to anthropologists. Variable format. Note: students should receive permission from the instructor prior to registering for this course. Prereq: Graduate standing. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6040 - Advanced Topics in Medical Anthropology (1-4 Credits)
A flexible seminar format for dealing with topics of special interest in medical anthropology on an advanced graduate level. Topics to be considered vary from semester to semester. Examples include high altitude adaptation, anthropological perspectives on substance abuse, epidemiology, environmental and occupational health, the health consequences of cultural change and cross-cultural psychiatry. Note: Topics vary from semester to semester. Note: students should receive permission from the instructor prior to registering for this course. Prereq: Graduate standing. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6041 - Human Genetics: Legal, Ethical and Social Issues (3 Credits)
Examines legal, ethical and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice and property rights. Prereq: Graduate standing. Cross-listed with HBSC 6320 and 7320. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6063 - Qualitative Research Design and Methods (3 Credits)
Much of the data collected in the social sciences is interview and text-based. This course explores methods for collecting and analyzing these data and theoretical paradigms that underlie these methods. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6103 - Current Theory in Ethnography (3 Credits)
An in-depth inquiry into important theories in cultural anthropology through extensive primary source reading. Practice in formulating theory, critical thinking and theoretical writing are emphasized. Note: First course in a two-course required graduate sequence. Note: this course assumes that students have completed undergraduate coursework in cultural anthropology. Prereq: Graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6133 - Anthropological Perspectives on Language (3 Credits)
An intensive introduction to linguistic anthropology. Following a brief survey of technical linguistics, focus is on: the roles of language in society; multilingualism; language and identity; language and worldview; language, gender, class and power; language as social action; and other topics. Students carry out investigations based on models from their reading, as well as responding to the theoretical approaches of the field. Note: this course assumes that students have completed undergraduate coursework in cultural anthropology. Prereq: Graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6307 - Contemporary Perspectives in Archaeology (3 Credits)
Explores contemporary theoretical methodological perspectives in archaeology. Structured to proceed from a survey of the history of archaeological thought based on recent retrospectives, to an analysis of works reflecting current perspectives and directions. Topics include: archaeological interpretation, classical versus scientific archaeology, versus culture-history, functionalist and materialist paradigms, ethno-archaeological and text-based studies, neo-evolutionism, interactionist models, Marxist perspectives, processual theory. Note: this course assumes that students have completed undergraduate coursework in archaeology. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6317 - Archaeological Research Design and Analysis (3 Credits)
Examines the methods and techniques used in archaeology, including theory-building, hypothesis testing and middle range theory. Core materials emphasize the learning and critique of basic archaeological assumptions and the methods and theories used to scrutinize the collection and interpretation of data. Topics include chronometric applications and paleo-environmental reconstruction. Note: this course assumes that students have completed ANTH 6307 or equivalent. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6300 - Seminar in Current Research Topics (1-3 Credits)
An inquiry into current research of critical and general interest to anthropologists. Variable format. Note: students should receive permission from the instructor prior to registering for this course. Prereq: Graduate standing. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6303 - Seminar in Current Research Topics (1-3 Credits)
A flexible seminar format for dealing with topics of special interest in medical anthropology on an advanced graduate level. Topics to be considered vary from semester to semester. Examples include high altitude adaptation, anthropological perspectives on substance abuse, epidemiology, environmental and occupational health, the health consequences of cultural change and cross-cultural psychiatry. Note: Topics vary from semester to semester. Note: students should receive permission from the instructor prior to registering for this course. Prereq: Graduate standing. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6304 - Seminar in Current Research Topics (1-3 Credits)
Examines legal, ethical and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice and property rights. Prereq: Graduate standing. Cross-listed with HBSC 6320 and 7320. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6305 - Seminar in Current Research Topics (1-3 Credits)
Examines the historical development and modern practice of biological anthropology, including the theoretical and methodological foundations of this field. Emphasis is placed on the evidence for human and non-human primate evolution and the processes that influenced this evolution. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6306 - Seminar in Current Research Topics (1-3 Credits)
Considers the theory and methods used in investigations of biological variation in contemporary human populations. This includes the biological and cultural sources responsible for creating and maintaining contemporary variation as well as their functional consequences. Methods of research design and how to write a grant and scientific articles are considered. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6307 - Seminar in Current Research Topics (1-3 Credits)
A flexible seminar format for dealing with topics of special interest in physical anthropology on an advanced graduate level. Topics vary from semester to semester. Examples include: anthropology of nutrition, paleoecology, primate evolution, field experience in paleoontology, advanced osteology and advanced human ecology. Note: this course assumes that students have completed undergraduate work in biological/physical anthropology. Prereq: Restricted to Graduate and Graduate Non-Degree students. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ANTH 6840 - Independent Study: ANTH (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

ANTH 6950 - Master's Thesis (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

Arabic (ARAB)

ARAB 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

Architecture (ARCH)

ARCH 5110 - Design Studio I (6 Credits)
The first of two elemental design studios focused on the language of design, organizational and spatial systems and principles as well as on analog and digital methods of visualizing architectural ideas and forms. Restriction: Restricted to Graduate Architecture students within the College of Architecture and Planning. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5120 - Design Studio II (6 Credits)
The second of two elemental design studios focused on translating organizational and spatial systems, principles and concepts into architectural systems. Through a number of small scaled design exercises students learn how organizational and spatial systems can be leveraged in the design of their buildings. Prereq: ARCH 5110 and ARCH 5510. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5130 - Design Studio III (6 Credits)
The first of the two analytical design studios addresses how design ideas are formed through the analysis of the program in terms of action and perception and how to transform those ideas into formal strategies and specific architectural experiences. Prereq: ARCH 5120. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5140 - Design Studio IV (6 Credits)
The second of the two analytical studios will build upon ideas developed in the previous studio concerning how the analysis of the program in terms of action and perception inform the formal strategies and the design of specific architectural experiences. Prereq: ARCH 5130. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5210 - Introduction to Architecture (3 Credits)
Introduces important ways of looking at architecture and acquaints students with the various perspectives that they will later find in the rest of the curriculum. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5220 - History and Theory Architecture I (3 Credits)
Introduces world architecture and urbanism from prehistory to the Italian Renaissance. The course helps students understand the various cultural, technological, philosophical, and aesthetic ideas that helped shape buildings through history. Buildings and settlements on all continents and in all of the major world cultures are discussed. Restriction: Restricted to graduate and doctoral students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate and doctoral students.

ARCH 5230 - History and Theory Architecture II (3 Credits)
Examines world architecture and urbanism from the Italian Renaissance to the present. Helps students understand the various cultural, technological, philosophical and aesthetic ideas that helped shape buildings through history. Buildings and settlements on all continents and in all of the major world cultures are discussed. Restriction: Restricted to graduate and doctoral students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate and doctoral students.

ARCH 5240 - History and Theory Architecture III (3 Credits)
This course traces the history of Architecture from the mid-19th century to the early 21st century. The various theories and formal languages that shaped the history of Architecture within the specified period will be explored through the close examination of a select group of buildings and the specific cultural, social, political, and economic contexts of their design and construction. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

Typically Offered: Spring.
ARCH 5310 · Building Construction I (3 Credits)
The first of a two-course sequence that provides an overview of the structure, systems, assemblies and processes that make a building. Provides a broad view of building technology and an understanding of the interrelationship of all the parts. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5320 · Building Construction II (3 Credits)
This course focuses on principles and processes of building construction, and introduces major constructional systems. It stresses the relationship between architectural concepts and building technology and assemblies. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5330 · Sustainable Systems I (3 Credits)
The first course in the sustainable systems sequence introduces concepts and design methods of energy-efficient environmental control in buildings including thermal and moisture loads, heating, ventilation and air conditioning equipment and systems, and active and passive thermal strategies. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

ARCH 5340 · Sustainable Systems II (3 Credits)
The second course in the sustainable systems sequence introduces concepts and design methods of plumbing, power distribution, renewable electricity, artificial illumination, daylighting, acoustics, vertical transportation, fire protection, and telecommunication systems in buildings with a focus on energy and resource efficiency. Restriction: Graduate level students. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 5350 · Structures I (3 Credits)
The first course in the structures sequence introduces the analysis and design of structural elements and focuses on the principles of static’s and the strength of materials. Topics include stress determination, deflection and the behaviors of tension, compression and shear in various structural elements. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5360 · Structures II (3 Credits)
Focuses on the relationship between architectural concepts and the selection of structural systems. Addresses the qualitative and quantitative analysis of reinforced concrete, steel and wood structural systems and members. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5410 · Professional Practice (3 Credits)
Introduces the essential elements of professional practice through topics such as internship, licensing, services, modes of practice, fees, marketing, documents, specification and production procedures. Examines traditional and emerging forms of practice. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5420 · BIM: Principles & Practices (3 Credits)
Introduces basic aspects of building information modeling (BIM) concepts, software, development, management and delivery for architectural projects. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5430 · Social Context of Design (3 Credits)
Focuses on the ethical, social, cultural and psychological principles, which people bring to the perception and design of the built environment. Its major topics include: ethical values; cultural patterns and values; social, cultural and personal ritual; and pre-design and programming. Prereq: Graduate ARCH students only. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5450 · Sustainable Design Practices (3 Credits)
This course explores sustainable principles and practices as it relates to the design, construction of both the building and its site. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5510 · Architectural Graphics (3 Credits)
This course explores the development of graphic skills emphasizing drawing as a means to design. It includes investigation of drawing types and methods; diagramming of ideas and systems; informative, exploratory and developmental sketching. Restriction: Restricted to Graduate Architecture students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5540 · Professional Practice (3 Credits)
Introduces the essential elements of professional practice through topics such as internship, licensing, services, modes of practice, fees, marketing, documents, specification and production procedures. Examines traditional and emerging forms of practice. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 5550 · Design Studio V (6 Credits)
The first of two reflective studios will assume reflective/critical stance towards programmatic issues or rather cultural presuppositions and critically explore the ways in which architecture can play a critical as well as an affirmative role within the broader cultural context. Prereq: ARCH 5140. Coreq: ARCH 6151. Max hours: 6 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6170 - Design Studio VI (6 Credits)
This is the second of two reflective studios, which focuses on the comprehensive design of an architectural project including considerations of structural systems, environmental systems, life safety concerns, regulatory considerations, wall sections, building assemblies and significant detail. Prereq: ARCH 6150. Coreq: ARCH 6171. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Coreq: ARCH 6171 Restriction: Restricted to ARCH graduate students within the College of Architecture and Planning
ARCH 6171 - Integration Seminar (3 Credits)
In this seminar students will develop and document the technical aspects of their Design Studio VI design projects including, life safety, mechanical, electrical, plumbing, conveyance, accessibility systems and material assemblies. Prereq: ARCH 6150, ARCH 6151. Coreq: ARCH 6170. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Coreq: ARCH 6170 Restriction: Restricted to ARCH graduate students within the College of Architecture and Planning
ARCH 6180 - Furniture Design (3 Credits)
Students learn how to design and build furniture in the College’s woodshop. Topics include ergonomics, properties of materials, principles and techniques of joinery and techniques of hand and machine tools. Cross-listed with ARCH 3709. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6185 - Digital Design & Fabrication (3 Credits)
An introductory class to Computer Aided Design (CAD) and Computer aided manufacturing (CAM). Students explore how these technologies apply to the field of architecture with a focus is on parametric/algorithmic design approaches and mass customization manufacturing techniques. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6190 - Special Topics in Design Studies (3 Credits)
Various topics in design, according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6195 - Aspen Summer Workshop (6 Credits)
Three weeks with three world class architecture firms in Roaring Fork Valley. The firms lead students through a unique design project that develops and challenges their observational, conceptual, and visualization abilities. Drawing as a means of seeing, understanding and creating dominates the process/ethic of the course. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6198 - Essentials of Biomimicry (3 Credits)
Biomimicry is the conscious emulation of nature’s genius that can be applied to the fields of design, engineering, medicine, transportation, and social interaction. This class will be geared towards designers and will give an overview of the discipline, the (3) Essential Elements, the human-nature connection, The Biomimicry Thinking Methodology, and Life’s Principles. Prereq: ARCH 5110. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ARCH 5110.
Typically Offered: Spring.
ARCH 6205 - Urban Housing (3 Credits)
This course examines housing trends and patterns; supply and demand factors; housing policies; housing challenges (e.g., inequitable distribution, special needs, segregation/discrimination, and homelessness); sociological, demographic, and economic considerations; and the roles of planners and the public and private sectors. Restriction: Restricted to graduate students. Cross-listed with LDAR 6755 and URPL 6405. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
ARCH 6210 - A History of American Architecture (3 Credits)
This course traces the history of architecture in North America from the early colonial settlements in the late 17th century to the corporate architecture of the late 20th century. The various formal languages and theories that have shaped the history of American architecture will each be discussed through the close examination of a select group of buildings within their specific cultural, social, political, and economic contexts. Restriction: Restricted to Graduate students. Cross-listed with ARCH 4610. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
ARCH 6212 - A History of Modern Architecture (3 Credits)
This course traces the various theoretical and formal developments in European and American Architecture from the end of the 19th century through the 20th century. The works of a select group of architects will be examined and discussed in relation to the diverse body of goals and objectives, ideas and ideals that constituted the Modern movements in architecture. Restriction: Restricted to Graduate students. Cross-listed with ARCH 4612. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
ARCH 6220 - A History of Theoretical Discourse on Architecture (3 Credits)
This course traces the history of theoretical discourse on architecture from the Renaissance to the present. It explores the genealogy of current theoretical stances and critical methodologies in the discipline of Architecture through the close reading of a select group of historic and contemporary texts. Prereq: ARCH 5230. Restriction: Graduate level students. Cross-listed with ARCH 4220. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ARCH 5230. Restriction: Graduate level students.

ARCH 6222 - Contested Terrains (3 Credits)
Explores the different processes, factors and forces and determines and influences occupation, land use and built form through the phenomena of conflict and contestation. Design is inherently located within the disputes and discourses involving landscape as location and resource. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 6230 - Preservation Theory and Practice (3 Credits)
The practice of historic preservation has evolved in a specific policy context. This introductory course introduces basic American institutions and laws associated with preservation as well as standards, definitions, and practices associated with these. Cross-listed with HIPR 6010. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6231 - Regionalisms & the Vernacular (3 Credits)
This class explores the history of the built environment from the perspective of evolutionary change; peoples attempting to meet utilitarian needs, respond to environmental forces, societal expectations, and aesthetic aspirations through design. The course looks closely at vernacular structures in a global context. Cross-listed with HIPR 6110. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6232 - Reading the City (3 Credits)
Design and planning professionals, including preservationists, must learn to work in environments with which they have had little previous knowledge. This course emphasizes gaining understanding of a novel environment and translating that knowledge into a well researched and media savvy professional presentation. Restriction: Graduate level students. Cross-listed with HIPR 6610. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 6233 - Historic Buildings in Context (3 Credits)
This course covers the concept of "historic significance" and develops skills in understanding and professionally utilizing this concept. Procedures and skills are introduced. Restriction: Restricted to Graduate Students in the College of Architecture and Planning. Cross-listed with HIPR 6210. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

ARCH 6240 - History Of The City (3 Credits)
Introduces students to the history of global cities through selected typologies. Explores similarities and differences among cities considered against the larger cultural, political and socio-economic envelope of which they are part. Provides awareness of origins, growth and evolution of urban form. Cross-listed with URBN 6640. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6241 - Studies in Tectonics (3 Credits)
This research seminar focuses on tectonics - the logic of structure & material combinations (wood, metal, stone, masonry etc.). Through case studies, the relationship between function, aesthetics, detail, and tectonics are explored in relation to contemporary architectural concerns. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 6254 - Architecture, In Theory (3 Credits)
Explores theories and texts that have influenced the analysis and the production of architectural form. The focus is on the expressive potential of architectural forms and the modalities of the realization of this potential. Cross-listed with DSPL 7016. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6255 - Cultural Institutions (3 Credits)
Selected types of cultural institutions including art museums, libraries, cultural centers, theaters, etc. are studied in this research seminar. Through case studies and readings, their ongoing cultural, architectural and corporate values are examined. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6256 - Community Development (3 Credits)
This course introduces community development, examining planners’ and other stakeholders’ roles in the field; key theories and practices; community dynamics; community-based organizations; asset-based development; social equity; and the influence of local physical and economic factors on community development. Cross-listed with URPL 6400. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6257 - Community Engaged Design Practice (3 Credits)
Obtain real-world pre-design and conceptual design experience in complex urban environments focusing on evolving trends in sustainability. Using digital trans-disciplinary learning students will develop comprehensive sustainable strategies that draw from their own sustainable philosophy developed during this class. Cross-listed with LDAR 6635 and LDAR 4435. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

ARCH 6258 - Social Justice in Planning (3 Credits)
This course investigates various social justice issues encountered in planning, including conflict resolution; advocacy; environmental justice; social equity; culture and diversity; disadvantaged populations; public engagement techniques; affordability; equal access; and policy impacts. Cross-listed with URPL 6410 and LDAR 6637. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6259 - The Art of Traditional Design (3 Credits)
Introduction to Philosophy, History and Design Methods of Traditional Design derived from Greek precedents developed through the Renaissance and later the Beaux Arts. The course will emphasize this influence on the Architecture of the United States. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6260 - Architectural Precedents (3 Credits)
Explores a number of traditional answers to recurring design issues, such as how to approach and enter a building or how to design a facade. In a seminar setting, students examine traditional ideas for their underlying principles and design new architectural compositions based on those principles. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6261 - Urban Design Economics and Equity (3 Credits)
Explores the economics of urban design through its relationship with private-sector real estate development, public-sector infrastructure, and budgetary/fiscal constraints on design implementation while emphasizing the critical role of urban design in advocating for social equity, affordable housing, and related issues. Restriction: Graduate level students. Cross-listed with URBN 6625 and URPL 6395. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 6270 - City Design Fundamentals (3 Credits)
Investigates the historical roots, spatial patterns, and physical forms of cities and their evolution over time; the environmental, cultural, and economic forces influencing city design; and urban design as the nexus of the planning and design professions in contemporary city-building. Cross-listed with URPL 6350, URBN 6525, and LDAR 5530. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

ARCH 6275 - History Native Amer Arch (3 Credits)
Introduces Native American architecture from the 12th century to the present. The course helps students understand the various cultural, technological, philosophical and aesthetic ideas that helped shape these buildings throughout history. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6290 - Special Topics in Cultural Studies (3 Credits)
Various topics in cultural studies, according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max hours: 21 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 21.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

Additional Information: AP Cultural Studies Area.

ARCH 6293 - Architect as Advocate (3 Credits)
This course will encourage students to become advocates for the profession by investigating the activities of advocates who have initiated and realized significant architectural opportunities. Students will then develop a proposal in which they practice becoming an Architect as Advocate. Prereq: ARCH 5110 and 5120 or ARCH 2111 and ARCH 2121. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6310 - Greenbuilding Tech (3 Credits)
This seminar will advance the student's knowledge of environmental building and construction methods through studies in material resources, innovative green systems, alternate green technology, energy efficiency, and affordability in "green architectural design." Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6313 - LEED Certification, Greenbuilding Seminar (3 Credits)
This RIGOROUS course will use the LEED Certification process to provide a framework for assessing building performance and meeting sustainability goals, following the 1st step in a two stage Professional Accreditation process, focusing on LEED GA, Green Associate Accreditation. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6314 - LEED AP Advanced Greenbuilding Seminar (3 Credits)
This advanced LEED Certification and Accreditation course builds on the first LEED GA course, providing a framework for assessing green building performance and sustainability goals, exploring advanced green building concepts and preparing the student for the LEED AP BD+C exam. Prereq: ARCH 6313 or instructor approval. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ARCH 6313 Restriction: Restricted to majors within the College of Architecture and Planning

ARCH 6351 - Building Conservation (3 Credits)
This course emphasizes the relationship between knowledge acquisition, professional judgement, and design modification. Topics include: 1) Historic Building Types & Methods, 2) Field and Lab Methods of Building Assessment, and 3) Management of Building Rehabilitation. The course takes an integrative approach to the scientific, aesthetic, managerial and legal dimensions of preservation. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6352 - Documentation, Analysis, Representation (3 Credits)
This methods course focuses on skills development in in-situ documentation of the historic environment. The course includes modules on: a) historic records, b) archaeological evidence, c) building and site measurement, d) photographic & Photometric methods, e) geo-spatial data, f) graphic representation, and g) reporting formats. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with HIPR 6310. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate Level students in the College of Architecture and Planning.

ARCH 6353 - Daylighting Design (3 Credits)
Daylighting is the use of light from the sky to illuminate building interiors. The objective of this course is to introduce students to the fundamentals of daylighting design including how it is perceived and how it impacts building energy flows. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6354 - Urban Conservation: Context for Reuse (3 Credits)
Human habitats (especially cities) are dynamic. The preservationist cannot freeze cities in a static representation of the past. The course deals with philosophical and political contexts, but emphasizes the role of strategic design intervention in the shaping of evolving cities. Restriction: Graduate level students. Cross-listed with HIPR 6410. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 6355 - Adaptive Reuse: Business and Practice (3 Credits)
Existing buildings and infrastructure afford challenges and opportunities for reuse. This course explores the business, and financial aspects of adapting the built environment for contemporary uses. The course is suitable for designers, planners, historians and social scientists. Restriction: Restricted to majors within the College of Architecture and Planning. Cross-listed with HIPR 6220. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

ARCH 6356 - The Poetic Detail-Studies in Tectonics—Wood (3 Credits)
This research seminar focuses on tectonics through traditional timber frame and wood construction case studies. The relationship between function, aesthetics, detail, and tectonics are explored in relation to contemporary concerns. Learning by making. Cross-listed with ARCH 3704. Restriction: Restricted to ARCH-BS majors with sophomore standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6370 - Introduction To Design Build (3 Credits)
Introduction to Design Build project delivery methods important to architects. Lecture, research on the industry and an individual student project are the methods used to introduce ethical questions, role of the architect, owner, consultant and subcontractors. Work leads to studio project or case study. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6373 - Construction in Design Build (3 Credits)
Using a single project, students fully explore the design phase, estimating, scheduling and project management skills in traditional construction. Course is concurrent with an advanced studio and builds a project on a site. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6375 - Green Tech Eco-Furniture Fabrication I (3 Credits)
Green Tech I is the first of two courses that are a "real build" course in which students advance their knowledge of environmental design through full-scale construction of architectural elements, furnishings, accessories, finishes, outdoor gear, or even clothing. Coreq: ARCH 6376. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Cross-listed with ARCH 3804. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: ARCH 6376 Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6376 - Green Tech Eco-Furniture Fabrication II (3 Credits)
Green Tech II is the second of two courses that is a "real build" course in which students advance their knowledge of environmental design through full-scale construction of architectural elements, furnishings, accessories, finishes, outdoor gear, or even clothing. Students must be enrolled in both Green Tech I and Green Tech II in the same semester. Coreq: ARCH 6375. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Cross-listed with ARCH 3806. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: ARCH 6375 Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6377 - EcoFAB: Furniture Design and Fabrication for Small-Scale Residential Architecture (3 Credits)
This unique, quick-paced seminar focuses on small-scale residential design, from tiny-homes, to prefab, and movable residences. Students learn Small Home design, methods, and techno-systems, then using green materials, they design and fabricate architectural elements and furniture for enhancing small-scale living. Restriction: Restricted to ARCH graduate students. Cross-listed with ARCH 3807. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6390 - Special Topics in Technology (3 Credits)
Various topics in technology, according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max hours: 18 Credits.
Grading Basis: Letter Grade
Repeateable. Max Credits: 18.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
Additional Information: AP Technology Studies Area.
ARCH 6412 - Construction Documents (3 Credits)
Introduces the concepts and techniques of construction documents. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6413 - Construction Leadership (3 Credits)
The final course is an integrated architecture, engineering, and construction business course bringing together executives, principals, and managers to current industry topics and provide students opportunities to apply management and leadership principles from the various fields to case study projects. Cross-listed with CHEM 5238. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6420 - Integrated Practice & BIM Technology (3 Credits)
This class will be a general overview of integrated practices and technologies used in today's industry. Understanding the nature of how information is created and managed using BIM technologies will help us define a road map for how information passes downstream and bring value to a project. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6430 - Pre-Design (3 Credits)
Course lectures, readings, and case studies cover pre-design methodologies, research, documentation, facilitation and consensus building. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6463 - BIM: Emerging Prof. Practices (3 Credits)
The 21st century architect's emerging role is designing the design process. BIM (Revit) attempts to optimize the entire process, including all participants, from conceptual design, through post-building occupancy. These capabilities are explored and developed. Prereq: ARCH 5430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6464 - BIM: Advanced Design Concepts (3 Credits)
BIM's complexity (Revit) challenges all designers. The emerging tool is very sophisticated, but its benefit are not realized from modeling alone. We address architectural design as a multifaceted optimization process: concept, form, and function. Prereq: ARCH 5430. Cross-listed with ARCH 6390. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6467 - ACE Mentoring (3 Credits)
Graduate students work with professional architects, designers, and engineers mentoring students in selected local high schools to learn problem solving, graphics and model making to produce a design project. Student mentors develop lesson plans, outcomes and keep a weekly journal. Cross-listed with LDAR 6470 and URPL 6850. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6471 - Managing Quality & Risks (3 Credits)
A lecture and seminar on approaches to risk management including contracts, insurance, financial analysis, dispute resolution and client relationships. Utilizing case study approach, quality assurance will be defined and studied in the design and building phase of workings. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6472 - Architecture in a Single Source Project Delivery (3 Credits)
Directed to the practice of architecture with design build and other single source delivery systems. This course examines requirements of codes, zoning, building systems and legal questions for the architect. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6473 - Research Tools & Methods (3 Credits)
Introduces the thesis in architecture and establishes the scholarly basis for the research and construction of a Master’s Thesis project. This course will provide the student with the research practices and methodologies to develop the scholarship and products required to produce a Thesis Project Proposal. Completion of this course is a prerequisite for the student to submit the Thesis Proposal for departmental approval to continue with the remaining 9 credits of thesis work. Cross-listed with LDAR 6949. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6475 - BIM/Flow of Information (3 Credits)
The course is geared toward CAP students, non-degree seeking working professionals and other students interested in the Integrated Construction, Management and Leadership (ICML) Certificate. This class will be a general overview of Virtual Design and Construction (VDC) in today's AEC industry. Restriction: Graduate students. Junior standing and above undergraduate students are eligible to take course with approval by instructor. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 6490 - Special Topics in Professional Studies (3 Credits)
Various topics in professional studies according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max Hours: 18 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 18. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

Additional Information: AP Professional Studies Area.

ARCH 6510 - Digital Applications in Design (3 Credits)
This course introduces first year design students to the Graphic Design Concepts and Digital Applications necessary to create digital, printed and physical presentations of their work. Students learn computer skills including: raster and vector based programs and digital modeling. Prereq: ARCH 5110 and ARCH 5510. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6515 - Adv. Digital Representation (3 Credits)
In this course students will learn advanced techniques of architectural representation using digital modeling, rendering engines, and post processing in the Adobe Creative Suite. Prereq: ARCH 5510 and 6510 or equivalent. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6530 - The Classical Elements (3 Credits)
Classical Elements provides skills for the Classical Studio (optional) and prepares students to apply for Certificate in Classical Architecture from the Institute of Classical Architecture and Art (optional). The course addresses the basic vocabulary, proportional systems, and theory of classical architecture. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

Typically Offered: Fall.

ARCH 6550 - Digital Portfolio Design (3 Credits)
This course introduces students to the Graphic Design Concepts and the Digital Applications used to create both Printed and Web-based Portfolios. Students must have completed ARCH 5110 and have a working knowledge of Photoshop. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6560 - Architecture Photography (3 Credits)
Emphasizes and understanding of light, composition, color and problem solving, with a particular goal of applying these skills to the photography of architectural exteriors and interiors. For students who have access to adjustable 35 mm digital cameras. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6570 - Sketching As Seeing (3 Credits)
Sketching promotes seeing, and seeing promotes thinking. This course is designed to help you think & see by the regular practice of sketching & the discipline of keeping a sketchbook. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6575 - 2D-3D & 4D Design Space (3 Credits)
The graphics language of words and art bridge intention and design. Passing ideas and mental imagery through digital technology’s 2D, 3D and 4D filters is the challenge. Students develop concepts in AutoCAD, visualize in 3D Studio Max, and narrate the process in Adobe Premiere. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6580 - High-Performance Façade Design (3 Credits)
It is the intent of the course to provide graduate students with a comprehensive understanding of the technical concepts and specific skills necessary to undertake in actual practice the design, detailing, specification, and construction administration of high-performance building facades. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6590 - Special Topics in Representational Studies (3 Credits)
Various topics in representational studies, according to current faculty and student interests. Prereq: ARCH 5510. Repeatable. Max hours: 15 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6710 - Architecture in Other Cultures (3 Credits)
Various studies of architecture and urbanism in foreign countries. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 12 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
Typically Offered: Summer.
ARCH 6715 - The Built Environment in Other Cultures I: Research Design (3 Credits)
The intent is to broaden students’ perspectives by asking them to examine design within another culture. Each student prepares a proposal of study including a statement of the problem to be addressed, the type of field research to be undertaken and the nature of the report to be produced. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6755 - Rome: Architecture & Urbanism (3 Credits)
The objective of this course is to provide a broad overview of the city’s major architectural sites, topography, infrastructure and systems of urban design and organization through the study of the rich palimpsest of buildings, piazzas and landscapes from antiquity to the present day. Coreq: ARCH 6760. Restriction: Restricted to ARCH graduate students. Cross-listed with ARCH 3693. Max hours: 3 Credits. Grading Basis: Letter Grade
Coreq: ARCH 6760. Restriction: Restricted to ARCH graduate students. Additional Information: Global Education Study Abroad.
ARCH 6760 - Rome: Documentation, Analysis and Design (3 Credits)
With graphic representation as the primary mode of inquiry, this course is an intensive study of a single building, piazza or landscape within the rich urban fabric of Rome. The graphical inquiry will be supported by pre-departure research and onsite observation and presentations. Coreq. ARCH 6755. Restriction: Restricted to ARCH graduate students. Cross-listed with ARCH 3694. Max hours: 3 Credits. Grading Basis: Letter Grade
Coreq. ARCH 6755. Restriction: Restricted to ARCH graduate students. Additional Information: Global Education Study Abroad.

Bioengineering (BIOE)

BIOE 5010 - Cell and Molecular Biology for Bioengineers (3 Credits)
Introduction to cellular and molecular biology, with a focus on using engineering methods and literature to analyze structure and function of cells throughout lifecycle and multiple scales. Design experiments to test hypotheses. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.

BIOE 5011 - Systems Physiology for Bioengineers (3 Credits)
Use engineering principles to study key physiological systems. Topics: cardiovascular, neuroscience, urological, or renal medicine. Related engineering principles: pressure-flow relationships, stress-strain, electromechanical coupling and signal transduction. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits. Grading Basis: Letter Grade
BIOE 5020 - Analytics and Machine Learning in Bioengineering (3 Credits)
This course provides mathematical tools essential for graduate level bioengineering work. Studies selected topics from probability, linear algebra, and vector calculus, with emphasis on bioengineering applications. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5021 - Numerical Methods for Engineering Analysis (3 Credits)
Provides computational skills and knowledge of numerical methods for engineering/scientific computation using Matlab. Topics: root finding, interpolation, difference and integration rules, solution of initial and boundary value ODEs, and introduction to the solution of PDEs. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5022 - Clinical Experiences for Bioengineers (1 Credit)
This course provides opportunities for clinical experiences such as observing surgeries and touring intensive care units to prepare students for clinical applications and foster collaborations with clinical practitioners. Experiences take place through the school year. Prerequisites: Graduate standing in Bioengineering (MS/PhD). Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5023 - Mechatronics and Embedded Systems (3 Credits)
The course focuses on the design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics (Ohm's law, RLC circuits, DC and AC signals, diode and transistor circuits, operational amplifiers, and digital signals), introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic and embedded systems design. Students must design and build an embedded systems device related to assistive technology. Note: Project expenses may be incurred ($50 maximum). Cross-listed with BIOE 4039. Restriction: Restricted to graduate students in the Department of Bioengineering. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.

BIOE 5040 - Research Methods for Bioengineers (2 Credits)
This course introduces research methods that will prepare bioengineering graduate students for completing basic or translational research and communicating the results. Topics include setting expectations with mentors, finding, reading, analyzing, citing, and reviewing scientific literature, technical writing, research presentations, and responsible conduct of research. Restriction: Graduate standing in Bioengineering (MS/PhD). Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to BIOE graduate majors within the College of Engineering, Design and Computing Typically Offered: Spring.

BIOE 5041 - Clinical Experiences for Bioengineers (1 Credit)
This course provides opportunities for clinical experiences such as observing surgeries and touring intensive care units to prepare students for clinical applications and foster collaborations with clinical practitioners. Experiences take place through the school year. Prerequisites: Graduate standing in Bioengineering (MS/PhD). Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5042 - Research Methods for Bioengineers (2 Credits)
Course introduces research methods that will prepare bioengineering graduate students for completing basic or translational research and communicating the results. Topics include setting expectations with mentors, finding, reading, analyzing, citing, and reviewing scientific literature, technical writing, research presentations, and responsible conduct of research. Restriction: Graduate standing in Bioengineering (MS/PhD). Max hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5043 - Numerical Methods for Engineering Analysis (3 Credits)
Provides computational skills and knowledge of numerical methods for engineering/scientific computation using Matlab. Topics: root finding, interpolation, difference and integration rules, solution of initial and boundary value ODEs, and introduction to the solution of PDEs. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5044 - Clinical Experiences for Bioengineers (1 Credit)
This course provides opportunities for clinical experiences such as observing surgeries and touring intensive care units to prepare students for clinical applications and foster collaborations with clinical practitioners. Experiences take place through the school year. Prerequisites: Graduate standing in Bioengineering (MS/PhD). Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5045 - Research Methods for Bioengineers (2 Credits)
This course introduces research methods that will prepare bioengineering graduate students for completing basic or translational research and communicating the results. Topics include setting expectations with mentors, finding, reading, analyzing, citing, and reviewing scientific literature, technical writing, research presentations, and responsible conduct of research. Restriction: Graduate standing in Bioengineering (MS/PhD). Max hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5046 - Mechatronics and Embedded Systems (3 Credits)
The course focuses on the design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics (Ohm's law, RLC circuits, DC and AC signals, diode and transistor circuits, operational amplifiers, and digital signals), introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic and embedded systems design. Students must design and build an embedded systems device related to assistive technology. Note: Project expenses may be incurred ($50 maximum). Cross-listed with BIOE 4039. Restriction: Restricted to graduate students in the Department of Bioengineering. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.

BIOE 5047 - Numerical Methods for Engineering Analysis (3 Credits)
Provides computational skills and knowledge of numerical methods for engineering/scientific computation using Matlab. Topics: root finding, interpolation, difference and integration rules, solution of initial and boundary value ODEs, and introduction to the solution of PDEs. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5048 - Clinical Experiences for Bioengineers (1 Credit)
This course provides opportunities for clinical experiences such as observing surgeries and touring intensive care units to prepare students for clinical applications and foster collaborations with clinical practitioners. Experiences take place through the school year. Prerequisites: Graduate standing in Bioengineering (MS/PhD). Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5049 - Research Methods for Bioengineers (2 Credits)
This course introduces research methods that will prepare bioengineering graduate students for completing basic or translational research and communicating the results. Topics include setting expectations with mentors, finding, reading, analyzing, citing, and reviewing scientific literature, technical writing, research presentations, and responsible conduct of research. Restriction: Graduate standing in Bioengineering (MS/PhD). Max hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5050 - Numerical Methods for Engineering Analysis (3 Credits)
Provides computational skills and knowledge of numerical methods for engineering/scientific computation using Matlab. Topics: root finding, interpolation, difference and integration rules, solution of initial and boundary value ODEs, and introduction to the solution of PDEs. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5051 - Clinical Experiences for Bioengineers (1 Credit)
This course provides opportunities for clinical experiences such as observing surgeries and touring intensive care units to prepare students for clinical applications and foster collaborations with clinical practitioners. Experiences take place through the school year. Prerequisites: Graduate standing in Bioengineering (MS/PhD). Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5052 - Research Methods for Bioengineers (2 Credits)
This course introduces research methods that will prepare bioengineering graduate students for completing basic or translational research and communicating the results. Topics include setting expectations with mentors, finding, reading, analyzing, citing, and reviewing scientific literature, technical writing, research presentations, and responsible conduct of research. Restriction: Graduate standing in Bioengineering (MS/PhD). Max hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5053 - Numerical Methods for Engineering Analysis (3 Credits)
Provides computational skills and knowledge of numerical methods for engineering/scientific computation using Matlab. Topics: root finding, interpolation, difference and integration rules, solution of initial and boundary value ODEs, and introduction to the solution of PDEs. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5054 - Clinical Experiences for Bioengineers (1 Credit)
This course provides opportunities for clinical experiences such as observing surgeries and touring intensive care units to prepare students for clinical applications and foster collaborations with clinical practitioners. Experiences take place through the school year. Prerequisites: Graduate standing in Bioengineering (MS/PhD). Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5055 - Research Methods for Bioengineers (2 Credits)
This course introduces research methods that will prepare bioengineering graduate students for completing basic or translational research and communicating the results. Topics include setting expectations with mentors, finding, reading, analyzing, citing, and reviewing scientific literature, technical writing, research presentations, and responsible conduct of research. Restriction: Graduate standing in Bioengineering (MS/PhD). Max hours: 2 Credits.
Grading Basis: Letter Grade

BIOE 5056 - Numerical Methods for Engineering Analysis (3 Credits)
Provides computational skills and knowledge of numerical methods for engineering/scientific computation using Matlab. Topics: root finding, interpolation, difference and integration rules, solution of initial and boundary value ODEs, and introduction to the solution of PDEs. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5064 - Advanced MatLab For Bioengineers And Life Scientists (3 Credits)
MatLab programming for graduate bioengineers and life scientists. Topics include MatLab syntax and optimization as well as techniques for working with scalars, time-series, images and multi-dimension datasets. Surface/Curve fitting. modeling, automation and classification will be covered. Cross-listed with BIOE 4064. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5066 - Advanced MatLab For Bioengineers And Life Scientists (3 Credits)
MatLab programming for graduate bioengineers and life scientists. Topics include MatLab syntax and optimization as well as techniques for working with scalars, time-series, images and multi-dimension datasets. Surface/Curve fitting. modeling, automation and classification will be covered. Cross-listed with BIOE 4066. Max Hours: 3 Credits.
Grading Basis: Letter Grade
BIOE 5067 - Human Factors and Usability Testing for Bioengineers (3 Credits)
This course provides an introduction to human factors testing and evaluation in the context of medical devices and assistive technology (AT). Particular focus will be given towards designing and applying usability testing to inform product design decisions or improvements. Topics include human factor considerations for aging and disabled populations (and their care providers), usability techniques, user experience data collection and interpretation, etc. Students will engage in hands-on human factors assessments such as contextual inquiry of surgery patients, cognitive walkthroughs with simulating disability, and product usability testing and iteration. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5068 - Introduction to Medical Imaging (3 Credits)
This course will introduce graduate students to the basic physics, technologies, and clinical methodologies underlying Ultrasound, MRI, CT, PET and SPECT imaging systems. The course will include lectures, and visits to campus hospital and research imaging systems as well as hands on ultrasound labs. Cross-listed with BIOE 4068. Restriction: Restricted to Bioengineering students with graduate student status. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.

BIOE 5069 - Advanced Biomechanics for Graduates (3 Credits)
This course covers advanced topics such as blood flow dynamics, introduction to non-linear finite deformation techniques, blood rheology, and computational techniques. Restriction: Restricted to Bioengineering students with graduate student status, or by Permission of Instructor. Cross-listed with BIOE 4069. Max hours: 3 credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

BIOE 5073 - Neural Interfaces and Bionic Limbs (3 Credits)
This course will introduce graduate students to topics in neural interfaces (Brain machine interfaces, peripheral nerve interfaces etc), the issues involved in the design of mechatronic limb systems and the decoding algorithms used to map the neural interface to the mechatronic limb. Cross-listed with BIOE 4073. Restrictions: Matriculated CEDC students. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

BIOE 5074 - Introduction to Laboratory Animal Research (3 Credits)
This course provides basic theoretical and practical knowledge on the use of the most common laboratory animal species, animal models and welfare, general concepts on animal biology and husbandry, and essential principles of anesthesia, analgesia, surgery and peri operative care. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5083 - Polymers in Biomedical Applications (3 Credits)
This course will introduce graduate students to fundamental synthetic method and basic characteristics of various polymeric biomaterials and their crucial roles in different biomedical applications. It will also cover how the polymers can be modified to enhance biomedical applications. Cross-listed with BIOE 4083. Prereq: Graduate standing at CU Denver or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5420 - Special Topics in Bioengineering (1-6 Credits)
Special topics of particular interest to graduate students in Bioengineering. Prereq: Graduate standing within the Department of Bioengineering or permission of instructor. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

BIOE 5840 - Independent Study in Bioengineering (1-6 Credits)
Graduate level independent study in Bioengineering with a faculty mentor. Prereq: Graduate standing within the Department of Bioengineering or permission of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

BIOE 5939 - Graduate Internship (1-6 Credits)
Department of Bioengineering Internship. Credit may not be applied toward the MS in Bioengineering degree. Enrollment by department permission only. Max Hours: 6 Credits.
Grading Basis: Letter Grade

BIOE 6655 - Foundations of Doctoring MS Years (1-5 Credits)
This course is for CU MD-MS students who are on leave of absense from SOM and wish to maintina clinical exposure and training during the leave. Prereq: Phase I & II SOM classes and graduate standing in BIOE. Repeatable. Max Hours: 20 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 20.
Restriction: Restricted to BIOE graduate majors within the College of Engineering, Design and Computing

BIOE 6950 - Masters Thesis (1-6 Credits)
Grading Basis: Letter Grade with IP

BIOE 6960 - Master’s Project (1-6 Credits)
Training for Master’s Project under the supervision of faculty project advisor. Prereq: Department Consent. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP

BIOE 8990 - Doctoral Dissertation (1-10 Credits)
Research for doctoral dissertation under supervision of faculty advisor. Prerequisites: Consent of dissertation advisor. Restrictions: Satisfactory progress toward PhD-Bioengineering Degree. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.

Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

BIOE 8990 - Doctoral Dissertation (1-10 Credits)
Research for doctoral dissertation under supervision of faculty advisor. Prerequisites: Consent of dissertation advisor. Restrictions: Satisfactory progress toward PhD-Bioengineering Degree. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.

Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
Biology (BIOL)

BIOL 5024 - Introduction to Biotechnology (3 Credits)
Introduces aspects of biotechnology within a historical context, including medical, forensic, agricultural and microbial biotechnology. Addresses principles behind state-of-the-field techniques in recombinant DNA technology, bioinformatics, proteomics and genomics. Biotechnology regulations and ethics will also be discussed. Restriction: Restricted to degree granting graduate programs on the downtown campus as well as the School of Medicine on the Anschutz Medical campus. Cross-listed with BIOL 4024. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs on the downtown campus as well as the School of Medicine on the Anschutz Medical campus.

BIOL 5050 - Advanced Biology Topics (1-8 Credits)
Examines current topics in the field of biology. Topics vary from term to term. See Schedule Planner for current topics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4050. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to degree-granting graduate programs

BIOL 5052 - Advanced Ecology (3 Credits)
This combination seminar and lecture course focuses on state-of-field knowledge, current theories and recent models in selected areas of ecology, such as theoretical ecology, evolutionary ecology, population biology and ecosystems ecology. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4052. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5053 - Disease Ecology (3 Credits)
The study of the underlying principles that influence the spatio-temporal patterns of infectious disease in environments. Students will apply ecological theories about concepts such as biodiversity, trophic interactions, landscape structure, and nutrient cycling to the study of disease. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4053. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5055 - Virology (3 Credits)
This is an upper level undergraduate/graduate class providing an in-depth study of the history of virology, different types of viruses, viral disease, research to combat viral infections, and different uses of viruses in biotechnology. Note: Students will not earn credit for this course if they have already earned credit for BIOL 4051 or BIOL 5051. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4055. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5064 - Cell Biology of Disease (3 Credits)
Builds on the foundations laid in the prerequisite courses. How alterations in membrane transport, autophagy, mitochondria, lysosomes, cilia, unfolded protein response and autophagy lead to major human diseases. A major emphasis is the control and integration of cellular activities. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4064. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5125 - Molecular Biology Lab (3 Credits)
Provides hands-on experiences in molecular biology and an appreciation for using the tools of molecular biology to study biological systems. Emphasis is placed on DNA cloning, PCR, mRNA and protein detection in the context of gene editing. Experimental design and the theories underlying the techniques are also discussed. Restriction: Restricted to degree-granting graduate programs on the downtown campus as well as the School of Medicine on the Anschutz Medical campus. Cross-listed with BIOL 4125. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs on the downtown campus as well as the School of Medicine on the Anschutz Medical campus.
Typically Offered: Spring.

BIOL 5126 - Molecular Genetics (3 Credits)
Examines molecular techniques and their application to experimental genetics, specifically organization and mapping of genomes, application and model systems in defining hereditary components of disease, and mechanisms of identifying mutations and their implications for disease. Also addresses application of recombinant DNA technology. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4126. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5134 - Human Genetics (3 Credits)
Advanced survey of the current status of the field. Emphasis on understanding, diagnosis and treatment of genetic disease and on the impact of molecular biology on human genetics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4134. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5144 - Medical Microbiology (3 Credits)
Provides an understanding of the relationship between pathogenic organisms and their host. Emphasis is placed on the area of medical bacteriology, with attention given to mechanisms of pathogenesis, genetics of disease, serology and treatment. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4144. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5154 - Conservation Biology (3 Credits)
Basic concepts and theories in population biology and genetics as they apply to issues relating to the preservation of biodiversity, such as the genetics of small populations, captive propagation, restoration ecology and the design of nature reserves. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4154. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
BIOL 5165 - Neurobiology (3 Credits)
Overview of neuroscience, covering the cellular basis of neuronal activity, sensory structures and the structure and function of the human brain.
Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4165. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5225 - Genomics and Bioinformatics (3 Credits)
Explores how genome-wide data are collected and analyzed. Example applications include human disease, microbial evolution, ecological genomics, and parasite drug resistance. Students implement projects based on real DNA sequencing data. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4225. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5250 - Mechanisms of Animal Behavior (3 Credits)
The proximate and ultimate mechanisms of animal behavior are analyzed using comparative animal examples from the scientific literature. Proximate mechanisms include genetic and physiological processes. Ultimate mechanisms include the role of natural and sexual selection in the evolution of behavior. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4250. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5335 - Plant Structure and Development (4 Credits)
Inclusive and in-depth study of functional anatomy and biology of vascular plants. Topics include: plant biochemistry, biology of the plant cell, simple and complex tissues, secretory structures, functional anatomy, primary and secondary growth, angiosperm reproduction and life cycles, development and additional topics. Responsibilities include lectures, lab, and potential field trips. Course must be taken with both lecture and lab together. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4335. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5345 - Flora of Colorado (4 Credits)
Inclusive and in-depth study of functional anatomy and biology of vascular plants. Topics include: plant biochemistry, biology of the plant cell, simple and complex tissues, secretory structures, functional anatomy, primary and secondary growth, angiosperm reproduction and life cycles, development and additional topics. Responsibilities include lectures, lab, and potential field trips. Course must be taken with both lecture and lab together. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4345. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5415 - Applied Microbial Ecology (3 Credits)
An in-depth study of ecology as it relates to microorganisms; abiotic and biotic interactions within microbial populations in macro- and microhabitats; and the role of microorganisms in influencing and responding to environmental conditions in natural and anthropogenic ecosystems. Emphasis is placed on how the ecology of microorganisms impacts how we engage with our environment. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4415. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall, Spring.

BIOL 5425 - Biogeography (3 Credits)
An in-depth study of biological populations through analysis of geographic distribution patterns in space and time. Emphasis on how biogeography informs studies of evolution and ecology and on applied studies in conservation, sustainability, epidemiology, and disease dynamics. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4425. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5430 - Introduction to Spatial Ecology (3 Credits)
Focuses on patterns of life and ecological interactions in space. Emphasis on drivers of patterns, practical application of spatial ecology software, programming, and introductory spatial statistics on the quantification of patterns. Main topics: Scale and scaling, pattern development, detecting and characterizing patterns, temporal dynamics, and implications of spatial structure to conservation biology, resilience, and ecosystem functioning. Cross-listed with BIOL 4430. Restriction: Restricted to degree-granting graduate programs. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5460 - Environmental Toxicology (3 Credits)
Text and literature-based course provides students with background knowledge concerning environmental toxins, the nature and extent of environmental contamination, and toxicant effects on individual organisms and populations. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4460. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5464 - Exercise Physiology (3 Credits)
This course addresses the dynamic physiological changes associated with exercise. Where human physiology addresses physiological processes at rest, this course explores how the cardiovascular, respiratory, nervous and endocrine systems support increased energy transfer as skeletal muscle becomes more active. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4464. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5494 - Population and Evolutionary Genetics (3 Credits)
Introduces the genetic processes underlying evolutionary change in microbial, plant and animal populations. Topics include: sources of variation, Hardy-Weinberg equilibrium, population genetic structure, natural selection and other evolutionary forces, quantitative genetics and molecular phylogenetics. Emphasis on experimental data. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4494. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5550 - Cell Signaling (3 Credits)
Lecture by faculty and student presentations cover mechanism of hormones and regulation of various cellular processes through second messenger systems. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4550. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

Typically Offered: Spring.
BIOL 5634 - Biology of Cancer (3 Credits)
Cancer is the second leading cause of death in the United States. This course offers an overview of recent research into the causes, treatments and possible prevention of cancer. Includes a detailed look at the mechanisms of action of various oncogenes. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4634. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5644 - Advanced Human Anatomy Laboratory (2 Credits)
Advanced laboratory course in human anatomy. In-depth look at the structural aspects of the human body, emphasizing function. Models, microscope slides, and visual media will supplement cadaver-based dissections. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4644. Term offered: fall, spring. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall, Spring.

BIOL 5674 - Endocrinology (3 Credits)
This systematic survey of the endocrine system looks at the cellular basis and biochemical characteristics of individual endocrine tissues. Their function in the regulation of other endocrinological, physiological, and behavioral events is analyzed. The course emphasizes the human system and complements studies in physiology, behavior and neurobiology. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4674. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5780 - Aquatic Ecology (3 Credits)
This course explores the physical, chemical, and biological (including human) properties of aquatic ecosystems, and how the interrelationships between these properties define and influence advanced ecological processes. Special focus is given to lakes, reservoirs, wetlands, streams, rivers, and groundwater. Learning is facilitated through lectures, discussions, student presentations, laboratory and data exercises, and periodic (often virtual) field excursions. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4780, ENV 4780, and ENVS 5780. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5815 - Structural Biology of Neurodegenerative Diseases (3 Credits)
Advanced course in Biochemistry/Biophysics. Principles of Protein Folding, Structure-Function Relationship, and spectroscopic techniques related to characterization of these processes as applied to neurodegenerative diseases such as Parkinson's and Alzheimer's. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4815, BIOL 4815, and BIOL 4815. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5825 - Biochemistry of Metabolic Disease (3 Credits)
Advanced course in biochemistry. An expanded study of selected topics in metabolism and how they relate to diseases, including inflammation, diabetes, obesity, and rare genetic disorders. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4825, CHEM 5825, and BIOL 4825. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5835 - Biochemistry of Gene Regulation and Cancer (3 Credits)
Explores the biochemical and molecular aspects of cancer biology. Topics include DNA mutations and repair, gene regulation, oncogenes and tumor suppressors, stem cells and differentiation, and cancer drug development. Restriction: Restricted to degree-granting graduate programs Cross-listed with CHEM 4835, CHEM 5835, and BIOL 4835. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 5840 - Independent Study BIOL (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring, Summer.

BIOL 5900 - Internship (1-6 Credits)
Designed experience involving application of specific, relevant concepts and skills in supervised employment situations. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to degree-granting graduate programs

BIOL 5910 - Field Studies (3 Credits)
Field studies of individuals, populations and communities comprising a specified ecosystem. Emphasis on field identification of vascular plants and vertebrate animals. Topics include the physical environment, biotic and abiotic interactions, life history, ecological adaptations and biogeography. Note: Lectures and a week-long field trip. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4910. Max hours: 3 Credits.
Grading Basis: Letter Grade

BIOL 5939 - Internship (1-6 Credits)
Typically Offered: Fall, Spring, Summer.

BIOL 5974 - Advanced Evolution (3 Credits)
A capstone course that draws upon concepts from all fields of biology. Topics include the fossil record mass extinctions, the historical development of the modern synthesis, principles and mechanisms of evolution, current viewpoints and controversies. Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4974. Max hours: 3 Credits.
Grading Basis: Letter Grade

BIOL 6002 - Biology Skills Sets - Pedagogy (2 Credits)
The purpose is to introduce sound practice in teaching and innovation in pedagogy. Topics covered will include assessment techniques, creation of learning goals, and research methods in biological education. Restriction: Restricted to degree-granting graduate programs. Term offered: fall. Max hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall.
BIOL 6655 - Seminar (1 Credit)
Restriction: Restricted to degree-granting graduate programs. Cross-listed with BIOL 4990. Term offered: fall, spring. Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 2.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring.

BIOL 6705 - Biological Research Workshop (2 Credits)
For graduate and advanced undergraduate students who are directly engaged in original research. Provides introduction to the discovery dissemination and peer review process associated with writing research proposals, manuscripts, and grants, as well as poster and oral presentations. Students will workshop each other's original research.
Graduate students enroll in 6705; research-active undergraduates enroll in 5705. Cross-listed with BIOL 5705. Prereq: Students involved in original research and permission of instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring.

BIOL 6764 - Biological Data Analysis (4 Credits)
Addresses quantitative aspects of research design, data collection and analysis in the biological sciences. Emphasizes relationships among probability theory, estimation, testing, inference, and interpretation. Includes intensive computer lab using the statistical programming software R to demonstrate both traditional analytical and contemporary simulation based (permutation, bootstrap, and Bayesian) approaches for inference in biology. Restriction: Restricted to degree-granting graduate programs. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring.

BIOL 6880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring, Summer.

BIOL 6950 - Master's Thesis (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 9.
Restriction: Restricted to degree-granting graduate programs
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

BIOL 7010 - Integrative and Systems Biology (3 Credits)
Addresses current research problems in integrative biology and system biology by surveying the peer-reviewed literature. Particular attention will be paid to research topics that integrate multiple levels of biological organization and that investigate how properties of systems emerge from interactions of sub-units. Note: New students in the Integrative and Systems Biology PhD program will enroll in this course during their first year. Restriction: Restricted to degree-granting graduate programs. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

BIOL 7050 - Special Topics (1-3 Credits)
Readings in current biology topics. Specific topics vary and may be proposed by groups of graduate students who identify a suitable faculty instructor or by a faculty member who identifies a need for advanced study in a specialized topic of biology. Restriction: Restricted to degree-granting graduate programs. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to degree-granting graduate programs

BIOL 7650 - Research in Integrative and Systems Biology (1-10 Credits)
Designed to allow doctoral students to conduct research for course credit prior to advancement to candidacy. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Ph.D. student and permission of instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 10.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring, Summer.

BIOL 7920 - Directed Reading/Grant Writing (3 Credits)
Allows students to examine current literature related to their specialty area of biological research and to work in collaboration with a research mentor to develop a grant-based dissertation proposal in preparation for the comprehensive review examination. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Students must be in the Integrative and Systems Biology PhD program and have permission from the instructor. Restriction: Restricted to degree-granting graduate programs. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring, Summer.
Business (BUSN)

BUSN 5939 - Internship (1-3 Credits)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BUSN 6520 - Leading Individuals and Teams (3 Credits)
Students learn the strengths and weaknesses of their management style and how to work effectively with individual differences. Students also learn how to form teams around purpose/task, diagnose problems and identify and implement solutions by utilizing leadership skills such as setting goals, processes and measures, interpersonal communication, motivation and conflict management. Students develop an understanding of the effect of the organizational and social context on the behavior of individuals and teams. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

BUSN 6521 - Leading Individuals and Teams (3 Credits)
Students learn the strengths and weaknesses of their management style and how to work effectively with individual differences. Students also learn how to form teams around purpose/task, diagnose problems and identify and implement solutions by utilizing leadership skills such as setting goals, processes and measures, interpersonal communication, motivation and conflict management. Students develop an understanding of the effect of the organizational and social context on the behavior of individuals and teams. The emphasis is on health care issues and is intended for health care students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

BUSN 6530 - Data Analytics for Managers (3 Credits)
Provides an overview of statistical and machine learning techniques for visualizing data, developing multivariate models to explain and control variation, and predicting outcomes. Methods covered in the course include exploratory data analysis, multiple linear regression, decision trees, and time-series forecasting. The emphasis is upon application of these techniques to business problems. Students are required to analyze data and present their analyses in written or oral form. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.

BUSN 6540 - Legal and Ethical Environment of Business (3 Credits)
Students develop a working knowledge of legal and ethical parameters for business decision making. The course addresses the legal system and mechanisms for resolving disputes. Topics include constitutional law, torts, product liability, contracts, property law, consumer protection, intellectual property, business entities and employment law. It stresses the influence of legal issues on organizational decision making. Note: Students can substitute ENTP 6822 but credit cannot be received for both. Health Administration students must take BUSN 6541. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.

BUSN 6541 - Legal and Ethical Environment of Business (Health Section) (3 Credits)
Students develop a working knowledge of legal and ethical parameters for business decision making. Addresses the legal system and mechanisms for resolving disputes. Topics include business entities, torts, contracts, employment relationships, litigation and alternative dispute resolution. It stresses the influence of legal issues on organization and decision making. The emphasis is on health care issues and is intended for health care students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Spring.

BUSN 6550 - Analyzing and Interpreting Accounting Information (3 Credits)
Emphasizes the use of accounting statements and data in making business decisions. External financial accounting information and concepts are used for investment and credit decisions. Internal managerial accounting information and concepts are used for product costing, cost analysis and management control. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.
BUSN 6560 - Marketing Dynamics in the 21st Century (3 Credits)
This course focuses on the art, science, and practice of managing dynamic market environments and making decisions about alternative marketing strategies. Students use analytical frameworks to inform decision-making about the many specific aspects of marketing: e.g., value proposition, target markets, positioning, products, channels of distribution, pricing, communication, and service. Participants learn how to integrate these elements into a Marketing Plan. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.

BUSN 6561 - Marketing Dynamics in the 21st Century (Health Section) (3 Credits)
Focuses on the formulation and implementation of a marketing plan in the context of the firm’s strengths, overall strategy and competitive environment. Emphasis is on understanding the marketing environment and on decision making skills regarding market selection, pricing, promotion, product configuration and management of distribution channels. Restriction: Restricted to HLAD and MBAH majors within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to HLAD and MBAH majors within the Business School.

BUSN 6610 - Information Systems Strategy (3 Credits)
Digital strategy is the application of digital technologies to business models to form new differentiating business capabilities. The course starts with the highlights of genesis and importance of IT in organizations, including the relationship between digital technology and competitiveness. Then, the development and management of an effective digital infrastructure are discussed. Realizing that the effective use of digital technology requires the alignment of competitive strategies, business processes, and applications, the course takes a top management perspective on the development of policies and plans that maximize the contribution of digital technologies to organizational goals. A broad overview of how systems support the operational, administrative, and strategic needs of organizations is covered. Note: Students cannot receive credit if they have taken BUSN 6810 or ISMG 6180. Cross-listed with ISMG 6180. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall, Spring, Summer.

BUSN 6620 - Applied Economics for Managers (3 Credits)
After taking this course, students should be able to apply economic principles to make optimal decisions given firm cost, demand and market circumstances. Also, they should be able to analyze the firm’s interactions with its competitive market environment. Students will learn basic aspects of federal macroeconomic policy designed to achieve stable prices and economic growth. Also, they will learn to understand the measurement of output (GDP), employment and prices; the conduct of monetary and fiscal policy; and the balance of trade. Coreq: BUSN 6550 or ACCT 6030 or ACCT 6031. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-req: BUSN 6550 or ACCT 6030 or ACCT 6031 Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

BUSN 6621 - Applied Economics for Managers (Health Section) (3 Credits)
After taking this course, students should be able to apply economic principles to make optimal decisions given firm cost, demand and market circumstances. Also, they should be able to analyze the firm’s interactions with its competitive market environment. Students should understand basic aspects of federal macroeconomics policy designed to achieve stable prices and economic growth. Also, they should understand basic aspects of government regulation of business. The emphasis is on healthcare issues and is intended for healthcare students. Coreq: BUSN 6550 or ACCT 6030 or ACCT 6031 and BUSN 6530 or FNCE 6290 or BANA 6610. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-req: BUSN 6550 or ACCT 6030 or ACCT 6031 and BUSN 6530 or FNCE 6290 or BANA 6610. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Spring.

BUSN 6630 - Management of Operations (3 Credits)
This course is concerned with the production and delivery of goods and services. It provides an overview of a variety of contemporary Operation Management topics using current techniques and modeling to solve and understand key issues. Basic Excel skills are required. The use of model-assisted decision making is emphasized. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.
BUSN 6640: Financial Management (3 Credits)
This course is concerned with the business firm's decisions to make investments and to finance its operations. Students learn to use the tools and theories underlying business valuation, cost of capital, capital budgeting and capital structure. Students will learn to evaluate a firm's financial position through the examination of its financial statements and to prepare pro forma statements for the firm. Prereq: BUSN 6550 with a grade of C or better. Coreq: BUSN 6620 or BUSN 6621. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6812: IT and New Business Paradigms (3 Credits)
Introduces graduate students to the relationship between information technology and the other functional areas of the business. During the course, students have an opportunity to listen and learn from guest speakers who have been involved with either guiding or interpreting the impact of information technology among functional areas of existing or new business. Through the use of current readings, guest lectures and case analysis, students examine various models of IT and new business paradigms to determine the decisions and success criteria for integrating IT in ongoing business. A unique feature of the class will be the opportunity for students to present proposals and projects to be critiqued by individuals with IT or business experience. Those individuals provide feedback and perspectives regarding potential IT or new business paradigm activities. Prereq: Permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6711: Strategic Management (3 Credits)
Concerned with the development of a general management perspective in establishing the strategic direction for an enterprise. Students gain an understanding of strategy formulation and implementation within the context of the global environment. Note: Students may not receive credit for both BUSN 6710 and MGMT 6620. Note: This course is intended as a final semester Capstone course. Coreq: BUSN 6560 or 6561, BUSN 6630 or BUSN 6631, and BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with MGMT 6620. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6807: Analyzing Emerging Opps & Planning During Uncertain Time (3 Credits)
To develop strategic thinking and practical planning skills. Prepare students for the dynamic and uncertain business environment. Pro/face today. More specifically, we explore how to think innovatively and spot trends, develop formal business plans around emerging opportunities, address uncertain and volatile situations using scenarios. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6611: IT and New Business Paradigms (3 Credits)
Introduces graduate students to the relationship between information technology and the other functional areas of the business. During the course, students have an opportunity to listen and learn from guest speakers who have been involved with either guiding or interpreting the impact of information technology among functional areas of existing or new business. Through the use of current readings, guest lectures and case analysis, students examine various models of IT and new business paradigms to determine the decisions and success criteria for integrating IT in ongoing business. A unique feature of the class will be the opportunity for students to present proposals and projects to be critiqued by individuals with IT or business experience. Those individuals provide feedback and perspectives regarding potential IT or new business paradigm activities. Prereq: Permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6640: Financial Management (3 Credits)
This course is concerned with the business firm's decisions to make investments and to finance its operations. Students learn to use the tools and theories underlying business valuation, cost of capital, capital budgeting and capital structure. Students will learn to evaluate a firm's financial position through the examination of its financial statements and to prepare pro forma statements for the firm. Prereq: BUSN 6550 with a grade of C or better. Coreq: BUSN 6620 or BUSN 6621. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6711: Strategic Management (Health Section) (3 Credits)
Concerned with the development of a general management perspective in establishing the strategic direction for a health delivery organization. Students gain an understanding of strategy formulation and implementation within the context of the managed care environment. Emphasis is on the integration of knowledge acquired in the previous functional area courses. Note: This course is intended as a final semester course. Required of Health Administration majors. Coreq: BUSN 6560 or BUSN 6561, and BUSN 6640. Restriction: Restricted to HLAD and MBAH majors within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6800: Topics in Business (3 Credits)
Current topics in business are occasionally offered. Prerequisites vary depending on the material covered. Consult the current 'schedule planner' for specific offerings and prerequisites. Repeatable. Max Hours: 12 Credits.

BUSN 6840: Independent Study (1-3 Credits)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 8 Credits. Grading Basis: Letter Grade

BUSN 6640: Financial Management (3 Credits)
This course is concerned with the business firm's decisions to make investments and to finance its operations. Students learn to use the tools and theories underlying business valuation, cost of capital, capital budgeting and capital structure. Students will learn to evaluate a firm's financial position through the examination of its financial statements and to prepare pro forma statements for the firm. Prereq: BUSN 6550 with a grade of C or better. Coreq: BUSN 6620 or BUSN 6621. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6807: Analyzing Emerging Opps & Planning During Uncertain Time (3 Credits)
To develop strategic thinking and practical planning skills. Prepare students for the dynamic and uncertain business environment. Pro/face today. More specifically, we explore how to think innovatively and spot trends, develop formal business plans around emerging opportunities, address uncertain and volatile situations using scenarios. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6611: IT and New Business Paradigms (3 Credits)
Introduces graduate students to the relationship between information technology and the other functional areas of the business. During the course, students have an opportunity to listen and learn from guest speakers who have been involved with either guiding or interpreting the impact of information technology among functional areas of existing or new business. Through the use of current readings, guest lectures and case analysis, students examine various models of IT and new business paradigms to determine the decisions and success criteria for integrating IT in ongoing business. A unique feature of the class will be the opportunity for students to present proposals and projects to be critiqued by individuals with IT or business experience. Those individuals provide feedback and perspectives regarding potential IT or new business paradigm activities. Prereq: Permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
BUSN 6860 - Finance in the Sports Entertainment Industries (3 Credits)
This course explores the problems and solutions of financing in sports and entertainment business. It focuses on stadium/venue financing, sports team valuation, entertainment event guarantee estimation, player/artist salary issues and managing disparate revenue streams. The course utilizes speakers, articles, problem sets and cases. Prereq: BUSN 6640.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

Business Analytics (BANA)

BANA 5939 - Internship (1-3 Credits)
Repeateable. Max Hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeateable. Max Credits: 9.

BANA 6610 - Statistics for Business Analytics (3 Credits)
Provides a conceptual overview of statistical thinking and its applications to business problems. Topics include descriptive statistics, data exploration, probability, inferential methods, regression analysis, classification, regression with high dimensional data, etc. Students gain hands-on experience with data analytic problems via projects using real business settings and data. Restriction: Restricted to MS BANA majors within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to BANA-MS students within the Business School.

BANA 6620 - Computing for Business Analytics (3 Credits)
Introduces database and modeling software used by business analytics professionals. Includes querying relational databases, state-of-the-art statistical freeware, and modeling software. Students learn to obtain, organize, and store data needed for analytics projects, undertake data cleansing for big data tasks, and conduct statistical data visualization. Restriction: Restricted to BANA-MS students within the Business School. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to BANA-MS students within the Business School.

BANA 6630 - Time-Series Forecasting (3 Credits)
Time series analysis is critical to industries such as finance, marketing, retail, and accounting. This course introduces time-series models with emphasis on their practical applications in business. The goal is to show how dynamic financial and economic data can be modeled and analyzed using proper statistical techniques. The topics include methods for trend and seasonal analysis and adjustment, modeling and forecasting with autoregressive moving average (ARIMA) processes, and model identification and diagnostics for time series. Other subjects include volatility and state space models. This course provides hands-on experience by pairing lectures on methodology with lab sessions using R to perform real-world data analyses. If you do not meet the prerequisites you may contact the instructor for permission to register. Prereq: BANA 6610. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Note: Can only receive credit for either BANA 6630/DSCI 6230. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereqs: BANA 6610. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6640 - Decision Analysis (3 Credits)
Introduces a quantitative approach to business decision making under conditions of risk and uncertainty. Emphasis will include introductions to decision analysis theory, risk analysis, utility theory, multi-criteria decision making, Bayesian decision analysis and hierarchical structured models. Psychological issues and qualitative approaches in the decision-making process will be discussed. Student computer-assisted projects are included. Prereq: BANA 6610 or permission from instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereqs: BANA 6610. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6650 - Project Management (3 Credits)
Introduces the topic of Project Management (PM) in a business environment. Emphases will include the knowledge, skills, tools, and techniques as presented in the Project Management Body of Knowledge (PMBOK), a variety of managerial aspects commonly encountered in PM, and current extensions of PM. Projects in diverse contexts are examined. Cross-listed with URPL 6249. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

BANA 6660 - Predictive Analytics (3 Credits)
Addresses statistical and machine-learning approaches to prediction using the very large data sets increasingly common in business applications such as internet-based business, fraud detection, credit scoring and market segmentation. Methods covered in the course include data partitioning, logistic regression, clustering, decision trees, dimension reduction, and neural networks, among others. Emphasis is placed on proper choice of method and understanding of the strengths and limitations of competing methods. Students are expected to analyze and report on a variety of data sets drawn from business application areas. If you do not meet the prerequisites listed, you may contact the instructor for permission. Prereq: BANA 6610. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to BANA-MS students within the Business School.

BANA 6670 - Prescriptive Analytics with Optimization (3 Credits)
Optimization is a key part of Business Analytics dealing with decision problems that lend themselves to modelling and analysis designed to determined optimal decisions. In this course, we'll study methodologies for determining the best course of action in situations with a large number of alternatives, each with their own financial or other characteristics, including restrictions on our actions that must be satisfied as we search for best solutions. While the focus of the course is on modeling and solving a wide variety of optimization problems, we'll also cover the basic mathematical underpinnings of linear programming, the most widely used form of optimization in industry and government and the foundation of many extensions into other classes of optimization. State of the art Software for solving optimization problems will be used throughout the course. Students will work in teams on a project involving optimization and some important problem. Restriction: Restricted to BANA-MS students within the Business School. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to BANA-MS students within the Business School.
BANA 6690 - Network Modeling (3 Credits)
This course introduces network modeling. Utilizing data and metadata, programming, algorithms, statistical analysis, and visualization; networks are studied. The focus is on Business Applications to provide managerial insights and recommendations and will include transportation, social, transactional, electrical and communication networks. Prereq: BANA 6620. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BANA 6620 and BANA 6670. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6670 - Large-Scale Optimization Methods for Big Data (3 Credits)
This course will give an introduction on numerical optimization algorithms in the context of machine learning applications. We shall discuss how optimization problems arise in machine learning and what makes them challenging. Topics include traditional nonlinear optimization, linear optimization and discrete optimization with an emphasis on effective computational techniques. We shall also talk about next generation large-scale machine learning algorithms such as stochastic gradient (SG) method. Applications to a variety of areas such as text mining and neural networks are also stressed through class projects. Problems will be solved using appropriate software tools. Prereq: BANA 6620 and BANA 6670. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6690 - Network Modeling (3 Credits)
This course introduces network modeling. Utilizing data and metadata, programming, algorithms, statistical analysis, and visualization; networks are studied. The focus is on Business Applications to provide managerial insights and recommendations and will include transportation, social, transactional, electrical and communication networks. Prereq: BANA 6620. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BANA 6620 and BANA 6670. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6710 - Causal Analysis (3 Credits)
This course shows how to apply causal modeling to develop robust, causally effective business policies and interventions; and quantify their impacts using realistically imperfect data under uncertain and changing conditions. Students create causal models of customer behaviors and responses to business initiatives; quantify lifts caused by campaigns; and design customer and employee policies and interventions with robust benefits despite real-world uncertainties and data limitations. Prior exposure to probability, statistics, optimization and R programming language is helpful but not essential. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

BANA 6720 - Simulation Modeling (3 Credits)
Students learn to model and analyze complex dynamic systems using state-of-the art software. Illustrative application areas include production systems, service systems, distribution systems and health care systems. Topics include creating reliable simulation models, analyzing the input and output from the model, and managing simulation projects. A substantial part of the course will be devoted to student projects where students define, model and analyze a significant system of their choosing. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6730 - Supply Chain Analytics (3 Credits)
Introduces the design, analysis, management, and control of supply chains. Because of continuing advances in globalization, sustainability, and information technology, course emphasis will include integration of processes and systems, relationship management of upstream and downstream players, and strategies that incorporate current and future trends. Cross-listed with INTB 6730. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6740 - VBA for Business Analytics (3 Credits)
This course teaches the essentials of Visual Basic for Applications (VBA), the programming language for Microsoft Office. Focus in using VBA as a tool to automate common tasks and to create business analytic applications. Goal is to hide the details of the analytical and modeling techniques by creating user interfaces for inputs and then presenting managerially relevant results. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6750 - Large-Scale Optimization Methods for Big Data (3 Credits)
Optimization methodologies comprise one of the major components of modern business analytics. In the era of big data where problem scale is enormous, the ability to model and solve large-scale problems is increasingly important. In the first part of this course we will learn how to model and solve large scale applications by using the AMPL modeling language and solvers such as CPLEX and Gurobi. The second half of the course will be devoted to working on projects. Prereq: BUSN 6630 with a grade of "C" or better. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6630 with a grade of "C" or better Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6760 - VBA for Business Analytics (3 Credits)
This course teaches the essentials of Visual Basic for Applications (VBA), the programming language for Microsoft Office. Focus in using VBA as a tool to automate common tasks and to create business analytic applications. Goal is to hide the details of the analytical and modeling techniques by creating user interfaces for inputs and then presenting managerially relevant results. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6770 - VBA for Business Analytics (3 Credits)
This course teaches the essentials of Visual Basic for Applications (VBA), the programming language for Microsoft Office. Focus in using VBA as a tool to automate common tasks and to create business analytic applications. Goal is to hide the details of the analytical and modeling techniques by creating user interfaces for inputs and then presenting managerially relevant results. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
BANA 6670 - Data Visualization (3 Credits)
The course equips the Business Analyst with foundational concepts and techniques required for telling a compelling story with large complex data sets. The importance of visualizing information for many analysts is often overlooked or downgraded as a natural product of the analytics model but if the visualization is ineffective the decision making processes and knowledge discovery will be compromised. This is a project-based course that begins with reviewing concepts of human perception and cognition and perceptual accuracy and preferences. In the weeks we have together we will explore the basics of graphic design and making a “good” graph, explore why some data visualizations present information effectively and others do not, and we will also consider visualization as a component of systems for the Data Scientist and Business Analyst and presents examples of EDA (exploratory data analysis), visualizing time, networks, and maps. We end by reviewing methods and tools for static and interactive graphics. Tableau or other cutting-edge software will be utilized. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6670 - Evaluative Analytics (3 Credits)
Introduces principles of design of experiments (DOE), multivariate trials, randomized control trials (RCTs), A/B testing, and multi-armed bandit (MAB) optimization to evaluate and improve business processes, CRM and HR policies, and marketing campaign design and performance. Students learn to design evaluation studies and analyze data to critically evaluate and improve business process design and targeting, timing, content, context, and channel decisions to increase employee and customer satisfaction and long-term value (LTV). Note: Prior exposure to probability, statistics, and R is helpful but not essential. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6800 - Special Topics (3-12 Credits)
A number of different current topics in business analytics are discussed in this course. Consult the current schedule for semester offerings. Prereq: Permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6840 - Independent Study (1-6 Credits)
Instructor approval is required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

Business Law (BLAW)

BLAW 6500 - Legal Issues for CPA's (3 Credits)
Examines advanced legal issues affecting accounting financial reporting. Designed for graduate students who want to understand and improve the links between accounting disclosures and legal requirements. Note: This class is rarely offered. Prereq: BLAW 3000 or BUSN 6540 (or equivalent). Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BLAW 3000 or BUSN 6540 Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School

Candidate for Degree (CAND)

CAND 5940 - Candidate for Degree (0 Credits)
Max hours: 0 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Chemistry (CHEM)

CHEM 5010 - Advanced Inorganic Chemistry (3 Credits)
Covers the fundamental principles of inorganic chemistry. Topics include atomic structure and periodicity, molecular symmetry, bonding, structural chemistry, main-group chemistry, coordination chemistry, and organometallic chemistry. Prerequisite knowledge in Undergraduate Inorganic and Physical Chemistry assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4411. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5073 - RM-MSMSP Research Experience for Teachers - Chemistry Cohort (1-6 Credits)
The Research Experience for Teachers (RET) program will be a five-week research exploration in which twelve RM-MSMSP teachers will raise their level of relevant scientific understanding by engaging in a "hands on" workshop, transforming what they have learned into new curricular materials that will improve the scientific abilities of their students and hopefully stimulate them to consider a STEM career. Note: Credit may not apply toward any CLAS degree. Department consent required. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5110 - Advanced Analytical Chemistry (3 Credits)
Explores the fundamental principles of analytical chemistry. Topics will focus on meteorology (the science of making measurements), measurements based on energy transfer (e.g. spectroscopic analysis), and measurements based on mass transfer (e.g. chemical separations and electrochemistry). Prerequisite knowledge in Undergraduate Instrumental Analysis is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4110. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.

CHEM 5221 - Practical Applications of Spectroscopy (3 Credits)
This course surveys spectroscopic methods in order to deduce the structure of organic compounds from an examination of spectra, with an emphasis on infrared spectroscopy, mass spectrometry, nuclear magnetic resonance spectroscopy, and ultraviolet spectroscopy. Students will be introduced to a wide array of powerful and elegant tools for obtaining qualitative information about the structure of matter. This course will require a good amount of thought, yet all of the concepts and associated mathematical manipulations are within the reach of a student who has met the prerequisites. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4221. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5310 - Advanced Organic Chemistry (3 Credits)
An exploration of structure, bonding and reactivity in organic modules that includes extensive analysis of the chemical literature, culminating in written and seminar presentations of individual projects. Prerequisite knowledge in Undergraduate Organic Chemistry and Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4310. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5388 - Nucleic Acid Technologies I (2 Credits)
This laboratory is intended to provide hands-on experience on the synthesis, characterization, and analyses of oligonucleotides of DNA and RNA. The laboratory will cover the basics to understand structural aspects of these biopolymers, using UV-vis, circular dichroism, electrophoresis, HPLC and mass spectroscopy. (All students will be expected to prepare, and turn in, three written reports; and three oral presentations. Every class member will also be required to keep an organized laboratory notebook, thus the class will be exposed to basic research aspects and literature searches. The course will also require students to design a successful experiment, that will prepare them for conditions they may likely encounter in an industrial, or advanced academic setting. Specifically, each student will choose a DNA sequence and probe their oligonucleotide model towards the recognition of a particular target, e.g., metabolite, protein, or molecular ion. In assessing these concepts, every student will be exposed to the basics of DNA/RNA structure as well as the chemistry of solid-phase chemistry. Every student will be required to present current topics (from recent literature) in front of the class as a way to enhance skills in oral presentation and scientific communication, aspects that will also enrich the scientific writing experience. To enhance the writing experience and provide a broader perspective on contemporary research, that is related to the course, students will be required to attend two seminars (from the departmental seminar series) and prepare a short written report. It is worth noting that this course will provide exposure to techniques that are commonly used in an industrial setting, e.g., in the development of RNA-based drugs and therapeutics, thus preparing them for a successful transition onto their next academic/professional step). Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4388. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5411 - Bioconjugate techniques and Theranostic Nanomedicine (3 Credits)
The selective making of chemical bonds to biological molecules in complex mixtures enables a wide variety of applications in bio- and nano-materials science, bioengineering, and diagnostic and therapeutic (nano-)medicine. This course will discuss theory and practical current methods for chemical modification and conjugation of proteins and other bio- and nano-materials: Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4411. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5541 - Bioconjugate techniques and Theranostic Nanomedicine (3 Credits)
The selective making of chemical bonds to biological molecules in complex mixtures enables a wide variety of applications in bio- and nano-materials science, bioengineering, and diagnostic and therapeutic (nano-)medicine. This course will discuss theory and practical current methods for chemical modification and conjugation of proteins and other bio- and nano-materials: Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4411. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5740 - Candidate for Degree (1 Credit)
Prereq: Consent of Instructor.
Grading Basis: Satisfactory/Unsatisfactory w/IP
Repeatable. Max Credits: 3.
A-GRAD Restricted to graduate students only.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
CHEM 5421 - Cannabis Chemistry (3 Credits)
An exploration of the terpene to cannabinoid compounds including biosynthesis pathways; human receptor structures and mechanism; current analytical methods for Quality Assurance and Quality Control and current research in medical applications. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4421. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.

CHEM 5510 - Computational Chemistry (3 Credits)
Classical and ab initio molecular dynamics are covered from theory to application. Students have access to high-performance computational resources and cover current topics in the field. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4510. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5530 - Advanced Physical Chemistry (3 Credits)
Explores fundamental properties of molecules (bond length and strength, the potential energy surface, reaction rates, etc.) and examines how these properties are measured, using original literature as the primary source, and culminating in written and seminar presentations of individual projects. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4530. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5548 - Physical Biochemistry Laboratory (2 Credits)
Experimental techniques of physical chemistry emphasizing thermodynamics, kinetics, and spectroscopy of biological molecules. Fulfills the Physical Chemistry Lab requirement for Biochemistry Emphasis majors. Restriction: Restricted to degree-granting graduate programs. Prereq: or Recommended Preparation CHEM 4810. Cross-listed with CHEM 4548. Term offered: fall, spring. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring.

CHEM 5550 - Applications of Group Theory in Chemistry (3 Credits)
Introduces the basic principles of the group theoretical method as well as its applications in organic, inorganic, and physical chemistry. Covers Mo's for main-group and transition metal compounds, ligand field theory, molecular vibrations, and electron absorption spectroscopy. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5580 - Molecular Informatics (2 Credits)
This course resides at the intersection between Chemistry, Biochemistry, and Data Science. The course covers fundamental concepts of Chemical and Biochemical Informatics and provides students with hands on experience in using computational tools to manipulate chemical and biochemical data. Students will learn fundamentals of data science, database management, data structure, data representation, data visualization, and data analysis as applied to Chemistry and Biochemistry. The course requires a basic understanding of programming but does not require extensive programming experience. Examples explored in class and in homework will be built using Python code within Jupyter Notebooks or Google Colab notebooks such that students can explore new topics while remaining focused on the underlying molecular concepts and computer methods which allow them to manage large amounts of molecular information and to find relationships between the structure and properties of molecules. Data mining approaches will be explored as will classification algorithms and chemical similarity analysis methods. Students will learn about the applications of cheminformatics in drug discovery, such as compound selection, virtual library generation, virtual high throughput screening which can check for potential molecules that have the potential to be developed into drugs. Note: While this course is not a pre-requisite for 4510 Computational Chemistry, CHEM 4640 AI in Chemistry and Biochemistry, or CHEM 4845 Molecular Modeling and Drug Design, the skills developed in this course will work synergistically with those courses and will allow you to get more from your experiences in those courses or from your experience in a research lab. Restriction: Restricted to students in degree-granting graduate programs or Prereq: CHEM 3411 and CHEM 4630 or MATH 1376 or BIOS 6642 or MOLB 7900 or CSCI 1410 with a C- or higher. Cross-listed with CHEM 4580. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in degree-granting graduate programs or Prereq: CHEM 3411 and CHEM 4630 or MATH 1376 or BIOS 6642 or MOLB 7900 or CSCI 1410 with a C- or higher.

CHEM 5600 - Graduate Topics in Chemistry (1-3 Credits)
Graduate students in chemistry or a related discipline explore a special topic in chemistry or biochemistry. A description of topics to be covered in the current semester is maintained on the Chemistry department website. Restriction: Restricted to degree-granting Graduate programs. Term offered: spring. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.

CHEM 5610 - Understanding & Presenting Chemical Research (1-2 Credits)
This course will improve your ability to systematically search for chemical information, help you interpret the information you find, & improve your ability to summarize and present that information. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4610. Term offered: fall, spring. Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 2.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring.
CHEM 5630 - Programming for Data Analysis in the Physical Sciences (1 Credit)
This course will be taught using live coding format (the instructor will code live in the classroom with the students). In this course, you will learn to process data using python scripts that you will write. Data include for example absorption spectra, protein pdb files, coordinate files. You will also learn how to use Python libraries and write functions (for example to create high resolution graphs). Finally, you will learn best coding practices, how to keep track of different versions of your code and share your code using Github. Restriction: Restricted to students enrolled degree-granting graduate programs. Cross-listed with CHEM 4630. Max hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5640 - Artificial Intelligence in Chemistry and Biochemistry (3 Credits)
Artificial Intelligence (AI) changes every aspect of our lives. In this course, we explore AI and its applications from the perspective of a chemist/biochemist. The role of AI and the latest trends in modern chemistry and biochemistry will be taught. Students will learn how to connect modern AI techniques to their own research projects, using both experimental and computational data. Restriction: Restricted to students in degree-granting graduate programs and Prereq/Coreq: CHEM 3810/4810/5810 and CHEM 4630/5630 with a B- or higher. Cross-listed with CHEM 4640. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs and Prereq/Co-req: CHEM 3810/4810/5810 and CHEM 4630/5630 with a B- or higher.

CHEM 5650 - Teaching Assistant Bootcamp (1 Credit)
This course is 4-5 8-hour days of intensive training in suitable pedagogy for general chemistry and organic chemistry laboratory classes, procedures for teaching laboratory sections, and laboratory techniques. Students must have a teaching assistant contract with the Chemistry Department in order to take this course. Restriction: Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4655. Term offered: fall. Repeatable. Repeatable. Max Hours: 1 Credit.
Grading Basis: Letter Grade
Repeatable. Max Credits: 2.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5700 - Environmental Chemistry (3 Credits)
A discussion of the sources, reactions, transport, effects, and fates of chemical species in the water, soil and air environments. Requisite knowledge in Undergraduate Organic and Analytical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4700. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.

CHEM 5810 - Graduate Biochemistry I (4 Credits)
Topics include proteins, mechanisms and kinetics of enzymes, carbohydrates, lipids and membranes, nucleic acids, genetic engineering, signaling pathways, and energetics, which are integrated with critical analysis of recent journal papers, culminating in written and seminar presentations of individual projects. Requisite knowledge in Undergraduate Organic Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Term offered: fall. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5815 - Structural Biology of Neurodegenerative Diseases (3 Credits)
Advanced course in Biochemistry/Biophysics. Principles of Protein Folding, Structure-Function Relationship, and spectroscopic techniques related to characterization of these processes as applied to neurodegenerative diseases such as Parkinson's and Alzheimer's. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4815, BIOL 4815, and BIOL 5815. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.

CHEM 5825 - Biochemistry of Metabolic Disease (3 Credits)
Advanced course in biochemistry. An expanded study of selected topics in metabolism and how they relate to diseases, including inflammation, diabetes, obesity, and rare genetic disorders. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4825, BIOL 4825, and BIOL 5825. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5830 - Graduate Biochemistry II (4 Credits)
Topics include biosynthesis & metabolism of carbohydrates, lipids & amino acids, & genetic information flow of DNA replication, transcription, translation & regulation of transcription, which are integrated with critical analysis of recent literature, culminating in written & seminar presentations of individual projects. Continuation of 5810. Prereq: CHEM 5810 with a B- or higher. Restriction: Restricted to degree-granting Graduate programs or permission of instructor. Term offered: spring. Max hours: 4 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 5810 with a B- or higher Restriction: Restricted to degree-granting Graduate programs
Typically Offered: Spring.

CHEM 5835 - Biochemistry of Gene Regulation and Cancer (3 Credits)
Explores the biochemical and molecular aspects of cancer biology. Topics include DNA mutations and repair, gene regulation, oncogenes and tumor suppressors, stem cells and differentiation, and cancer drug development. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4835, BIOL 4835, and BIOL 5835. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
CHEM 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

CHEM 5845 - Molecular Modeling and Drug Design (3 Credits)
Advanced course in biochemistry. An introductory course on modern molecular modeling techniques and their applications to computer-aided rational drug design. Restriction: Graduate standing. Cross-listed with CHEM 4845. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5860 - Bioinorganic Chemistry: Bioinorganic compounds in medicine (3 Credits)
Explore the roles of metals in biochemistry and medicine by studying chemical/physical properties of metal coordinated compounds. The course focus on metal coordination resulting biopolymer folding and the function of macromolecules that is involved into iron cytochromes, zinc and copper enzymes, iron sulfur proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in medicine, and toxicity of inorganic species. Topic is extended to biomedical application such as chemotherapy. Prereq: CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Cross-listed with CHEM 4860. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 3810 or 4810 or 5810 with a C- or higher

CHEM 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

CHEM 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

CHEM 5950 - Master's Thesis (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Term offered: fall, spring, summer. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

CHEM 6000 - Chemistry Seminar (1-3 Credits)
Faculty and student presentations of CU-Denver research projects and other current chemistry topics. Note: All chemistry students are encouraged to attend, but credit is given only to those who present seminars. Requisite knowledge in Undergraduate Physical or Environmental Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 6000 with a B- or higher

CHEM 6001 - Master's Research Seminar (1 Credit)
Students present a formal seminar to the department describing their master's research work. Note: Required for all students completing a thesis-based master's degree; optional for those completing master's projects. Prereq: CHEM 6000 with a B- or higher. Term offered: fall, spring, summer. Max hours: 1 Credit.
Grading Basis: Letter Grade
Prereq: CHEM 6000 with a B- or higher
Typically Offered: Fall, Spring, Summer.

CHEM 6002 - Chemistry Seminar I (1 Credit)
The art of listening to and giving a chemistry seminar. Introduces the chemical literature, the pedagogical techniques of seminar giving, and the critical thinking skills required to understand a technical presentation. Note: Seminar presentations by faculty, outside speakers, and advanced graduate students are analyzed by the students participating in the course. Restriction: Restricted to degree-granting Graduate programs. Max Hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 6003 - Chemistry Seminar II (1 Credit)
Students prepare and give a chemical seminar based on a literature paper. Note: Seminar presentations by students and outside speakers are analyzed by students in the course. Restriction: Restricted to degree-granting Graduate programs. Max Hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting Graduate programs

CHEM 6840 - Independent Study: CHEM (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Chinese (CHIN)

CHIN 5690 - Methods of Teaching Modern Languages (3 Credits)
Studies the methods and practices of teaching modern languages. Note: requirement for those wishing to be teaching assistants in the Department of Modern Languages, and for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, SPAN 5690, FREN 4690, FREN 5690, GRMN 4690, GRMN 5690, CHIN 4690. Term offered: fall, spring, summer. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

CHIN 5691 - Methods of Teaching Modern Languages II (3 Credits)
A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, FREN 4691, FREN 5691, GRMN 4691, GRMN 5691, CHIN 4691. Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

CHIN 5692 - Methods of Teaching Modern Languages III (3 Credits)
A continuation of CHIN 5691. Cross-listed with MLNG 5692, SPAN 5692, FREN 5692, GRMN 5692, CHIN 5692. Term offered: fall, spring, summer. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

CHIN 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

Civil Engineering (CVEN)

CVEN 5025 - Autocad Civil 3d & Advanced Civil Engineering Graphics (3 Credits)
Lectures target civil engineering industry specific site information modeling software and geospatial industry specific geographical information systems software to elevate students’ knowledge of each software to an in-depth understanding. Laboratory exercises will focus on civil drafting and design, producing documentation, and general project workflows. Additional laboratory exercises will focus on geospatial data creation, data management, and cartographic display. Prereq: CVEN 1025.
Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 1025

CVEN 5087 - Engineering Contracts (3 Credits)
Laws met by the practicing engineer, types of contracts, specification writing, laws on contracts, agency, partnership, sales and property, with primary emphasis on rights and duties of the engineer. Cross-listed with CVEN 4087. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 1025

CVEN 5110 - Advanced Structural Classical Analysis (3 Credits)
Understanding classical hand-solved analysis techniques in civil and structural engineering. Methods to be studied include: Moment Area, Conjugate Beam, Virtual Work, Stiffness Method, Force Method, Slope Deflection, and Moment Distribution. Prerequisite: CVEN 3505 with B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prerequisite: CVEN 3505 with B- or better or graduate standing.
CVEN 5111 - Structural Dynamics (3 Credits)
Vibration and dynamic response of simple linear and nonlinear structures to periodic and general disturbing forces. Frequency domain analysis, response analysis of multi-degree-of-freedom systems. Wind and earthquake effects. Prereq: CVEN 3505 with a B- or higher or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3505 with a B- or higher or graduate standing.
CVEN 5112 - Structural Design Loads (3 Credits)
The course will review the probabilistic approach for load determination used in modern building codes from theoretical and applied perspectives. The course is intended to study design dead loads, live loads, snow loads, earthquake loads, wind loads, construction loads, and load combinations for buildings. There will be off-campus events at times other than regular class hours. Other topics may be treated as time permits. Prereq: CVEN 3505 with a C- or higher or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3505 with a C- or higher or graduate standing (GRAD or NDGR).
CVEN 5121 - Intermediate Mechanics of Materials (3 Credits)
Intermediate-level course in the mechanics of deformable bodies. Plane stress and strain; stress-strain relation with emphasis on elastic and inelastic behavior of members, and theories of failure. Discussion of basic methods of structural mechanics, with applications to asymmetric and curved beams, thick walled pressure vessels, torsion of members of noncircular section, and other selected problems in stress analysis. Prereq: CVEN 3121 or MECH 3043 and MATH 3191 and 3200 or MATH 3195 with a C- or higher, or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
(CVEN 3121 or MECH 3043) AND ((MATH 3191 and MATH 3200) or MATH 3195) OR GRAD/NDGR

CVEN 5333 - Surface Water Hydrology (3 Credits)
Fundamentals of hydrology emphasizing surface water processes. Topics include the hydrologic cycle, frequency analysis, drought management, flood routing, rainfall-runoff relationships (rational method, unit hydrograph, and hydrologic software) and hydrologic design. Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: B- or better in CVEN 3333 or graduate standing or instructor permission.

CVEN 5334 - Groundwater Hydrology (3 Credits)
Topics include groundwater occurrence, hydrologic cycle and budget, interactions with surface waters, principles of groundwater flow, well hydraulics, well field design, regional flow systems, water and pollutant chemistry, computer modeling and groundwater management. Emphasis is on quantitative analysis methods for groundwater resource inventory, design and management. Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission.

CVEN 5335 - Vadose Zone Hydrology (3 Credits)
Engineering analysis of the vadose zone, the unsaturated porous media linking the earth surface to groundwater. Darcy's law for flow. Richards equation for moisture content. The advection-dispersion equation for solutes. Analytical solutions and numerical modeling applied to infiltration, evaporation, drainage, and subsurface remediation. Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission.

CVEN 5343 - Open Channel Hydraulics (3 Credits)
Engineering analysis and design of natural and artificial open channels. Application of uniform flow concept to design of erodible and non-erodible channels. Application of energy and momentum principles to conditions of gradually varied flow, spatially varied flow and rapidly varied flow. Prereq: CVEN 3323 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3323 with a C- or better or graduate standing (GRAD or NDGR).

CVEN 5381 - Introduction to Geographic Information Systems (3 Credits)
Provides an overview exposure and experience with various aspects of GIS technology and its uses for natural resource and infrastructure, planning, design and management. This course involves a survey of GIS software and hardware, review of cartographic mapping principles, hands-on applications to environmental impact assessment, municipal facilities management, transportation, water resources and demographics. GIS project management factors are addressed. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381 with a B- or better OR graduate standing.

CVEN 5382 - Geospatial Data Development (3 Credits)
This second GIS course builds on the introductory course and addresses principles and technologies for development and conversion of spatial databases, including photogrammetry, surveying and geodesy, coordinate systems and transformations, and remote sensing. Prereq: CVEN 5381 with a B- or better OR graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381 with a B- or better OR graduate standing.

CVEN 5383 - GIS Analysis – Theory and Practice (3 Credits)
This third course reviews GIS software functions and terminology, including data entry (input, editing), manipulation (projection, merge, window, aggregate), analysis (map algebra, overlay, Boolean, interpolation network, measurements, distance, terrain modeling, statistical analysis), query (spatial, attribute), and display/reporting. Integration of various domain-specific systems analysis models with GIS databases is also addressed. Laboratory activities involve programming applications using available GIS. Prereq: CVEN 5381. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381

CVEN 5384 - GIS Project Management (3 Credits)
This course explains how to build a foundation for GIS project success and deliver results. Topics include data governance, administration of technical infrastructure, managing roles and skills, key leadership concepts, and project management methodologies like Agile/Scrum. Best practices and real world applications are discussed. Also addressed are issues of GIS institutional acceptance, the role of computerized spatial data systems in decision-making, application of planning techniques for accomplishing resource goals, and administrative structures that enhance efficiency of use. Prereq: CVEN 5381 with a B- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381 with a B- or better OR graduate standing.

CVEN 5385 - GIS Relational Database Systems (3 Credits)
Introduces relational database management system concepts with emphasis on GIS. Includes examination of relational database systems from conceptual design through relational schema design and physical implementation. Topics include SQL, database design and implementation for large database systems, transaction management, concurrency control, distributed database management systems and the interaction and progressive integration of GIS technologies and RDBMS technologies. Prereq or Coreq: CVEN 5381 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq or Coreq: CVEN 5381 or graduate standing.
CVEN 5387 - Advanced Remote Sensing (3 Credits)
Addresses remote sensing concepts including 1) imaging sensors and geo-referencing; 2) image processing for radiometric, multi-spectral image enhancement, and multi-sensor image fusion; and 3) multi-spectral image classification, including feature extraction, supervised and unsupervised classification, and extensions to hyper-spectral data. Prereq: CVEN 5382 with a B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5382 with a B- or better OR graduate standing.

CVEN 5390 - Interactive Web Mapping GIS (3 Credits)
This course introduces students to designing, creating, delivering, and using interactive web maps. Many people rely daily on web maps to direct us from point A to point B and more. After starting with a broad introductory background, this is a technical hands-on course in which students use several open source (FOSS) technologies. Prereq: CVEN 5381 or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381 or graduate standing (GRAD or NDGR).

CVEN 5391 - Introduction to Geomatics (3 Credits)
This course presents the concepts of Geomatics along with spatial data, tools, and their connection. This course covers spatial data collection methods, data assessment, and processing. The course also covers projections, methods of coordinate conversion and transformation, and data transfer across different spatial analysis platforms. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CVEN 5392 - Unmanned Aerial Systems (3 Credits)
This course presents concepts and practical methods of using Unmanned Aerial Vehicles for engineering projects. The course covers mission planning, operations, field data collection and processing, and data analysis. Legal and ethical considerations are also covered, as well as the relative costs and benefits of using UAV. Prereq: CVEN 5391. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CVEN 5395 - GPS/GNSS (3 Credits)
This course presents the practical concepts and implications of using GPS/GNSS for engineering projects. The course covers a variety of techniques for field data collection, processing, and data analysis. The course emphasis is on changes that are occurring because of using GPS/GNSS in the field. Prereq: CVEN 5391. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CVEN 5396 - HDS/LIDAR Tools & Data Analyses (3 Credits)
High Definition Surveying (HDS) scanners are extremely reliable and accurate geospatial data collection devices for surveyors, GIS analysts, engineers, and planners. The goal of this unique course is to present the instrumentation and technological principals used in data collection, project phases, data processing and analyses. This course is designed to provide information and practical skills for students wanting to learn how to plan and execute terrestrial LIDAR data collection projects with HDS scanners and HDS data processing software. Max hours: 3 Credits.
Grading Basis: Letter Grade

CVEN 5397 - Unmanned Aerial Systems Data processing (3 Credits)
This course will provide information and practical skills for unmanned aerial systems data processing and analyses. The course focuses on sensor selection, ground control, data processing, and data analyses. Prereq: CVEN 5391 and CVEN 5392. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5391 and CVEN 5392

CVEN 5401 - Introduction to Environmental Engineering (3 Credits)
Introduces students to the broad field of environmental engineering. Topics include essential chemical, biological, and risk assessment concepts needed for addressing environmental problems. Major unit operations and processes used for treating wastewater and potable drinking water. An overview of technologies used for treating particulate and gaseous air pollutants, managing solid wastes, and remediating hazardous wastes. The course also introduces environmental sustainability, green engineering, life cycle assessment and other systems oriented concepts. Includes graduate-level analysis, modeling, or reflection on the refereed literature. Prereq: CHEM 1130, CHEM 2031, or ENGR 1130, and Graduate standing or permission of instructor. Cross-listed with CVEN 3401. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 1130, CHEM 2031, or ENGR 1130 or Graduate standing or instructor permission.

CVEN 5402 - Contaminant Fate and Transport (3 Credits)
Provides unified understanding of fundamental physical, chemical and biological processes that govern the transport and fate of pollutants in environmental systems - water, air and subsurface. The course focuses on multimedia modeling and model solution methods. The course also introduces exposure and risk assessment techniques. Prereq: CHEM 1130, CHEM 2031, or ENGR 1130 or graduate standing or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 1130, CHEM 2031, or ENGR 1130 or Graduate standing or instructor permission.

CVEN 5403 - Environmental Regulations and Management Systems (3 Credits)
Students will receive an overview and understanding of major environmental laws and will be introduced to legal concepts used to develop environmental laws. In addition, students will learn about environmental management systems and their applications to environmental problems. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate standing majors in the College of Engineering, Design and Computing

CVEN 5404 - Water and Wastewater Treatment (3 Credits)
Water and wastewater treatment, including aqueous chemistry (equilibrium, reaction kinetics, redox reactions, and acid-base equilibria), physicochemical processes (sedimentation, filtration, adsorption, membrane separation), and biological processes (applied microbiology, reactor configuration, waste-to-energy technology). Prereq: CHEM 1130, CHEM 2031, ENGR 1130, graduate standing or instructor permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 1130, CHEM 2031, or ENGR 1130 or Graduate standing or instructor permission.
CVEN 5405 - Environmental Life Cycle Assessment (3 Credits)
This course covers cradle-to-grave systems thinking and focuses on quantitative methods for environmental systems modeling, analysis and assessment. The primary method covered is life cycle assessment (LCA). The students will learn the various steps for conducting a process-based LCA including goal and scope definition, life cycle inventory (LCI), life cycle impact assessment (LCIA) and interpretation. For a broader life cycle perspective Economic Input-Output LCA (EIO-LCA) will be introduced. Emphasis will also be placed on framing the LCA analysis around attributional (technology/process) versus consequential (policy/decision) focus. Mathematical techniques for uncertainty & sensitivity analysis, such as Monte Carlo simulations will be covered. Students will be exposed to several LCA case studies. Prereq: Graduate standing or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

CVEN 5406 - Engineering and Science Informatics (3 Credits)
Students will learn applied, basic statistics & probability concepts and provide experience in the correct use and interpretation of those techniques. The course is designed in such a way that any graduate or undergraduate level student wanting to learn data analysis will benefit. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

CVEN 5407 - Complex Systems Methods (3 Credits)
This graduate course introduces nonlinear dynamics, information theory, and network analysis in an environmental engineering, earth sciences, and sustainability context. Techniques will be applied to analyze environmental and weather data in addition to other examples relevant to engineering and critical zone science. Restriction: Restricted to graduate standing or with instructor’s permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

CVEN 5426 - Pipe Network and Sewer Design (3 Credits)
Design of pressurized pipe networks for water supply and sanitary sewers for wastewater collection. Topics include the civil engineering design process, estimation of water and wastewater design loads, and design of pressurized pipe networks and sanitary sewers including pump selection, service reservoirs, lift stations, and relevant software. Design project and field trip required. Includes graduate-level analysis, modeling, or reflection on the refereed literature. Cross-listed with CVEN 4426. Prereq: CVEN 3313 and Prereq or Coreq: ENGR 1100 OR graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3313 and Prereq or Coreq: ENGR 1100 OR graduate standing.

CVEN 5427 - Storm Water System Design (3 Credits)
This course covers urban watershed analysis, design rainfall and hydrologic losses, flood frequency and design event, rational method for peak runoff prediction, street hydraulic capacity and safety, culvert hydraulics, street inlet collection system, and storm sewer system design and flow analysis. Includes graduate-level analysis, modeling, or reflection on the refereed literature. Prereq: CVEN 3323 with a C- or better or graduate standing. Cross-listed with CVEN 4427. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3323 with a C- or better or graduate standing (GRAD or NDGR).

CVEN 5434 - Biological Treatment Processes (3 Credits)
A comprehensive course that covers the theory and application of biological processes used in water quality engineering, with an emphasis on state-of-the-art water pollution control and waste-to-energy technologies. The initial lectures will introduce material on microbial energetics, diversity, and kinetics. The reminder of the course will involve the application of fundamental principles to treatment and energy recovery processes, including bioreactor configurations and design considerations. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate standing majors in the College of Engineering, Design and Computing

CVEN 5460 - Introduction to Sustainable Urban Infrastructure (3 Credits)
This course takes a systems approach to urban infrastructures that deliver critical materials to cities; primarily water, energy, transportation, buildings, and food systems. The focus is on the current state of sustainable development, cities, and infrastructure systems, exploring sustainability strategies and measuring their effectiveness, and analyzing implementation and diffusion of sustainability strategies. Cross-listed with URPL 6399. Prereq: Graduate standing or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CVEN 5464 - Sustainability and Climate Change (3 Credits)
This course explores environmental sustainability in the context of climate change, emphasizing feedbacks and interactions within the climate-ecosystem-water-energy-food system. Course topics include climate and ecosystem modeling, climate data analysis, and testing students’ assumptions and inferences regarding various sustainability topics. Prereq: Graduate standing or instructor permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CVEN 5515 - Introduction to Finite Element Analysis (3 Credits)
Systematic formulation and application of the finite element approximation to the solution of engineering problems. Topics include one- and two-dimensional elasticity problems, two-dimensional heat flow and irrotational fluid flow. Elements considered include triangular and quadrilateral elements formulated by elementary and isoparametric techniques. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CVEN 5520 - Structural Engineering and the Ocean Environment (3 Credits)
This course explores the design of structures for coastal and ocean resilience within the broader context of climate change adaptation. The following subjects will be introduced: coastal and oceanic wave dynamics; hydrodynamic forces on coastal structures and methods for attenuation; analysis and design of floating structures. Prereq: MATH 2421 with a C- or better and CVEN 3121 or MECH 3043 with a C- or better OR graduate standing (any program, including non-degree). Cross-listed with CVEN 4520. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MATH 2421 with a C- or better and CVEN 3121 or MECH 3043 with a C- or better OR graduate standing (any program, including non-degree).

CVEN 5610 - Engineering and Critical Zone Science (3 Credits)
Restriction: Restricted to graduate students in the College of Engineering, Design and Computing

CVEN 5620 - Environmental and Sustainability Engineering (3 Credits)
This course explores environmental sustainability in the context of climate and ecosystem modeling, climate data analysis, and testing students’ assumptions and inferences regarding various sustainability topics. Prereq: Graduate standing or instructor permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the College of Engineering, Design and Computing

CVEN 5640 - Water and Environmental Sustainability (3 Credits)
This course explores environmental sustainability in the context of climate and ecosystem modeling, climate data analysis, and testing students’ assumptions and inferences regarding various sustainability topics. Prereq: Graduate standing or instructor permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the College of Engineering, Design and Computing

CVEN 5680 - Introduction to Urban Water Systems (3 Credits)
This course explores the design of structures for coastal and ocean resilience within the broader context of climate change adaptation. The following subjects will be introduced: coastal and oceanic wave dynamics; hydrodynamic forces on coastal structures and methods for attenuation; analysis and design of floating structures. Prereq: MATH 2421 with a C- or better and CVEN 3121 or MECH 3043 with a C- or better OR graduate standing (any program, including non-degree). Cross-listed with CVEN 4520. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MATH 2421 with a C- or better and CVEN 3121 or MECH 3043 with a C- or better OR graduate standing (any program, including non-degree).
CVEN 5540 - Masonry Design (3 Credits)
The course will review the probabilistic approach for load determination used in modern building codes from theoretical and applied perspectives. The course is intended to study design dead loads, live loads, snow loads, earthquake loads, wind loads, construction loads, and load combinations for buildings. There will be off-campus events at times other than regular class hours. Other topics may be treated as time permits. Prereq or Coreq: CVEN 4585 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq/Coreq: CVEN 4585 or graduate standing.

CVEN 5550 - Highway Bridge Design (3 Credits)
Design of highway bridges in accordance with the AASHTO LRFD Bridge Design Specification. Topic coverage includes bridge planning, construction materials in bridges, bridge systems, design loads, structural modeling and analysis, design of concrete deck system, and design of concrete and steel superstructures. Prereq: CVEN 4575 and CVEN 4585 with a C- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 4575 and CVEN 4585 with a C- or better or graduate standing.

CVEN 5565 - Advanced Timber Structure Design (3 Credits)
Design of wood framing systems including beams, columns, trusses, and diaphragms. Wood as a material, framing terminology, connection design, structural composite lumber, glued-laminated members, and plywood are covered. The course will emphasize on preparing students for a career in structural engineering. Prereq: Graduate Standing or (CVEN 3505 and 3141 with a C- or higher and Civil Engineering major). Cross-listed with CVEN 4565. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prerequisite: Graduate Standing or (CVEN 3505 and 3141 with a C- or higher and Civil Engineering Majors.)

CVEN 5575 - Advanced Topics in Structural Steel Design (3 Credits)
Plate buckling, plate girder design and other topics determined by class interest. Prereq: CVEN 4575 with a C- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 4575 with a C- or better or graduate standing.

CVEN 5585 - Advanced Topics in Reinforced Concrete (3 Credits)
Advanced topics relating to design and analysis of reinforced concrete structures. Prereq: CVEN 4585. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 4585

CVEN 5590 - Design of Prestressed Concrete (3 Credits)
To learn the basic concepts of analysis and design of prestressed concrete, which is reinforced concrete in which steel is tensioned against the concrete, thereby introducing compression in concrete and hence overcoming the tensile weakness of concrete relative to its compressive strength. Cross-listed with CVEN 4590. Prereq: CVEN 4585 with a C- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 4585 with a C- or better or graduate standing.

CVEN 5591 - Design of Composite Structures (3 Credits)
The objective of this course is to provide engineering students with an overall awareness of the application and design of composite structures. Practical examples are discussed based on theory. Prereq: CVEN 4585 with a C- or better or graduate standing. Cross-listed with CVEN 4591. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 4585 with a C- or better or graduate standing.

CVEN 5592 - Computer-Aided Structural Analysis and Design (3 Credits)
The objective of this course is to introduce students to the fundamentals of computer-aided structural analysis and design. The course emphasizes different theoretical formulations of computational mechanics and the practical use of computer programs used worldwide in the structural engineering profession. Emphasis is also placed on techniques to check the reliability and quality of solutions. Prereq: CVEN 3505 with a C- or better or graduate standing. Cross-listed with CVEN 4592. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3505 with a C- or higher or graduate standing (GRAD or NDGR).

CVEN 5592 - Advanced Highway Design (3 Credits)
This course delves into the art and science of designing sustainable and context sensitive street and highway facilities. Topics include road classification, transportation planning, road alignments, cross-section design, bicycle and pedestrian facilities, intersections, and street network design. Such details are a focus of the course; however, the overarching theme reflects upon the social, economic, and environmental implications of highways and as well as proper integration into the overall transportation system. Prereq: CVEN 3602 and CVEN 3718 with a B- or better or graduate standing or instructor permission. Cross-listed with CVEN 4602. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3602 and CVEN 3718 with a B- or better or graduate standing or instructor permission.
Typically Offered: Fall.

CVEN 5611 - Transportation Engineering Statistics (3 Credits)
Covers statistical analysis methods for engineering studies in general, and for highway accident and traffic flow data in particular. Topics include data needs, sampling designs, survey methods, hypothesis testing, tests of proportions, non-parametric tests, analysis of variance, multivariate regression, and other tests of fit. Introductory overview of state and federal accident databases. Comparisons of accident rates by highway type, vehicle speeds, vehicle types, weather conditions and other factors also presented. Restriction: Graduate standing majors in the College of Engineering, Design and Computing or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3602 and CVEN 3718 with a B- or better or graduate standing or instructor permission.
Restriction: Restricted to graduate standing majors in the College of Engineering, Design and Computing

CVEN 5612 - Traffic Impact Assessment (3 Credits)
Covers (1) procedures to satisfy state and local requirements for transportation impact studies, (2) methods to perform trip generation, distribution, and traffic assignment for impact analyses, and (3) analysis of transportation impacts on residential communities, mode choice, regional business (downtown or suburban), peak and off-peak travel times, noise, safety, parking and pedestrians. A course project requires students to develop an application of analysis software to a case study area. Prereq: CVEN 3602 with a B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3602 with a B- or better or graduate standing.

CVEN 5621 - Highway Capacity Analysis (3 Credits)
Covers the principles and applications of highway capacity analysis for freeways and arterials, ramps and interchanges, weaving and merge sections, signalized and unsignalized intersections, roundabouts, pedestrian areas and transit. Emphasis is on level-of-service analysis procedures in the Highway Capacity Manual, although other approaches are also discussed. Additional topics include roadway characteristics, vehicle dynamics, human factors, speed and volume studies, travel time surveys and traffic flow characteristics. Prereq: CVEN 3602 with a B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3602 with a B- or better or graduate standing.

CVEN 5622 - Traffic Operations and Control (3 Credits)
Covers principles of traffic flow and analysis methods for surface street traffic systems. Emphasis is on network modeling and simulation of coordinated signal systems, together with unsignalized intersections and freeway junctions using modern software tools. Additional topics include alternative signal timing plans, signal controllers, vehicle detection systems for volume, speed, occupancy and ramp metering. A course project requires students to develop and apply modeling software to a case study area. Prereq: CVEN 5621 with a B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5621 with a B- or better or graduate standing.

CVEN 5631 - Transport Modeling and Big Data (3 Credits)
This course is an introduction to the models, frameworks and techniques used in estimating demand for passenger travel across modes and regions. The goal is to provide you an overview of the different steps involved in traditional travel demand forecasting methods and then delve into newer "big" data sources and methods that will allow us to observe and analyze travel in completely new ways. We will also briefly cover sampling techniques and survey design as part of data collection for estimation of travel demand. Prereq: Graduate standing or any statistics course with a C- or better(MATH 2830, 3800, CVEN 3611, ELEC 3817, or BANA 2010). Cross-listed with CVEN 4631. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing or any statistics course with a C- or better(MATH 2830, 3800, CVEN 3611, ELEC 3817, or BANA 2010).

CVEN 5633 - Sustainable Transportation Systems (3 Credits)
This course examines notable topics in sustainable transportation: demystifies conventional transportation engineering methods; and explores empirical examples of why such methods are often misguided. The intent is to enlighten engineering students and help support planning/policy students interested in transportation sustainability. Restriction: Graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CVEN 5650 - Urban Street Design (3 Credits)
This course delves into the art and science of designing sustainable and context sensitive street and highway facilities. This course is intended to intersect with CVEN 4602/5602 – Advanced Highway Design, which covers rural highway design. Topics for this course will focus on urban street design principles, including transportation planning, bicycle and pedestrian facilities, intersections, and street network design, as well as techniques and software for coordinated signal timing. Such details are a focus of the course; however, the overarching theme reflects upon the social, economic, and environmental implications of highways and as well as proper integration into the overall transportation system. Prereq: CVEN 3602 with a C- or higher, recommend B- or higher. Prereq or coreq: CVEN 4602 or CVEN 5602. Cross-listed with CVEN 4650. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3602 with C- or higher and Prereq or Coreq: CVEN 4602 or CVEN 5602; OR Graduate standing(Grad/NDGR).

CVEN 5662 - Transportation System Safety (3 Credits)
This is a graduate-level course on road safety that will: investigate contemporary safety analysis techniques; highlight the disconnect between the current safety paradigm and actual safety outcomes; cover drive, bicyclist and pedestrian safety concerns; and discuss notable efforts such as Vision Zero. Restriction: Graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CVEN 5682 - Pavement Design (3 Credits)
This course addresses both the structural analysis and design methods for pavements. Emphasis will be on mechanistic analysis. It covers very broad areas of properties of pavement materials such as concrete and hot-mix asphalt, base course, and subgrade; traffic loads, the design and performance of flexible pavements and rigid pavements; and drainage. Computer codes included in the textbook package will be used in the course, mainly because of its availability without additional cost. Other topics may be treated as time permits. Prereq: CVEN 3141, 3505, and 3708/3718 with a C- or higher, OR graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3141, CVEN 3505, and CVEN 3718 with a C- or higher OR graduate standing.

CVEN 5708 - Advanced Soils Engineering (3 Credits)
A unified treatment of the foundation of soil engineering analysis. Topics include stress-strain-strength of soils; generalized limiting equilibrium analysis; stability analyses of earth-retaining structures, slopes, and shallow foundations; probabilistic approach of stability assessment; computation of settlement of foundations in sand and clay and time-rate of consolidation and critical state concept. Special attention is directed toward the illustration of theory through practical examples. Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate Standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate Standing.
CVEN 5718 - Engineering Properties of Soils (3 Credits)
Engineering properties of soils, including index properties, permeability, stress-strain behaviors, shear strength, compressibility, critical state soil models and their application in interpreting soil behaviors. Attention also is directed to laboratory and in situ tests to examine the validity of shear strength and compressibility theories and their application to stability and settlement analysis. Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate Standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate Standing.

CVEN 5719 - Design and Construction of Geosynthetic-Reinforced Soil Structures (3 Credits)
Theory of reinforced soil; mechanical and hydraulic properties of geosynthetics; soil-geosynthetic interaction behavior; design concepts of GRS structures; design and construction of GRS retaining walls; design and construction of GRS embankments and slopes; design and construction of GRS foundations. Prereq: CVEN 5708. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5708

CVEN 5738 - Foundation Engineering (3 Credits)
Methods of subsurface exploration and sampling of soils, lateral support in open cuts, control of groundwater, analysis and design of shallow foundations, analysis and design of deep foundations, bridge abutments and cofferdams, underpinning, and application of modern computational techniques to analysis and design of foundations. Cross-listed with CVEN 4738. Prereq: CVEN 3141 and 3718 with a C- or higher. Restriction: Restricted to Civil or Construction Engineering majors or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3141 and 3718 with a C- or higher. Restriction: Restricted to Civil or Construction Engineering majors. OR Graduate standing.

CVEN 5758 - Foundations on Expansive Soils (3 Credits)
Expansive soils swell upon wetting because of the swelling nature of constituent clay minerals, particularly montmorillonite. This course studies swelling nature of different clay minerals, effects of wetting, swelling potential, swelling pressures, and design of different foundation systems. Prereq: CVEN 4738, B.S.C.E. or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CVEN 5798 - Dynamics of Soils and Foundations (3 Credits)
Principles of vibrations of, and wave propagation in, elastic, homogeneous, isotropic media; laboratory and in situ measurements of soil properties; applications of these principles and properties to the design of foundations subject to dynamic loading generated by machinery, earthquakes, or blasts. Prereq: CVEN 5708, 5718, and graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5708, 5718, and Graduate Standing

CVEN 5800 - Special Topics (3 Credits)
Topical courses offered once or on irregular intervals. Typical topics include: computer-aided structural engineering, pre-stressed concrete, non-matrix structural analysis, geotechnical aspects of hazardous waste management, geographic information systems and facility management, groundwater hydrology, engineering project management, structural planning, engineering practice, spreadsheet application, field instrumentation, hazardous wastes engineering, bridge super and substructure design, advanced steel design, hydraulic transients, foundations – expansive soils, sludge process design. Prereq: Variable. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

CVEN 5840 - Independent Study (1-6 Credits)
Available only through approval of the graduate advisor. Subjects arranged to fit needs of particular student. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

CVEN 5939 - Internship (1-3 Credits)
Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 3.

CVEN 5950 - Master’s Thesis (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.

CVEN 5960 - Master’s Report (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.

CVEN 5990 - Doctoral Dissertation (1-15 Credits)
Available only through approval of the graduate advisor. Subjects arranged to fit needs of particular student. Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 15.
Additional Information: Report as Full Time.
Commodities (CMDT)

CMDT 6240 - Environmental, Social, Governance (ESG) Trends in Energy & Commodities (3 Credits)
This course will introduce students to the fundamental concepts and terminology associated with Environmental, Social, Governance (ESG). The evolution of climate change and ESG will be reviewed in terms of policies and metrics. The critical need commodities (agricultural, energy, and minerals, and metals) are studied to support more realistic views and opinions on climate change and ESG. An overarching goal is that students completing the course will have a sound understanding of ESG related policies and standards, the measuring metrics, and the benefits and costs associated with potential future trends. Cross-listed with GEMM 6240. Repeatable. Term offered: fall, spring. Max hours: 6 Credits. Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

CMDT 6490 - Commodity Trading (3 Credits)
This is a co-listed class with the J.P. Morgan Center for Commodities and the Finance Department. This course focuses on how securities and futures contracts are designed and traded including trading exchange operations, regulation, trading mechanisms and processes. Students will learn the theory and practice of securities and futures contract trading with a focus on hands-on trading experience using industry software (CQG and Bloomberg) as well use of data sources (Morningstar). In this course, we will review the origins of liquidity, volatility, price efficiency, and trading profits. Next we will cover a host of topics concerning equity and commodity trade execution strategies, such as why and how investors trade, what and when investors profit from investing and speculating, the key principles of high-frequency trading and investor’s overconfidence, why market institutions are organized as they are, and the role of public policy in the markets. Max hours: 3 Credits.
Grading Basis: Letter Grade

CMDT 6582 - Commodity Supply Chain Management (3 Credits)
This course introduces the design, analysis, management, and control of supply chains as applied to commodities. The course covers integration of processes and systems, relationship management of upstream and downstream supply chain players, and commodity- specific supply chain strategies. Cross-listed with CMDT 4582. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School.

CMDT 6682 - Commodities Hedging (3 Credits)
This course is a practical introduction to commodity markets. Students will learn how commodities are managed in the global markets from a hedgers, speculators and arbitrageurs point of view. Understanding the relationships between commodities and the global economy will be investigated. In addition, commodities will be looked at as an asset class and cross-asset relationships will be studied. Students will be introduced to futures and options markets analysis deploying strategies professional traders use in diverse market conditions. Students will work with the various trading software throughout the course and gain proficiency in real-world trading. Note: Students cannot receive credit for both CMDT 6482 or FNCE 6482. Cross-listed with CMDT 4682. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School.
Typically Offered: Spring.

CMDT 6710 - Carbon Markets: Navigating the Future of Business (3 Credits)
Climate change is a fundamental threat to global economic development. Both public and private business practices and consumer behaviors will drive how economies will decarbonize and the extent of future impacts. Consumers, investors, and governments will increasingly look toward markets for innovation and create a low-carbon economy. This course will introduce carbon markets in all their forms and elaborate on policies, trade, reporting, and tracking. This course will demonstrate the value of carbon management to the bottom line, allowing participants to apply learnings to new and developing business strategies practically. Cross-listed with GEMM 6710. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring.

CMDT 6782 - Commodity Data Analysis (3 Credits)
This course is an applied introduction commodity data analysis. Students will learn how to analyze commodity prices using quantitative and qualitative techniques. Relationships between commodities and the global economy will be investigated. In addition, commodities will be looked at as an asset class and cross-asset relationships will be studied. Students will be introduced to forecasting techniques and be able to develop and evaluate various forecasting models. Students will work with the open source Python software throughout the course and gain proficiency. Topics include: regression analysis, univariate models, non-stationarity, vector autoregressions, cointegration, volatility modeling, principal component analysis, Python programming, and other topics time permitting. Cross-listed with CMDT 4782. Max hours: 3 Credits.
Grading Basis: Letter Grade
CMDT 6802 - Foundations of Commodities (3 Credits)
This course introduces students to the physical aspects of commodities and connects them to the financial markets in which commodities are traded. Fundamental concepts and terminology necessary for understanding commodity production, transportation, economics, financial analysis and marketing are described. Supply chains for several specific commodities are reviewed in detail, as examples of the production and market structure knowledge needed to be successful professional participants in commodity trading capacities. The course also serves a foundation for more focused education in the specific commodity sectors, as well as the applied use of marketing and financial trading concepts learned in other courses. Cross-listed with CMDT 4802 and FNCE 4802/6802. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

CMDT 6840 - Commodity Independent Study (1-3 Credits)
Independent study in the field of commodities. Topic of study varies according to project. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

Communication (COMM)

COMM 5000 - Communication and Sport (3 Credits)
While sports are often sought for entertainment, they are more than just a game: they both mirror and shape our understandings of gender, race, class, sexuality, ability, nationality and more. This class addresses these issues while also thinking about sports in global frameworks. Cross-listed with COMM 4000. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

COMM 5021 - Perspectives on Rhetoric (3 Credits)
Rhetorical criticism is the study of how language works to persuade. This class surveys major thinkers to offers students a range of methods, which are then applied to address specific case studies. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4021. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

COMM 5040 - Communication, Prisons, and Social Justice (3 Credits)
This course examines the U.S. prison-industrial complex and enables students to envision ways of reducing crime and improving democracy by engaging in community service. Note: This course fulfills the communication department's exit class requirement. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor.
COMM 2020 is recommended preparation for this course. Cross-listed with COMM 4040. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

COMM 5051 - Advanced Strategic Communication (3 Credits)
Provides senior-level training in hands-on communication environments where targeted messaging seeks specific outcomes. All students complete projects for community group, media outlet or corporation they choose. Students will not receive credit for this class if they have already received credit for COMM 5640. Cross-listed with COMM 4051. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

COMM 5081 - Introduction to Digital Studies (3 Credits)
Develop marketable skills such as building websites, making interactive maps, recording podcasts, and analyzing data while also studying the cultural and ethical dimensions of these technologies. Cross-listed with COMM 3081, HIST 3260, and HIST 5260. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

COMM 5152 - Religion & Communication (3 Credits)
This course focuses on the dynamics between religion, culture, and communication and how these have led to intercultural peace, centuries of war, and/or different visions of belonging. This class addresses these dynamics to improve intercultural dialogue and conflict resolution processes, foregrounding the search for justice. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with COMM 4152, INTS 4152, RLST 4152, INTS 5152, and RLST 5152. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5221 - Research Methods: Qualitative (3 Credits)
This class applies qualitative research methods to human communication practices, including the processes of designing qualitative studies, collecting data, analyzing and interpreting data, and reporting results. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4221. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5240 - Organizational Communication (3 Credits)
Churches, schools, companies, NGOs, the government—these are all organizations. This class addresses the theories of how organizations succeed or fail and stresses functional workplace skills and practices. Restriction: Restricted to Graduate and Graduate Non-Degree majors; Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4240. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
COMM 5255 - Negotiations and Bargaining (3 Credits)
This class engages Principled Negotiation theory and practice and involves numerous negotiation simulations. These are skills-based exercises that emphasize communication strategies and traverse a number of different negotiation contexts. Through the simulations, both group and dyadic work is practiced. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4255. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5260 - Communication and Conflict (3 Credits)
Sometimes it seems like our days are full of conflict—why is that?
This class studies the influence of communication on intrapersonal, interpersonal, intragroup, and intergroup conflict situations, and offers communication skills for building better relationships. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4260. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5270 - Intercultural Communication (3 Credits)
The age of globalization means we are all neighbors, working across national boundaries and even continents. This class examines the philosophies, processes, problems, and potentials unique to communicating across cultures to address issues of social justice and ethical intercultural practices. We will consider the important role of context in interactions across cultures and subcultures, globally, transnationally, and within the U.S. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring, summer. Cross-listed with COMM 4270 and INTB 6270. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5282 - Environmental Communication (3 Credits)
Our world is shaped by policies and practices that threaten life on Earth. With such high stakes for making a more livable, just, and equitable future, this course examines storytelling, naming, framing, and the other communication concepts that are essential for navigating our shared planet. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4282. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5290 - Intercultural Communication (3 Credits)
The age of globalization means we are all neighbors, working across national boundaries and even continents. This class examines the philosophies, processes, problems, and potentials unique to communicating across cultures to address issues of social justice and ethical intercultural practices. We will consider the important role of context in interactions across cultures and subcultures, globally, transnationally, and within the U.S. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring, summer. Cross-listed with COMM 4270 and INTB 6270. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5292 - Communication, China, & the US (3 Credits)
This course provides a senior-level opportunity to study how China and the USA have spoken about and to each other, from the Opium War through the Cyber Wars, thus situating both nations in a world of globalizing communication and interdependence. Note: this course fulfills the communication department’s exit class requirement. This course may count for the International Studies major or minor. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Cross-listed with COMM 4430. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5300 - Health Communication (3 Credits)
This class examines the role of communication in a wide range of health contexts. Topics include cultural constructions of health and illness, public health communication campaigns, client-provider interactions, telemedicine, community-based health programs, and medical journalism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4500. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5500 - Rhetorics of Medicine & Health (3 Credits)
This senior seminar explores why it matters how we talk and think about medicine and health. Case studies explore contagion, contested illnesses, the body, death, and biopower. The course requires extensive discussion of readings and an original research project. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with COMM 4550. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5557 - Crisis and Emergency Communication (3 Credits)
This course examines strategic communication practices throughout the three stages of a crisis or emergency event. Special emphasis is placed on crisis planning, emergency messaging, media relationships, image restoration, ethical responses, and organizational learning. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with COMM 4557, PUAD 4620, and PUAD 6620. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5558 - Digital Health Narratives (3 Credits)
This course blends readings, discussions, and activities about health narratives with digital media production skills to teach students how to create compelling digital stories about health-related topics. Students produce digital messages for the community group of their choosing. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Cross-listed with COMM 4558. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5575 - Designing Health Messages (3 Credits)
Examines the roles of communication in the design and impact of health messages/campaigns. We will design and assess health communication messages/campaigns in a participatory, process#oriented way using varied communication tools. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with COMM 4575. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5580 - Health Communication (3 Credits)
This class examines the role of communication in a wide range of health contexts. Topics include cultural constructions of health and illness, public health communication campaigns, client-provider interactions, telemedicine, community-based health programs, and medical journalism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4500. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5590 - Rhetorics of Medicine & Health (3 Credits)
This senior seminar explores why it matters how we talk and think about medicine and health. Case studies explore contagion, contested illnesses, the body, death, and biopower. The course requires extensive discussion of readings and an original research project. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with COMM 4550. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5600 - Health Communication (3 Credits)
This class examines the role of communication in a wide range of health contexts. Topics include cultural constructions of health and illness, public health communication campaigns, client-provider interactions, telemedicine, community-based health programs, and medical journalism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4500. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 5650 - Rhetorics of Medicine & Health (3 Credits)
This senior seminar explores why it matters how we talk and think about medicine and health. Case studies explore contagion, contested illnesses, the body, death, and biopower. The course requires extensive discussion of readings and an original research project. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with COMM 4550. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
COMM 5601 - You Are What You Eat: Food as Communication (3 Credits)
Food is a source of identity, culture, and belonging. It communicates heritage and belonging. Because food provides communication channels for much of who we are as individuals, as a community, and as a society, this course analyzes food as a form of communication. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Cross-listed with COMM 4601. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

COMM 5660 - Queer Media Studies (3 Credits)
Queer Media Studies, a discussion-based seminar, investigates the history of a variety of LGBTQ+ media — including news, film, television, comics, games, music, and the Internet. Students engage in a variety of media projects to explore LGBTQ+ histories, queer aspects of media production, reception, and media messages. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with COMM 4660, WGST 4660, WGST 5660. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 5682 - Political Communication (3 Credits)
Examines the communication processes involved in mediated political events. Topics include the stages of the campaign process, media coverage of the political campaign process, and literacy skills needed to understand political advertising. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll by permission of instructor. Cross-listed with COMM 4682. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 5710 - Topics in Communication (1-3 Credits)
Special classes for faculty-directed experiences examining communication issues and problems not generally covered in the curriculum. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll by permission of instructor. Cross-listed with COMM 4710. Term offered: fall, spring. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 5720 - Dynamics of Global Communication (3 Credits)
This class explores global communication dynamics by analyzing the relationships between world media, international events, economics, and geopolitics. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with COMM 4720. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 5722 - Communicating Latinx Cultures (3 Credits)
Communicating Latina/o/x Cultures centers historical and contemporary vernacular and institutional discourse and narratives about, by, and for Latina/o/x people and communities. Drawing on theories, methods, and practices to understand the complexities of Latina/o/x cultures and lives, we will investigate how different actors and activists express and experience borders, migration, dispossession, citizenship, colonialism/coloniality, colorism, white supremacy, environmental racism (including anti-Blackness), mono- and multilingualism, self-determination struggles, power, representation, resistance, and mutual support networks for alternative worldmaking. To situate these concepts and concerns, we will explore contexts and places ranging from Colorado to the Caribbean. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Term Typically Offered: Spring. Cross-listed with COMM 4722, ETST 4722, and ETST 5722. Max hours: 3 credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

COMM 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term Typically Offered: Fall, Spring, Summer.

COMM 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term Typically Offered: Fall, Spring, Summer.

COMM 5939 - Internship (1-6 Credits)
Applies communication or technical communication concepts and skills in supervised employment situations. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term Typically Offered: Fall, Spring, Summer.
COMM 5995 - Global Study Topics (1-15 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Term offered: fall, spring, summer. Max hours: 15 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

COMM 6013 - Introduction to Graduate Work in Communication (3 Credits)
Designed to familiarize students with the philosophical, ideological, and methodological bases of study in communication. Note: Required of all graduate students in M.A. program in communication. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 6400 - Communication, Globalization and Social Justice (3 Credits)
This course offers students an introduction to the intersections of communication as a discipline, globalization as a world process, and social justice as a contested, ever-evolving goal of activists. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 6700 - Thesis and Project Practicum (3 Credits)
Focuses on strategies of research design and writing for undergraduate students working on theses for Latin honors. Students pick their own research topics. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Cross-listed with COMM 4700. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 6711 - Topics in Communication (1-15 Credits)
Special classes for faculty-directed experiences examining communication issues and problems not generally covered in the curriculum. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 6950 - Master's Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

COMM 6960 - Master's Project (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

Computer Science (CSCI)

CSCI 5010 - Software Architecture (3 Credits)
This course will focus on two major areas. The first part of the course will cover Software Requirements Analysis and Development as well as Software Architecture and the Soft Skills needed by high level Software Architects. The second part of the course will cover how Persistent Data fits into different types of Software Systems. The primary focus of the second part of the course will be on incorporating larger scale Enterprise Data Systems into Software Systems and will be an application of the first part of the course material. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5011 - Software Project Management Support (3 Credits)
Large Software Systems must be Planned, Scheduled, and Staffed. To accomplish these tasks Software Engineers must understand the Software Architecture, the Software System Dependencies, Effort Estimation and the various Project Development Models that might be used. This course will look at different Project Models, Project Management Needs, and various Effort Estimation tools and techniques. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5098 - Computer Science for Bioscientists (3 Credits)
Provides a broad but detailed overview of the computer science field to graduate students in the biosciences, with emphasis on web technologies, programming languages, algorithms and database systems. No credit for CS graduate students. Prereq: Working knowledge of programming language (e.g., Java). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

CSCI 5101 - Applied Number Theory (3 Credits)
Every year, Topics include divisibility, prime numbers, congruences, number theoretic functions, quadratic reciprocity, special diophantine equations, cryptography, computer security, and engineering applications.
Cross-listed with CSCI 4110. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5172 · Complexity and Problem Solving (3 Credits)
Theoretical and practical aspects of solving complex problems, in
particular, but not limited to, NP-complete and PSPACE-complete
problems. Various heuristic and approximation algorithms, including
greedy, ant, and Genetic Algorithms will be studied. This course is by
instructor's permission only. Restriction: Restricted to students with
graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5173 · Computational Complexity and Algorithms (3 Credits)
A solid, in-depth theoretical foundations in computing, computational
complexity, and algorithmics. Various algorithms, including both discrete
and non-discrete problem domains. NP-complete and other complete
classes of problems/languages. Restriction: Restricted to students with
graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5203 · Simulation (3 Credits)
This class in simulation spans three different disciplines: Computer
Science, Modeling and Simulation, and Analysis. These will have
approximately equal weight with respect to this class, but with more
breadth in the Modeling and Simulation and Analysis disciplines and
more depth in the supporting Computer Science topics. Excursions are
planned for agent-based simulations, knowledge-based simulations, and
animation and visualization of simulation results. Restriction: Restricted
to students with graduate standing. Cross-listed with CSCI 4203. Max
hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5211 · Mobile Computing and Programming (3 Credits)
This course contains two main simultaneous tracks, namely mobile
computing and mobile programming. A series of lectures on various
aspects of mobile computing provides an understanding of challenges
and solutions in design and implementing mobile systems. The main
topics include mobile sensing, human mobility and its technical
implication. Students are expected to have undergraduate knowledge
of operating systems and computer networks. Restriction: Restricted
to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5217 · Information Theory (3 Credits)
Introduces information theory and its application in computer science,
communication theory, coding and applied mathematics. Entropy, mutual
information, data compression and storage, channel capacity, rate
distortion, hypothesis testing, Error detecting and correcting codes, block
codes and sequential codes. Restriction: Restricted to students with
graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5220 · Social Networks & Informatics (3 Credits)
The main topics covered by the course will include 1) social network
data structures, 2) basic random graph models and graph algorithms; 3)
recommendation systems and predictive models 4) query suggestion and
content analysis 5) link analysis and community detection 6) the spread
of information, disease, and influence on networks. This course builds a
solid foundation in social informatics technology. Restriction: Restricted
to students with graduate standing. Cross-listed with CSCI 4220. Max
hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5255 · Object Oriented Design (3 Credits)
Software system design using object-oriented techniques, responsibility
driven design and agile development practices. Topics include objects,
classes, interfaces, inheritance, polymorphism, exception handling and
testing. Restriction: Restricted to students with graduate standing. Max
Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5407 · Security & Cryptography (3 Credits)
A broad overview of cryptography and its relation to computer security.
Topics include basic standard cryptographic techniques, a history of
codes and ciphers, RSA, DES, AES, Elliptic Curve Cryptography, ElGamal,
and applications to current and future technologies. Restriction:
Restricted to Graduate Standing. Cross-listed with CSCI 7407 and
CSCI 4407. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5408 · Applied Graph Theory (3 Credits)
Introduces discrete structures applications of graph theory to
computer science, engineering and operations research. Topics include
connectivity, coloring, trees, Euler and Hamiltonian paths and circuits.
Matching and covering problems, shortest route and network flows.
Restriction: Restricted to students with graduate standing. Note:
Expected knowledge of abstract mathematics including discrete
structures. Cross-listed with MATH 4408. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5409 · Graph Theory and Graph Algorithms (3 Credits)
Studies geometric graphs and other geometric objects, both analysis
and algorithmic construction, leads to interesting connections among
VLSI design, graph theory and graph algorithms. Studies a subset of the
recent literature, with special emphasis on visibility graphs, thickness
of graphs, graph coloring and the surprising and elegant connections
among them all. Other topics are introduced as time permits. Prereq:
CSCI 5408. Restricted to students with graduate standing. Max Hours: 3
Credits.
Grading Basis: Letter Grade
Prereq: CSCI 5408. Restricted to student with graduate standing.

CSCI 5411 · Computational Geometry (3 Credits)
Many practical and aesthetic algorithmic problems have their roots
in geometry. Applications abound in the areas of computer graphics,
robotics, computer-aided design, and geographic information systems,
for example. A selection of topics from convex hull, art gallery problems,
ray tracing, point location, motion planning, segment intersection,
Voronoi diagrams, visibility and algorithmic folding will be covered. Cross-
listed with CSCI 4411. Restriction: Restricted to students with graduate
standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5446 - Theory of Automata (3 Credits)
Studies the relationships between classes of formal languages (regular, context-free, context-sensitive, phrase-structure) and classes of automata (finite-state, pushdown, Turing machines). Additional topics include decidability and computability issues. Restriction: Restricted to students with graduate standing. Note: Expected knowledge of algorithms equivalent to CSCI 3412.Cross-listed with MATH 5446. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5451 - Algorithms (3 Credits)
Advanced design and analysis techniques: dynamic programming, greedy algorithms, amortized analysis. Advanced data structures: Fibonacci heaps, union-find data structures. Study of variety of special topics, which may include: graph algorithms, optimization problems, Fast Fourier Transform, string matching, geometric algorithms, NP-completeness and approximation algorithms. Restriction: Restricted to students with graduate standing. Note: Expected knowledge of algorithms equivalent to CSCI 3412. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5455 - Data Mining (3 Credits)
Introduces concepts, techniques and methodologies to discover patterns in data. Topics include (but are not limited to) data preprocessing and cleansing, data warehousing, pattern mining, classification, prediction, cluster analysis, outlier detection, and online data analytics. Restriction: Graduate Standing. Cross-listed with CSCI 4455. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5542 - Neural Networks (3 Credits)
Parallel distributed representations, dynamics of Hopfield-style networks, content addressable memories, and Hebbian learning are the major topics of the first half. The last half consists of simulated annealing back propagation, competitive learning, and self-organizing networks. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5551 - Parallel and Distributed Systems (3 Credits)
Examines a range of topics involving parallel and distributed systems to improve computational performance. Topics include parallel and distributed programming languages, architectures, networks, algorithms and applications. Prereq: Graduate standing. Cross-listed with CSCI 7551. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5552 - Advanced Topics in Parallel Processing (3 Credits)
Examines the advances of sequential computers for gaining speed and application of these techniques to high-speed supercomputers of today. Programming methodologies of distributed and shared memory multiprocessors, vector processors and systolic arrays are compared. Performance analysis methods for architectures and programs are described. Cross-listed with CSCI 7552. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5559 - Database Systems (3 Credits)
Introduces database system concepts, with examination of relational database systems from conceptual design through relational schema design and physical implementation. Topics include database design and implementation for large database systems, transaction management, concurrency control, object-oriented and distributed database management systems. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5565 - Introduction to Computer Graphics (3 Credits)
Introduces two and three dimensional computer graphics. Topics include scan conversion, geometric primitives, transformation, viewing, basic rendering, and illumination. Emphasis is on the programming using C and C++ Open GL. Cross-listed with CSCI 4565. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5570 - Virtual and Augmented Reality (3 Credits)
This course covers the fundamental concepts and technologies of virtual and augmented reality, and it introduces recent advances in the field. Topics include 3D user interaction, immersive environments, tele-presence, mobile AR, human perception, and VR/AR applications. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 4570. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5573 - Operating Systems (3 Credits)
Students study the principles of computer operating systems and their essential components. Team projects expose students to a variety of system design issues as they relate to the functionality and performance of the system. Topics include I/O devices, Disk Scheduling, File System Organizations, Directory Systems, Sequential and Concurrent process, CPU Scheduling, Memory Management, Deadlock, Process and Threading, and review of some related articles in the literature. Prereq: Expected knowledge of operating systems equivalent to CSCI 3453. Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5574 - Advanced Topics in Operating Systems (3 Credits)
Covers the advanced topics in operating systems by examining functionality and performance issues in CPU Scheduling, communications, distributed file systems, distributed operating systems, shared-memory multiprocessors and real-time operating systems. In addition to studying papers, reviews and presentations, students carry out a semester long team project within the scope of one of the above topics. Cross-listed with CSCI 7574. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5575 - Cyber-Physical Systems (3 Credits)
Cyber-physical systems (CPS) bridge the cyber-world of computing, communication and control with the physical world. This course offers an interdisciplinary perspective of CPS within computer science and its applications to understand the issues in the full lifecycle of CPS. Prereq: Graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5580 - Data Science (3 Credits)
Introduces concepts and techniques that enable data cycle from data extraction to knowledge discovery, including but not limited to data exploration, hypotheses testing, data organization, data featureization, supervised and unsupervised data modeling and learning, scaling-up analytics, and data visualization. Restriction: Graduate Standing. Cross-listed with CSCI 4580. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5582 - Artificial Intelligence (3 Credits)
Approaches to design of systems for solving problems usually solved by humans, especially those related to intelligent decision making. Emphasis on various types of knowledge representation. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 7582. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5585 - Advanced Computer Graphics (3 Credits)
An in-depth study of active research topics in computer graphics. Topics include advanced rendering, global illumination, scientific visualization, geometric modeling, simulation and animation. Emphasis is on readings from literature and on a term project. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5593 - Advanced Computer Architecture (3 Credits)
Important concepts in the structural design of computer systems are covered. Topics include memory hierarchy, super pipelining and super scalar techniques, dynamic execution, vector computers and multiprocessors. Expected knowledge of Computer Architecture equivalent to CSCI 4591. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5595 - Computer Animation (3 Credits)
This course introduces the state of the art techniques for modern computer animation focused on a practical, example driven approach to learning the unique art of 3D animation. Topics include modeling, kinematics, rigging, textures, physically based dynamics, and rendering. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5600 - Computational Biology (3 Credits)
Designed to introduce a broad range of computational problems in molecular biology. Solution techniques draw from several branches of mathematics: combinatorics, probability, optimization, and dynamical systems. No prior knowledge of biology is critical, but it would be at least helpful to have the equivalent of BIOL 5099. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to students with graduate standing.

CSCI 5619 - Complex Intelligent Systems (3 Credits)
Presents the cutting-edge results of research in AI: advanced topics in linguistic geometry. LG is an approach to construction of mathematical models for reasoning about large-scale multi-agent concurrent games. The purpose of LG is to provide strategies to guide the participants of a game to reach their goals. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5620 - Computational Motor Control (3 Credits)
This course introduces techniques for the modeling, simulation and control of movement. These techniques come from computer graphics, robotics and machine learning. The topics that we will cover include robot modeling, trajectory optimization, feedback control, deep reinforcement learning, the neuroscience of movement, and neural network models of the brain. At the end of the course, students will learn how train control policies for virtual agents in computer animation or robotics applications. Restriction: Restricted to Graduate Standing. Cross-listed with CSCI 4620. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5630 - Linguistic Geometry (3 Credits)
Linguistic Geometry (LG) is a type of Game Theory in Artificial Intelligence, which permits to overcome combinatorial explosion and generate optimal strategies in real time. LG is currently changing the paradigm of military command and control in the USA and abroad. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5640 - Universal Compiler: Theory and Construction (3 Credits)
Theoretical foundations and step-by-step hands-on experience in the development of a compiler, which can tune itself to a new programming language. This is a must-take course for future software developers as well as those interested in applications of the theory of Computer Science. Cross-listed with CSCI 4640. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5654 - Algorithms for Communication Networks (3 Credits)
Algorithmic and mathematical underpinnings of communication networks. A taxonomy of data-packet networks depending on modes of communication: fixed-interconnection networks, radio networks and multiple-access channel. Algorithms to implement packet routing and broadcasting. Cross-listed with CSCI 7654. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5660 - Numerical Analysis I (3 Credits)
A first semester course in numerical methods and analysis fundamental to many algorithms encountered in scientific computing, data science, machine learning, and computational models in science and engineering. Rounding errors and numerical stability of algorithms; solution of linear and nonlinear equations; data modeling with interpolation and least-squares; and optimization methods. This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411), linear algebra (e.g., MATH 3191 or 3195), and computer programming (e.g., MATH 1376 or CSCI 1410). Cross-listed with CSCI 4650, MATH 4650, and MATH 5660. Restriction: Restricted to students with graduate standing. Term offered: fall, spring, summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5661 - Numerical Analysis II (3 Credits)
A second semester course in numerical methods and analysis fundamental to many algorithms encountered in scientific computing, data science, machine learning, and computational models in science and engineering. Numerical differentiation and integration; random numbers and stochastic modeling; Fast Fourier Transform; data compression; eigenvalues and singular value decompositions with application to regression and dimension reduction. This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411), linear algebra (e.g., MATH 3191 or 3195), and computer programming (e.g., MATH 1376 or CS 1410). Cross-listed with CSCI 4660, MATH 4660 and 5661. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5667 - Introduction to Approximation Theory (3 Credits)
Normed linear spaces, convexity, existence and uniqueness of best approximations. Tchebychev approximation by polynomials and other related families. Least squares approximation and splines. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5682 - Expert Systems (3 Credits)
Reviews and analyzes many expert systems documented in the literature, such as Mycin, Macsyma, and Xcon. Emphasis is given to the design of rule-based systems, the use of uncertain and incomplete information and system shells. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5690 - Knowledge Representation for Intelligent Systems (3 Credits)
An in-depth study of different types of knowledge representation in artificial intelligence for the efficient control of complex real-world systems like autonomous robots, space vehicles, and military units. Major emphasis is on search algorithms and heuristics, logical representation with applications to planning, formal linguistic representation. At the conclusion, all the theories studied are combined in the form of introduction to the state-of-the-art linguistic geometrical representation of complex control systems. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5701 - High-Performance Communication Systems and Network Analysis (3 Credits)
Protocols and architectures related to high performance communication systems as well as network performance analysis techniques are covered. Topics include Integrated Services Digital Networks (ISDN), Broadband ISDN, protocols such as ATM and SONET, and high performance network architectures such as optical networks. Analytical analysis of network performance includes queuing theory and stochastic processes. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5702 - Big Data Mining (3 Credits)
Introduces techniques to discover patterns in Big Data. Selected topics: scalable high-dimensional data clustering, scalable dimensionality reduction, locality sensitive hashing, PageRank, scalable data stream filtering and querying, and scalable classification, in the context of different applications such as Social Network Analysis, Spam Detection, Association Rule Analysis, and Recommender Systems. Cross-listed with CSCI 4702 and CSCI 7702. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5715 - Principles of Cybersecurity (3 Credits)
Focuses on the most common threats to cybersecurity as well as ways to prevent security breaches or information loss. Topics will include: understanding and thwarting hacker methods, authentication, cryptography, programming security, malware analysis, web, database and file server security, network and enterprise security methods. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5741 - Principles of Cybersecurity (3 Credits)
Focuses on the most common threats to cybersecurity as well as ways to prevent security breaches or information loss. Topics will include: understanding and thwarting hacker methods, authentication, cryptography, programming security, malware analysis, web, database and file server security, network and enterprise security methods. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5742 - Cryptography (3 Credits)
Introduces the science of secure communication and focuses on basic ideas, principles, algorithms and methods. Emphasis is on practical applications such as block ciphers, symmetric-key cryptosystems, public key systems, and secure communication methods. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5743 - Computer Security (3 Credits)
Focuses on cyber security and its applications in modern computing. Topics include: mobile devices, Internet of Things, and cloud computing. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5743 - Cyber and Infrastructure Defense (3 Credits)
Provides a foundation on deep learning; a sought-after skill in machine learning to design and develop intelligent applications to perform object recognition, personalized recommendations, improve cybersecurity, fact-checking, forecasting and finding communities based on three classes of algorithms: supervised, unsupervised, semi-supervised and reinforcement learning. Restriction: Graduate Standing. Cross-listed with CSCI 4930. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5799 - Cloud Computing (3 Credits)
This course studies fundamental designs and key technologies in Cloud Computing by reading technical articles, and conducting a semester group project. Topics include cloud computing design and architectures, service models, virtualization, advanced computer networks, programming, often software, and security. Note: Operating System, Computer Networks, and programming experience are recommended for success in this course. Prereq: Graduate standing. Cross-listed with CSCI 7799. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

CSCI 5800 - Special Topics (3 Credits)
These special topics courses cover recent developments in an aspect of computer science. Restriction: Restricted to students with graduate standing. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

CSCI 5840 - Independent Study (1-3 Credits)
For graduate computer science students. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

CSCI 5866 - Advanced Mobile and Ubiquitous Systems (3 Credits)
This course covers various aspects of mobile and ubiquitous systems to provide an in-depth understanding of principles, state-of-the-art solutions and challenges in design and implementation of such systems. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 4866. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5890 - Computer Game Design and Programming (3 Credits)
Computer Game Design and Programming introduces practical and example driven approaches to modern 3D game development. Topics include 3D modeling, character animation, UI design, level design, scripting, texture mapping, and sound effect. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5930 - Machine Learning (3 Credits)
Provides theoretical and computational foundations in machine learning to design and develop intelligent applications to perform object recognition, personalized recommendations, improve cybersecurity, fact-checking, forecasting and finding communities based on three classes of algorithms: supervised, unsupervised, semi-supervised and reinforcement learning. Restriction: Graduate Standing. Cross-listed with CSCI 4930. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5931 - Deep Learning (3 Credits)
Provides a foundation on deep learning; a sought-after skill in machine learning. Topics include neural network design & learning, restricted Boltzmann machine, convolution neural network, recurrent neural network, LSTMs, deep reinforcement learning, autoencoders, and evolving computation frameworks like TensorFlow, Keras. Restriction: Graduate Standing. Cross-listed with CSCI 4931. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5939 - Internship (1-3 Credits)
Faculty or employer-supervised employment in industry. Enrollment is limited to students who fully complete a contract for cooperative education credit by the last day of the drop or add period. Students who want to enroll this course should submit an official job description that must clearly show the level of work requires a bachelor's degree in the computer science field or equivalent work experience. This course will not be counted towards either MSCS or PhD in CSIS or EAS. Prereq: Complete at least two of category A courses (for MS) or complete Preliminary exam (for PhD) and 3.0 or better GPA. Restricted to students with a minimum of 1 full academic year of study at the graduate level. Repeatable. Max Hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory Repeatable. Max Credits: 3.

CSCI 5941 - Directed Study, Programming Project (3 Credits)
Software development project supervised by a faculty member approved by the Center for Computational Biology. Used towards a certificate in Computational Biology. Counts as an independent study. Prereq: CSCI 5451 and CSCI 5610. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 5951 - Big Data Systems (3 Credits)
Introduces methodologies that enable Big Data lifecycle. Selected topics: topic modeling, causality analysis, structure learning, learning with less supervision, and massive-scale data analytics, with applications in social media analysis, computational biology, climate modeling, health care, and traffic monitoring. Restriction: Graduate standing. Cross-listed with CSCI 7951. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 5952 - Big Data Science (3 Credits)
This course introduces students to fundamental principles and techniques in the design and implementation of modern programming such as C++, Java. Students learn how to write programs in an object oriented high level programming language. Weekly laboratory assignments will provide hands-on experience in this course. (non-CS majors) Prereq: meet MAPS requirements and familiarity with computer use. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6010 - Principles of Programming (3 Credits)
This course introduces students to fundamental principles and techniques in the design and implementation of modern programming such as C++, Java. Students learn how to write programs in an object oriented high level programming language. Weekly laboratory assignments will provide hands-on experience in this course. (non-CS majors) Prereq: meet MAPS requirements and familiarity with computer use. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6020 - Data Structures and Algorithms (3 Credits)
This course introduces students to fundamental skills in computer science such as data structures and computer algorithms. Students will learn how to design efficient algorithms and analyze them. (non-CS majors) Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6030 - Computer Systems & Application (3 Credits)
This course surveys essential technologies such operating systems, database systems, and the Internet. Students study the basic of operating systems, database systems, and the Internet. Weekly laboratory experiments will provide hands-on experience. (non-CS majors) Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6040 - Teaching Practice of Computer Science (3 Credits)
This course provides students the opportunity for practicing and developing courses for adolescents using previously acquired knowledge. Students will design and develop a computer science course of their interest and appropriate to their area of expertise which they want to offer at their school. (non-CS majors) Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6050 - Master's Thesis (1-9 Credits)
Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 12.

CSCI 6064 - Numerical Linear Algebra (3 Credits)
Offered every other year. Solution of linear equations, eigenvector and eigenvalue calculation, matrix error analysis, orthogonal transformation, iterative methods. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6095 - Computational Methods in Nonlinear Programming (3 Credits)
Introduces fundamental algorithms and theory for nonlinear optimization problems. Topics include Newton, quasi-Newton and conjugate directional methods; line search and trust-region methods; active set, penalty and barrier methods for constrained optimization; convergence analysis and duality theory. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6100 - Master's Report (3 Credits)
Students seeking a Master of Science in computer science, who do not choose to do a thesis, must complete an individual project of an investigative and creative nature under supervision of a full-time CS graduate faculty. Student must present their results to a faculty committee. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP Additional Information: Report as Full Time.

CSCI 6160 - Computer Systems & Application (3 Credits)
This course surveys essential technologies such operating systems, database systems, and the Internet. Students study the basic of operating systems, database systems, and the Internet. Weekly laboratory experiments will provide hands-on experience. (non-CS majors) Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6195 - Directed Study, Programming Project (3 Credits)
Software development project supervised by a faculty member approved by the Center for Computational Biology. Used towards a certificate in Computational Biology. Counts as an independent study. Prereq: CSCI 5451 and CSCI 5610. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6595 - Computational Methods in Nonlinear Programming (3 Credits)
Introduces fundamental algorithms and theory for nonlinear optimization problems. Topics include Newton, quasi-Newton and conjugate directional methods; line search and trust-region methods; active set, penalty and barrier methods for constrained optimization; convergence analysis and duality theory. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6664 - Numerical Linear Algebra (3 Credits)
Offered every other year. Solution of linear equations, eigenvector and eigenvalue calculation, matrix error analysis, orthogonal transformation, iterative methods. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6690 - Master's Thesis (1-9 Credits)
Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 12.

CSCI 6939 - Directed Study, Programming Project (3 Credits)
Software development project supervised by a faculty member approved by the Center for Computational Biology. Used towards a certificate in Computational Biology. Counts as an independent study. Prereq: CSCI 5451 and CSCI 5610. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6941 - Directed Study, Programming Project (3 Credits)
Software development project supervised by a faculty member approved by the Center for Computational Biology. Used towards a certificate in Computational Biology. Counts as an independent study. Prereq: CSCI 5451 and CSCI 5610. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6951 - Directed Study, Programming Project (3 Credits)
Software development project supervised by a faculty member approved by the Center for Computational Biology. Used towards a certificate in Computational Biology. Counts as an independent study. Prereq: CSCI 5451 and CSCI 5610. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6952 - Directed Study, Programming Project (3 Credits)
Software development project supervised by a faculty member approved by the Center for Computational Biology. Used towards a certificate in Computational Biology. Counts as an independent study. Prereq: CSCI 5451 and CSCI 5610. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6953 - Directed Study, Programming Project (3 Credits)
Software development project supervised by a faculty member approved by the Center for Computational Biology. Used towards a certificate in Computational Biology. Counts as an independent study. Prereq: CSCI 5451 and CSCI 5610. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6960 - Master's Thesis (1-9 Credits)
Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 12.

CSCI 6970 - MS Course Project Report (0 Credits)
This course is for students who select Plan III (Course Only) option to complete their MS degree requirements. Graduating students must register for this course concurrent with a corresponding three credit CSCI course sponsoring course projects and submit a final written research paper on a subject approved by a CSE faculty. Prereq: Completion of at least 3 of the following courses with a B- or higher: CSCI 5446, CSCI 5451, CSCI 5573, and CSCI 5593.
Grading Basis: Satisfactory/Unsatisfactory

CSCI 6980 - Directed Study, Programming Project (3 Credits)
This course provides students the opportunity for practicing and developing courses for adolescents using previously acquired knowledge. Students will design and develop a computer science course of their interest and appropriate to their area of expertise which they want to offer at their school. (non-CS majors) Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6990 - Directed Study, Programming Project (3 Credits)
This course provides students the opportunity for practicing and developing courses for adolescents using previously acquired knowledge. Students will design and develop a computer science course of their interest and appropriate to their area of expertise which they want to offer at their school. (non-CS majors) Max Hours: 3 Credits.
CSCI 7002 - Computer Security (3 Credits)
A broad overview of computer security, roughly divided into three unequal components: a) the history of codes and ciphers; b) basic cryptographic techniques, for example, symmetric cryptography, authentication techniques, and asymmetric crypto systems, and; c) applications to current and future computer-related technologies, for example, network security, wireless communication, quantum cryptography, and more. Prereq: CSCI 5451. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7173 - Computational Complexity and Algorithms (3 Credits)
A solid, in-depth theoretical foundations in computing, computational complexity, and algorithmics. Various algorithms, including both discrete and non-discrete problem domains. NP-complete and other complete classes of problems/languages. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7200 - Advances in Management Information Systems (3 Credits)
Provides a broad coverage of research on the management of information technology. The course covers the systems-oriented research, organizational-oriented research, and information systems economics research. Prereq: PhD standing. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7210 - Topics in Analytical Research in Management Information Systems (3 Credits)
Covers a variety of analytical research topics of interest to the IS research community including the evaluation of data mining algorithm performance, cost sensitive learning and outlier detection. Prereq: Admission to the CSIS PhD program. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7211 - Topics in Behavioral-Organizational Research in Management Information Systems (3 Credits)
Provides in-depth exposure to some key behavioral, management and organizational theories and models used in Information Systems research. Covers topics in socio-technical trust, computer self-efficacy, organizational transformation, organizational learning, resource-based and coordination theories. Prereq: Admission to the CSIS PhD program.
Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7407 - Security & Cryptography (3 Credits)
A broad overview of cryptography and its relation to computer security. Topics include basic standard cryptographic techniques, a history of codes and ciphers, RSA, DES, AES, Elliptic Curve Cryptography, ElGamal, and applications to current and future technologies. Restriction: Restricted to Graduate Standing. Cross-listed with CSCI 5407. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 7502 - Research Methods (3 Credits)
Promotes research skills. Involves presenting a research topic and discussions of its merits, reviewing journal articles, writing a paper and/or a proposal in the NIH/NSF format in the student’s area of research. Prereq: PhD student standing or permission of instructor for MS students who are writing a thesis. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7511 - Topics in Behavioral-Organizational Research (3 Credits)
Examines a range of topics involving parallel and distributed systems to improve computational performance. Topics include parallel and distributed programming languages, architectures, networks, algorithms and applications. Prereq: Graduate standing. Cross-listed with CSCI 5511. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7514 - Artificial Intelligence (3 Credits)
Examines the advances of sequential computers for gaining speed and application of these techniques to high-speed supercomputers of today. Programming methodologies of distributed and shared memory multiprocessors, vector processors and systolic arrays are compared. Performance analysis methods for architectures and programs are described. Cross-listed with CSCI 5514. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7520 - Advances in Management Information Systems (3 Credits)
Provides a broad coverage of research on the management of information technology. The course covers the systems-oriented research, organizational-oriented research, and information systems economics research. Prereq: PhD standing. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7551 - Parallel and Distributed Systems (3 Credits)
Examines a range of topics involving parallel and distributed systems to improve computational performance. Topics include parallel and distributed programming languages, architectures, networks, algorithms and applications. Prereq: Graduate standing. Cross-listed with CSCI 5551. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7552 - Advanced Topics in Parallel Processing (3 Credits)
Examines the advances of sequential computers for gaining speed and application of these techniques to high-speed supercomputers of today. Programming methodologies of distributed and shared memory multiprocessors, vector processors and systolic arrays are compared. Performance analysis methods for architectures and programs are described. Cross-listed with CSCI 5552. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7574 - Advanced Topics in Operating Systems (3 Credits)
Covers the advanced topics in operating systems by examining functionality and performance issues in CPU Scheduling, communications, distributed file systems, distributed operating systems, shared-memory multiprocessors and real-time operating systems. In addition to studying papers, reviews and presentations, students carry out a semester long team project within the scope of one of the above topics. Cross-listed with CSCI 5574. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 7582 - Artificial Intelligence (3 Credits)
Examines a range of topics involving parallel and distributed systems to improve computational performance. Topics include parallel and distributed programming languages, architectures, networks, algorithms and applications. Prereq: Graduate standing. Cross-listed with CSCI 5582. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 7595 - Computer Animation (3 Credits)
Examines the advances of sequential computers for gaining speed and application of these techniques to high-speed supercomputers of today. Programming methodologies of distributed and shared memory multiprocessors, vector processors and systolic arrays are compared. Performance analysis methods for architectures and programs are described. Cross-listed with CSCI 5595. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 7624 - Algorithms for Communication Networks (3 Credits)
Examines a range of topics involving parallel and distributed systems to improve computational performance. Topics include parallel and distributed programming languages, architectures, networks, algorithms and applications. Prereq: Graduate standing. Cross-listed with CSCI 5624. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 7702 - Big Data Mining (3 Credits)
Introduces techniques to discover patterns in Big Data. Selected topics: scalable high-dimensional data clustering, scalable dimensionality reduction, locality sensitive hashing, PageRank, scalable data stream filtering and querying, and scalable classification, in the context of different applications such as Social Network Analysis, Spam Detection, Association Rule Analysis, and Recommender Systems. Cross-listed with CSCI 4702 and CSCI 5702. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 7711 - Bioinformatics I (4 Credits)
(BIOL 7711-Offered on a semester basis from H.S.C.) What is Bioinformatics and why study it? How is large-scale molecular biology data generated, where and how can researchers gain access to it, what computational analyses are possible and computational techniques for solving inference problems in molecular biology? Prereq: Permission of instructor. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

CSCI 7712 - Bioinformatics II (4 Credits)
(BIOL 7712-offered on a semester basis from H.S.C.) Inference problems and computational techniques for molecular biology, with emphasis on machine learning approaches. Use of computational induction techniques focused on information extraction from biomedical literature, inference of biochemical networks from high-throughput data and prediction of protein function. Estimation, clustering, discrimination and regression. Prereq: CSCI 7711. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

CSCI 7765 - Computer Networks (3 Credits)
An in-depth study of active research topics in computer networks. Topics include: Internet protocols, TCP/UDP, congestion and flow control, IP routings, mobile IP, P2P overlay networks, network security, performance, and other current research topics. Prereq: Graduate standing. Cross-listed with CSCI 5765. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7799 - Cloud Computing (3 Credits)
This course studies fundamental designs and key technologies in Cloud Computing by reading technical articles, and conducting a semester group project. Topics include cloud computing design and architectures, service models, virtualization, advanced computer networks, programming, often software, and security. Note: Operating System, Computer Networks, and programming experience are recommended for success in this course. Prereq: Graduate standing. Cross-listed with CSCI 5799. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

CSCI 7800 - Special Topics (3 Credits)
These special topics courses cover recent developments in an aspect of computer science. Prereq: As determined by instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7840 - Independent Study (1-6 Credits)
Offers doctoral students opportunity for independent, creative work under supervision of a CSE full-time graduate faculty. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

CSCI 7866 - Advanced Mobile and Ubiquitous Systems (3 Credits)
This course covers various aspects of mobile and ubiquitous systems to provide an in-depth understanding of principles, state-of-the-art solutions and challenges in design and implementation of such systems. Restriction: Restricted to students with graduate standing. Max Hours: 3
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 7952 - Big Data Science (3 Credits)
Introduces methodologies that enable Big Data lifecycle. Selected topics: topic modeling, causality analysis, structure learning, learning with less supervision, and massive-scale data analytics, with applications in social media analysis, computational biology, climate modeling, health care, and traffic monitoring. Restriction: Graduate standing. Cross-listed with CSCI 5952. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 8990 - Doctoral Dissertation (1-9 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 9.

Additional Information: Report as Full Time.

**Construction Engineering and Management (CEMT)**

CEMT 5231 - Construction Materials and Methods (3 Credits)
This course serves as an introduction to the primary materials and methods used to construct buildings and infrastructure across the United States, including concrete, wood and steel. Students explore processes related to specifying and installing materials, as well as analyze various material performance characteristics. Students are required to complete lectures, videos and class activities. Students also research and present information on a wide range of materials and construction processes. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
PreReq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5952 - Doctoral Dissertation (1-9 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 9.

Additional Information: Report as Full Time.
CEMT 5232 - Construction Planning and Control (3 Credits)
This course presents knowledge on planning and controlling of construction projects. Students will learn the basics of construction planning to develop work breakdown structure and activity list, estimate activity cost and duration, and identify job logic and precedence relationships. Several scheduling techniques will be presented in this course, including bar chart, network scheduling, uncertainty in scheduling (PERT), limited resources scheduling, resource leveling, line of balance, and time-cost tradeoff analysis. Furthermore, this class will provide knowledge on cash flow analysis and construction control techniques such as Earned Value method. Students will acquire skills on the use of currently available computer scheduling and planning software such as Primavera 6 and Navisworks Manage to create 3D models to visualize sequence of the construction activities. In addition, students will forms teams and work on a project throughout the semester to apply the skills that they learn in class. Prereq: CEMT 2100 or CVEN 4230 with a C- or better and a statistics course (MATH 2830, 3800, CVEN 3611, ELEC 3817, or BANA 2010) with a C- or better or graduate standing. Cross-listed with CVEN 4232. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better and a statistics course (MATH 2830, 3800, CVEN 3611, ELEC 3817, or BANA 2010) with a C- or better or graduate standing.

CEMT 5233 - Construction Cost Estimating (3 Credits)
This course presents the application of scientific principles to rough and detailed cost estimating for construction. The course starts with an introduction to estimating and how it fits in bid/proposal process and construction management. Quantity take offs, putting costs to those quantities, overhead costs, cost markups and profits; and computerized estimating will be explored. The project includes quantity take and cost estimate for the concrete and metals portion of an actual project. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5234 - Sustainable Construction (3 Credits)
This course will serve as an introduction to major components and technologies used in sustainable design and construction to create healthy, environmentally-sensitive built environments. Content focuses on construction processes, renewable energy systems, healthy buildings, natural and cultural resources, and traditional as well as cutting-edge building techniques. Course participants will gain knowledge about effective sustainable practices through active learning by engaging in case studies, class presentations, and group activities. Numerous guest speakers will share first-hand experience regarding implementation and professional practice of sustainable principles in the real-world. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5235 - Advanced Construction Engineering (3 Credits)
This course starts with a high-level overview of Construction Engineering Management including organizations involved, current approaches and industry challenges. The course delves into contracts, estimating and managing earthwork, temporary construction, scheduling, quality and others. The course is delivered in an accelerated 8-week format. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5236 - Project Management Systems (3 Credits)
Address the basic nature of managing projects and the advantages and disadvantages to this approach. Introduce the characteristics, techniques, and problems associated with initiating, planning, executing, controlling, and closeout of projects. Learn about the International Standards of PM and how to use them. Develop a management perspective about projects to help develop future project managers.
Restriction: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CEMT 5237 - Advanced Project Management (3 Credits)
A survey of advanced topics in project management building on the Project Management Systems course and utilizing the Project Management of Knowledge. Case studies, complex problems, and a class project will be utilized in the course to bring a practical perspective to the conceptual lessons. Restriction: Graduate standing. Cross-listed with CVEN 6237. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CEMT 5238 - Integrated Construction Leadership (3 Credits)
This interdisciplinary course focuses on leadership. It is structured to feature top level executives in architecture, engineering and construction (AEC) industries to discuss current industry practice. It provides students opportunities to apply management and leadership principles in construction related projects and activities. The course is delivered in an accelerated 8-week format. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5239 - Introduction to Temporary Structures and Construction Engineering (3 Credits)
This course will introduce the many types of temporary structures that are integral in the completion of construction projects. The temporary structures to be discussed include but are not limited to formwork, falsework, scaffolding, Support of Excavation (SOE), and equipment bridges. Construction Engineering will also be introduced including the application of structural engineering to crane picks and demolitions. The course includes planning, management and design aspects. The project includes the delivery of a formwork design that stresses the importance of constructability, cost, while providing updates throughout the project to the instructor. Cross-listed with CEMT 4239. Prereq: CEMT 2100 with a C- or better and junior or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 with a C- or better and junior or graduate standing.
CEMT 5240 - Building Information Modeling (BIM) (3 Credits)
Building Information Modeling is an advanced approach to facility design and construction using object-oriented 3-D models. It can be integrated in the design and construction for analytical purposes, including design, visualization, quantity takeoff, cost estimating, planning, and facility management. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5242 - Construction Safety (3 Credits)
This course is a study of safety practices in the construction industry and the specific safety procedures used in safety management of a construction project. Topics include safety risks inherent in construction projects, the roles of government, the judicial system, the insurance industry, designers and project owners in safety management and the economic impact of injuries. Advanced topics include safety risk quantification and analysis, design for safety and emerging technologies. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5246 - Construction, Business and Innovation (3 Credits)
AEC professionals rely on technical and soft (social) skills to solve complex challenges. The interdisciplinary nature of project delivery, to an increasing extent, requires professionals to collaborate across disciplines. This course explores innovation and collaboration at the interface of construction and business. Restriction: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CEMT 5800 - Special Topics in Construction (3 Credits)
These special topics courses cover a variety of topics in construction engineering and management. Restriction: Restricted to students with graduate standing. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: Graduate standing (Grad or Non-Degree Grad)

Counseling (COUN)

COUN 5010 - Counseling Theories (3 Credits)
Focuses on counseling theories: Psychodynamic, Adlerian, Person-Centered, Existential, Behavioral, including DBT, Cognitive Behavioral, Gestalt, & Reality Therapy. Also includes an overview of the history of the counseling profession and the role and function of counselors in various settings. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development

COUN 5100 - Techniques of Counseling (3 Credits)
Students practice basic counseling skills, develop therapeutic intervention strategies, and improve the effectiveness of their communication by practicing listening and responding. Videotaped role-plays are utilized. Prereq: COUN 5010 and 5810 and COUN-MA or CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 and 5810 and COUN-MA OR CAFT_MAJors within the School of Education and Human Development.

COUN 5110 - Group Counseling (3 Credits)
Learn group theory and dynamics. Practice facilitating a group. Learn about screening, group membership and styles, roles and behavior, termination of groups. Extensive practice in laboratory setting. Prereq: COUN 5010, COUN 5100 and 5810. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, and COUN 5810 Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development

COUN 5120 - Counseling Grief and Loss (3 Credits)
This elective course is an introduction and study of the field of bereavement in counseling. Studies focus on relating to client’s experience with grief, loss and/or trauma through lectures, speakers, videos, readings, experiential in-class simulations, self-discovery and introspection. Max hours: 3 Credits.
Grading Basis: Letter Grade

COUN 5150 - Family Counseling/Therapy (3 Credits)
Introduces systemic and family theories and intervention strategies. Emphasis on historical development of systems theory. Prereqs: COUN 5010 and COUN 5810 or COUN-MA CFT or CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereqs: COUN 5010 and 5810 or COUN-MA CFT or CAFT majors within the School of Education and Human Development

COUN 5160 - Techniques in Family Counseling/Therapy (3 Credits)
This didactic and experiential course presents an overview of techniques and theories in family therapy. It will help students continue to develop a theoretical framework for engaging in theory driven therapeutic interventions via practice family therapy role plays. Prereq: COUN 5010, COUN 5100, and COUN 5150. Max hours: 3 Credits.
Grading Basis: Letter Grade

COUN 5180 - Counseling/Therapy Couples (3 Credits)
This course is didactic and experiential dealing with therapeutic techniques applied to the improvement of intimate/couple relationships. Emphasis is placed on empirically based assessment, diagnosis, and treatment of couples’ problems. Special topics include: cohabiting couples, gay and lesbian couples, remarried couples, cross-cultural couples, ethical and moral dimensions of couple counseling, unique couple issues, and the effectiveness of couple therapy. Prereq: COUN 5010, COUN 5100, COUN 5150 and COUN 5160. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, COUN 5150, COUN 5160
COUN 5280 - Addictions Counseling (3 Credits)
Includes treatment strategies for clinicians in addressing varieties of addictive behaviors including substance, abuse, eating disorders, gambling and sexual addiction. Cultural dimensions of addictions are also considered. Restricted to Graduate level students in the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restricted to Graduate level students in the School of Education and Human Development

COUN 5330 - Counseling Issues and Ethics (3 Credits)
An in-depth examination of ethical and legal issues in the field. Topics include working with individuals and family systems, licensure, professional associations, record keeping and statutory requirements. Prereq: COUN 5010 and 5810. Restriction: Restricted to COUN majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 and 5810. Restriction: Restricted to COUN majors within the School of Education and Human Development.

COUN 5400 - Career Development (3 Credits)
Development of competencies in career development counseling. Theories of work systems, psychological dynamics, information systems, and decision making models are covered. Interacting with work or family systems and other subsystems is emphasized. Restricted to Graduate level students in the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 and 5810. Restriction: Restricted to COUN majors within the School of Education and Human Development.

COUN 5425 - Developing & Implementing a School Counseling Program: ASCA (3 Credits)
The course is specifically designed to provide training for school counselors and related professionals to develop and implement a comprehensive counseling and guidance program, which incorporates the ASCA National Model. Prereq: COUN 5110, 5400, and 5815. LDFS 6200, RSEM 5110 and 5120. Restriction: Restricted to COUN majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5110, 5400, and 5815, LDFS 6200, RSEM 5110 and 5120. Restriction: Restricted to COUN majors within the School of Education and Human Development.

COUN 5810 - Multicultural Counseling Issues for Individuals and Families (3 Credits)
Offers introduction to competent multicultural and social justice counseling. Students develop the awareness, knowledge, skills and action competences necessary for culturally responsive interventions with diverse communities. The course explores issues of ethnicity, culture, age, disability, and sexual orientation and learn about multicultural and social justice interventions for addressing these issues in counseling. Restricted to Graduate level students in the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restricted to Graduate level students in the School of Education and Human Development

COUN 5815 - Introduction to School Counseling (3 Credits)
This course emphasizes the unique and varied role of the school counselor and school counseling programs in diverse public schools. The course focus will be on learning the various skills necessary to meet the needs of school age students and others in the school community. In addition, the course will cover the ASCA model of comprehensive developmental school counseling activities, and focus on practical resources for counseling students in diverse school settings. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development

COUN 5820 - Strategies of Agency Counseling (3 Credits)
Students learn the role and function of the counselor in community agency settings. Intervention strategies, consultation, administration of community mental health agencies. Prereq: COUN 5010 and 5810. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 and COUN 5810. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5825 - The Business Of Private Practice (3 Credits)
This course is designed to teach students how to start and manage a successful private practice in counseling. Emphasis is placed on understanding and navigating the business side of professional counseling. Max hours: 3 Credits.
Grading Basis: Letter Grade

COUN 5830 - Special Topics (1-6 Credits)
Specific topics vary from semester to semester. Intervention strategies with children, issues in abuse, violence, incest, legal issues, adult counseling, grief, death and dying, private practice. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development

COUN 5835 - Gender And Sexual Orientation (3 Credits)
Investigates constructions of gender and sexuality in the systemic context of individuals, relationships, families, and culture. Emphasis will be placed on developing critical thinking and clinical skills that engage diverse clients in a respectful, ethical, and effective manner in therapy. Max hours: 3 Credits.
Grading Basis: Letter Grade

COUN 5840 - Independent Study: COUN (1-4 Credits)
Individually directed research activity on special topics not covered by course offerings. Degree students only, with advance approval by major, professor and department chair. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development
COUN 5910 - Practicum and Individual Supervision (3 Credits)
Supervised counseling practice in the counseling lab and appropriate settings with group supervision experience (towards 150 clock hours required for graduation). Emphasis on individual and couple and family counseling techniques and therapeutic intervention strategies.
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Must be taken concurrently with COUN or CMFT 5911. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Coreq: COUN 5911 or CMFT 5911. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5911 - Practicum and Group Supervision (3 Credits)
Supervised counseling practice in the counseling lab and appropriate settings with group supervision experience (towards 150 clock hours required for graduation). Emphasis on individual and couple and family counseling techniques and therapeutic intervention strategies.
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Must be taken concurrently with COUN or CMFT 5910. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Coreq: COUN 5910 or CMFT 5910. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Typically Offered: Fall, Spring, Summer.

COUN 5915 - Practicum in School Counseling (3 Credits)
This class will provide school track students with 3 credits of fieldwork at a developmental level of their choice. The course will require students to work with a school counselor activities that the counselor is assigned under supervision. Students will develop skills in needs assessment, developing classroom guidance activities and running the activities; they will sit in on IEP conferences, help conduct college fairs, administer career assessment inventories and standardized assessments, learn to place students in appropriate classes, and provide responsive counseling services on an as needed basis. Prereq: COUN 5010, COUN 5110, COUN 5400, COUN 5425, COUN 5810, COUN 5815, COUN 6230. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Prereq: COUN 5010, COUN 5110, COUN 5400, COUN 5425, COUN 5810, COUN 5815, COUN 6230. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.

COUN 5930 - Internship in Counseling (3-6 Credits)
Supervised internship of 600 clock hours. Intern performs activities of a regularly employed professional in an approved community site. Prereq: CMFT or COUN 5910 and 5911. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 12 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 12.
Prereq: CMFT or COUN 5910 and 5911. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Typically Offered: Fall, Spring, Summer.

COUN 6000 - Introduction to Sex Therapy (3 Credits)
Provides an overview of human sexuality over the life cycle, addressing social, psychological, and physiological aspects of human sexuality. Etiology of human sexuality diagnoses and treatment of problems related to human sexuality are addressed. Note: This course is a component in the couple and family program and required for MFT licensure. Prereq: COUN 5010, COUN 5100, COUN 5110. Restriction: Restricted to COUN majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, COUN 5110. Restriction: Restricted to COUN majors within the School of Education and Human Development.

COUN 6100 - Spiritual Dimensions of Counseling (3 Credits)
A didactic and experiential course involving the following content areas: theories of spiritual development, a survey of religious traditions, assessment, ethical issues, self-of-the-therapist issues, and treatment interventions and strategies in working with clients' values. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development

COUN 6140 - Counseling/Therapy with Children, Adolescents, and their Parents (3 Credits)
This is a didactic and experiential course dealing with therapeutic techniques applied to the improvement of child functioning, and parent-child relationships. Emphasis is placed on play therapy, assessment, diagnosis and treatment of childhood and adolescent disorders, parent education, crisis intervention. Prereq: COUN 5010, COUN 5100, and LDFS 6200. Restriction: Restricted to COUN majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, and LDFS 6200. Restriction: Restricted to COUN majors within the School of Education and Human Development.

COUN 6150 - Introduction to Emotionally Focused Couple Therapy (3 Credits)
This course is designed to help students conceptualize couple distress from an attachment perspective and gain foundational knowledge in Emotionally Focused Therapy (EFT). The organization of the course includes observation of therapy sessions, presentations of theory and clinical techniques, skills training exercises, and discussion of specific case studies, clinical material and issues. Prereq: COUN 5010, COUN 5100, COUN 5150, COUN 5160. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, COUN 5150, COUN 5160

COUN 6160 - Advanced Assessment and Treatment in Family Systems (3 Credits)
This is a didactic and experiential course focusing on family assessment instruments and their use in family therapy. Emphasis is placed on the role of assessment in family therapy, the relationship of assessment to treatment planning and evaluation, gaining familiarity with a variety of assessment instruments and learning to apply assessment skills to real-world clients. Prereq: COUN 5010, 5100, 5150, 5160, 6250, and RSEM 5110 or CMFT 5150, 5150, 5160, 5161, 6180, Coreq: COUN 6250.
Max hours: 3 Credits
Grading Basis: Letter Grade
Prereq: COUN 5010, 5100, 5150, 5160, 6250, and RSEM 5110 or CMFT 5150, 5150, 5160, 5161, 6180, Coreq: COUN 6250
COUN 6200 - Trauma Informed Care for Diverse Populations and Co-occurring Disorders (3 Credits)
This course will prepare students to become more trauma informed and understanding of cooccurring disorders within the realm of substance use and mental health treatment in their future careers of certified addictions counselors and other mental health positions in community and private sectors. The course will also demonstrate inclusivity in TIC. Max hours: 3 Credits.
Grading Basis: Letter Grade
COUN 6230 - Developmental Counseling in Schools: Prevention & Intervention (3 Credits)
This course offers the tools to provide developmental counseling services in the schools, including prevention through classroom counseling activities linked with the curriculum, and responsive services. Prereq: COUN 5110, 5400, 5810, LDFS 6200, RSEM 5110 and 5120. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5110, 5400, 5815, LDFS 6200, RSEM 5110 and 5120
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development
COUN 6240 - Consultation Strategies (3 Credits)
Focuses on the development of consultation skills and implementation of strategies. Students are exposed to major theories of the consultation process. In addition, this course provides the opportunity to practice consultation and implementation strategies within a system: an agency, business setting, or educational setting. Prereq: COUN 5010 or permission of instructor. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development
COUN 6250 - Mental Health Diagnosis (3 Credits)
This course addresses individual diagnosis from a variety of perspectives: Biological, developmental, medical, neurological, psychosocial, cultural and interpersonal. It will provide students with a broad theoretical base for understanding psychopathology, from not only an individual, descriptive, symptom-based perspective as presented in the DSM-5, but also from a contextual systemic perspective including developmental hallmarks, familial patterns and sociocultural contributors. Prereq: COUN 5010 and 5810 or CMFT 5150 and CMFT 6180. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010 and 5810 or CMFT 5150 and CMFT 6180 Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development.
COUN 6260 - Introduction to Play Therapy (3 Credits)
This course includes didactic and experiential learning to understand play as a therapeutic modality for children. This course introduces the history of play therapy as well as core skills, theories, and techniques that are unique to play therapy. Students who take this course will be better prepared to work therapeutically with children. Prereq: COUN 5010, COUN 5100, COUN 5330, COUN 5810, and LDFS 6200. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, COUN 5330, COUN 5810, LDFS 6200.
Typically Offered: Fall.
COUN 6810 - Advanced Multicultural Counseling (3 Credits)
Offers essential preparation for competent multicultural and social justice counseling practice with culturally diverse clients, and families. Students learn about effective multicultural counseling and advocacy skills. The course explores the impact of ethnicity, culture, age, disability, sexual orientation, etc., on individual behavior, interpersonal relationships, and learn about multicultural and social justice interventions and techniques for addressing these issues in counseling. Prereq: COUN 5010, 5100 and 5810. Restriction: Restricted to COUN majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, COUN 5100, and COUN 5810 Restriction: Restricted to COUN majors within the School of Education and Human Development
COUN 6840 - Independent Study (1-4 Credits)
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development
COUN 6950 - Master's Thesis (4 Credits)
Learn and practice advanced techniques for addressing adult and adolescent clinical problems. Examine efficacy research on specific counseling techniques as associated with particular approaches in counseling. Prereq: COUN 5010, 5100 and 5820. Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: COUN 5010, 5100 and 5820 Restriction: Restricted to COUN and CAFT majors within the School of Education and Human Development
COURSES IN THE COHROT MBA PROGRAM (PMBA)
PMBA 6310 - International Business Abroad (1.5 Credits)
The MBA International Business Study Abroad is an experiential learning course conducted abroad. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
PMBA 6320 - Career and Professional Development (1.5 Credits)
This course focuses on preparing students to successfully seek their next position and develop the professional skills to excel in their long-term career. Sample topics include: Personal Brand Readiness; Business Communication Skills; Business Professionalism; and Interview Skills. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6520 - Leading a Productive Workforce (1.5 Credits)
This course addresses how leaders can effectively manage their employees. Some topics that will be addressed in the course include: leadership styles and approaches; self-management; personality differences; values, attitudes, perception and motivation; and effective communication and conflict resolution. Note: Credit cannot be received for this course if BUSN 6520 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6522 - Building Effective Work Environments (1.5 Credits)
This course focuses on how leaders can build organizational environments where individuals and teams can be productive. Some topics that will be addressed include: team formation and management; effective organizational structures and cultures; some effective human resource practices related to selection, evaluation and development; and managing power, politics and change. Note: Credit cannot be received for this course if BUSN 6522 has already been completed. Lectures, assignments, and projects are grounded in real data taken from business applications. Prereq: Leading a Productive Workforce. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6530 - Data Analytics I (1.5 Credits)
This course covers basic statistical concepts and methods including descriptive and graphical tools, exploratory data analysis, statistical inference, and bivariate methods. Emphasis is placed on proper choice of methods and interpretation of the results. Lectures, assignments, and projects are grounded in real data taken from business applications. Note: Credit cannot be received for this course if BUSN 6530 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6532 - Data Analytics II (1.5 Credits)
This course allows decision-makers to understand relationships among key business metrics. Applications of these methods may be found throughout the organization from human resources management and marketing to accounting and finance. Multiple regression provides the methodological framework. Case studies are used extensively throughout the course. Note: Credit cannot be received for this course if BUSN 6530 has already been completed. Prereq: PMBA 6530. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6540 - Business Law (1.5 Credits)
This course provides students with a working knowledge of the legal parameters for business decision making in four areas: 1) tort law, 2) business organizations, 3) employment law, and 4) intellectual property law. The influence of legal issues on an organization's decision-making is stressed. Note: Credit cannot be received for this course if BUSN 6540 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6542 - Business Ethics (1.5 Credits)
This course emphasizes analyzing business decisions from an ethical perspective, including how to spot and address red flags that foster unethical behavior. Governance and stakeholder management techniques that incentivize ethical behavior will be highlighted. Principle-based ethics are emphasized, namely, integrity, trust, accountability, transparency, fairness, respect, viability, and compliance with the rule of law. Note: Credit cannot be received for this course if BUSN 6542 has already been completed. Prereq: PMBA 6540. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6550 - Financial Accounting (1.5 Credits)
This course emphasizes the use of external financial reporting information when making business decisions, particularly to assess a firm's overall financial condition and performance for investment and credit decisions. To understand the underlying basis of financial reporting the concepts and mechanics of generating financial statements is addressed in a nontechnical manner. Note: Credit cannot be received for this course if BUSN 6550 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
PMBA 6552 - Management Accounting (1.5 Credits)
This course emphasizes the use of management accounting information when making business decisions within organizations. Topics include product and service costing, planning profitability and controlling operations through budgeting techniques and short-term non-routine decision-making. Note: Credit cannot be received for this course if BUSN 6550 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6560 - Marketing Management I (1.5 Credits)
This course focuses on applications of analytical tools for understanding the dynamic marketing environment and creating value propositions, selecting target markets, and determining positioning strategies. Students evaluate and formulate the corresponding elements of a Marketing Plan. Note: Credit cannot be received for this course if BUSN 6560 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6562 - Marketing Management II (1.5 Credits)
This course continues Marketing Management Part I. The focus is on applications of analytical frameworks and decision-making regarding alternative product, price, service, channels, communication, and other marketing mix strategies. Students create the corresponding elements of a Marketing Plan. Note: Credit cannot be received for this course if BUSN 6560 has already been completed. Prerequisite: PMBA 6560. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6570 - Dynamics of Global Business (1.5 Credits)
This course examines the dynamics of global business from both a multinational and entrepreneurial perspective. Topics covered include the cultural, political, legal, economic-financial, trade and investment, and sustainability aspects of the international business environment. Offered prior to the international field trip, this course helps students cultivate a global mindset and provides them with key environmental and contextual information to enrich their international field study experience. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6572 - Global Business Operations and Practices (1.5 Credits)
This course examines key operations and practices of firms engaged in cross-border business. Topics covered include (1) the evaluation and selection of markets, partners, and the route to markets, and (2) the management of business functions (e.g., marketing; human resource management; supply chain, operations, and information technology management; financial management and accounting) in an international context. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6610 - Digital Leadership and Governance (1.5 Credits)
This course examines strategic issues involved with the effective management of information technology (IT) in businesses including the role of IT as a driver of business innovation and strategy. By examining how an organization makes IT investment decisions, implements new IT assets, delivers services, assesses risk and measures its own performance, a Digital Leadership and Governance portfolio can assure the organization is meeting its compliance and security responsibilities, along with fulfilling strategic objectives. Note: Credit cannot be received for this course if BUSN 6610 or ISMG 6180 have already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6612 - Data Management Strategy (1.5 Credits)
This course provides students with an overview of the key concepts for establishing an organization's data management strategy, ensuring that its operational and analytical needs are efficiently, effectively, and securely addressed. The course emphasizes real-case scenarios that companies face when addressing global operational and analytical data challenges. The course also addresses current trends in managing structured data as organizations move to the Cloud-based computing services. Notes: Credit cannot be received for this course if BUSN 6610 or ISMG 6180 have already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6620 - Applied Microeconomics (1.5 Credits)
This course provides an overview of “thinking like an economist”. The course covers an introduction to supply and demand and the basic forces that determine an equilibrium in a market economy. Students learn to understand: consumer behavior, firm behavior, and analyze different types of market structures (monopoly, oligopoly and a competitive market). Note: Credit cannot be received for this course if BUSN 6620 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
PMBA 6622 - Applied Macroeconomics (1.5 Credits)
This course explores the causes and effects of unemployment, interest rates, and inflation. The roles of the central bank and the government in implementing policy are discussed. The course provides models of macroeconomics that are introduced and illustrated using historical US data. The course prepares a student to take intermediate macroeconomics. Note: Credit cannot be received for this course if BUSN 6620 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6630 - Operations Management (1.5 Credits)
This course is concerned with operations management, including topics such as resource planning, inventory control, logistics management, network configurations, demand management, and workflow efficiencies. Quantitative analytics to support decision-making is used. Current innovations and future trends in operations are included. Note: Credit cannot be received for this course if BUSN 6630 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6632 - Analytics for Operations (1.5 Credits)
This course is concerned with building and applying formal models to solve important tactical and strategic problems found in the operations side of both private and public organizations. An emphasis is placed on optimization methods and covers skills necessary to build and evaluate models and to understand the reasoning behind model-based analysis. Note: Credit cannot be received for this course if BUSN 6630 has already been completed. Prereq: PMBA 6630. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Prereq: PMBA 6630. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6640 - Finance Management I (1.5 Credits)
This two-part course deals with decisions a business firm takes to maximize stakeholder value. Students learn to use theories and techniques to examine and understand business and security valuation, the cost of capital, capital budgeting and capital structure, and other related issues. Note: Credit cannot be received for this course if BUSN 6640 has already been completed. Prereq: PMBA 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6642 - Finance Management II (1.5 Credits)
This two-part course deals with decisions a business firm takes to maximize stakeholder value. Students learn to use theories and techniques to examine and understand business and security valuation, the cost of capital, capital budgeting and capital structure, and other related issues. Note: Credit cannot be received for this course if BUSN 6460 has already been completed. Prereq: PMBA 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Prereq: PMBA 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

PMBA 6670 - Strategic Management (1.5 Credits)
This course is a graduate level introduction to the topic of strategic management – definitions, core ideas, and a broad understanding of what is required for the firm to build a competitive advantage that is sustainable over the medium to long term. Note: Credit cannot be received for this course if BUSN 6710 has already been completed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

AMBA 5939 - Internship for MBAs (1-6 Credits)
Supervised experiences involving the applications of concepts and skills in an employment setting. Restriction: Restricted to graduate majors within the Business School with the AMBA major code. Repeatable. Max Hours: 6 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restrictions: Restricted to AMBA majors within the Business School.

AMBA 6201 - Leading in Organizations (1.5 Credits)
This course addresses core leadership challenges, such as motivating a diverse employee base, working in and managing teams, designing an organization and building a healthy culture, leading organizational change, and managing power and politics in the workplace. Restriction: Restricted to AMBA majors within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.
AMBA 6202 - Workforce Management (1.5 Credits)
This course focuses on the management and deployment of human resources in organizations. Students learn how leaders can utilize recruitment and staffing strategies, performance management, compensation and benefits, data and analytics, and training and leadership development programs to foster a successful workforce. Restriction: Restricted to AMBA majors within the Business School. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

AMBA 6210 - Data Analytics I (1.5 Credits)
This course covers basic statistical concepts and methods including descriptive and graphical tools, exploratory data analysis, statistical inference, and bivariate methods. Emphasis is placed on proper choice of methods and interpretation of the results. Lectures, assignments, and projects are grounded in real data taken from business applications. Restriction: Restricted to graduate majors within the Business School with the AMBA major code. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

AMBA 6211 - Data Analytics II (1.5 Credits)
This course allows decision-makers to understand relationships among key business metrics. Applications of these methods may be found throughout the organization from human resources management and marketing to accounting and finance. Multiple regression and machine learning methods provide the methodological framework. Business case studies are used extensively throughout the course. Restriction: Restricted to graduate majors within the Business School with the AMBA major code. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

AMBA 6220 - Business Law (1.5 Credits)
This course provides a working knowledge of the legal parameters in four areas: 1) employment law, 2) business organizations, 3) intellectual property and 4) tort law. The influence of legal issues on an organization's decision making is stressed. Restriction: Restricted to graduate majors within the Business School with the AMBA major code. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

Typically Offered: Fall.

AMBA 6221 - Business Law (1.5 Credits)
This course provides a working knowledge of the legal parameters in four areas: 1) employment law, 2) business organizations, 3) intellectual property and 4) tort law. The influence of legal issues on an organization's decision making is stressed. Restriction: Restricted to graduate majors within the Business School with the AMBA major code. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

AMBA 6230 - Financial Accounting (1.5 Credits)
This course emphasizes the use of external financial reporting information when making business decisions, particularly to assess a firm's overall financial condition and performance for investment and credit decisions. To understand the underlying basis of financial reporting the concepts and mechanics of generating financial statements is addressed in a nontechnical manner. Restriction: Restricted to graduate majors within the Business School with the AMBA major code. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

AMBA 6231 - Management Accounting (1.5 Credits)
This course emphasizes the use of management accounting information when making business decisions within organizations. Topics include product and service costing, planning profitability and controlling operations through budgeting techniques and short-term non-routine decision making. Restriction: Restricted to graduate majors within the Business School with the AMBA major code. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

AMBA 6240 - Marketing Principles (1.5 Credits)
This course focuses on marketing theory and its application, emphasizing the study of core principles that can be applied to a wide range of marketing situations, both large and small. The course encourages critical analysis via a case-based approach to learning. Restriction: Restricted to graduate majors within the Business School with the AMBA major code. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

AMBA 6241 - Marketing Strategy (1.5 Credits)
This course focuses on applying the fundamentals of marketing theory in real-world settings. Guest-speakers, company site visits, and developing a marketing plan are used to emphasize marketing principles. The distinction between small-business-oriented lean marketing and large-scale marketing effort of corporations will be drawn out thru the course experience. Restriction: Restricted to graduate majors within the Business School with the AMBA major code. Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

AMBA 6250 - Information Systems Strategy Foundations (1.5 Credits)
Digital strategy is the application of digital technologies to business models to form new differentiating business capabilities. This course examines strategic issues involved with the effective management of information technology (IT) in businesses including the role of digital technologies as a driver of business innovation and strategy. The development and management of an effective digital infrastructures are discussed. Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5015 - Intelligence Writing and Briefing (3 Credits)
This course provides an overview of intelligence analysis and aims to provide the skills and tools necessary to effectively communicate results to consumers. Students will be familiarized with the analytical, perceptual, and cognitive pitfalls of conducting intelligence analysis and learn a variety of strategies for overcoming these problems, preparing professional intelligence products, and presenting executive-level intelligence briefings. Cross-listed with CRJU 4015. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

CRJU 5100 - Administration of Criminal Justice (3 Credits)
Analyzes the policies and practices of agencies involved in the criminal justice process, from the detection of crime and arrest of suspects through prosecution, adjudication, sentencing and imprisonment, to release. The patterns of decisions and practices are reviewed in the context of a systems approach. Cross-listed with CRJU 7100 and CRJU 4100. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

CRJU 5110 - Nonprofit Financial Management (3 Credits)
Provides a grounding in financial management for the "non-accountant" by focusing on an array of knowledge and management skills necessary for allocating and controlling resources and for analyzing, reporting and protecting the fiscal health of the organization. Topics include key accounting principles, understanding and using financial statements, the budget development process, cash flow analysis, banking relationships, using the audit report, maximizing investment policy and strategy, and understanding the boundaries of tax exemption. Cross-listed with PUAD 4140 and 5140. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5120 - Prisoner Reentry (3 Credits)
Focuses on prisoner reentry, including strategies to prepare inmates for release, reduce recidivism, and facilitate adjustment in the community while meeting the demands of public safety. Cross-listed with CRJU 4210. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
CRJU 5220 - The American Jury System (3 Credits)
Examines historical and current issues in jury decision making and
dynamics. The course explores issues such as jury size, eyewitness
testimony, and jury reform. Court decisions are examined as a
comprehensive understanding of jurors and their role. Max hours: 3
Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors
within CU Denver.

CRJU 5240 - Gang Patterns and Policies (3 Credits)
Focuses on gangs, gang members, and gang activity in the United States.
Topics include the origins and historical development of gangs, gang
migration, gang related crime and violence, gang victimization, and the
effects of gang involvement on communities and families. Max hours: 3
Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors
within CU Denver.

CRJU 5250 - Criminal Offenders (3 Credits)
Introduces the core principles and tools of motivational interviewing as
it is used currently with the offender population. Students learn how to
utilize these skills working with specific offender populations and how to
motivate these often resistive clients to change their thinking patterns
and behaviors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors
within CU Denver.

CRJU 5260 - Crime and Literature (3 Credits)
This seminar focuses on nonfiction literature as it relates to criminality
and the criminal justice system. Samples of social commentary,
biographies/autobiographies, and other accounts presented within
various types of nonfiction literature are examined in order to more fully
understand and appreciate their impact in shaping public opinion of the
criminal justice system. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors
within CU Denver.

CRJU 5270 - Case Studies in Criminal Justice (3 Credits)
This seminar examines the lives of people who live on the margins of
a society that perceives them as outsiders. Ethnographic studies that
utilize observation, participant observations, and interviews as their
primary research methodology are assigned in order to develop a critical
understanding of the social marginalization and cultural aspects of
the lives of real human beings living constantly on the edge of the law.
Restriction: Restricted to Graduate and Graduate Non-Degree majors
within CU Denver. Cross-listed with CRJU 3270. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors
within CU Denver.

CRJU 5280 - Computer Crime (3 Credits)
The course is designed to enhance interest, experience and knowledge in
leadership that promotes professionalism and ethical behavior. Individual
and organizational dynamics are explored through a critical perspective,
focusing on criminal justice roles and responsibilities. The class teaches
effective leadership skills in areas such as team building, strategic
planning, and decision making. Restriction: Restricted to Graduate and
Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU
7280. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors
within CU Denver.

CRJU 5285 - Trauma in the Criminal Justice System (3 Credits)
This course examines trauma as widely prevalent among those who are
served by the criminal justice system and experienced disproportionately
among criminal justice professionals. Trauma prevalence, theory,
prevention, and interventions through a trauma stewardship lens for
victims of multiple forms of trauma, including vicarious traumatization
and secondary traumatic stress, will be emphasized through an all-
inclusive view across the criminal justice continuum. Cross-listed with
CRJU 3285. Restriction: Restricted to Graduate and Graduate Non-Degree
majors within CU Denver. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

CRJU 5290 - Capital Punishment (3 Credits)
This course examines in-depth a comprehensive range of issues
surrounding capital punishment. Specifically, it looks at the history of
capital punishment, methods of execution, legal issues and case
law, deterrence, miscarriages of justice, discrimination in the capital
charging and sentencing system, and the role of the death penalty
internationally. The coverage of these issues relies on many sources,
including scholarly readings, non-fiction books, court cases, websites,
videos and documentaries, speeches, and media. Cross-listed with
CRJU 3290. Max hours: 3 Credits.
Grading Basis: Letter Grade

CRJU 5301 - Crime and the Media (3 Credits)
Surveys the relationship between mass media and the U.S. criminal
justice system. Special attention is given to the role of media in the social
construction of reality. Emphasis is placed on the application of social
constructionism to criminal justice related social problems. Max hours: 3
Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors
within CU Denver.

CRJU 5320 - Police Administration (3 Credits)
Considers the major issues confronting police executives, such as
professionalism, recruitment, selection, training, deployment, innovation,
evaluation, and charges of brutality, inefficiency, and corruption. Max
hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors
within CU Denver.
CRJU 5325 - Qualitative Methods for Criminal Justice (3 Credits)
Focuses on qualitative methods applicable to research in the field of criminal justice. The primary focus is on ethnographic approaches employing such fieldwork techniques as observation, participant observation, interviews, content analysis, life histories and case studies. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5331 - Crime Analysis and GIS (3 Credits)
Serves as an introduction to the uses and applications of analysis within law enforcement, including the role of analysis in law enforcement, theories that guide analysis and police practices, commonly used data sources and technology, and techniques for various types of analysis utilized in law enforcement. Cross-listed with CRJU 4331. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5361 - Capstone Seminar (3 Credits)
Synthesizes competencies gained throughout the course of study into a client-based research project. Students conduct independent research, complete a final written project demonstrating their qualifications and expertise, and orally present findings to a committee of faculty and criminal justice professionals. Prereq: CRJU 5000, CRJU 5100, CRJU 5120, CRJU 5321. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Prereq: CRJU 5001 or 5100, 5002 or 5120, 5003 or 5321, 5004 or 5000 and 5005
Additional Information: Report as Full Time.

CRJU 5391 - Sex Offenders and Offenses (3 Credits)
Focuses on challenges practitioners face in managing sex offenders, including the development of programs and partnerships that can effectively assess, track, control, and treat sex offenders through all phases of the system. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5410 - Victimology (3 Credits)
Examines victim-offender relationships, interactions between victims and the criminal justice system, and connections between victims and other social groups and institutions among various populations. The course addresses the theory, history, research, legislation and policy implications related to the social construction of "the victim." Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5420 - Violence in Society (3 Credits)
This course examines various aspects of violence, including distribution over time and space; situations and circumstances associated with violent victimization and offending; and how social institutions, community structure, and cultural factors shape violent events. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5430 - Drugs, Alcohol, and Crime (3 Credits)
This course provides an interdisciplinary overview of theory, research and policy issues surrounding the relationship between drugs, alcohol and crime, and responses of the criminal justice system. Special attention is paid to the socially constructed nature of illegal substances and connections with U.S. drug policy. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5510 - Contemporary Issues in Law Enforcement (3 Credits)
Examines current thinking and experience with respect to changing and reforming police programs and practices. The course focuses primarily on the American police experience, reviewing major innovations, exploring their rationale, and examining organizational impediments to their implementation. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5520 - Corrections (3 Credits)
Examines the development and implementation of correctional systems in America. Topics include the origins of correctional efforts and the evolution of the prison system, punishment and rehabilitation rationales in the context of sentencing models, the social organization of the prison, including inmate subcultures and staff work strategies, and the inmates' rights movement and the impact of judicial intervention in correctional settings. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5530 - Community Corrections (3 Credits)
Analyzes theories and practices of probation and parole, responses of paroling authorities to public pressures and court controls, and their implications for rehabilitation. Efforts to bridge institutional settings and community life, as well as the feasibility and effectiveness of treating individuals under sentence in the community, are reviewed. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5540 - Juvenile Justice (3 Credits)
Examines policies and practices of agencies in processing youthful offenders through the juvenile court system, reviews trends in juvenile justice policymaking, and assesses changes in response to juvenile crime by both the juvenile justice and criminal justice systems. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5550 - Criminal Justice Policy and Planning (3 Credits)
Provides a survey of conceptual and design strategies in criminal justice policy analysis. The logic and rationale of these various strategies are contrasted, and their relative merits are critiqued. Selected policy issues in the criminal justice system are utilized to illustrate the application and interpretation of alternative strategies. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
CRJU 5551 - Courts, Law & Justice (3 Credits)
Analyzes judicial organization, court administration, and criminal court judicial decision making practices within the context of the broader operation of the criminal justice system. Special attention is paid to the social organization of the courtroom, examining the special roles of judges, prosecutors, and defense attorneys. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5552 - Criminal Justice Ethics (3 Credits)
Offers a normative framework within which to explore ways to increase sensitivity to the demands of ethical behavior among criminal justice personnel. The application of a normative perspective enhances the possibility that moral problems are better understood, more carefully analyzed, and rendered more tractable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5553 - Gender and Crime (3 Credits)
Explores issues surrounding women as offenders, victims, and criminal justice professionals. Investigates explanations for the involvement of women in illegal activities. Analyzes the plight of battered women, rape victims, and other female victims. Examines the participation of women in law enforcement judicial processes, corrections, and lawmakers.
Cross-listed with CRJU 4190. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5554 - Profiling Criminal Behavior (3 Credits)
Examines the dynamics of individual criminal acts utilizing inductive and deductive methodology to profile criminal behavior, offender characteristics, crime scene investigation, evidence collection, and case linkage of specific categories of crimes. Topics include homicide, serial crime, stalking. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5555 - Offenders With Mental Health Disorders (3 Credits)
Examines the offender who may be mentally disordered. Special attention is paid to the various phases of the criminal justice system where psychiatrists are involved (e.g., diversion, fitness, insanity and sentencing), dangerous sex offender legislation, "not guilty by reason of insanity" and "guilty but mentally ill" statutes, and issues concerning confidentiality, informed consent, and treatment. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 7575 and 3575. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5556 - Social Science in the Criminal Justice System (3 Credits)
Examines the use of social science as a tool for legal analysis within the criminal justice system. The course examines how social science research is used to resolve relatively simple factual disputes, then moves on to more complex issues that arise when social science is invoked to make or change law. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5560 - Public Service in Emergency Management and Homeland Security (3 Credits)
Introduces emergency management and homeland security including: management of hazards, emergencies, disasters, and the networks of government and nonprofit organizations providing services. Focuses on principles of emergency management and homeland security at state and local jurisdictional levels. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 4010, PUAD 5650, and CRJU 4010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
CRJU 5655 - Principles of Emergency Management (3 Credits)
Introduces the discipline and practice of emergency management.
Topics include administrative practice and processes by which public policy shapes governmental responses to hazards, emergencies, and disasters. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5655, PUAD 4012, and CRJU 4012. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5710 - Environmental Crime and Justice (3 Credits)
Environmental Crime and Justice will look at the disproportionate benefits and burdens of environmental “profits” (e.g., open spaces, clean air and water, etc.) and contamination (which results from behaviors that include, but are not limited to crime), as well as the implications of these disparities on certain areas, particularly communities of color and indigenous communities. The role of the government, the private sector, non-profit organizations, and the environmental justice movement in creating, perpetuating, and minimizing environmental crime and its disparities will be examined, with part of the focus being on theories within critical criminology that address issues of environmental crime injustices. The nature of environmental offenders and victims will be explored. Policies and programs that have been organized to address environmental crime and other injustices and their effects (e.g., quality of life, birth defects, childhood asthma, lead poisoning, cancer, etc.) will be reviewed, including responses by the criminal justice system to environmental crime. Students will examine critically the consistencies and inconsistencies in institutionalized mechanisms that are set up, either intentionally or more subtly, to create, reinforce, or minimize environmental crimes and injustices. Cross-listed with CRJU 4710.
Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

CRJU 5720 - Public Policies for Hazards and Disasters (3 Credits)
Examines public policymaking and administration related to homeland security and disasters in the United States, including the interplay between security and traditional hazards management concerns. Assesses the role of institutional processes, governmental and nongovernmental organizations in policy development and implementation. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5720. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5910 - Nature and Scope of Interpersonal Violence (3 Credits)
Analyzes the social, historical, political, legal, and psychological aspects of gender-based violence. Topics include definitions of the problem, demographics, children and youth exposure, and national and global perspectives. Strategies for prevention, intervention, treatment, and social change are explored. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5910. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5920 - The Psychology of Interpersonal Violence (3 Credits)
Addresses the contributions and limitations of current empirical and clinical psychological literatures on interpersonal violence (IPV). Special attention is paid to the effects of IPV on adult and child survivors, their psychological needs, and the contribution of psychological knowledge to understanding and addressing the problem of IPV. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5920. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5930 - Interpersonal Violence Law and Public Policy (3 Credits)
Examines public policy and law related to interpersonal violence (e.g., welfare reform, child maltreatment, criminal and civil court responses). Topics include the role of law enforcement agents, victim advocacy, and methods to change law and policy. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5930. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5940 - Interpersonal Violence Leadership, Advocacy, and Social Change (3 Credits)
Examines different models of social change and various approaches to public address, including social movements and campaigns. Strategies for engaging diverse individuals, systems and communities to address interpersonal violence will be emphasized. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 5940. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 5995 - Global Study Topics (3 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with CRJU 4995. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

CRJU 6171 - Homicide Studies (3 Credits)
This class examines criminal homicide from all angles: the offenders, the victims, the police, prosecution, defense, jurors, and judges. It looks at investigative techniques and the latest science involved in criminal investigation, jury selection, and other criminal justice system issues. It focuses on what is arguably the most serious form of homicide, murder, exploring sensational cases that involve delving into the psyche of murderers. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
CRJU 6600 - Special Topics in Criminal Justice (3 Credits)
Specialized seminar intended to provide students and faculty with the opportunity to explore significant themes, issues, and problems in the field of criminal justice. Topics vary from semester to semester. Course may be taken for credit more than once, provided subject matter is not repeated. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 18 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 18.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 6840 - Independent Study CRJU (1-3 Credits)
Affords the student the opportunity to pursue creative research activities under the individual supervision of a full-time faculty member. No more than six semester hours of credit for independent study may be applied toward the MCJ degree. MCJ Prereq: 12 semester hours of criminal justice course work and permission of instructor. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 6910 - Internship in Criminal Justice (3 Credits)
For students who have not had practitioner experience, a full- or part-time internship is required. Note: Masters students must have completed a minimum of 18 credit hours at the graduate level to take this course. Dual Degree students must have completed a minimum of 6 credit hours at the graduate level. Minimum cumulative GPA of 3.0 required to take this course. Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 6950 - Master’s Thesis (3-6 Credits)
Independent original research project supervised and evaluated by a thesis committee. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 7002 - Criminological Theory (3 Credits)
Explores the origins of criminal behavior and impact of crime on society. Theories of deviant, delinquent, and criminal behavior are examined, and practical implications and application of theoretical constructs are analyzed through current research paradigms and empirical research. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Cross-listed with CRJU 5002. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.

CRJU 8840 - Independent Study (1-3 Credits)
Affords the student the opportunity to pursue creative research activities under the individual supervision of a full-time faculty member. No more than six semester hours of credit for independent study may be applied toward the PhD degree. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

CRJU 8990 - Doctoral Dissertation (1-10 Credits)
Upon admittance to candidacy, students must be continuously registered for dissertation credit each fall and spring semester or be automatically dropped from the program. Students must register for 7.0 credit hours per semester. In cases where students will not be using any university resources during a particular semester, they may petition the PhD director to register for only 3.0 credit hours to maintain continuous enrollment. Students must be registered for dissertation credit during the semester they have a colloquium or defense. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

Additional Information: Report as Full Time.

Culturally and Linguistically Diverse Education (CLDE)

CLDE 5010 - Foundations of Language & Culture in Education (3 Credits)
Designed for veteran and novice teachers to gain an understanding of schooling and language education. Participants examine key social theories based on the writings of important scholars in the field, on topics such as the politics of race, schooling, language, and cultural identity. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5020 - Responsive Classroom Communities (3 Credits)
This course investigates how people learn and the implications of social and cultural learning for establishing engaging and culturally responsive learning communities. Through this course teacher candidates will better understand their roles in student learning and how their own cultural lenses impact their relationships with students and families, and influence student success in the classroom. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with CLDE 4020. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5030 - Language Development of Multilingual Learners: Advanced (3 Credits)
This course offers a deep investigation of the relationship between language and literacy acquisition. In the context of first and second language development across the lifespan, the course focuses on bilingual and second language development, and on the acquisition of literacy by young children. Max hours: 3 Credits.
Grading Basis: Letter Grade
CLDE 5032 - English Linguistic Foundations for SLA & TESOL (3 Credits)
Investigates Second Language Acquisition (SLA) theories and new developments in the field relevant to adult learners of English, factors that influence outcomes, and key structures in English grammar and pronunciation. Lab time with ESL learners involves teaching listening/speaking and applying grammar in writing. Max hour: 3 Credits.
Grading Basis: Letter Grade

CLDE 5035 - Connecting Multilingual Theories to Practice (3 Credits)
This course supports students in synthesizing research and theory on learning and multilingual development, and identifying their own theoretical orientation in the field. There is a specific emphasis on connecting classroom practice to their theoretical stance. Prereq: CLDE 5010, CLDE 5160, CLDE 5050, CLDE 5070, CLDE 5820, and CLDE 5825. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5040 - Social Justice Liberation: A Rehearsal for the Revolution (3 Credits)
We will explore TO and CRT. Students will engage in class discussions, theatre workshops, and critically analyze the applicability of these concepts to education and community work through deep and thorough engagement of readings, TO activities, and discussions about school and community activism with peers and the greater community. Cross-listed with CLDE 7040. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5042 - Techniques for Teaching Adult ESL (3 Credits)
This course provides principles of language assessment and progress monitoring strategies for teachers of adult ESL learners to help inform their practices and decisions related to appropriate instruction and placement of, and programming for, learners. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5050 - Assessment & Advocacy for Multilingual Learners (3 Credits)
Students learn to gather and use assessment results within a strengths-based framework to advocate for appropriate programming, placement, instruction, and ongoing progress monitoring of multilingual students. Special attention is paid to linguistic and cultural bias in the field of assessment. Cross-listed with SPED 5050. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5070 - Linguistic Analysis of English (3 Credits)
A descriptive linguistic approach to English grammar with a functionalist view of language and discourse processing. The course examines the historical evolution of English from its origins and the impact this has had on its grammar and syntax. A critical applied linguistic perspective is included focusing on language variation and status. Provides a framework for understanding, identifying and describing the major features of English (in particular) and language (in general). Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5140 - Language, Culture & Educational Equity (3 Credits)
Develops an understanding of the pluralistic and intersectional nature of U.S. society (race, class, gender, sexuality, language, migration status), and the role of the school within this social context. Examines the legal and cultural history of language education in Colorado and the U.S. as well as the impact of changing demographics on schools. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5160 - History & Law of Bilingual & Immigrant Education (3 Credits)
This course includes an overview of U.S. and Colorado history and legislation related to bilingual education and second language education, as well as current and historical immigration issues as they impact students, families, communities, schools, and educators. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5190 - Culturally Responsive Pedagogy and Practices (3 Credits)
This course focuses on developing practical tools for culturally responsive, inclusive instructional strategies, classroom management and curriculum and lesson planning. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5680 - Spanish for Educators (3 Credits)
This course is designed to help teacher candidates advance their Spanish skills. Teacher candidates will clarify their motivations and purposes for studying Spanish and gain a greater understanding of language assessments and of their own Spanish abilities and increase insight and empathy for emergent bilingual students. Cross-listed with CLDE 3680. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5700 - Social Studies for Multilingual Learners (3 Credits)
Participants will use a social justice lens to investigate the content and language demands of the four disciplines of social studies: History, Civics, Geography and Economics. This class focuses on Social Studies methods as well as essential practices for teaching multilingual students. Cross-listed with CLDE 4700. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5800 - Language Variation & Implications for Teaching (3 Credits)
Provides an introduction to the field of educational sociolinguistics and research of classroom discourse. Students are introduced to the collection and analysis of oral and written language in educational contexts. Basic concepts and key issues regarding the form-function relationships of language use in instructional settings are discussed. Cross-listed with CLDE 7800. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5810 - Literacy for Bilingual Learners offered for Student Teacher Residency (STR) (3 Credits)
This course, for residents in the STR program, highlights the best practices for language and literacy development for culturally and linguistically diverse learners, including bilinguals, multilinguals, and speakers of non-standard varieties of English. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5820 - Teaching Multilingual Learners, Advanced (3 Credits)
This course focuses on the hands-on practical application of methods and techniques that support language, academic and identity development for bilingual learners. Course work includes critical perspectives on teaching techniques, investigations into the research on teaching techniques in multilingual education, as well as an emphasis on teachers taking leadership in the field of CLDE. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5824 - Theories and Methods of Bilingual Education (3 Credits)
Taught in Spanish, this course explores theories and methods of effective instruction of Spanish-English bilingual children. The course addresses theories of bilingualism and bilingual language/literacy development as well as methods for teaching in bilingual classrooms. Max hours: 3 Credits.
Grading Basis: Letter Grade
CLDE 5825 - Methods of Content Teaching for Bilingual Learners (3 Credits)
Provides an in-depth study of curriculum options for learners developing English in schools. Participants examine and apply strategies and materials for developing linguistic and academic capabilities of language learners, with optional extensions for bilingual program educators. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5827 - Developing Content Teaching Methods for Bilingual Learners through PLC (3 Credits)
Through this flexible start course, students will synthesize the professional development work done through district offered e-workshops, and relate it to the literature on best practices for culturally and linguistically diverse classrooms. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5828 - Practitioner Inquiry into the Role of Language in Teaching (3 Credits)
Participants will synthesize work done through e-workshops, and connect this practical professional development work to important scholarship in the broader field of education research, examining role of language, culture, and identity in teaching and learning. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5835 - Special Topics: Culturally and Linguistically Diverse Education (0.5-3 Credits)
Advanced study of special topics that examine multilingualism, cultural pluralism, and community in Culturally and Linguistically Diverse Education. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 15.

CLDE 5840 - Independent Study: CLDE (1-4 Credits)
Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 4.

CLDE 5850 - Culminating Experience: Bilingual Specialist (1 Credit)
In this capstone, students compose a 3-5 minute video, plus provide artifacts from teaching and coursework with explanations of how these artifacts show mastery of CDE Standards 8.23 for Bilingual Education Specialist competencies. Prereq: Completion of CLDE endorsement AND 9 units in Bilingual Specialist pathway CLDE 5824, SPAN 5020, SPAN 5060, SPAN 5076, SPAN 5080, SPAN 5099, and 5980. Max hours: 1 Credit.
Grading Basis: Satisfactory/Unsatisfactory
PreReq: Completion of CLDE endorsement (CLDE 5010, CLDE 5160, CLDE 5070, CLDE 5030, CLDE 5820, CLDE 5050, CLDE 5825, CLDE 6912) AND 9 units in Bilingual Specialist pathway (CLDE 5824, SPAN 5020, SPAN 5060, SPAN 5076, SPAN 5080, SPAN 5099, and 5980).

CLDE 5910 - Improving Student Outcomes: Interdisciplinary Inquiry (3 Credits)
This course operates from three distinct disciplinary perspectives: urban planning (community and schools), education (quality teaching), and public policy (accountability). Students explore important factors related to improving K-12 student outcomes: resources, leadership, teaching and parent/community involvement from three disciplinary perspectives. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 5920 - Immigration through Children’s Literature (3 Credits)
This class explores themes of immigration and multilingualism by examining children’s and young adult literature. Combines techniques for teaching literacy in multilingual environments with foundational themes in the study of immigration and multilingualism. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 6910 - Leadership Practicum in CLDE (3 Credits)
This practicum course grants credit for field significant experiences, connected to the program of study and the Colorado standards for endorsement. Teachers who can engage in, synthesize, and reflect on these experiences are eligible for this course credit. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory

CLDE 6912 - Teacher Inquiry in Multilingual Classrooms (3 Credits)
This seminar provides opportunities for advanced students in the M.A. program to apply an inquiry lens to the concepts of CLDE. Students design an inquiry project, where they focus on a problem of practice, create an action research question, collect student work as data, and analyze findings and results. Students work in research teams, providing feedback and observing each other’s classrooms. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 6950 - Master’s Thesis (4 Credits)
This class provides the opportunity for CLDE MA students to complete a Masters’ thesis in place of the CLDE Culminating Experience. This class is open to students with advisor support and approval. Max hours: 4 credits.
Grading Basis: Letter Grade

Additional Information: Report as Full Time.

CLDE 7040 - Social Justice Liberation: A Rehearsal for the Revolution (3 Credits)
We will explore TO and CRT. Students will engage in class discussions, theatre workshops, and critically analyze the applicability of these concepts to education and community work through deep and thorough engagement of readings, TO activities, and discussions about school and community activism with peers and the greater community. Cross-listed with CLDE 5040. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7090 - Research Seminar (3 Credits)
An advanced course which focuses on specific issues in language, language acquisition and language teaching. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7210 - Introduction to Leadership for Latin@ Learners (1 Credit)
In this introductory module, students will move beyond typical discussions of leadership that are neutral with regards to the students and families being served to one that puts linguistic and cultural diversity at the center of the discussion. Students will first survey the current state of Latin@s in education and communities from a local and national perspective. We will then co-construct a set of broad questions and examine theoretical frameworks that set the stage for the remaining courses in the program. Max hours: 1 Credit.
Grading Basis: Letter Grade
CLDE 7220 · Legal And Policy Foundations For Latin@ Students (2 Credits)
This course is a comprehensive survey of the highlights and lowlights of federal, state, and local history, legislation and policy regarding the education and rights to education and language for Latin@ students. The readings and discussion are around various ideologies, philosophies, and theoretical underpinnings of education. In this class you will develop skills in critical consideration of the rights of all in US society and the responsibilities of the public institution of schools. As the performance assessment for this course you will have an opportunity to focus on a Colorado school district, community or community organization of your choosing. You will outline history, legislation, and policy for that site. Max hours: 2 Credits.
Grading Basis: Letter Grade

CLDE 7230 · Language and Literacy in Bilingual Learners (3 Credits)
This course focuses on first and second language acquisition, and its impact on literacy in young children, elementary and secondary students, and students with special needs. Topics are literacy and language development, assessment, culturally responsive teaching, and school reform policies. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7250 · Systems, Policy, and Advocacy in Latin@ Communities (2 Credits)
This hybrid, 2-credit module introduces participants to methods of policy research and analysis across levels (federal, state, local) and the historical contexts behind key policies. Participants apply studied forms of policy analysis to investigate and engage with policies affecting their communities. Max hours: 2 Credits.
Grading Basis: Letter Grade

CLDE 7260 · Synthesizing Research in Latin@ Learners and Community (1 Credit)
In this final module, students will revisit the theoretical frameworks and research questions they have examined throughout their coursework and: a) identify a problem of practice and research questions they wish to explore in greater depth; b) identify theoretical framework(s) that will guide your research; and, d) develop a comprehensive literature review. Max hours: 1 Credit.
Grading Basis: Letter Grade

CLDE 7310 · Critical Race Theory: History, Theory, and Application (3 Credits)
Students will gain knowledge of Critical Race Theory and its early origins. Key themes to be explored include interest convergence, intersectionality, revisionist history, critiques of Liberalism, and critiques of CRT. Students also explore methodological issues and the potential applicability of CRT to their own research. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7320 · (Re)Claiming Dominant Narratives: History, Education, & Activism in Latinx (3 Credits)
Students will review a condensed history of Latinx peoples in America. Working with civil rights activists, scholars, and local community members, students will utilize decolonized methodologies to conduct a community story preservation project to reclaim the dominant narrative of local movements. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7330 · Languages and Literacies in Latinx Communities (3 Credits)
This course considers language and literacy from a critical sociocultural perspective and examines the impacts of language and literacy policies in the lives of Latinx communities in the U.S. The topics covered include language policies and ideologies, language as a colonial concept, bilingualism, translanguaging, biliteracy, and assessment. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

CLDE 7410 · Communication & Control: Systemic Change (3 Credits)
Examines educational settings – classrooms, schools, school districts, corporate and clinical settings, church basements and community centers – as systems, and explores strategies for change. Participants draw on interdisciplinary perspectives of individual and group behavior as they develop personal theories of change and apply these to their own situations. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7713 · Introduction to Language Policy (3 Credits)
The legal, ideological, and historic foundations of language policies are examined. Also examined are connections with related topics such as language rights, language and power, and issues from the sociology of language, such as language loyalty. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7800 · Language Variation & Implications for Teaching (3 Credits)
Provides an introduction to the field of educational sociolinguistics and research of classroom discourse. Students are introduced to the collection and analysis of oral and written language in educational contexts. Basic concepts and key issues regarding the form-function relationships of language use in instructional settings are discussed. Cross-listed with CLDE 5800. Max hours: 3 Credits.
Grading Basis: Letter Grade

CLDE 7840 · Independent Study: CLDE (1-4 Credits)
Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

Decision Sciences For Business (DSCI)

DSCI 6440 · Quality and Process Improvement (3 Credits)
Studies the identification, measurement and improvement of quality and the practical management issues related to implementing quality systems within organizations. Topics include historic and contemporary views of quality, statistical quality control tools including Six SigmaSM, work design and measurement and process flow and design. Prereq: BUSN 6530 with a grade of "C" or better . Max hours: 3 Credits.
Grading Basis: Letter Grade

Prereq: BUSN 6530 with a grade of "C" or better Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
DSCI 6822 - Services Operations (3 Credits)
Examines the unique issues involved in the management of service operations. Operations management principles specific to service industries are given in-depth. In addition, simulation is introduced as a technique for studying service industries. Prereq: BUSN 6530 or permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

**Design & Planning (DSPL)**

DSPL 7011 - Research Design (3 Credits)
Students are provided with a "hands on" understanding of methodological issues to become both intelligent consumers of social science research and competent producers of empirically based knowledge. The course moves through the research process covering hypothesis formulation, research design, data collection, measurement, and some fundamentals of statistical inference. Prereq: Admission to the PhD program in Design and Planning or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

DSPL 7012 - Theories of Planning (3 Credits)
Examines theories of planning and problems of plan implementation. Review and assesses a range of theories of intervention - market imperfections, political economy, regulations, community, rationality, and communication - relying on examples from students research as well as case studies developed by students. Prereq: Admission to the PhD program in Design and Planning or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

DSPL 7013 - Environment and Behavior (3 Credits)
Explores contributions of social research to understanding what facilitates and motivates people's adoption of sustainable environmental behaviors. It examines personal and collective behaviors, at scales that range from buildings to global environmental change, in the developed and developing world. Prereq: Admission to the PhD program in Design and Planning or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

DSPL 7014 - Colloquium (1 Credit)
Presentations of research projects by students, college faculty members and visitors. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

DSPL 7015 - Historiography and Architecture (3 Credits)
Advanced seminar concerning the study of the written record of the past and how it is established. Readings focus on canonic texts formative to the discipline and the strategies they offer for historical research. Prereq: "Course is offered to doctoral students but masters students may enroll with instructor approval." Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

DSPL 7016 - Architecture, in Theory (3 Credits)
Explores theories and texts that have influenced the analysis and the production of architectural form. The focus is on the expressive potential of architectural forms and the modalities of the realization of this potential. Prereq: "Course is offered to doctoral students but masters students may enroll with instructor approval." Cross-listed with ARCH 6254. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

DSPL 7017 - Pro-Seminar (3 Credits)
Advanced, graduate-level course (seminar, independent-study, or other) addressing the history of architecture, landscape, or urbanism. Prereq: "Course is offered to doctoral students but masters students may enroll with instructor approval." Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

DSPL 7018 - Special Topics in Design and Planning (1-3 Credits)
Various topical areas in design and planning are studied, including those in history, theory, methods, and practice. Repeatable. Max Hours: 18 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 18.
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

DSPL 7019 - Independent Study: DSPL (1-3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to design and planning. Restriction: Graduate level students. Repeatable. Max hours: 16 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 16.
Restriction: Graduate level students.

DSPL 7850 - Teaching Assistantship (3 Credits)
Work with a faculty member in a course to help with class preparation and delivery. Terms offered: fall, spring, summer. Restriction: Restricted to students in the College of Architecture and Planning PhD program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the College of Architecture and Planning PhD program.
Typically Offered: Fall, Spring, Summer.
DSPL 7950 - Doctoral Thesis Research (1-10 Credits)
Conducting research for doctoral dissertation, including data collection, analysis and presentation of findings. Restriction: Graduate level students. Repeatable. Max hours: 30 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 30.
Restriction: Graduate level students.
Additional Information: Report as Full Time.

Doctoral Studies in Educ Prog (DSEP)

DSEP 6000 - Academic Writing for Doctoral Students (1 Credit)
Tailored for graduate students in education. Focuses on techniques for improving academic writing, particularly planning, organizing, drafting, revising, and editing papers, i.e. course assignments, portfolio products, doctoral proposals or dissertation chapters. Prereq: Admission to doctoral program. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

DSEP 6010 - APA Conventions in Academic Writing (1 Credit)
This workshop, specifically directed to doctoral students, concentrates on practical issues involved in documenting sources and following conventions for other text features using the current Publication Manual of the American Psychological Association and updates posted on the APA Web site. Prereq: Admission to the doctoral program. Max hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

DSEP 6020 - Advanced Academic Writing for Doctoral Students (1 Credit)
This workshop is designed for doctoral students in education. Focuses on practical strategies for managing, organizing, revising and editing academic papers, especially complex writing projects such as dissertation proposals and dissertation chapters. Prereq: DSEP 6000 or permission of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

DSEP 7830 - Special Topics (1-6 Credits)
Special topics that reflect current research and scholarly exploration of leadership and innovation. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

DSEP 7840 - Independent Study: DSEP (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

DSEP 8990 - Doctoral Research Project Seminar (1-10 Credits)
Doctoral Research Project coursework toward the completion of an EdD degree in Education. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.
Additional Information: Report as Full Time.

DSEP 8991 - EdD Doctoral Research Project (1-10 Credits)
Doctoral Research Project (DRP) coursework toward the completion of the EdD degree. Restriction: Restricted to EdD Students. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.
Restriction: Restricted to LDRE EDd majors within the School of Education and Human Development.

DSEP 8994 - Doctoral Dissertation (1-10 Credits)
Doctoral dissertation coursework toward the completion of a EdD or PhD degree in Education. Restriction: Restricted to EDHD-PhD majors within the School of Education and Human Development. Repeatable. Max hours: 30 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 30.
Restriction: Restricted to EDHD-PhD majors within the School of Education and Human Development.

Additional Information: Report as Full Time.

Early Childhood Education (ECED)

ECED 5010 - Curriculum in Early Childhood Education (3 Credits)
Review of principles of early childhood curriculum and program development. Linkages are made between theoretical bases of development and curriculum planning. Curriculum areas considered include language and literacy, mathematics, motor, social-emotional, science, social studies and aesthetic development. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 5040 - Administrative Seminar (3 Credits)
Emphasizes topics required of administrators to effectively lead and manage early childhood inclusive classrooms or other related programs including leadership capacity, professionalism, administration, teaming/collaboration, communities of practice, staff management, safety, and professional development. Cross-listed with ECED 4040. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 5060 - Working with Families and Communities (3 Credits)
Theories, practices and research related to working with families and communities. Topics include: social systems perspective, family structures and forms; family support systems; family-centered practice; family/professional partnerships; effective communication; and working with parents of children with special needs. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
ECED 5070 - Social Competence and Classroom Supports (3 Credits)
Emphasizes prevention, positive behavioral interventions and support, and social/emotional development for children birth to eight. Focus on the practical application of intervention strategies based on current research and evidence-based practices. Cross-listed with ECED 7070. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5080 - Language and Literacy in Young Children (3 Credits)
Overview of theories and research in early language and literacy development. Emphasis on sociocultural beliefs and practices associated with the use of language and literacy in the different contexts. Information about language disorders found in early childhood settings is discussed. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 5091 - Educators as Social Change Agents (3 Credits)
Focus on developing knowledge, skills and dispositions to advance equity and social justice in classrooms, programs, and communities to activate educators as social change agents and implement quality inclusive practices for young children from diverse backgrounds. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5102 - Introduction to Developmentally Appropriate Curriculum (1-3 Credits)
Introduces developmentally appropriate curriculum and instructional practices in early education and the elementary grades. Subject areas considered include literacy, language arts; mathematics, computers, blocks; science, outdoor education; social studies, thematic units; and art, drama, music, physical activity. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 5104 - Advanced Developmentally Appropriate Curriculum (1-3 Credits)
Extends earlier learning about developmentally appropriate curriculum and instructional practices in early education and the elementary grades. Students elaborate their knowledge of subject area materials and activities. A curriculum unit that is developmentally appropriate is planned, implemented and evaluated. Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

ECED 5110 - Advanced Infant and Toddler Development: (3 Credits)
Focuses on development of infants/toddlers to inform responsive caregiving practices. Develop observation skills to understand infant/toddler behavior. A relationship-based approach to curriculum is emphasized. State requirements for licensed infant/toddler programs, accreditation and quality standards are discussed. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5200 - Screening and Assessment of Young Children (3 Credits)
Provides knowledge and field-based experience in the administration and scoring of screening and assessment for infants, toddlers, and preschool children. Understand and administer a variety of formal and informal measures including screening, evaluation, play-based and curriculum-based assessments. Cross-listed with ECED 7500. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 5202 - Classroom Management to Promote Positive Behavior (3 Credits)
Evidence-based classroom management strategies to promote social competence and reduce behavior problems. Includes strategies for responding to challenging behavior and developing individualized behavior support plans. Explores factors that influence the lives of young children including family disruption, stress, violence and trauma. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 5210 - Overview of Infant Toddler Autism Services (3 Credits)
This course will provide students with a general introduction to the legal and procedural elements that characterize state-of-the-art services to infants and toddlers with ASD. The course will review the Federal mandate for services, principles of practice, and evidence-based teaching strategies for children with autism. Must be accepted into the Infant Toddler Autism Certificate Program. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5211 - Applied Treatment Delivery for Infants and Toddlers with ASD (3 Credits)
The course explores current treatment methods and philosophies for young children with Autism Spectrum Disorder (ASD). Common intervention approaches are reviewed, with discussion of the evidence base of each. Intervention goals covered address language, play/socialization, early adaptive skills, and positive behavior. Must be accepted into the Infant Toddler Autism Certificate Program. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5212 - Coaching for Families Infants/Toddlers w/ Autism (3 Credits)
This course provides the knowledge and skills necessary to implement recommended, evidence-based practices with families of infants and toddlers with or at risk for ASD. The course will review current evidence based strategies for supporting families, collaborating with families, and using evidence-based family coaching strategies. Must be accepted into the Infant Toddler Autism Certificate Program Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5301 - Child Development: Theory to Leadership Practices (3 Credits)
This course will provide an introduction to theories of child development from an interdisciplinary perspective. It examines development in the cognitive and socioemotional domains utilizing biological, social, psychological and anthropological perspectives and how theory is used to shape program models. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5311 - Equity for Leadership in Early Childhood Programs (3 Credits)
This course is designed to provide early childhood leaders with an understanding of the equity issues present in early childhood systems and how these issues are reflected in individual identities and programs. Theories from the academic community will be used to facilitate student growth in understanding how these issues interact with them at a personal, professional and leadership level. Max hours: 3 Credits.
Grading Basis: Letter Grade
ECED 5312 - Leading Learning Organizations (3 Credits)
This course will deepen student's capacity to lead effectively and learn how to create an adaptive, flexible learning organization well positioned for delivering effective and sustainable programs and services on behalf of young children and families. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5320 - Community-Based Action Research: Capstone (3 Credits)
This course is designed to foster the leader's appreciation, skills, and practice as a participatory action researcher. Students will learn these concepts by leading a participatory action-research project in their community around a challenging early childhood issue and will present their action research project culminating at a Capstone Celebration. Prerequisite: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5330 - Introduction to Transformational Leadership (3 Credits)
This course outlines the evolution of leadership theory over the past half-century and immerses students in an exploration of the values, leadership capacities, and practices that define transformational leadership as they apply to effecting change to support the success and well-being of young children and their families and communities. Prerequisite: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 2 Credits.
Grading Basis: Letter Grade

ECED 5340 - Strategic Leadership & Current Issues in Early Child (2 Credits)
This course addresses current issues in research, theory, policy development, and administrative leadership of programs for all young children. Strategic Leadership anchors all decisions to a shared vision through the systematic evaluation and strategic planning for program or organization growth and service. Prerequisite: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5350 - Policy and Advocacy in Early Childhood (3 Credits)
This course provides the historical and political context of early care and education in the United States. Local, state, and federal mandates, public laws, and legislative procedures and initiatives will be investigated. Prerequisite: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5410 - Coaching for Early Childhood Professionals: Foundations (3 Credits)
The Foundations course focuses on learning, understanding and using relationship and evidence-based coaching skills in early childhood settings. Students will practice the fundamentals of coaching using a systematic, individualized, reflective approach and sharing experiences with others in the course. Cross-listed with ECED 4410. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5420 - Coaching Early Childhood Professionals: Awareness (3 Credits)
The Awareness course focuses on increasing coaches’ skills at introspection, thoughtful planning, intentional application of coaching knowledge and skills, and continuous improvement. Students will integrate skills with effective application in class and real life coaching experiences, managing progress and accountability. Cross-listed with ECED 4420. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5430 - Coaching for Early Childhood Professionals: Attuning (3 Credits)
The Attuning course will integrate skills from the Foundations and Awareness courses to complete the EC Coaching Certificate. Students practice refining and altering coaching based on needs and readiness. Students learn sustainable organizational change that embed coaching in all professional practice. Cross-listed with ECED 4430. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5450 - Coaching for Early Childhood Professionals: Integrating (3 Credits)
The Integrating course will provide an advanced opportunity for students to practice habitually using key coaching skills for the purpose of supporting the development, capacity, and practices of coaches, programs, and systems. Students will practice attending to personal and professional issues that impact coaching. Cross-listed with ECED 4450. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5510 - Coaching Early Childhood Professionals: Coaching Action Research (3 Credits)
The Coaching Action Research course includes the planning, implementation, and evaluation of a research project that integrates the principles of coaching into the context of a coaching practice for a real-life client. Students will synthesize the knowledge and skills developed in the Foundations, Awareness, Attuning, and Integrating courses. Prerequisite: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5550 - Capstone in Early Childhood Education (3 Credits)
Capstone is a final project that demonstrates your academic and professional preparation to practice as a master coach. This capstone integrates knowledge and skills developed in previous courses and culminates with an action research project and a Capstone Celebration. Prerequisite: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5560 - Perspectives of Disability (3 Credits)
This course explores multiple perspectives of disability, including: legal definitions and protections, medical models, social construction of disability, cultural perspectives, and familial perspectives of disabilities. The course emphasizes disability as defined under the IDEA, including features of categorical definitions of disability. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5580 - Clinical Practicum - Early Childhood Coaching (3 Credits)
The Clinical Practicum course provides an opportunity for students to practice and develop skills in coaching using a systematic, individualized, reflective approach and sharing experiences with others in the course. Students will practice attending to personal and professional issues that impact coaching. Prerequisite: Must be admitted to the Buell Early Childhood Leadership Program (BECLP). Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5590 - Independent Study (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade

ECED 5650 - Dual Language Learners Learning and Development (3 Credits)
The course will review current research on the learning and development of young dual language learners (birth through 8) and the classroom environments and instruction that can promote their learning. The course uses a socio-cultural framework to view children's learning. Cross-listed with ECED 4650. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5680 - Workshop: Topics in Early Childhood Education (1-4 Credits)
Topics and credit hours vary from semester to semester. Cross-listed with ECED 4800. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

ECED 5840 - Independent Study (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ECED 5850 - Capstone in Early Childhood Education (3 Credits)
Capstone is a final project that demonstrates your academic and professional development. It explains professionally who you are, where you have been, how you have developed in ECE. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 5933 - Internship III & Collaborative Learning Community (2-8 Credits)
ECED 5933 is the final internship in a series of three completed during the professional year of the ECE program plan that provides the necessary learning opportunities for candidates to gradually develop their practice to be licensed as an early childhood educator. Cross-listed with ECED 4933. Repeatable. Max Hours: 8 credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

ECED 6010 - Literacy and Mathematics K-2 (3 Credits)
Principles of early reading and mathematical development for grades K-2 including diverse instructional strategies and differentiation for children with disabilities. Linkages are made between child development and learning expectations for mathematics, reading and writing and curriculum planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

ECED 6100 - Perspectives of Disability (3 Credits)
This course explores multiple perspectives of disability, including: legal definitions and protections, medical models, social construction of disability, cultural perspectives, and familial perspectives of disability. The course emphasizes disability as defined under the IDEA, including features of categorical definitions of disability. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

Typically Offered: Summer.
ECED 6200 - Early Intervention Strategies (3 Credits)
Explores current research, knowledge, and skills related to evidence-based intervention strategies and service delivery in high quality inclusive settings for young children with special needs from infancy through age eight. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

ECED 6300 - Contextual Curriculum 1 (3 Credits)
This course focuses on the role of the teacher in developing a contextual curriculum that deeply engages learners. Developing curriculum includes observing learners, documenting observations using technology, and reflecting on documentation with colleagues to intentionally implement curriculum plans. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6310 - Contextual Curriculum II (3 Credits)
This course builds upon competencies developed in ECED 6300: Contextual Curriculum I through curriculum development that relies on the cyclical process of critical observation, documentation, analysis, reflection, and provocation. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6320 - A Colorado Interpretation of Reggio Emilia Approach (3 Credits)
This course focuses on the Reggio Approach to Early Childhood Education and its interpretation in a Colorado context, Boulder Journey School. Students will experience three modules, each with cycles of inquiry, construction of understandings, application into their own context and mediation by course instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6330 - Supportive Social Learning (3 Credits)
This course will provide students with the strategies that promote social competence and reduce the potential for interactions and behaviors that often challenge teachers. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6340 - Messing About with STEM (3 Credits)
This course focuses on the role of the teacher in supporting STEM experiences in diverse contexts. Students will draw from relevant research and philosophy of science, combined with inquiry-based experiences guided by established frameworks, to strengthen their STEM mindset. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6350 - Literacy and the Hundred Languages (3 Credits)
In-depth study of scientific and theoretical foundations of communication and literacy development, the conceptual paradigm of 100 languages of children, the nature of languages, and acquisition patterns in contexts of individual variation, cultural and linguistic differences, or language challenges. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6360 - Children and Teachers as Change Agents (3 Credits)
This course focuses on partnering with children and other educators around a community-based action project that will contribute to the community. Students will review literature and documentation, collaborate, design, lead, and advocate around a topic that relates to young children. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ECED 6690 - Seminar: Research and Current Issues in Early Childhood Education (3 Credits)
Research methods are reviewed and then selected topics are considered. Emphasis is on research findings and current issues of importance to teachers, administrators, specialists, collaborator/consultants, and researchers in early childhood and early childhood special education. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 6910 - Early Childhood Special Education Infancy Practicum (1-4 Credits)
Supervised field-based experiences in settings for children with disabilities and at-risk infants, toddlers, and their families. Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200

ECED 6911 - Initial Practicum and Field Experience in Early Childhood Education (1-4 Credits)
In this experience, you will be introduced to an array of skills/practices that support working effectively with young children and families in the context of their local community. You will work within the community to support children's academic/social development. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

ECED 6912 - Early Childhood Special Education Preschool Practicum (1-4 Credits)
Supervised field-based experiences in settings for young children with disabilities and their families, including school districts and community agencies. Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200.
Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200

ECED 6914 - Early Childhood Special Education Primary Practicum (1-4 Credits)
Supervised field-based experiences in kindergarten through second grade settings with typically developing children, children with special needs and special education teams. Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Prereq: ECED 5010, 5070, 5080, 5200, 6100, and 6200

ECED 7000 - ECE Today: Examining Practices, Policies, & Key Issues (3 Credits)
This course provides in-depth understanding of the issues that shape contemporary early care and education in the U.S. The course addresses historical and contextual variables, providing a thorough overview of the pedagogy, practices, and policies framing the design and delivery of ECE. Cross-listed with EDUC 7000. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.
ECED 7002 - Early Childhood Leadership Seminar II (3 Credits)
The purpose of the course is to provide scholars with leadership knowledge and skills to implement policies, laws, programs, and systems that support the use of evidence-based practices with young children with disabilities. Restriction: Restricted to EDHD-PhD, LDRE-EDd and EDLI-PhD majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd and EDLI-PhD majors within the School of Education and Human Development.

ECED 7004 - Early Childhood Leadership Seminar III (3 Credits)
The purpose of this seminar is to provide the knowledge and skills to implement evidence-based practices in early childhood settings. This seminar will focus on policies and practices that support implementation, scale-up, and sustainability of evidence based practices in early childhood systems. Prereq: ECED 7002. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: ECEC 7002 Restriction: Restricted to EDHD-PhD, LDRE-EDd and EDLI-PhD majors within the School of Education and Human Development.

ECED 7010 - History, Child Development, and Equity. Early Childhood (3 Credits)
This course critically considers the developmental science that informs policy and program development, the social, political and economic forces that shape the study of young children and contribute to trajectories that benefit some children while disadvantaging others; the changing roles of families; and implications of these issues for policy. Cross-listed with EDUC 7010. Max hours: 3 Credits.
Grading Basis: Letter Grade

ECED 7011 - Proseminar I in Child, Youth, and Family Studies (1 Credit)
This course aims to introduce students in the Child, Youth, and Family Studies PhD pathway to doctoral studies and to faculty research. The course is also designed to support students in situating themselves in the discipline, enhancing their scholarly identity, and refining academic writing and presentation skills. Cross-listed with EDUC 7011 and HDFR 7010. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP

ECED 7020 - ProSeminar II in Child, Youth, and Family Studies (1 Credit)
This course is for 2nd year students in the Child, Youth, and Family Studies PhD pathway. The course is designed to support students in developing a research agenda, exploring ethics in research, enhancing scholarly identity, and preparing for comprehensive examinations. Prereq: HDFR 7010 or ECED 7011 or EDUC 7011. Cross-listed with HDFR 7020 and EDUC 7020. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011.

ECED 7030 - ProSeminar III in Child, Youth, and Family Studies (1 Credit)
This course aims to provide third year doctoral students in the Child, Youth, and Family Studies PhD pathway with an immersive writing opportunity and professional development experience to help prepare for comprehensive examinations, the dissertation, and post graduate school life. Prereq: ProSem I and ProSem II (HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020). Cross-listed with EDUC 7030 and HDFR 7030. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 AND HDFR 7020 or ECED 7020 or EDUC 7020.

ECED 7040 - Advanced Studies in Applied Child Development (3 Credits)
Provides an intensive overview of the science of child development. A range of theoretical perspectives will be emphasized highlighting the role of context. Students will apply theory and research to programs that seek to advance equity in opportunities and outcomes. Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development. Cross-listed with HDFR 7040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development.

Typically Offered: Spring.

ECED 7070 - Social Competence and Classroom Supports (3 Credits)
Emphasizes prevention, positive behavioral interventions and support, and social/ emotional development for children birth to eight. Focus on the practical application of intervention strategies based on current research and evidence-based practices. Cross-listed with ECED 5070. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 7080 - Advancing Equity and Inclusion in Early Childhood Education (3 Credits)
This doctoral course explores equity and inclusion issues in early childhood education, including historically marginalizing approaches, policies, and practices. Conceptual frameworks are examined for their usefulness in promoting positive change through socially just early childhood practices, policies, and research. Restriction: Restricted to all PhD majors, LDRE-EDd and SPSY-PsyD majors withing the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd and EDLI-PhD majors within the School of Education and Human Development.

Typically Offered: Spring.

ECED 7015 - Screening and Assessment of Young Children (3 Credits)
Provides knowledge and field-based experience in the administration and scoring of screening and assessment for infants, toddlers, and preschool children. Understand and administer a variety of formal and informal measures including screening, evaluation, play-based and curriculum-based assessments. Cross-listed with ECED 5200. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

ECED 7050 - Social Studies in Education (3 Credits)
Provides an intensive overview of the science of child development. A range of theoretical perspectives will be emphasized highlighting the role of context. Students will apply theory and research to programs that seek to advance equity in opportunities and outcomes. Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development. Cross-listed with HDFR 7040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development.

Typically Offered: Spring.

ECED 7070 - Social Competence and Classroom Supports (3 Credits)
Emphasizes prevention, positive behavioral interventions and support, and social/emotional development for children birth to eight. Focus on the practical application of intervention strategies based on current research and evidence-based practices. Cross-listed with ECED 5070. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ECED 7200 - Advancing Equity and Inclusion in Early Childhood Education (3 Credits)
This doctoral course explores equity and inclusion issues in early childhood education, including historically marginalizing approaches, policies, and practices. Conceptual frameworks are examined for their usefulness in promoting positive change through socially just early childhood practices, policies, and research. Restriction: Restricted to all PhD majors, LDRE-EDd and SPSY-PsyD majors withing the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd and EDLI-PhD majors within the School of Education and Human Development.

Typically Offered: Spring.

ECED 7015 - Screening and Assessment of Young Children (3 Credits)
Provides knowledge and field-based experience in the administration and scoring of screening and assessment for infants, toddlers, and preschool children. Understand and administer a variety of formal and informal measures including screening, evaluation, play-based and curriculum-based assessments. Cross-listed with ECED 5200. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EDd, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

ECED 7830 - Special Topics in Early Childhood Education (1-3 Credits)
Study of special topics that examine community and educational settings in Early Childhood Education to be selected by the instructor. Max hours: 6 Credits.
Grading Basis: Letter Grade
Economics (ECON)

ECON 5030 - Data Analysis with SAS (3 Credits)
Covers techniques for handling and interpreting economic data and conducting econometric analyses using SAS programming. Provides hands-on data management and analyses with large data sets with applications to business and economics, and prepare students for SAS Base Programmer certification exam. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Statistics with Computer Applications (ECON 3811) or a similar course is strongly recommended as preparation for this course. Cross-listed with ECON 4030. Term offered: fall, spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Fall, Spring.

ECON 5050 - Special Economic Problems (1-8 Credits)
Provides students the opportunity to critically evaluate some practical and theoretical problems under supervision, and to present results of their thinking to fellow students and instructors for critical evaluation. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4050. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Spring.

ECON 5073 - Microeconomic Theory (3 Credits)
Fundamental features of partial equilibrium theory of the firm, consumer and market. General equilibrium and welfare economic topics are examined. Features of the models that have empirical applications are accentuated. Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Fall.

ECON 5083 - Macroeconomic Theory (3 Credits)
Examines the major macroeconomic models within a common framework. Differences in the foundations, structure, and policy implications of the competing models are analyzed. Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Spring.

ECON 5090 - History of Economic Thought (3 Credits)
Traces the development of economic thought from ancient times to the 20th century. Considers the context in which these ideas were developed and their relationship to modern economic thought and contemporary economic problems. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Microeconomics (ECON 2022) and Macroeconomics (ECON 2012) or similar coursework is strongly recommended as preparation for this course. Cross-listed with ECON 4090. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Fall.

ECON 5150 - Economic Forecasting (3 Credits)
Teaches forecasting techniques used in business and government to project trends and short-term fluctuations. Actual data are employed in instruction and labs. State-of-the-art spreadsheet and algorithms are introduced as part of the course work. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Statistics with Computer Applications (ECON 3811) or similar coursework is strongly recommended as preparation for this course. Cross-listed with ECON 4150. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Spring.

ECON 5410 - International Trade (3 Credits)
Trade theory identifies who wins and loses from trade and why there are usually overall gains. Explores issues in immigration, globalization, income inequality, tariffs, dumping, the WTO, the environment, wages and growth strategies among others. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4410. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Spring.

ECON 5450 - Macroeconomic Theory (3 Credits)
Examines economic models of renewable resource management and models of exhaustible resource depletion. Analyzes decisions made by private firms and governments affecting the methods and rate of resource development. Examines the effects of resource development on economic growth and environmental quality and the effects of economic development on resource scarcity. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4550. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
ECON 5540 - Environmental Economics (3 Credits)
Economic approach to environmental problems: relationship between ownership structures, externalities and environmental damage; poverty, population pressure, and environmental degradation; valuation of environmental amenities; sustainability of economic activity; cost-benefit analysis applied to the environment; evaluation of alternative instruments for environmental control. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4540. Max hours: 3 Credits. Grading Basis: Letter Grade
Prerequisite ECON 5073 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).

ECON 5660 - Health Economics (3 Credits)
Introduces students to analytical skills and economic methods, and demonstrates how these methods can be applied to issues in health policy and management. Topics include: demand for health and medical care; health care costs, health reform, medical technology; market for health insurance; physicians, hospitals, and managed care; pharmaceuticals; regulations in the U.S. health care sector; demand for addictive substances; infant and maternal health; international comparisons of health care systems. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).

ECON 5740 - Industrial Organization (3 Credits)
Examines the determinants of, and linkages between, market structure, firm conduct, and industrial performance. Topics include: determinants of the market size; impact of different market structures on prices and outputs; strategic behavior of firms to prevent entry or induce exit of rival firms; collusion; price discrimination; advertising: competition, monopoly, and innovation; implications for economic efficiency and public policy.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4740. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).

ECON 5800 - Special Topics (1-3 Credits)
Current economics topics to be determined by the instructor.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).

ECON 5803 - Mathematical Economics (3 Credits)
Application of mathematical techniques in micro-and macro-economic analysis. Topics include simple and multivariable differentiation, basic matrix algebra, optimization, and integration with applications to economic models of consumption, production, market equilibrium, national accounting, and growth. Restriction: Students must be admitted to the MA in ECON, MS or PhD in Health Economics. Cross-listed with ECON 4803. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Students must be admitted to the MA in ECON, MS or PhD in Health Economics.
Typically Offered: Spring.

ECON 5813 - Econometrics I (3 Credits)
Theory and application of statistical techniques used to analyze economic problems. Topics include simple and multiple regression models, simultaneous equation models, and the problems encountered in their application. Students formulate models, obtain data, estimate models, interpret results and, forecast. Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).
Typically Offered: Fall.

ECON 5823 - Econometrics II (3 Credits)
Second course in the econometrics sequence, covering intermediate topics in cross-section and time series analysis. Topics include limited dependent variables, autoregressive and distributed lag models, longitudinal data analysis and unit roots, co-integration and other time-series topics. Prereq: ECON 5813 with a B- or higher.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).
Typically Offered: Spring.

ECON 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Spring.

ECON 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.
ECON 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

ECON 5950 - Master's Thesis (1-4 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ECON 6010 - Advanced Microeconomic Theory (3 Credits)
Recent and contemporary literature on fundamentals of economic theory. Consideration of value theory with particular emphasis on methodology, theory of demand, theory of the firm, and theory of distribution. Prereq: ECON 5073 with a B- or better. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 6020 - Advanced Macroeconomic Theory (3 Credits)
Considers general equilibrium and aggregative analysis in economic theory, with particular emphasis given to the theory of employment, consumption and investment. Prereq: ECON 5083 with a B- or higher. Restriction: Restricted to student with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5083 with a B- or higher. Restriction: Restricted to student with graduate standing

ECON 6022 - Federal Data for Health Research & Policy (1-3 Credits)
Students will develop the knowledge and skills required to effectively use a variety of federal and statistical data sets for health research and policy analysis. Each week is devoted to one or two federal statistical datasets—data collection methods, why they are collected and what health issues they are designed to address; what population they represent and at what geographic scale. Most critically, students will be able to distinguish between questions that can be addressed with a public version of the data and questions that require restricted versions of the data that are protected by federal law and guidelines. Students will read, discuss and present research from various perspectives (Demography, Economics, Geography, Public Health, Sociology) using these data sources and apply their knowledge of data analysis from a variety of perspectives. Students will learn how to gain access to restricted data, how to protect individual anonymity with best practice disclosure avoidance techniques and will develop a research proposal for confidential research access. Note: Familiarity with SAS (preferable) or other statistical software such as SPSS or Stata and statistics or data analysis is recommended. Restriction: Restricted to degree-granting graduate programs. Cross-listed with HBSC 6022, GEOG 5022, and SOCY 5022. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

ECON 6033 - Seminar In Applied Economics (1.5 Credits)
Familiarizes students with state-of-the-art applied economic research. Students read, discuss, and critique articles published in economic journals. Note: Topics vary with the instructor. Prereq: ECON 5813 with a B- or higher. Coreq: ECON 5823. Restriction: Restricted to students with graduate standing. Term offered: spring. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5813 with a B- or higher Coreq: ECON 5823 Restriction: Restricted to students with graduate standing

ECON 6043 - Seminar In Applied Economics II (1.5 Credits)
Familiarizes students with state-of-the-art applied economic research. Students read, discuss, and critique articles published in economic journals. Note: Topics vary with the instructor. Prereq: ECON 5813 with a B- or higher. Coreq: ECON 5823. Restriction: Restricted to students with graduate standing. Term offered: spring. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5813 with a B- or higher Coreq: ECON 5823 Restriction: Restricted to students with graduate standing

ECON 6053 - Seminar In Applied Economics (1.5 Credits)
Familiarizes students with applied research in economics. Students read, discuss, and critique articles in economic journals. Emphasis is placed on research design and methods employed in these articles to prepare students for development of their own research projects in subsequent courses. Topics vary with instructor, and may include international economics, labor economics, monetary theory, public or finance and development economics. Prereq: ECON 5813 with a B- or higher. Coreq: ECON 5823. Restriction: Restricted to students with graduate standing. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ECON 6060 - Special Topics (1-3 Credits)
Special topics in advanced microeconomics. Consideration of value theory based upon methodology, theory of demand, and theory of distribution. Restriction: Restricted to students with Graduate standing. Introduction to Mathematical Economics (ECON 3801) or similar coursework is strongly recommended as preparation for this course. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ECON 6073 - Research Seminar (3 Credits)
Focuses on training students to do rigorous research in economics. Topics include the analysis of large data sets, further development of econometric skills, and writing a research paper. Note: Students attend lectures and also meet regularly with the instructor in the process of doing a sophisticated research project. Prereq: ECON 5073 and ECON 5823 with a B- or higher and either ECON 6053 or ECON 6054 with a B- or higher. Restriction: Restricted to students with graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5823 with a B- or higher and either ECON 6053 or ECON 6054 with a B- or higher. Restriction: Restricted to students with graduate standing

ECON 6100 - Public Finance (3 Credits)
Advanced economic theory applied to the problems of public and private sector decision making. Applied topics in taxation, education, voting theory, welfare economics, externalities and public goods. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing
ECON 6410 - International Trade (3 Credits)
Contemporary and classical literature on theories of international trade. Topics include the determination of the pattern and terms of trade, the relationship between growth and trade, and commercial policy. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 6420 - International Finance (3 Credits)
Topics in international finance, including exchange rate determination, the adjustment process, international financial markets and the international monetary system. Prereq: ECON 5073 with a B- or better.
Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 6610 - Labor Economics (3 Credits)
Advanced study of the labor market, including: history, nature, and function of labor organizations; the process of wage determination; and the formation of public policy. Prereq: ECON 5073 and 5813 with a B- or higher. Restriction: Restricted to students with Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5813 with a B- or higher Restriction: Restricted to students with Graduate standing Typically Offered: Spring.

ECON 6666 - The Economics of Health Behaviors (3 Credits)
This course teaches an economic approach to studying health behaviors and the policies that affect them. Special attention will be paid to analyzing the effects of excise taxes and to understanding the quasi experimental approach to doing applied research in economics. Prereq: ECON 5073 and ECON 5813 with a B- or higher. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5813 with a B- or higher Restriction: Restricted to students with Graduate standing

ECON 6770 - Development Economics (3 Credits)
This course provides a theoretical and empirical framework for analyzing economic problems in developing countries focusing on the role of individuals, families and institutions. Topics include poverty traps, human capital accumulation, gender discrimination, microcredit and violent conflict. Prereq: ECON 5073 and 5803 with a B- or higher. Cross-listed with ECON 4770. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5803 with a B- or higher. Typically Offered: Fall.

ECON 6801 - Advanced Mathematical Economics (3 Credits)
Addresses economic dynamics, formal mathematical modeling in economics, and optimization in economic theory. Prereq: ECON 5803 with a B- or higher or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5803 with a B- or higher.

ECON 6810 - Econometrics and Forecasting (3 Credits)
Covers advanced topics in cross-sectional and time-series analysis. Emphasizes important theoretical and empirical issues encountered in applied work in economics and business. Topics include problems of structural change and model misspecification, instrumental variables, simultaneous equations models, distributed lags, maximum likelihood estimation, qualitative and limited dependent variables, Arima models, vector-autoregressions, issues on exogeneity and causality. Through the use of econometric software programs and actual data, students learn to execute estimation and forecasting projects soundly. Prereq: ECON 5813 and 5823 with a B- or higher. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5813 with a B- or higher Restriction: Restricted to students with Graduate standing

ECON 6840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

ECON 7073 - Advanced Microeconomic Theory II (3 Credits)
This is a second-semester Ph.D level course in microeconomics. The first semester course discussed consumer and producer theory: this course will discuss game theory, market equilibrium, and information economics. Prereq: ECON 5073 with a B- or better. Restriction: Restricted to students with Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing Typically Offered: Spring.

ECON 7661 - Health Economics I (3 Credits)
This is the first course in the Ph.D field sequence for Health Economics. The goal of this course is to familiarize you with the basic theory and empirical findings in the part of health economics which focuses on the market for medical care and the policy that surrounds it. Prereq or Coreq ECON 5823. Students must enroll in both courses concurrently or have completed ECON 5823 with a B- or better. Restriction: Restricted to students with graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 7662 - Health Economics II (3 Credits)
This course teaches an economic approach to studying the various policies that affect these risky health behaviors. The extensive economic literature on the causes and consequences of risky health behaviors will be studied. Prereq or Coreq ECON 5823 with a grade of B- or better. Restricted to students with graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-requisite ECON 5823 OR prerequisite ECON 5823 with a grade of B- or better. Restricted to students with graduate standing. Typically Offered: Spring.

ECON 7666 - Advanced Health Economics (3 Credits)
This course teaches an economic approach to studying the various policies that affect these risky health behaviors. The extensive economic literature on the causes and consequences of risky health behaviors will be studied. Prereq or Coreq ECON 5823 with a grade of B- or better. Restricted to students with graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-requisite ECON 5823 OR prerequisite ECON 5823 with a grade of B- or better. Restricted to students with graduate standing. Typically Offered: Fall.
ECON 8990 - Doctoral Dissertation (1-10 Credits)
Designed to allow doctoral students to conduct research for course credit prior to advancement to candidacy. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring. Repeatable. Max hours: 50 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 50.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring.

Education Admin & Supervision (EDUC)

EDUC 5000 - Special Topics: Administrative Leadership and Policy Studies (0.5-10 Credits)
Specific topics vary. Focus is on faculty-developed options to standard course offerings to facilitate program development and distance-learning activities. Repeatable. Max hours: 40 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 40.

EDUC 5001 - Special Topics: Administrative Leadership and Policy Studies (1-10 Credits)
Repeatable. Max Hours: 40 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 40.

EDUC 5010 - Paraeducator Supervision Academy (1 Credit)
Provides the paraeducator with knowledge and skills to work effectively in teams. Paraeducators refine their knowledge of the characteristics of paraprofessionals in education, the distinction between professional and paraprofessional roles and responsibilities, liability and ethical issues. Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5015 - Developmental Intervention Supervisor Academy (DISA) (1 Credit)
Developmental Intervention Supervisor Academy provides early intervention professionals with the knowledge and skills to work effectively in teams and to utilize and supervise Developmental Intervention Assistants (DI Assistant is the title used in Colorado for paraprofessionals in early intervention services). Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5020 - Trainers of Paraeducator Academy (1 Credit)
Provides the professional educator with the skills to provide effective presentations to paraprofessionals in schools. Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5025 - Developmental Intervention Trainers Academy (DITA) (1 Credit)
Developmental Intervention Trainer Academy (DITA) is offered to early intervention professionals who have completed EDUC 5015 (DISA). DITA provides the participants skills to become effective trainers who deliver training to Developmental Intervention Assistants (i.e. paraprofessionals in early intervention services in Colorado). Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5030 - Top Cadre of Trainers (TOPCAT) Seminar (3 Credits)
Provides CO-TOP Trainers (school professionals who have been through the PSA: EDUC 5010 and TOPA: EDUC 5020) ongoing support in their roles as supervisors and trainers of paraeducators. Through this seminar trainers receive updated information about CO-TOP Academies, find collegial support from other trainers, exchange ideas, gain presenting and adult teaching ideas, and receive feedback on their teaching of paraeducator academies. This seminar also addresses the questions and needs of the individual CO-TOP trainer with regard to CO-TOP paraeducator training materials and processes. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5040 - Mentoring Novice and Pre-Service Teachers (1 Credit)
Designed to help participants develop or enhance the skills necessary to successfully work with candidates who are completing teacher education programs. Concentrates on supervision and conference skills, adult learning theory, and communication skills. Max hours: 1 Credit.
Grading Basis: Letter Grade

EDUC 5060 - Higher Education in a Global World (3 Credits)
Examine the significant issues, practices, and research in higher education. Explore historical roots, evolutionary changes, and future trends for curriculum and learning modalities, organizational models, educational research, teaching and learning, equity in student outcomes, and campus environments in higher education. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5070 - Law and Ethics in Higher Ed and Student Affairs (3 Credits)
This course will introduce students to the laws that impact college students and institutions of higher education. Graduate students will obtain knowledge of and the necessary skills to apply a code of ethics to their practice in student affairs. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5080 - Resource Management in Higher Education (3 Credits)
Introduction to higher education finance, resource allocation, and evaluation practices including federal, state, and local revenue sources, institutional budgeting, and financial management. Key practices in higher education resource management include program planning and review for human, fiscal and facilities allocations. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 5130 - College Student Development (3 Credits)
This course examines theories of college student development including student learning and growth during the postsecondary years. This course will provide an introduction to psychosocial, cognitive, moral, and social identity development theories used to explain college student development. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

EDUC 5401 - Leading With Social and Emotional Learning in Mind (3 Credits)
This course will enable administrators to understand, investigate, assess, and plan to increase the quality and depth of social and emotional learning (SEL) in their schools and districts. Participants will explore the theoretical frameworks and scientific findings in the growing field of SEL. Cross-listed with INTE 5401. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

EDUC 5836 - Workshop: Educational Administration, Curriculum and Supervision (1-4 Credits) Repeatable. Max Hours: 15 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 15.

EDUC 6000 - Special Topics: Administrative Leadership and Policy Studies (1-10 Credits) Specific topics vary; focus is on faculty-developed options to standard course offerings to facilitate program development and distance-learning activities. Repeatable. Max Hours: 40 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 40.

EDUC 6840 - Independent Study (1-4 Credits) Max hours: 4 Credits. Grading Basis: Letter Grade

EDUC 7000 - ECE Today: Examining Practices, Policies, & Key Issues (3 Credits) This course provides in-depth understanding of the issues that shape contemporary early care and education in the U.S. The course addresses historical and contextual variables, providing a thorough overview of the pedagogy, practices, and policies framing the design and delivery of ECE. Cross-listed with ECED 7000. Max hours: 3 Credits. Grading Basis: Letter Grade

EDUC 7010 - History, Child Development, and Equity: Early Childhood (3 Credits) This course critically considers the developmental science that informs policy and program development; the social, political and economic forces that shape the study of young children and contribute to trajectories that benefit some children while disadvantaging others; the changing roles of families; and implications of these issues for policy. Cross-listed with ECED 7010. Max hours: 3 Credits. Grading Basis: Letter Grade

EDUC 7011 - ProSeminar I in Child, Youth, and Family Studies (1 Credit) This course is for 2nd year students in the Child, Youth, and Family Studies PhD pathway. The course is designed to support students in developing a research agenda, exploring ethics in research, enhancing scholarly identity, and preparing for comprehensive examinations. Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020. Cross-listed with HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020. Max hours: 1 Credit. Grading Basis: Letter Grade with IP Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020. Additional Information: Report as Full Time.

EDUC 7020 - ProSeminar II in Child, Youth, and Family Studies (1 Credit) This course is for 2nd year students in the Child, Youth, and Family Studies PhD pathway. The course is designed to support students in developing a research agenda, exploring ethics in research, enhancing scholarly identity, and preparing for comprehensive examinations. Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020. Cross-listed with HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020. Max hours: 1 Credit. Grading Basis: Letter Grade with IP Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020.

EDUC 7030 - ProSeminar III in Child, Youth, and Family Studies (1 Credit) This course aims to provide third year doctoral students in the Child, Youth, and Family Studies PhD pathway with an immersive writing opportunity and professional development experience to help prepare for comprehensive examinations, the dissertation, and post graduate school life. Prereq: ProSem I and ProSem II (HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020). Cross-listed with ECED 7030 and HDFR 7030. Max hours: 1 Credit. Grading Basis: Letter Grade with IP Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020.

EDUC 7100 - Leadership in Education (3 Credits) This course is for 2nd year students in the Child, Youth, and Family Studies PhD pathway. The course is designed to support students in developing a research agenda, exploring ethics in research, enhancing scholarly identity, and preparing for comprehensive examinations. Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020. Cross-listed with HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020. Max hours: 1 Credit. Grading Basis: Letter Grade with IP Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020.

EDUC 7230 - Organizational Performance In Educational Contexts (3 Credits) This course is for 2nd year students in the Child, Youth, and Family Studies PhD pathway. The course is designed to support students in developing a research agenda, exploring ethics in research, enhancing scholarly identity, and preparing for comprehensive examinations. Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020. Cross-listed with HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020. Max hours: 1 Credit. Grading Basis: Letter Grade with IP Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020.
EDUC 7520 - Strategic System Improvement (3 Credits)
The fundamental purpose of educational organizations (schools, districts, community colleges, higher education, non-profits) is to ensure high levels of learning for all. This course addresses topics such as data development and management, accountability, curriculum assessment and instruction, continuous improvement, and professional learning. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7530 - Strategic Leadership Development (3 Credits)
Successful leaders are able to articulate, protect and promote what is important. This course will examine the challenges of educational leadership and help participants clarify the core values essential to their success as a leader. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7600 - Higher Education Policy and Governance (3 Credits)
In this course, students are challenged to explore the governance and policy environment of Higher Education, to understand the multiple layers of governance and the complex web of policy-making, to analyze the differences among systems of governance, and to evaluate the essential components and consequences of policies. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7610 - Strategic Enrollment Management in Higher Education (3 Credits)
Course is designed to deepen the understanding of the complexities of strategic enrollment management as research and practice, delving into the breadth of its critical issues and rapidly developing context, including the student lifecycle, the focus on equity and inclusion; emerging models for student success; and financial implications. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7620 - Contemporary Issues in Higher Education (3 Credits)
This course is a study of the critical, contemporary issues in higher education and the impact on institutions’ goals for equity and student success. Students in the course will reach beyond the current context, understanding the origins of critical questions, and the impact of these issues on leadership decision-making. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP

EDUC 7630 - Decision-making, Conflict Resolution, & Equity in Higher Education (3 Credits)
This course provides an approach to decision-making & conflict resolution from the viewpoint of the higher education leader, utilizing the lens of equity, drawing on cases and examples from differing contexts & a range of disciplines. The objective is to enable students to develop expertise in inclusive decision-making, rooted in theory. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7640 - Higher Education Finance and Strategic Resource Allocation (3 Credits)
This course is designed to introduce students to the complexity of higher education funding, the vast variations across systems, and the critical role of data-informed decision making in strategic resource allocation its impact on student access and success. Students will enhance their own capacity to contextual decisions and consider parameters. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7650 - Data-Informed Decision-Making and Predictives in HED (3 Credits)
Course is designed to elevate the understanding of data-informed decision making and predictives as it relates to research & practice; defining leaders responsibility in creating a data-driven and ethically responsible culture using a lens of equity and inclusion. Max Hours: 3 Credits.
Grading Basis: Letter Grade

EDUC 7751 - Principal Licensure EDD Concentration Course I (3 Credits)
Course is offered for students taking the Principal Licensure EDD Concentration area. Students in 7751 will join a cohort of students in a hybrid cross-listed EDUC 5751, complete all work/assignments for PBA 1 and related PBA 5 assessments. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

EDUC 7752 - Principal Licensure EDD Concentration Course II (3 Credits)
Course is offered for students taking the Principal Licensure EDD Concentration area. Students in 7752 will join a cohort of students in a hybrid cross-listed EDUC 5752, complete all work/assignments for PBA 2 and related PBA 5 assessments. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

EDUC 7753 - Principal Licensure EDD Concentration Course III (3 Credits)
Course is offered for students taking the Principal Licensure EDD Concentration area. Students in 7753 will join a cohort of students in a hybrid cross-listed EDUC 5753, complete all work/assignments for PBA 3 and related PBA 5 assessments. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

EDUC 7754 - Principal Licensure EDD Concentration Course IV (3 Credits)
Course is offered for students taking the Principal Licensure EDD Concentration area. Students in 7754 will join a cohort of students in a hybrid cross-listed EDUC 5754, complete all work/assignments for PBA 4 and related PBA 5 assessments. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

EDUC 7830 - Special Topics in Leadership for Educational Organizations (1-3 Credits)
Study of special topics that examine educational settings in Leadership for Educational Organizations to be selected by the instructor. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

EDUC 7840 - Independent Study: EDUC (1-4 Credits)
Doctoral. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Educational Foundations (EDFN)

EDFN 5000 - Food Justice in City & Schools (3 Credits)
Food justice examines systemic inequities in access to healthy food. The history of school/community gardens, developments in urban agriculture and school/community policies are examined. The intersection of urban agriculture, hunger, and schooling/learning is examined in school gardens and school farmer's markets. Cross-listed with EDFN 4000. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDFN 5001 - Problematizing Whiteness: Educating for Racial Justice (3 Credits)
Critical Whiteness Studies provides a deeper analysis of race that accounts for both sides of the race coin: the plight of people of color AND how Whites are complicit. This class looks deeper into how race operates within White contexts and how that impacts people of color so we bridge how Whites AND people of color can work together towards a racially equitable society. Cross-listed with ETST 4010 and EDFN 4001. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDFN 5010 - Social Foundations and Cultural Diversity in Urban Education (3 Credits)
This course focuses on the role of cultural diversity in the United States school system and what this means for educators oriented toward social justice. The intention of this course is to have teacher candidates engage in exploring the most salient issues surrounding education in the United States, developing an understanding of the complex relationships between schools and the larger society of which they are a part. This course closely examines important contemporary and historical societal issues such as race, social class, gender, ethnicity, sexual identity, politics, and dynamics of power and privilege. Cross-listed with EDFN 4010. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDFN 5050 - Critical Issues in American Education (3 Credits)
Examines the social values and forces in American society which shape or influence the aims, philosophies, methods, content, and problems of the American educational enterprise. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDFN 5700 - Global Education and 21st Century Learning (3 Credits)
Explore challenges and opportunities of global citizenship. Articulate framework for 21st Century Learner. Examine influence of social and political movements, including colonization, on the development of communities and cultures. Explore connections and intersections of local and global issues and systems. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDFN 5800 - Special Topics (1-3 Credits)
Topics will vary. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 9.

EDFN 7240 - Culture of Education Policy (3 Credits)
This course examines major issues in education policy analysis. Students will be required to critically analyze an educational policy issue uncovering the context, determining how the policy was implemented and what the outcomes were, intended as well as unintended. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDFN 7250 - School and Society (3 Credits)
Policies and educational reforms affecting the technical core of schooling: curriculum, teaching, learning, assessment, and organization. Students develop research and policy analysis skills and investigate social and political factors affecting what is taught and learned in schools. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EdD, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

EDFN 7400 - Epistemologies: Ways Knowing, Res Paradigms, & Counter-Epistemologies (3 Credits)
Epistemologies addresses conceptions and approaches to ways of knowing including intellectual traditions and their history as well as epistemological counter-stories of marginalized and subaltern ways of knowing that expose the contingency and bias of dominant forms of knowing. Max hours: 3 Credits.
Grading Basis: Letter Grade

EDFN 7410 - Power and Privilege: The Social Construction of Difference (3 Credits)
This course will focus on understanding culture and diversity, recognizing the role of power and privilege in both individual and institutional interactions, and developing a philosophy of social justice and equity. Prereq: Doctoral Student Status. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EdD, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

EDFN 7420 - Foundations of Education in Urban and Diverse Communities (3 Credits)
This course focuses on the complex relationship between schools and the larger society of which they are a part. Emphasizing historical, political, and sociological perspectives, this course explores the interplay of social systems in education (economic, political, social, health, legal), analyze education policies, and the intended and unintended consequences of these processes. Prereq: Doctoral Student Status. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Leadership for Educ Equity or Education Human Development Doctoral Students

EDFN 7430 - Working with Families and Communities (3 Credits)
Designed for veteran and novice teachers and administrators to add to their present understanding of the function of families and communities in contemporary society. Participants examine key theoretical texts of important scholars in the field of human development, with an emphasis on topics such as the politics of everyday life, the salience of linguistic & cultural identity in the life of families/communities, and the political-economic and social factors that shape the "life course" of families/communities. Prereq: Doctoral Student Status. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EdD, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.

EDFN 7833 - Culture and Critical Theory (3 Credits)
Provides an introduction to critical inquiry. General topics include: the development and of the concept of culture, the development and application of critical theory, critical race theory and critical pedagogy. Through the course, students are guided to explore critical theory work in their own field. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EdD, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.
Electrical Engineering (ELEC)

ELEC 5025 - Device Electronics (3 Credits)
A course relating performance and limitations of solid state devices to their structures and technology. For both advanced circuit and device engineers. Semiconductor physics and technology, pn-junction and MOS devices used in modern integrated circuits. Prereq: ELEC 3225 and senior standing. Cross-listed with ELEC 4025. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3225 Restriction: Senior standing

ELEC 5033 - Advanced Electromagnetic Fields (3 Credits)
A course focused on electromagnetic waves. Topics include: Poynting's power theorem, reflection and transmission of uniform plane waves in layered media, two-conductor transmission lines, rectangular wave guides, Smith Chart elements of radiation and antenna. Prereq: ELEC 3133 and permission of instructor for undergraduates. Cross-listed with ELEC 4133. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3225 Restriction: Senior standing

ELEC 5133 - Electromagnetic Radiation and Antenna (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 4133 or ELEC 5033

ELEC 5134 - Introduction to Microwave Circuit Design (3 Credits)
This course provides the basic principles of microwave circuit design, including transmission line theory, network parameters, signal flow graphs, design of high frequency matching networks, filters, hybrids and couplers using waveguide elements, high frequency amplifier and mixer design. Prereq: ELEC 3133. Cross-listed with ELEC 4134. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133 or graduate standing

ELEC 5154 - Electric and Hybrid Vehicle Powertrains (3 Credits)
Covers the fundamental components and operation of electric and hybrid vehicles' drivetrain. Topics include electric vehicle history, major vehicle components, fundamental vehicle dynamics, electric and hybrid drivetrain configurations, electric motors and drives, energy storage, and power electronics chargers. Cross-listed with ELEC 4154. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

ELEC 5164 - Electric Machines and Drives (3 Credits)
Covers power electronics drives for rotating electric machinery. Topics include power electronics elements for drives, load characteristics, dynamic modeling of AC machines, fundamental control algorithms, simulation and practical commercial drives. Prereq: ELEC 3164. Cross-listed with ELEC 4164. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

ELEC 5170 - Electric Machines and Drives Laboratory (1 Credit)
Offers hands-on experience on rotating electric machine drive simulations and commercial systems. Sessions include pulse-width modulation (PWM) inverter, induction, DC, and synchronous machine drives. Matlab/Simulink and a commercial inverter will be utilized. Prereq: ELEC 4164 or equivalent. Cross-listed with ELEC 4170. Max hours: 1 Credit.
Grading Basis: Letter Grade

ELEC 5174 - Power Electronic Systems (3 Credits)
Topics to be covered include: power electronics fundamentals and applications in power systems; uncontrolled, semi-controlled and fully controlled power semiconductors; converters design and control. Prereq: ELEC 3164 and graduate standing or permission of instructor. Cross-listed with ELEC 4174. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3164 or Graduate Standing

ELEC 5184 - Power Systems Analysis (3 Credits)
Topics to be covered include: complex power, per-unit quantities; modeling of generators, transformers and transmission lines; power flow problem; economic dispatch; faults and sequence networks; and an introduction to power system protection and dynamics. Prereq: ELEC 3164 and graduate standing or permission of instructor. Cross-listed with ELEC 4184. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3164 or Graduate Standing

ELEC 5194 - Power Systems Operation and Control (3 Credits)
This course introduces the student to various operational strategies the power industry uses today to operate the power system. Topics to be covered include: economic dispatch, unit commitment, optimal power flow (linear and nonlinear), transmission congestion, control areas, state estimation, and an introduction to power markets. Prereq: ELEC 4184 or ELEC 5184 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4184 or ELEC 5184 or graduate standing

ELEC 5210 - Optimization Methods in Engineering (3 Credits)
Unconstrained optimization, gradient methods, conjugate direction methods, data fitting and function estimation. Applications in control, system identification and radar systems. Optimization over a convex set, LMS algorithms in adaptive systems, convergence properties. Nonlinear programming, Lagrange multipliers, projection algorithms, games and minimax theorem, application to H infinity control, communication and signal processing. Prereq: MATH 3191 and 3200/3195. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MATH 3191 and (3200 or 3195)
ELEC 5220 - Methods of Engineering Analysis (3 Credits)
Grading Basis: Letter Grade
Prereq: (MATH 3191 and 3200) or MATH 3195 or Graduate Standing
ELEC 5230 - Advanced Linear Systems (3 Credits)
Mathematical description of both continuous and discrete-time systems; vector, normed and inner-product spaces; state-space, impulse response and transfer function descriptions; state-transition response matrices; eigenvalues and eigenfunctions; controllability; canonical form; state feedback; observers; realization theory. Prereq: MATH 3191, MATH 3200/3195 and permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: (MATH 3191 and 3200) or MATH 3195 or Graduate Standing
ELEC 5249 - Digital Communication Systems (3 Credits)
Introduces digital communication systems covering elements of information theory; mathematical representation of signals and systems; modulation and demodulation for the additive Gaussian noise channel; Performance analysis of various transmission formats; synchronization; coded waveforms; decoding algorithms; and other related topics. Prereq: ELEC 3316, 3817; recommended ELEC 4247. Cross-listed with ELEC 4248. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: (ELEC 3316 and 3817) OR Graduate Standing
ELEC 5249 - Wireless networking (3 Credits)
Fundamentals of wireless communication from a physical-layer perspective. Multipath signal propagation and fading channel models. Design of constellations to exploit time, frequency, and spatial diversity. Reliable communication and single-user capacity. Interference management, multiple-access protocols, and multi-user capacity. Cellular uplink and downlink. Multiple-antenna systems and architectures. Communications with Intelligent Reflecting Surfaces. mmWave and THz communications. Connections to modern standards. Prereq: Elec 3817 and Elec 3316. Cross-listed with ELEC 4249. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3316 and ELEC 3817
ELEC 5250 - Information Inference and Learning Algorithms (3 Credits)
We indulge in a journey from the theory of information to the world of applications. We talk about what information means and provide the means to measure it. We then investigate various methods for extracting what matters from the available data. We bring in topics such as Bayesian data modeling, clustering algorithms, and neural networks to name a few. Prereq: ELEC 3817 or CSCI 4535 or MATH 3800. Cross-listed with ELEC 4250. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3817 OR CSCI 4535 OR MATH 3800 OR Graduate Standing
ELEC 5252 - Computer Communication Networks (3 Credits)
Comprehensive study of issues arising in modern computer-communication networks, both wire-line and wireless, carrying traffics with heterogeneous characteristics. A conceptual and analytical approach to the design of network protocols in harmony with the appropriate modeling of the traffic and network environments. Issues covered include routing, transmission, performance monitoring, as well as and network management in ATM multi-media networks. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
ELEC 5276 - Digital Control Systems (3 Credits)
Analysis and design of discrete-time systems, as occurs when a digital computer is used to control physical systems. Topics include difference equations, Z-transform, sampled-data system modeling, sampling, discrete equivalents, stability, and discrete control design by root locus, direct design, frequency-response, and state space. Prereq: ELEC 3316, ELEC 3817, and graduate standing. Cross-listed with ELEC 4276.
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: ELEC 4136 or Graduate Standing
ELEC 5294 - Advanced Power Electronic Systems (3 Credits)
The course focuses on the design, modeling, modulation, control and simulation of three-phase two-level voltage sourced inverters with emphasis on applications. Student will also be introduced to advanced topologies including diode clamped multilevel inverters, modular multilevel inverters and matrix converters. Prereq: ELEC 4174 or ELEC 5174. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4174 or 5174
ELEC 5333 - Introduction to Computational Electromagnetics (3 Credits)
An intro to computational electromagnetics based on the Finite Difference Time-Domain (FDTD) covering, finite difference methods, the Yee algorithm, numerical error, stability, boundary conditions, source excitations, hands-on programming experience and application of FDTD to real problems. Prereq: ELEC 3133 or grad standing. Cross-listed with ELEC 4333. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133 or graduate standing
ELEC 5334 - Advanced Computational Electromagnetics (3 Credits)
This course on advanced computational electromagnetics covers Green's theorems and identities, vector potential theory, equivalence principles, numerical linear algebra, numerical integration, method of weighted residuals, integral equation methods, method of moments, and Prereq: ELEC 4133 or ELEC 5133 or grad standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4133 or ELEC 5133 or grad standing
ELEC 5373 - Optical Engineering (3 Credits)
This course introduces some of the most important concepts in optical engineering and prepares students a solid foundation to apply them to applications in the industry and academic research. Prereq: ELEC 3133. Cross-listed with ELEC 4373. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133 Restriction: Restricted to students within the College of Engineering, Design and Computing
ELEC 5375 - Engineering Neuroscience (3 Credits)
In this course, mathematical models and data processing strategies will be introduced as well as other cutting-edge research techniques to help students understand how these techniques can be applied to solve modern neuroscience problems. Prereq: ELEC 3316 or graduate standing. Cross-listed with ELEC 4735 and NRSC 7674 (Anschutz Medical Campus course). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3316 or ELEC 4276.

ELEC 5423 - Radio Frequency Laboratory (1 Credit)
Projects involve modern RF analyzers, waveguide devices, time-domain techniques, characterization of devices, signal propagation and scattering, harmonic mixing, and radio frequency identification. Students will gain experience using MATLAB for data acquisition and processing. Graduate students will explore projects in greater detail. Cross-listed with ELEC 4423. Max Hours: 1 Credit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ELEC 5433 - Fundamentals and Applications of Plasmas (3 Credits)
This course provides an introduction to plasmas, also known as the fourth state of matter, in nature and industry. Topics covered include single particle motions, plasma kinetic and fluid theory, cold and warm plasma models and interaction of electromagnetic waves with plasmas. Applications ranging from space sciences to medicine are explored. Prereq: ELEC 3133 for undergraduate students or permission of the instructor. No prerequisite for CEDC graduate students. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ELEC 5444 - Power System Laboratory (1 Credit)
This lab introduces the student to modern computational tools used in power system analysis. Algorithms to solve the "power flow problem", the "economic dispatch problem", and the "optimal power flow problem" are discussed and implemented in the Matlab-Simulink mathematical analysis software package. Coreq: ELEC 4184. Max hours: 1 Credit.
Grading Basis: Letter Grade
Coreq: ELEC 4184.

ELEC 5446 - Introduction to Modern Control Theory (3 Credits)
Grading Basis: Letter Grade
Pre-req: (ELEC 3817 or MATH 3800) AND (ELEC 4136 or 4276) OR Graduate Standing

ELEC 5455 - Computer Methods for Device Electronics (3 Credits)
Numerical analysis of PN junctions, Bipolar transistors, GAAS MESFETS, and MOSFETS. Numerical solution of discrete-form equations. Finite-difference method for semiconductor devices. Two-dimensional models: DC, transient, and small signal numerical analysis. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

ELEC 5456 - Sampled Data and Digital Control Systems (3 Credits)
Elements of sampling theory. Overview of design approaches via transform methods. Analysis and design in state space. Optimal control systems. Emphasis is placed on computer-aided design projects. Prereq: ELEC 4276. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4276 or Graduate Standing

ELEC 5457 - Power Electronics Laboratory (1 Credit)
The power electronics laboratory introduces students to seven fundamental switchmode power conversion topologies, along with voltage and current feedback control, assembled on a reconfigurable power pole circuit board with external power supplies and laboratory. Cross-listed with ELEC 4474. Max Hours: 1 Credit.
Grading Basis: Letter Grade

ELEC 5466 - Adaptive Control System Design (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 4136 or ELEC 4276.

ELEC 5474 - Power Electronics Laboratory (1 Credit)
The power electronics laboratory introduces students to seven fundamental switchmode power conversion topologies, along with voltage and current feedback control, assembled on a reconfigurable power pole circuit board with external power supplies and laboratory. Cross-listed with ELEC 4474. Max Hours: 1 Credit.
Grading Basis: Letter Grade

ELEC 5476 - Optimal Control Systems (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 4136 or ELEC 4276 or Graduate Standing

ELEC 5486 - Modeling and System Identification (3 Credits)
Grading Basis: Letter Grade
Pre-req: (ELEC 3817 or MATH 3800) AND (ELEC 4136 or 4276) OR Graduate Standing
ELEC 5496 - Robust Control (3 Credits)
Background mathematics: function spaces and operators, and factorization theory. Stability theory: stability and stabilizability parameterization, closed-loop transfer matrices. Model-Matching Theory: solution existence, SISO Design, the Nehari problem. Performance bounds. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5501 - Microprocessor-Based Design (3 Credits)
Covers advanced treatment of embedded system design using microprocessors. Analog input circuitry is interfaced to a microprocessor, and a PC board layout is created to develop a complete system design. Software/Operating System is implemented for realtime I/O. Prereq: Graduate standing or permission of instructor. Cross-listed with ELEC 4501. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5511 - Hardware-Software Interface (3 Credits)
Computer engineering methods in hardware and software design applied to problems drawn from the mini- and micro-computer systems field. Hardware and software techniques for the design of combined hardware or software are developed. Interface and real-time programming techniques are considered. Graduate level requires additional projects and homework. Prereq: ELEC 3520. Cross-listed with ELEC 4511. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3520.

ELEC 5521 - Design and Test of Digital Systems (3 Credits)
Application of hardware description languages to the design, synthesis, analysis, and testing of digital and computer systems; modeling and simulation constructs; modern hardware description languages, including VHDL, logic and behavioral synthesis; rapid-prototyping; FPGA and standard-cell ASIC design; design for testability; and electronic design automation. Prereq: ELEC 3651 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3651 or Graduate Standing

ELEC 5522 - VLSI Systems (3 Credits)
Examines the design of very large scale integrated (VLSI) systems from the logic to physical levels, including MOS transistor design, CMOS fabrication and design rules, device and wafer processing, inverter and complex gate design, mask level layout, VLSI system components and architectures, algorithms for VLSI computer-aided design, and testability. Prereq: ELEC 3215 and 3651 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Pre-req: (ELEC 3215 and 3651) or Graduate Standing

ELEC 5531 - Introduction to Deep Learning and PyTorch (3 Credits)
This course provides a foundation on neural networks of deep learning. Students will gain both theoretical and practical understanding of different deep neural networks and will work on a few real-world problems. Prereq: ELEC 3520. Cross-listed with ELEC 4531. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3520.
Typically Offered: Spring, Summer.

ELEC 5541 - Advanced Deep Learning for Computer Vision (3 Credits)
This course introduces the state-of-the-art deep learning research work. Students will gain both theoretical and practical understanding of deep learning in computer vision area. Prereq: ELEC 3520. Cross-listed with ELEC 4541. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3520.
Typically Offered: Spring, Summer.

ELEC 5551 - Pattern Recognition (3 Credits)
Pattern recognition techniques from image processing and artificial intelligence are explored. Topics include neural networks, morphological processing, wavelets, fractals, and basic image understanding. Prereq: ELEC 3316 and 3651. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: (ELEC 3316 and 3651) or Graduate Standing

ELEC 5555 - VLSI Circuit Simulation (3 Credits)
Grading Basis: Letter Grade

ELEC 5561 - Random Processes for Engineers (3 Credits)
Probability, sequences of random variables, specification of stochastic processes, stationarity, correlation functions and spectral densities, linear mean-square estimation, central limit theorems, law of large numbers, non-stationary random processes, stochastic differential equations and Kalman filtering. Prereq: ELEC 3316 and ELEC 3817 and permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: (ELEC 3316 and 3817) OR Graduate Standing

ELEC 5567 - Stochastic Point Processes (3 Credits)
Presents modeling physical phenomena characterized by highly localized events distributed randomly in a continuum. Applications include optical communications, queuing theory, decision theory, nuclear medicine and electron microscopy. Topics include Poisson counting processes and its generalizations; stochastic differential equations used in filtering; martingales and Brownian motion. Prereq: ELEC 3817 or ELEC 5617. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3817 or 5617

ELEC 5563 - Digital Signal Processing (3 Credits)
Grading Basis: Letter Grade
Prereq: (ELEC 3316 and 3817) OR Graduate Standing
ELEC 5638 - Digital Image Processing  (3 Credits)
Basics of two-dimensional (2-D) systems theory, including 2-D Fourier transform, 2-transform, and difference equations. Design of 2-D filters for image processing applications. Image transforms, including the 2-D FFT, cosine, Hadamard and KL. Image enhancement and restoration techniques. Method of image coding and compression. Prereq: ELEC 3133, 3215, 3225, 3316, 3817 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133, 3215, 3225, 3316, 3817 or graduate standing

ELEC 5644 - Introduction to Biomedical Imaging  (3 Credits)
An important component of the recent expansion in biomedical engineering is the area of biomedical imaging. This ELEC 4644/5644 course is an introduction to biomedical imaging systems, not only covering the fundamentals of imaging physics but also the applications of four primary biomedical imaging modalities: X-Ray Computed Tomography (CT), Magnetic Resonance Imaging (MRI), Nuclear Medicine (i.e. PET, SPECT), and Ultrasound Imaging. Prereq: Graduate standing, or permission of instructor. Cross-listed with ELEC 4644. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133, 3215, 3225, 3316, 3817 or graduate standing

ELEC 5647 - Adaptive Signal Processing  (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 5637

ELEC 5648 - Blind Signal Processing  (3 Credits)
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

ELEC 5657 - Detection and Estimation Theory  (3 Credits)
Introduces detection and extraction methods used in signal processing, including decision theory; detection of known and random signals; optimum receiver design; estimation theory; Wiener filtering; Kalman-Bucy filtering; and applications to communication systems. Prereq: ELEC 5617. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 5617

ELEC 5667 - Wavelet Theory and Applications  (3 Credits)
Topics include: fundamentals of signal decomposition; theory of filter banks; multi-resolution analysis and fast wavelet transforms; applications image and video image and video compression; and denoising and feature detection. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5678 - Quantum Computing  (3 Credits)
The course teaches students the principles, the algorithms and the programming methods of quantum computing, and also discusses the associated physics and mathematics background required. Other related topics such as quantum communication and quantum entanglement will also be discussed. Prereq: PHYS 2331 and ELEC 3817 with a C- or better. Cross-listed with ELEC 4678, PHYS 4678, and PHYS 5678. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PHYS 2331 with a C- or better, and ELEC 3817 with a C- or better.

ELEC 5679 - Quantum Computing Algorithms  (3 Credits)
The course discusses several seminal quantum algorithms, including the quantum Fourier transforms, Grover's and Shor's algorithms, followed by explaining several advanced quantum computing algorithms, including quantum error correction, sparse linear systems, and variational eigensolver. Google Cirq quantum programming library will be used for actual quantum programming implementations of the algorithms discussed. Restriction: Restricted to students with graduate standing. Cross-listed with ELEC 4679, PHYS 4679, and PHYS 5679. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing. Typically Offered: Fall.

ELEC 5680 - Quantum Computing Technology  (3 Credits)
Students will explore some of the concepts and experimental practices for realizing quantum computers. They will engage in laboratory practice of relevant skills including high-performance analog electronics; optics based quantum encryption and eraser implementations; RF electronics; and vacuum and cryogenic techniques. Restriction: Restricted to students with graduate standing. Cross-listed with ELEC 4680, PHYS 4680, and PHYS 5680. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing. Typically Offered: Fall.

ELEC 5681 - Quantum Technology Systems  (3 Credits)
Students will explore a systems approach toward experimental practices for realizing quantum information science and engineering (QISE), with a focus on vacuum and cryogenic techniques and integration of electronics subsystems into a “dry” cryostat. They will engage in laboratory practice of relevant skills including creation and measurement of high vacuum, methods for reaching ultra-low temperatures, concerns in the design and construction of cryogenic apparatuses, and operation of a “dry” cryogenic system at 4 K, including measurements on superconducting quantum interference devices. Cross-listed with ELEC 4681, PHYS 4681 and PHYS 5681. Max hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5687 - Optical Communication Systems  (3 Credits)
System aspects of optical communication system design. Basic principles of sources, channels, detectors, counting statistics, amplifiers, and coding with regard to the performance limitations they place on the communication system. Prereq: ELEC 3133. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133 Restriction: Restricted to students within the College of Engineering, Design and Computing
ELEC 5688 - Introduction to Nondestructive Testing (3 Credits)
A basic, broad understanding of the principles of nondestructive testing and evaluation is provided. The main objective of this course is to attract students to NDT fields and eventually help address the increasing needs of NDT engineers and technicians. Interaction and collaboration with local NDT industries will also be emphasized. As an introductory course, a broad interdisciplinary knowledge of NDT will be covered in the following sub-areas: Visual, Penetrant, Magnetic Particle, Eddy Current, Microwave, Ultrasonic, and Radiography. Prereq: Graduate standing, or permission of instructor. Cross-listed with ELEC 4688. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ELEC 5697 - Optical and Spatial Information Processing (3 Credits)
Processing of two- and three-dimensional spatial information. The scalar diffraction theory necessary to describe the information-bearing wavefront. Wave-front recording, modulations, and reconstruction. Holography. Fourier transform properties of lenses, two-dimensional convolution and correlation, pattern recognition, and optical information processing. Prereq: ELEC 3316. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3316 or Graduate Standing

ELEC 5710 - Advanced Electric Drive Systems (3 Credits)
Covers advanced theory and implementation techniques for rotating electric machinery drives. Topics include field oriented control theory, detailed dynamic modeling of induction machine/drive system, advanced control algorithms and controller design. Prereq: ELEC 4164/5164 or equivalent. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3316 or Graduate Standing

ELEC 5714 - Energy Systems Analysis (3 Credits)
Transmission line constants, including details of GMD methods, skin effect. Analysis of balanced and unbalanced line using distributed parameters, energy flow from circle diagram approach, traveling-wave phenomena, corona, power cables and fundamentals of DC transmission. Prereq: ELEC 4184. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4184

ELEC 5720 - Practical Electric Drive Systems (3 Credits)
Covers practical control theory and implementation techniques for electric machine drives for rotating electric machinery using high-performance hardware and software. Topics include machine theory review, power converter, control theory, controller design and actual implementation of an induction machine driving using up-to-date microcontroller hardware and software. Prereq: ELEC 2620, ELEC 4164/5164 or equivalent. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4184

ELEC 5725 - Advanced Electric Machinery (3 Credits)
Covers theoretical principles and techniques of electric machine analysis focusing on rotating machinery. Topics include various machine definitions, properties and analysis, software tools, and examples. Prereq: ELEC 3164 or equivalent. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5727 - Computer Vision & Image Processing Acceleration (3 Credits)
Real-time constraints on computer-vision and image processing applications have motivated numerous explorations of multicore architectures to provide more efficiency through hardware parallelism and acceleration. This course undertakes the study of image processing and computer vision algorithms in the context of parallel hardware. Prereq: ELEC 3520. Cross-listed with ELEC 4727. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3520.

ELEC 5755 - Renewable Energy Systems (3 Credits)
This course focuses on the modeling, analysis and control of grid-connected wind and photovoltaic energy systems. Prereq: permission of instructor. Cross-listed with ELEC 4755. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 5764 - Power Distribution Systems (3 Credits)
Use of per-unit methods to find transient voltage behavior of industrial power systems resulting from motor starting, spotwelders and similar stimuli. System and device responses due to series and shunt capacitors and problems of subharmonics and over-excitation on induction motors. Design of power distribution systems. Prereq: ELEC 4184. Max hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5765 - Power Systems Dynamics and Protection (3 Credits)
Topics to be covered include: power system dynamic fundamentals, various stability problems, such as angle, frequency and voltage stability; protection of power systems apparatus and protective relays coordination. Prereq: ELEC 4184/5184 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5774 - Renewable Energy Systems (3 Credits)
Intermediate courses of variable title and variable credit, usually offered once by guest lecturers. See current departmental notices for details. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 5840 - Independent Study ELEC (1-6 Credits)
Offers the opportunity for independent, creative work. Prereq: Permission of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
ELEC 5939 - Internship Master Student (1-3 Credits)
Student will outline internship tasks every 2-3 weeks in a progress report. Reports will include the details of exposure to electrical/computer engineering concepts. Each concept will be described with respect to CU Denver Electrical Engineering degree program. Courses that were taken pre-internship that prepared student for successful understanding for the task requirements. In addition, preparations that would be help, will also be mentioned. Engineering training in design and software tools related to internship tasks will be clearly described. Final semester report will describe all experiences and include recommendations on how students might prepare to be successful for other common tasks. Requisite: Graduate students must have completed 6 credit hours with a cumulative GPA of 3.0. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Graduate students must have completed 6 credit hours with a cumulative GPA of 3.0.

ELEC 5980 - Statistical Quality Control (3 Credits)
Introduces statistical methods of quality control. Statistical process control, process capability, statistical design of experiments and total quality management. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
ELEC 6000 - Statistical Signal Processing (3 Credits)
The objective of this course is to present a systematic coverage of statistical signal processing methods which are fundamental for processing, identifying and classifying stochastically (randomly) generated data sequences. Emphasis will be given to methods which resist data outliers. Important applications include communications and biological systems. Prereq: ELEC 5617 or consent of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 5617
ELEC 6800 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 6950 - Master's Thesis (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.
ELEC 6960 - Master's Report (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.
ELEC 7800 - Special Topics (1-3 Credits)
Courses of variable title and variable credit, usually offered once by guest lecturers. See current departmental notices for details. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 7801 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7802 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 7803 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 7804 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 7805 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 7806 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 7807 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 7808 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 7809 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ELEC 7840 - Independent Study: ELEC (1-6 Credits)
Offers the opportunity for independent, creative work. Prereq: Permission of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
ELEC 8990 - Doctoral Dissertation (1-10 Credits)
Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.
Additional Information: Report as Full Time.

Engineering (ENGR)

ENGR 5150 - Seminar: Special Topics in Engineering (1 Credit)
A flexible seminar format dealing with topics of special interest in engineering on a graduate level. Topics vary from semester to semester. Prereq: Graduate standing. Cross-listed with ENGR 4150 and 7150. Max hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
Typically Offered: Fall, Spring.
ENGR 5208 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
ENGR 5301 - Systems Engineering: Principles and Practice (3 Credits)
Max Hours: 3 Credits.
Grading Basis: Letter Grade

ENGR 5302 - Systems Engineering: Planning and Management (3 Credits)
Max Hours: 3 Credits.
Grading Basis: Letter Grade

ENGR 5303 - Special Topics: Systems Engineering (3 Credits)
Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ENGR 5800 - Long Range Infrastructure Planning and Design: Colorado 2050 (3 Credits)
The goal of this course is to equip students to address the problems of long term future resource limitation and its influence on urban infrastructure in Colorado. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ENGR 6299 - Introduction to Smart Cities (3 Credits)
This course will explore some of the most change-making technological innovations in the 21st century and their impact on public policy in cities through a survey of best practices, model policies, and lessons learned from cities across the United States and globe. Cross-listed with ENVS 5660, PUAD 5627, and URPL 6299. Max hours: 3 Credits.
Grading Basis: Letter Grade

ENGR 7150 - Seminar: Special Topics in Engineering (0.5 Credits)
A flexible seminar format dealing with topics of special interest in engineering on an advanced graduate level. Topics vary from semester to semester. Prereq: Graduate standing. Cross-listed with ENGR 4150 and 5150. Repeatable. Max hours: 1 Credit.
Grading Basis: Letter Grade
Repeatable. Max Credits: 1.
Restriction: Restricted to graduate students
Typically Offered: Fall, Spring.

English (ENGL)

ENGL 5000 - Studies of Major Authors (3 Credits)
An intensive study of works of one major British or American author. Examples: Dickens, Woolf or James. Prereq: Graduate standing. Cross-listed with ENGL 4000. Term offered: fall, spring. Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

ENGL 5001 - Special Topics (1-6 Credits)
This variable credit course offers intensive study of the teaching of writing in a collaborative action-oriented approach. Prereq: Graduate standing. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5002 - Special Topics. (3 Credits)
These courses offer intensive study of specialized topics in English and American literature and in rhetoric, applied language, technical communication, and the teaching of writing. Max hours: 9 Credits.
Grading Basis: Conversion
Repeatable. Max Credits: 9.

ENGL 5080 - History of the English Language (3 Credits)
Examines how English has changed since A.D. 800 through examples of writing from different periods, with attention to the way various groups have enriched our vocabulary and altered our syntax. Note: this course assumes that students have completed ENGL 2070 or one year of college level coursework in a foreign language. Prereq: Graduate standing. Cross-listed with ENGL 4080. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5093 - Teaching of Writing (3 Credits)
Deals with the analysis of rhetorical theory with an emphasis on practical applications in the classroom, with attention to alternative pedagogies in teaching. Prereq: Graduate standing. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

ENGL 5100 - Introduction to Graduate Studies (3 Credits)
Introduces students to scholarly methods & key debates in English Studies. Familiarizes students with department's specializations in film, linguistics, literature & rhetoric. Offers new MA students training in the primary forms of scholarly writing within the discipline (journal article, conference abstract, synopsis, book review). Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 5110 - Denver Writing Project (3-9 Credits)
An intensive extended workshop in the development of one's personal and professional writing and in the teaching of writing. Open to those who are members of the Denver Writing Project. Prereq: Graduate standing. Term offered: summer. Max hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

ENGL 5120 - Denver Writing Project Advanced Institute (1 Credit)
Advanced institutes provide intensive examination of an issue related to the teaching of writing. The specific issues are of two kinds--repeatable ones such as "Alumni Institute" and "Writing Retreat" and variable, such as "Action Research" and "Writing Across the Curriculum." Prereq: Graduate standing. Term offered: summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

ENGL 5135 - English Language Study (3 Credits)
Introduces students to varieties of English in use today, while tracing range of "new Englishes" back to origins of language. Students will develop an understanding of English as a global language, why it spread throughout the world and how, paying specific attention to print history of English and relationship to other print languages. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
ENGL 5140 - Special Topics with NWP (3 Credits)
This online University of Colorado Denver English Department and Denver Writing Project course will focus on teaching argument writing to grades 3 - 12+ with the National Writing Project's College, Career, and Community Writers Program. Coursework will provide participants the opportunity to engage in the study of researched-based pedagogy for the teaching of evidence-based argument writing while nurturing themselves as writers. Term offered: irregular. Max hours: 3 Credits.
Grading Basis: Letter Grade

ENGL 5145 - Theory (3 Credits)
Designed to enrich students' understanding of a variety of modes of theoretical discourse that have influenced modern critical practice in English studies. While the course explores the evolution of criticism, it gives primary emphasis to recent developments. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5150 - Research Methods (3 Credits)
Designed to prepare students for graduate scholarship in language, literacy, and the teaching of writing; should be taken soon after entering the program. Introduction to the research methods and stylistic standards for graduate-level writing. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 5155 - Genres of Writing (3 Credits)
Explores work of major contributors to genre and narrative theory. Offers students exposure to emergent genres in new media, while situating these new genre in relation to historical precedents. Gives students an introduction to the evolution of central genres in literary studies, such as novel, poem, political speech and western film. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 5160 - Poetics (3 Credits)
"Mechanics" of poetry in English, including meter, rhythm, rhyme, line, and other systems of measurement and logic. Emphasis is on historical development of poetic art in English. Note: this course assumes that students have completed ENGL 1400. Prereq: Graduate standing. Cross-listed with ENGL 4160. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 5165 - Literacy and Technology (3 Credits)
Studies the material forms in which English language has circulated—e.g., the history of the oral and manuscript tradition; the history of the book; and the impact of digital technologies on print culture. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5166 - History of American Poetry (3 Credits)
Examines major American poets and poetic trends from the colonial period to the present, with attention to cultural contexts and to development of distinctively American practices. Cross-listed with ENGL 4166. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5170 - Critical History of Writing (3 Credits)
Investigates the evolution of writing theory and practice from the 18th century to the present with an emphasis on the historical contexts and theories of what constitutes writing. Cross-listed with ENGL 4170. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

ENGL 5175 - Writing in the Sciences (3 Credits)
Provides rhetorical analyses of scientific discourse and student practice in writing research reports and proposals. Cross-listed with ENGL 4175. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students at the graduate level (including non-degree and Anschutz Medical Campus programs). Cross-listed with ENGL 4175. Max hours: 3 Credits.

ENGL 5181 - History of the Book (3 Credits)
Explores the history of the book as a medium of communication, from the earliest incunables to the digital age, with an emphasis on the social, economic, and technological contexts that have shaped the development of book culture. Cross-listed with ENGL 4181. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5183 - Introduction to Digital Research (3 Credits)
Introduces students to the principles and practices of conducting research in the digital humanities. Topics include digital tools and techniques, data visualization, and the ethical implications of digital research. Cross-listed with ENGL 4183. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5190 - Advanced Topics in Writing, Rhetoric, & Linguistics (3 Credits)
Focuses on critical and theoretical issues in rhetoric and writing as they pertain to reading and writing, including language and gender, language and culture, and language of public communication. Cross-listed with ENGL 4190. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade

ENGL 5200 - Survey of the English Novel to 1900 (3 Credits)
Rise and development of the English novel from its beginnings in the 18th century through the end of the 19th century, including such writers as Defoe, Fielding, Austen, Shelley, the Brontes, Thackeray, and Dickens. Cross-listed with ENGL 4200. Prereq: Graduate standing. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
ENGL 5210 - History of the English Novel II (3 Credits)
Overview of the English novel from mid-19th century to World War II, emphasizing the important developments which the form underwent in the hands of notable novelists, including Charles Dickens, the Brontes, George Eliot, Henry James, Joseph Conrad, D.H. Lawrence and Virginia Woolf. Cross-listed with ENGL 4210. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5220 - African-American Literature (3 Credits)
Surveys African-American literature with special emphasis on post-Civil War writing. Cross-listed with ENGL 4220, ETST 4220 and ETST 5220. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5230 - The American Novel (3 Credits)
Surveys major developments in the American novel from the 18th century to the 21st century. Cross-listed with ENGL 4230. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 5235 - Faulkner (3 Credits)
Studies the works of Faulkner's high period with special attention to southern themes and Faulkner's experimentation with narrative form. Cross-listed with ENGL 4235. Prereq: Graduate standing. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5236 - The American Short Story (3 Credits)
Traces the development of the short story in the United States, from its beginnings in colonial tales to its contemporary renaissance as a dominant literary form. Cross-listed with ENGL 4236. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5240 - Topics In Contemporary American Literature (3 Credits)
Seminar focusing on a segment of contemporary American literature. Cross-listed with ENGL 4240. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA).
Typically Offered: Fall.

ENGL 5250 - Twentieth Century Fiction (3 Credits)
Deals with novels originating in a variety of countries in an effort to see the similarities and differences that varying nationalities bring to the genre. Cross-listed with ENGL 4250. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 5280 - Proposal and Grant Writing (3 Credits)
Students learn how to find funding sources, write proposals, and manage grants for nonprofit, research, and industry contexts. Students practice the entire process of proposal and grant writing: 1) describing the problem in context; 2) identifying sponsors, building relationships, and finding a match; 3) designing, writing, revising, and completing all proposal components; 4) conceptualizing and using persuasive visual and design elements; 5) responding to sponsors and managing grant funds. Often, students work with academic, industry, and community partners on a grant writing project. Prereq: Graduate standing. Cross-listed with ENGL 4280. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5300 - History of British Drama (3 Credits)
Intended as a survey of British drama from the miracle plays of the medieval period, through the Renaissance and Restoration, to the "kitchen sink" realists of the 1960s. Cross-listed with ENGL 4300. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5306 - Survey of Feminist Thought (3 Credits)
Examines changes and continuities in feminist thought from the 18th century to the present, using historical and literary materials. Explores the ways that women's characteristics, experiences, and capabilities have been understood and challenged. Cross-listed with ENGL 4306, HIST 4306, 5306, WGST 4306, 5306. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 5308 - Contemporary Feminist Thought (3 Credits)
This course explores contemporary feminist thought in philosophy and literature in the 20th and 21st centuries. Topics include lesbianism, black feminism, Chicana feminism, transgender identity, women and work and others. Prereq: Graduate standing. Cross-listed with ENGL 4308, PHIL 4308, PHIL 5308, WGST 4308, WGST 5308. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5320 - History of Poetry in English (3 Credits)
Studies the major schools and eras of English prosody, including the poetry of Great Britain and the United States, from the medieval period to the present. Cross-listed with ENGL 4320. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5350 - History of American Drama (3 Credits)
Studies American drama from its foundations in the 18th century through movements including realism, expressionism, symbolism, agit-prop, black nationalism, feminism, and performance art. Drama read as both text and performance, as sometimes supporting the status quo and as sometimes subverting it. Cross-listed with ENGL 4350. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
ENGL 5400 - Old English I (3 Credits)
Instruction in the Old English language. Note: this course assumes that students have completed ENGL 2070 or one year of college level coursework in a foreign language. Prereq: Graduate standing. Cross-listed with ENGL 4400. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5410 - Old English II: Beowulf (3 Credits)
Continuing training in the reading of Old English and intensive reading of Beowulf. Note: this course assumes that students have completed ENGL 4400 or 5400. Prereq: Graduate standing. Cross-listed with ENGL 4410. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5420 - Film Theory and Criticism (3 Credits)
(1) Familiarizes students with some of the central concepts and debates in film theory and criticism, both classic and contemporary, (2) enables students to develop advanced analytic and interpretive skills, and (3) guides students toward discovering and articulating original critical and theoretical perspectives. Note: this course assumes that students have completed ENGL 2250, 3070, and 3080 or equivalent. Prereq: Graduate standing. Cross-listed with ENGL 4460. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5430 - Medieval Literature (3 Credits)
Introduces representative writers from the Norman Conquest to about 1550. Emphasis on a variety of genres, including religious poetry, Arthurian romance, dream vision and drama. Cross-listed with ENGL 4400. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENGL 5440 - Contemporary World Literature (3 Credits)
Surveys literature written by world writers since World War II. Note: Texts read in English. Cross-listed with ENGL 4460. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENGL 5450 - English Renaissance (3 Credits)
Introduces some of the important writers in this major period of English literature (1500-1660). Special attention to the works of Sidney, Milton, Spenser, Shakespeare, Donne, Herbert and Johnson. Cross-listed with ENGL 4520. Prereq: Graduate standing. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

ENGL 5460 - Milton (3 Credits)
Extensive reading in John Milton's poetry (Lycidas, Paradise Lost, Paradise Regained, Samson Agonistes) as well as his political, social and theological writings. Cross-listed with ENGL 4530. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENGL 5500 - English Romanticism (3 Credits)
Studies major works of the chief English writers of the first part of the 19th century, with emphasis on such representative figures as Wollstonecraft, Godwin, Blake, Wordsworth, Coleridge, Hazlitt, Byron, Keats and Shelley. Cross-listed with ENGL 4560. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENGL 5510 - Whores and Saints: Medieval Women (3 Credits)
Studies how women are presented in texts, as well as works by women. Investigates the roles open to women and societal attitudes toward women, who were considered seductresses, saints, scholars and warriors in the middle ages. Note: this course assumes that students have completed at least 9 hours of literature coursework. Prereq: Graduate standing. Cross-listed with ENGL 4510, RLST 4730/5730, WGST 4510/5510. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

ENGL 5520 - Restoration and the 18th Century (3 Credits)
Introduces some of the important writers of the "Age of Reason." Emphasis on such figures as Bunyan, Burke, Dryden, Johnson, Pope and Swift. Cross-listed with ENGL 4540. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENGL 5530 - The Victorian Age (3 Credits)
Examines the main currents of Victorian thought in prose and poetry from about 1830 to the end of the century, including such writers as Browning, Carlyle, Mill, Newman, Ruskin, Swinburne and Tennyson. Cross-listed with ENGL 4580. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENGL 5540 - The Age of Reason (3 Credits)
Introduces some of the important writers in this major period of English literature (1500-1660). Special attention to the works of Sidney, Milton, Spenser, Shakespeare, Donne, Herbert and Johnson. Cross-listed with ENGL 4520. Prereq: Graduate standing. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

ENGL 5550 - Modernism (3 Credits)
Modernist literature from the beginning of the 20th century through World War II, including such writers as Eliot, Joyce, Forester, Ford, Yeats, Woolf and Barnes. Examines the social-political influences as well as the aesthetic and stylistic elements which define modernist writing. Cross-listed with ENGL 4600. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.
ENGL 5601 - Teaching English Language Learners: Theory and Practice (3 Credits)
Overview of basic principles and practices in the learning and teaching of English as a second language. Cross-listed with ENGL 4601. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5610 - Narrative: Form and Theory (3 Credits)
A critical and theoretical exploration of the elements of narrative—e.g., plot, character, dialogue, discourse—in literature and film. This course is especially useful for fiction-writing students in the Creative Writing Track. Prereq: Graduate standing. Cross-listed with ENGL 4610. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5650 - American Literature to the Civil War (3 Credits)
Graduate survey of American literature from the Colonial period to the Civil War, with particular attention to the question of what makes this literature distinctly American. Explores a wide range of genres of American literature in an effort to assess how this tradition of letters shaped our historical past and continues to influence contemporary American culture and ideology. Prereq: Graduate standing. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5651 - Second Language Writing (3 Credits)
Topics include the similarities between first and second language writing, the processes of composition and revision, teacher response to student writing, student processing of feedback, writing assessment, and the reading or writing connection. Cross-listed with ENGL 4651. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5655 - American Literature: Civil War to the Cold War (3 Credits)
Graduate survey of American literature from the Civil War to the Cold War considered central to the tradition of American literature. Students will consider how new ideas about gender, race, class, nationality, postcoloniality, history, and aesthetics have influenced the field of American literary studies. Prereq: Graduate standing. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5735 - Philosophy and Literature (3 Credits)
Considers the philosophical dimensions of literature. Cross-listed with ENGL 4735, PHIL 5730, 4730. Prereq: Graduate standing. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5745 - Humanistic Writing About Medicine and Biology (3 Credits)
Investigates medical and biological writing over the last two centuries with an emphasis on reception, ethical issues, and the differences between professional and popular writing. Prereq: Graduate standing. Cross-listed with ENGL 4745. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5755 - Illness & Disability Narrative (3 Credits)
Narratives of mental, chronic or terminal illness, and disability have become common over the past decades. There are a number of ways in which these stories are told by those reflecting on their experiences: individuals choosing to tell such stories must consider how their stories will be received and what they are revealing about themselves in dealing with their conditions. Many issues arise when looking at the production and reception of these narratives, including acceptance and assimilation, stigmatization, access and quality of treatment, discrimination, accommodation, pity and stereotyping responses. These narratives are consumed, usurped, and reacted to by clinicians, communities and society at large with their own agendas, expectations, fears and judgments of the stories and of the individuals telling their stories. This course is about the issues and concerns of producing an illness or disability narrative and the consumption/reception of those narratives by health professionals, communities, and society at large.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Cross-listed with ENGL 4755. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5840 - Independent Study ENGL (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall, Spring, Summer.
ENGL 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Term offered: fall, spring. Repeatable. Max Credits: 6.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5913 - Practicum in Language and Rhetoric (1-3 Credits)
Supervised work in applied language or rhetoric and the teaching of writing. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

ENGL 5939 - Internship (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 6010 - Studies of Major Authors (3 Credits)
Note: May be repeated when topics vary. Prereq: Graduate standing. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 6110 - Special Topics in Literature (3 Credits)
An intensive study of specialized topics in English and/or American literature. Note: May be repeated when topics vary. Prereq: Graduate standing. Repeatable. Max Hours: 30 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 30.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 6120 - Special Topics in Film (3 Credits)
An intensive study of specialized topics in film. Note: May be repeated when topics vary. Prereq: Graduate standing. Repeatable. Max Hours: 30 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 30.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 6840 - Independent Study (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Term offered: fall, spring. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

ENGL 6920 - Directed Readings (3 Credits)
Offers graduate student's instruction on an individual basis. Serves as preparation for the MA (literature) comprehensive examination. Prereq: Graduate standing. Department consent required. Term offered: fall, spring. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

ENGL 6940 - Portfolio Exam
In the portfolio exam, students prepare the culminating document of students' MA work, a portfolio combining reflection on work done at CU Denver with a forward look at students' career goals. Prereq: Graduate standing. Department consent required. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
Entrepreneurship (ENTP)

ENTP 5939 - Internship/Cooperative Education. (3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Graduate level students.

ENTP 6020 - Business Model Development & Planning (3 Credits)
This course familiarizes students with the key steps for preparing an effective business plan for a new (or existing) business venture. Utilizing strategies based on research, students learn how to create an effective pitch, a superb slide deck, and a cutting-edge business plan. Real-world feedback from seasoned entrepreneurs is synergistically interwoven with coursework, and THE CLIMB | Jake Jabs Business Plan Competition events are used to further enhance the quality of one's business concept. Several past students have won prizes at THE CLIMB and launched successful businesses from concepts developed in the course. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring.

ENTP 6022 - Digital Disruption (3 Credits)
Jointly taught by one of Colorado’s great entrepreneurs and an experienced professor, this CEO profiles course explores how digital innovations are disrupting traditional business practices. Students will participate in a team project where they identify an industry positioned for disruption, and then develop a relevant digital strategy. Students can also expect to learn from some of Colorado’s greatest digital and tech business leaders as key speakers. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

ENTP 6023 - Disruption in Private Equity and Real Estate (3 Credits)
This ‘profiles’ class combines the elements of two important investment pathways for the entrepreneur, namely Private Equity and Real Estate investing. Both these topic areas have experienced digital disruption in recent years and the course provides students with exposure to contemporary topics in both these fields. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring.

ENTP 6024 - Disruption in Private Equity (1.5 Credits)
Note: This 1.5-credit, 8-week course is comprised of the first half of a 3-credit, 16-week course: Disruption in Private Equity and Real Estate (ENTP 6023). Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

ENTP 6110 - Innovation in Fintech (3 Credits)
Fintech describes products and opportunities at accrue when vast synergies between finance and technology can be effectively operationalized. It is rapidly changing the way we think about money and finance and is profoundly impacts banks, global financial markets, transaction speed and government regulations. The global fintech market is predicted to reach around $250 billion by 2027. Categories include peer-to-peer lending, digital wealth management, insurance, consumer finance, real estate, blockchain, automation, and payment systems. Max hours: 3 Credits.
Grading Basis: Letter Grade

ENTP 6120 - Disruption in Private Equity (1.5 Credits)
Private Equity firms now need to contend with digital transformation as a ‘new dimension’ not only in terms of value creation, but also in terms of its being an imminent threat to legacy business models and industries. This course discusses sources and techniques of venture capital, including recent disruptions to the field. Additional topics covered include the critical elements in the search for financing, techniques for analyzing value, and tax considerations. Note: This 1.5-credit, 8-week course is comprised of the first half of a 3-credit, 16-week course: Disruption in Private Equity and Real Estate (ENTP 6023). Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

ENTP 6130 - Disruption in Real Estate (1.5 Credits)
Real Estate has historically been an entrepreneurial industry that has created great wealth for many. It also has the advantage of market entry on a small scale which can be grown with the entrepreneur’s success. Key topics such as commercial real estate, brokerage, property management, institutional investing, residential development, investment vehicles, and market disrupters such as Zillow and Redfin will be covered.
Note: This 1.5-credit, 8-week course is comprised of the second half of a 3-credit, 16-week course: Disruption in Private Equity and Real Estate (ENTP 6023). Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

ENTP 6200 - Mission Driven Entrepreneurship (3 Credits)
The course is designed to teach students to rethink the common market driven approach to innovation, with a mission driven focus. In this course, students will learn that impact innovation only exists in the non-profit realm. Completing this course will dispel the idea that purpose driven innovation only exists in the non-profit realm. Restriction: Graduate level students. Typically Offered: Fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6420 - Ethics: Formula for Success (3 Credits)
Students will learn how to spot and address red flags that foster unethical behavior in both publicly-traded and privately-held businesses. Governance and stakeholder management techniques that incentivize ethical behavior will be highlighted using examples of companies that are financially successful by “doing the right thing.” Principle-based ethics are emphasized, namely, integrity, trust, accountability, transparency, fairness, respect, viability, and compliance with the rule of law. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

Typically Offered: Spring.
ENTP 6620 - New Venture Operations and Project Management (3 Credits)
Many viable businesses have failed due to cash flow problems, poor management, and poor execution. Utilizing both academic fundamentals and practical knowledge imparted by an experienced instructor, this course provides the project management knowledge and skills needed to build strong operation plans. Restriction: Restricted to graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
Typically Offered: Fall.

ENTP 6800 - Special Topics in Entrepreneurship (3 Credits)
A variety of topics in entrepreneurship are offered. Consult the current 'schedule Planner' for semester offerings. Restriction: Graduate level students. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Graduate level students.

ENTP 6801 - Healthcare Innovation and Entrepreneurship (3 Credits)
This hybrid course is intended for STEM and business majors who are interested in digital health entrepreneurship. After completing this course, students should be able to: understand and apply the principles and practice of digital health entrepreneurship, work in project teams to pursue a digital health opportunity and validate underlying business model canvas hypotheses, present their findings and decide whether and how to proceed. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

ENTP 6802 - Regulatory Environment of Life Science Innovation (3 Credits)
This course is designed to familiarize engineering, business, law and life science students with the fundamentals of life science technology commercialization including drugs, devices, diagnostics, and healthcare IT and platform applications. Restriction: Restricted to graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring.

ENTP 6807 - Personal Branding (3 Credits)
This course is designed to show students how to create successful personal brand strategies for professional and personal development in both entrepreneurial and intrapreneurial environments. The course work will demonstrate the imperative link between marketing and personal branding through case studies, projects, guest speakers and reading materials. Students will also leave the course knowing how to develop and implement a personal branding plan. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Summer.

ENTP 6822 - Legal and Ethical Issues of Entrepreneurship (3 Credits)
This course addresses the legal issues most frequently encountered by entrepreneurs and others involved in startups and small, closely held or family businesses. The focus is on how to avoid legal problems and how best to cope when they arise. Topics include choice of business form, legal aspects of raising capital, taxation, intellectual property law, employment law, product liability, e-commerce and the problems of managing lawyers and litigation. Note: Cannot receive credit for both BUSN 6540 and this course. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6824 - Entrepreneurial Financial Management (3 Credits)
This course provides a foundation for the financial management of an entrepreneurial business. Topics covered include differentiation from traditional corporate financial management assumptions, financial aspects of setting up a business, and how to create, evaluate, forecast, and analyze future financial statements. Students will examine theoretical and practical valuation techniques, considerations for buying versus starting a business and franchising. The course also discusses different choices for financing a new business, venture capital, angel financing, crowd funding, private equity and security laws, harvesting alternatives, and financial distress turnaround considerations. Cannot receive credit for both FNCE 6460 and this course. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6826 - International Entrepreneurship (3 Credits)
This course focuses on the intersection of international business and entrepreneurship. Topics addressed include international entrepreneurship theory and practice (opportunity identification, processes and route to market). This course also highlights new topics in international entrepreneurship such as digital globalization and new technologies driving international entrepreneurship (blockchain and the global supply chain). Leading practitioners and entrepreneurs will be facilitating these modules. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6834 - Lean Marketing (3 Credits)
This course teaches students how to create successful marketing strategies in entrepreneurial environments where resources are often limited and negative outcomes can be unforgiving. The course work will demonstrate the imperative link between the fundamental marketing principles and entrepreneurial lean marketing guiding principles through real-life case studies, project, videos, podcasts and reading materials. Students will leave this course understanding how to develop an effective and pragmatic marketing plan for an entrepreneurial venture. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring.
ENTP 6836 - High Impact Sales for Entrepreneurs (3 Credits)
Selling one's own concept to prospective customers and investors is very different from selling products in a corporate environment. In this course, you will learn how to shift your mindset to an "ownership" stance, so as to effectively persuade clients, venture capitalists and angels, and other entrepreneurs to invest in your vision, your concept, and your authentic brand. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

ENTP 6838 - Data Analysis in Innovation and Entrepreneurship (3 Credits)
Entrepreneurial activity based on sound data analytics greatly reduces the probability of new concept failure and increases the odds of continued venture success. This quantitative analytics course covers various aspects of data collection, assimilation, and analysis. Topics covered include questionnaire design, measurement, advanced multivariate analysis, and interpretive report writing. Both primary and secondary approaches, including making sense of big data, are covered. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

ENTP 6840 - Independent Study: ENTP (3 Credits)
Restriction: Graduate level students. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Graduate level students.

ENTP 6842 - New Concept Development (3 Credits)
This course provides insights and tools that will help students assess the viability of new business concepts (a.k.a. those in the very early stages of development). Unlike the "business plan" course where students create an actual plan, this course will help students determine if a new business concept is truly worthy of a business plan. The main objective of the course focuses on understanding problems and solutions from the potential market's perspective. The value of the problem-solution approach is that it quickly gets to the reason why people buy things: to solve perceived problems. Along the way students will employ various experiential and theoretical learning aids to investigate a series of relevant topics such as product markets, new business concepts and entrepreneurial risk-taking. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

ENTP 6848 - Leadership in New Ventures (3 Credits)
This course provides students with an overview of key leadership principles for creating strategy and managing teams in a startup environment. It introduces leadership concepts critical to gaining true organizational commitment and focuses on case studies relevant to common business issues. By exploring what entrepreneurial leaders actually do and how visionary leadership is required to develop an organization, students will learn how to execute these concepts through measurable goals and objectives. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6860 - Innovation in Financial Technology and Blockchain (3 Credits)
The class has four focus areas. The first covers the fields in which fintech is operating, such as financial education, blockchain and crypto currency, retail banking and investment. The second examines examples of fintech, including trading apps, peer-to-peer lending and robo-advisors. The third analyzes the four types of users. The fourth is about fintech innovations in machine learning and AI. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to non-degree majors and graduate majors within UC Denver.
Typically Offered: Fall.

Environmental Sciences (ENVS)

ENVS 5010 - Landscape Biogeochemistry (3 Credits)
A holistic approach to studying the role chemical elements play in synthesis/decomposition cycles, and the resultant environment from interaction of the lithosphere with the hydrosphere, atmosphere, biosphere, and pedosphere during geological, and ecological timeframes, together with anthropogenic activities. Note: this course assumes that students have completed an introductory college-level physical geography or environmental science course. Prereq: Graduate standing. Cross-listed with GEOG 4010/GEOL 4010. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENVS 5020 - Earth Environments and Human Impacts (3 Credits)
This course examines the multitude of impacts that humans have exerted on Earth’s biomes and physical environment in a systems context, including vegetation, animals, soils, water, landforms and the atmosphere. It considers the ways in which climate changes and modifications in land cover have altered the environment, and how such changes will still accelerate in in coming decades. The course also explores emergent topics such as rewilding, novel and no analogue ecosystems, and ecosystem services. Additionally, it assesses the future impact of a growing human population on the planet within a context of the "anthropocene," an era dominated by human activity. Prereq: Graduate standing. Cross-listed with GEOG 4020, GEOL 4020. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENVS 5280 - Environmental Hydrology (4 Credits)
Examination of hydrologic processes in relation to climate, soils, vegetation, land-use practices, and human interactions. Natural scientific perspectives emphasized; field and laboratory included. Note: this course assumes that students have completed GEOG 1202 and one of: 1) GEOG 3232; 2) GEOG 4240/GEOL 4240/GEOG/5240; 3)GEOG 4010/GEOL 4010/ENV 5000. Prereq: Graduate standing. Term offered: spring. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
ENVS 5300 - Children’s Geographies (3 Credits)
This seminar is an investigation of children, childhood, and environment from geographical perspectives. Theoretical and methodological lenses are used to understand young people's interactions with/in different spaces. Cross-listed with GEOG 5300. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5305 - Water Quality and Resources (3 Credits)
Introduces water resources aimed at students with little or no background in the field. This is a broad course covering topics ranging from the physical aspects of water to water politics and international law. While the course is largely a lecture format, discussion of current issues is a significant part of the class. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with GEOG 4305. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5340 - Equity & Culture in Science Education: Local/Global (3 Credits)
This course examines literature in science education related to issues of culture and equity. Topics will be framed by an understanding of equity in diverse classrooms and how it informs research, curriculum and instruction. Cross-listed with SCED 5340 and SCED 4340. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5340 - Anthropocene Futures (3 Credits)
We are living in the "Anthropocene"—an era of rapid environmental and societal changes, and of decline and loss resulting from accelerating human interactions with Earth systems. Warming climates, wildfires, floods, water and food insecurity, novel ecosystems, and even pandemics such as COVID-19, are phenomena of the Anthropocene. With a still growing human population and a finite planet, understanding and overcoming such challenges is more pressing than ever, if people are to co-evolve with Earth toward a sustainable future. This interdisciplinary seminar course tells the scientific story of humanity's intensifying interactions with the planet and explores possible future paths. Through presentations, readings and discussion, students will examine topics that include the origin and significance of Anthroopocene in Earth's evolutionary history, the debates and evidences for a new geologic epoch, large-scale trajectories of environmental change, a safe operating space, and planting seeds for a "good" Anthropocene. In doing so, students will acquire skills and experiences in critical thinking and analytical reasoning to grapple with many uncertainties and tensions of the Anthropocene.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with GEOG 4380, GEOG 5380, and ENVS 4380. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5403 - Unsaturated Zone Hydrology (3 Credits)
Focuses on water and contaminant transport through the unsaturated zone, infiltration and drainage, and heat and gas transport. Students learn to design, perform field installation, and collect data in order to model and predict contaminant movement on/off site. Note: this course assumes that students have prior coursework in chemistry, physics, or calculus. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5410 - Aquatic Chemistry (3 Credits)
Course objectives are to: (1) identify and understand chemical and physical principles and processes that control the composition of natural water, (2) prepare students to critically evaluate scientific literature and experimental design related to water quality and environmental remediation, and (3) examine the validity of environmental water data. Note: this course assumes that students have completed general chemistry and/or CHEM 4700. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5450 - Urban Food and Agriculture: Perspectives and Research (3 Credits)
Provides an overview of research & practices in urban farming. Critically reviews emergent models of local food production/distribution. Compares new practices to traditional agribusiness. Assesses the prospects for solving sustainability problems within the modern agro-food system. Note: this course assumes that students have completed GEOG 3401. Prereq: Graduate standing. Cross-listed with GEOG 4450. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5450 - Sustainable Urban Agriculture Field Study I (3 Credits)
Provides a field-based overview of urban farm planning & management. Topics: range/land conservation, native/invasive species, water distribution, animal husbandry, government interaction, local markets, community relations, conservation easements and issues pertaining to urban farming. Note: this course assumes that students have completed ENVS 5450. Prereq: Graduate standing. Cross-listed with GEOG 4460. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5460 - Sustainable Urban Agriculture Field Study II (3 Credits)
Provides a field-based overview of current practices in local agricultural production. Emphasis will be placed on sustainable practices and their most efficient situation. Special consideration will be given to plausibe solutions for food insecure communities both local and global. Note: this course assumes that students have completed ENVS 5450 and 5460. Prereq: Graduate standing. Cross-listed with GEOG 4470. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5470 - Sustainable Urban Agriculture Field Study III (3 Credits)
Provides a field-based overview of current practices in local agricultural production. Emphasis will be placed on sustainable practices and their most efficient situation. Special consideration will be given to plausibe solutions for food insecure communities both local and global. Note: this course assumes that students have completed ENVS 5450 and 5460. Prereq: Graduate standing. Cross-listed with GEOG 4470. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5480 - Sustainable Urban Agriculture Field Study IV (3 Credits)
Provides a field-based overview of current practices in local agricultural production. Emphasis will be placed on sustainable practices and their most efficient situation. Special consideration will be given to plausibe solutions for food insecure communities both local and global. Note: this course assumes that students have completed ENVS 5450 and 5460. Prereq: Graduate standing. Cross-listed with GEOG 4470. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ENVS 5480 - Urban Vegetable CSA: Planning, Production & Distribution (3 Credits)
This course outlines the planning, production, and distribution in an active urban vegetable CSA (community supported agriculture) model. It is offered as a part of the GES Sustainable Urban Agriculture Certificate. Cross-listed with GEOG 4480. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5500 - Topics in Environmental Sciences (1-6 Credits)
Topics may vary from one offering to the next. Prereq: Graduate standing. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5620 - Health Risk Communication (3 Credits)
We are bombarded all day with communication expressing a sense of risk, of danger, of threats to our individual and communal well-being. This class acquaints students with contemporary theory, research and practice in health risk communication across a variety of threats both real and imagined. Cross-listed with COMM 5620, COMM 4620, and PBHL 4620. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5650 - Environmental Education (3 Credits)
This course links the theory and practice of environmental education to inform curricular development and pedagogical knowledge. Prereq: Graduate standing. Cross-listed with ENVS 4650 and SCED 5650. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5660 - Introduction to Smart Cities (3 Credits)
This course will explore some of the most change-making technological innovations in the 21st century and their impact on public policy in cities through a survey of best practices, model policies, and lessons learned from cities across the United States and globe. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ENGR 6299, PUAD 5627, and URPL 6299. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5700 - Synthesis for Interdisciplinary Science (3 Credits)
Synthesis is an approach in interdisciplinary research and education that links ideas, data and methods. This course develops synthesis skills through the lens of systems theory. It includes exercises for synthetic thinking, examination of integrative tools, and a service-learning project. Cross-listed with GEOG 4700. Breadth and depth training in environmental sciences. Interest in interdisciplinary collaboration. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5720 - Climate Change: Causes, Impacts and Solutions (3 Credits)
Examines science behind past, present & future climate change & environmental, social & political implications & solutions. Explores recent scientific research, syntheses & mainstream literature advancing knowledge about causes & consequences of natural & anthropogenic climate change. Cross-listed with GEOG 4720 / GEOG 5720 / ENVS 4720. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENVS 5730 - Air Quality Modeling and Analysis (3 Credits)
Emphasizes the use of air dispersion modeling tools. Topics include: sources and effects of air pollution, use of the WWW, and analysis of modeling results. Note: For graduate students in environmental sciences or engineering, and for those working in the environmental field. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5731 - Mountain Biogeography (4 Credits)
This hands-on research course will focus on the current and past distribution of plants and changes in disturbance regimes in the mountains using environmental proxy data preserved in lake sediment cores. A field trip will occur early in the semester. Restriction: Restricted to Graduate and Graduate Non-Degree students. Cross-listed with GEOG 4731. Term offered: fall. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENVS 5740 - Soil Science and Geography (3 Credits)
Reviews chemical and physical properties of soils, soil development, and geographic distributions of soil types in the context of the role that soils play in natural and human-altered ecosystems. Prereq: graduate standing or permission of instructor. Cross-listed with GEOG 4740, GEOG 5740, ENVS 4740. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
ENVS 5750 - Beeography: Geography of Bees (4 Credits)

Beeography is an introduction to the bee world and the amazing diversity in Colorado and beyond. The course will examine the distribution of bees and the pressures they face in different environmental and cultural contexts. It will examine different methods to support and increase bee populations and pollination services, especially in populated environments, including backyard beekeeping of honeybee and native bee populations. Field and lab activities will include beekeeping, native bee collection and identification, bee dissections, pollen processing and identification, and trips to area bee museum collections and apiaries. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with GEOG 4750, GEOG 5750, and ENVS 4750. Term offered: summer. Max hours: 4 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

ENVS 5757 - Urban Climate and Air Quality (3 Credits)

Explores how people alter climates on micro- to regional scales, and how this in turn affects human health and society. Focuses on recent scientific research, physical processes within cities, and the role of urbanization in global climate change. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with GEOG 5757. Max hours: 3 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENVS 5780 - Aquatic Ecology (3 Credits)

This course explores the physical, chemical, and biological (including human) properties of aquatic ecosystems, and how the interrelationships between these properties define and influence advanced ecological processes. Special focus is given to lakes, reservoirs, wetlands, streams, rivers, and groundwater. Learning is facilitated through lectures, discussions, student presentations, laboratory and data exercises, and periodic (often virtual) field excursions. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ENVS 4780, BIOL 4780, and BIOL 5780. Max hours: 3 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

ENVS 5840 - Independent Study: ENVS (1-3 Credits)

Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 3 Credits.

Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

ENVS 5880 - Directed Research (1-6 Credits)

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

ENVS 5939 - Internship (1-6 Credits)

Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 9 Credits.

Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ENVS 5995 - Global Study Topics (3-9 Credits)

This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Prereq: Graduate standing. Cross-listed with ENVS 4995, GEOG 4995, and GEOG 5995. Repeatable. Max hours: 12 Credits.

Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Global Education Study Abroad.

ENVS 6000 - Environmental Sciences Seminar (1 Credit)

Student and faculty presentations of UCDHSC research projects and other current environmental sciences topics. All environmental sciences students are encouraged to attend, but credit is given only to students who present seminars. Two semesters of this course are required to receive a M.S. in Environmental Science degree: these students must register for this seminar and give presentations the first semester they are in the M.S.E.S. program and the semester in which they defend their master’s project. Prereq: Graduate standing. Term offered: fall. Repeatable. Max Hours: 2 Credits.

Grading Basis: Letter Grade
Repeatable. Max Credits: 2.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENVS 6002 - Research Topics in Environmental Sciences (3 Credits)

Introduces research and professional development in the environmental sciences, focusing on current issues and trends in the field, methods of developing research, reading scientific literature, and guiding students in designing their course of study. Students are introduced to the environmental sciences faculty and their research programs. Prereq: Graduate standing. Repeatable. Max hours: 6 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

ENVS 6004 - Research Methods in Environmental Science (3 Credits)

This core MS Environmental Science course will explore a range of methods commonly encountered in environmental science fields and how to develop a research project and proposal. Prereq: ENVS 6002 with a C or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade
Prereq: ENVS 6002 with a C or higher.

ENVS 6100 - Research Topics in Environmental Management (3 Credits)

This is one of 4 core MS Environmental Science courses that will review and apply the principles and methods involved in designing and implementing effective environmental management. Prereq: ENVS 6002 with a C or higher. Max hours: 3 Credits.

Grading Basis: Letter Grade
Prereq: ENVS 6002 with a C or higher.
ENVS 6200 - Risk Assessment (3 Credits)
The process of determining the likelihood and extent of harm that may result from an activity or event. Topics covered are: hazard identification, dose-response evaluation, exposure assessment, and risk characterization. The subjects of risk management, risk perception, and risk communication are also discussed. Cross-listed with HBSC 7340. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 6210 - Human Health and Environmental Pollution (3 Credits)
Examines the roles of technology and society in the etiology and control/prevention of adverse health outcomes associated with releases of toxic substances. Examples come from experience and the literature on occupational cancer and reproductive hazards, occupational and environmental regulation of hazardous wastes, air, and water pollution. Cross-listed with HBSC 7210. Prereq: Graduate standing. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 6220 - Toxicology (3 Credits)
Introduces the field of toxicology. Emphasizes the mechanisms by which chemicals produce toxic effects and the methods for assessing toxicity. Note: Designed for students in the environmental sciences and occupational health fields. Note: this course assumes that students have completed one year of college chemistry and one year of college biology. Prereq: Graduate standing. Cross-listed with HBSC 7360. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 6230 - Environmental Epidemiology (3 Credits)
Provides a basic understanding of the methods used to study the effects on human health of exposures to physical, chemical, or biological factors in the external environment. The course explains the use of epidemiologic methods through a problem solving approach to investigating environmental health case studies. Note: this course assumes that students have completed a basic statistics course. Prereq: Graduate standing. Cross-listed with HBSC 7310. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 6240 - Independent Study: ENVS (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Department consent required. Repeatable. Max hours: 3 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 6250 - Master's Thesis (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 11 Credits. Grading Basis: Letter Grade with IP Repeatable. Max Credits: 11.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Additional Information: Report as Full Time.

Ethnic Studies (ETST)

ETST 5000 - Research Methods in Ethnic Studies (3 Credits)
Emphasizes the acquisition of a variety of data or information collection and analytic skills, especially those applicable to historical and social inquiry in ethnic studies. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ETST 4000. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ETST 5020 - Race, Culture and Immigration (3 Credits)
In this course, we will consider the social and legal construction of race and immigration. We will also explore how immigrants have been racialized both historically and in the current moment. In addition, we will consider the role of culture in shaping the immigrant experience and immigrant outcomes. Restriction: Graduate standing or instructor permission. Cross-listed with SOCY 4020, ETST 4020 and SOCY 5020. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ETST 5021 - Black and Latino Children in Families and Schools (3 Credits)
With a focus on application of scholarship to practice, this interdisciplinary course will introduce graduate students to scholarly literature from family sciences, sociology, education and related fields to understand Black and Latino children within family, school and community systems. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HDFR 5020. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ETST 5305 - Women of Color Feminisms (3 Credits)
This course is an overview of women of color feminist theorizing (thinking) and praxis (practice) in the U.S. We will explore these feminisms through the writing, art, and organizing efforts of women and trans, femme, and non-binary people of color with a focus on key themes and concepts including identity, difference, oppression, intersectionality, representation, violence, resistance, empowerment, solidarity, and coalition. Texts for the course highlight key issues in the feminist theorizing and praxis of Black, Latina/x, Chicana/x, Asian (American), Pacific Islander, Indigenous, and Arab (American) women and trans, femme, and non-binary people of color, especially the politics of identity and representation; structural oppressions and violence; and practices of survival, resistance, and activism. Not only will we examine how these feminists have critiqued oppression(s) based on race, class, gender, sexuality, nationality, and religion, (as well as how these systems of domination intersect), but what kinds of approaches, strategies, and changes these thinkers and activists have organized for and promoted. Cross-listed with ETST 4305, WGST 4305 and WGST 5305. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ETST 5457 - American Political Thought (3 Credits)
Critical examination of American political life at the intersections of social categories such as race, class, gender, sexuality, disability, and Indigeneity. Exploration of key and marginal thinkers through a variety of texts and genres. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ETST 4457, PSCI 4457, and PSCI 5457. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ETST 5574 - Critical Race/Class/Gender Studies (3 Credits)
A critical examination of American political life at the intersections of social categories such as race, class, gender, sexuality, disability, and Indigeneity. Exploration of key and marginal thinkers through a variety of texts and genres. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

ETST 5722 - Communicating Latinx Cultures (3 Credits)
Communicating Latina/o/x Cultures centers historical and contemporary vernacular and institutional discourse sand narratives about, by, and for Latina/o/x people and communities. Drawing on theories, methods, and practices to understand the complexities of Latina/o/x cultures and lives, we will investigate how different actors and activists express and experience borders, migration, dispossession, citizenship, colonialism/coloniality, colorism, white supremacy, environmental racism (including anti-Blackness), mono- and multilingualism, self-determination struggles, power, representation, resistance, and mutual support networks for alternative worldmaking. To situate these concepts and concerns, we will explore contexts and places ranging from Colorado to the Caribbean. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Term Typically Offered: Fall, Spring, Summer.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
ETST 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 6.

ETST 5939 - Graduate Internship in Ethnic Studies (1-6 Credits)
Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Note: Students must have graduate standing and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring, Summer.

ETST 5960 - Capstone in Ethnic Studies (3 Credits)
Provides a broad overview of social research methods pertinent to the study of race, ethnicity, gender, and culture. Explores theories concerning "ethnicity and race" as both social construct and constituent feature of people's identities and lived experiences. Ethnic Studies is an interdisciplinary major where students make connections across diverse fields of inquiry; this course provides a structure for integrating an interdisciplinary examination of the intellectual, cultural, and social dimensions of racial and ethnic groups. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ETST 4960. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

ETST 6950 - Independent Study: Ethnic Studies (1-18 Credits)
Independent study in ethnic studies. Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Max hours: 18 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 18.
Additional Information: Colorado State University.

Executive Business (XBUS)

XBUS 6100 - Executive MBA Leadership (3 Credits)
Personal and organizational assessments for success in changing business environments. Includes strengths assessment and training on how to leverage these styles and strengths to maximum potential. A second focus on organizational issues and succession planning. Partnership with Center For Creative Leadership. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to students in the Executive MBA Program.

XBUS 6110 - Preparing and Interpreting Financial Reports (3 Credits)
Examines the accounting and reporting procedures underlying financial statements issued by business enterprises. This examination is based primarily on the various rules and guidelines defined as generally accepted accounting principles (GAAP) as established by the Financial Accounting Standards Board (FASB). Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to students in the Executive MBA Program.

XBUS 6140 - Executive MBA Accounting (3 Credits)
Emphasizes the use of accounting statements and data in making business decisions. External financial accounting information and concepts are used for investment and credit decisions. Internal managerial accounting information and concepts are used for product costing, cost analysis and management control. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to students in the Executive MBA Program.

XBUS 6200 - Executive MBA Business Law and Ethics (3 Credits)
Students develop a working knowledge of legal and ethical parameters for business decision making. The course addresses the legal system and mechanisms for resolving disputes. Topics include constitutional law, torts, product liability, contracts, property law, consumer protection, intellectual property, business entities and employment law. It stresses the influence of legal issues on organizational decision making. Restriction: Restricted to students admitted to the Executive MBA program. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to students in the Executive MBA Program.

XBUS 6240 - Executive MBA Data Analytics (3 Credits)
Focuses on applying inferential statistics (estimation and hypothesis testing) and using statistical models for decision-making. Emphasizes the application of statistical tools to identify systematic patterns in large data sets. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to students in the Executive MBA Program.

XBUS 6300 - Executive MBA Economics (3 Credits)
Addresses profit-maximization, supply and demand, demand elasticity, the estimation of production and cost, and pricing and output decisions for making effective business decisions. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to students in the Executive MBA Program.

XBUS 6340 - Executive MBA Operations (3 Credits)
Examines use of productivity, quality, timeliness, and flexibility to improve efficiency and operating performance; examines the importance of integrating the marketing and operations functions. Emphasizes supply chain management, lean operations, innovation, product design to improve competitiveness, performance, efficiency. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to students in the Executive MBA Program.
XBUS 6400 - Executive MBA Negotiation (3 Credits)
Negotiation is the art and science of creating good agreements. This course expands managerial negotiation and conflict management skills by mixing lecture and practice, using hands on cases and exercises in which students negotiate with each other. The cases cover a range of negotiation contexts and provide the opportunity to discuss and develop effective strategies to attain better outcomes. Restriction: Restricted to students accepted into the Executive MBA program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program.

XBUS 6440 - Executive MBA Information Systems (3 Credits)
Focus is on management of information as a resource and on the identification of opportunities to exploit its potential for competitive advantage. Examines current issues/trends surrounding management of information/related technologies and addresses why and how these new technologies can be used to shape and support strategic initiatives. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program.

XBUS 6500 - Executive MBA International Course (3 Credits)
This 3-credit course offers students the opportunity to learn about and participate in global business through intensive classroom sessions and first-hand experiences abroad. The course overlays multiple experiential-learning models to offer students unique exposure to global teams, international business, and executive-level insights. Dependent on University risk and safety assessments, students will travel for approximately two weeks during this course. Outcomes: Understand key dimensions of the international environment and how they impact business decisions and operations through classroom sessions and executive presentations in country; Understand key cultural dimensions and how they impact business operations, interpersonal relationships, and leadership effectiveness through classroom sessions and by engaging with local experts in-country; Learn how to use leadership and management tools to enhance personal and team effectiveness during practice opportunities pre-departure and in-country; Work in teams to produce a valuable consulting project to a client firm in the country to be visited. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program.

XBUS 6530 - Interpreting the Economic Environment (3 Credits)
Studies the general structure and operation of the national economy from the aggregative point of view. Gives an introduction to macro-economic theory together with an examination of national income accounting concepts, the level of national income, employment, inflation, and rate of economic growth. The application of monetary and fiscal policies in solving economic stabilization problems is considered in-depth. A major part of the course is the development of a forecast for the economy. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program.

XBUS 6600 - Executive MBA Marketing (3 Credits)
This course addresses how to design and implement marketing strategies to meet the complex marketing challenges and opportunities facing organizations going to market in today's hyper-competitive environment. A major focus of the course is on using marketing to help develop, communicate, and deliver value to the customer. Specific topics include market research, segmentation, targeting, positioning, differentiation, value propositions, brands, pricing, distribution channels, and marketing communications. The capstone assignment in this course is the creation and presentation of a professional marketing plan. Restriction: Restricted to students in the Executive MBA Program. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program.

XBUS 6630 - Executive MBA Finance (3 Credits)
Develops the skills to understand the financial implications of major business decisions. Provides an overview of corporate finance, analysis of financial statements, financial planning, valuation, capital-investment decisions, capital structure policy, and cost-of-capital considerations. Case methodology is utilized to apply and understand financial decisions and strategy. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program. Typically Offered: Fall, Spring, Summer.

XBUS 6700 - Executive MBA Strategy (3 Credits)
This course is about the issues and challenges of leading a firm in a competitive environment from the perspective of a top executive. Coverage includes pursuing sustainable competitive advantage, making corporate investment decisions, and addressing uncertainty and execution challenges surrounding strategic choices. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program.

XBUS 6740 - Executive MBA Digital Technologies (3 Credits)
Executives from the areas' top business organizations lead discussions on current challenges and trends in business as they pertain to digital technologies. Topics include IT, marketing, operations, and supply chain, but vary each semester. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program.

XBUS 6800 - Executive MBA Sustainable Value Creation (3 Credits)
The goal for this course is to understand the purpose of the for-profit firm. In particular, we will explore how the firm creates value, broadly defined, by investigating the concept of strategic corporate social responsibility (strategic CSR). Strategic CSR draws on what we know about economic exchange and human psychology to explain how markets work (or don't) and how value is added (or subtracted) across the firm's stakeholders. Understanding these effects allows managers to build a sustainable competitive advantage for the firm, which places strategic CSR at the center of business success in the twenty-first century. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program. Typically Offered: Fall, Spring, Summer.
XBUS 6830 - Executive MBA Business Model Innovation (3 Credits)
Covers planning a business from inception; includes financial planning/product planning/market definition/creating a team/organizing/the elevator pitch/the investor presentation, and so on. Explores funding sources and the techniques and skills needed to obtain funding. Teams create/present business plan as an investor presentation. Restriction: Restricted to students in the Executive MBA Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA Program.

XBUS 6850 - Business Analytics (1.5 Credits)
Business Analytics. To compete in the global economy, businesses are collecting huge volumes of data about their customers, operations, and performance. But harnessing this data to deliver a competitive advantage is challenging without understanding how to use the data and what strategic opportunities are presented by the explosion in data. This course will explore practical strategies for implementing data-focused initiatives that create and capture more value. We will discuss what a business needs to build an internal analytics team and the decision-making processes that create competitive advantage. Max hours: 1.5 Credits.
Grading Basis: Letter Grade

XBUS 6890 - Mergers and Acquisitions and Corporate Development (1.5 Credits)
In this course, we will focus on some of the key aspects of M&A deal-making and implementation, and we will adopt an integrative approach that emphasizes strategic management issues in corporate development. Through a combination of case studies and readings covering concepts and frameworks, course participants will be exposed to a range of M&A issues that can be grouped into four main pillars: M&A within Corporate Strategy, Advisory Inputs, Corporate Development Tools, Deal Implementation. Max hours: 1.5 Credits.
Grading Basis: Letter Grade

Executive Health Administration (XHAD)

XHAD 6464 - Healthcare Reform in the US (3 Credits)
All health systems struggle with problems of suboptimal quality, high and growing costs, and uneven or inequitable access to healthcare services. Managing the trade-offs among these goals makes healthcare reform central to economic, social and political discussions worldwide. This class will focus primarily on health care reform at the macro-level; efforts at the federal and/or state level to fundamentally and comprehensively modify systems for financing, delivery and access to high quality health care in this county. Students will be asked to apply and integrate basic economic, finance, policy and other analytic frameworks to evaluating past, present and future healthcare reform initiatives, with a particular focus on the actual/potential impact of the issues identified as initially catalyzing or shaping health reform efforts. Max hours: 3 Credits.
Grading Basis: Letter Grade

XHAD 6465 - Baldrige Performance Excellence and Transformational Change (3 Credits)
This course is designed to provide a comprehensive overview of the Baldrige Framework for Performance Excellence and how leading executives use it to as a blueprint to build their organizational systems as well as an introduction to essential best practices in change leadership and management. Max hours: 3 Credits.
Grading Basis: Letter Grade

XHAD 6468 - Introduction to Medical Practice Management (3 Credits)
This course is designed to provide a comprehensive overview of medical practice management, the issues, tools, and techniques involved in managing a medical practice. Medical Practice Management will also provide the learners with an understanding of some of the financial models and regulatory issues that influence today's medical practice with an insight into the culture, human resource and governance issues that make medical practices unique among healthcare organizations. Max hours: 3 Credits.
Grading Basis: Letter Grade

XHAD 6484 - COVID-19 and the Law (3 Credits)
Develops student understanding of the numerous ways in which the law must reckon with, regulate, and regulate around, COVID-19. Shows how, while public health law primarily engages with pandemic to stop its spread, secondary legal regimes must also take pandemics into account in order to ensure the operation of law. This includes the laws of contract, tort, property, finance, welfare, and the like. Situates reading and format within ongoing pandemics to the degree appropriate. Restriction: Restricted to students currently enrolled in the Executive MBA in Health Administration Program. Permission required for other CU Denver Health Administration students. Max hours: 3 credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Executive MBA in Health Administration program.

XHAD 6485 - Healthcare Data Analytics (3 Credits)
This course equips healthcare executives to use data to discover what works; evaluate and improve practices and programs; intervene more effectively to measurably improve process KPIs; and better manage financial risks and improve health outcomes in a rapidly changing world. Restriction: Restricted to students in the Executive MBA in Health Administration program. Max hours: 3 Credits.
Grading Basis: Letter Grade

XHAD 6488 - Topics for Global Business In Healthcare Administration (3 Credits)
The Topics for Global Business for Healthcare Admin course integrates theory and practice through an examination of the global business environment. This course includes visits to international business centers where students will interact directly with executives and senior managers of international and domestic companies. The travel component for this course is an eight-day international business experience that occurs during the final semester of the Program. It provides first-hand, on-the-spot experience of how business is conducted (e.g., strategy, trade, organization, finance, marketing, management, economics, government, supply chain, culture, etc.) in the host countries. The trip presents a unique opportunity for face-to-face contact and exchange of experience between healthcare executives from the U.S. and their counterparts in the destination countries. Repeatable. Max Hours: 9 Credits
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

Finance (FNCE)

FNCE 5939 - Internship (1-3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Prereq: 21 semester hours and 3.5 GPA. Repeatable. Max Hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.
FNCE 6290 - Quantitative Methods for Finance (3 Credits)
This course provides a statistical foundation for subsequent courses in the Master of Science in Finance program. Major topics include descriptive statistics, probability theory, statistical estimation and inference and regression analysis. The emphasis is on finance applications, such as risk measurement, for portfolio diversification and the "market model". In addition, students develop competence in the use of statistical software packages. This course provides preparation for the statistical portions of the Certified Financial Analyst professional examinations. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6300 - Macroeconomics and Financial Markets (3 Credits)
Covers the U.S. financial system in the global economy. Specific topics include financial institutions, money creation and monetary policy; the Federal Reserve System and its operation; the international financial system; interest rate determination, yield curves, and their relation to fiscal policy; the role of households and business in financial markets; stock markets; and money markets and instruments. (Required for the M.S. in Finance degree.) Coreq: BUSN 6620. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6310 - Financial Decisions and Policies (3 Credits)
Emphasizes investment and financing decisions, and the analysis of the financial condition of the firm. Specific topics include capital budgeting, cost of capital, financing mix and strategy, firm valuation and management of working capital. Instruction is by the case method. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6620 Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School

FNCE 6330 - Investment Management Analysis (3 Credits)
In this course students will learn investment theories and how to apply them to portfolio management. Topics covered include asset allocation, security markets, the analysis and use of investment information, risk analysis and security valuation. This course is required for the M.S. in Finance degree. Prereq: BUSN 6640 and BUSN 6620 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 and BUSN 6620 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6340 - Business Firm Valuation (3 Credits)
In this class, students will learn two valuation techniques, fundamental valuation and relative valuation, to value a business. These techniques are useful in such situations as valuing firms for mergers and acquisitions and valuing stocks for investment purposes. Some of the topics included are valuation of start-up firms, valuation of privately held firms, and valuation of firms with negative earnings. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6350 - Financial Innovations (3 Credits)
Innovations include zero coupon bonds, inflation indexed bonds, structured notes, asset-backed securities, collateralized mortgage obligations, and interest rate swaps. The student learns about the markets and pricing of these securities, and how they affect interest rate risk. The course prepares the student for careers in corporate treasury management, structured financing, swaps trading, and mortgage backed securities design. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School

FNCE 6360 - Management of Financial Institutions (3 Credits)
Overview of financial institutions and their risk management/financial performance management issues such as: management of operational, credit, liquidity, interest-rate, capital, off-balance sheet, and environmental risks; Uniform Bank Performance Report (UBPR) risk/performance analysis, hedging techniques and regulations/performance/risk. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6365 - Banking Principles and Practices (3-9 Credits)
Covers money and capital markets, commercial lending, asset and liability management, loan portfolio management and bank management. This class is only available to Colorado Graduate School of Banking students. Similar material is covered in FNCE 6300 and FNCE 6360. Therefore Business School students must enroll in those courses. Banking students cannot receive credit for FNCE 6300 or FNCE 6360. Repeatable. Max Hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
FNCE 6370 - International Financial Management (3 Credits)
Addresses financial management in an international context that considers international capital movements and foreign exchange problems, and international operations as they affect financial functions. It reviews foreign and international institutions and the foreign exchange process and considers financial requirements, problems, sources and policies of firms doing business internationally. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with INTB 6372. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6372 - Time-Series Forecasting (3 Credits)
Students learn forecasting methodologies such as ARIMA, regression, smoothing, and time-series decomposition applicable to marketing, finance, accounting, human resources management, and supply chain and production management decision-making. This course focuses on practical applications of forecasting techniques, choosing and comparing appropriate methods and applying the results to workplace situations. If you do not meet the prerequisites you may contact the instructor for permission to register. Prereq: BANA 6610 or BUSN 6530 or FNCE 6290 or (BUSN 6530 taken at CU Denver or consent of instructor - no CBK waivers of BUSN 6530 will be considered. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BANA 6610 or BUSN 6530 or FNCE 6290 with a grade of C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6380 - Futures and Options (3 Credits)
This covers both speculation and hedging using futures and options. The student learns about futures pricing, how futures are related to the underlying commodities and how to design hedges. Stock index futures and interest rates futures get particular attention. The course covers the theory and application of option pricing, focusing on the binomial and Black-Scholes models. Popular options trading strategies are discussed. This course is useful for those who wish to trade or become portfolio managers, as well as those who plan on corporate treasury management. Prereq: BUSN 6640 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6382 - Survey of Financial Derivatives (3 Credits)
This course introduces forward contracts, used in price risk management for millennia. We cover the properties of forward/futures contracts, structure of the markets and strategic implications for speculation and hedging. We price forwards from spot price, and introduce convenience yield. Options used for insurance purpose (think of your car insurance as a put option) is a more expensive way to manage risk; we cover option strategies and basic pricing. The course concludes with swaps, credit derivatives and structured products. Asset classes covered are equity, fixed income, currency, agriculture, energy (oil/gas and electricity) and metal/mining. Prereq: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6410 - Real Options and Decisions Under Uncertainty (3 Credits)
This is an applied course in making investment decisions under uncertainty and flexibility. Traditional NPV analysis using tools such as Discounted Cash Flow (DCF) model assumes that once an investment decision has been made, managers have no control over the outcome and they remain passive throughout the life of the project. Most corporate projects, however, have a great deal of flexibility in terms of their execution. This course will help students develop skills to identify and analyze real options so that they may approach real world corporate investment decisions in a strategic manner. This course may be used to fulfill the requirement for an options course in the MS (Finance) program. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6411 - International Corporate Governance (3 Credits)
Discusses the structure and goals of the modern corporation, the primary governance mechanisms used to help companies achieve these goals, and how and why these roles, goals, and mechanisms vary across nations. The topics covered in the course include managerial compensation, board of director structure and ethics, shareholder activism, and how governance structures differ across countries. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Note: Students cannot receive credit for both FNCE 6411 and INTB 6411. Cross-listed with FNCE 4411 and INTB 6411. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
FNCE 6420 - Mergers and Acquisitions (3 Credits)
Examines the processes and decisions by which mergers, takeovers and other corporate restructuring occur, the transactions occur. Analyzes merger and acquisition decisions as part of strategic decision making, and how firms are valued in mergers. Discusses the market for corporate control and the public policy implications of mergers and corporate governance. Prerequisite: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prerequisite: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6450 - Short-Term Financial Management (3 Credits)
This course is a survey of methods for managing short term assets and liabilities. Specific topics include the analysis of the firm's liquidity and cash flow; banking relationships; collection and disbursement systems; management of short term investment and financing; management of receivables, payables and inventory; and short term forecasting. This course is affiliated with the Association of Financial Professionals, allowing students earning at least a 'B' to sit for the Certified Treasury Professional (CTP-A) exam. Prerequisite: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prerequisite: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6460 - Emerging Market Finance (3 Credits)
This course aims to explore key emerging market finance issues from the perspectives of corporations, investors and markets. Emerging economies are deemed to be the engine of growth opportunities in the world economy. However, compared with developed markets, they typically have some unique features in their economic systems and financial markets, and thus different risk and return characteristics, leading to special considerations of capital budgeting, financing and investing in these economies. This course is designed to help develop a better understanding of financial markets, corporate finance and investments in emerging economies, with case studies on some major emerging markets (e.g., China, India). Prerequisite: BUSN 6640. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NDGR within the Business School. Cross-listed with INTB 6460. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prerequisite: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NDGR within the Business School.

FNCE 6470 - Behavioral Finance (3 Credits)
Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers were generally rational and the prices of securities were generally "efficient." In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we examine how the insights of behavioral finance complements the traditional paradigm and sheds light on the behavior of asset prices, corporate finance, and various Wall Street institutions and practices. Prerequisite: BUSN 6640. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prerequisite: BUSN 6640

FNCE 6480 - Financial Modeling (3 Credits)
Develops and implements financial models for purposes of financial planning and decision making. This course is intended to allow the student to increase her or his knowledge and skill in the development of various types of computer-based financial planning models. The students are exposed to the use of a variety of computer software packages that can be used for modeling financial planning problems. Prerequisite: BUSN 6640, knowledge of computer and spreadsheet software. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prerequisite: BUSN 6640 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6490 - Commodity Trading (3 Credits)
This is a co-listed class with the J.P. Morgan Center for Commodities and the Finance Department. This course focuses on how securities and futures contracts are designed and traded including trading exchange operations, regulation, trading mechanisms and processes. Students will learn the theory and practice of securities and futures contract trading with a focus on hands-on trading experience using industry software (CQG and Bloomberg) as well use of data sources (Morningstar). In this course, we will review the origins of liquidity, volatility, price efficiency, and trading profits. Next we will cover a host of topics concerning equity and commodity trade execution strategies, such as why and how investors trade, what and when investors profit from investing and speculating, the key principles of high-frequency trading and investor's overconfidence, why market institutions are organized as they are, and the role of public policy in the markets. Cross-listed with CMDT 4490, CMDT 6490 and FNCE 4490. Max hours: 3 Credits.
Grading Basis: Letter Grade

FNCE 6800 - Special Topics (1.5-3 Credits)
Experimental course offered irregularly for the purpose of presenting new subject matter in finance. Prerequisites vary depending upon topics covered. (Consult the 'Schedule Planner' for semester offerings.) Prerequisite: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6802 - Foundations of Commodities (3 Credits)
This course introduces students to the physical aspects of commodities and connects them to the financial markets in which commodities are traded. Fundamental concepts and terminology necessary for understanding commodity production, transportation, economics, financial analysis and marketing are described. Supply chains for several specific commodities are reviewed in detail, as examples of the production and market structure knowledge needed to be successful professional participants in commodity trading capacities. The course also serves a foundation for more focused education in the specific commodity sectors, as well as the applied use of marketing and financial trading concepts learned in other courses. Cross-listed with FNCE 4802 and CMDT 4802/6802. Max hours: 3 Credits.
Grading Basis: Letter Grade
FNCE 6840 - Independent Study: FNCE (1-8 Credits)
Instructor approval required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6995 - Travel Study (3 Credits)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors within the Business School.

FNCE 8990 - Dissertation Development (1-15 Credits)
Supports development of a dissertation in conjunction with a student's advisor. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 15.
Additional Information: Report as Full Time.

Fine Arts (FINE)

FINE 5020 - Graduate Anatomy for Artists (3 Credits)
An intensive figure drawing course that focuses on structure, movement and proportions. Skeletal and muscular systems are studied using the classic texts of artistic anatomy. A research paper is also required.
Prereq: Graduate Level Standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring.

FINE 5190 - Graduate Photography (3 Credits)
Graduate students create an independent body of photographic work that integrates sophisticated concepts with technical mastery. Through critiques, presentations and discussions, students relate subject matter to historical and contemporary context. Students build expertise in professional development in photography. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: FINE 4196 Restriction: Restricted to FINE-BFA PHO majors within the College of Arts and Media
Typically Offered: Fall.

FINE 5200 - Graduate Painting/Drawing I (3 Credits)
An intensive painting and drawing course for students who have completed their bachelor's degree in fine arts to further develop their technical and expressive means to implement their ideas. Self-directed studio is paired with studies in theoretical and critical analysis.
Note: Students missing the first 2 classes of this course may be administratively dropped. Students will not be allowed to add course if they have missed the first 2 classes. Restriction: Restricted to CU Denver Graduate Students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

FINE 5210 - Graduate Painting/Drawing II (3 Credits)
This is the second level of graduate painting and drawing with a tutorial focus. Emphasis is placed on directed research and the development of significant body of original work reflecting student's expressive and theoretical concerns. Note: Students missing the first 2 classes of this course may be administratively dropped. Students will not be allowed to add course if they have missed the first 2 classes. Restriction: Restricted to CU Denver Graduate Students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

FINE 5340 - Topics in Studio Art (1-3 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

FINE 5446 - Visualization & Infographics (3 Credits)
In our data and information-rich society, visual representations of data can be useful for making sense of available information and fostering understanding. This course engages students in critique existing work and encourages a thoughtful design process toward creation of information graphics and simple data/information visualizations. Max hours: 3 Credits.
Grading Basis: Letter Grade

FINE 5447 - Presenting Science (3 Credits)
Sophisticated graphical components can help a viewing audience understand complex scientific information more clearly. This project-based learning course engages students in creation of thoughtful graphic explanations of science for the purpose of enhancing scientific presentations and audience comprehension. Max hours: 3 Credits.
Grading Basis: Letter Grade

FINE 5448 - BioMedical 3D Animation (3 Credits)
3D Animation can be a powerful tool for telling stories rooted in science and medicine. This course provides opportunity to learn from existing animated works while honing skills in storyboarding, narrative and 3D animation with focus on biology, science, and health education.
Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to senior CRAR and FINE majors within the College of Arts and Media.

FINE 5450 - Social Engagement by Design (3-6 Credits)
Through lectures, discussions and conducting onsite research in international settings, students will become familiar with professional practitioners' Perspectives and experiences in the field of socially engaged design while interrogating current practices, policies, and expectations informing community engagement and by Design.
Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Summer.

FINE 5522 - Interdisciplinary Art in Ireland (6 Credits)
The interdisciplinary course introduces students to the methods and concepts of contemporary site-specific art as critical theory through lecture and critique and as practice in the rural/urban landscape and studio along Ireland’s County Clare coastline in the Burren region. Max hours: 6 Credits.
Grading Basis: Letter Grade
Additional Information: Global Education Study Abroad.
FINE 5523 - Topics in Art History I: Art Before Modernism (1-3 Credits)
Variable: Art History lecture course pertaining to art before Modernism.
Restriction: Restricted to Graduate Students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5524 - Topics in Art History II: Modern and Contemporary (3 Credits)
Variable: Art History lecture course pertaining to art since Modernism.
Restriction: Restricted to Graduate Students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5525 - Museum Studies (3 Credits)
A seminar about museums and art galleries as institutions for the preservation and exhibition of cultural materials. Through writing assignments, discussions, site visits, and analysis, students will demonstrate knowledge and critical thinking on the display of art.
Restriction: Restricted to Graduate Students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5600 - History of Modern Design: Industrial Revolution-Present (3 Credits)
A lecture course involving the history of design from the Industrial Revolution to the present. The course will address the graphic design, typography, architecture, "Decorative arts", and new media from each period/major design movement in that time frame. Restriction: Restricted to Graduate Students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5610 - Pre-Columbian Art (3 Credits)
A lecture course on the art and architecture of Mesoamerica and the Andes before the Spanish conquest. Through visual analysis, vocabulary acquisition, discussion, exams and writing assignments, students will demonstrate knowledge of historical developments and an ability to analyze the art. Restriction: Restricted to Graduate Students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5620 - American Art (3 Credits)
A lecture course on the art of the United States from colonial times to World War II. Through visual analysis, vocabulary acquisition, discussion, exams and writing assignments, students will demonstrate knowledge of historical developments and an ability to analyze the art. Restriction: Restricted to Graduate Students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5630 - History of Latin American Art: 1520-1820 (3 Credits)
A lecture course studying Latin American art of 1520-1820, including major artists and periods. Through visual analysis, vocabulary acquisition, exams, and writing assignments, students will demonstrate knowledge of historical developments and an ability to analyze the arts. Restriction: Restricted to Graduate Students. Cross-listed with FINE 4630. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5632 - History of Digital Media (3 Credits)
Art historical survey and critical discourse of digital and electronic multimedia that covers the influences which have shaped this medium, its major contributors, the technological innovations and cultural impacts on society as an art form and commercial market form. Restriction: Restricted to Graduate Students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5644 - Topics in Art History (1-3 Credits)
Restriction: Restricted to Graduate Students. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Graduate level students.

FINE 5670 - Greek and Roman Art (3 Credits)
A lecture course studying Latin American art of 1520-1820, including major artists and periods. Through visual analysis, vocabulary acquisition, discussion, exams and writing assignments, students will demonstrate knowledge of historical developments and an ability to analyze the art. Restriction: Restricted to Graduate Students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5680 - Art of the Medieval Multiverse (3 Credits)
A lecture course critically examining the art and architecture of an expansively defined medieval world across themes including geographies and peoples, materials, identities and medievalisms. Through close engagement with artworks and texts, students will gain new perspectives on the diversity of medieval art. Restriction: Restricted to Graduate level students. Cross-listed with FINE 4680. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINA 5700 - Northern Renaissance Art (3 Credits)
A lecture course about developments in Northern Renaissance art and architecture. Through visual analysis, vocabulary acquisition, discussion, exams and writing assignments, students will demonstrate knowledge of historical developments and an ability to analyze the art. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5705 - Northern Renaissance Art (3 Credits)
A lecture course about developments in Northern Renaissance art and architecture. Through visual analysis, vocabulary acquisition, discussion, exams and writing assignments, students will demonstrate knowledge of historical developments and an ability to analyze the art. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
FINE 5710 - Baroque and Rococo Art (3 Credits)
A lecture on Italy, Spain, France, England, and the Netherlands during the seventeenth and eighteenth centuries. Through visual analysis, vocabulary acquisition, discussion, exams and writing assignments, students will demonstrate knowledge of historical developments and an ability to analyze the art. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5715 - Islamic Art and Architecture (3 Credits)
A lecture course on art and architecture of the Islamic world from the emergence of Islam in the 7th century to c. 1850. Students will engage in visual and contextual analyses, object-based research, and vocabulary acquisition. Prereq: Graduate level standing. Cross-listed with FINE 4715.
Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5770 - Art of India and Southeast Asia (3 Credits)
A lecture course on selected themes and periods in the arts of India and Southeast Asia. Through visual analysis, vocabulary acquisition, discussion, exams and writing assignments, students will demonstrate knowledge of historical developments and an ability to analyze the art. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5790 - Methods in Art History (3 Credits)
A seminar about the various research methodologies in the history of art. Through reading, discussion, research, writing assignments, and presentations, students will demonstrate knowledge of art historiography.
Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

Typically Offered: Fall.

FINE 5725 - 3D Architectural Visualization (3 Credits)
A lecture/lab course covering the 3D visualization of architectural projects. Students will develop skills/knowledge about the techniques for creating realistic 3D Architectural visualization. Special emphasis will be placed creating realism in modeling, materials, lighting, and professional renderings. Intro level 3D/CAD skills req. Max hours: 3 Credits.
Grading Basis: Letter Grade

FINE 5825 - 3D Architectural Visualization (3 Credits)
A lecture/lab course covering the 3D visualization of architectural projects. Students will develop skills/knowledge about the techniques for creating realistic 3D Architectural visualization. Special emphasis will be placed creating realism in modeling, materials, lighting, and professional renderings. Intro level 3D/CAD skills req. Max hours: 3 Credits.
Grading Basis: Letter Grade

FINE 5840 - Independent Study: FINE (1-3 Credits)
Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

FINE 5939 - Internship (1-6 Credits)
Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

FINE 5970 - Modernist Art (3 Credits)
A lecture course about developments in Modernist art and architecture from the late 18th century to 1960. Through visual analysis, vocabulary acquisition, discussion, exams and writing assignments, students will demonstrate knowledge of the period's historical developments and an ability to analyze its art. Restriction: Restricted to Graduate Students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5980 - Gender in Contemporary Art (3 Credits)
This lecture course will address ways in which gender issues have affected the creation and study of visual arts since the early 20th century, with an emphasis on art and culture since World War II. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

FINE 5997 - Modern and Contemporary Art (3 Credits)
From prehistoric traditions to modern revivals, tattooing has proved to be an enduring feature of artistic practice. The seminar will analyze examples of tattoos from different cultures and contexts, so as to understand the variety in form and function. Cross-listed with FINE 4991.
Max hours: 3 Credits.
Grading Basis: Letter Grade

FINE 5998 - Topics Seminar in Art History I: Art before Modernism (3 Credits)
Variable: Art History seminar pertaining to art before Modernism.
Restriction: Restricted to Graduate Students. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

FINE 5999 - Contemporary Art: 1960-Present (3 Credits)
Variable: Art History seminar pertaining to art before Modernism.
Restriction: Restricted to Graduate Students. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

FINE 5994 - Topics Seminar in Art History II: Modern and Contemporary Art (3 Credits)
Variable: Art History seminar pertaining to Modern and contemporary art.
Restriction: Restricted to Graduate Students. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

Restriction: Graduate level students.
FINE 5995 - Travel Study (1-15 Credits)
Created for students doing travel study in a foreign country. Students register through the Office of International Education. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Repeatable. Max Credits: 15.
Additional Information: Global Education Study Abroad.

Foundations (FNDS)
FNDS 5000 - Teaching as a Profession (3 Credits)
General foundations of education course for pre-service candidates. Provides a broad overview of the historical, sociological, philosophical, and legal foundations of education. Includes an examination of contemporary issues in schooling, school organizational patterns, and the professional rights and responsibilities of the teacher. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

French (FREN)
FREN 5082 - Introduction to Translation (3 Credits)
Introduces the methodology and practice of written translation from English to French/French to English. Students will learn techniques on how to avoid word by word translation, faulty sentence structure and anglicisms by focusing on grammar, syntax and vocabulary. Note: Students must demonstrate third-year competence and advanced writing skills in English. Students with native or near-native level proficiency in French must consult with the French advisor before enrolling in this course. These students may, in some cases, take this course. The instructor of the course and/or the French advisor reserve the right to determine the level of linguistic proficiency of the student and his or her admission to the class by means of an oral interview and/or placement exam scores. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4082. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

FREN 5200 - French Civilization Through the Nineteenth Century (3 Credits)
Development of French culture and civilization from a historical perspective, beginning with the origins of France and continuing through the 19th century. Includes historical background, sciences and techniques, daily life, the arts, literature and philosophy, and religion. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Term offered: spring term of even years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

FREN 5210 - French Civilization - Twentieth and Twenty-First Centuries (3 Credits)
(Continuation of FREN 5200) The development of French culture and civilization in a historical perspective from the beginning of the 20th century to the present. Includes historical background, sciences and techniques, daily life, the arts, literature and philosophy, and religion. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Term offered: fall term of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

FREN 5430 - Nineteenth Century French Novel (3 Credits)
Development of the French novel during the 19th century. Includes such writers as Stendhal, Hugo, Balzac, George Sand, Flaubert, Maupassant and Zola. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4430. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

FREN 5480 - Twentieth Century French Novel (3 Credits)
Represents novels of the 20th century, a period of great innovation in the French novel. Authors generally treated are Camus, Giono, Ernaux and Duras. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4480. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

FREN 5510 - French Women Writers (3 Credits)
Designed to explore writings by French and Francophone women from the Middle Ages to the present. Addresses the question of what it means to be a woman and want to write. The selections include a wide variety of genres: autobiographical writings, stories, poems, manifestos, letters, political and historical documents. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4510 and WGST 4511/5511. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

FREN 5520 - Voices of Haiti and the Caribbean (3 Credits)
This course explores the literary production of contemporary Haitian and Caribbean writers within varied cultural and gender contexts. It focuses on historical, societal and post-quake issues confronting both men and women writers of the French Caribbean. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4520. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
FREN 5600 - History of the French Language (3 Credits)
Studies phonological, morphological, and syntactic changes in the language of Gaul from Latin to modern French. Prereq: graduate standing. Note: This course is intended for students with an undergraduate degree in French or advanced-level proficiency. Cross-listed with FREN 4600. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

FREN 5690 - Methods of Teaching Modern Languages (3 Credits)
Studies the methods and practices of teaching modern languages. Note: requirement for those wishing to be teaching assistants in the Department of Modern Languages, and for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, SPAN 5690, FREN 4690, GRMN 4690, GRMN 5690, CHIN 4690, CHIN 5690. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

FREN 5691 - Methods of Teaching Modern Languages II (3 Credits)
A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, SPAN 5691, FREN 4691, GRMN 4691, GRMN 5691, CHIN 4691, CHIN 5691. Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

FREN 5840 - Independent Study: FREN (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

FREN 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

FREN 5995 - Global Study Topics (1-15 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Term offered: summer. Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

Geography (GEOG)

GEOG 5022 - Federal Data for Health Research & Policy (1-3 Credits)
Students will develop the knowledge and skills required to effectively use a variety of federal and statistical data sets for health research and policy analysis. Each week is devoted to one or two federal statistical datasets—data collection methods; why they are collected and what health issues they are designed to address; what population they represent and at what geographic scale. Most critically, students will be able to distinguish between questions that can be addressed with a public version of the data and questions that require restricted versions of the data that are protected by federal law and guidelines. Students will read, discuss and present research from various perspectives (Demography, Economics, Geography, Public Health, Sociology) using these data sources and apply their knowledge of data analysis from a variety of perspectives. Students will learn how to gain access to restricted data, how to protect individual anonymity with best practice disclosure avoidance techniques and will develop a research proposal for confidential research access. Note: Familiarity with SAS (preferable) or other statistical software such as SPSS and Stata and statistics or data analysis is recommended. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ECON 6022, HBSC 6022, and SOCY 5022. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOG 5050 - Applied Spatial Statistics (3 Credits)
Practice and application of spatial analytical and statistical methods using modern GIS and spatial statistical software. Topics include spatial data handling, interpolation, pattern analysis, cluster detection, visualization, and modeling. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Note: an introductory course in statistics is strongly recommended for success in this course. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

GEOG 5060 - Remote Sensing I: Introduction to Environmental Remote Sensing (3 Credits)
An in-depth treatment of the use of aerial photographs and other forms of imagery for the analysis of urban-industrial patterns, vegetation, agriculture, landforms, and geologic structure. Cross-listed with GEOG 4060. Completion of GEOG 2080 with a C or better is recommended for optimal student success. Prereq: Graduate standing. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.
GEOG 5070 - Remote Sensing II: Advanced Remote Sensing (3 Credits)
Focuses on digital image processing of satellite and aerial images. Students explore the nature of digital image data, gain an understanding of image analysis using PCs, and learn about the use of analysis products in the development of GIS databases. Prereq: Graduate standing and GEOG 4060/5060 with a B- or better or permission of instructor. Cross-listed with GEOG 4070. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4060/5060 with a B- or better.
Typically Offered: Spring.

GEOG 5080 - Introduction to GIS (3 Credits)
Introduces Geographic Information Systems (GIS), including justification, hardware/software, database design, and data conversion. GIS is a computer-based mapping system providing a graphical interface to locational and relational attribute data. Includes hands-on use of a GIS workstation. Cross-listed with GEOG 4080. Prereq: Graduate standing. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

GEOG 5081 - Cartography (3 Credits)
Provides an introduction to the art and science of cartography (map making). Students will learn about design principles, tools and techniques of map production, culminating in the creation of a high-quality map through hands-on exercises. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of C or better. Note: Completion of GEOG 2080 with a C or better is recommended for optimal student success. Cross-listed with GEOG 4081. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of C or better.
Typically Offered: Fall, Spring.

GEOG 5085 - GIS Applications for the Urban Environment (3 Credits)
Takes a more detailed look at basic concepts presented in the introductory GIS course, concentrating on how GIS is used to solve real-world geographic problems. Various GIS applications within both the natural and social sciences are highlighted. The selection of specific topics is flexible, based on the interests of enrolled students. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Cross-listed with GEOG 4085. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better.
Typically Offered: Spring.

GEOG 5086 - FOSS4G Systems Integration (3 Credits)
Focuses on the integration of different FOSS4G (Free and Open Source Software for Geospatial Applications) software and technologies to create geospatial information systems that access data from different sources, storage structures, and formats to provide information to support decision making processes. Prereq: Graduate (including non-degree graduate) standing and GEOG 4091 or 5091, and GEOG 4092 or 5092 with a B- or higher. Cross-listed with GEOG 4086. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate (including non-degree graduate) standing and GEOG 4091 or 5091, and GEOG 4092 or 5092 with a B- or higher.

GEOG 5090 - Environmental Modeling with Geographic Information Systems (3 Credits)
Applies raster spatial analysis and modeling to study processes and spatial relationships to support decisionmaking in natural and built environments. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Cross-listed with GEOG 4090. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better.
Typically Offered: Fall.

GEOG 5091 - Open Source Software for Geospatial Applications (3 Credits)
Students will master the individual use and integration of a stack of the most powerful Free and Open Source Software for Geospatial Applications (FOSS4G) to analyze spatial problems and create Spatial Data Infrastructures in different technological, socio-economic and organizational settings. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Cross-listed with GEOG 4091. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better.
Typically Offered: Fall.

GEOG 5092 - GIS Programming and Automation (3 Credits)
Students will learn the most commonly used programming language to automate GIS geoprocessing tasks and workflows in the latest versions of the most popular GIS systems. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Cross-listed with GEOG 4092. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better.
Typically Offered: Fall.

GEOG 5150 - Place, Landscape, and Meaning (3 Credits)
Investigates the concepts of place, landscape, and their meanings. Incorporates theoretical and experiential perspectives to understand how socio-spatial interactions construct diverse identities and their implications for equity. Note: this course assumes that students have completed an introductory human geography course. Prereq: Graduate standing. Cross-listed with GEOG 4150. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
GEOG 5220 - Environmental Impact Assessment (3 Credits)
The objective of this course is to provide the foundation for understanding the environmental impact assessment process, its legal context, and the criteria and methods for procedural and substantive compliance. Cross-listed with GEOG 4220, URPL 6549. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5230 - Hazard Mitigation and Vulnerability Assessment (3 Credits)
Examines hazard mitigation and its planning and policy implications, emphasizing how vulnerability assessments play an integral role. Students explore how mitigation minimizes the impacts from hazards and use GIS to conduct a local study. Note: this course assumes that students have completed GEOG 2202 or equivalent. Prereq: Graduate standing. Cross-listed with GEOG 4230. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5235 - GIS Applications in the Health Sciences (3 Credits)
Examines how GIS is used throughout the health care industry and public health. Covers environmental health, disease surveillance, and health services research. Students critically review current literature and gain hands-on experience with GIS software. Note: this course assumes that students have completed GEOG 4080 or GEOG 5080 and/or have a background in public health. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with GEOG 4235, HBSC 7235. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5240 - Applied Geomorphology (3 Credits)
Uses hands-on tasks and field trips to investigate processes behind Earth's changing landforms in a variety of physical landscapes (aeolian, volcanic, coastal, fluvial, karst, glacial and periglacial) as related to rock decay, soils and climatic forcings. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072 and GEOG 3232. Prereq: Graduate standing. Cross-listed with GEOL 4240, 5240 and GEOG 4240. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5250 - Landform Analysis (3 Credits)
In-depth view of the processes and systems found in glacial environments. Topics include: evidence of past glaciation; present-day glacial extent; glacier dynamics; glacial erosional processes and landforms; glacial depositional processes and landforms. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072 or equivalent. Prereq: Graduate standing. Cross-listed with GEOG 4270, GEOL 4270 and GEOG 5270. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5255 - Sustainability in Resources Management (3 Credits)
Sustainability and sustainable development are the dominant economic, environmental and social issues of the 21st century. Follows a multi-disciplinary approach to these concepts. Case studies demonstrate their implementation in different geographical, ecological and socio-economic conditions worldwide. Note: this course assumes that students have completed ENVS 1042 or equivalent. Prereq: Graduate standing. Cross-listed with GEOG 4265. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOG 5260 - Contemporary Environmental Issues (3 Credits)
Provides an overview of the processes and systems found in glacial environments. Topics include: evidence of past glaciation; present-day glacial extent; glacier dynamics; glacial erosional processes and landforms; glacial depositional processes and landforms. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072 or equivalent. Prereq: Graduate standing. Cross-listed with GEOG 4270, GEOL 4270 and GEOG 5270. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5300 - Children's Geographies (3 Credits)
This seminar is an investigation of children, childhood, and environment from geographical perspectives. Theoretical and methodological lenses are used to understand young people's interactions with/in different spaces. Cross-listed with ENVS 5300. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

GEOG 5335 - Contemporary Environmental Issues (3 Credits)
Provides an overview of environmental challenges facing society today, focusing on how humans impact and change the environment. Opposing views and environmental policy at the local, state, national, and international levels are explored. Cross-listed with GEOG 4335. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

GEOG 5350 - Environment and Society in the American Past (3 Credits)
Overview of the geographical development of North American society from the late 15th century to the mid-20th century. A comparative regional approach emphasizing relationships between natural resource exploitation, cultural landscape formation and environmental change. Cross-listed with GEOG 4350. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
GEOG 5380 - Anthropocene Futures (3 Credits)
We are living in the “Anthropocene”—an era of rapid environmental and societal changes, and of decline and loss resulting from accelerating human interactions with Earth systems. Warming climates, wildfires, floods, water and food insecurity, novel ecosystems, and even pandemics such as COVID-19, are phenomena of the Anthropocene. With a still growing human population and a finite planet, understanding and overcoming such challenges is more pressing than ever, if people are to co-evolve with Earth toward a sustainable future. This interdisciplinary seminar course tells the scientific story of humanity’s intensifying interactions with the planet and explores possible future paths. Through presentations, readings and discussion, students will examine topics that include the origin and significance of Anthropocene in Earth’s evolutionary history, the debates and evidences for a new geologic epoch, large-scale trajectories of environmental change, a safe operating space, and planting seeds for a “good” Anthropocene. In doing so, students will acquire skills and experiences in critical thinking and analytical reasoning to grapple with many uncertainties and tensions of the Anthropocene.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors.
Cross-listed with GEOG 4380, ENVS 4380, and ENVS 5380. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate and graduate non-degree majors
Typically Offered: Fall.
GEOG 5420 - The Politics of Nature (3 Credits)
"Examines how economic systems, scientific discovery, institutional policies, and environmental knowledge converge to shape the environment and mediate the way societies understand, manage and respond to environmental changes in both the United States and the developing world. Cross-listed with GEOG 4420. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits." Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 5440 - Science, Policy and the Environment (3 Credits)
Examines the social, economic and political forces shaping scientific discovery and the development and enforcement of environmental policy. Students will examine perspectives on issues such as risk, expertise, uncertainty and objectivity that influence the problem-defining, standard-setting and policy-making process. Cross-listed with GEOG 4440. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
GEOG 5480 - Urban Sustainability: Perspectives and Practice (3 Credits)
Examines various perspectives on sustainability, including ambiguities and opportunities of sustainability as a conceptual framework. Class also examines what sustainability looks like in practice, using numerous topics such as poverty and urban farming to water and climate change. Cross-listed with GEOG 4680. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
GEOG 5710 - Disasters, Climate Change, and Health (3 Credits)
Provides a review of the impacts of disasters and climate change on human health, using a broad framework of preparedness, mitigation, response, recovery, and adaptation. Note: this course assumes that students have completed GEOG 2202 or GEOG 3501. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 5720 - Climate Change: Causes, Impacts and Solutions (3 Credits)
Examines science behind past, present & future climate change & environmental, social & political implications & solutions. Explores recent scientific research, syntheses & mainstream literature advancing knowledge about causes & consequences of natural & anthropogenic climate change. Cross-listed with GEOG 4720/ ENVS 4720/ ENVS 5720. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 5740 - Soil Science and Geography (3 Credits)
Reviews chemical and physical properties of soils, soil development, and geographic distributions of soil types in the context of the role that soils play in natural and human-altered ecosystems. Prereq: graduate standing or permission of instructor. Cross-listed with GEOG 4740, ENVS 4740, ENVS 5740. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
GEOG 5750 - Beegography: Geography of Bees (4 Credits)
Beegography is an introduction to the bee world and the amazing diversity in Colorado and beyond. The course will examine the distribution of bees and the pressures they face in different environmental and cultural contexts. It will examine different methods to support and increase bee populations and pollination services, especially in populated environments, including backyard beekeeping of honeybee and native bee populations. Field and lab activities will include beekeeping, native bee collection and identification, bee dissections, pollen processing and identification, and trips to area bee museum collections and apiaries. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with GEOG 4750, ENVS 4750, and ENVS 5750. Term offered: spring. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
GEOG 5757 - Urban Climate and Air Quality (3 Credits)
Explores how people alter climates on micro- to regional scales, and how this in turn affects human health and society. Focusses on recent scientific research, physical processes within cities, and the role of urbanization in global climate change. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ENVS 5757. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5840 - Independent Study (1-3 Credits)
Section 1, economic; 2, physical; 3, urban; 4, social; 5, quantitative; 6, transportation. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

GEOG 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

GEOG 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

GEOG 5990 - Special Topics In Geography (1-6 Credits)
Course content varies from semester to semester, depending on faculty member teaching the course. Prereq: Graduate standing. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

GEOG 5995 - Global Study Topics (3-9 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education.
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ENVS 4995, ENVS 5995, and GEOG 4995. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Global Education Study Abroad.

GEOG 5999 - Directed Research (3 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

GEOG 6300 - Foundations Seminar in Human-Environmental Interaction (3 Credits)
This seminar allows students to gain a deeper appreciation for historical and contemporary geographical approaches to understanding the relationship between society and the environment through a survey review of seminal concepts, theories and debates that have shaped the discipline. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 6700 - Integrated Methods (3 Credits)
Geographers employ a variety of quantitative and qualitative methods in their research. The course presents these methods as a continuum, rather than separate typologies, and reviews the difference between integrated and mixed methods. Students will evaluate how and when to apply various methods to most appropriately elicit data. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOG 6800 - Community-Based Research Practicum (4 Credits)
For students to apply the concepts and skills presented throughout the masters program in a community setting. Students will participate in a real-world, studio-based project that meets the needs of a government, non-governmental, or private sector organization and will produce a scoped product. Prereq: GEOG 6300 with a B- or higher. Cross-listed with ENVS 6800. Term offered: spring. Max hours: 4 Credits.
Grading Basis: Letter Grade
Prereq: GEOG 6300 with a B- or higher.
Typically Offered: Spring.

GEOG 6840 - Independent Study GEOG (1-3 Credits)
Independent research for graduate major students. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Permission of department. Max hours: 3 Credits.
Grading Basis: Letter Grade
GEOG 6950 - Master's Thesis (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Report as Full Time.
Geology (GEOL)

GEOL 5001 - RM-MSMSP: Earth Processes I (4 Credits)
Systematic study of geological concepts, rock and mineral formation, plate tectonics, volcanism and earthquakes, landforms and weathering, historical environmental interpretation. Includes a field component. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: students should obtain permission of project director prior to enrolling in this course. Prereq: GEOL 5001 with a B- or higher. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5002 - RM-MSMSP: Earth Sciences II - Sedimentology and Paleontology (4 Credits)
Field and lecture course building on Earth Sciences I, which covers internal earth processes. Students learn about erosional processes and how sedimentary rocks are deposited and may be preserved; the different ways fossils are preserved; describing rocks in the field; and collecting, preparing and describing fossils. Provides an overview of the geology of the area so that students can place the detailed studies in context. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: GEOL 5001 with a B- or higher. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5003 - RM-MSMSP: Earth Science in Context (4 Credits)
Designed for teachers in the RM-MSMSP program. Topics include global climate change, glaciers, coastal geology, volcanism, and their effects on culture. Monuments such as Florissant Fossil Beds, Ice Core, Cave of the Winds and a quarry will be visited. Note: This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: GEOL 5001 with a B- or higher. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5004 - RM-MSMSP Research Experience for Teachers - Geology Cohort (1-6 Credits)
A five-week research exploration in which RM-MSMSP teachers will raise their level of relevant scientific understanding by engaging in a "hands-on" workshop, transforming what they have learned into new curricular materials that will improve the scientific abilities of their students and hopefully stimulate them to consider a STEM career. Note: credit may not apply toward any CLAS degree. Prereq: Graduate standing. Department consent required. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 5004 - Applied Geomorphology (3 Credits)
Uses hands-on tasks and field trips to investigate processes behind Earth's changing landforms in a variety of physical landscapes (aeolian, volcanic, coastal, fluvial, karst, glacial and periglacial) as related to rock decay, soils and climatic forcings. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072 and GEOG 3232. Prereq: Graduate standing. Cross-listed with GEOL 4240, 5240 and GEOL 4240. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

GEOL 5240 - Fluvial Geomorphology (3 Credits)
Examines interactions between Earth's surface and flowing water across spatial and temporal scales. Considers structure and function of the major components of fluvial systems, with particular attention to the variety of fluvial systems to hydrologic, geologic and anthropogenic controls. Cross-listed with GEOG 4270, 5240 and GEOL 4270.
Restriction: Restricted to Graduate and Graduate Non-Degree students. GEOL 3232 is strongly recommended, though not required. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

GEOL 5251 - Glacial Geomorphology (3 Credits)
Provides an in-depth view of the processes and systems found in glacial environments. Topics include: evidence of past glaciation; present-day glacial extent; glacier dynamics; glacial erosional processes and landforms; glacial depositional processes and landforms. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072. Prereq: Graduate standing. Cross-listed with GEOL 4270, GEOL 5270 and GEOL 4270. Max: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

GEOL 5270 - Fluvial Geomorphology (3 Credits)
Examines interactions between Earth's surface and flowing water across spatial and temporal scales. Considers structure and function of the major components of fluvial systems, with particular attention to the variety of fluvial systems to hydrologic, geologic and anthropogenic controls. Cross-listed with GEOG 4240, 5240 and GEOL 4240.
Restriction: Restricted to Graduate and Graduate Non-Degree students. GEOL 3232 is strongly recommended, though not required. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

GEOL 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

GEOL 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Department consent required. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOL 5950 - Master's Thesis (1-8 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 8 Credits. Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Report as Full Time.

GEOL 5995 - Global Study Topics (3-9 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Prereq: Graduate standing. Cross-listed with GEOL 4995. Repeatable. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 6840 - Independent Study: GEOL (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 9 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 6950 - Master's Thesis (1-8 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 8 Credits. Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOL 6960 - Master's Project (1-8 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 8 Credits. Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

German (GRMN)
GRMN 5690 - Methods of Teaching Modern Languages (3 Credits)
Studies the methods and practices of teaching modern languages. Note: requirement for those wishing to be teaching assistants in the Department of Modern Languages, and for language majors in the teacher certification program, School of Education, CU Denver. This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, MLNG 5690, SPAN 4690, SPAN 5690, FREN 4690, FREN 5690, GRMN 4690, GRMN 5690, CHIN 4690, CHIN 5690. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

GRMN 5691 - Methods of Teaching Modern Languages II (3 Credits)
A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, MLNG 5691, SPAN 4691, SPAN 5691, FREN 4691, FREN 5691, GRMN 4691, CHIN 4691, CHIN 5691. Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690
Typically Offered: Spring.

GRMN 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

GRMN 5995 - Global Study Topics (1-15 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Global Energy Management (GEMM)

GEMM 6000 - 21st Century Global Energy Issues and Realities (3 Credits)
Introduction to the global energy industry's past, present and future. Current and historical issues in regions such as: Atlantic Basin, former Soviet Union, east of Suez, North and South America will be covered. World production centers and markets are discussed to include relevant energy security, scenario planning, risk management and regulation, deregulation, and environmental concerns. Note: Students will learn the geographic distribution of energy resources worldwide including governmental systems. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6100 - Global Energy Economics (3 Credits)
Course includes energy geo-economics with and introduction to managerial tools of the trade. Topics will include world energy markets-demand and supply; refining and marketing, energy forecasts, oil and gas transportation, and National Oil Companies vs. International Oil Companies. An introduction to environmental economics will also help students connect the energy industry to sustainable work practices. In addition students will learn the geographic distribution of energy resources worldwide along with the political and government systems associated with those resources. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6200 - Environmental, Regulatory, Legal & Political Environment in the Energy Industry (3 Credits)
Exploration of current political situations regarding the energy industry, its environmental impact in the short and long term. Topics include climate change, pollution, solid wastes and conversions to natural resources. Students will become familiar with national and international energy laws and regulations, financial arrangements, confidentiality, and bidding agreements. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6210 - Energy and the Law: Property and Contracts (3 Credits)
The elective will focus on the process of managing the use and development of land resources in a sustainable way. Topics such as; public controls, powers used for land regulation, and an intro to real estate will be covered to enhance students understanding of land management and its application to the energy industry. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6220 - Interacting With Foreign Governments And State Enterprises (3 Credits)
Globalization of many energy companies, dwindling U.S. energy sources, and growing overseas energy demand have increased the need for energy professionals to gain expertise in doing business with foreign governments and state enterprises, which play a much greater role in the ownership and operation of energy extraction and energy delivery in virtually all countries beyond the United States and Canada. This course reviews negotiation strategies in the context of uncertain contract enforcement, volatility and uncertainty of prices and restrictions, and highly contentious political contexts. It also reviews the approaches for interacting effectively with state enterprises that are often undercapitalized and inefficient, and examines how valuation of energy assets can take into account political risk, and requirements to provide infrastructure and social services. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6230 - Political Risk Management for Global Energy Environmen (3 Credits)
The course examines public influence on energy business activities. Students will explore the economics of political action and methods for evaluating how stakeholder groups interact to influence political outcomes. They will use these tools to develop strategies for stakeholder engagement and to manage business risks. Max hours: 3 Credits.
Grading Basis: Letter Grade

GEMM 6240 - Environmental, Social, Governance (ESG) Trends in Energy & Commodities (3 Credits)
This course will introduce students to the fundamental concepts and terminology associated with Environmental, Social, Governance (ESG). The evolution of climate change and ESG will be reviewed in terms of policies and metrics. The critical need commodities (agricultural, energy, and minerals, and metals) are studied to support more realistic views and opinions on climate change and ESG. An overarching goal is that students completing the course will have a sound understanding of ESG related policies and standards, the measuring metrics, and the benefits and costs associated with potential future trends. Cross-listed with CMDT 6240. Repeatable. Term offered: fall, spring. Max hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

GEMM 6300 - Technical Aspects of Energy Science (3 Credits)
This course will familiarize students with the newest renewable and alternative energy sources. The course does not focus on hydrocarbon sources but examines challenges and opportunities that exist for the establishment of the new energy sources to become viable in the industry. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6400 - Leadership and Decision Making in the Global Energy Environment (3 Credits)
Students will examine leadership from an energy executive perspective. Topics include: how execs lead, change, innovation, interacting with top management teams, the board, leadership issues involved with governance of the firm, strategies for enhancing executive influence and ethics and responsibilities associated with exec. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.
GEMM 6410 - People Management in the Global Energy Environment (3 Credits)
Explains that people are energy's most important asset. Students will learn the latest research in human resource theories, study models, and learn how to develop organizational effectiveness from the firm's human capital. Concepts on: effective teamwork, attracting and retaining talent and using HR processes such as performance management and development to drive engagement will be discussed. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.
GEMM 6430 - Organizational Behavior in the Energy Industry (3 Credits)
Students will learn how to lead and manage human assets inside energy industries. Students will be exposed to fundamental principles of human behavior and increase their competence of working in diverse settings. Proper management can lead to a sustainable competitive advantage, because of management of employees and developing them into enthusiasts of your firm. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.
GEMM 6450 - Strategic Management of the Energy Industry (3 Credits)
The course focuses on how to improve an organization's competitiveness in a changing global environment. Emphasis on sustainable strategies, students develop skills to formulate, implement and evaluate organizational strategies in the rapidly changing environment. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.
GEMM 6600 - Introduction To Financial Management In The Energy Industry (3 Credits)
Introduction to fundamental principal of asset valuation and financing in competitive global markets. Providing the tools necessary to analyze day-to-day financial issues in the energy industry (time value of money, valuation of income streams, risk weighted investment returns.) Topics such as: risk management, arbitrage, hedging and foreign exchange will be covered. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.
GEMM 6610 - Advanced Financial Management in the Energy Industry (3 Credits)
This course is focused on understanding the costs and benefits of various forms of capital. By examining internal and external managers, students will be able to assess alternative capital sources to achieve their strategic objectives. The course will introduce effective investor communication techniques. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.
GEMM 6620 - Energy Asset & Production Management for the Energy Industry (3 Credits)
The course covers management of an organization's energy resources and facilities as well as broader coverage of project management. Portfolio strategy, planning, scope, time, cost, quality and organizational effectiveness will be addressed. Also when budget, material, vendor relations or other factors disrupt a project, students will be prepared on how to react. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.
GEMM 6630 - Project Development, Management and Leadership in Renewable Energy (3 Credits)
This course will focus on project management aspects of the renewable energy value stream from project conceptualization to decommissioning, inclusive of development, engineering, construction and operations. GEMM 6630 will also focus on leadership and decision-making throughout the renewable energy value stream. Students will be exposed to decision making at corporate levels regarding directions energy and utility companies are taking towards expansion or transition into renewables. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.
GEMM 6690 - Special Topics (1-3 Credits)
This elective course is intended to be a variable-credit course specially designed to provide national and international learning opportunities. The course will offer concentrated problem-solving experiences within the energy industry through travel to industry-significant cities and regions, while meeting and visiting with people working and dealing with issues in the industry. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
GEMM 6699 - International Special Topics (3 Credits)
This course will offer concentrated problem-solving experiences within the energy industry through travel to industry significant cities and regions. Learn through a combination of guest lectures, field trips, and seminars with experts. Max hours: 3 Credits.
Grading Basis: Letter Grade
GEMM 6710 - Carbon Markets: Navigating the Future of Business (3 Credits)
Climate change is a fundamental threat to global economic development. Both public and private business practices and consumer behaviors will drive how economies will decarbonize and the extent of future impacts. Consumers, investors, and governments will increasingly look toward markets for innovation and create a low-carbon economy. This course will introduce carbon markets in all their forms and elaborate on policies, trade, reporting, and tracking. This course will demonstrate the value of carbon management to the bottom line, allowing participants to apply learnings to new and developing business strategies practically. Cross-listed with CMDT 6710. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring.

GEMM 6840 - Independent Study (1-3 Credits)
Allow students to gain additional experience in a particular realm of energy business that interest them and suit their ultimate career goals. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

Greek (GREK)
GREK 5840 - Independent Study - GREK (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

Health & Behavioral Sciences (HBSC)
HBSC 5999 - Topics in the Health and Behavioral Sciences (1-3 Credits)
An in-depth study of selected social science perspectives/theories and their applications to population health. Topics will vary from semester to semester, with a particular emphasis on current, salient population health problems. Prereq: Graduate standing or permission of instructor. Cross-listed with PBHL 4999. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 6022 - Federal Data for Health Research & Policy (1-3 Credits)
Students will develop the knowledge and skills required to effectively use a variety of federal and statistical data sets for health research and policy analysis. Each week is devoted to one or two federal statistical datasets – data collection methods; why they are collected and what health issues they are designed to address; what population they represent and at what geographic scale. Most critically, students will be able to distinguish between questions that can be addressed with a public version of the data and questions that require restricted versions of the data that are protected by federal law and guidelines. Students will read, discuss and present research from various perspectives (Demography, Economics, Geography, Public Health, Sociology) using these data sources and apply their knowledge of data analysis from a variety of perspectives. Students will learn how to gain access to restricted data, how to protect individual anonymity with best practice disclosure avoidance techniques and will develop a research proposal for confidential research access. Note: Familiarity with SAS (preferable) or other statistical software such as SPSS or Stata and statistics or data analysis is recommended.
Restriction: Restricted to degree-granting graduate programs. Cross-listed with ECON 6022, GEOG 5022, and SOCY 5022. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

HBSC 6230 - Human Genetics: Legal, Ethical and Social Issues (3 Credits)
Examines legal, ethical, and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice, and property rights.
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HBSC 7320, ANTH 6041. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 6320 - Human Genetics: Legal, Ethical and Social Issues (3 Credits)
Examines legal, ethical, and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice, and property rights.
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HBSC 7320, ANTH 6041. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 6500 - Women and War (3 Credits)
Appraise women’s experiences and selected issues related to war-time service, including women’s roles during war, gender-specific policies, military sexual trauma, reintegration, and effects of deployment on mental and physical health. Restriction: Restricted to Graduate and Graduate Non-Degree major. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

HBSC 6840 - Independent Study: HBSC (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.
HBSC 7001 - Colloquium Series in the Health and Behavioral Sciences (1 Credit)
Features presentations by core, affiliated and adjunct faculty; alumni; distinguished guest speakers; and students nearing completion of the dissertation. The goal is to expose students to cutting-edge applications of health-related social and biological science research and to introduce students to the research interests of core and affiliated HBS faculty, advanced students, and alumni who might otherwise not have the opportunity to meet. Note: Required for ALL first and second year students but open to all graduate students and faculty. May be taken up to three times for credit. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HBSC 7011 - Theoretical Perspectives (3 Credits)
Covers the following subject areas: philosophy and epistemology of the social and behavioral sciences as they are applied in public health and health care contexts; historical perspectives of Western biomedicine and public health; crosscultural perspectives on health systems; class, ethnic, and gender correlates of health and sickness; critical perspectives on Western health and health care models; and the structure and organization of health care systems. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).
Typically Offered: Fall.

HBSC 7031 - Human Ecology and Environmental Adaptation (3 Credits)
Focuses on the interplay of biology, environment, culture, and behavior in the causes and exacerbation of disease. The course includes the following topics: health in environmental and evolutionary contexts; models of causation in biomedicine and other medical systems; individual, community, and population manifestations of health and disease; and biocultural interaction in disease process. Specific case studies drawn from contemporary health problems are used to illustrate in detail the nature of these processes. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).
Typically Offered: Fall.

HBSC 7041 - Research Design and Methods in the Health and Behavioral Sciences I (3 Credits)
This course has four principal aims: (1) to provide students a working knowledge of research methodology as applied to field research efforts; (2) to enable students to apply research methodologies to areas of particular interest in the health and behavioral sciences; (3) to expose students to data manipulation techniques common to social science quantitative research; and (4) to teach basic research proposal development techniques. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).
Typically Offered: Spring.

HBSC 7051 - Qualitative Research Design and Methods (3 Credits)
Much of the data collected in the social sciences is interview- and text-based. This course explores methods for collecting and analyzing these data and theoretical paradigms that underlie these methods. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HBSC 7061 - Quantitative Methods in the Health and Behavioral Sciences (3 Credits)
This course introduces students to multivariate regression methods - a set of statistical models that relate an outcome variable to a set of predictor variables. The course emphasizes understanding and applying regression models to address social science research questions. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

HBSC 7071 - Social and Behavioral Perspectives in Population Health (3 Credits)
Population health is an interdisciplinary or multidisciplinary field that focuses on the social and behavioral determinants of health. This course helps students to navigate the assumptions and perspectives of the various disciplines that do population health research. To achieve this, the course draws on literatures from diverse disciplines on topics including the social, economic, environmental, behavioral, political, and cultural factors that shape health, disease, and healthcare access and utilization. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).
Typically Offered: Fall.

HBSC 7111 - Applications of the Health and Behavioral Sciences (3 Credits)
The purpose of this course is to help students select and refine a dissertation research topic. Each student, through presentations and discussions of their work, will receive feedback from fellow students and the instructor, and will have an opportunity to improve written and oral presentation skills. Prereq: Admission to the Health and Behavioral Sciences program and HBSC 7041 with a B- or higher or permission of the instructor. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Admission to the Health and Behavioral Sciences program and HBSC 7041 with a B- or higher.
Typically Offered: Spring.

HBSC 7120 - Human Reproductive Technologies and the Law (3 Credits)
Examines the legal, ethical, and social issues that have come about with advances in assisted reproductive technologies (ART). Illustrates how lawyers, judges, bioethicists, legislators, and policy makers have addressed these issues. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
HBSC 7121 - Dissertation Proposal and Research (6-8 Credits)
Restriction: Restricted to Graduate Level Students admitted into the Health and Behavioral Sciences program. Department consent required. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).
Additional Information: Report as Full Time.

HBSC 7161 - Quantitative Methods in Health & Behavioral Sciences II (3 Credits)
This course introduces students to advanced multivariate regression methods (e.g., generalized linear models, survival models, hierarchical models). This course emphasizes the application of advanced regression methods to test social and behavioral science theories related to health.
Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).
Typically Offered: Fall.

HBSC 7210 - Human Health and Environmental Pollution (3 Credits)
Examines the roles of technology and society in the etiology and control/prevention of adverse health outcomes associated with releases of toxic substances. Examples come from experience and the literature on occupational cancer and reproductive hazards, occupational and environmental regulation of hazardous wastes, air, and water pollution.
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ENVS 6210. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree majors.

HBSC 7235 - GIS Applications in the Health Sciences (3 Credits)
Examines how GIS is used throughout the health care industry and public health. Covers environmental health, disease surveillance, and health services research. Students critically review current literature and gain hands-on experience with GIS software.
Prereq: GEOG 4080 or GEOG 5080, public health background, or consent of instructor. Cross-listed with GEOG 4235, GEOG 5235. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: GEOG 4080 or GEOG 5080

HBSC 7310 - Environmental Epidemiology (3 Credits)
Provides a basic understanding of the methods used to study the effects on human health of exposures to physical, chemical, or biological factors in the external environment. The course explains the use of epidemiologic methods through a problem solving approach to investigating environmental health case studies. Restriction: Restricted to Graduate and Graduate Non-Degree majors. A basic statistics class is strongly recommended for optimal success. Cross-listed with ENVS 6230.
Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree majors.

HBSC 7320 - Human Genetics: Legal, Ethical and Social Issues (3 Credits)
Examines legal, ethical, and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice, and property rights.
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HBSC 6320, ANTH 6041. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree majors.

HBSC 7340 - Risk Assessment (3 Credits)
The process of determining the likelihood and extent of harm that may result from an activity or event. Topics covered are: hazard identification, dose-response evaluation, exposure assessment, and risk characterization. The subjects of risk management, risk perception, and risk communication are also discussed. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ENVS 6200. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HBSC 7360 - Toxicology (3 Credits)
Introduces the field of toxicology. Emphasizes the mechanisms by which chemicals produce toxic effects and the methods for assessing toxicity. Note: Designed for students in the environmental sciences and occupational health fields. Restriction: Restricted to Graduate and Graduate Non-Degree majors. One year of college chemistry and one year of college biology are strongly recommended for optimal success. Cross-listed with ENVS 6220. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

Health Administration (HLTH)

HLTH 5939 - Internship (1-3 Credits)
Grading Basis: Satisfactory/Unsatisfactory

HLTH 6010 - Health Care Systems (3 Credits)
Introduces the structure and function of the medical care delivery system. Includes basic concepts and measures of health, disease, quality, values, needs and utilization; issues in health care manpower, institutions and system organization; general issues in policy, reimbursement and regulation; broad community, and organizational considerations in medical care organizations. The student is introduced to the principles of epidemiology and environmental health and demonstrates the application of epidemiology concepts to planning for the healthcare service needs of a population. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Fall.
HLTH 6070 - International Health Policy and Management (3 Credits)
A framework for understanding national health reform policy and management issues in the U.S. and other nations, including industrialized, developing, and transforming nations. This course combines classroom and on-line teaching. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Fall.

HLTH 6071 - Introduction To Health Information Technology (3 Credits)
Examines what needs transforming in healthcare to improve value, safety, and appropriateness of care, and what the role of IT is in that transformation. IT also examines the challenges of cultural change and IT strategy in succeeding with clinical information projects. Differences between installation, implementation, transition and actual transformation are suggested, and methods for managing subcultures in healthcare (IT, clinical, administrative) are reviewed. Cross-listed with ISMG 6071. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Spring.

HLTH 6072 - Management of Healthcare Information Technology (3 Credits)
Provides an introduction to the management of information technology in healthcare. A description of information processing, the origin, content, evolution of healthcare information systems, and the methodologies deployed to acquire and manage information requirements are discussed. Cross-listed with ISMG 6072. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD, MBAH and INFS majors within the Business School.
Typically Offered: Fall.

HLTH 6075 - International Health Travel Study (3 Credits)
Experiential course, which is designed to open students up to innovative health delivery practices in an international location. Students learn how health issues such as reproductive health, infectious diseases, mental health, health and economy, and chronic diseases are handled in community and public health settings. Class trips are usually 14-18 days to an Asian country during the month of January. Prereq: HLTH 6010 or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6700 - Healthcare Operations Management (3 Credits)
Studies the identification, measurement and improvement of healthcare quality. Covers, historic and contemporary views of quality, improvement theories and methods, organizational quality systems, leadership, patient safety, cost and quality, quality measurement and reporting, clinical outcomes, care redesign and medical terminology. Restriction: Restricted to HLAD and MBAH majors within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6710 - Healthcare Quality and Outcomes (3 Credits)
The practice of historic preservation has evolved in a specific policy context. This introductory course introduces basic American institutions and laws associated with preservation as well as standards, definitions, and practices associated with these. Cross-listed with URPL 6499. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6730 - Healthcare Operations Management (3 Credits)
Students in this course will obtain a comprehensive and practical examination of operations management with an emphasis on application to health care organizations. Students will use mathematical and basic spreadsheet skills to critically assess patient flows, volume projection, and supply chain management to improve the efficiency of service delivery in health care organizations. Detailed content on reducing cycle times (e.g., patient wait times), measuring productivity, streamlining process flows, tracking outcomes, staffing, and performance metrics will be presented in the course. Max hours: 3 Credits.
Grading Basis: Letter Grade

HLTH 6740 - Profiles in Health Care (3 Credits)
This colloquium provides a rare opportunity for students to interact with top CEOs from health care organizations around the country. Students learn about HMOs, hospitals, medical group practices, consulting, managing careers, how to get jobs, and how to be successful in a job.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Spring.

HLTH 6770 - Healthcare Quality and Outcomes (3 Credits)
Studies the identification, measurement and improvement of healthcare quality. Covers, historic and contemporary views of quality, improvement theories and methods, organizational quality systems, leadership, patient safety, cost and quality, quality measurement and reporting, clinical outcomes, care redesign and medical terminology. Restriction: Restricted to HLAD and MBAH majors within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6800 - Special Topics (3 Credits)
Offered irregularly. Current interests in the health management field. Topics recently offered include: international health, ethics, general systems theory, and key issues for health systems. Consult the current ‘Schedule Planner’ for semester offerings. Prerequisites vary according to topics and instructor requirements. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6840 - Independent Study: HLTH (1-8 Credits)
Instructor approval required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6911 - Health Field Studies (3 Credits)
The objective of this course is to expose students to health care organizations with which they are not familiar. Each student is assigned to a health care organization and given a specific problem or project to complete. Prereq: HLTH 6010 or permission of instructor. After registration, please contact Errol.Biggs@ucdenver.edu for further instructions. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

Historic Preservation (HIPR)

HIPR 6010 - Preservation Theory and Practice (3 Credits)
The practice of historic preservation has evolved in a specific policy context. This introductory course introduces basic American institutions and laws associated with preservation as well as standards, definitions, and practices associated with these. Cross-listed with URPL 6499. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning or History graduate majors.
HIPR 6090 - Special Topics in Historic Preservation (3 Credits)
Various topics in historic preservation, according to current faculty and student interests. Prereq: HIPR 6010 or permission of instructor. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

HIPR 6110 - Regionalisms & the Vernacular (3 Credits)
This class explores the history of the built environment from the perspective of evolutionary change; peoples attempting to meet utilitarian needs, respond to environmental forces, societal expectations, and aesthetic aspirations through design. The course looks closely at vernacular structures in a global context. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with ARCH 6350. Max hours: 3 Credits.
Grading Basis: Letter Grade

HIPR 6170 - Preservation Design Studio (6 Credits)
Preservation Design Studio provides a project-based learning experience for Historic Preservation students; who are typically integrated into a pre-approved studio of one of the College of Architecture & Planning’s departments. Topics vary according to faculty interests. Cross-listed: Varies by semester. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to HIPR majors within the College of Architecture and Planning

HIPR 6210 - Historic Buildings in Context (3 Credits)
This course covers the concept of "historic significance" and develops skills in understanding and professionally utilizing this concept. Procedures and skills are introduced. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with ARCH 6233. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

HIPR 6220 - Adaptive Reuse: Business and Practice (3 Credits)
Existing buildings and infrastructure afford challenges and opportunities for reuse. This course explores the business, and financial aspects of adapting the built environment for contemporary uses. The course is suitable for designers, planners, historians and social scientists. Restriction: Restricted to majors within the College of Architecture and Planning. Cross-listed with ARCH 6356. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

HIPR 6230 - Reusing Buildings for a Changing Climate (3 Credits)
This class will explore design, planning, and policy strategies to reduce carbon emissions and support sustainable communities through conservation and adaptive reuse of buildings. Case studies will highlight innovative approaches and emerging practices. Restriction: Restricted to graduate students in Historic Preservation or History. Typically offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

HIPR 6240 - Cultural Resource Management and Preservation Law (3 Credits)
This course is designed for historic preservation, planning or anthropology students who are considering a career in the government, non-profit or for-profit sectors where a basic knowledge of compliance with federal, state and local laws that pertain to resource management is expected. Topics will include an overview of the American legal system, constitutional law, federal statutes and their related regulations including the National Environmental Policy Act, the National Historic Preservation Act, the Endangered Species Act, working with Native American Tribes, local and state government agency involvement in resource management and related topics. Restriction: Graduate level students. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

HIPR 6250 - Contextual Design in Historic Districts (3 Credits)
This classes focuses on design in the context of historic resources and in established neighborhoods with distinct features that are highly valued. These are places where preserving and enhancing community character are key objectives. The class investigates a range of approaches to alterations and additions for historic buildings and the design of new buildings in historic districts, including how these contribute to placemaking and livability. It also how design in historic contexts is guided by public policies, incentives and regulatory tools, especially design guidelines and zoning codes and provides an overview of how to decide which tools to use and how to develop them. The course will be thought-provoking, challenging concepts of “compatibility” in the context of historic resources. Case studies from across the nation will raise a series of challenging design questions about what “preservation” means while accommodating change. Other case studies are examples of success stories in the creative application of approaches to design in historic contexts. Guest lecturers with experience throughout the country will supplement the core curriculum provided by the instructor. Restriction: Restricted to graduate students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

HIPR 6300 - The Politics of Preservation (3 Credits)
Achieving the preservation of historic properties requires an ability to effectively use legal tools and successfully articulate the case for preservation to a broad audience. Students will learn how to deploy the theories, tools, and techniques for the protection of historic properties. Restriction: Restricted to Graduate students in a CAP program or Graduate students in the History Department. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in a CAP program or Graduate student in the History Department.
HIPR 6410 - Urban Conservation: Context for Reuse (3 Credits)
This course begins with the premise that human habitats, and especially cities, are dynamic and ever changing; and that the preservationist cannot (and should not) try to freeze cities in a static representation of the past. The course deals with both the philosophical and political contexts, but emphasizes the role of strategic design intervention in the shaping of evolving cities. This includes traditional preservation activities, but also recognizes the importance of progressive change. Readings are diverse, but at least two case study cities are used to ground the concepts. Class activities include: a) research, b) field study, c) design, and d) presentation. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with ARCH 6355. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

HIPR 6510 - Building Materials Conservation (3 Credits)
This course emphasizes the relationship between knowledge acquisition, professional judgement, and design modification. Topics include: 1) Historic Building Types & Methods, 2) Field and Lab Methods of Building Assessment, and 3) Management of Building Rehabilitation. The course takes an integrative approach to the scientific, aesthetic, managerial and legal dimensions of preservation. Restriction: Restricted to graduate students in the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

HIPR 6610 - Reading the City (3 Credits)
Design and planning professionals, including preservationists, must learn to work in environments with which they have had little previous knowledge. This course emphasizes gaining understanding of a novel environment and translating that knowledge into a well-researched and media-savvy professional presentation. Students prepare a research plan, then conduct research on a relatively unfamiliar urban environment, such as Chicago (or other major city), returning to prepare, present, and critically reflect upon their applied research through a media-savvy final project. Prereq: HIPR 6410 is recommended. Cross-listed with ARCH 6232. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

HIPR 6840 - Independent Study (1-3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to historic preservation. Prereq: Permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

HIPR 6851 - Professional Project (1-3 Credits)
The Professional Project is one of two options for completing the Capstone Requirement. There are multiple ways of satisfying this requirement, but the agreed upon Project must show critically reviewed evidence of professional competence in the field of historic preservation. Prereq: Permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

HIPR 6930 - Internship (3 Credits)
Designed to provide professional practice experience. The internship is composed of eight to twelve hours per week working in a professional preservation setting during the regular semester. Prereq: Permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

HIPR 6951 - Thesis (6 Credits)
Thesis is one of two options for completing the Capstone Requirement. Students may choose to develop a specialized thesis in some topic related to historic preservation. Prereq: LDAR 6949. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
Additionnal Information: Report as Full Time.

History (HIST)

HIST 5002 - Race, Gender and Religious Nationalisms in Asia and the US (3 Credits)
This course investigates ideologies and practices of race, caste, ethnicity, and gender at the foundations of several contemporary religious nationalist movements in Asia and the US. The course focuses first on the ways that religious ideologies and practices of gender help to define and police the borders of race, caste, and ethnicity as social identities. We will examine how these ideologies emerge in religious texts and how they have been challenged in literature and practice, both historically and in the modern era, while privileging the works, voices, and perspectives of women and queer caste-oppressed and racialized philosophers, activists, and thinkers. The course then seeks to give students conceptual and theoretical foundations to understand the relationship between race/caste/ethnicity and gender in religious nationalisms, while presenting case studies from Asia and the US to reflect on and challenge these models. Students will have the opportunity to conduct further research into these issues in Asia, the US, and other parts of the world. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 4002, CHIN 4002, ETST 4002, INTS 4002, and RLST 4002. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
HIST 5003 - From Buddha to #BlackLivesMatter: The Past and Future of Nonviolence (3 Credits)
Why is "Nonviolence" central to many of the religious traditions of South Asia? What has nonviolence looked like historically and how has its meaning and practice changed in the modern world? In traditions such as Hinduism, Jainism, and Buddhism, the practice of nonviolence relates to ethics through concepts of "karma"-our actions. This course begins with an investigation of the theories of karma and the roles they play in these traditions' ideas about the self, the other, and the world. We will take a focused look at the way each tradition regards the idea and practice of ahimsa, nonviolence, as both an ethical and personal good. That is, how does each tradition consider what is proper social action and how do they relate it to the attainment of salvation (i.e. moksha, nirvana)? The course puts Indian thought in conversation with western philosophies to question how we might develop a critical vocabulary for the comparative study of ethics. Turning to the modern era, we will examine Gandhi's philosophy and practice of nonviolent action in the anti-colonial struggle for India's independence, as well as how Rev. Dr.Martin Luther King adapted Gandhi's ideas to the struggle for civil rights in the US. Finally, we will examine recent critiques of nonviolence from American philosophers, activists, and communities of color to see ways that nonviolence continues to play a role in rethinking major issues for fostering equality and equity in the US and global contexts, including policing and religious and ethnic nationalism. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ETST 3003, HIST 3003, INTS 3003, PHIL 3003, and RLST 3003. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HIST 5027 - Enlightenment and Revolution (3 Credits)
In this course students explore the relationship of ideas and events in Europe during the 17th and 18th centuries. Modernizing trends in the European economy, religion, science, states and international affairs leading up to the French Revolution. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 4027. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5028 - Nations and Classes: 19th Century Europe (3 Credits)
Focuses on material and ideological changes in 19th century Europe, exploring social, cultural, political, economic, and intellectual developments. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4028. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5029 - Age of Anxiety in Europe (3 Credits)
Looks at Europe at the end of the nineteenth century in an effort to determine if there is any relation between the peculiarities in culture at the time and the horrors in politics that followed. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4029. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5030 - Europe During the World Wars (3 Credits)
Covers the history of the two world wars and their origins, political and social upheaval during the interwar economic crisis, the rise of communism, Italian fascism and Nazism, with an emphasis on cultural production and intellectual life. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4030. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5032 - Globalization in World History Since 1945 (3 Credits)
An interdisciplinary course on contemporary world history and globalization. While the course is historically structured, economic, political, and sociological matters are explored. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4032. Term offered: fall, spring, summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

HIST 5035 - Crisis and Transformation: Europe's 20th Century (3 Credits)
This course examines 20th century European history focusing on themes of crisis and transformation. We will explore how devastating wars, economic depression, stark ideological divisions, and revolutionary social, political and cultural movements dramatically changed Europe over the course of the century. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4035. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5046 - Victorians and Victorianism (3 Credits)
Taking an interdisciplinary perspective, this course examines English people and English life during the reign of Queen Victoria, 1837-1901. What were the defining features of the Victorian age? What did it mean to be "Victorian"? When and why did the Victorian paradigm break down? Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4046. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5051 - Britain and The Empire (3 Credits)
Examines 19th and 20th century British history, addressing social, cultural, and political themes. Explores industrialization, state growth, and imperialism; relationships between race, gender, and class; and the ways in which colonizers and the colonized experienced empire. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4051. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5055 - The Atlantic Slave Trade: Africa, Caribbean and U.S. (3 Credits)
Presents a broad overview of the slave trade in the Atlantic World, including discussion of the slave plantation, the creation of Caribbean societies and the consequences of independence from Britain. Restriction: Restricted to Graduate Level students. Cross-listed with HIST 4055. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
HIST 5062 - Modern France: 1789 to the Present (3 Credits)
Consider the shaping of modern France from the 18th century Bourbon Monarchy and aristocratic society to today's liberal democracy, in which multiculturalism, globalization and supranational institutions call into question the very nature of French identity. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4062. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5071 - Modern Germany (3 Credits)
Surveys the major political, institutional, social, economic, and cultural developments that have occurred in Germany since the late 18th century. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HIST 4071. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5074 - Post-War Germany (3 Credits)
Historical survey of Germany since the second world war, with an emphasis on culture and society. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4074. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5075 - Travel Stories and Origins of Cultural Anthropology (3 Credits)
Examines the early history of cultural anthropology by means of classic travel literature. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4075. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5076 - History of Modern Science (3 Credits)
Surveys the history of science from the 18th century to the present. Treats all disciplines, from physics to physiology, in an attempt to understand how the natural world came to dominate our sense of ourselves. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4076. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5083 - Russia Since 1917 (3 Credits)
Studies the development of the Soviet Union from its formation in the October Revolution, through the Civil War, the new economic policy, industrialization, collectivism, the Stalinist purges, up to the present. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4083. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5133 - Management of Material Culture and Museum Collections (3 Credits)
This course provides in-depth knowledge of the rudiments of material culture documentation, preservation and management. While we have designed this class for those interested in working in history museums, this is also appropriate for those students who want to learn the place of artifacts in studying history. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4133. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

HIST 5201 - Core Themes in U.S. History (3 Credits)
This course surveys major themes in U.S. history. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4201. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5209 - Race, Religion, and Belonging (3 Credits)
Race/ethnicity and religion are conconstitutive social and cultural formations that have played a fundamental part in determining the boundaries of belonging of the United States. In this course, students will interrogate when, why and how race/ethnicity and religion have been used to delineate borders, determine citizenship, navigate legal classifications, dictate social mobility, and regulate economic possibilities. We will analyze both primary sources #such as sermons, reality TV shows, court cases and graphic images as well as scholarly writing to explore how formations of race and religion have shaped notions of belonging in the US nation#state, thereby constructing the boundaries of the state itself. Cross-listed with ETST 4030, ETST 5030, RLST 4030, RLST 5030 and HIST 4209. Restriction: Graduate standing or instructor permission required to enroll. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

HIST 5210 - The American Revolution (3 Credits)
The crisis of the British Empire in North America from the end of the French and Indian War to the ratification of the American Constitution. Topics include the emerging economy, constitutional arguments against Britain, the conduct of the war, and the definition of a republic. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4210. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5212 - Civil War and Reconstruction (3 Credits)
 Begins with the causes and outbreak of the American Civil War, describes the military conflict and the social aspects of the war, and examines the federal efforts to reconstruct the southern states and protect the rights of Black citizens after 1865. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4212. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.
HIST 5216 · History of American Popular Culture (3 Credits)
Explores American popular culture from the early 1800s to the present. By tracing the development of various entertainment media, including theater, music, movies, and television sitcoms, this course probes how popular culture both reflected and shaped American values and behavior. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4216. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5217 · Consumer Culture (3 Credits)
This interdisciplinary course examines the dynamics of the consumer culture in the context of social, economic, and technological history. The analysis begins with 17th century European origins, and continue through recent world developments, emphasizing the U.S. since 1800. Note: Open to all students. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4217. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5220 · U.S. Foreign Policy Since 1912 (3 Credits)
The main thrust is the emergence of the U.S. from isolation toward full-scale participation in the affairs of Europe and other areas. Special attention is given to U.S. intervention in two world wars, the Cold War, and the overextension of U.S. commitments since 1960. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4220. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5225 · Urban America (3 Credits)
This course will explore how Americans experienced their rapidly growing and changing cities during the past two hundred years. This course will cover a wide range of urban themes, including segregation and gentrification, self-invention and policing, ethnic gangs and race riots, skyscrapers and suburbia, and commercial sex and Hollywood. The course will ultimately chart how a range of Americans - including immigrants, teenagers, laborers, women, LGBTQ+ people, and people of color – all fought for their own "right to the city". Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4225, WGST 4225, WGST 5225, GEOG 4625. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5226 · Capitalism in America (3 Credits)
Explores the social, cultural, and political history of American capitalism from colonial times. Topics include entrepreneurship, labor, territorial and trading expansion, industrialization, the rise of corporations, economic cycles, technological developments, and the role of the state, all within global contexts. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4226. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5227 · American West (3 Credits)
Introduces the diverse peoples, places, and approaches to the development of the trans-Missouri West from prehistoric times to the present. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4227. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

HIST 5228 · Western Art and Architecture (3 Credits)
Introduces Western art and architecture, emphasizing their historical context. Students are required to do book reports and a major research paper. Course includes walking tours and museum visits. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HIST 4228. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5229 · Colorado Historic Places (3 Credits)
Introduces community architecture, folklore, and history for all students. Students learn how to survey, describe, and designate significant historical structures and districts. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HIST 4229. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

HIST 5231 · History in Museums (3 Credits)
This core course for the museum studies area of public history introduces students to the theory and practice of museum operations. It covers the basics of museum administration, museum collection and preservation, and museum interpretation from both theoretical and practical points of view. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4231. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5232 · Historic Preservation (3 Credits)
Introduces the history, methodology, and goals of historic preservation. Guest speakers, field trips, research projects, and book reports. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4232. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5234 · History at Work: Public and Community History (3 Credits)
An overview of history outside the academic setting. Students have the opportunity to learn about jobs through on-site visits and presentations made by people engaged in a wide variety of occupations in history other than teaching. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4234. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

HIST 5240 · National Parks History (3 Credits)
Introduces how the National Park Service uses history to identify, designate, preserve, and interpret America's most outstanding historic and natural history sites. After tours of NPS sites, students select from a wide range of projects. Note: Open to all students. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4240. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.
HIST 5244 - Interpretation of History in Museums: Exhibits and Education (3 Credits)
This course allows students to gain in-depth knowledge of historical interpretation through exhibits and education in a museum setting. This class is designed for those preparing to work in history museums but is also appropriate for teachers and others who want to learn how museum programs interpret history with artifacts and other historical materials. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HIST 4244. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HIST 5250 - Introduction to Digital Studies (3 Credits)
Develop marketable skills such as building websites, making interactive maps, recording podcasts, and analyzing data while also studying the cultural and ethical dimensions of these technologies. Cross-listed with HIST 3250, COMM 3081, and COMM 5081. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

HIST 5261 - Working With Data (3 Credits)
Teaches the technical skills of data collection, processing, analysis, and visualization, along with the history and ethics of how societies, corporations, and governments have used and abused data over time. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 4261. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5306 - Survey of Feminist Thought (3 Credits)
Examines changes and continuities in feminist thought from the 18th century to the present, using historical and literary materials. Explores the ways that women’s characteristics, experiences, and capabilities have been understood and challenged. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with ENGL 4306, 5306, HIST 4306, WGST 4306, 5306. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5307 - History of Sexuality (3 Credits)
Explores the relationships between gender and norms, sexual practice, and ideas about sexuality in Europe and the United States. Examines how sex and sexuality have changed over time and how those changes relate to social, cultural, political and economic history. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4307 and WGST 4307/5307. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HIST 5308 - Crime, Policing, and Justice in American History (3 Credits)
Focuses on changing legal and cultural definitions of crime, the role of the police, the evolution of punishment in theory and practice, and the role of mass culture in shaping the social history of crime and justice. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4308. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HIST 5343 - Women & Gender in US History (3 Credits)
This course will explore women and gender as drivers of US history. From politics to popular culture, jobs to sexual empowerment, civil rights to economic restructuring, we will use gender as a lens to re-envision familiar stories about American history. Cross-listed with HIST 3343, WGST 3343, and WGST 5343. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5348 - Mind and Malady. A History of Mental Illness (3 Credits)
Examines the history of mental illness from the mid-18th century to the present, focusing on the institutionalization of the mentally ill, the origin of psychiatry, the development of models of mental illness and the evolution of clinical treatment. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4348. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HIST 5350 - Colonial Latin America (3 Credits)
Surveys the creation of colonial empires by Spain and Portugal, 1492-1808. Topics include Native American responses to European incursions, women in colonial society, and slavery in Latin America. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 3350 and ETST 3350. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HIST 5356 - Nature and Power in American History (3 Credits)
This course explores the relationships between human societies and environmental change in the history of North America. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 3356. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5411 - Modern Mexico (3 Credits)
Designed to familiarize students with the critical issues in Mexican political, economic and social history. Traces the emergence of independence and the difficult consolidation of an independent nation state. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4411, ETST 4411. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5412 - Mexico and the United States: People and Politics on the Border (3 Credits)
Examines the convoluted relations between these two republics, focusing on diplomatic, cultural and social interactions. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4412. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HIST 5415 - Social Revolutions in Latin America (3 Credits)
A theoretical framework and an empirical basis for understanding the large-scale social movements that have influenced the course of Latin American nations. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4415. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
HIST 5417 - Commodities and Globalization (3 Credits)
Trading raw material & processed goods internationally has greatly affected world cultures & geopolitics. Tracing commodity chains since 1500 for food, fuel, industrial material & products, & intellectual property, this course will conclude with the effects of current regulations, marketing & environmental concerns. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4417. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5420 - Traditional China: China to 1600 (3 Credits)
A general introduction to the history of China from the advent of historic civilization to the point of the great encounter with the West. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4420. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5421 - Modern China (3 Credits)
Surveys Chinese history in the modern era. Includes examination of Western domination of China, revolution, and internal fragmentation of China; Japanese attacks and World War II; and civil war and the communist revolution. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4421 and CHIN 4421. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5422 - Lvng thr Mao's China: Life, Mat. Cult, Movies, 1949-76 (3 Credits)
Introduces students to ordinary people's daily life in Mao's China (1949-1976) through an exploration of material culture, movies and scholarship. This course pays particular attention to the ways people's everyday living intertwined with politics. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4422. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5423 - China in the World (3 Credits)
China does not exist apart from the world, and never has. This course approaches Chinese history by asking: how has the world shaped China's history, and how has China shaped the history of the world? Rather than explain what went on in China, we focus on exploring what went on outside among China's immediate neighbors in East Asia, the entire Eurasian region, the African continent, and the so-called "West." The course moves chronologically from ancient times to the present, and is organized around the themes as conquest, trade, international relations, climate change, environmental stress, and the circulation of ideas. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 4423 and CHIN 4423. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5451 - Southern Africa (3 Credits)
An in-depth history of the clash of peoples and cultures in Africa south of the Zambezi River. African and Afrikaner political, economic and cultural development in a single land and the consequences of several competing nationalisms existing side by side are examined. Apartheid and African opposition to it are analyzed. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4451. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5455 - African Struggle for Independence (3 Credits)
An assessment of African leadership from the colonial era to the present. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4455. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5460 - Modern Latin American History (3 Credits)
Surveys the historical development of the modern Latin American countries, beginning with the independence movements of the early 19th century. Emphasizes the 20th century issues and problems that have characterized these countries and affected their relations with the United States. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 3460. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

HIST 5461 - The Modern Middle East (3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4461. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5462 - Islam in Modern History (3 Credits)
This course studies Islamic thought and practice over the last two centuries in terms of major historical processes that have operated at local, national, and global scales. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4462, RLST 4462, RLST 5462. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5475 - The Vietnam War (3 Credits)
Covers the conflict in Vietnam, with roots in the period prior to World War II. Main topics include the rise of nationalism in French Indochina, the war against the French, the Northern moves to unify Vietnam, American intervention, and eventual victory of the Northern regime. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4475. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.
HIST 5490 - Weapons of Mass Destruction (3 Credits)
Weapons of mass destruction have affected politics, health, and environments around the globe. This course will examine the development, use, and consequences of these modern technologies of war and terror. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HIST 4490. Term offered: summer, fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall, Summer.

HIST 5494 - Red and Blue America: U.S. History, 1973-Present (3 Credits)
This course explores American history during a period of immense cultural and political polarization. After 1973, the United States experienced the rise of the New Right, changing attitudes towards sexual "permissiveness," and rapid advancements in technology. Both "law-and-order" politics and the rights campaigns led by immigrants, women, people of color, and LGBTQ+ peoples all reshaped democracy. These developments in the United States, meanwhile, influenced and were shaped by the nation's "hot" and "cold" conflicts in Europe, Latin America, the Middle East, and the rest of the globe. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed HIST 4494, WGST 4494, and WGST 5494. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

HIST 5516 - Global History of Energy (3 Credits)
Explores the history of human energy use on local, national, and international scales, examining its social, political, and economic effects, and its implications for the environment. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 3616. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5622 - Oceans In History (3 Credits)
Explores transoceanic exchanges, relations, and transformations in modern world history. Examines how historians analyze and conceptualize global interactions. Topics include voluntary and forced migrations, resistance and revolution, transoceanic economic relations, piracy, and environmental change. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4622. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5645 - Archival Management (3 Credits)
This course studies theory and principles pertaining to the management of current and non-current records, public and private archival materials, as well as the administration of archival manuscript depositories for housing records of historical value. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4645. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5710 - Special Topics (1-3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors.

HIST 5810 - Special Topics (1-3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors.

HIST 5840 - Independent Study: History (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

HIST 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

HIST 5910 - Directed Research (1-6 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

HIST 5995 - Global Study Topics (1-15 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
HIST 6013 - Introduction to the Professional Study of History (3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HIST 6840 - Independent Study: HIST (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP

HIST 6931 - Readings: Special Subjects in History (3 Credits)
Readings in topics in history with varying subtitles reflecting course content. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Term offered: fall, spring. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HIST 6939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: spring, summer, fall. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

HIST 6940 - Comprehensive Exam (1 Credit)
Preparation for and completion of comprehensive examination for History MA. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Max hours: 1 Credit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

HIST 6950 - Master’s Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

HIST 6951 - Masters Project: Advanced History Curriculum Development (1-6 Credits)
Students develop curricula for secondary-level history courses; must demonstrate thorough knowledge of subjects; understanding of historiographic and methodological problems; command of primary sources and their uses in teaching; and describe teaching strategies, methods, and assessments to be used in the curricula. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Permission of instructor. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

HIST 6952 - Master’s Project: Public History (1-6 Credits)
Public history students may use one to six credits to complete a single public history project. Projects can entail creating an exhibit, organizing a museum or archival collection, conducting a preservation survey or similar activities. Students are required to prepare a paper describing the process and results of the project. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

HIST 6989 - Seminar: Special Subjects in History (3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Term offered: fall, spring. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HIST 6992 - Seminar: Colorado Studies (3 Credits)
This advanced interdisciplinary seminar on Colorado starts with a survey of the published literature. Students then select a research topic of their own and complete a publishable paper using primary sources. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HIST 6999 - Seminar: Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: spring, summer, fall. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

HIST 6992 - Seminar: Colorado Studies (3 Credits)
This advanced interdisciplinary seminar on Colorado starts with a survey of the published literature. Students then select a research topic of their own and complete a publishable paper using primary sources. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

Human Development and Family Relations (HDFR)

HDFR 5002 - Family Life and Community Programming I (3 Credits)
This course teaches the principles, philosophies, models, and strategic methods of family life education for strengthening interpersonal and family relationships. Culturally competent students will learn about the development and implementation of effective educational programs and experiences within different community settings. Cross-listed with HDFR 4002. Max hours: 3 Credits.
Grading Basis: Letter Grade
HDFR 5003 - Leadership and Organizations (3 Credits)
This course provides an understanding of leadership theory and practice in community and educational environments. Students will learn about important aspects about leading diverse community and educational organizations including staff supervision, strategic planning, advancing the organization and maintaining integrity. Cross-listed with HDFR 4003. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5004 - Family and Comm. Prog. II Grant Writing/Fundraising (3 Credits)
This course provides an understanding of developing skills on grant writing and fundraising as related to family, community and educational organizations/ agencies. Students will learn about important aspects about grant writing, fundraising fundamentals and funding models for sustainability. Cross-listed with HDFR 4004. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5010 - Family and Cultural Diversity (3 Credits)
The examination of familial, gender, cultural, linguistic, social and other ecological factors on diverse family systems in the United States will be covered. An ecological theoretical analysis of minority family systems within a familial, educational and social justice perspective will be explored. Cross-listed with HDFR 4010. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5020 - Black and Latino Children in Families and Schools (3 Credits)
With a focus on application of scholarship to practice, this interdisciplinary course will introduce graduate students to scholarly literature from family sciences, sociology, education and related fields to understand Black and Latino children within family, school and community systems. Restriction: Restricted to graduate level students. Cross-listed with ETST 5021. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

HDFR 5040 - Latino Families in School and Communities (3 Credits)
This course will use ecological systems theory perspectives as a foundation for understanding diverse Latino family dynamics, the intersection between Latino families, schools and community systems and other critical issues that Latino family systems face in the United States. Cross-listed with HDFR 4040. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5045 - Abuelos (Grandparents) Latino Families (3 Credits)
The course will focus on the social gerontology of Latinos families in later life. Specifically, the course will examine how ecological factors including familial, cultural, social, economic, health, cognitive and educational, impact the lives of Latino older person's in the contexts of family systems. Cross-listed with HDFR 4045. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5080 - Global Family Resource Management (3 Credits)
This course examines the allocation of family resources (social, financial and material assets), the influence of various ecological systems, the effect on family functioning and goal-setting from a global perspective. Practical applications for Family Relations professionals are included. Cross-listed with HDFR 4080. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5090 - Helping Profession Skills in HDFR (3 Credits)
This course is designed to provide an overview of essential skills required in a variety of helping situations and settings. Course content includes the development of accurate listening, empathy, reflection, and inquiry skills. Implications for working with individuals, families, and couples will be examined. Cross-listed with HDFR 4090. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5180 - Family and Community-Centered Classroom Practice (3 Credits)
This intensive course is designed to help teachers develop a responsive, collaborative, and theory-based understanding of the interaction of schools, families and the local community. In this course, you will examine the impact that various social interactions had on yourself, a student's family, and the community as a whole. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5260 - Family Systems Social Justice (3 Credits)
Relying on ecological systems theories, this course will introduce students to families and family systems. Students will investigate how families experience (in)justice in the areas of access to education, community services, and employment. Cross-listed with HDFR 4260. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5300 - Families in Later Life (3 Credits)
Students will become familiar with the importance of families in later life. Through family systems and ecological systems theories, this course is designed to provide an understanding of the importance of family relationships and implications for practice, research, and policy. Cross-listed with HDFR 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 5830 - Special Topics in Human Development and Family Relations (1-3 Credits)
Advanced study of special topics that examine community and educational settings in Human Development and Family Relations (HDFR) to be selected by the instructor. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

HDFR 6000 - Family Theories (3 Credits)
Students will examine the methods of inquiry and the basic foundations of contemporary family theory. Using a family systems perspective, students will utilize and analyze theory in the exploration of diverse and changing family dynamics in a societal context. Cross-listed with HDFR 7000. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 6075 - Family Policy and Law (3 Credits)
Theoretical and practical exploration of the process of policy-making, with particular attention to the role of courts, that impact families and children to provide foundations for research and advocacy related to family policy and law. Cross-listed with HDFR 7075. Max hours: 3 Credits.
Grading Basis: Letter Grade

HDFR 7000 - Family Theories (3 Credits)
Students will examine the methods of inquiry and the basic foundations of contemporary family theory. Using a family systems perspective, students will utilize and analyze theory in the exploration of diverse and changing family dynamics in a societal context. Cross-listed with HDFR 6000. Max hours: 3 Credits.
Grading Basis: Letter Grade
HDFR 7010 - Proseminar I in Child, Youth, and Family Studies (1 Credit)
This course aims to introduce students in the Child, Youth, and Family Studies PhD pathway to doctoral studies and to faculty research. The course is also designed to support students in situating themselves in the discipline, enhancing their scholarly identity, and refining academic writing and presentation skills. Cross-listed with ECED 7011 and EDUC 7011. Max Hours: 1 Credit.
Grading Basis: Letter Grade with IP
HDFR 7020 - Proseminar II in Child, Youth, and Family Studies (1 Credit)
This course is for 2nd year students in the Child, Youth, and Family Studies PhD pathway. The course is designed to support students in developing a research agenda, exploring ethics in research, enhancing scholarly identity, and preparing for comprehensive examinations. Prereq: HDFR 7010 or ECED 7011 or EDUC 7011. Cross-listed with EDUC 7020 and ECED 7020. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011.
HDFR 7030 - Proseminar III in Child, Youth, and Family Studies (1 Credit)
This course aims to provide third year doctoral students in the Child, Youth, and Family Studies PhD pathway with an immersive writing opportunity and professional development experience to help prepare for comprehensive examinations, the dissertation, and post graduate school life. Prereq: ProSem I and ProSem II (HDFR 7010 or ECED 7011 or EDUC 7011 & HDFR 7020 or EDUC 7020 or ECED 7020). Cross-listed with EDUC 7030 and ECED 7030. Max hours: 1 Credit.
Grading Basis: Letter Grade with IP
Prereq: HDFR 7010 or ECED 7011 or EDUC 7011 AND HDFR 7020 or ECED 7020 or EDUC 7020.
HDFR 7040 - Advanced Studies in Applied Child Development (3 Credits)
Provides an intensive overview of the science of child development. A range of theoretical perspectives will be emphasized highlighting the role of context. Students will apply theory and research to programs that seek to advance equity in opportunities and outcomes. Restricted to EDHD-PhD and LDRE-EdD majors within the School of Education and Human Development. Cross-listed with ECED 7040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD and LDRE-EdD majors within the School of Education and Human Development.
Typically Offered: Spring.
HDFR 7050 - Special Topics in Human Development and Family Relations (1-6 Credits)
Advanced study of special topics in human development in family, community and educational settings in HDFR, to be selected by the instructor. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
HDFR 7075 - Family Policy and Law (3 Credits)
Theoretical and practical exploration of the process of policy-making, with particular attention to the role of courts, that impact families and children to provide foundations for research and advocacy related to family policy and law. Cross-listed with HDFR 6075. Max hours: 3 Credits.
Grading Basis: Letter Grade
HDFR 7100 - Family Issues in Immigration and Migration (3 Credits)
Exploration of family issues related to immigration in the US context, including how policies shape emigration and immigration of families. Focus will be on social, cultural, political, and economic factors related to early childhood, parenting, adolescent identity, marriage and family formation, health and wellbeing and integration in the US. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
HDFR 7200 - Family Inequality and Social Change (3 Credits)
Exploration of the changing nature of family and family inequality in the contemporary US context and the effects on development and wellbeing. The course will focus on families from diverse ethnic, cultural backgrounds across a range of socioeconomic circumstances, and consider the changing structure of the family. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.
HDFR 7240 - Latin@ Families in Schools and Communities (3 Credits)
This course will use ecological systems theory perspectives as a foundation for understanding diverse Latino family dynamics, the intersection between Latin@ families, schools and community systems, mental health systems, and other critical issues that Latin@ family systems face in the United States. Max hours: 3 Credits.
Grading Basis: Letter Grade
HDFR 7260 - Family Diversity and Social Justice (3 Credits)
Through this course, students will explore theory and research on the family, using interdisciplinary research and theory to inform their knowledge and generation of questions that recognize the challenges faced by diverse families in a shifting societal and national environment. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
HDFR 7270 - Advanced Study of Human Development (3 Credits)
This course is an intensive overview of major theories undergirding the study of human development. The emphasis is upon broad ecological theories that cut across different aspects of human development, including social and emotional development, cognition, and achievement within contemporary societal social structures. Max Hours: 3 Credits.
Grading Basis: Letter Grade
HDFR 7840 - Human Development and Family Relations Independent Study (1-6 Credits)
Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 12.

Humanities (HUMN)

HUMN 5000 - 19th and 20th Century Continental Philosophy (3 Credits)
A seminar on key problems and thinkers in the nineteenth & twentieth century continental philosophical traditions and their contemporary significance. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4000/5000 and SSCI 5000. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
HUMN 5013 - Methods and Practices of Graduate Interdisciplinary Humanities (3 Credits)
The second of three required Master of Humanities core courses, this course introduces beginning graduate students to methodologies and intellectual frameworks for gathering, organizing, and developing interdisciplinary research. Focus is on the application of theories and methods of research, interpretation and analysis in humanistic research through readings that explore philosophical and cultural discourses have altered theory and method. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Restriction: Restricted to Graduate Level Students. Cross-listed with PHIL/SSCI 5013. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students. Typically Offered: Spring.

HUMN 5020 - Foundations and Theories of Interdisciplinary Social Science (3 Credits)
The first of the Master of Social Science core courses, this course exposes beginning graduate student to critical, key analytic models, and their application in disciplines that comprise the social sciences (classical anthropology, sociology, sociology of religion, philosophy of history, political theory, classical psychology, etc.) for the purpose of graduate-level interdisciplinary social science research. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 5020 and PHIL 5020. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HUMN 5025 - Foundations and Theories of Interdisciplinary Humanities (3 Credits)
Exposes the beginning graduate student to exemplary works and methodologies of disciplines oriented to humanities and social sciences, such as philosophy, sociology, history, communication, fine arts, and literature. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 5025. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HUMN 5101 - Pragmatism: Classical American Philosophy (3 Credits)
The most significant philosophical tradition born in the United States is pragmatism. Examines several of the most important classical works of this tradition, the influence of thinkers who have helped pragmatism, and the contemporary relevance of this tradition. Figures who may be included in this course are: Emerson, Pierce, Royce, James, Dewey, Mead, Rorty. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4101, 5101, SSCI 5101. Term offered: fall. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HUMN 5200 - Art, Beauty, and Aesthetic Criticism: Philosophy of Art (3 Credits)
What makes something a work of "art"? How should art be interpreted or evaluated? Can we really debate about "taste" or beauty? Why do we call some people "artists" or some experiences "aesthetic"? Where does creativity come from? This course investigates such questions, offering a range of historical and contemporary answers, and examines the social, political, and philosophical roles of art in contemporary society. Methods of engaging these questions may include multimedia technologies as well as individual and group field trips to local art venues. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4220 and PHIL 5220. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HUMN 5242 - Medicine, Health Care, and Justice: Bioethics (3 Credits)
Anyone entering a medical profession must confront tough ethical issues and dilemmas. These often arise suddenly, so practitioners best preparation is to think ahead about what will likely occur. This course introduces students to a variety cases and philosophical theories useful to healthcare careers. For example, What is "health" and who determines it? Is there a right to health care? How should medical scarcity (vital organs, vaccines, supplies, etc.) be addressed? What duties are owed to patients by healthcare providers, and why? On what grounds may medical treatment be demanded — or refused? The goal of the class is to train students to be nimble and imaginative in how they reason about the difficult cases they will face in their career. Suggested prerequisite one or two previous courses in philosophy, and a minimum grade of C in each course are strongly recommended; if the student lacks this coursework, consult with the professor prior to registration. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4242, PHIL 5242, SSCI 5242. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HUMN 5251 - Introduction to Legal Studies (3 Credits)
A survey of the United States legal system, including lawmaking powers, jurisdiction, court procedures, professional ethics and major principles of business law, contracts, estates and probate, family law, property and torts. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 4251/SSCI 4251/SSCI 5251. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HUMN 5325 - First Amendment: Theory and Context (3 Credits)
First Amendment jurisprudence including free speech/responsibility, sedition/seditious libel/dissent, prior restraints, time/place/manner restrictions, hate/intimidating speech, defamation, privacy/security tensions, intellectual property/public good, advertising, corporate speech, sexual expression, and public status of religion. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 4325, SSCI 4325, SSCI 5325, PSCI 4325 and PSCI 5325. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
HUMN 5430 - How to think green: Environmental Ethics (3 Credits)
Is it wrong to extinguish a species? What makes cruelty to animals wrong? Do trees have rights? Is the earth a resource we can use anyway we want? Is vegetarianism a more ethical way to live — or just another lifestyle choice? As citizens of the world, we are bombarded by such questions. Understanding what is fundamental clarifies thinking and coordinates action. This course introduces ethical theories relevant to problems such as animal and species welfare, deforestation, pollution, climate change, and the sustainability of the planet. By examining multiple perspectives, students gain confidence judging which issues and data are significant and deciding what kind of world we should create with our actions and inactions. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 3430, PHIL 5430 and SSCI 5430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HUMN 5540 - Law, Diversity and Community in United States History (3 Credits)
Engaging extensive primary and secondary source material, course applies an interdisciplinary approach to diversity and conflict that often surrounds the quest for economic, moral and social inclusion in the United States. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 5540. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HUMN 5600 - Questioning Religious Belief and Practice: Introduction to Philosophy of Religion (3 Credits)
Does God exist? Can the existence of God be proved? When is believing on faith acceptable? How or why is there a “problem of evil”? What are the attributes of a “god” and how can they be known, if at all? What is the relation of God to the world we experience? How does morality relate to religious belief and practice? The goal of the course is to broaden and deepen our understanding of key philosophical debates within religious traditions as we study prominent thinkers in the history of philosophy. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4600, PHIL 5600, RLST 4060, RLST 5060, PHIL 5060, and SSCI 5600. Term offered: summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

HUMN 5660 - Visual Arts: Interpretations and Contexts (3 Credits)
Provides graduate-level interdisciplinary study in the historiography, methodologies, and theories used to understand how visual arts, including painting, sculpture, photography, film and performance art influence the making of culture. Students gain critical skills for analyzing a variety of visual and aesthetic products of culture. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HUMN 5720 - Sexuality, Gender and Their Visual Representation (3 Credits)
Studies sexuality, gender and identity representation from classical antiquity through the present in the visual arts. Uses the literature of visuality, feminism, race and queer theory. Explores representations of femininity, masculinity and androgyny and their reinforcement and challenge to gender-identity norms. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 5720 and WGST 5720. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HUMN 5770 - Selling Empires: The Art of Visual Propaganda (3 Credits)
Western empires disseminate political, social, economic & cultural practices through complex interplay of cultural practices. Visual production is a complex site for meaning making within imperialism. Examines how visual discourses operated to create meaning for audiences, through focus on postcolonial critique. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SJUS 5770, SSCI 5770, WGST 5770, HUMN 4770, SJUS 4770, SSCI 4770, and WGST 4770. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HUMN 5833 - Existentialism (3 Credits)
Examines one of the most influential movements in recent European thought, beginning with existentialism’s 19th century roots, and continuing on to the existentialist philosophers of the 20th century. Figures covered may include Dostoyevsky, Kierkegaard, Nietzsche, Heidegger, Sartre and de Beauvoir. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 3833, PHIL 5833, and SSCI 5833. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HUMN 5840 - Independent Study. HUMN (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate School for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

HUMN 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.
HUMN 5920 - Philosophy of Media and Technology (3 Credits)
A philosophical examination of interrelationships between contemporary media, technology, and their impacts upon character of contemporary life and values. Topics may include ethics, epistemology, democracy, advertising, media literacy and criticism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4920, 5920, SSCI 5920. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HUMN 5924 - Directed Research and Reading in Interdisciplinary Humanities (3 Credits)
The first of the Master of Humanities core courses, this course provides beginning graduate students grounding in critical theorists, key analytic models, and their application in disciplines which comprise the humanities (philosophy, literature, art history, visual studies, history, communication) for the purpose of graduate-level, interdisciplinary humanities research. Examines questions about reality, knowledge, ethics that affect research and writing in the humanities. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Term offered: spring, fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

HUMN 5933 - Philosophy of Eros (3 Credits)
What does it mean to understand philosophy as an erotic activity? This question will be examined, first by studying Plato's dialogues-such as Lysis, Symposium and Republic-and then by reading texts from Sigmund Freud, Michael Foucault and others. Cross-listed with PHIL 4933, WGST 4933/5933 and SSCI 5933. Max Hours: 3 Credits.
Grading Basis: Letter Grade

HUMN 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

HUMN 5950 - Master's Thesis (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 8.
Typically Offered: Fall, Spring, Summer.

HUMN 5960 - Master's Project (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 8.
Typically Offered: Fall, Spring, Summer.

HUMN 5984 - Topics: Interdisciplinary Humanities (3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

HUMN 6010 - Methods and Theories of Feminism and Gender (3 Credits)
This course provides graduate-level interdisciplinary study in historiography, methodologies and theories of women's, gender, and sexuality studies and considers how culture is constructed around these categories. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with WGST and SSCI 6010. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

Individually Designed Major Course (IDMA)

IDMA 5000 - Special Topics (1-3 Credits)
Special classes for faculty-directed experiences examining issues and problems not generally covered in the curriculum. Restriction: Restricted to graduate and non-degree graduate students. Students who have earned credit for ISMA 5000 will not earn credit for IDMA 5000. Max hours: 9 Credits.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Information Systems (ISMG)

ISMG 5050 - Intermediate Excel for Business (1 Credit)
Spreadsheet software remains one of the essential digital skills required by businesses. In this course, you will learn key Excel skills including creating charts/graphs, filtering information, using pivot tables to summarize data, mastering Excel functions including sumif, countif, and vlookup. Cross-listed with ISMG 3050. Max hours: 1 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ISMG 5070 - Introduction to Tableau (1 Credit)
Tableau is a widely used business intelligence (BI) and analytics software that makes it easier for people to explore and understand data. This class introduces data management concepts and terminology, provides basic proficiency in analyzing and exploring data in Tableau. Students will transform raw data to meaningful visualizations and insights, create interactive dashboards and stories, and handle multiple data sources in Tableau. Cross-listed with ISMG 3070. Max hours: 1 Credit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.
ISMG 5080 - SQL Foundations (1 Credit)
Structured Query Language (SQL or "Sequel") is a special-purpose language designed for managing data in a relational database and is necessary for careers dealing with data across many business roles. This class introduces students to data management concepts and terminology. This class will prepare you to extract data from relational databases using SQL syntax shared by many types of databases, such as PostgreSQL, MySQL, SQL Server, and Oracle. Cross-listed with ISMG 3080. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ISMG 5090 - Introduction to Python for Business (1 Credit)
Python is a high-level programming language used by companies like Google, Facebook, and JP Morgan to solve common business and decision problems. This course introduces the Python programming language and the Pandas data analysis package to enable students to write simple data manipulation and analysis programs. The course uses business applied cases and dataset to enable students to increase decision making efficiency and productivity. It introduces algorithmic thinking skills that are beneficial for every manager in today's data-rich economy and can also serve as a starting point for learning more advanced programming skills. Cross-listed with ISMG 3090. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ISMG 5939 - Internship (1-3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Repeatable. Max hours: 9 Credits.

ISMG 6020 - Programming Fundamentals with Python (3 Credits)
This course is designed to provide a thorough introduction to Python and fundamental programming concepts like data structures, networked application program interfaces, files and databases. Principles of object-oriented programming and secure programming practices are demonstrated using programming constructs taken from the business domain. Students are required to design and create their own applications for data retrieval, processing, and visualization. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Recommended prerequisite: ISMG 6080 or equivalent database experience. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ISMG 6028 - Travel Study Topics (3 Credits)
Join your classmates in an international travel study course to understand the business operations of another culture. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors

ISMG 6060 - Analysis, Modeling and Design (3 Credits)
Provides an understanding and application of systems analysis and design processes. Students are exposed to system development life cycle (SDLC), structured systems analysis and design methods, object-oriented analysis and design methods, prototyping and commercial off-the-shelf package software approaches, and joint and rapid application development. Emphasizes the skills required for system analysts such as analytical, interpersonal, technical, fact-finding, and project management skills. Topics include data, process and object modeling, input-output and user interface design, and systems implementation and support. To provide an opportunity to develop these skills, an information system project is completed by a group of students. Students use a Case tool for their group project. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall.

ISMG 6080 - Database Management Systems (3 Credits)
The success of today's business often hinges on the ability to utilize critical information to make the right decisions quickly and efficiently. Transforming mountains of data into critical information to improve decision making is a skill every business decision maker must possess. This focus course covers the database design topics with a focus on enabling business decision making. Detailed topics include collecting, capturing, querying and manipulating data (using SQL and QBE) for simple to medium complex business applications. Commercial database products are utilized to demonstrate the design of database applications in management, marketing, finance, accounting, and other business areas. Students will be able to design and implement simple to medium complex database applications after successful completion of this course. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall, Spring.
ISMG 6120 - Network Design and Analysis (3 Credits)
Communication, knowledge sharing, and information acquisition within and between businesses are critical for long term strategic business success. Technological advancements are radically changing the way business communication and knowledge sharing are performed. This course will briefly examine the traditional concepts of local and wide area networks for reference purposes, but then will focus on how newer technologies are changing business practices. Traditional local and wide area network concepts that will be covered in this course include WiFi, wide area networks, wireless local area networks, cellular networks, and additional supporting services. Newer technologies that will be covered include social computing, Internet of Things, and artificial intelligence. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Spring.

ISMG 6180 - Information Systems Strategy (3 Credits)
Digital strategy is the application of digital technologies to business models to form new differentiating business capabilities. The course starts with the highlights of genesis and importance of IT in organizations, including the relationship between digital technology and competitiveness. Then, the development and management of an effective digital infrastructure are discussed. Realizing that the effective use of digital technology requires the alignment of competitive strategies, business processes, and applications, the course takes a top management perspective on the development of policies and plans that maximize the contribution of digital technologies to organizational goals. A broad overview of how systems support the operational, administrative, and strategic needs of organizations is covered. Cross-listed with BUSN 6610. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Spring.

ISMG 6200 - Business Intelligence Systems and Analytics (3 Credits)
This course covers business intelligence, analytics, and artificial intelligence technologies and is organized around three types of analytics that are enabled by those technologies: descriptive, predictive, and prescriptive analytics. The theme of artificial intelligence runs throughout the course from business intelligence, to machine learning and deep learning as applied in areas such as computer vision, autonomous vehicles, and robots. The topics will be discussed using concepts and theory, business cases and applications, and hands-on analysis or model building using datasets available in the public domain, with the hands-on analysis and model building being the focus of the course. Students will use a leading BI software and a cloud computing platform to perform analysis and build machine learning models. Note: The recommended prerequisite for this course is ISMG 6080. If you are familiar with SQL and have worked with databases in the past, you satisfy the prerequisite requirement for this course. Cross-listed with BUSN 6812. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall, Spring.

ISMG 6340 - Cloud Computing Concepts, Tools, and Security (3 Credits)
This course provides an introduction to cloud computing concepts, capabilities, and scenarios where cloud computing technology can be leveraged. Students will learn the basic building blocks of cloud computing, investigate the various types and models of cloud computing, and identify how businesses can implement these technologies. This class uses hands-on labs to give students real-world practice on how to configure and secure a cloud computing environment. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Summer.

ISMG 6430 - Information Systems Security and Privacy (3 Credits)
This course is designed to develop knowledge and skills for security of information and information systems within organizations. This course focuses on concepts and methods associated with planning, designing, implementing, managing, and auditing security at all levels and on all systems platforms, including enterprise systems. This course presents techniques for assessing risk associated with accidental and intentional breaches of security as well as disaster recovery planning. The ethical treatment of data is discussed. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Cross-listed with ISMG 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Summer.
ISMG 6450 - IT Project Management (3 Credits)
Focuses on how firms successfully manage the adoption of IT. Projects and program management principles are the primary focus of this course. Topics covered include approaches to prioritizing projects, estimating cost and time-to-market, build vs. buy decision, planning, monitoring and controlling implementation, measurement, total cost of ownership, effective management of both behavioral and technical aspects of the project and change management. For the best outcome it is recommended that you complete ISMG 6180 or BUSN 6610 prior to taking this course. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Summer.

ISMG 6460 - Emerging Technologies (3 Credits)
Provides an introduction to the expansive array of information technologies that form the infrastructure of a modern business enterprise. Emphasis is placed on learning conceptual technological foundations and understanding the business value of the various technologies. The purpose of the course is to develop the student's ability to discuss recent technological advancements with other IT professionals and management. Technology assessment is emphasized. Prereq: ISMG 6180 or BUSN 6610 (6810). Restriction: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and Ph.D. majors. Cross-listed with BUSN 6800. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ISMG 6180 or BUSN 6610 Restriction: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and Ph.D. majors. Typically Offered: Fall.

ISMG 6470 - Text Data Analytics (3 Credits)
This course covers algorithms and tools that are required to perform quantitative analyses of unstructured text data. Concepts and algorithms that will be covered include Zipf's Law, Power Law Distribution, Pattern Discovery, Inverse Document Frequency, measurements of Document Clustering and Similarity and so on. R will be introduced as a practice tool to practice quantitative analysis of text data. After the completion of this course, students will be able to uncover and visualize underlying themes and concepts which might be latent in large text documents. Note: The recommended prerequisite for this course is ISMG 6020. If you are familiar with programming and have worked with programming languages in the past, you satisfy the prerequisite requirement for this course. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall.

ISMG 6480 - Data Warehouse and Administration (3 Credits)
Management of large, complex data warehouses and operational databases involves technical skills and background needed by information systems professionals as well as tactical and strategic issues faced by information technology managers. This course provides conceptual knowledge, practical skills, and policy background for prospective information systems professionals and information technology managers. The course covers business aspects, conceptual background, and product material about management of data warehouses and operational databases. Assignments and projects involve Oracle skills for database administration and tactical or strategic issues faced by information technology management. Prereq: ISMG 6080. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ISMG 6080 Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Spring.

ISMG 6510 - Accounting and Information Systems Processes and Controls (3 Credits)
Designed to develop knowledge and skills used to understand and evaluate corporate accounting processes and systems. Focuses on financial and information system internal controls and the flow of corporate information through an accounting system. A financial system objective and risk assessment approach issued to present concepts and techniques for evaluating the adequacy of system processes and controls. Cross-listed with ACCT 6510, 4780 and ISMG 4780. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ISMG 6080
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors

ISMG 6800 - Special Topics (3 Credits)
A variety of advanced topics are offered in this course. Past topics include the human-computer interface, software engineering, artificial intelligence, graphical user interface, project management and electronic commerce. Consult the current 'Schedule Planner' for semester offerings. Note: Seldom offered. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
ISMG 6810 - Business Intelligence in Healthcare (3 Credits)
Provides students with an overview of how business intelligence is used in the healthcare industry. Students study the evolution of IT in healthcare including digitization of electronic health records and systems integration. Next the course looks at healthcare transformation and the evolution of business intelligence in general. Using case studies and hands on exercises, students learn about different aspects of business intelligence in various subsets of the healthcare industry. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Cross-listed with ISMG 4860. Repeatable. Max Credits: 8.

ISMG 6820 - Business Intelligence and Financial Modeling (3 Credits)
This course will introduce students to the application of business intelligence in a corporate finance setting. Financial data intelligence is essential for effective decision making throughout the firm, in finance directly and in other functions supported by the finance department. Strategy setting, budgeting, and new product development are just a few decision areas where finance personnel play an active role. In this course, we learn how to apply business intelligence software tools to enable finance personnel to access and analyze corporate data in support of critical decision making across the enterprise. Students will also analyze data through the use of financial models built in Microsoft Excel. The development of complex financial models will provide students with valuable hands-on experience with a software tool used widely incorporate finance departments. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Cross-listed with ISMG 4750 and FNCE 4750. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Spring.

ISMG 6830 - IT Governance and Service Management (3 Credits)
Deals with interrelated decisions on clarifying the business role of IT, defining integration and standardization requirements for the IT architecture, shared and enabling services for the IT infrastructure and business need for SaaS, and governance of cloud computing, IT outsourcing, and other IT services. Restriction: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Recommended Prerequisite: ISMG 6180 or BUSN 6610. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.
Typically Offered: Spring.

ISMG 6840 - Independent Study: ISMG (1-8 Credits)
Instructor approval required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

ISMG 6860 - Ethical Hacking Concepts and Methodologies (3 Credits)
From a technical perspective, organizations need to know how hackers work so that they can build their security around it and take preemptive measures against future attacks. The goal of ethical hacking is to understand current exploits and assess weaknesses and vulnerabilities of various organizational information systems by attacking them within legal limits. This course is designed to provide students an insight into current hacking tools and techniques used by hackers and security professionals to break into any computer systems. Throughout the course, students will engage in offensive and defensive hands-on exercises stressing ethical hacking and penetration testing that will be conducted in a vendor-neutral virtual environment. Topics include security threats and attack vectors, footprinting and reconnaissance, Google hacking, social engineering, insider threat, network scanning and enumeration techniques, vulnerability assessment, the Dark Web, and attack and defense strategies in emerging technologies, such as the Internet of Things (IoT) and cloud computing. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Cross-listed with ISMG 4860. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall, Spring.
ISMG 6865 - Digital Forensics Analysis (3 Credits)

From cyberterrorism to identity theft, the digital age has brought about a change in how crime is being committed. The usage of computers and the Internet in crime has led to the emerging field of digital forensics. Most businesses employ digital forensic experts to identify cyber threats, protect against insider threats, reinforce data loss prevention, reduce the risk of identity theft, fraud, and other digital crimes, and aid in the collection of digital evidence for various investigations. This course is designed to provide students the necessary skills to perform an effective digital forensics investigation. It presents a methodological approach to digital forensics, including searching and seizing, chain-of-custody, acquisition, preservation, analysis, and reporting of digital evidence. It covers major forensic investigation scenarios that enable students to acquire necessary hands-on experience on various forensic investigation techniques and standard forensic tools required to successfully carry out a digital forensic investigation leading to the prosecution of perpetrators. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Cross-listed with ISMG 4865. Max hours: 3 Credits. Grading Basis: Letter Grade

Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

Typically Offered: Fall, Spring.

ISMG 6885 - Ethics: A Formula for Success (3 Credits)

Students will learn how to spot and address red flags that foster unethical behavior in both publicly-traded and privately-held businesses. Governance and stakeholder management techniques that incentivize ethical behavior will be highlighted using examples of companies that are financially successful by "doing the right thing." Principle-based ethics are emphasized, namely, integrity, trust, accountability, transparency, fairness, respect, viability, and compliance with the rule of law. Cross-listed with MGMT 3420, MGMT 6420, ISMG 4785. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to graduate business school students.

ISMG 6890 - IT Risk Management (3 Credits)

This course provides an overview of IT risk management practices. Students will learn the elements of risk management and the data necessary for performing an effective risk assessment. Various risk management models will be introduced to demonstrate the methods that can be implemented to achieve Confidentiality, Integrity, and Availability of information systems. This class uses hands-on labs to give students real-world practice utilizing Security Information and Event Management (SIEM) software to gain an understanding of how to detect and respond to a cyber threat. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits. Grading Basis: Letter Grade

Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

Typically Offered: Spring.

ISMG 6910 - Design Science Practicum (3 Credits)

This is designed to be one of the final courses in the MS Information Systems degree. "Design Thinking" with user-centered perspectives will serve as a guiding principle to challenge assumptions and refine business problems to perform the final project. The instructor will provide students with tools and methods to identify, define and solve problems. Active discussion and creative presentation are core activities of this capstone course. Students will integrate what they have learned into a final project that can be either real-world problem designed in collaboration with an organization or a research paper on an emerging topic in the field. The final project will have multiple deliverables including a paper and a professional presentation to stakeholders who are directly related with the business problems defined in the project. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

Max hours: 3 Credits.

Grading Basis: Letter Grade

Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

Typically Offered: Fall, Spring.

ISMG 6950 - Master's Thesis (1-8 Credits)

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Repeatable. Max hours: 8 Credits.

Grading Basis: Letter Grade with IP Repeatable. Max Credits: 8.

Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

Additional Information: Report as Full Time.

ISMG 7800 - Special Topics (3 Credits)

A variety of advanced topics are offered at the Ph.D. level in this course. Consult the current 'Schedule Planner' for semester offering. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

Typically Offered: Spring.

ISMG 7840 - Independent Study: Pre-Dissertation Research (1-9 Credits)

Conduct pre-dissertation research under the supervision of a faculty member. Prereq: BUSN 6530. Repeatable. Max Hours: 18 Credits.

Grading Basis: Letter Grade Repeatable. Max Credits: 18.

Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.
ISMG 8990 - Dissertation Development (1-15 Credits)
Supports development of a dissertation in conjunction with a student's advisor. Prereq: Completion of first year and second year papers (ISMG 7840). Restriction: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 15.
Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.
Additional Information: Report as Full Time.

**Initial Teacher Education (ITED)**

ITED 5022 - Learning and Classroom Management Strategies for Secondary Schools (3 Credits)
Provides knowledge to create and manage classrooms conducive to the well-being and learning of a diverse student population. Included are instructional strategies for addressing content standards, managing curriculum, instruction, assessments, classrooms, and individual behaviors. Max hours: 3 Credits.
Grading Basis: Letter Grade

ITED 5023 - Literacy Strategies for Secondary Schools (3 Credits)
Provides knowledge and practice using specific literacy methods and assessment, to enhance content learning, and meet reading and writing standards. Instructional strategies for special needs and language-minority students are also emphasized. Max hours: 3 Credits.
Grading Basis: Letter Grade

ITED 5025 - Reading Instruction and Assessment K-5 (3 Credits)
Using and expanding upon background knowledge from prerequisites, participants learn about specific reading instruction and assessment routines and techniques. Through guided in-school placements, student's link course readings, discussion and practice, focus on improving their instruction, and the assessment or instruction cycle. Prereq: ITED 5000, 5010 and 5020. Max hours: 3 Credits.
Grading Basis: Letter Grade

ITED 5800 - Special Topics in Education (1-4 Credits)
Addresses a specific topic that is current and relevant to the needs of a specific group of educators and/or an educational context. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

ITED 5840 - Independent Study (1-4 Credits)
Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

**Instructional Technology (INTE)**

INTE 5000 - Maker Studio (3 Credits)
The maker studio is a collaborative practicum within the context of maker culture, project-based learning, and learning experience design. The course focuses on the practical translation of learning design theory to learning design reality, presenting learners with challenges to be resolved with creative solutions. Cross-listed with INTE 4000. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5010 - Humanizing Learning Design (3 Credits)
Humanizing Learning Design considers and respects learner diversity, including differences in ability and personal background. Students critique and create course materials that are mindful of the whole person, align with accessibility standards and follow universal design guidelines. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

INTE 5100 - Learning Experience Design (3 Credits)
Instructional design is the process used to analyze, design, develop, and evaluate learning solutions. You will identify a gap in learning or performance and design a learning solution in the form of courses units, modules, and other instructional resources. Cross-listed with INTE 4100. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5150 - Engaging in Education Advocacy (3 Credits)
This course will look at the theoretical foundations and critical issues of advocacy, elements of advocacy planning, and strategies for action. You will deepen your understanding of advocacy tools, processes and models in an effort to help you imagine how to utilize advocacy in your own practice. A primary focus will be on the connection of community organizations and schools. Cross-listed with INTE 7150. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5200 - Designing Online Learning Experiences (3 Credits)
This course helps educators transition to teaching online. Create online learning activities, assessments, and resources. Learn how to establish a strong online teaching presence. Explore blended learning environments, use of set curriculum, open educational resources (OER), family support, communication strategies, digital citizenship, and accessibility concerns. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5250 - Teaching Strategies for Online and Blended Learning (3 Credits)
This course provides a foundation for effective online teaching strategies. Learning essentials include: affording more reflective, engaging, inventive, and successful online learning experiences; fostering improved presence; employing skilled management techniques; and unpacking tools, habits, and processes for effective learning. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5300 - Critical Digital Literacies (3 Credits)
Critical Digital Literacies surveys intersections among literacy studies, digital media, and critical education. The course blends theory with practice, and design with leadership, to immerse students among the communities, developments, and debates pertinent to critical digital literacies. Cross-listed with INTE 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5320 - Games and Learning (3 Credits)
This course examines the use of games for learning and education across formal and informal environments. Students will survey contemporary learning theory, media, trends, and challenges related to designing and playing games in informal, community-based, online, and school settings. Cross-listed with INTE 4320. Max hours: 3 Credits.
Grading Basis: Letter Grade
INTE 5340 - Learning with Digital Stories (3 Credits)
This course reviews the uses of digital storytelling for learning. Develop and publish a short digital story that tells something important about you and your interests. Explore ways that creating or using digital stories can aid learning and personal growth. Cross-listed with INTE 4340. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5360 - Critical Digital Pedagogy (3 Credits)
Critical Digital Pedagogy is an overview of the intersections between digital technology and critical pedagogy. The course focuses on theory, practice, design and leadership in digital learning, open education, and collaboration with the larger community of educators concerned with critical digital pedagogy. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5370 - Open Education (3 Credits)
Open Education is an overview of the open education and open pedagogy movement, both the ideology and practices associated with working in the commons. As knowledge creators and learning designers, students will gain a greater understanding of the rights and responsibilities of open access, open design, open educational resources, and the issues. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5401 - Leading With Social and Emotional Learning in Mind (3 Credits)
This course will enable administrators to understand, investigate, assess, and plan to increase the quality and depth of social and emotional learning (SEL) in their schools and districts. The course focuses on the theoretical frameworks and scientific findings in the growing field of SEL. Cross-listed with EDUC 5401. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

INTE 5402 - Cultivating Awareness and Resilience for Administrators (3 Credits)
CARE (Cultivating Awareness & Resilience in Education) for administrators is a program that helps administrators handle stress and build their personal leadership capacities. The goal of CARE is to offer administrators tools and resources for reducing stress, preventing burnout, enlivening their leadership to help staff and students thrive. Cross-listed with EDUC 5402. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

INTE 5403 - Systemic Implementation of SEL (3 Credits)
This course focuses on Systemic SEL in which students will examine strategies for actively engaging students in learning and practicing social emotional competencies across classrooms and school environments, and in partnership with families and communities. Cross-listed with EDUC 5403. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Summer.

INTE 5660 - Developing Self-Paced Online Modules (3 Credits)
Students use a variety of tools and strategies to develop self-paced eLearning courseware, such as tutorials. The course covers critical aspects of the instructional development process that support the creation of effective self-paced online learning experiences, materials and resources. Cross-listed with INTE 4660. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5665 - Learning with Social Media and Networking (3 Credits)
The focus of this course is on how educators leverage networked social tools, technologies, and environments to address educational needs, opportunities, and problems of practice; and establish and nurture their own professional learning through participation in digital cultures. Cross-listed with INTE 4665. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

INTE 5670 - Crafting Synchronous Learning (3 Credits)
Webinars and other live online events are an increasingly popular approach to the delivery of learning and professional development opportunities. Informed by theory and research, students plan for and facilitate live learning events delivered via synchronous online technologies. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5680 - Producing Media for Learning (3 Credits)
Students develop and integrate media resources into eLearning environments, applying principles of media selection and multimedia learning. Students explore a variety of tools for producing audio, video, and multimedia content and examine ways to enhance eLearning courses through multimedia presentation and engagement resources. Cross-listed with INTE 4680. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5711 - Creative Designs for Instructional Materials (3 Credits)
This course is a project-based exploration of design theories, principles, and best practices for communicating information to diverse learning audiences. Students apply unique design approaches and formats to the creation of materials for teaching, learning, and being of service to underrepresented communities. Cross-listed with INTE 4711. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 5830 - Special Topics in Learning Design and Technology (0.5-4 Credits)
Topics vary depending on specific areas within learning technologies. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Typically Offered: Fall.

INTE 5840 - Independent Study: Learning Technologies (1-4 Credits)
Restriction: Restricted to graduate level students. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Graduate level students.

INTE 6720 - Research in Learning Design and Technology (3 Credits)
Analysis, evaluation, and production of research in instructional technology. Methods for observing instruction, assessing learning, and collecting participants reports to improve instruction. Development of recommendations for action based on research findings. Max hours: 3 Credits.
Grading Basis: Letter Grade
INTE 6730 - Digital Pedagogy Lab (2-3 Credits)
Digital Pedagogy Lab is an international professional development gathering for educators committed to issues of diversity, equity, inclusion, critical digital pedagogy and imagining a new future for education. The Lab is a space for teachers, students, librarians, administrators, and technologists interested in inquiry, praxis, and social justice. Max hours: 6 Credits.
Grading Basis: Satisfactory/Unsatisfactory

INTE 6750 - Trends and Issues in Learning Design and Technology (3 Credits)
This course examines definitions, history, core concepts, and current trends and issues related to the practice of instructional technology. Topics include instructional systems design, theories of learning and instruction, change management, performance improvement, emerging technologies, equity and access, and mobile learning. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 6840 - Independent Study: Learning Technologies (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

INTE 6930 - Internship: Learning Technologies (3 Credits)
Placement in a business, school or field setting where professional skills are applied to assess needs, design, develop and evaluate an instructional system, and provide leadership for change. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 12.

INTE 6950 - Experiential Thesis (3 Credits)
The Experiential Thesis course is provides the opportunity and support necessary for students to produce their final thesis project. The course gives students the freedom to design a thesis project which demonstrates their study in LDT. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Additional Information: Report as Full Time.

INTE 6990 - Leadership for Technology Innovation (3 Credits)
This course examines principles and strategies for leadership in a school, library, district, or organization aiming to improve its use of educational technology. Course learning essentials include how to: deal with competing voices; promote organizational change; assess and analyze technology use; pursue continuous improvement; employ strategic planning practices; implement effective programs; ensure sound professional development; wrestle with pressing leadership challenges; and secure funding (grant writing). Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7100 - Professional Learning and Technology (3 Credits)
Examines research surrounding the design and delivery of professional development (PD) programs in K20 and workplace settings. Projects and activities address: adult learning; PD models; design and; performance support and evaluation; career development and digital presence; and online tools. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7110 - Mentoring, Coaching and Training (3 Credits)
In this course students examine research surrounding the design and delivery of professional learning (PL) programs in K20 and workplace settings. Projects and activities address: adult learning; PL models; design and; performance support and evaluation; career development and digital presence; and online tools. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7130 - Professional Learning: Perspectives and Practices (3 Credits)
In this course students develop and evaluate large-scale learning initiatives in K20 and workplace settings. Topics include: frameworks for evaluating job performance based on professional learning standards; planning, delivering, and evaluating professional learning initiatives; research models; and performance improvement tools and resources. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7150 - Engaging in Education Advocacy (3 Credits)
This course will look at the theoretical foundations and critical issues of advocacy, elements of advocacy planning, and strategies for action. You will deepen your understanding of advocacy tools, processes and models in an effort to help you imagine how to utilize advocacy in your own practice. A primary focus will be on the connection of community organizations and schools. Cross-listed with INTE 5150. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7840 - Independent Study: Learning Design and Technology (1-6 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

INTE 7930 - Internship: Professional Learning (3 Credits)
Working under the direction of field and academic supervisors in field settings, contribute to projects intended to help educators and other workers improve their job performance. Apply your knowledge to complex problems of practice, thus preparing for ongoing leadership opportunities. Max hours: 3 Credits.
Grading Basis: Letter Grade

INTE 7950 - Experiential Thesis (3 Credits)
This course gives students the freedom to design a thesis project which demonstrates their study in LDT. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ARTS 5000 - Topics (3 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade

ARTS 5150 - Topics In Cross-Disciplinary Arts (1-3 Credits)
Investigates the historical and critical perspectives of the arts in a variety of contexts. Specific topics provide a focus for students to discover the ways in which the arts inform each other and are shaped by the events of the world. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ARTS 5700 - CMTC Topics in Transdisciplinary Practice (1-6 Credits)
Specialized topics are investigated via future- and professionally-focused curricula that utilize transdisciplinary collaboration, creativity and innovative approaches to real-world problems. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

Interdisciplinary Arts (ARTS)

ARTS 5000 - Topics (3 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade

ARTS 5150 - Topics In Cross-Disciplinary Arts (1-3 Credits)
Investigates the historical and critical perspectives of the arts in a variety of contexts. Specific topics provide a focus for students to discover the ways in which the arts inform each other and are shaped by the events of the world. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ARTS 5700 - CMTC Topics in Transdisciplinary Practice (1-6 Credits)
Specialized topics are investigated via future- and professionally-focused curricula that utilize transdisciplinary collaboration, creativity and innovative approaches to real-world problems. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Interdisciplinary Studies (IDST)

IDST 5000 - Special Topics (1-3 Credits)
Cross-listed with IDST 4000. Note: May be taken more than once for credit when topics vary. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

IDST 5010 - Foundations of STEM Communication (3 Credits)
This course will provide students with an introduction to STEM communication and offer opportunities for developing STEM content for a variety of audiences across multiple formats. These formats span written, oral, digital, and social media communication. Through classroom exercises and assignments, students will understand the role of communication in shaping perceptions, knowledge, decisions and ultimately realities vis-a-vis STEM. They will also learn to provide critical analysis of popular mainstream STEM communication and be able to identify basic expectations and constraints of STEM communication across audience and context. The class will explore approaches to communicating concepts in STEM disciplines to a variety of audiences through practice. Ultimately, the students will develop the skills and resources necessary to enable effective communication of complex STEM ideas to a wide range of audiences. Note: Students may not earn credit if they have already received credit for IDST topics courses with a similar title. Restriction: Restricted to Graduate and Graduate Non-Degree Majors (NDGR-NHL and NDGR-NLA). Cross-listed with IDST 4010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Interior Design (INTD)

INTD 5000 - Global History & Theory of Interior Design (3 Credits)
Students will gain knowledge about the history of interiors in relation to architecture, art history, decorative arts, furniture, and material culture from western and non-western perspectives. Students will gain knowledge of technologies affecting interior design and gain an awareness of human and environmental behavior theories that inform design. Restriction: Restricted to students with graduate standing. Cross-listed with INTD 2000. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
Typically Offered: Fall.

INTD 5100 - Drawing Out the Interiors (3 Credits)
In this course, students gain an understanding of elements and principles of design, including spatial definition, organization, and human-centered design through precedence studies and on-site spatial analysis. Students develop 2d and 3d visualization skills, and gain knowledge of analog and digital tools to effectively communicate design ideas from conceptualization and design development integrating furnishings, products, materials, and finishes. Restriction: Restricted to graduate students. Cross-listed with INTD 3100. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
Typically Offered: Fall.

INTD 5200 - Light, Color, Materials and Detailing (3 Credits)
Students will understand and apply principles and theories of light and color in relation to environmental impact and well-being. Students will understand interior construction in relation to base building systems and apply sustainable building practices to project-based assignments. Restriction: Restricted to graduate students. Cross-listed with INTD 4000. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
Typically Offered: Fall.

INTD 6100 - Design Thinking and Collaboration (3 Credits)
Design thinking strategies and learning to work collaboratively across disciplines form the basis of this course. Students develop practical skills utilizing design thinking methods to problem solve on team-based projects pertaining to the built-environment. Restriction: Restricted to graduate students. Cross-listed with INTD 4100. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
Typically Offered: Fall.

INTD 6200 - Interior Design Workshop (3 Credits)
This workshop introduces a design studio-style course with a hands-on approach. Exploring two and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines, JEDI, and sustainability. Creative processes, visual order, materials, and critical thinking are investigated through applied projects. Students will apply design processes and theories to basic interior design projects, as they learn additional graphic tools, techniques, and standards for effective design communication. Prereq: INTD 5100. Restriction: Restricted to students in the Interior Design Certificate program. Cross-listed with INTD 4200. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: INTD 5100. Restriction: Restricted to students in the Interior Design Certificate program.
Typically Offered: Fall.

INTD 6686 - Special Topics (3 Credits)
Various topical concerns are offered in interior design history, theory, elements, concepts, methods and implementation strategies, and other related areas. Restriction: Restricted to students with graduate standing. Max hours: 24 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 24.
Restriction: Restricted to students with graduate standing.
Typically Offered: Fall, Spring, Summer.

International Business (INTB)

INTB 5800 - Special Topics in International Business (3 Credits)
Current topics in international business are occasionally offered. Consult 'Schedule Planner' for specific course offerings or contact an advisor for information. Prereq: Topics vary depending on the topic and the instructor requirements. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

INTB 5939 - Internship (1-3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Prereq: 21 semester hours and a 3.5 grade-point average. Repeatable. Max Hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.
INTB 6000 - Introduction to International Business (3 Credits)
This course examines the international business environment, its impact on business operations across borders, and the international dimensions of key business and managerial functions. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6020 - Cross-Cultural Management (3 Credits)
Focuses on the management of diverse socio-cultural and political norms and values in the global marketplace. The goal of this course is to develop skills in managing impacts of such values and norms on the effectiveness of international business operations and managerial activities. Prereq: INTB 6000 or permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6022 - International Business Negotiations (3 Credits)
Examines the international dimensions of business negotiations. It addresses the impact of the cultural, legal, political environments in the negotiation process, and examines similarities and differences in negotiation styles and approaches across borders. (This course qualifies as an international elective for the MS in International Business program.) Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6024 - International Trade Finance and Management (3 Credits)
Provides an overview of international trade finance and trade management. It examines the roles played by various parties involved in international trade, addresses key methods of international payment and related financing, and provides practical experiences on how to manage the import and export trade management process. (This course qualifies as an international elective for the MS in International Business program.) Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6026 - Marketing Challenges at the Global Frontier (3 Credits)
Explores problems, practices, and strategies involved in marketing goods and services internationally. Emphasized analysis of uncontrollable environmental forces, including cultures, governments, legal systems, and economic conditions, as they affect international marketing planning. Emphasis on practice through the use of projects and speakers. Coreq: BUSN 6560. Instructor may waive coreq for business students. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD. Note: students cannot receive credit for both MKTG 6020 and INTB 6026. Cross-listed with MKTG 6020. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD

Typically Offered: Fall, Spring.

INTB 6028 - Global Study Topics (3 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with ENTP 4028, ENTP 6028, and INTB 4028. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6030 - 11-Month MBA International Business Study Abroad (3 Credits)
The 11-Month MBA International Business Study Abroad is an experiential learning course conducted abroad. Available for 11-Month MBA students only.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

INTB 6040 - Managing Global Talent (3 Credits)
This course has two objectives: (1) to understand the impact of cultural differences in the management of people in multinational firms; and (2) to compare and contrast critical human resource issues in the contexts of domestic and international operations. Topics include recruitment, staffing, training, performance appraisal, compensation, and labor and management relations in markets around the world. (This course qualifies as an international elective for the MS in International Business program.) Prereq: BUSN 6520 or BUSN 6521 or MGMT 6380 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with MGMT 6040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6520 or BUSN 6521 or MGMT 6380 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6060 - The Legal Aspects of International Business (3 Credits)
Analyzes the legal aspects of international business transactions and considers risk-reducing mechanisms such as letters of credit and arbitration. The course examines NAFTA, the European union, and other international trading structures and rules, giving the background for export or import activities. (This course qualifies as an international elective for the MS in International Business program.) Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6080 - Marketing in Emerging Markets (3 Credits)
Explores problems, practices, and strategies involved in marketing goods and services in emerging markets. Emphasizes analysis of uncontrollable environmental forces, including cultures, governments, legal systems, and economic conditions, as they affect the marketing plan. (This course qualifies as an international elective for the MS in International Business program.) Prereq: BUSN 6560. Note: Students cannot receive credit for both MKTG 6080 and INTB 6082. Cross-listed with MKTG 6080. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
INTB 6094 - Marketing Issues in the Chinese Environment (3 Credits)
This course assesses numerous marketing and marketing related topics in the Chinese environment with the objective of helping the graduate student develop managerial and marketing expertise. In specific, the course pinpoints key developments in the Chinese business environment, develops expertise in conducting market opportunity analysis, assesses market entry conditions and strategies and applies marketing mix strategies in the context of the Chinese environment. Note: It is recommended for students to take BUSN 6560 or INTB 6000 prior to this course. Cross-listed with MKTG 6094. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6020 - International Business Policy (3 Credits)
The objective of this course is to develop competence relevant to strategy formulation and implementation in a multi-national enterprise, and in an international context. Provides theoretical knowledge, skills, and sensitivities that help deal effectively with the strategic and managerial problems of managing in a global environment. Prereq: INTB 6000 or ENTP 6826. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6270 - Intercultural Communications (3 Credits)
The age of globalization means we are all neighbors, working across national boundaries and even continents. This class examines the philosophies, processes, problems, and potentials unique to communicating across cultures to address issues of social justice and ethical intercultural practices. We will consider the important role of context in interactions across cultures and subcultures, globally, transnationally, and within the U.S. Restriction: Restricted to NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with COMM 4270 and COMM 5270. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Typically Offered: Fall, Spring.

INTB 6370 - International Accounting (3 Credits)
Designed to expose students to the international aspects of accounting and financial management. Includes discussion of some of the different financial accounting practices across countries; financial statement analysis in a global context. IFRS's are reviewed and compared with the requirements of US GAAP. Note: Students cannot receive credit for both ACCT 6370 and INTB 6370. Prereq: BUSN 6550 or ACCT 6031. Cross-listed with ACCT 6370 and ACCT 4370. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Spring.

INTB 6372 - International Financial Management (3 Credits)
Addresses financial management in an international context that considers international capital movements and foreign exchange problems, and international operations as they affect financial functions. It reviews foreign and international institutions and the foreign exchange process and considers financial requirements, problems, sources, and policies of firms doing business internationally. Meets concurrently with FNCE 6370. Prereq: BUSN 6640. Cross-listed with FNCE 6370. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6411 - International Corporate Governance (3 Credits)
 Discusses the structure and goals of the modern corporation, the primary governance mechanisms used to help companies achieve these goals, and how and why these roles, goals, and mechanisms vary across nations. The topics covered in the course include managerial compensation, board of director structure and ethics, shareholder activism, and how governance structures differ across countries. (This course qualifies as an international elective for the MS in International Business program). Prereq: BUSN 6640 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Note: Students cannot receive credit for both FNCE 6411 and INTB 6411. Cross-listed with FNCE 6411 and FNCE 4411. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6460 - Emerging Market Finance (3 Credits)
This course aims to explore key emerging market finance issues from the perspectives of corporations, investors and markets. Emerging economies are deemed to be the engine of growth opportunities in the world economy. However, compared with developed markets, they typically have some unique features in their economic systems and financial markets, and thus different risk and return characteristics, leading to special considerations of capital budgeting, financing and investing in these economies. This course is to help develop a better understanding of financial markets, corporate finance and investments in emerging economies, with case studies on some major emerging markets (e.g., China, India). Prereq: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with FNCE 6460. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
INTB 6500 - International Business Consulting (3 Credits)
This action-learning course provides students the opportunity to work
with and consult for a company at the senior executive level (e.g., CEO, Business Unit heads) in order to add value to the firm’s international business. Students will apply international business principles and practices to address a strategic, functional, operational, or geographic opportunity facing a sponsoring organization. In addition, students will gain “on the job learning” of key protocols in an international business consulting context. Note: Because the topics change each term, student may take this course twice. Work with an advisor to make sure there is room in your degree plan before enrolling in the second course. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

INTB 6600 - Blockchain and Emerging Technologies Impact
Globalization (3 Credits)
Examines blockchain and digital technologies powering globalization--how they are driving instant access to information, boosting transaction speed, and broadening the scope and reach of business across borders. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

INTB 6730 - Supply Chain Analytics (3 Credits)
Introduces the design, analysis, management, and control of supply chains. Because of continuing advances in globalization, sustainability, and information technology, course emphasis will include integration of processes and systems, relationship management of upstream and downstream players, and strategies that incorporate current and future trends. Cross-listed with BANA 6730. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6750 - Research Methods in International Business (3 Credits)
Focuses on three major issues: (1) research design from an international management perspective (e.g., qualitative, quantitative and ethnographic); (2) topical issues (e.g., culture, international negotiations, mergers and alliances); (3) trends in international business research (e.g., cross-national project teams, emerging theoretical perspectives). This course qualifies as an international elective for the MS in International Business program. Note: Available to students as Independent Study only. Prereq: INTB 6000 and BUSN 6530 or equivalent. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6830 - Marketing and Global Sustainability (3 Credits)
Marketing & Global Sustainability focuses on the role of marketing in sustainable for-profit and not-for-profit companies from a global perspective. The course examines sustainable business practices and trends; green brands, green labels, and greenwashing; socially-conscious and "green" customer segments; innovating for sustainable new products and services; sustainable retailing and supply chains; and sustainability as a competitive advantage. The course will employ a variety of pedagogical techniques including lectures, discussion, guest speakers, case studies, and projects. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with MKTG 6830. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Typically Offered: Fall.

INTB 6840 - Independent Study (1-8 Credits)
Instructor approval required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. (This course qualifies as an international elective for the MS in International Business program.) Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6870 - Global Climate Change (3 Credits)
Global climate change may be one of the most important challenges facing business in the 21st century. This course will introduce the potential impacts of climate, then discuss possible regulatory responses to and business risks and opportunities that may emerge if climate change occurs. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6950 - Master’s Thesis (1-8 Credits)
Prereq: INTB 6750. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 8.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Additional Information: Report as Full Time.

International Studies (INTS)
INTS 5152 - Religion & Communication (3 Credits)
This course focuses on the dynamics between religion, culture, and communication and how these have led to intercultural peace, centuries of war, and/or different visions of belonging. This class addresses these dynamics to improve intercultural dialogue and conflict resolution processes, foregrounding the search for justice. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with COMM 4152, INTS 4152, RLST 4152, COMM 5152, and RLST 5152. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
INTS 5995 - Global Study Topics (1-15 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with INTS 4995. Term offered: summer. Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Typically Offered: Summer.

Inworks Innovation Initiative (IWKS)

IWKS 5100 - Human-Centered Design, Innovation and Prototyping (3 Credits)
Offers a graduate-level introduction to collaborative interdisciplinary design and innovation from a human perspective, as well as introducing key theoretical and computational foundations of innovation. Using the wide array of Inworks prototyping facilities, teams of students will design and implement human-oriented projects of increasing scale and complexity, in the process acquiring essential innovation and problem-solving skills. Prerequisite: None. No previous design or prototyping experience is expected or required. Cross-listed with IWKS 4100. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5120 - IoT: The Internet of Things (3 Credits)
In a world where everything is connected to everything else, how does that work? This course introduces techniques for (1) designing systems that can sense the environment and respond to humans in meaningful ways and (2) creating networks of physical objects that collect and exchange data. Such systems might include wearable sensors, interactive art, and Internet-connected home devices. Working individually and in teams, students will develop projects using Inworks’ materials, devices, and fabrication tools. The course involves introductory programming and prototyping experience. Suggested Background: IWKS 5100 & some computing experience. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5150 - Advanced Human-Centered Design and Prototyping (3 Credits)
Graduate version of IWKS 4100. An advanced exploration of design thinking and the user-centered design paradigm from a broad range of perspectives, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Using a team-based, project-oriented approach, students will develop advanced expertise in the design, development, and critique of solutions to important human problems. The course will make full use of Inworks’ prototyping facilities. Suggested Background: IWKS 5100 & 5170. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5170 - 3D Design, Computation and Prototyping (3 Credits)
Introduces the design and computer-controlled fabrication of three-dimensional objects using both additive (3D printing) and subtractive (laser cutter, CNC router/mill) processes. Increasingly complex projects throughout the semester using various CAD/CAM software tools will explore design strategies for digital fabrication. Restriction: Restricted to students with graduate standing. Cross-listed with IWKS 3100 and ARCH 3706. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5180 - Inworks: Choose Your Own Adventure: Experiences in Design, Innovation and Prototyping (1-3 Credits)
Provides weekly speakers, workshops and other experiences that educate and enrich across the design, innovation and prototyping landscape. Students may choose to participate in any five (for one credit), ten (for two credits) or fifteen (for three credits) activities. Each week, participating students will attend the scheduled activity, and then create a meaningful response that reflects the impact of that activity on their thinking or practice. Prerequisites: None. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

IWKS 5200 - Data Science for Innovators (3 Credits)
Graduate version of IWKS 3200. Introduces techniques for capturing, processing, visualizing, and making meaning out of large datasets. With the exponential growth and decreasing cost of data collection tools such as genome sequencing, social media, crowd sourced data, mobile phone apps, remote sensors, and data from other publically available sources, innovators are able to harness a rich array of data in their designs. This course will introduce the fundamentals of working with online data and large data sets, introduce widely used data analysis and visualization tools, and culminate in a cumulative project that incorporates data in a significant way. Suggested Background: IWKS 5350 or similar computing experience. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5300 - NAND to Tetris: Foundations of Computer Systems (3 Credits)
Graduate version of IWKS 3300. Introduces the principles of computer systems that underlie the global information age. Starting from first principles, students gradually construct a simple hardware platform and a modern software hierarchy, yielding a working basic yet powerful computer system. Suggested Background: IWKS 2300 or similar computing experience. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5350 - Computational Foundations of Innovation (3 Credits)
Graduate version of IWKS 2300. Introduces the technological underpinnings of modern society, introducing the fundamental principles of computing. Students create realistic artifacts, and imbue those artifacts with interesting behavior by writing computer programs in online virtual world similar to Second Life and for simple Arduino-connected devices. In-class and in-world discussions and readings introduce important computing ideas and concepts. Completion of this course will prepare students for more advanced IWKS graduate courses that require knowledge of computing principles and practices. Prerequisites: None. Max hours: 3 Credits.
Grading Basis: Letter Grade
IWKS 5400 - Game Design and Development I (3 Credits)
Graduate version of IWKS 3400. Introduces principles of computer game development, building on the rich interplay of computer science, graphics design, physics, music, and narrative. Students develop interactive 2D and 3D games and a final project. Substantial software development involved, but requires only introductory programming experience. Suggested Background: IWKS 2300 or similar computing experience. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5450 - Game Design and Development II (3 Credits)
Graduate version of IWKS 4450. Continuation of IWKS 5400, with increased emphasis on more advanced techniques including 3D rendering; multimodal music, complex narrative, animation, non-player AI, and advanced 3D techniques including diffuse, ambient, specular, and emissive lighting; vertex, pixel and geometry shaders; shadows; terrain building; reflective and refractive lighting; bump, parallax, and parallax occlusion mapping; Phong and Gouraud shading; “cel” shading; ray tracing; bloom; and high dynamic range lighting. Suggested Background: IWKS 5400 or similar experience in game development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5500 - Bio-Design and Innovation (3 Credits)
Introduces the biodesign innovation process, which involves identifying important human needs and inventing meaningful solutions to address them. The course examines how biotechnology and bio-inspired innovation improve the form and function of our design world through innovative materials and novel approaches to developing buildings, food, medicine, infrastructure and more. Readings and in-class debates will raise critical issues in contemporary bioethics. For their final projects, students will choose to create and prototype a speculative biodesign concept, or work in the bio lab on the development of a real-world biodesign solution of their choosing. Suggested Background: IWKS 2100 & 3100. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5520 - Design for Healthful Human Longevity (3 Credits)
Graduate version of IWKS 4520. Introduces contemporary studies, therapies, theories, and research on aging, age related disease, and innovations for longer healthier human lives. Guest lecturers, seminar discussions, readings and discussions will inform student projects that address challenges to prolonged, healthy, disease-free lives. Suggested Background: IWKS 5100 and 5700. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5540 - Synthetic Biology for Innovators (3 Credits)
Graduate version of IWKS 3540. Introduces the fundamentals of synthetic biology for those who seek to use it as a tool for innovation. Synthetic biology allows us to engineer new biological systems and redesign existing biological components by integrating aspects of biotechnology, evolutionary and molecular biology, systems biology, computer engineering, computational biology, and genetic engineering. Advancement in technological tools and techniques make this material accessible to motivated individuals from many disciplines, and no biology background is required. Culminates with a final team project focused on designing synthetic biology solutions that address human need. Suggested Background: None. No previous background in biology is required. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5550 - Innovation Law and Policy (3 Credits)
Graduate version of IWKS 3550. Introduces legal and regulatory foundations related to innovation, including intellectual property, telecommunications, electronic commerce, the Internet, biotechnology, ethical and equity considerations, and financing. These issues are examined from the perspectives of the legal, business, capital, development, consumer, and policy-making communities. Suggested Background: IWKS 5100. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5600 - Innovating for the Developing World (3 Credits)
Graduate version of IWKS 3600. Explores the design and development of products and services that can be sustainably and gainfully used by the world’s poorest citizens. Students in interdisciplinary teams will design, implement and evaluate viable solutions to real problems faced by people in the developing world. The goal is to develop an understanding of the extraordinary challenges faced by individuals for whom basic survival is not a given, and the knowledge and skills necessary to create designs that respond appropriately to those unique circumstances. Provides a foundation for further study and practice in the area of technology and development. Suggested Background: IWKS 5100. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5620 - Mobile App Development (3 Credits)
Graduate version of IWKS 3620. Introduces mobile application development, including front-end mobile application clients, data handling, connectivity to back-end services and cloud hosting. The course provides an overview and comparison of technical approaches employed by Apple iOS, Google Android, and cross-platform development environments. Students will install, develop, test, and distribute mobile applications while addressing challenges associated with development for any mobile platform: limited screen size and memory, gesture based GUI, varying connectivity, and the wide variety of target mobile devices. Suggested Background: IWKS 5100 & IWKS 5350 or similar computing experience. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5650 - Innovating for the Developing World (3 Credits)
Explores the design of products and services that can be sustainably used by the world’s poorest citizens. Students design, implement and evaluate solutions to real problems in the developing world. Provides a foundation for further study and practice. Suggested Background: IWKS 5100. Max hours: 3 Credits.
Grading Basis: Letter Grade
IWKS 5680 - Case Studies in Design (3 Credits)
Graduate version of IWKS 4680. Explores why some projects succeed and others fail. Many human-centered interventions fail to meet their designers’ objectives, reflecting the unique challenges associated with matching human need with feasibility. Explores how innovators can increase their chances for success by examining several successful (and unsuccessful) designs. Suggested Background: IWKS 5100 & 5700. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5700 - Innovation and Society (3 Credits)
Graduate version of IWKS 3700 Analyzes impact of innovative design on work, sense of self, and social systems, in education, healthcare, finance, and other sectors. Investigates how people customize “hack” technologies they use, and the moral / ethical implications of being designers. Students will research the impact of an innovation of their choice and share via essays, models, videos, or another medium of their choice. Suggested Background: IWKS 5100. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5750 - Critical Analysis of Design (3 Credits)
Graduate version of IWKS 3700. Examines technologies that pervade daily life. Analyzes impact of designs on work lives, sense of self, and social systems, within education, healthcare, finance, and other sectors. Investigates how technologies are customized and ethical implications of designing systems for others. Suggested Background: IWKS 5100. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5800 - StartUp: Creating New Ventures (4 Credits)
Teams of students are guided to create and launch a new company in a single semester. Culminates in a “pitchfest” to area entrepreneurs and venture capitalists. One of two alternative capstone courses for the Inworks Minor in Design and Innovation. Restriction: Requires enrollment in the Inworks HCDI minor or certificate, or instructor permission. Suggested Background: Completion of at least three other Inworks courses. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Requires enrollment in the Inworks HCDI certificate.

IWKS 5850 - Product Design (3 Credits)
Graduate version of IWKS 3850. Explores the design requirements associated with creating a product that will be manufactured in large quantities and used by potentially thousands of users. These requirements are often very different from those associated with creating a working prototype. This gap between prototype creation and starting a business offers an interesting and unique set of design challenges. As part of the course, teams of students will engage in a realistic product design cycle. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5900 - Graduate Capstone (4 Credits)
Graduate version of IWKS 4900. Working closely with project sponsors, students design, implement, and evaluate a project for use in local industry and non-profit organizations. One of two alternative capstone courses for the Inworks Graduate/Professional Certificate in Design and Innovation. Prereq: IWKS 5100 and enrollment in the Inworks graduate certificate. Max hours: 4 Credits.
Grading Basis: Letter Grade
Prereq: IWKS 5100 and enrollment in the Inworks graduate certificate.

IWKS 5930 - Special Topics in Human Centered Design and Innovation (1-4 Credits)
Emergent issues and professional developments in design, innovation and prototyping. Consult the current online Inworks Course List for semester offerings as new special topics courses are frequently added. With permission, may be repeated for credit. Restriction: Restricted to students with graduate standing. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

IWKS 5970 - Independent Study in Human Centered Design and Innovation (1-6 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to design, innovation and prototyping. With permission, may be repeated for credit. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

Landscape Architecture (LDAR)

LDAR 5501 - Landscape Architecture Design Studio 1 (3 Credits)
Introduction to basic strategies, methods and techniques of landscape architectural design and representational techniques. Explores fundamental issues of spatial form and landscape experience and meaning. Prereq: LDAR 5510. Restriction: Restricted to graduate majors within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: LDAR 5510. Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 5502 - Landscape Architecture Design Studio 2 (6 Credits)
Problem-based studio course covers strategies, methods and techniques of landscape architectural design with emphasis in more complex social and urban issues, design processes and development and the application of theory and research. Prereq: LDAR 5501 and LDAR 5540 or GEOG 4080/5080, or permission of instructor. Restriction: Restricted to graduate majors within the College of Architecture and Planning. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: LDAR 5501 and LDAR 5540 or GEOG 4080/5080. Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 5503 - Landscape Architecture Design Studio 3 (6 Credits)
Problem-based studio covering the approaches, techniques and means for planning and designing sites to accommodate development program on a particular site within an identifiable context. Covers issues definition, site analysis, programming, development of design strategies, evaluation site planning, and communication. Prereq: LDAR 5501 and LDAR 5502 or permission of department chair. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 5510 - Graphic Media in Landscape Architecture (3 Credits)
Introduces basic principles and methods associated with analog and digital drawing-plan, sections, perspectives, color, shading, composition and projection. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 5521 - History of Landscape Architecture (3 Credits)
Intro survey course fosters workable understanding of landscape architecture design history and theory and offers a base for understanding trends and ideas influencing contemporary practice. Emphasizes Western Europe and the United States from antiquity to early twentieth century. Cross-listed with LDAR 4421. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate level or senior level or higher students

LDAR 5532 - Landform Manipulation (3 Credits)
Focuses on the fundamental technical aspects of landscape architectural design and site engineering of related topography, grading, drainage design, landform manipulation, earthwork calculations, and road alignment. Prereq: LDAR 6641 or higher or permission of instructor. Cross-listed with LDAR 4432. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: LDAR 6641 or higher or permission of instructor. Typically Offered: Spring.

LDAR 5540 - Introduction to GIS (3 Credits)
An introduction to GIS as a set of strategies, methods and techniques used to facilitate the inventory and analysis of complex systems. Restriction: Restricted to graduate students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring, Summer.

LDAR 5572 - Ecology for Landscape Architects (3 Credits)
Course emphasizes continuity and change in an ecology of the natural and man-made landscape. Focuses on biological, geophysical, cultural, and perceptual factors involved in landscape, spatial organization, and urban and regional structure. Introduces field ecology for landscape architecture. Restriction: Restricted to graduate students. Cross-listed with LDAR 4472. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

LDAR 5573 - Advanced Landscape Ecology (3 Credits)
Critically investigates the performance of complex landscape systems on multiple spatial and temporal scales, with emphasis on the interaction of human and non-human systems. May address issues of sustainability, disaster recovery, mitigation, etc. Prereq: LDAR 5572 or permission of instructor. Restriction: Restricted to graduate students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: LDAR 5572 or permission of instructor. Restriction: Restricted to graduate students.

LDAR 5570 - ACE Mentoring (3 Credits)
Graduate students work with professional architects, designers, and engineers mentoring students in selected local high schools to learn problem solving, graphics and model making to produce a design project. Student mentors develop lesson plans, outcomes and keep a weekly journal. Cross-listed with ARCH 6470 and URPL 6850. Restriction: Restricted to majors within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6520 - Landscape Architecture in Other Cultures (1-9 Credits)
Study abroad. Various studies of landscape architecture, architecture, urbanism, and design to destinations outside of the continental United States. Cross-listed with LDAR 3690. Restriction: Restricted to majors within the College of Architecture and Planning. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6604 - Landscape Architecture Design Studio 4 (3 Credits)
Intermediate landscape design studios engage design projects and topics that cover diverse design approaches, contexts, and landscape processes at various scales and complexities. Design projects will vary. Students are expected to expand their graphic, oral communication, and design skills. Prereq: LDAR 5501, 5502, 5503 or permission of department chair. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6605 - Landscape Architecture Design Studio 5 (3 Credits)
Intermediate landscape design studios engage design projects and topics that cover diverse design approaches, contexts, and landscape processes at various scales and complexities. Design projects will vary. Students are expected to expand their graphic, oral communication, and design skills. Prereq: LDAR 5501, 5502, 5503, 6604 or permission of department chair. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6606 - Landscape Architecture Design Studio 6 (6 Credits)
Advanced design studio covering landscape change in diverse contexts at various scales and complexities. Recommended: completion of 2 graduate level landscape studios or permission of department chair. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning.

LDAR 6607 - Landscape Architecture Design Studio 7 (3 Credits)
Advanced landscape design studios engage design projects and topics that cover diverse design approaches, contexts, and landscape processes at various scales and complexities. Design projects will vary. Students are expected to demonstrate mastery of graphic, oral communication, and design skills. Prereq: LDAR 5501, 5502, 5503, 6604, 6605, 6606 or permission of department chair. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6608 - Landscape Architecture Design Studio 8 (3 Credits)
Advanced landscape design studios engage design projects and topics that cover diverse design approaches, contexts, and landscape processes at various scales and complexities. Design projects will vary. Students are expected to demonstrate mastery of graphic, oral communication, and design skills. Prereq: LDAR 5501, 5502, 5503, 6604, 6605, 6606, 6607 or permission of department chair. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6620 - Landscape Architecture Theory and Criticism (3 Credits)
Explores and assesses theory in landscape architecture and the concepts, ideas and discourses underlying contemporary design approaches. Emphasizes developing critical understanding of the roles and agency of theoretical inquiries in landscape architecture in relation to aligned disciplines. Cross-listed with ARCH 3620. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6625 - Landscape Architecture Field Studies (3 Credits)
Critical field evaluation of built works of landscape architecture using methodological approaches like field measurement, mapping, sketches, photography, written evaluations and applied research. It may also assess the performative aspects of designed landscapes. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6630 - Site, Society and Environment (3 Credits)
Sites are defined by relationships within environmental and social settings. Therefore site design should be primarily ethical and secondarily technical. This course examines the implications of this idea through site methodologies, conceptual construction of site, site analysis and site typologies. Restriction: Restricted to graduate majors within the College of Architecture and Planning. Cross-listed with LDAR 4430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6631 - Landscape Construction Materials and Methods (3 Credits)
Develops understanding of detailed design processes, construction materials and selection of construction methods and documents. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6632 - Site Planning (3 Credits)
Focuses on site planning processes, criteria and decision-making. Includes research, site analysis, and data synthesis as they relate to site context and design concepts. Also addresses site work (grading and drainage, utilities), cost computation, and creating site and building program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6635 - Community Engaged Design Practice (3 Credits)
Obtain real-world pre-design and conceptual design experience in complex urban environments focusing on evolving trends in sustainability. Using digital trans-disciplinary learning students will develop comprehensive sustainable strategies that draw from their own sustainable philosophy developed during this class. Cross-listed with ARCH 6257 and LDAR 4435. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning.

LDAR 6636 - Urban and Local Food Systems (3 Credits)
In this seminar, we will examine the connections between landscape architecture and food production in cities as well as the role that food production plays in rural landscapes. The course material may be historical, theoretical, or oriented toward contemporary research. Cross-listed with LDAR 4436. Restriction: Restricted to graduate students. Max hours: 3 Credits
Grading Basis: Letter Grade
Restriction: Graduate level students.

LDAR 6637 - Social Justice in Planning (3 Credits)
This course investigates various social justice issues encountered in planning, including conflict resolution; advocacy; environmental justice; social equity; culture and diversity; disadvantaged populations; public engagement techniques; affordability; equal access; and policy impacts. Cross-listed with URPL 6410 and ARCH 6258. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning.

LDAR 6641 - Computer Applications in Landscape Architecture (3 Credits)
Introduces digital technologies and methods commonly used in landscape architecture including primarily CADD, visualization, graphic design, and other emerging applications. Includes hands-on exercises. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6642 - Landscape Architecture Digital Design Workshop (3 Credits)
Provides hands-on experiences in the principles, software, and theories for emergent 3-D and 4-D design in landscape architectural practice and research. Prereq: LDAR 6641. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: LDAR 6641 Restriction: Restricted to majors within the College of Architecture and Planning

LDAR 6655 - Urban Ecology (3 Credits)
This lecture/seminar will cover ecological principles as applied to urban systems (lecture portion) and students will do an intensive study, presentation, and discussion on the topic of their choosing (seminar portion). Cross-listed with URPL 6547. Restriction: Restricted to graduate students in the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.
LDAR 6670 - Plants in Design (3 Credits)
Explores the challenges, opportunities and responsibilities of designing with living, growing, and ever-changing organisms. Students learn to identify plants that are commonly used in the Colorado region and the principles, theories, methods, and techniques for planting design. Restriction: Restricted to graduate majors within the College of Architecture and Planning. Majors and minors outside of landscape architecture and non-degree seeking students can ask the Department Chair for course permission. Cross-listed with LDAR 4470. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6671 - Plant Material Identification (3 Credits)
Students learn the names, characteristics and site requirements of plants including trees, shrubs, ground covers and perennials commonly used in built works in the Colorado region. Methods are transferable to other regions. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6686 - Special Topics: Landscape Architecture (3 Credits)
Various topical concerns are offered in landscape architecture history, theory, elements, concepts, methods, implementation strategies, and other related areas. Restriction: Restricted to graduate students. Repeatable. Max hours: 21 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

LDAR 6706 - Advanced Landscape Architecture Design Studio Immersive I (4 Credits)
Advanced design studio forms core of the Immersive experience; covers landscape change in diverse contexts at various scales and complexities. Travel anticipated. Students learn the names, characteristics, and site requirements of plants commonly used in the Colorado region. Methods are transferable to other regions. Max hours: 4 Credits.
Grading Basis: Letter Grade
Coreq: LDAR 6707 and LDAR 6740 or LDAR 6745.

LDAR 6707 - Advanced Landscape Architecture Design Studio Immersive II (2 Credits)
Advanced design studio forms core of the Immersive experience; covers landscape change in diverse contexts at various scales and complexities. Travel anticipated. Recommended: complete 2 previous landscape graduate studios or permission of department chair. Coreq: LDAR 6706 and LDAR 6740 or LDAR 6745. Max hours: 2 Credits.
Grading Basis: Letter Grade
Coreq: LDAR 6706, and LDAR 6740 or LDAR 6745.

LDAR 6711 - Advanced Graphics Landscape Architectural (3 Credits)
Focuses on developing practical and applied expertise in various manual and digital visualization and representation techniques and media used for enhanced effectiveness in visual communication. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6712 - Green Roofs/Living Systems (3 Credits)
The primary objective for this seminar is to give students a general understanding of green roof systems, vegetated roofs above underground architecture and vertical vegetated systems. The seminar will engage in critiques and discussions using international, national and local case studies, covering history, typologies, function, design, master planning and costs. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6720 - Finding Common Ground (3 Credits)
Focuses on principles and societal variables that influence the structure of urban neighborhood space through research application. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6722 - Contested Terrains (3 Credits)
Explores the different processes, factors and forces that determine and influence occupation, land use and built form through the phenomena of conflict and contestation. Design is inherently located within the disputes and discourses involving landscape as location and resource. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6723 - Cinema and the Landscape (3 Credits)
Explores the relationships between landscape and film through theoretical and practical investigations. Explores film’s roles in understanding and investigating landscapes, their dynamic qualities and processes, and issues related to film’s capacity to construct spatial meaning. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6724 - American Landscapes (3 Credits)
Historical, theoretical and critical evaluation of the development of American landscapes. May cover the economic, philosophical and social trends behind changes in the landscape as well as the intellectual and contextual changes to the theory and practice of landscape architecture. Prereq: LDAR 5521 Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6725 - Design Communications (3 Credits)
In this seminar students will learn research and writing skills to produce articles in clear, readable, and substantial prose, from academic criticism to general interest reviews; writing forms and styles, including essays, reports, award applications and writing for oral presentation; and editing basics. Prereq: History and/or theory of landscape architecture or architecture. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6735 - The Landscape of Food (3 Credits)
An examination of the reciprocal relationships between landscapes and patterns of food production, distribution, and consumption. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6740 - Advanced History/Theory Seminar - Immersive Semester (3 Credits)
Investigates topical issues in landscape architecture history/theory, process and methods within the framework of themes/issues running through the immersive semester course of study. Coreq: LDAR 6706.
Restriction: Restricted to graduate CAP students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: LDAR 6706. Restriction: Restricted to graduate CAP students.

LDAR 6741 - Urban Design Process (3 Credits)
Advances current practice by exploring innovative methods of design analysis, production, representation, and communication. Community participation and civic engagement are integral components of the seminar. Cross-listed with URBN 6641 and URPL 6398. Restrictions: Restricted to Graduate level students in the college of Architecture and Planning. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate Level students in the College of Architecture and Planning.

LDAR 6745 - Advanced Media/Technology Seminar - Immersive Semester (3 Credits)
Advances landscape architectural practice by exploring innovative methods of design analysis, production, representation, and communication. Community participation and civic engagement are integral components of this seminar aligned with the immersive studio core track. Coreq: LDAR 6706. Restriction: Restricted to graduate CAP students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: LDAR 6706. Restriction: Restricted to graduate CAP students.

LDAR 6750 - Professional Practice (3 Credits)
Explores the essential elements of professional practice and equips students with the fundamental knowledge and skills requisite to understand and participate in this practice. Covers office organization, project management, contracts, professional ethics and non-traditional careers. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6755 - Urban Housing (3 Credits)
This course examines housing trends and patterns; supply and demand factors; housing policies; housing challenges (e.g., inequitable distribution, special needs, segregation/discrimination, and homelessness); sociological, demographic, and economic considerations; and the roles of planners and the public and private sectors. Cross-listed with ARCH 6205 and URPL 6405. Restriction: Restricted to graduate students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

LDAR 6840 - Independent Study (1-3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to landscape architecture or urban design. Restriction: Graduate level students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

LDAR 6850 - GIS Capstone (3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to GIS. Serves as Capstone for LA GIS certificate. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

LDAR 6930 - Landscape Architecture Internship (3 Credits)
This experiential learning course provides students the opportunity to participate in and reflect on the practice of landscape architecture by working in a design office. Students will reflect on and critically analyze issues such as leadership, management and collaboration. This course may only be taken once during a student's academic career and is to be taken after the first year of graduate study. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Graduate level students.

LDAR 6949 - Research Tools & Methods (3 Credits)
Introduces students to research in landscape architecture and related fields and disciplines. Provides students with research practices, methods, and methodologies and a critical framework to identify suitable approaches based on diverse projects and contexts. Supports studio, independent study and thesis. Restriction: Restricted to graduate students. Cross-listed with ARCH 6473. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
Typically Offered: Fall.

LDAR 6950 - Thesis Research (3 Credits)
Student works closely with a landscape architecture faculty advisor and thesis committee to develop the thesis through focused research. Research might entail both written and graphic inquiry leading to specific products with conclusive ideas setting the stage for final thesis. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restriction: Graduate level students.
Additional Information: Report as Full Time.

LDAR 6951 - Landscape Architecture Thesis (6 Credits)
The Landscape Architecture thesis is expected to advance the field of landscape architecture by offering new insights into aspects of design, technology, history or professional principles. In this course, the student continues to work independently, but closely with a landscape architecture faculty advisor and thesis committee to complete the thesis. The thesis might take on different final forms (written volume, drawings, maps, digital images), depending on the subject inquiry. For further information on the Landscape Architecture Thesis Track consult the Landscape Architecture Thesis Guidelines. Restriction: Graduate level students. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Graduate level students.
Additional Information: Report as Full Time.
Latin (LATN)

LATN 5880 · Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

Learning, Developmental and Family Sciences (LDFS)

LDFS 5110 · Human Learning (3 Credits)
A review of the research on human learning, including related topics such as information processing and motivation. Various theories of learning are examined in-depth, and their applications to teaching and practices in schools (and in other educational settings) are considered. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 5240 · Cognition and Instruction (3 Credits)
Explores recent developments in cognition and their implications for instructional practices. Includes theory and research in cognitive psychology and resultant educational practices. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 5260 · Child Study and Observation (3 Credits)
Involves extensive, systematic observation of young children. Recorded observations are analyzed in terms of child development theories, children's background, setting variables, and are then presented in written and elaborated form. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 5840 · Learning, Developmental and Family Sciences Independent Study (1-6 Credits)
Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

LDFS 5930 · Learning, Developmental and Family Sciences Internship (2-4 Credits)
Field-based experiences in settings (schools, businesses, governmental agencies, special projects) that are linked closely to the student's professional objectives. Requires a minimum of 150, 225 or 300 clock hours under supervision (two-four credit hours, respectively). Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

LDFS 6100 · Advanced Child Growth and Development (3 Credits)
Systematic study of the major theories of child growth and development. Focuses on current research regarding infants and children and the implication of such research for education. Cross-listed with LDFS 7100. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6140 · Social Contexts of Adolescence and Schooling (3 Credits)
Systematic study of the major theories of adolescent growth in social contexts, emphasizing the social and cultural construction of the adolescent experience. Focuses on current research regarding adolescents and the implications of the research for education. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6200 · Human Development Over the Life Span (3 Credits)
An inquiry into the experience and meaning of human development over the full span of life. Both analytical and reflective modes of exploration are utilized to approach the study of personhood and the courses and themes of life. Cross-listed with LDFS 7200. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6220 · Adult Development (3 Credits)
Surveys theories and principles of adult development through an ecological perspective with an emphasis on community and educational contexts. Cross-listed with LDFS 7220. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6320 · Mind, Brain, and Education (3 Credits)
An introductory survey into contemporary theory and research in developmental cognitive neurosciences and their potential applications to education, aiming to explore how the brain learns, and what it means for learning and development. Max Hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 6400 · Observation, Documentation and Assessment (3 Credits)
This course focuses on developing competencies in observation, documentation, and assessment to inform understandings about children and teaching. Students will draw from child development and ecological theories to observe children's assets, then interpret and analyze how children learn and develop. Max Hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 6410 · Social Foundations of Family and Community (3 Credits)
In this course, students of early childhood education will learn to think and act reflectively, critically, and socially, informed by the roles of families and communities of young learners. Course readings, observation, documentation, and reflection provide foundations for the development of relational perspectives on social justice. Max Hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 6420 · The Environment as the Third Teacher (3 Credits)
This course will provide students with an understanding of the relationship between the Learning Sciences and Reggio-Inspired practices, and how this relationship can be applied to the design of engaging and dynamic learning environments. Max Hours: 3 Credits.
Grading Basis: Letter Grade
LDFS 6600 - Motivation in Contexts (3 Credits)
Theories of human motivation are examined through social and cultural lens directed at phenomena of engagement and disengagement in activities at different levels of scale. Applications are considered for both educators and learners in various social and cultural learning contexts. Cross-listed with LDFS 7600. Max hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 6750 - Designing Environment for Learning and Development (3 Credits)
Introduction to concepts, findings, and research methods relevant to theory and research in the Learning Sciences, with specific focus on how those concepts and findings apply to design learning across settings.
Max Hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 6840 - Learning, Developmental and Family Sciences Independent Study (1-6 Credits)
Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

LDFS 6910 - Practicum Reflections on Learning (3 Credits)
This course focuses on the pursuit of praxis within the student teacher residency. Reflection on course resources, engagement in ongoing processes of documentation, and reflection within a small group meeting format drive social construction of knowledge about learning and development. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP

LDFS 6950 - Culminating Capstone Experience (3 Credits)
This course provides a learning environment for students to complete an applied project/thesis in education and human development contexts as part of their final capstone experience in the Master’s in Learning, Developmental and Family Sciences. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.

LDFS 7100 - Advanced Child Growth and Development (3 Credits)
Systematic study of the major theories of child growth and development. Focuses on current research regarding infants and children and the implication of such research for education. Cross-listed with LDFS 6100.
Max hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 7120 - Family Dynamics (3 Credits)
Review and analysis of issues related to families with exceptional or at-risk young children. Topics include coping skills, family involvement, parent-child interaction, and sources of support. Special attention is given to current research and its application to early intervention.
Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

LDFS 7140 - Advanced Studies in Youth Development (3 Credits)
Systematic study of the current research and major theories of youth growth, emphasizing the social and cultural construction of the youth experience. Focuses on current theories and research regarding youth within contemporary social structures in multidisciplinary perspectives.
Max hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 7200 - Human Development Over the Life Span (3 Credits)
An inquiry into the experience and meaning of human development over the full span of life. Both analytical and reflective modes of exploration are utilized to approach the study of personhood and the courses and themes of life. Cross-listed with LDFS 6200. Max hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 7220 - Adult Development (3 Credits)
Surveys theories and principles of adult development through an ecological perspective with an emphasis on community and educational contexts. Cross-listed with LDFS 6220. Max hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 7600 - Motivation in Contexts (3 Credits)
Theories of human motivation are examined through social and cultural lens directed at phenomena of engagement and disengagement in activities at different levels of scale. Applications are considered for both educators and learners in various social and cultural learning contexts. Cross-listed with LDFS 6600. Max hours: 3 Credits.
Grading Basis: Letter Grade

LDFS 7712 - Learning and Human Development (3 Credits)
Students apply major theories from learning and human development theories to problems of practice and research related to education and community contexts. Restriction: Restricted to EDHD-PhD, LDRE-EdD, and SPSY-PsyD majors within the School of Education and Human Development. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD, LDRE-EdD, and SPSY-PsyD majors within the School of Education and Human Development.

LDFS 7840 - Learning, Developmental and Family Sciences Independent Study (1-6 Credits)
Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

Literacy, Lang, & Culturally Responsive Teaching (LCRT)

LCRT 5000 - Elementary Literacy Instruction and Assessment Part 1 (3 Credits)
This course develops an appreciation, understanding, and application of literacy assessment and instruction in PK-6 classrooms. Interns learn how to use various types of assessment and instruction for reading and writing that address the literacy needs of PK-6 Students. Cross-listed with LCRT 4000. Restriction: Restricted to students in the Teacher MA, ECE Licensure or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: TCHR-MA, BMA, ECSE-LICG, ECSO-LICG, SPCE-ENDG and SPCO-ENDG.

LCRT 5001 - Elementary Literacy Instruction and Assessment Part 2 (3 Credits)
This course develops an appreciation, understanding, and application of literacy assessment and instruction in PK-6 classrooms. Interns learn how to use various types of assessment and instruction for reading and writing that address the literacy needs of PK-6 Students. Cross-listed with LCRT 4001. Prereq: LCRT 4000 or LCRT 5000. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: LCRT 5000 or LCRT 4000. Restriction: TCHR-MA plan or BMA subplan.
LCRT 5020 - Reading Development, Instruction and Assessment (3 Credits)
This course involves critical examination of reading process and instruction. Teachers develop an understanding of the principles of sociopsycholinguistic theory in learning and teaching. Organization options for reading instruction for native and non-native speakers of English at all ages and ability levels will be examined. Teachers become familiar with materials and methods used for reading and reading instruction in schools, including multicultural materials, students’ interaction with and response to materials, and techniques to assess and evaluate students reading. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5028 - Developing Strategic Readers, Grades 4-12 (3 Credits)
Focuses on supporting adolescents' developing literacy understandings especially related to vocabulary, reading comprehension, writing, and student engagement across all content areas in the upper elementary grades through high school. Importance is placed on putting new teaching practices in place. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5029 - Developing 21st Century Literacy Curriculum, Gr 4-12 (3 Credits)
Focuses on adolescents' developing literacy understandings across all content areas upper elementary grades through high school. Attention is given to comprehension and critical thinking including assessment, unit planning, problem-based learning, research cycles, technology, and putting new teaching practices into place. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5055 - Literacy Assessment & Informed Instruction (3 Credits)
Focuses on reading, writing, and language assessments and their use to plan and deliver informed classroom and intervention instruction. Principles of literacy assessment, state and federal law, instructional strategies and interventions are learned through creation of student literacy profiles. Needs of both L1 and L2 learners as well as other diverse learners are considered. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5100 - Secondary Literacy Instruction and Assessment (3 Credits)
Provides knowledge and practice in using specific literacy methods to enhance students’ content learning and literacy development in middle schools and high schools. Various methods of literacy assessment to guide instruction for students are emphasized. Instructional strategies for special populations, especially speakers of English as a second language, are also addressed. Cross-listed with LCRT 4100. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.

LCRT 5150 - Culturally Relevant & Responsive Pedagogies (3 Credits)
Provides an examination of broad cultural diversity regarding the role of culture in teaching and learning in the classroom. After examining their educational contexts, students gain skills to differentiate instruction for diverse learners; foster quality instruction that demonstrates respect for cultural pluralism; and, create equitable educational environments. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5200 - Theory and Methods of English Education (3 Credits)
Focuses on teaching and learning theories and practical classroom strategies for teaching English Language Arts to students in middle school and high school. Cross-listed with LCRT 4200. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5201 - Adolescent Literature (3 Credits)
Reading and evaluating fiction and non-fiction appropriate for students in middle and senior high school. Emphasis is on modern literature. Cross-listed with LCRT 4201. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5210 - Literacy Development Pre K-3rd Grade (3 Credits)
Focuses on children's developing literacy understandings and proficiencies beginning in the preschool years. Attention is given to language development, assessment, and instruction in pre-kindergarten through third grade, partnerships with community literacy institutions provide information on their use for literacy development. Cross-listed with LCRT 4210. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5220 - Literacy Routines and Assessment, Pre K-3rd Grade (3 Credits)
This course will focus on the routines and practices which allow for student specific instruction and assessment in the Early Literacy classroom. Participants will examine and critique current literacy routines and assessments needed to best meet the needs of culturally and linguistically diverse children. Cross-listed with LCRT 4220. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5230 - Early Literacy Instruction (3 Credits)
Participants will examine Pre K-3rd grade literacy instruction to understand how to meet the needs of young students. The course will analyze instructional practices for young gifted, special needs and English language learning students to best meet the needs of all learners. Cross-listed with LCRT 4230. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5310 - Literacy Assessment & Processing: Guided Reading (3 Credits)
The course will explore the format and components of Guided Reading Plus, including: responsive teaching, summative and formative assessment, content/language objectives, oral language development, strategies for problem solving, comprehension, fluency, word solving strategies, and the reciprocity of reading and writing. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5320 - Teaching Students with Reading Difficulties (3 Credits)
The course will explore specific teaching moves that help children build an effective literacy processing system and become independent readers. We will study areas of reading difficulty and ways of assessing students to determine their strengths and instructional needs. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5330 - Deepening Literacy Understandings (3 Credits)
This will explore the power of formative assessment for observation and interpretation of reading behaviors. We will study the continuum of literacy learning as a foundation for learning the behaviors and understandings that must be taught at each text level. Max hours: 3 Credits.
Grading Basis: Letter Grade
LCRT 5710 - Primary Literacy for Diverse Learners, Pre-K-Grade 3 (3 Credits)
This course provides teachers with a basic understanding of reading and writing development in preschool and early primary grades, while considering specific strategies for using and teaching reading and writing in early primary grades (pre-K-3). This course is cross-listed with LCRT 4710. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5720 - Writing Development, Instruction and Assessment (3 Credits)
This course combines examination of current research into effective practices of teaching writing with students' own writing projects. The curriculum serves teachers in all subjects and grades K-12. Readings, groupings, and discussions are differentiated according to specific grade(s) taught. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with LCRT 4720. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5724 - Colorado Writing Project I (4 Credits)
Teachers will experience participating in writers' workshop, writing several pieces, taking them through revision and workshop groups. Teachers will also read, discuss, and respond to texts about teaching writing and preparing students to take state writing tests. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

LCRT 5726 - Colorado Writing Project II (4 Credits)
Teachers will experience participating in writers' workshop, writing several pieces, taking them through revision and workshop groups. Teachers will also read, discuss, and respond to texts about teaching writing and preparing students to take state writing tests. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

LCRT 5728 - Colorado Writing Project III (4 Credits)
Teachers will experience participating in writers' workshop, writing several pieces, taking them through revision and workshop groups. Teachers will also read, discuss, and respond to texts about teaching writing and preparing students to take state writing tests. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

LCRT 5730 - Language and Literacy Across the Curriculum (3 Credits)
Explores the value and use of reading and writing as tools for learning across the curriculum on a K-12 basis. Specific needs and strategies for assisting at-risk and second language learners are also discussed. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5750 - Children's Literature in Spanish (3 Credits)
Taught in Spanish, this course presents children's literature from Spanish speaking countries and Spanish speaking authors, along with teaching methodologies and avenues of further research in the field. Prereq: senior-level proficiency in Spanish. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5770 - Effective Literacy Instruction for Diverse Learners (3 Credits)
Focuses on exploring, applying, and evaluating research-based instructional models and learning strategies for teaching literacy to diverse learners. Students develop a professional practice of providing instruction to support oral language, academic reading, and academic writing for native speakers of English, multilingual and bidialectal learners of English. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5780 - Connecting Cultures Through Literature (3 Credits)
This course looks at the issue of multicultural literacy for K-8th grade and how children's and young adult literature can be used to create a high quality multicultural curriculum which enhances literacy development and covers all the content areas. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5790 - Children's Literature: Grimm through Graphic Novels (3 Credits)
Children's literature course exploring the historical development of children's literature and its influence on contemporary literature and media. Emphasized are various genre including both fiction and nonfiction, choosing and critiquing children's literature, and children's book awards. Graphic novels and e-books are explored as the leading edge of this area. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5795 - Current Children's Literature (3 Credits)
This course explores children's literature, including electronic books, within the past decade. A wide range of genres will be explored with a particular emphasis on newer authors and illustrators in the field. Participants will also practice critiquing children's literature and selecting books for instruction. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5810 - Oral & Written Language & Literacy (3 Credits)
Focuses on oral/written language and literacy in educational and home settings. Addresses learners with native English, English as additional language, bi-dialectal, and multilingual. Students analyze language and literacy samples using language structures and discourse patterns to develop instructional techniques. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5815 - Family Literacies in Diverse Communities (3 Credits)
Focuses on involving and connecting with families and communities of classroom learners. Students gain practical strategies to identify resources and funds of knowledge that diverse learners and families bring to schools; and, use learners' cultural resources and references to promote all aspects of learning in the classroom. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 5831 - Assessment for Early Literacy Interventions (2 Credits)
This assessment course will provide background in literacy acquisition and prepare participants to administer early literacy assessment tasks which will be used to inform teaching decisions and progress monitor student growth through the Early Literacy Intervention program. Max hours: 2 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

LCRT 5835 - Special Topics: Literacy and Language (0.5-3 Credits)
Specific topics vary but will include the exploration of literacy development and instruction in particular populations or with specific focuses. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Management (MGMT)

MGMT 5800 - Special Topics in Management (3 Credits)
A number of different topics in management are offered under this course number. Consult the Schedule Planner for current course offerings. Prerequisites vary depending on the topic and instructor requirements. Cross-listed with MGMT 4950. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

MGMT 5939 - Internship (1-3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Prereq: 21 semester hours and 3.5 GPA. Repeatable. Max Hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.

MGMT 6020 - Leadership in Difficult Times (3 Credits)
The test of a leader often is their ability to lead their organizations through difficult times and crises. Such situations could be downsizing, product defects, ethical violations, a terrorist attack or a natural disaster. Successful management of these situations can strengthen and renew the organization. Inability to manage these situations can tarnish the organization’s reputation and threaten its survival. This course examines leadership under stress and provides frameworks for categorizing and analyzing these difficult situations. The course also addresses strategies that leaders can use to enable their organizations to manage, recover and learn from these difficult experiences. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6028 - Travel Study Topics (3 Credits)
Join your classmates in an international travel study course to understand the business operations of another culture. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6040 - Managing Global Talent (3 Credits)
This course has two objectives: (1) to understand the impact of cultural differences in the management of people in multinational firms; and (2) to compare and contrast critical human resource issues in the contexts of domestic and international operations. Topics include recruitment, staffing, training, performance appraisal, compensation, and labor and management relations in markets around the world. (This course qualifies as an international elective for the MS in International Business program). Restriction: Restricted to graduate Business majors and NDGR majors with a sub-plan of NBA or NBD, within the Business School. Cross-listed with INTB 6040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

LCRT 5840 - Independent Study: LCRT (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

LCRT 5911 - Early Literacy Intervention Practicum (3 Credits)
This is the first of 2 courses of a comprehensive field experience that extends participants' understanding of literacy acquisition by integrating theory and practice and prepares them to implement the Early Literacy Intervention program within a school or district. Max hours: 3 Credits.
Grading Basis: Letter Grade
 Typically Offered: Fall.

LCRT 6740 - Independent Study: LCRT (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

LCRT 6810 - Seminar & Practicum in Literacy and Language (3 Credits)
Provides opportunities for advanced students in the M.A. program to apply concepts acquired in course work and other educational experiences to specific situations. Students will work in schools, classrooms, administrative offices, or community centers (according to their experiences, interests and current teaching positions; sites to be identified before course begins) to study the potential for change in schools and society and to reflect upon their roles as change agents in the field. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 6911 - Seminar and Practicum in Literacy and Language, 7-12+ (3 Credits)
Provides opportunities for advanced students in the M.A. program to apply concepts acquired in course work and other educational experiences to specific situations. Students will work in schools, classrooms, administrative offices, or community centers (according to their experience, interests and current teaching positions; sites to be identified before course begins) to study the potential for change in schools and society and reflect upon their own roles as change agents in the field. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 6910 - Reading Recovery Practicum (4 Credits)
A practicum which refines the participants' understanding of literacy acquisition and finalizes preparation to implement the Reading Recovery Program within their school/district. Max hours: 4 Credits.
Grading Basis: Letter Grade

LCRT 6915 - Seminar and Practicum in Literacy Professional Development (3 Credits)
This final practicum is designed for teachers to enhance their education as reading professionals in two ways. First, by continuing to reflect on and analyze their own and others’ teaching, participants will deepen their understanding of how to assess and design instruction based on the needs of students. Second, through structured coaching activities, participants will improve their skills in providing literacy leadership. Max hours: 3 Credits. Max hours: 3 Credits.
Grading Basis: Letter Grade

LCRT 6950 - Master’s Thesis (4 Credits)
Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
MGMT 6320 - Leading Organizational Change (3 Credits)
The course focuses on the tasks and skills of a leader that are important for leading organizational change. Topics include: diagnosing problems, creating urgency, building the change team, creating a vision, implementing change strategies, sustaining the momentum and making change stick. These tasks and skills are studied in various change contexts. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6360 - Designing Effective Organizations (3 Credits)
Examines how to design organizations within the context of environmental, technological, and task constraints. The emphasis is on learning how to recognize and correct structural problems through the analysis of existing organizations in which the students are involved. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6380 - Managing People for Competitive Advantage (3 Credits)
Focuses on the management of human resources in organizations. Oriented toward the practical application of human resources management principles in areas such as: equal employment opportunity, affirmative action, human resources planning, recruitment, staffing, benefits and compensation, labor relations, training, career management, performance management, and occupational health and safety. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

MGMT 6420 - Ethics: A Formula for Success (3 Credits)
Students will learn how to spot and address red flags that foster unethical behavior in both publicly-traded and privately-held businesses. Governance and stakeholder management techniques that incentivize ethical behavior will be highlighted using examples of companies that are financially successful by "doing the right thing." Principle-based ethics are emphasized, namely, integrity, trust, accountability, transparency, fairness, respect, viability, and compliance with the rule of law. Cross-listed with MGMT 3420, ISMG 6885, and ISMG 4785. Restriction: Restricted to graduate business school students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business school students.

MGMT 6610 - Business Strategy Lab (3 Credits)
Gain strategy experience collaborating with and consulting to Senior Executives of a client company. This is a hands on, project-based course. Students will analyze a strategic initiative as defined by and with the organization's leadership and provide their client with research, insights and actionable strategic ideas. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6620 - Strategic Management (3 Credits)
Concerned with the development of a general management perspective in establishing the strategic direction for an enterprise. Students gain an understanding of strategy formulation and implementation within the context of the global environment. Cross-listed with BUSN 6710. Restriction: Restricted to graduate majors of ORMG within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors of ORMG within the Business School.

MGMT 6710 - HR: Talent MGT (3 Credits)
This course explores the many aspects of Talent Management including strategic talent planning, recruiting and acquisition, employee development, performance management, engagement and retention, succession planning, and compensation, with a strong focus on recruitment and acquisition. The course demonstrates how each aspect of Talent Management is interdependent. Prereq: MGMT 6380. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MGMT 6380 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6720 - Human Resources Management: Training (3 Credits)
Covers training methods, theories, research findings. Students design and deliver their own training program, including collecting and analyzing metrics to gauge training success. Coreq: MGMT 6380. Cross-listed with MGMT 4430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-req: MGMT 6380 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6730 - Human Resources Management: Performance Management (3 Credits)
Focuses on the design and implementation of human resources management systems to assess and enhance employee performance. Areas of study include performance measurement, rater training, goal setting and feedback. Prereq: MGMT 6380. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MGMT 6380 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6740 - Human Resources Management: Compensation (3 Credits)
Develop and administer pay systems considering economic and social pressures, traditional approaches and strategic choices in managing compensation. Current theory research and practice. Students design a compensation strategy and a system that translates that strategy into reality. Prereq: MGMT 6380 and BUSN 6530. Cross-listed with MGMT 4450. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6530 and MGMT 6380 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6750 - HRM: Investing in People: HR Analytics (3 Credits)
Managing talent-organization and deployment-and connections between talent and strategy in organizations. Rooted in a systematic, logical approach that challenges traditional ideas. Stresses the logical connections between progressive HR practices and firm performance and the use of data to demonstrate financial impact of the connections. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
MGMT 6760 - Employee Benefits and Workforce Risk Management (3 Credits)
The course surveys an array of popular employee benefit programs to attract, protect, and retain valued employees. It also focuses on risk management programs that invest in human capital and address the downside risks of employing a workforce. Cross-listed with MGMT 4460 and RISK 4409/6409. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6781 - Human Resources Management: Career and employment coaching (3 Credits)
Focuses on enhanced approaches to discovering employment opportunities and providing career coaching, with an emphasis on unemployed veterans. Topics include discovering the unique capabilities a job-seeking veteran possesses, addressing the barriers to employment he or she may face, and methods the job seeker can use to educate prospective employers about the contributions to organizational success he or she can make. Cross-listed with MGMT 4481. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6782 - Human Resources Management: Connecting talent with business needs (3 Credits)
Focuses on methods for connecting businesses and public-sector organizations with job seekers who possess the capabilities that will fuel profitable growth and mission success. Topics include networking to establish relationships with hiring decisions makers, exploration conversations to identify an organization's success factors, and identifying job seekers (with a special emphasis on unemployed veterans) with the requisite skills, knowledge, traits, and aptitudes. Cross-listed with MGMT 4482. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6806 - Special Topics in Management (3 Credits)
Current topics in management will be occasionally offered. Consult the 'Schedule Planner' for specific offerings or contact an advisor for information. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6801 - Career Strategies (3 Credits)
The downsizing, restructuring, and re-engineering so prevalent in U.S. industries and companies have strongly affected the job and career market. Every individual must sharpen his/her competencies and skills in order to compete effectively in the changing job market. This course is designed to assist students in understanding and operating in this difficult job market. Using many of the concepts that organizations use in their strategy formulation process, and coupled with individual techniques and skills proven effective in job searches and career planning, this course prepares students to deal with the issues involved in finding a job and pursuing a career. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6803 - Visionary Leadership (3 Credits)
Examines the challenges faced by visionary leaders and the approaches used by these individuals (creation, articulation, and implementation of vision) to transform organizations. Participants utilize these approaches employed by effective leaders to develop plans for their own organizational success. Group experiences, applied readings, and videos are used to clarify the opportunities available. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6804 - Negotiation and Conflict Management. (3 Credits)
Designed as a seminar in negotiation and conflict management. Students will practice and develop negotiation and conflict management skills as they use them to craft deals and resolve differences. Students will learn how negotiation and conflict management strategies and tactics vary depending on the situation encountered. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6806 - Corporate Entrepreneurship (3 Credits)
Competitive performance in a global economy requires continuous innovation and new business growth. The creation and development of new ventures is a primary strategy for internally-generated growth. Managing innovation and new ventures requires attitudes, knowledge, and practices different from those usually required for the management of mature business units. This course provides the perspective, knowledge, and specific skills required for successful entrepreneurial management. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6808 - Leadership Development (3 Credits)
Instruction in the design and practice of leadership development. Case studies of effective organizations will be examined and a variety of assessment and development activities will be completed as part of the course. Students will learn how to develop others while experiencing the development techniques first hand. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
MGMT 6820 - Management Field Studies (3 Credits)
The objective of this course is to provide an opportunity for the in-depth examination of an actual management problem in a local organization. Much like an independent study conducted under faculty guidance, each student will execute a unique project suited to his or her interests. Priority is given to MGMT students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6821 - Managing for Sustainability (3 Credits)
This course will consider how companies are using social responsibility as a competitive advantage. The so-called green revolution is calling for organizations to take on increasing responsibility for environmental conservation, employee well being, and community development. This course considers how organizations can work with various stockholders (employees, customers, communities, society-at-large) to develop and promote mutually beneficial products and solutions to key social needs and concerns. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6822 - Business Ethics and Corporate Social Responsibility (3 Credits)
Covers business ethics and corporate social responsibility in the global contexts of employment, marketing, product liability, the environment and other areas. Students compare ethical theories, including utilitarianism, Kantian, Rawlsian, stockholder, stakeholder and social contract and apply some or all of these theories to actual and hypothetical case studies. The doctrine of corporate social responsibility is defined and explored and diverging views of corporate social responsibility are discussed. Examples of how corporate social responsibility can increase a company's goodwill and net income are analyzed. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6823 - The Sustainable Business Opportunity (3 Credits)
This course examines the negative impact of a rapidly growing global economy on the natural and human environment. It shows that the need to create a more sustainable global economy represents a huge opportunity for business and how sustainability-based strategies drive innovation, competitive advantage and improved financial performance. It will examine both environmental aspects of sustainability like green supply chains, lifecycle analysis, energy and water efficiency, as well as initiatives that nurture and enhance the value of our human resources such as community development, employee and customer relations, employee wellness, telecommuting, and other stakeholder engagement in sustainability. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Typically Offered: Fall, Spring.

MGMT 6824 - Sustainable Business/CSR Field Study (3 Credits)
Gain practical, hands-on experience with aspects of sustainable business and/or corporate social responsibility. Work with a local company/non-profit/or government organization under the direction of an executive to conduct a sustainability-focused project which is important to the organization's sustainability initiative. Prereq: Completion of one or more sustainability focused courses or permission of instructor. Cross-listed with MGMT 4824. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre: ACCT 6285 or BUSN 6826 or 6830 or 6850 or 6870 or DSCI 6826 or BANA 6730 or ENTP 6642 or 6644 or 6808 or 6858 or 6860 or INTB 6870 or MGMT 6821 or 6822 or 6823 or MKTG 6830
Restriction: Grad and NDGR majors with a sub-plan of NBA within the Business School.
Typically Offered: Fall.

MGMT 6825 - Sustainable Change Leadership: Turning Business Into a Force for Good (3 Credits)
This course develops leadership from the perspective of managing the people side of change required to transform a traditional business to one that is not only financially successful but also a genuine "force for good" for our natural and social environment. The B Lab Impact Assessment tool is used to measure, monitor, and link sustainable business practices to drive continuous improvement and innovation. Students will conduct hands-on, practical work with local businesses to develop change leadership skills as they relate to sustainability. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with MGMT 4825. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

MGMT 6826 - Business for a Better World (3 Credits)
Introduces the main concepts and tools of sustainable business, such as life-cycle analysis, circularity, Context-based sustainability, carbon footprinting, market failure, closed-loop systems, DfE (Design for the Environment), corporate sustainability reporting, then examines how companies can move from doing less bad to making the world better. Note: Typically offered in the Fall. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6827 - Global Climate Change (3 Credits)
Global climate change may be one of the most important challenges facing business in the 21st century. This course will introduce the potential impacts of climate, then discuss possible regulatory responses to and business risks and opportunities that may emerge if climate change occurs. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
MGMT 6830 - Sports and Entertainment Management (3 Credits)
This course is designed as a speaker series of sports and entertainment industry elite focusing on: industry trends, strategic planning, managing revenue streams, managing media, managing for effectiveness, managing post-merger integration, leadership and leading change. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6832 - Law and Negotiation in the Sports/Entertainment Industries (3 Credits)
Provides an overview of major legal issues in the sports and entertainment industries. Students develop the skills required to negotiate contracts in these industries. Topics include contracts with athletes (agency, player and sponsorship), stadium financing and sports franchises, labor law and collective bargaining agreements, entertainment contracts in the music, film and live theater fields and copyright, trademark and tort law principles in the sports and entertainment industries. The Digital Conference constitutes the classroom portion of the course and the remainder is completed via additional reading & application under the direction of the course Professor. Enrollment is limited so make plans early. Contact the Director of the Marketing Discipline (Vicki.lane@ucdenver.edu) to reserve your spot. Special conference fees apply. Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560 Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD

MKTG 6094 - Marketing Issues in the Chinese Environment (3 Credits)
This course assesses numerous marketing and marketing related topics in the Chinese environment with the objective of helping the graduate student develop managerial and marketing expertise. In specific, the course pinpoints key developments in the Chinese business environment, develops expertise in conducting market opportunity analysis, assesses market entry conditions and strategies and applies marketing mix strategies in the context of the Chinese environment. Note: It is recommended for students to take BUSN 6560 or INTB 6000 prior to this course. Cross-listed with INTB 6094. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MKTG 6200 - CRM, Big Data, and Marketing Metrics (3 Credits)
CRM (Customer Relationship Management) involves the management of customer relationships to maximize customer benefits at minimal cost. It facilitates decision making about marketing strategies and tactics that are informed by the actual financial outcomes of these decisions. This course provides a toolkit of skills that will help in three areas, 1) identifying important marketing metrics, 2) making accurate assessments of metrics, and 3) applying the results to future decisions. Other topics include successful models of CRM, big data, marketing research, customer trust, customer loyalty, customer profitability, and CRM software. Coreq: BUSN 6560. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MKTG 6700 - Marketing Travel Study (3 Credits)
This is a 2-week travel course, designed to focus on the marketing of the specific country we visit. In the past the travel course has been to Spain and Costa Rica, but the country of destination may be different every time (usually offered every other year). While in the country, students will visit companies (such as advertising agencies, marketing research firms, local grocery stores, marketing departments of multinational corporations, etc.), have lectures/discussions on marketing in that country and work on a marketing plan for a local company or not-for-profit organization. Prereq: BUSN 6560 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MKTG 6800 - Topics in Marketing (3 Credits)
Courses offered irregularly for the purpose of presenting new subject matter in marketing. Consult the current 'Schedule Planner' for semester offerings. Prereq: BUSN 6560. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MKTG 6820 - Sports & Entertainment Marketing (3 Credits)
This course focuses on techniques for formulating marketing plans for various types of sports organizations. The course deals with marketing issues particularly germane to sports organizations such as: fans as consumers, fan loyalty, sports pricing, servicescapes, player development and sports sponsorships. This course includes lectures, guest speakers, cases, examinations and student group projects. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
MKTG 6822 - “Fan”tastical Consumers of American Sports and Entertainment (3 Credits)
This course explores the study of consumer behavior via the lens of American Sports and Entertainment. Class occurs while students attend a variety of sports and entertainment performances. Students engage in experiential learning via participant and observation research techniques as they attend live performances of American sports and entertainment. The class will attend and study consumers and fans in a variety of venues (e.g., Baseball, LaCrosse, Fun Run, Hike, Golf, Symphony, Rock Concert Festival, Jazz Concert Festival, American Ninja Warrior filming, Broadway Play, Cirque de Solei, and Museum exhibition). These performances primarily take place in downtown centers, e.g., Pepsi Center, Denver Performing Arts Complex, Coors Field, Sports Authority Field at Mile High, Walk or run through various Denver parks, 16th St. Mall, The Civic Center, the Denver Art Museum. Students will engage in observational and immersive consumer behavior research techniques as part of their experience. They will complete assignments relevant for consumer understanding and business practice. Special fee. Coreq: BUSN 6560. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD

MKTG 6824 - Sales and Negotiation (3 Credits)
This course focuses on developing executive sales skills and techniques, including contract negotiation, account management, and sales force. Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD. Max hours: 3 Credits. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD
Typically Offered: Fall.

MKTG 6826 - The Sports and Entertainment Industry (3 Credits)
This course is designed as a speaker series of sports and entertainment industry elite focusing on: industry trends, strategic planning, management challenges, financing in sports and entertainment business (e.g., stadium/venue financing, sports team valuation, entertainment event guarantee estimation, player/artist salary issues, franchises, and managing disparate revenue streams), and major legal issues in the sports and entertainment industries (entertainment contracts, copyright, trademark and tort law). Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

MKTG 6830 - Marketing and Global Sustainability (3 Credits)
Marketing & Global Sustainability focuses on the role of marketing in sustainable for-profit and not-for-profit companies from a global perspective. The course examines sustainable business practices and trends; green brands, green labels, and greenwashing; socially-conscious and "green" customer segments; innovating for sustainable new products and services; sustainable retailing and supply chains; and sustainability as a competitive advantage. The course will employ a variety of pedagogical techniques including lectures, discussion, guest speakers, case studies, and projects. Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD. Cross-listed with INTB 6830. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD

MKTG 6834 - London Calling: Global Sports & Entertainment Management (3 Credits)
Through 2 weeks of visiting organizations and talking with industry elite in London a broader perspective on the Sports and Entertainment Industry is gained. Students will be asked to do advanced reading, participate in discussions, keep a journal and write a reflection paper at the end of the experience. Site visits (to be confirmed) include: Arsenal Football Club, Premier League, the O2 Arena, NHL and NBA regular season games in London, 2012 Olympics Committee, Formula One, Hollywood Studio-International Finance Office, Theatre, Lord's Cricket Ground, All England Lawn Tennis Club/Wimbledon and the office of the Minister of Sport. Restriction: Restricted to graduate business school students. Cross-listed with MGMT 4834, MGMT 6834, and MKTG 4834. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business school students.
Additional Information: Global Education Study Abroad.
Typically Offered: Summer.

MKTG 6840 - Independent Study (1-8 Credits)
Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Prereq: Permission of instructor. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

Master of Integrated Sciences (MINS)
MINS 5000 - Topics (3-4 Credits)
With prior approval by a candidate’s advisor, an MIS candidate may enroll in an upper division course in science, computer science, mathematics, and complete additional work for graduate credit. Prereq: MIS candidate with 12 hours of upper division (4000 level) or graduate level work completed. Term offered: fall, spring, summer. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Prereq: MIS candidate with 12 hours of approved coursework completed and Program Director approval.
Typically Offered: Fall, Spring, Summer.
MINS 5200 - Research Methods in Interdisciplinary Science (3 Credits)
This course introduces methods used in interdisciplinary research in the physical and natural sciences, mathematics, and computer science and prepares students for developing research-based Master's project/thesis proposals. Topics include the scientific method and ethics, experimental design, data collection and analysis, literature searches, evaluation of scientific literature, scientific writing, and oral presentation. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: Fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MIS Candidate and Program Director approval (consent required).
Typically Offered: Fall.

MINS 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: Fall, Spring, Summer. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MIS Candidate and Program Director approval (consent required).
Typically Offered: Fall, Spring, Summer.

MINS 5880 - Directed Research (1-3 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: Fall, Spring, Summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: MIS Candidate and Program Director approval (consent required).
Typically Offered: Fall, Spring, Summer.

MINS 5939 - Master's Project (1-4 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Coordinator for approval. Prereq: MIS Candidate and Program Director approval (consent required). Term offered: Fall, Spring, Summer. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Prereq: MIS Candidate and Program Director approval (consent required).
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

Math Content Knowledge for Ed (MCKE)

MCKE 5000 - Algebraic Patterns and Functions I (4 Credits)
Systematic study of the core elements of algebra: linear, quadratic, exponential, logarithmic functions and their graphs. Includes modeling using graphing calculators and real world applications. Concepts are linked to other scientific, mathematical, and pedagogical domains. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: permission of project director. Max hours: 4 Credits.
Grading Basis: Letter Grade

MCKE 5004 - Statistics and Probability (3 Credits)
Studies the collection, presentation, and analysis of data; and elements and applications of counting discrete probability. Includes real world applications and technology. Concepts are linked to other scientific, mathematical, and pedagogical domains. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: permission of project director. Max hours: 3 Credits.
Grading Basis: Letter Grade

MCKE 5005 - Geometry (4 Credits)
Systematic study of advanced geometric concepts: history of geometry and measurement, patterns among shapes, 2- and 3-dimensional shapes, constructions, symmetry or transformational geometry. Includes applications and activity-oriented instruction. Concepts are linked to other scientific, mathematical, and pedagogical domains. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: permission of project director. Max hours: 4 Credits.
Grading Basis: Letter Grade

MCKE 5006 - Mathematics of Change (3 Credits)
Systematic study of the application of calculus to the analysis of changing systems in real world applications. Emphasizes the connections that exist between calculus and aspects of middle school curricula. Concepts are linked to other scientific, mathematical, and pedagogical domains. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: this course assumes that students have completed MATH 5000 or equivalent. Prereq: Graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
MCKE 5007 - Discrete Math—Counting the Possibilities (4 Credits)
Systematic study of basic techniques in discrete mathematics and their various applications: permutations and combinations, inclusion or exclusion, pigeonhole principle, graph theory, and recursive pattern solving. Applications to topics such as network analysis and voting theory are stressed. Concepts are linked to other scientific, mathematical, pedagogical domains. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: this course assumes that students have completed MATH 5000 or equivalent. Prereq: Graduate standing. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MCKE 5008 - Discovery and Use of the History of Math (4 Credits)
Systematic study of the people, events, ideas and issues from the history of mathematics, focusing on historical topics that are central to the discipline and teaching of mathematics and emphasizing web research of historical topics of interest. Concepts are linked to other scientific, mathematical, and pedagogical domains. Note: This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Prereq: permission of the project director. Max Hours: 4 Credits.
Grading Basis: Letter Grade

MCKE 5009 - Math Modeling—Using and Applying Math (4 Credits)
Systematic study of math modeling using algebra, geometry, discrete mathematics, rates of change, and statistics to solve real-world problems in areas such as finance, biology, economics, and physics. Concepts are linked to other scientific, mathematical, societal, and pedagogical domains. This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: this course assumes that students have completed MATH 5009 or equivalent. Prereq: Graduate standing. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MCKE 5018 - Topics in Mathematics Education for Teachers (0.3-50 Credits)
Topics vary from semester to semester. Designed for professional mathematics teachers. This course will not count towards a degree in Applied Mathematics. Consent of the instructor required for enrollment. Repeatable. Max Hours: 50 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 50.

MCKE 5140 - Introduction to Modern Algebra (3 Credits)
Studies the fundamental algebraic structures used in modern mathematics. Topics include groups, rings, fields, and polynomials. Note: This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: this course assumes that students have completed MATH 3000 or equivalent. Prereq: Graduate standing. Cross-listed with MATH 4140. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

MCKE 5210 - Higher Geometry I (3 Credits)
Studies the foundations of modern geometry by examining axiomatic systems for various geometrics, with an emphasis on non-Euclidean hyperbolic geometry. Note: This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: this course assumes that students have completed MATH 3000 or equivalent. Prereq: Graduate standing. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with MATH 3210. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MCKE 5310 - Introduction to Real Analysis I (3 Credits)
Calculation of one variable, the real number system, continuity, differentiation, integration theory, sequence and series. Note: This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: this course assumes that students have completed MATH 2421 and MATH 3000 or equivalent. Prereq: Graduate standing. Cross-listed with MATH 4310. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

MCKE 5408 - Applied Combinatorics (3 Credits)
Introduces discrete structures and applications of graph theory to computer science, engineering, operations research, social science, and biology. Topics include connectivity, coloring, trees, Euler and Hamiltonian paths and circuits, matching and covering problems, shortest route and network flows. Note: This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: this course assumes that students have completed MATH 3000 or equivalent. Prereq: Graduate standing. Cross-listed with MATH 4408. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MCKE 5409 - Applied Graph Theory (3 Credits)
Introduces discrete structures and applications of graph theory to computer science, engineering, operations research, social science, and biology. Topics include connectivity, coloring, trees, Euler and Hamiltonian paths and circuits, matching and covering problems, shortest route and network flows. Note: This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: this course assumes that students have completed MATH 3000 or equivalent. Prereq: Graduate standing. Cross-listed with MATH 4408. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MCKE 5509 - Applied Combinatorics (3 Credits)
Major emphasis is on the probability theory of combinatorial objects, with applications in computer science and engineering. Topics include general counting methods, generating functions, recurrence relations, graph theory, and block design. Note: This course is not applicable toward any degree in the College of Liberal Arts and Sciences. Note: this course assumes that students have completed MATH 3000 or equivalent. Prereq: Graduate standing. Cross-listed with MATH 4409. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MCKE 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special research form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
MTED 5002 - Elementary Mathematics Teaching I (3 Credits)
Prepares elementary teachers to teach mathematics to PreK-6 students while applying principles of the National Council of Teachers of Mathematics to mathematical learning. Teachers explore ways to help all elementary students become flexible and resourceful mathematical problem solvers. Cross-listed with MTED 4002. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.

MTED 5003 - Elementary Mathematics Teaching II (3 Credits)
Develops the mathematical and pedagogical understandings and competence of elementary teachers, focusing on instructional assessment, principles, and practices. Cross-listed with MTED 4003. Prereq: MTED 4002 or MTED 5002. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: MTED 5002 or MTED 4002. Restriction: TCHR-MA plan or BMA subplan.

MTED 5030 - Theories Of Mathematics Learning (3 Credits)
Develops educators’ knowledge of foundational theories and conceptual frameworks in mathematics education. MTED 5030 and 7030 are cross-listed. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5040 - Mathematics Teaching - Theory and Practice (3 Credits)
Develops educators’ research-based understandings and practices of PreK-12 mathematics teaching and learning. MTED 5040 and 7040 are cross-listed. Repeatable. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

MTED 5050 - Critique Of Mathematics Education Research (3 Credits)
Develops educators’ understanding of various research studies in mathematics education, including research focusing on mathematics teaching and learning, attending to students’ mathematical reasoning, and teaching mathematics for social justice and equity. Increases educators’ competence, confidence and enthusiasm in critiquing research. MTED 5050 and 7050 are cross-listed. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5060 - Developmental Pathways In Students' Mathematical Thinking (3 Credits)
Fosters educators’ development of research-based ways of determining (a) what to look for, (b) how to look for, (c) how to synthesize and report on, and (d) how to incorporate in pedagogy data-grounded inferences about children's mathematical thinking. MTED 5060 and 7060 are cross-listed. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5070 - (Re)Humanizing the Teaching and Learning of Mathematics (3 Credits)
Expands educators’ conceptions of society’s role in determining what counts as mathematics to be taught and learned. Develops understanding of historical and systemic marginalization in mathematics education. Increases abilities to address issues of privilege and oppression that impact students’ opportunities. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5300 - Curriculum and Methods for Teaching Mathematics (3 Credits)
Fosters teachers’ use of task-based mathematics pedagogy, including orchestrating students’ mathematical discourse, to develop mathematics classrooms in which the teacher builds from students’ current understandings, accommodates for students’ differences, and has high expectations for all students. Cross-listed with MTED 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5301 - Assessment and Equity in Mathematics Instruction (3 Credits)
Examines mathematics assessment and equity from both a teacher’s and a student’s perspective. Focuses on assessment as a process, during which a teacher gathers evidence of students’ mathematical knowledge and understanding and then uses that evidence to make instructional decisions. Prereq: Concurrent enrollment in an internship or permission of instructor. Cross-listed with MTED 4301. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5400 - Mathematics for Elementary Teachers (3 Credits)
Key mathematical concepts for K-6 teachers informed by NCTM & Common Core State Standards, such as place-value number systems, rational, proportional, & algebraic reasoning, geometrical concepts, & statistical/probability ideas. Students’ meaningful, enjoyable learning is promoted via problem solving activities. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with MTED 3040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.

MTED 5502 - Rational, Proportional, & Algebraic Reasoning, Geometrical Concepts, & Statistical/Probability Ideas (3 Credits)
Develops K-12 teachers’ understanding of number systems, the ability to foster students’ understanding. Focuses on number, quantity, and operation. Applicable to teaching students at all grade levels in line with the K-12 Common Core Standards. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with MTED 4621. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.

MTED 5619 - Expanding Conceptions of Number: Quantity and Operation (3 Credits)
Teachers’ learning will focus on quantities and operations in place value number systems, how students understand such systems, and how teaching may promote students’ progress. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 5620 - Developing Fractional & Proportional Reasoning (3 Credits)
Teachers’ learning will focus on quantities and operations involved with ratio, fraction, and proportion; and on how students understand ratio, fraction and proportion; and how teaching may promote students’ progress. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

MTED 5621 - A World of (Different) Numbers: Quantity and Operation (3 Credits)
Develops K-12 teachers’ understanding of number systems and the ability to foster students’ understanding. Focuses on number, quantity, and operation. Applicable to teaching students at all grade levels in line with the K-12 Common Core Standards. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with MTED 4621. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.
MTED 5622 - Expanding Conceptions of Algebra (3 Credits)
Develops K-12 teachers' understanding of algebra concepts and the ability to foster students' understanding. Focuses on equivalence, variable, covariation, and function. Applicable to teaching students at all grade levels in line with the K12 Common Core Standards. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with MTED 4622. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.

MTED 5623 - Geometrical Ways Of Reasoning (3 Credits)
Develops K-12 teachers' geometrical reasoning and the ability to foster students' reasoning. Addresses transformation, measurement, classification, objects, imagery, formulas, and investigation. Applicable to teaching students at all grade levels in line with the K-12 Common Core Standards. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with MTED 4623. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.

MTED 5840 - Math Education Independent Study (1-6 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

MTED 7030 - Theories Of Mathematics Learning (3 Credits)
Develops educators' knowledge of foundational theories and conceptual frameworks in mathematics education. MTED 5030 and 7030 are cross-listed. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 7040 - Mathematics Teaching - Theory and Practice (3 Credits)
Develops educators' research-based understandings and practices of PreK-12 mathematics teaching and learning. MTED 5040 and 7040 are cross-listed. Repeatable. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

MTED 7050 - Critique Of Mathematics Education Research (3 Credits)
Develops educators' understanding of various research studies in mathematics education, including research focusing on mathematics teaching and learning, attending to students' mathematical reasoning, and teaching mathematics for social justice and equity. Increases educators' competence, confidence and enthusiasm in critiquing research. MTED 5050 and 7050 are cross-listed. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 7060 - Developmental Pathways In Students' Mathematical Thinking (3 Credits)
Fosters educators' development of research-based ways of determining (a) what to look for, (b) how to look for, (c) how to synthesize and report on, and (d) how to incorporate in pedagogy data-grounded inferences about children's mathematical thinking. MTED 5060 and 7060 are cross-listed. Max hours: 3 Credits.
Grading Basis: Letter Grade

MTED 7840 - Math Education Independent Study (1-6 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

Mathematics (MATH)

MATH 5010 - History of Mathematics (3 Credits)
A history of the development of mathematical techniques and ideas from early civilization to the present, including the inter-relationships of mathematics and sciences. Note: this course assumes that students have mathematical knowledge equivalent to MATH 1401. Prereq: Graduate standing. Not open to students who have had MATH 4010. No credit for applied math graduate students. Cross-listed with MATH 4010. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

MATH 5012 - An Advanced Perspective on Number and Operation (2 Credits)
Advanced study of number and operation, including why the various procedures from arithmetic work and connections to algebraic reasoning. Focuses on using rigorous mathematical reasoning and multiple representations to explain concepts. Note: Does not count toward graduate degrees in applied mathematics. Note: this course assumes that students have taken MATH 3000 or an equivalent course. Prereq: Graduate standing. Cross-listed with MATH 4012. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MATH 5013 - An Inquiry-based Approach to Geometry (1 Credit)
An inquiry-based approach to middle-level and Euclidean geometry. Topics include: polygons and the angle relationships, constructions, Pythagorean theorem and perimeter, area and volume, similarity and congruence, circles. Note: Does not count toward a graduate degree in applied mathematics. Note: this course assumes that students have taken MATH 3000 or an equivalent course. Prereq: Graduate standing. Cross-listed with MATH 4013. Max hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MATH 5014 - Statistical Knowledge for Teaching (1 Credit)
A problem-based statistics seminar aimed at secondary teachers. Topics include: the central limit theorem, the law of large numbers, probability, measures of central tendency and variability, sampling distributions, regression, and hypothesis testing. Note: Does not count toward a graduate degree in applied mathematics. Note: this course assumes that students have taken MATH 3800 or an equivalent course. Prereq: Graduate standing. Cross-listed with MATH 4014. Max hours: 1 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

MATH 5015 - Capstone Course for Secondary Teachers (3 Credits)
High school mathematics from an advanced perspective: analyses of alternative definitions, extensions and generalizations of familiar theorems; discussions of historical contexts in which concepts arose; applications of mathematics. Note: Does not count toward a graduate degree in applied mathematics. Note: this course assumes that students have taken MATH 3210, 4310 and 3140 or equivalent. Prereq: Graduate standing. Cross-listed with MATH 4015. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
MATH 5016 - RM-MSMSP Research Experience for Teachers - Math Cohort (1-6 Credits)
The Research Experience for Teachers (RET) program is a five-week research exploration in which twelve RM-MSMSP teachers will raise their level of relevant mathematics understanding by engaging in a "hands on" workshop, transforming what they have learned into new curricular materials that will improve the mathematics abilities of their students and hopefully stimulate them to consider a STEM career. Note: Credit may not apply toward any CLAS degree. Department consent required. Max hours: 6 Credits.
Grading Basis: Letter Grade

MATH 5017 - Topics in Mathematics for Teachers (0.3-50 Credits)
Topics vary from semester to semester. Designed for professional mathematics teachers. Note: This course will not count toward a degree in applied mathematics. Prereq: permission of instructor. Repeatable. Max Hours: 50 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 50.

MATH 5027 - Topics in Applied Mathematics (3 Credits)
Selected topics in mathematical problems arising from various applied fields such as mechanics, electromagnetic theory, economics and biological sciences. Prereq: Graduate standing in Applied Mathematics, Statistics, or Dual MATH MA/ECON MA, or permission of the instructor. Repeatable. Term offered: fall, spring. Max hours: 18 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 18.
Restriction: Graduate standing in Applied Mathematics, Statistics, or Dual MATH MA/ECON MA.
Typically Offered: Fall, Spring.

MATH 5070 - Applied Analysis (3 Credits)
Metric spaces, uniform convergence, elements of Banach spaces, elements of functions of complex variable. Problem solving and independent proof writing. Review of selected advanced topics in analysis for the PhD preliminary examination. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of two semesters of undergraduate real analysis (e.g., MATH 4310 and MATH 4320). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 5110 - Theory of Numbers (3 Credits)
Every other year. Topics include divisibility, prime numbers, congruences, number theoretic functions, quadratic reciprocity, and special diophantine equations, with applications in engineering. Prereq: Graduate Standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a undergraduate-level course in mathematical proof (e.g. MATH 3000). Cross-listed with MATH 4110. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 5135 - Functions of a Complex Variable (3 Credits)
Infrequent. The complex plane, infinite series and products, elementary special functions, Cauchy-Riemann equations, conformal mapping, complex integration, Cauchy integral theory, and residue theory. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have mathematical knowledge equivalent to two semesters of undergraduate-level real analysis (e.g. MATH 4310, MATH 4320) or to a semester of graduate-level real analysis (e.g., MATH 5070). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5198 - Mathematics for Bioscientists (3 Credits)
Infrequent. Develops mathematical reasoning: introduces linear algebra, discrete structures, graph theory, probability, and differential equations, using applications to molecular biology. Note: No credit for mathematics or engineering students. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have mathematical knowledge equivalent to two semesters of calculus (e.g., MATH 1401, MATH 2411). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5310 - Probability (3 Credits)
The course covers axioms of probability, combinatorial probability, conditional probability, random variables (discrete, continuous, and multivariate), expected value (mean, moments, variance, covariance, etc.), limit theorems (laws of large numbers, Central Limit Theorem), Poisson processes and Markov chains. Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Fall.

MATH 5320 - Statistical Inference (3 Credits)
Methods for constructing sampling distributions; sufficient, minimal sufficient, ancillary and complete statistics; methods for constructing and evaluating point estimators; estimator optimality; methods for constructing and evaluating hypothesis tests; methods for constructing and evaluating confidence interval estimators; asymptotic properties of estimators. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Spring.
MATH 5337 - Intro to Statistical and Machine Learning (3 Credits)
This is an applied, hands-on course in statistical and machine learning. This course will introduce students to the general framework, best practices, model training, and assessment for machine learning methods from the viewpoint of statistics. Both supervised and unsupervised methods are covered including penalized regression, k-nearest neighbors, clustering, and neural networks. Additional machine learning topics such as random forests and support vector machines are included as time permits. Ultimately, students will learn how and why to use a particular method, how to validate and explain the results, and apply the methods to real data. Note: It is recommended that students are comfortable learning a statistical computing language such as R or Python as these will be taught alongside the course material. Students with minimal programming experience should expect to spend more time learning the programming language throughout the course. Prereq: MATH 4387 or MATH 5387 or MATH 4830 or MATH 5830 or BIOL 3763 with a C- or higher. Students who have completed a different statistics course that contains regression and computing may seek instructor permission to enroll. Cross-listed with MATH 4337. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MATH 4387 or MATH 5387 or MATH 4830 or MATH 5830 or BIOL 3763 with a C- or higher.

MATH 5350 - Mathematical Theory of Interest (3 Credits)
Rates of interest, term structure of interest rates, force of interest, yield rate, principal, equation of value, annuity, perpetuity, stocks, bonds, other financial instruments. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate-level course in probability (e.g., MATH 4810). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5351 - Actuarial Models (3 Credits)
Severity models, frequency models, aggregate models, risk measures, ruin theory, construction and selection of empirical models, credibility, simulation. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate-level course in probability and statistics (e.g., MATH 4810, MATH 4820, MATH 3382). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5387 - Applied Regression Analysis (3 Credits)
Topics include simple and multiple linear regression, model diagnostics and remediation, and model selection. Emphasis is on practical aspects and applications of linear models to the analysis of data in business, engineering and behavioral, biological and physical sciences. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of an undergraduate-level course in statistics (e.g., MATH 4820). No co-credit with MATH 4830/5830. Cross-listed with MATH 4387. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Fall.

MATH 5388 - Machine Learning Methods (3 Credits)
Regression, neural networks, clustering, support vector machines, random forests, and other prediction/classification techniques will be used to solve supervised and unsupervised learning problems. This course will connect each topic with the underlying mathematical foundation such as optimization methods and statistical inference. A key focus is deriving the methods and their properties to guide proper application. Students will learn how to apply methods using standard libraries from Python, R, or Matlab. Prereq: Graduate standing in Applied Mathematics or Statistics or in one of the 4+1 BS-MS programs. Cross-listed with MATH 4388. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics or in one of the 4+1 BS-MS programs. (AMEN-MS, AMEN-PHD, STAT-MS, MATH BS-BMA).

MATH 5390 - Game Theory (3 Credits)
Zero-sum and non-zero-sum games; Nash equilibrium and the principle of indifference; Shapley value and other concepts of fair division; Evolutionary game theory, ESS, and evolutionary population dynamics. Applications in economics, business, and biology. Note: this course assumes that students have the equivalent of MATH 2421, 3191 and 3800 or 4810. Prereq: Graduate standing in Applied Mathematics. Cross-listed with MATH 4390. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5394 - Experimental Designs (3 Credits)
Typically Offered: Fall, Spring, Summer.

MATH 5394 - Experimental Designs (3 Credits)
Designs covered will include: completely randomized, complete block, split plot, incomplete block, factorial and fractional factorial designs. Additionally, power and study design for non-experimental studies will be covered. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of an undergraduate-level course in regression analysis (e.g., MATH 4387). Cross-listed with MATH 4394. Term offered: spring of even years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Spring.

MATH 5410 - Modern Cryptology (3 Credits)
Every other year. Deals with the mathematics that underlies modern cryptography. Topics include: classical cryptography, public and private key cryptosystems, secret sharing schemes, authentication schemes, linear feedback shift registers, discrete logarithm and elliptic curve-based schemes. Note: this course assumes that students have the equivalent of a course in linear algebra (e.g., MATH 3191). Prereq: Graduate standing in Applied Mathematics. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 5432 - Computational Graph Theory (3 Credits)
Infrequent. Algorithmic techniques in graph theory and other discrete mathematics areas. Typical topics include: branch-bound algorithms, matching, colorings, domination, min-plus algebra, simulated annealing and related heuristics, NP-completeness theory. Prereq: Graduate standing in Applied Mathematics or permission of the instructor.
Note: This course assumes that students have the equivalent of an undergraduate-level course in graph theory (e.g., MATH 4408). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5446 - Theory of Automata (3 Credits)
Infrequent. Studies the relationships between classes of formal languages (regular, context-free, context-sensitive, phrase-structure) and classes of automata (finite-state, pushdown, Turing machines). Additional topics include decidability and computability issues. Prereq: Graduate standing in Applied Mathematics or permission of the instructor.
Note: This course assumes that students have the equivalent of an undergraduate-level course in abstract algebra (e.g., MATH 4140). Cross-listed with CSCI 5446. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5490 - Network Flows (3 Credits)
Every other year. Begins with the classical min-cost flow problem, defined on an ordinary network. Other problems, such as shortest path, are also shown in this class. Both theory and algorithms are presented. Extensions include generalized networks, nonlinear costs, fixed charges, multi-commodity flows and additional applications, such as in communications networks. Prereq: Graduate standing in Applied Mathematics or permission of the instructor.
Note: This course assumes that students have the equivalent of an undergraduate-level course in linear algebra (e.g., MATH 3191). Term offered: spring of even years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 5576 - Mathematical Foundations of Artificial Intelligence I (3 Credits)
Infrequent. A fundamentals course that complements other approaches, such as in engineering, psychology, and business administration. Here the emphasis is on the mathematical foundations. Topics include logical inference, problem solving, heuristic search, neural nets, analogical reasoning and learning. Models and paradigms also consider different measures of uncertainty. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate course in data structures (e.g., CSCI 2511) and a course in linear algebra (e.g., MATH 3191). Cross-listed with MATH 4576. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5593 - Linear Programming (3 Credits)
A linear program is an optimization problem that seeks to minimize or maximize a linear function subject to a system of linear inequalities and equations. This course begins with examples of linear programs and variations in their representations. Basic theoretical foundations covered include polyhedra, convexity, linear inequalities and duality. Two classes of solution algorithms are given: simplex methods and interior point methods. The primary emphasis of this course is on mathematical foundations, and applications are used to illustrate the main results. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a course in linear algebra (e.g., MATH 3191). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5610 - Computational Biology (3 Credits)
Every other year. Basic introduction and mathematical foundations. Topics include comparative genomics; proteomics; phylogeny; dynamic programming and sequence alignment; gene expression arrays and clustering; Bayesian networks; structure prediction and hidden Markov models. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have some programming experience or the equivalent of a programming course (e.g., CSCI 1410) and linear algebra (e.g., MATH 3191 or 3195). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5660 - Numerical Analysis I (3 Credits)
A first semester course in numerical methods and analysis fundamental to many algorithms encountered in scientific computing, data science, machine learning, and computational models in science and engineering. Rounding errors and numerical stability of algorithms; solution of linear and nonlinear equations; data modeling with interpolation and least-squares; and optimization methods. This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411), linear algebra (e.g., MATH 3191 or 3195), and computer programming (e.g., MATH 1376 or CSCI 1410). Cross-listed with CSCI 4650, 5660, and MATH 4650. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Fall, Spring.

MATH 5661 - Numerical Analysis II (3 Credits)
A second semester course in numerical methods and analysis fundamental to many algorithms encountered in scientific computing, data science, machine learning, and computational models in science and engineering. Numerical differentiation and integration; random numbers and stochastic modeling; Fast Fourier Transform; data compression; eigenvalues and singular value decompositions with application to regression and dimension reduction. This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411), linear algebra (e.g., MATH 3191 or 3195), and computer programming (e.g., MATH 1376 or CS 1410). Cross-listed with MATH 4660, CSCI 4660 and 5661. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.
MATH 5674 - Parallel Computing and Architectures (3 Credits)
In frequent. Examines a range of topics involved in using parallel operations to improve computational performance. Parallel architectures, parallel algorithms, parallel programming languages, interconnection networks, and their relation to specific computer architectures. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a course in numerical analysis (e.g., MATH 4650). Cross-listed with MATH 4674. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5718 - Applied Linear Algebra (3 Credits)
Topics include: Vector spaces, practical solution of systems of equations, projections, eigenvalues and eigenvectors, unitary transformations, Schur QR, singular value decompositions, similarity transformations, Jordan forms, and positive definite matrices. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate-level course in linear algebra (e.g., MATH 3191). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

Typically Offered: Fall.

MATH 5733 - Partial Differential Equations (3 Credits)
In frequent. Initial/Boundary value problems for first-order, wave, heat and Laplace Equations; maximum principles; Fourier Series and applications. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate sequence in calculus (e.g., through MATH 2421) and differential equations (e.g., MATH 3200 or 3195). Cross-listed with MATH 4733. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

Typically Offered: Spring.

MATH 5779 - Math Clinic (3 Credits)
The clinic is intended to illustrate the applicability and utility of mathematical concepts. Research problems investigated originate from a variety of sources—industry, government agencies, educational institutions, or nonprofit organizations. Prereq: Graduate standing in Applied Mathematics or Statistics or permission of instructor. Cross-listed with MATH 4779. Term offered: fall, spring. Repeatable. Max Hours: 99 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 99.
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

Typically Offered: Fall, Spring.

MATH 5791 - Continuous Modeling (3 Credits)
Every other year. Surveys mathematical problems that arise in natural sciences and engineering. Topics may include population models, epidemic models, mechanics, heat transfer and diffusion, tomography, phar-maco-kinetics, traffic flow, fractal models, wave phenomena, and natural resource management. Most models discussed are based on differential and integral equations. Emphasis is formulation and validation of models as well as methods of solution. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of undergraduate-level courses in differential equations and linear algebra (e.g., MATH 3200 and 3191). Cross-listed with MATH 4791. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5792 - Probabilistic Modeling (3 Credits)
Every other year. Markov chains, Poisson processes, continuous time Markov chains, elementary topics in queuing theory, and some mathematical aspects of Monte Carlo simulation, including random variate generation, variance reduction, and output analysis. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate-level course in probability (e.g., MATH 4810) and some programming experience. Cross-listed with MATH 4792. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

Typically Offered: Fall.

MATH 5793 - Discrete Math Modeling (3 Credits)
Every other year. Focuses on the use of graph theory and combinatorics to solve problems in a wide variety of disciplines. Applications are selected from computer science, communication networks, economics, operations research, and the social, biological and environmental sciences. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of an undergraduate course in linear algebra (e.g., MATH 3191) and graph theory (e.g., MATH 4408). Cross-listed with MATH 4793. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 5794 - Optimization Modeling (3 Credits)
Every other year. Principles of model formulation and analysis are developed by presenting a wide variety of applications, both for natural phenomena and social systems. Examples of optimization models to represent natural phenomena include principles of least time and energy. Examples in social systems include resource allocation, environmental control and land management. Specific applications vary, but are chosen to cover a wide scope that considers dichotomies, such as discrete vs. continuous, static vs. dynamic, and deterministic vs. stochastic. Some computer modeling language (like GAMS) is taught. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. This course assumes that students have the equivalent of a sequence in calculus (e.g., through MATH 2421) and linear algebra (e.g., MATH 3191). Cross-listed with MATH 4794. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 5830 - Applied Statistics (3 Credits)
Review of estimation, confidence intervals and hypothesis testing; ANOVA; categorical data analysis; non-parametric tests; linear and logistic regression. Restriction: Restricted to Graduate and Non-Degree majors. Note: This course assumes that students have the equivalent of an introductory course in statistics (e.g., MATH 2830). No co-credit with MATH 4387 or 5387 and doesn’t count for Math degrees. Cross-listed with MATH 4830. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

MATH 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or Statistics and instructor permission. Repeatable. Max Hours: 3 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: Graduate standing in Applied Mathematics

MATH 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade

MATH 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Repeatable. Max Hours: 9 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: Graduate standing in Applied Mathematics

MATH 5950 - Master's Thesis (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or Statistics and instructor permission. No co-credit with MATH 5960 or MATH 6960. Repeatable. Max hours: 8 Credits. Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Additional Information: Report as Full Time.

MATH 5960 - Master's Project (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing in Applied Mathematics or Statistics and instructor permission. No co-credit with MATH 5950 or MATH 6950. Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Additional Information: Report as Full Time.

MATH 6023 - Topics in Discrete Math (3 Credits)
Topics may include graph theory, combinatorics, matroid theory, combinatorial matrix theory, finite geometry, design theory, and discrete algorithms. Note: Since topic varies by semester, students may register for this course more than once. Note: students should obtain permission from the instructor prior to enrolling in this course. Prereq: Graduate standing in Applied Mathematics. Repeatable. Max Hours: 99 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 99.
Prereq: Graduate standing in Applied Mathematics

MATH 6101 - Uncertainty Quantification (3 Credits)
The field of uncertainty quantification is evolving rapidly due to increasing emphasis on models of physical and biological systems that have quantified uncertainties for large-scale applications, novel algorithm development, and new computational architectures that facilitate implementation of these algorithms. In this course, we develop the basic concepts, theory, and algorithms necessary to quantify input and response uncertainties for a variety of simulation models. The topics will include concepts from probability and statistics, parameter selection techniques, frequentist and Bayesian model calibration, propagation of uncertainties, quantification of model discrepancy, surrogate model construction, and local and global sensitivity analysis. Note: A basic knowledge of probability, linear algebra, ordinary and partial differential equations, and introductory numerical analysis techniques is assumed. Coursework will typically consist of projects. Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS. Recommended preparation MATH 5070, MATH 5718, MATH 5660, MATH 5733. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 6131 - Real Analysis (3 Credits)
Every other year. Lebesque measure and integration, general measure and integration theory, Radon-Nikodym Theorem, Fubini Theorem. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a two semester course in undergraduate analysis or advanced calculus (e.g. MATH 4310 and 4320) or introductory graduate-level coursework in analysis (e.g. MATH 5070). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Fall.
MATH 6330 - Workshop in Statistical Consulting (3 Credits)
Students participate as consultants in a drop-in consulting service operated by the department. Seminars provide students with supervised experience in short term statistical consulting. Note: Since problems vary each semester, students may register for this course more than once. Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS. Term offered: fall. Repeatable. Max hours: 99 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 99.
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS.

MATH 6340 - Spatial Data Analysis (3 Credits)
This course will cover various statistical methods for spatial data. This will include assessing cluster identification for point process and regional data, as well as quantifying spatial dependence and making predictions for regional and geostatistical spatial data. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Term offered: fall of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Fall.

MATH 6380 - Exploratory Data Analysis (3 Credits)
Every other year. Philosophy and techniques associated with exploratory (vs. confirmatory) data analysis, both as originally presented (John Tukey) and current computer-based implementations. Graphical displays, robust-resistant methods (lines, two-way fits), diagnostic plots, standardization. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have prior coursework in statistics. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 6384 - Spatial Data Analysis (3 Credits)
This course will cover various statistical methods for spatial data. This will include assessing cluster identification for point process and regional data, as well as quantifying spatial dependence and making predictions for regional and geostatistical spatial data. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Term offered: fall of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Fall.

MATH 6360 - Exploratory Data Analysis (3 Credits)
Every other year. Philosophy and techniques associated with exploratory (vs. confirmatory) data analysis, both as originally presented (John Tukey) and current computer-based implementations. Graphical displays, robust-resistant methods (lines, two-way fits), diagnostic plots, standardization. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have prior coursework in statistics. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Fall.

MATH 6376 - Statistical Computing (3 Credits)
Computationally-intensive methods in statistics, including random number generation and Monte Carlo methods, data partitioning and re-sampling, numerical and graphical methods, nonparametric function estimation, statistical models and data mining methodology, analysis of large data sets. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have prior coursework in statistics (e.g. MATH 4820 or 4830 or 3382) and regression analysis (e.g. MATH 4387). Cross-listed with MATH 7376. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 6380 - Stochastic Processes (3 Credits)
Every other year. Markov processes in discrete and continuous time, renewal theory, martingales, Brownian motion, branching processes, and stationary processes. Applications include queuing theory, performance evaluation of computer and communication systems and finance. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of undergraduate-level coursework in linear algebra (e.g. MATH 3191) and ordinary differential equations (e.g. MATH 3200), along with undergraduate-level coursework in probability (e.g. MATH 4810). Term offered: fall of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 6398 - Calculus of Variations and Optimal Control (3 Credits)
Infrequent. Standard variational problems (geodesic, time-of-transit, isoperimetric, surface, area), Euler-Lagrange equations, variational principles in mechanics, optimal control problems, necessary conditions for optimality, Pontryagin principle. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a two semester course in undergraduate analysis or advanced calculus (e.g. MATH 4310 and 4320) or introductory graduate-level coursework in analysis (e.g. MATH 5070). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 6404 - Applied Graph Theory (3 Credits)
Every other year. Emphasis on graph theory. Topics will include trees, diagraphs and networks, intersection graphs, coloring, clique coverings, distance, paths and cycles. Topics are motivated by applications. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
Typically Offered: Fall.
MATH 6595 - Nonlinear Programming (3 Credits)
Every other year. Introduces fundamental algorithms and theory for nonlinear optimization problems. Topics include Newton, quasi-Newton and conjugate direction methods; line search and trust-region methods; active set, penalty and barrier methods for constrained optimization; convergence analysis and duality theory. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a two semester course in undergraduate analysis (e.g. MATH 4310 and 4320) and graduate-level coursework in linear algebra (e.g. MATH 5718). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 6653 - Introduction to Finite Element Methods (3 Credits)
Every other year. The Finite Element Method (FEM) is introduced as a generic tool for the approximation of partial differential equations that model engineering and physics problems of interest. Elliptic, hyperbolic, and parabolic equations are solved with FEM. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in numerical analysis (e.g. MATH 5660). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 6735 - Continuum Mechanics (3 Credits)
Every other year. Indicial notation. Eulerian and Lagrangian coordinates. Deformation, strain, strain rate, stress. Conservation of mass, momentum, and energy. Exploitation of entropy production inequality to obtain constitutive equations for elastic, viscous, visco elastic, plastic, or porous materials. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of undergraduate-level coursework in linear algebra (e.g. MATH 3191) and ordinary differential equations (e.g. MATH 3200). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 6840 - Functional Analysis (3 Credits)
Prereq: Graduate standing in Applied Mathematics
Grading Basis: Letter Grade
Max hours: 3 Credits.

MATH 6960 - Mathematical Statistics II (3 Credits)
Prereq: Graduate standing in Applied Mathematics or Statistics (MATH 5320). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of a two semester undergraduate sequence in probability and mathematical statistics (e.g. MATH 4310 and 4320) or a graduate-level course in analysis (e.g. MATH 5070). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7101 - Topology (3 Credits)
Every other year. Topological spaces, compactness, separation properties and connectedness. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of a two semester undergraduate sequence in analysis or advanced calculus (e.g. MATH 4310 and 4320) or a graduate-level course in analysis (e.g. MATH 5070). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7132 - Functional Analysis (3 Credits)
Every other year. Linear metric and topological spaces, duality, weak topology, spaces of functions, linear operators, compact operators, elements of spectral theory, and operator calculus. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate level coursework in real analysis (e.g. MATH 6131). Term offered: spring of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 7376 - Statistical Computing (3 Credits)
Computationally-intensive methods in statistics, including random number generation and Monte Carlo methods, data partitioning and resampling, numerical and graphical methods, nonparametric function estimation, statistical models and data mining methodology, analysis of large data sets. Note: This course assumes that students have prior coursework in statistics (e.g. MATH 4820 or 4830 or 3382) and regression analysis (e.g. MATH 4387). Cross-listed with MATH 6376. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Cross-listed with MATH 6376. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 7381 - Mathematical Statistics I (3 Credits)
Every other year. Mathematical theory of statistics. Parametric inference: discrete and continuous distributions, methods of parameter estimation, confidence intervals. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of graduate-level coursework in linear algebra (e.g. MATH 3191) and statistics (MATH 5320). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 7382 - Mathematical Statistics II (3 Credits)
Every other year. (Continuation of MATH 7381.) Hypothesis testing, robust estimation, tolerance intervals, nonparametric inference, sequential methods. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: This course assumes that students have the equivalent of advanced graduate level coursework in mathematical statistics (e.g. MATH 7381). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS
MATH 7384 - Mathematical Probability (3 Credits)
Every other year. Measurable spaces, probability measures, random variables, conditional expectations and martingales. Convergence in probability, almost sure convergence, convergence in distribution, limit theorems (law of large numbers, central limit theorem, laws of iterated logarithm). Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of undergraduate-level coursework in probability (e.g. MATH 4810) and graduate-level coursework in analysis (e.g. MATH 5070 or 6131). Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7385 - Stochastic Differential Equations (3 Credits)
Brownian motion, Ito integral, Ito formula, Dynkin's formula, stochastic optimal control, boundary value problems, Girsanov theorem, mathematical finance, optimal stopping. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in mathematical probability (e.g. MATH 7384). Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7386 - Monte Carlo Methods (3 Credits)
This course introduces Monte Carlo integration, variance reduction methods, quasi-Monte Carlo, Markov chain Monte Carlo, Metropolis-Hastings algorithm, Gibbs sampler, simulated annealing, expectation-maximization algorithm, sequential Monte Carlo methods. Prereq: Graduate standing in Applied Mathematics or Statistics. AMENMS/PHD/STAT-MS. Recommended preparation: MATH 5310 and MATH 5320. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMENMS/PHD/STAT-MS

MATH 7397 - Nonparametric Statistics (3 Credits)
Every three years. Statistical inference without strong model assumptions. Hypothesis testing and estimation using permutations and ranks, analysis of variance, and nonparametric model fitting. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 7405 - Advanced Graph Theory (3 Credits)
Continuation of MATH 6404. Topics to be covered include: trees and optimization, encoding and embedding of graphs, generalized colorings and applications, perfect graphs, extremal problems, substructures, connectedness’ and cycles. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in graph theory (e.g. MATH 6404). Term offered: spring of even years. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7409 - Applied Combinatorics (3 Credits)
Every other year. Emphasis is on enumerative combinatorics. Topics include multinomial coefficients, generating functions, SDRs, Polya's enumeration theory, pigeon-hole principle, inclusion/exclusion and Mobius inversion of finite posets. Topics may also include introduction to designs and finite geometry. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7410 - Combinatorial Structures (3 Credits)
Every other year. Finite combinatorial structures; existence, construction and applications. Topics include Latin squares, Hadamard matrices, block designs, finite geometries and extremal and non-constructive combinatorics. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in combinatorics (e.g. MATH 7409). Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7413 - Modern Algebra II (3 Credits)
Every other year. Groups, rings and ideals, integral domains. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of undergraduate level coursework in abstract algebra (e.g. MATH 4140). It is recommended that students take MATH 5718 during the same semester as MATH 7413. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7414 - Modern Algebra II (3 Credits)
Every other year. Field theory, Galois theory, Modules over rings, especially over integral domains. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear algebra (e.g. MATH 5718) and abstract algebra (e.g. MATH 7413). Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7419 - Mathematical Coding Theory (3 Credits)
Error correcting codes are used to recapture information that has been distorted in some transmission process. Various coding schemes use block codes obtained from algebraic, geometric and combinatorial structures. Topics include: fundamentals, linean, Reed-Muller, Golay, cyclic and BCH codes. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear algebra (e.g. MATH 5718). Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
MATH 7421 - Projective Geometry (3 Credits)
Every other year. Synthetic and algebraic development of projective spaces. Collineation groups, representation theorems, quadratic sets and applications. Emphasis is on finite projective spaces. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear algebra (e.g. MATH 5718) and combinatorics (e.g. MATH 7409). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7593 - Advanced Linear Programming (3 Credits)
Every three years. A Ph.D. level course that goes deeper into linear programming, starting from where a graduate-level course (5593) ends. Topics include advanced sensitivity analysis, sparse matrix techniques, and special structures. Additional topics, which vary, include deeper analysis of algorithms, principles of model formulation and solution analysis. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear programming (e.g. MATH 5593). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7594 - Integer Programming (3 Credits)
Every three years. A Ph.D. level course that uses linear programming (5593), especially polyhedral theory, to introduce concepts of valid inequalities and superadditivity. Early group-theoretic methods by Gomory and Chvatal's rounding function are put into modern context, including their role in algorithm design and analysis. Duality theory and relaxation methods are presented for general foundation and analyzed for particular problem classes. Among the special problems considered are knapsack, covering, partitioning, packing, fix-charge, traveling salesman, generalized assignment matchings. Matroids are introduced and some greedy algorithms are analyzed. Additional topics, which vary, include representability theory, heuristic search and complexity analysis. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear programming (e.g. MATH 5593). Term offered: spring of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 7595 - Advanced Nonlinear Programming (3 Credits)
Every three years. Focuses primarily on the fundamental theory of nonlinear programming. Topics include convex analysis, optimality criteria, Lagrangian and conjugate duality, stability and sensitivity analysis. Other topics vary depending on the research interests of the instructor. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework addressing computational methods in nonlinear programming (e.g. MATH 6595). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7663 - Finite Difference Methods for Partial Differential Equations (3 Credits)
Every other year. Consistency, stability, and convergence for difference schemes. Derivations based on Taylor series and finite series. Methods for parabolic and hyperbolic initial value problems and initial-boundary value problems, elliptic boundary-value problems, some nonlinear problems. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in numerical analysis (e.g. MATH 5070) and partial differential equations (e.g. MATH 5733). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7665 - Numerical Linear Algebra (3 Credits)
Every other year. Solution of linear equations, eigenvector and eigenvalue calculation, matrix error analysis, orthogonal transformation, iterative methods. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in numerical analysis (e.g. MATH 5660) and linear algebra (e.g. MATH 5718). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7667 - Introduction to Approximation Theory (3 Credits)
Every other year. Linear normed and Banach spaces, convexity, existence and uniqueness of best approximations, least square approximation and orthogonal polynomials, Chebyshev approximation by polynomials and other related families, splines. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in analysis (e.g. MATH 5070) and linear algebra (e.g. MATH 5718). Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 7821 - Topics in Projective Geometry (3 Credits)
Infrequent. Advanced topics in projective geometry. Topics may include finite projective planes, free projective planes, derivation, collineation groups, higher dimensional projective spaces, ovals and ovoids. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in projective geometry (e.g. MATH 7821). Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics

MATH 7822 - Topics in Linear Algebra (3 Credits)
Infrequent. Topics may include canonical forms, bilinear and quadratic forms, and combinatorial matrix theory. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in linear algebra (e.g. MATH 5718). Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics
MATH 7823 - Topics in Discrete Math (3 Credits)
Infrequent. Advanced topics in discrete mathematics; will change from semester to semester. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: Students should contact the course instructor to determine the course focus, and to determine if any prior undergraduate- or graduate-level coursework is assumed. Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics

MATH 7824 - Topics in Computational Mathematics (3 Credits)
Infrequent. Topics include methods for differential equations, numerical optimization, approximation theory, inverse problems, and Fourier analysis. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: Students should contact the course instructor to determine the course focus, and to determine if any prior undergraduate- or graduate-level coursework is assumed. Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics

MATH 7825 - Topics in Optimization (3 Credits)
Infrequent. Some topics are extensions of those introduced in MATH 6595, while other topics are new. Examples of topics are: duality, stability, sensitivity, consistency, redundancy, principal of optimality, control theory, calculus of various global (non-convex) optimization and model reformulation. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: Students should contact the course instructor to determine the course focus, and to determine if any prior undergraduate- or graduate-level coursework is assumed. Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics

MATH 7826 - Topics in Probability and Statistics (3 Credits)
Infrequent. Topics may include generalized linear models, information theory, robust methods, spatial statistics, sequential analysis, Monte Carlo methods, queuing theory. Note: Since topics vary each semester, students may register for this course more than once. Prereq: Graduate standing in Applied Mathematics or Statistics or instructor permission. AMEN-MS/PHD/STAT-MS. Note: Students should contact the course instructor to determine the course focus, and to determine if any prior undergraduate- or graduate-level coursework is assumed. Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics or Statistics. AMEN-MS/PHD/STAT-MS

MATH 7827 - Topics in Applied Mathematics (3 Credits)
Infrequent. Topics include problems in differential equations, optimization, mathematical modeling, Fourier analysis and approximation theory. Note: Since topics vary each semester, students may register for this course more than once. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: Since topics vary each semester, students may register for this course more than once. Prereq: Graduate standing in Applied Mathematics or Statistics and instructor permission. Repeatable. Max Hours: 48 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 48.
Prereq: Graduate standing in Applied Mathematics
MATH 8660 - Mathematical Foundations of Finite Element Methods (3 Credits)
Every other year. Theoretical foundations of finite element methods for elliptic boundary value problems, Sobolev spaces, interpolations of Sobolev spaces, variational formulation of elliptic boundary-value problems, basic error, estimates, applications to elasticity, practical aspects of finite element methods. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in finite element methods (e.g. MATH 6653) or equivalent programming experience, and graduate-level coursework in analysis or functional analysis (e.g. MATH 6131 or MATH 7132). Term offered: spring of odd years. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics
Typically Offered: Spring.

MATH 8664 - Iterative Methods in Numerical Linear Algebra (3 Credits)
Every other year. Preconditioned iterative methods for linear systems and eigen problems, conjugate gradients, multigrid and domain decomposition. Prereq: Graduate standing in Applied Mathematics or permission of the instructor. Note: This course assumes that students have the equivalent of graduate-level coursework in numerical analysis (e.g. MATH 5660) and numerical linear algebra (e.g. MATH 7665). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing in Applied Mathematics

MATH 8990 - Doctoral Dissertation (1-10 Credits)
Only for students working on their Ph.D. research. Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Credits: 6.
Grading Basis: Letter Grade

MECH 5020 - Biomechanics (3 Credits)
Static and dynamic biomechanical analysis, effects of mechanical loading on bone and cartilage, design considerations in orthopaedic devices, muscle function, biomechanics of human movement, cardiovascular biomechanics. Restriction: Graduate standing or permission of the instructor required. Cross-listed with MECH 4020. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
Typically Offered: Summer.

MECH 5024 - Mechanical Behavior of Materials (3 Credits)
Students will learn about the mechanical behavior of materials using a multi-scale, materials oriented approach. The course will relate how atomistic and molecular mechanisms relate to macroscopic and continuum properties of materials across acute and long-term time scales. Restriction: Graduate standing or permission of the instructor required. Cross-listed with MECH 4024. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
Typically Offered: Fall.

MECH 5025 - Advanced Biomechanics (3 Credits)
This course provides training in computational and experimental methods for biomechanical engineering analysis. Topics include finite element analysis of biological systems, orthopedic device design, medical imaging analysis, mechanical characterization of biological tissues, and biomechanics of human movement. Prereq: MECH 4020 or MECH 5020. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 4020 or MECH 5020

Maximizing Access to Research Careers (MARC)

MARC 5780 - Behavioral & Biomedical Sciences Research: Ethics & Issues (3 Credits)
Students will critically review and analyze some of the major ethical and policy issues that arise during the conduct of basic and applied behavioral research. Prereq: PSYC 1000, 1005, 2090, 2220 and 3090 or Graduate standing or instructor permission. Term offered: fall. Cross-listed with PSYC 4780, PSYC 5780 and MARC 4780. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PSYC 1000, 1005, 2090, 2220 and 3090 or Graduate standing or instructor permission

MARC 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

Mechanical Engineering (MECH)

MECH 5001 - Seminar: Introduction to Research (1 Credit)
This course is intended to introduce graduate students to the fundamental skills and methods needed to perform research. Topics include writing technical papers, presentation skills, testing methodology, hypothesis creation and more. Max Hours: 1 Credit.
Grading Basis: Letter Grade

MECH 5020 - Biomechanics (3 Credits)
Static and dynamic biomechanical analysis, effects of mechanical loading on bone and cartilage, design considerations in orthopaedic devices, muscle function, biomechanics of human movement, cardiovascular biomechanics. Restriction: Graduate standing or permission of the instructor required. Cross-listed with MECH 4020. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
Typically Offered: Summer.

MECH 5024 - Mechanical Behavior of Materials (3 Credits)
Students will learn about the mechanical behavior of materials using a multi-scale, materials oriented approach. The course will relate how atomistic and molecular mechanisms relate to macroscopic and continuum properties of materials across acute and long-term time scales. Restriction: Graduate standing or permission of the instructor required. Cross-listed with MECH 4024. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
Typically Offered: Fall.

MECH 5025 - Advanced Biomechanics (3 Credits)
This course provides training in computational and experimental methods for biomechanical engineering analysis. Topics include finite element analysis of biological systems, orthopedic device design, medical imaging analysis, mechanical characterization of biological tissues, and biomechanics of human movement. Prereq: MECH 4020 or MECH 5020. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 4020 or MECH 5020
MECH 5030 - Experimental and Computational Methods of Human Movement (3 Credits)
The objective of this course is to provide an overview of the various experimental and computational tools to measure and study human movement. Using a motion capture laboratory and musculoskeletal modeling, these tools will be used to develop a thorough understanding of how engineering principles can be used to address the major challenges of human movement biomechanics, with a primary emphasis on experimental measurement methods and simulations of movement. These tools will be used to explore the interaction of musculoskeletal properties, including whole-body and joint level biomechanics, with the environment during dynamic motion. Course topics include neuromuscular mechanics, balance performance, inverse dynamics, simulation of dynamic muscle#tendon mechanics, and musculoskeletal model development. Cross-listed with MECH 4030. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

MECH 5110 - Numerical Methods for Engineers (3 Credits)
Introduces numerical analysis. Solution of linear and nonlinear equation systems. Numerical methods for ordinary and partial differential equations. Engineering applications. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4110. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5112 - Introduction to Internal Combustion Engines (3 Credits)
This course provides an introduction to the major characteristics of internal combustion engines and defines the major parameters used to describe the engine operation and design conditions. Students perform analysis of the thermal performance of the engines. Restriction: Graduate standing or permission of the instructor required. Cross-listed with MECH 4112. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5114 - Designing with Composites (3 Credits)
Analysis and design of polymers and polymer-based composites. Failure criteria include static strength, stiffness, creep, fatigue, impact and fracture toughness. Design criteria include strength-to-weight ratio and cost-to-strength ratio. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4114. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5115 - Applied Plasticity and Creep (3 Credits)
Plastic deformation of materials applied to bulk and sheet metal manufacturing processes such as extrusion, rolling and sheet metal. Linear and nonlinear viscoelastic creep with applications to plates and shells. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4115. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5120 - Methods of Engineering Analysis (3 Credits)
Selected topics from real analyses with applications to engineering analyses. Topics include vector calculus, ordinary differential equations, partial differential equations and calculus of variations. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4120. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5121 - Introduction to Fluid Dynamics (3 Credits)
Physical properties of gases and liquids; kinematics of flow fields; equations describing viscous, heat-conducting Newtonian fluids. Exact solutions and rational approximations for low- and high-speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows. Graduate standing or permission of instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5122 - Macroscopic Thermodynamics (3 Credits)
Axiomatic presentation of fundamentals of classical thermodynamics (first law); energy, work and heat. Equilibrium, reversible, and irreversible processes; entropy production and the second law. Applications to stability and phase equilibrium. Irreversible thermodynamics and the Onsager reciprocal relations. Restriction: Graduate standing or permission of instructor required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5123 - Introduction to Continuum Mechanics (3 Credits)
Cartesian tensor notation. Deformation, strain, strain rate and compatibility. Definition of stress vector and tensor. Fundamental balance laws of mass, momentum and energy; entropy production inequality. Constitutive equations for elastic, viscoelastic and plastic materials; ideal, compressible, and viscous fluids. Beltrami-Mitchell and Navier-Stokes equations. Restriction: Graduate standing or permission of instructor required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5124 - Yield-Limited Behavior of Materials (3 Credits)
Analysis of material behavior within the "elastic range," with emphasis on the phenomenon of yield and factors that influence it. Examination of the theory of dislocations; study of strengthening mechanisms in solids. Consideration of various time-dependent but reversible (inelastic) deformation phenomena. Presentation of appropriate engineering case studies to augment various topics. Graduate standing or permission of the instructor required. Prereq: MECH 5143 with a grade of B- or higher. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate students

MECH 5133 - Theory of Inelastic Materials (3 Credits)
Mathematical theory of linear viscoelasticity. Finite elements models. Solution of boundary-value problems in linear viscoelasticity. Non-Newtonian flow. Selected topics in nonlinear material behavior. Graduate standing or permission of the instructor required. Prereq: MECH 5143 with a B- or higher. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate students

MECH 5141 - Viscous Flow (3 Credits)
Viscous incompressible fluid flows. Topics include derivation of equations governing viscous compressible fluid motion; specializations to simple flows; boundary-layer theory; similarity solutions; introduction to turbulence and Reynolds stresses. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4141. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5143 - Solution of Boundary Value Problems (3 Credits)
Viscous incompressible fluid flows. Topics include derivation of equations governing viscous compressible fluid motion; specializations to simple flows; boundary-layer theory; similarity solutions; introduction to turbulence and Reynolds stresses. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4143. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5144 - Advanced Continuum Mechanics (3 Credits)
Stress and strain. Theory of elasticity. Introduction to finite element analysis. Prereq: MECH 5143 with a grade of B- or higher. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate students

MECH 5145 - Advanced Topics in Inelasticity (3 Credits)
Inelasticity, plasticity, creep and fatigue; limit load analysis; analysis of stability. Prereq: MECH 5143 with a grade of B- or higher. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate students

MECH 5146 - Advanced Topics in Thermodynamics (3 Credits)
Macroscopic Thermodynamics: Classic and irreversible; numerical applications; applications to engineering systems. Prereq: MECH 5143 with a grade of B- or higher. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate students

MECH 5150 - Advanced Topics in Fluid Dynamics (3 Credits)
Linear and nonlinear viscous incompressible and compressible flows; surface and internal waves, acoustics, stability, and potential flows. Graduate standing or permission of instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
MECH 5142 - Statistical Thermodynamics (3 Credits)
Introduces the molecular interpretation and calculation of thermodynamic properties of matter, thermodynamic probability, distribution functions, Schrodinger wave equations and solutions and ensemble theory. Applications to ideal and real gases, solids, liquids, radiation, conduction electrons, and chemical equilibrium. Restriction: Graduate standing or permission of instructor required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5143 - Theory of Elasticity (3 Credits)
Review of the basic equations of linear theory of elasticity. St. Venant torsion and flexure. Plane strain, plane stress, and generalized plane stress. Application of conformal mapping and Fourier transform techniques. Restriction: Graduate standing or permission of instructor required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5144 - Plasticity and Creep (3 Credits)
Inelastic deformation of materials such as metals, alloys, glasses, composites and polymers from the phenomenological and structural point of view. Case studies of plastic and creep deformations in engineering materials. Prereq: MECH 5143 with a grade of B- or higher and graduate standing or permission of the instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate standing or higher

MECH 5161 - Compressible Flow (3 Credits)
Energy, continuity, and momentum principles applied to compressible flow; one-, two-, and three-dimensional subsonic, supersonic and hypersonic flows. Normal and oblique shocks, and method of characteristics. Prereq: MECH 5141 with a grade of B- or higher and graduate standing or permission of the instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5141 with a B- or higher Restriction: Restricted to graduate standing or higher

MECH 5162 - Heat Transfer I (3 Credits)
Review of equations governing transport of heat by conduction and radiation. Analytical and numerical solution of boundary value problems representative of heat conduction in solids. Radiation properties of solids, liquids and gases; transport of heat by radiation. Prereq: Graduate standing or permission of instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5163 - Dynamics (3 Credits)
Review of Newtonian dynamics, Lagrange's equation for particles, systems and rigid bodies. Conservative and non-conservative systems, moments of inertia, principal axes, angular momentum and Euler equations. Illustrations from spinning bodies, including tops, gyrocompass and rotating machinery. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4163. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5166 - Computerized Numerical Control (CNC) Manufacturing (3 Credits)
Modern manufacturing engineering concepts using computerized numerical control (CNC). The students learn state-of-the-art CNC methodologies, including digitizing, drawing, generating codes, and manufacturing using modern CNC machines. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4166. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5172 - Heat Transfer II (3 Credits)
Review of equations governing transport of heat in fluids in motion. Description of heat transfer in free and forced convection, including laminar and turbulent flow. Dimensional analysis and heat transfer correlations, numerical methods and combined heat transfer mechanisms. Graduate standing or permission of the instructor required. Prereq: MECH 5141 with a B- or higher. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5141 with a B- or higher Restriction: Restricted to graduate standing or higher

MECH 5175 - Finite Element Stress Analysis (3 Credits)
Students learn basic theory of finite element analysis (FEA) as it applies to stress analysis and design of mechanical components. Commercial package will be used giving students practical experience in the use of FEA. Graduate standing or permission of the instructor required. Prereq: MECH 5143 with a B- or higher. Cross-listed with MECH 4175. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate standing or higher

MECH 5177 - Introduction to Sports Engineering (3 Credits)
Sports Engineering requires working both with the principles of biomechanics and the principles of engineering design and analysis. Using biomechanics is necessary in understanding the forces on the interface between the human athlete and his/her equipment. Prereq: Graduate standing or permission of the instructor required. Cross-listed with MECH 4176. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5178 - Solar Engineering (3 Credits)
This course provides the student with the basic ideas and calculation procedures on how solar processes work and how their performance can be predicted. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4178. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
MECH 5179 - Introduction to Turbomachinery (3 Credits)
This introductory Turbomachinery course introduces the basic background, terminology, and fundamentals of various forms of turbomachines. The analysis of the various turbomachines will be focused on the performance of the turbomachine. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4179. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5180 - Advanced Heat Transfer (3 Credits)
This course provides fundamental concepts and applicable mathematical techniques for understanding the physics of various modes of heat transfer. Topics include heat conduction in finite and semi-infinite domains, phase change, microscale heat conduction, laminar forced and free convection, turbulence forced and free convection, and thermal radiation. Prereq: Graduate standing or permission of instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5182 - Microscale Transport Phenomena (3 Credits)
This course provides the foundations on the physics of microscale transport phenomena, where continuum effects break down, with applications in MEMS and NEMS. Topics include gas microflows, liquid microflows, surface tension-driven flows, electrokinetics transport, kinetic theory, simulation techniques, lattice Boltzmann methods. Restriction: Restricted to graduate students in the College of Engineering, Design and Computing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate level students.

MECH 5188 - Introduction to Turbulence (3 Credits)
This course provides an introduction to turbulence, which is ubiquitous in nature and having a wide range of applications in engineering. The chaotic phenomena in such a class of flows poses major challenges in their understanding and modeling. The topics covered in this course include the statistical 4 tools and spectral analysis for turbulence description, basic equations of motion and flow instability. Reynolds decomposition of flow, energy transport by mean and turbulence motions, turbulence scales, vortex motion, classical turbulent flow configurations, such as free shear flows (jets, wakes, mixing layers) and wall bounded flows (channels, boundary layers), Kolmogorov and other phenomenological theories, and turbulence modeling. Restriction: Restricted to students with graduate standing, or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate standing majors in the College of Engineering, Design and Computing

MECH 5208 - Special Topics (1-3 Credits)
Subject matter to be selected from topics of current technological interest. Credit to be arranged. Cross-listed with MECH 4208. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Restratable. Max Credits: 9.

MECH 5228 - Special Topics (1-3 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Restratable. Max Credits: 9.

MECH 5238 - Special Topics (1-3 Credits)
Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Restratable. Max Credits: 9.

MECH 5840 - Independent Study (1-3 Credits)
Available only through approval of the graduate advisor. Subjects arranged to fit needs of the particular student. Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP

MECH 5939 - Internship (1-3 Credits)
Students gain engineering design experience involving application of specific technical concepts and skills in a supervised industrial environment. (Must have approval from MECH faculty.) Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5940 - Master's Thesis (1-6 Credits)
Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Restratable. Max Credits: 8.

MECH 5950 - Master's Thesis (1-6 Credits)
Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Restratable. Max Credits: 8.

MECH 5960 - Master's Thesis (1-6 Credits)
Restriction: Restricted to graduate students
Additional Information: Report as Full Time.

MECH 5970 - Graduate Problem Course (1-3 Credits)
The graduate problem course is for the solution of specific problems in MECH specialty areas. Each student is assigned a set of problems of some difficulty requiring the use of the literature of the various areas covered. Prereq: 15 hours of graduate level courses in MECH. Max Hours: 3 Credits.
Grading Basis: Letter Grade

MECH 5980 - Graduate Problem Course (1-3 Credits)
Restriction: Restricted to graduate students

MECH 6184 - Advanced Fluid Mechanics (3 Credits)
This course provides a description of the advanced concepts for understanding the physics of fluid motion under different regimes. Topics include kinematics, stresses, equation of motion, vorticity transport, low Reynolds number flow, irrotational flow, interfacial flow, acoustics&waves, hydrodynamic stability & transition, turbulent flow. Prereq: MECH 5141.
Restriction: Restricted to students with graduate standing, or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5141. Restriction: Restricted to students with graduate standing.
MECH 8990 - Doctoral Dissertation (1-10 Credits)
Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to graduate students. Additional Information: Report as Full Time. Typically Offered: Fall, Spring.

**Media Forensics (MSMF)**

**MSMF 5000 - Experiential Lab (1 Credit)**
Students will understand laboratory procedures and the application of A/V technology in the field and in analysis through professional conferences and site visits to crime labs and government agencies. Students will respond to experiences regarding presentation, demonstration, and discussion components. Restriction: Restricted to MFOR-MS students. Repeatable. Max hours: 5 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 5.
Restriction: Restricted to MFOR-MS students.

**MSMF 5050 - Topics in Media Forensics (1-3 Credits)**
Students learn theory and application through topical subjects designed to enhance theoretical and practical training in the analysis of forensic media. Emphasis will be placed on emerging technologies, methodological developments, and strengthening fundamental skills. These courses are repeatable for credit. Repeatable. Max hours: 5 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 5.
Restriction: Restricted to MFOR-MS students.

**MSMF 5100 - Forensic Science and Litigation (3 Credits)**
Critical analysis of legal precedent and court proceedings reveal to students the correlation between science and law in the litigation of forensic evidence. Assigned reading and research papers regarding evidence admissibility and scientific methodology will prepare students for evidence examination. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to MFOR-MS students. Typically Offered: Fall.

**MSMF 5150 - Research Practices in Media Forensics (3 Credits)**
An introduction to practical research techniques and forensic science periodicals provides students with a foundation for projects and reports in subsequent classes and for the research thesis. Library research, research design, writing styles, and information technology will be discussed. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to MFOR-MS students. Typically Offered: Fall.

**MSMF 5200 - Foundations in Media Forensics (3 Credits)**
Students learn the foundational processes integral to forensic audio, video, and image analysis demonstrating knowledge through reading responses and documentation of procedures and methodology used in assigned projects. Topics include: media recording technology, analog/digital theory, multimedia compression, and equipment characterization. Prereq: MSMF 5100 and 5150 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MSMF 5100 and 5150 with a B- or higher. Restriction: Restricted to MFOR-MS students. Typically Offered: Spring.

**MSMF 5250 - MATLAB Foundations (2 Credits)**
An introduction to MATLAB workflow and its use in Media Forensics will be explored. Students will learn how to build program commands in scripts for signal analysis and to display graphical representations of data and statistics. Prereq: MSMF 5100 and 5150 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 2 Credits.
Grading Basis: Letter Grade
Prereq: MSMF 5100 and 5150 with a B- or higher. Restriction: Restricted to MFOR-MS students. Typically Offered: Spring.

**MSMF 5300 - Computer Forensics (3 Credits)**
Students explore computer forensics through guided projects and group discussion. An overview of computer hardware/software and characterization of storage media and file types will be covered through mock evidence examination documenting the search, seizure, and acquisition of forensic media. Prereq: MSMF 5200 and MSMF 5250 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MSMF 5200 and MSMF 5250 with a B- or higher. Restriction: Restricted to MFOR-MS students. Typically Offered: Spring.

**MSMF 5350 - Mobile Phone Forensics (1 Credit)**
Students learn concepts regarding the proper handling of mobile phones to ensure evidence integrity and approaches to address the ever-changing field. Students are prepared for the acquisition and analysis of forensic media on personal devices through exercises and group projects. Prereq: MSMF 5200 and MSMF 5250 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 1 Credit.
Grading Basis: Letter Grade
Prereq: MSMF 5200 and MSMF 5250 with a B- or higher. Restriction: Restricted to MFOR-MS students. Typically Offered: Fall.

**MSMF 5400 - Forensic Audio Analysis (3 Credits)**
Students learn concepts through the application of techniques related to audio enhancement, digital media authentication, acoustic analysis, and automatic speaker recognition. The acquisition and analysis of digital evidence applying reliable methods prepares students for forensic audio analysis in the laboratory. Prereq: MSMF 5300 and 5350 with a B- or higher. Coreq: MSMF 5450. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MSMF 5300 and 5350 with a B- or higher. Coreq: MSMF 5450. Restriction: Restricted to MFOR-MS students. Typically Offered: Fall.
MSMF 5450 - MATLAB for Forensic Audio Analysis (1 Credit)
Advanced application of MATLAB for the forensic analysis of audio will be presented including file access, FFT and waveform plotting, and signal detection. Through the exploration of correlation and using mean quadratic difference students will be prepared for media authentication. Prereq: MSMF 5300 and 5350 with a B- or higher. Coreq: MSMF 5400. Restriction: Restricted to MFOR-MS students. Max hours: 1 Credit. Grading Basis: Letter Grade
Typically Offered: Fall.

MSMF 5500 - Forensic Video and Image Analysis (3 Credits)
Students learn concepts through the application of techniques related to forensic video collection and image enhancement, authentication, photogrammetry, and comparison. The acquisition and analysis of digital evidence applying reliable methods prepares students for working on forensic imagery in the laboratory. Prereq: MSMF 5400 and 5450 with a B- or higher. Coreq: MSMF 5550. Restriction: Restricted to MFOR-MS. Max hours: 3 Credits. Grading Basis: Letter Grade
Typically Offered: Spring.

MSMF 5450 - MATLAB for Forensic Video and Image Analysis (1 Credit)
Advanced application of MATLAB for the forensic analysis of images will be presented covering image processing and analysis techniques. Through exploring analyses such as Photo Response Non-Uniformity and the Bi-Dimensional DFT, students are prepared for image authenticity examinations. Prereq: MSMF 5400 and 5450 with a B- or higher. Coreq: MSMF 5550. Restriction: Restricted to MFOR-MS. Max hours: 1 Credit. Grading Basis: Letter Grade
Typically Offered: Spring.

MSMF 5500 - Methods of Teaching Modern Languages (3 Credits)
Studies the methods and practices of teaching modern languages. Note: requirement for those wishing to be teaching assistants in the Department of Modern Languages, and for language majors in the teacher certification program, School of Education, CU Denver. Note: This course is taught in English and does not fulfill the foreign language proficiency requirement for the College of Liberal Arts and Sciences. Cross-listed with MLNG 4690, SPAN 4690, SPAN 5690, FREN 4690, FREN 5690, GRMN 4691, GRMN 5690, CHIN 4690, CHIN 5690. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Typically Offered: Fall.

MLNG 5691 - Methods of Teaching Modern Languages II (3 Credits)
A continuation of the study of modern language teaching methods. This second course has an emphasis on experiential learning through individual teaching demonstrations, class observations, as well as team teaching with experienced instructors. Cross-listed with MLNG 4691, SPAN 4691, SPAN 5691, FREN 4691, FREN 5691, GRMN 4691, GRMN 5691, CHIN 4691, CHIN 5691. Prereq: MLNG 5690 or SPAN 5690 or FREN 5690 or GRMN 5690 or CHIN 5690. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Typically Offered: Spring.

Modern Languages (MLNG)

Philosophy (PHIL)

PHIL 5002 - Ancient Greek Philosophy (3 Credits)
What is philosophy? What is the nature of reality? What is the difference between knowledge and opinion? What is the best kind of life for a human being to lead? Ancient Greece was the birthplace of Western philosophy, and this course traces the history of ancient Greek thought, from Homer and Hesiod through the pre-Socratic thinkers (e.g. such figures as Thales, Pythagoras, Heraclitus, Parmenides, Zeno of Elea, Empedocles, Anaxagoras and Democritus) to Plato, Aristotle and later Hellenistic thought. Cross-listed with PHIL 3002. Term offered: fall, spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)
Typically Offered: Fall, Spring.
PHIL 5013 - Methods and Practices of Graduate Interdisciplinary Humanities (3 Credits)
The second of three required Master of Humanities core courses, this course introduces beginning graduate students to methodological and intellectual frameworks for gathering, organizing, and developing interdisciplinary research. Focus is on the application of theories and methods of research, interpretation and analysis in humanistic research through readings that explore philosophical and cultural discourses have altered theory and method. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with HUMN/SSCI 5013. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5022 - Knowledge, Perception, and the Search for Objectivity: Modern Philosophy (3 Credits)
How does physical matter relate to minds and the mental realm? How does objective reality related to what seems subjective — human knowledge, perception, and feeling, etc.? What is the role of logical thinking in connecting the objective and subjective areas of reality? Can philosophy ground knowledge so that scientific inquiry is safe from the challenges of skepticism? These are just a few of the problems posed by the “modern” period in philosophy, from roughly the end of the 16th century to the end of the 18th century. This course examines such epistemological questions and surveys key metaphysical themes that modern thinkers inherited from ancient and medieval philosophy. Figures typically include Descartes, Leibniz, Spinoza, Locke, Hume, and Kant, among others. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 3022. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

Typically Offered: Spring.

PHIL 5040 - Skepticism (3 Credits)
Considers radical skepticism in the form of Sextus Empiricus' Outlines of Pyrrhonism. Following Peter Suber's "Essay on Classical Skepticism," the course also looks at historical responses to Pyrrhonian skepticism, especially in theories of belief. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5050 - Propaganda: Truth, Lies, and Freedom (3 Credits)
All who live in this world must choose what to do. Some of those choices can rely on first-hand experience, but most rely on information, facts, and descriptions from external sources. As every programmer will tell you, "Garbage in, garbage out." Thus, getting "good" information is critical to our ability to live freely, autonomously, and ethically. It is typical for philosophy classes to teach logic and reasoning — and those are important. But reasoning is useless if its content (or information) is deceptive, misleading, or incoherent. What's more, since democratic countries are premised upon knowledgeable citizens, the short-circuiting of reasoning by propaganda may be the greatest danger democracy has. The question becomes: what is propaganda? How do we define it? How do we locate it? And finally, how do we spell out what (possibly) wrong with it? Accordingly, this course is an inquiry into the epistemic, technological, and ethical dimensions of propaganda. It will define propaganda, identify how it works, and seek to understand the variety of agents and motives who use propaganda to achieve their ends. (It is not assumed that propaganda is always good or always bad, by the way.) In addition to understanding the logical and epistemic nature of propaganda, this course will examine how it is disseminated. How do technologies (text, video, social media, algorithms, etc.) influence and foment misinformation? The overarching goal will be to become more aware and critical of propaganda we encounter so we can avoid "garbage" information which can manipulate us and prevent us from reasoning logically and ethically. Cross-listed with PHIL 3050. Max hours: 3 Credits.
Grading Basis: Letter Grade

PHIL 5101 - Pragmatism: Classical American Philosophy (3 Credits)
The most significant philosophical tradition born in the United States is pragmatism. Examines several of the most important classical works of this tradition, the influence of thinkers who have helped pragmatism, and the contemporary relevance of this tradition. Figures who may be included in this course are: Emerson, Pierce, Royce, James, Dewey, Mead and Rorty. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4101, SSCI 5101, HUMN 5101. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

Typically Offered: Fall.

PHIL 5200 - Justice, Freedom, and Power: Social and Political Philosophy (3 Credits)
What is justice? What justifies a government as moral? Why should individuals obey the state's laws? Can anarchism work? Is private property necessary to a free society? Is social justice? What is freedom — and what is oppression? Is gender, ethnic, and religious diversity necessary for a just society? Why? This course will raise these kinds of questions as it examines basic issues in social and political philosophy (e.g. justice, freedom, individuality, power and community). Restriction: Restricted to Graduate and Graduate NonDegree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 3200. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)
PHIL 5220 - Art, Beauty, and Aesthetic Criticism: Philosophy of Art (3 Credits)
What makes something a work of “art”? How should art be interpreted or evaluated? Can we really debate about “taste” or beauty? Why do we call some people “artists” or some experiences “aesthetic”? Where does creativity come from? This course investigates such questions, offering a range of historical and contemporary answers, and examines the social, political, and philosophical roles of art in contemporary society. Methods of engaging these questions may include multimedia technologies as well as individual and group field trips to local art venues. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4220 and HUMN 5220. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)
Typically Offered: Fall, Spring.

PHIL 5242 - Medicine, Health Care, and Justice: Bioethics (3 Credits)
Anyone entering a medical profession must confront tough ethical issues and dilemmas. These often arise suddenly, so practitioners best preparation is to think ahead about what will likely occur. This course introduces students to a variety cases and philosophical theories useful to healthcare careers. For example, What is “health” and who determines it? Is there a right to health care? How should medical scarcity (vital organs, vaccines, supplies, etc.) be addressed? What duties are owed to patients by healthcare providers, and why? On what grounds may medical treatment be demanded — or refused? The goal of the class is to train students to be nimble and imaginative in how they reason about the difficult cases they will face in their career. Suggested prerequisite one or two previous courses in philosophy, and a minimum grade of C in each course are strongly recommended; if the student lacks this coursework, consult with the professor prior to registration. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4242, HUMN 5242, SSCI 5242. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)
Typically Offered: Fall.

PHIL 5260 - Why Obey the Law? Introduction to Philosophy of Law (3 Credits)
What is a legal “law”? What justifies its ability to force our compliance? How is law distinct from morality? What makes some laws immoral? Is ignorance of the law ever a valid excuse? We all find ourselves entangled with the law at some point. Sometimes we’re the victim and sometimes we stand accused; even beyond those special circumstances, we all have to live with the law and the many ways it regulates (or controls) our conduct. While this course is recommended for pre-law students, this course will every students to be intellectually critical of what law is, how it can and is justified, and how to assess it on grounds that reach beyond to law, such as logic or ethics. Both historical and contemporary sources will be used to survey theoretical positions on the nature of law. Figures may include (among others): Plato, Aristotle, Aquinas, Locke, Kant, Holmes, Mackinnon, Dworkin, Hart, Devlin, as well as more contemporary Supreme Court justices and case law. Suggested prerequisite one or two previous courses in philosophy, and a minimum grade of C in each course are strongly recommended; if the student lacks this coursework, consult with the professor prior to registration. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4260. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)
Typically Offered: Fall.

PHIL 5300 - Mind, Body, and Consciousness: Philosophy of Mind (3 Credits)
Consideration of the problems in the philosophy of mind, such as the mind-body problem, the problem of our knowledge of other minds, the compatibility of free will and determinism, and discussion of such concepts as action, intention, motive, desire, enjoyment, memory, imagination, dreaming and self-knowledge. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4300. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)
Typically Offered: Fall.

PHIL 5308 - Contemporary Feminist Thought (3 Credits)
This course explores contemporary feminist thought in philosophy and literature in the 20th and 21st centuries. Topics include lesbianism, black feminism, Chicana feminism, transgender identity, women and work and others. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with ENGL 4308, ENGL 5308, PHIL 4308, WGST 4308, WGST 5308. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)
Typically Offered: Spring.
PHIL 5341 - Latin American Philosophy (3 Credits)
This course introduces students to Latin American Philosophy by exploring its indigenous roots, its recurring themes of struggle against colonial domination, and the way this tradition works with and against European and Anglo-American philosophical ideas. Students will also learn about how questions of identity, especially those of ethnicity, have developed within this area of philosophy. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with PHIL 4341. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

PHIL 5350 - Philosophy of Science (3 Credits)
This course examines some of the central philosophical questions concerning the nature of scientific investigation, such as the logical relation of evidence to hypothesis, the objective adjudication of competing hypotheses, the logical function of modeling in empirical inquiry, the criterion for a classification system to underwrite induction and explanation, the explanatory relationships between the differing sciences, as well as the theoretical and pragmatic function of scientific law and its relationship to explanation. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4350. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)
Typically Offered: Spring.

PHIL 5430 - How to think green: Environmental Ethics (3 Credits)
Is it wrong to extinguish a species? What makes cruelty to animals wrong? Do trees have rights? Is the earth a resource we can use any way we want? Is vegetarianism a more ethical way to live — or just another lifestyle choice? As citizens of the world, we are bombarded by such questions. Understanding what is fundamental clarifies thinking and coordinates action. This course introduces ethical theories relevant to problems such as animal and species welfare, deforestation, pollution, climate change, and the sustainability of the planet. By examining multiple perspectives, students gain confidence judging which issues and data are significant and deciding what kind of world we should create with our actions and inactions. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 3430, HUMN 5430 and SSCI 5430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5441 - Philosophical Reasoning Skills (3 Credits)
This course provides Philosophy majors and other philosophically interested students with the skills and tools necessary for effectively navigating philosophical discussions. In this course we will cover issues such as validity and soundness, as well as several systems useful for demonstrating validity. The course will in addition address important issues in the philosophy of language, including the very important question of definitions, as well as the use of thought experiments and avoidance of informal fallacies. Finally, since philosophical reasoning increasingly involves knowledge of the methods of scientific reasoning, those skills will also be included in the course. Cross-listed with PHIL 3441. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5450 - Punishment and Social Justice (3 Credits)
We will use the critical tools of philosophy to think about how contemporary practices of punishment are justified, how they shape the world we live in and what alternative normative frameworks might be. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 5450. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5480 - Perspectives on Good and Evil (3 Credits)
Examines "problem of evil" as formulated in the philosophical tradition. Presents classical formulation of the problem, traditional solutions & classical critiques of each answer. Considers perspectives of various religious orientations, which deal differently with the question of suffering. Restriction: Restricted to students with Graduate standing. Cross-listed with PHIL 4480, RLST 4480/5480. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5500 - Feminist Philosophy (3 Credits)
Seminar on key debates & figures in historical & contemporary feminist philosophy. Topics may include: rights, embodiment, gender, sexuality, race, reason, & violence. Figures may include: Wollstonecraft, Stanton, Beauvoir, Judith Butler, and bell hooks. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4500, WGST 4500 & 5500. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)
PHIL 5600 - Questioning Religious Belief and Practice: Introduction to Philosophy of Religion (3 Credits)

Does God exist? Can the existence of God be proved? When is believing on faith acceptable? How or why is there a "problem of evil"? What are the attributes of a "god" and how can they be known, if at all? What is the relation of God to the world we experience? How does morality relate to religious belief and practice? The goal of the course is to broaden and deepen our understanding of key philosophical debates within religious traditions as we study prominent thinkers in the history of philosophy.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4750. Max hours: 3 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4755, HUMN 5750 and SSCI 5750. Max hours: 3 Credits.
Grading Basis: Letter Grade

PHIL 5655 - Differing Concepts of God (3 Credits)

God, Gods, and Goddesses have been imagined in many different modes, forms, aspects, and guises throughout human history. This course investigates Paleolithic models of God, the Great Goddess of the Neolithic era, the Gods of mythological traditions, Biblical God, the abstract God of the philosophers, the God of the pantheists, the deists, and the God of the mystics.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4650, RLST 4400 and 5400. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4770. Max hours: 3 Credits.
Grading Basis: Letter Grade

PHIL 5750 - Introduction to Phenomenology (3 Credits)

Examines the contribution of phenomenology to selected topics in the theory of meaning, philosophy of mind, ontology, and epistemology, through a study of such philosophers as Husserl, Heidegger, Sartre and Merleau-Ponty.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4750. Max hours: 3 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5755 - Philosophical Psychology (3 Credits)

Explores debates about psyche and body, mind and world, self and others, and consciousness and nature. Examines the philosophical questions related to those debates that arise within theories of perception, affect and cognition offered by influential psychological models.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4755, HUMN 5750 and SSCI 5750. Max hours: 3 Credits.
Grading Basis: Letter Grade

PHIL 5770 - Hegel (3 Credits)

A systematic study of the thought of G.W.F. Hegel through his most important and influential works: The Phenomenology of Spirit; The Encyclopedia of Philosophical Sciences; The Science of Logic; Lectures on the Philosophy of History; and his lectures on the history of philosophy, art and religion. Focus of the course varies.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4770. Max hours: 3 Credits.
Grading Basis: Letter Grade

PHIL 5780 - Heidegger (3 Credits)

Studies the thought of Martin Heidegger, one of the most important philosophers of the 20th century. Includes texts from both Heidegger's early and later periods, and focuses on his analyses of human subjectivity and being. Prereq: Six credit hours in Western philosophy.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4780. Max hours: 3 Credits.
Grading Basis: Letter Grade

PHIL 5790 - Nietzsche (3 Credits)

A close study of Nietzsche's philosophical writings, with attention to his significance for philosophy in the 20th century and beyond. Cross-listed with PHIL 4790. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

Typically Offered: Spring.
PHIL 5795 - Marx and Marxism (3 Credits)
A close study of the most influential works of Karl Marx and subsequent theorists who provide either an influential interpretation of the works of Marx or contribute to an innovative application or elaboration of the basic tenets of Marxism. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4795. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA) Cross-listed with PHIL 4795. Max hours: 3 Credits.

PHIL 5800 - Plato (3 Credits)
A careful study of Plato’s writings, emphasizing the dialogue form, and discussion of Plato’s significance for the history of ethics, political theory, psychology, metaphysics and epistemology. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4800. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA) Cross-listed with PHIL 4800. Term offered: spring. Max hours: 3 Credits.

PHIL 5810 - Aristotle (3 Credits)
Examines Aristotle's systematic philosophy and discusses its contributions to logic, epistemology, physics, psychology, metaphysics, ethics and political theory. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4810. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA) Cross-listed with PHIL 4810. Term offered: spring. Max hours: 3 Credits.

PHIL 5812 - Special Topics in Philosophy (3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5820 - Hume (3 Credits)
Considers the work of eighteenth century philosopher David Hume. Emphasis on unity of Hume's thought. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 4820. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA) Cross-listed with PHIL 4820. Max hours: 3 Credits.

PHIL 5830 - Kant: Freedom, Reality, and the Mind (3 Credits)
Why do motives matter in ethics? What is an ethical duty? How do sensations and ideas combine to make reality unified and coherent? Kant’s philosophy answers these questions by providing a profound synthesis of the philosophers before him. Kant’s work still influences ethics, politics, metaphysics, epistemology, and science today. This course involves students in close study of Kant’s revolutionary thought as it appears in several of his major works. Strongly Recommended: PHIL 3002 or 3022, a minimum grade of "C" in each previous philosophy course. If the student does not have this coursework, consulting with the instructor prior to registration is strongly recommended. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 3760. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA) Cross-listed with PHIL 3760. Term offered: fall. Max hours: 3 Credits.

PHIL 5833 - Existentialism (3 Credits)
Examines one of the most influential movements in recent European thought, beginning with existentialism’s 19th century roots, and continuing on to the existentialist philosophers of the 20th century. Figures covered may include Dostoyevsky, Kierkegaard, Nietzsche, Heidegger, Sartre and de Beauvoir. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHIL 3833, HUMN 5833 and SSCI 5833. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA) Cross-listed with PHIL 3833, HUMN 5833 and SSCI 5833. Term offered: spring. Max hours: 3 Credits.

PHIL 5840 - Independent Study: PHIL (1-9 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9. Typically Offered: Fall, Spring, Summer.

PHIL 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
PHIL 5900 - John Dewey (3 Credits)
John Dewey was one of the most important of the American philosophers and public intellectuals of the twentieth century. Topics may include Dewey's philosophical naturalism, pragmatist epistemology, process metaphysics and philosophies of experience, aesthetics, religion, technology and democracy. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHYS 4900. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5920 - Philosophy of Media and Technology (3 Credits)
A philosophical examination of interrelationships between contemporary media, technology, and their impacts upon character of contemporary life and values. Topics may include ethics, epistemology, democracy, advertising, media literacy and criticism. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHYS 4920, HUMN 5920, SSCI 5920. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

PHIL 5933 - Philosophy of Eros (3 Credits)
What does it mean to understand philosophy as an erotic activity? This question will be examined, first by studying Plato’s dialogues—such as Lysis, Symposium and Republic—and then by reading texts from Sigmund Freud, Michael Foucault and others. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA). Cross-listed with PHYS 4933, WGST 4933/5933, SSCI 5933 and HUMN 5933. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Bachelors to Masters program (PHIL-BA-BMA)

**Physics (PHYS)**

PHYS 5211 - Quantum Mechanics (3 Credits)
A course in which both wave and matrix mechanics are developed and applied to selected problems in atomic physics. Restriction: Restricted to Graduate and Graduate Non-Degree majors Term Typically Offered: Fall. Cross-listed with PHYS 4211. Max hours: 3 credits
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

PHYS 5311 - Electricity & Magnetism (3 Credits)
Elements of mathematical theory of electricity and magnetism, including electrostatics, magnetostatics, polarized media, direct and alternating current theory, and introduction to electromagnetic fields and waves. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Term Typically Offered: Spring. Cross-listed with PHYS 4311. Max hours: 3 credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

PHYS 5315 - Bioelectromagnetism (4 Credits)
The fundamental theory of electric and magnetic fields is developed and applied to problems in biology and medicine. Examples in medical diagnostics and treatment are built upon rigorous application of Maxwell’s equations and constitutive models of electromagnetic properties of biomaterials. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with PHYS 4351. Term offered: spring, infrequent. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

PHYS 5352 - Bioelectromagnetism NM (4 Credits)
This course is the non-majors’ companion to PHYS 4351/5351 (taught simultaneously) using modeling approaches accessible to the general science student. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with PHYS 4352. Term offered: spring, infrequent. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

PHYS 5400 - Scientific Instrumentation (3 Credits)
Conceptual and practical knowledge needed to design scientific instruments, develop technical products, and use special laboratory procedures to research. Topics include materials, mechanisms, electronics, and optics. Cross-listed with PHYS 4400. Repeatable. Infrequently Offered. Max hours: 6 Credits.
Grading Basis: Letter Grade

PHYS 5401 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

PHYS 5678 - Quantum Computing (3 Credits)
The course teaches students the principles, the algorithms and the programming methods of quantum computing, and also discusses the associated physics and mathematics background required. Other related topics such as quantum communication and quantum entanglement will also be discussed. Prereq: Permission of Instructor. Term Typically Offered: Spring. Cross-listed with PHYS 4678, ELEC 4678, and ELEC 5678. Max hours: 3 Credits.
Grading Basis: Letter Grade

PHYS 5679 - Quantum Computing Algorithms (3 Credits)
The course discusses several seminal quantum algorithms, including the quantum Fourier transforms, Grover’s and Shor’s algorithms, followed by explaining several advanced quantum computing algorithms, including quantum error correction, sparse linear systems, and variational eigensolver. Google Cirq quantum programming library will be used for actual quantum programming implementations of the algorithms discussed. Instructor permission required. Cross-listed with PHYS 4679, ELEC 4679, and ELEC 5679. Max hours: 3 Credits.
Grading Basis: Letter Grade
PHYS 5680 - Quantum Computing Technology (3 Credits)
Students will explore some of the concepts and experimental practices for realizing quantum computers. They will engage in laboratory practice of relevant skills including high-performance analog electronics; optics-based quantum encryption and eraser implementations; RF electronics; and vacuum and cryogenic techniques. Instructor permission required. Cross-listed with PHYS 4680, ELEC 4680, and ELEC 5680. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

PHYS 5681 - Quantum Technology Systems (3 Credits)
Students will explore a systems approach toward experimental practices for realizing quantum information science and engineering (QISE), with a focus on vacuum and cryogenic techniques and integration of electronics subsystems into a "dry" cryostat. They will engage in laboratory practice of relevant skills including creation and measurement of high vacuum, methods for reaching ultra-low temperatures, concerns in the design and construction of cryogenic apparatuses, and operation of a "dry" cryogenic system at 4 K, including measurements on superconducting quantum interference devices. Cross-listed with ELEC 4681, ELEC 5681 and PHYS 4681. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

PHYS 5840 - Independent Study: PHYS (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Term offered: spring, summer, fall infrequently. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Typically Offered: Fall, Spring, Summer.

PHYS 5850 - Physics for Design and Innovation I (3 Credits)
A service-learning project using fundamental physical principles to design a prototype scientific instrument, technical device, or technical process for a real-world client. Includes instruction on project management, intellectual property, and market analysis. Cross-listed with PHYS 4850. Repeatable. Term offered: infrequent. Max Hours: 6 Credits.
Grading Basis: Letter Grade

PHYS 5852 - Physics for Design and Innovation II (3 Credits)
A capstone project using fundamental physical principles to prototype a scientific instrument, technical device or technical process. The focus is on the student's own product idea. Includes online guided readings on the wider context of product development. Students should consult with instructor on necessary physics and mathematics preparation for the project. Prereq: PHYS 4850 or 5850 with a C- or higher. Cross-listed with PHYS 5852. Repeatable. Term offered: infrequent. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: PHYS 4850 or 5850 with a C- or higher.

PHYS 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

PHYS 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Note: Students must check with a faculty member before taking this course. Repeatable. Term offered: spring, summer, fall infrequently. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

PHYS 5950 - Master's Thesis (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.

PHYS 5960 - Master's Project (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.

PHYS 5980 - Advanced Physics Topics (1-3 Credits)
Covers a particular topic as announced in the 'Schedule Planner.' Note: May be taken more than once for credit in different topics. Note: this course assumes that students have completed PHYS 2811 or equivalent. Prereq: Graduate standing. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

PHYS 6840 - Independent Study: PHYS (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Political Science (PSCI)

PSCI 5000 - State of the Discipline (3 Credits)
Introduces graduate study in political science. Provides an overview of theories and methods in the four fields of American politics, political theory, comparative politics and international relations. Guest lectures by department faculty. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
Typically Offered: Fall, Spring, Summer.

PSCI 5001 - Theories of Capitalism (3 Credits)
Is capitalism “the legitimate racket of the ruling class”, as Al Capone argued? Is it the “system under which greed does the least harm”, as Milton Friedman suggested? Or, is it as John Keynes had it, “the astounding belief that the most wickedest of men will do the most wickedest of things for the greatest good of everyone”? This advanced undergraduate/graduate course in theories of political economy engages ideas, concepts, actors, institutions, relationships, dynamics, and structures central to a deep understanding of global industrial capitalism. The course is centered on the works of seminal theorists of capitalism from the 18th century forward, including Adam Smith, David Ricardo, Alexander Hamilton, Friedrich List, Karl Marx, CLR James, Harry Magdoff, Friedrich Hayek, Martin Luther King, Jr., Kwame Nkrumah, Jeff Sachs, Amartya Sen, and Vandana Shiva. Students in the course are provided ample opportunities, across a variety of innovative assignments, to explore the historical and social context of the theoretical perspectives presented, to compare these perspectives to one another, and to make substantive connections between theory and practice. Note: Students are not expected to have any prior coursework in political science. Students are expected to make progress in developing their reading, writing, analytical and critical thinking skills. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with PSCI 4001. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

PSCI 5008 - Graduate Topics in Political Science (1-3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
Typically Offered: Fall, Spring, Summer.

PSCI 5009 - Politics of the Budgetary Process (3 Credits)
Explores budgeting and financial management in the public and nonprofit sectors. An overview of public sector and nonprofit fiscal management is provided, along with thorough exploration of the political influences that affect financial decision-making. Note: Offered as a special topics course in an intensive three-weekend format, which is reflected in the syllabus. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5011 - GIS in Political Science (3 Credits)
Computer lab course developing methodological skills in Geographic Information Systems (GIS) in political contexts. Geospatial computerized mapping skills are important in political fields such as urban planning, electoral analysis, environmental justice, demographics, public health, and criminal justice. Designed for beginners. Cross-listed with PSCI 4011. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5014 - Seminar: American Politics (3 Credits)
Foundations of U.S. politics and contemporary political issues. Federal/state/community relations. Relationship among the three branches of the Federal government. Colorado controversies arising under the U.S. Constitution. Cross-listed with PSCI 4094. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5024 - State Politics: Focus on Colorado (3 Credits)
Analysis of unique aspects of Colorado government and politics. Political comparison of Colorado with other states. Preparation and discussion of research papers. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Term offered: fall, summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
Typically Offered: Fall, Summer.
PSCI 5025 - Local Governance and Globalization (3 Credits)
Introduces international political economy, consequences of globalization for localities, interplay between wealth and power among nations, multinational corporations, NGOs and the UN, and impact of their actions on local governments. Topics include development, aid, trade, outsourcing, eco-sustainability and global equity. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4025. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5044 - The Presidency (3 Credits)
An overview of the historical, constitutional, and functional aspects of the presidency. Focuses on the powers and vulnerabilities of the presidency and on the style and politics of the current president. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4044. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5054 - The Legislative Process (3 Credits)
An intensive examination of the structures and interactions through which laws are made in the United States. The major emphasis is the national level, but considerable attention is devoted to state legislatures and local lawmaking bodies. Impact of money and interest groups. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5057 - Religion and Politics (3 Credits)
Exploration of: (1) theoretical perspectives on the relationship between religion and politics; (2) causes of and justifications for the historical development of the Western separation of "church and state," (3) contemporary responses to and analyses of this separation; and (4) several current debates about public policy in America that reveal tensions between these two spheres. Cross-listed with PSCI 4057, and RLST 4500, 5500. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5075 - Gentrification and Social Equity (3 Credits)
Study causes and consequences of urban gentrification, and explore strategies of grassroots resistance and social equity solutions that are being mobilized to challenge the forces of gentrification. Contrast common celebrations of the waves of capital reinvestment that are fueling urban revitalization with the frequent claim of many low-income neighborhoods: "Gentrification is Class War!" Cross-listed with PSCI 4075. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5105 - Comparative Politics: Europe (3 Credits)
Examination and writing of research papers on selected topics of industrial democracies, especially those of Europe. Cross-listed with PSCI 4105. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5145 - Indigenous Politics (3 Credits)
Surveys the status of the world’s native peoples and nations, and the role of law and politics in the future of indigenous peoples in the global arena. Examines questions of human rights, economic development, and international law and politics. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4146 and ETST 4146. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5176 - Civil Resistance in Theory and Practice (3 Credits)
This course assesses forms of civil resistance against political oppression. The focus is on the struggle of non-violent resistance movements. Students will learn about the origins, successes, tactics, and strategies of civil resistance groups. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4176. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5206 - Social Movements, Democracy and Global Politics (3 Credits)
Examines global social movements as new political actors within world politics; how theoretical perspectives in international relations and democracy address these actors; and the forms of interaction among these actors, states, and global governance institutions. Cross-listed with PSCI 4206. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5216 - World Politics Seminar (3 Credits)
This course introduces important theories in the field of international relations ranging from realism, liberalism and constructivism to critical, feminist and green theories, indigenous approaches and queer theory. It also explores important global issues such as armed conflict, terrorism, human rights, international political economy, immigration, pandemics, and environmental degradation. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5217 - Human Rights: Theory and Practice (3 Credits)
Explores the ideas of international human rights and the practical efforts to actualize rights in societies around the world. Students study the theories of rights and the evolution of rights in history. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4217. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5224 - Dictatorships in 21st Century (3 Credits)
Analyzes and classifies political systems of non-democratic regimes. Reviews earlier and contemporary theories that explain the origins, survival and death of authoritarian regimes. Discusses the impact of dictatorial rule on domestic developments as well as on international relations. Cross-listed with PSCI 4224. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5225 - Democracy and Democratization (3 Credits)
Examines the conditions under which countries turn from authoritarianism towards democracy and become stable democratic regimes. Also examines the impact of foreign and international factors on new democracies. Cross-listed with PSCI 4225. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5236 - Seminar: American Foreign Policy (3 Credits)
Examines selected methodological and substantive problems. Particular emphasis on elements of national decision making, America's adaptation to the changing world, and opportunities for student contributions through research and discussion. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5238 - Seminar: Comparative Foreign Policy (3 Credits)
Examination of the effects of leaders, groups, institutions, strategic cultures and external influences on national foreign policy-making processes and comparative analysis of foreign policy making of great and emerging powers. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5245 - Gender, Development and Globalization (3 Credits)
Examining the cost and impact of globalization; not only on women and gender but economic equality, human movement and displacement, sustainable development and the environment. Highlighting the complexities of a highly interconnected world and intersectional nature of a globalized world, answering the question: Who Wins? Who Loses? Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4248, WGST 4248 and WGST 5248. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5246 - Seminar: National Question and Self-Determination (3 Credits)
Designed to provide students with a broad theoretical and empirical understanding of the causes of ethnic conflicts and to assess different strategies of conflict resolution. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5256 - Social Justice And Globalization (3 Credits)
Examines issues of justice and ethical responsibility in a globalizing world. Do moral obligations of individuals and institutions end at national borders or do they encompass all human beings and extend to the environment and to future generations? Cross-listed with PSCI 4265.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5265 - International Law (3 Credits)
Investigates the body of law that regulates relations between nations and provides a framework for solving common problems and disputes between nations. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4266. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5266 - Conflict Resolution and Public Consent Building (3 Credits)
Alternative strategies for resolving or mediating conflicts facing public or nonprofit organizations and for building public consent, with emphasis on personal, interpersonal, organizational, interest-group, cross-cultural, and roots of conflict and bases for consent. Cross-listed with PSCI 4274. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5274 - Conflict Resolution and Public Consent Building (3 Credits)
Alternative strategies for resolving or mediating conflicts facing public or nonprofit organizations and for building public consent, with emphasis on personal, interpersonal, organizational, interest-group, cross-cultural, and roots of conflict and bases for consent. Cross-listed with PSCI 4274. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5276 - International Relations: War or Peace? (3 Credits)
Examines the international relations of war and peace. Investigations of the efficacy of international law, just-war norms and the UN in preventing or containing conflict. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4286. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5326 - Advanced International Political Economy: Globalization (3 Credits)
Engages the current debate about globalization. Conceptualizes globalization and evaluates the pros and cons of global trade and finance for developed and developing countries. Develops a model for a sustainable and just global economy. Cross-listed with PSCI 4326.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5340 - Advanced International Political Economy: Global Supply Chain (3 Credits)
Many people globally rely on long, global supply chains for jobs and incomes and to acquire the goods and services they need to survive. These chains connect people all over the world—from farmers and seamstresses to multinational corporations and investment banks—to one another as they work to bring products to our store shelves and homes. Yet, as current events clearly demonstrate, these long and complicated chains are fragile and easily disrupted, contributing to rising vulnerability, insecurity, inequality, and poverty around the world. How did it come to pass that we rely on such a complex system for the things we need? Is this kind of interdependence a good idea? What alternatives exist for restructuring trade, work, and production? These questions have occupied political economists for centuries and for good reason. Thinking about supply chains means thinking about survival and our relationships with one another and the Earth. This course tackles contemporary and historical supply chains with an eye toward thinking about the future of global production, trade, and work. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4340. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5354 - Seminar: Environmental Politics and Policy (3 Credits)
Consideration of competing models of the policy process in natural-resources decision making. Focus on selected case studies. Impact of environmental and pro-growth forces on the political process. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5365 - Global Ecological Crises (3 Credits)
Overview of global ecological problems such as climate change, transboundary pollutions, and loss of bio-diversity in an attempt to understand the political, economic, and cultural forces behind these problems and the status of legal and policy initiatives to address them. Cross-listed with PSCI 4365. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5414 - Non-Profits and Social Change (3 Credits)
Explores role of non-profits in catalyzing social change. What are obstacles and opportunities to leveraging social change through nonprofits? What factors shape non-profits to be either transformational or systemstabilizing forces? Cross-listed with PSCI 4414. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5424 - The Social Economy and Sustainable Development (3 Credits)
Theory and practice of social economy initiatives like worker cooperatives, micro-credit networks, mutual aid associations and the fair trade movement. How do grass-roots activists and legal frameworks affect the direction and possibilities of the solidarity economy? Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5434 - The Cooperative Movement: Politics and Policy (3 Credits)
Explores the history, current status, and emerging developments in the cooperative movement, both domestic and global. Topics include the political, organizational, and financial challenges and opportunities facing worker, producer, and consumer cooperatives. Examines how cooperative enterprises have adopted both reformist and revolutionary responses to the capitalist system, and how legal regimes and grassroots movements shape the future of cooperative enterprises. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5446 - Advanced Indigenous Peoples’ Politics (3 Credits)
Builds upon the theoretical and applied foundations of PSCI 4146. Intensive study of international legal and political developments are examined, particularly in the United Nations and the Organization of American States systems. Note: this course assumes that students have completed PSCI 4144 or 4146 or equivalent. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4446. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5457 - American Political Thought (3 Credits)
Critical examination of American political life at the intersections of social categories such as race, class, gender, sexuality, disability, and Indigeneity. Exploration of key and marginal thinkers through a variety of texts and genres. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4457, ETST 4457, and ETST 5457. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5468 - Research Methods in Political Science (3 Credits)
Analysis and evaluation of research methods, techniques, and empirical materials in political science application to Internet research. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5477 - The U.S. Constitution: Law and Politics (3 Credits)
An intensive analysis of the most recent doctrinal developments in the areas of federal jurisdiction, federalism, separation of powers, commerce, taxing and war powers, civil liberties and civil rights. Note: this course assumes that students have completed PSCI 4477 or 4487 or equivalent. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5445 - Immigration Politics (3 Credits)
Introduces students to central theories of migration and a survey of immigration law and policy in the 20th century. Highlights experiences of Mexican and Latin American immigrants and related topics, including U.S.-Mexican foreign relations, bilingual education, undocumented immigration and globalization. Cross-listed with PSCI 4545. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5540 - Labor Law and Collective Bargaining (3 Credits)
Examines transnational trade unionism amid the global economy, with an emphasis on trade unions in a comparative perspective. How do labor activists and trade unions strive to establish institutions and mechanisms to assert worker rights and power in today’s international political-economic? Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5541 - American States systems. Note: this course assumes that students have completed PSCI 4446. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Term Offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5555 - International Women’s Resistance (3 Credits)
Examines local and international struggles of women to build peace and justice by resisting systems of inequality such as colonialism, racism, patriarchy, globalization, and religious intolerance. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4555, WGST 4555/5555 and ETST 4555. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5610 - Seminar Middle East Politics (3 Credits)
Examines the Middle East regional system and the region’s role in world politics. Investigates questions regarding politics in Iran, Iraq, Palestinian-Israeli relations, political Islam, and relations with the United States. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5615 - Seminar Chinese Development (3 Credits)
Discussion of readings about China. Analysis of several of the following: party-government relations, ideology and political behavior, leadership, diplomacy, political and economic development and post-Mao reforms. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5726 - Seminar on U.S. and China Relations (3 Credits)
Detailed examination of historical context and current issues in U.S./China relations. Emphasis on modern period, with particular attention to changing relations in context of rising power of China. Cross-listed with PSCI 4726. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5747 - Legal Reasoning and Writing (3 Credits)
Introduces the fundamentals of legal reasoning and legal argumentation through intensive class discussion, formal debate and writing. Attention is given to the relationship between case and statutory law and their application in trial and appeals courts in the United States. Cross-listed with PSCI 4757, COMM 4750, 5750. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5807 - Seminar: Conflict Behavior and the Politics of Violence (3 Credits)
Theoretical and empirical analysis of conflict behavior with special emphasis on the explanation of political violence. Revolution, international warfare, and urban unrest are studied as forms of political violence, and the role of systematic empirical research is emphasized in the development of general theories of intergroup conflict. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5808 - Strategies of Peacebuilding (3 Credits)
The course investigates the theories and strategies of peacebuilding in societies that have endured intrastate conflict and/or massive human rights violations and asks whether peace and justice can or should work together and how forgiveness and reconciliation might develop. Cross-listed with PSCI 4808. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5837 - Contemporary Issues in Civil Liberties (3 Credits)
Conflicting rights of individuals and groups in several areas of civil liberties, including religious groups, free speech, sexual freedom, racial quotas, and anti-governmental actions and publications. This course includes case law, readings, guest speakers and case discussions. Cross-listed with PSCI 4837. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5840 - Independent Study: PSCI (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

PSCI 5878 - War, Film, & International Law (3 Credits)
This course examines interactions of culture, politics, and law by chronologically investigating 20th-century war movies and the ways experiences and norms have shaped and been shaped by cinematic representations. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA). Cross-listed with PSCI 4878. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (PSCI-BA-BMA or INTS-BA-BMA).
PSCI 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 6.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

PSCI 5914 - Community Organizing and Community Development (3 Credits)
The theory and practice of community organizing strategies and community development innovations. How can social activists build power at the grassroots to build equitable, sustainable, and healthy communities? Cross-listed with PSCI 4914. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Repeatable. Max Hours: 9 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5944 - CU in the City (3 Credits)
Investigation of community development strategies through seminar discussions, urban walking tours, and student field placement with a local community-based organization, non-profit, or public office engaged in community development work. Cross-listed with PSCI 4944. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA). Max Hours: 3 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (PSCI-BA-BMA or INTS-BA-BMA).

PSCI 5950 - Master's Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade with IP Repeatable. Max Credits: 6.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Additional Information: Report as Full Time. Typically Offered: Fall, Spring, Summer.

PSCI 5960 - Master's Project (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing or permission of the instructor. Term offered: fall, spring, summer. Repeatable. Max Hours: 3 Credits. Grading Basis: Letter Grade with IP Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Additional Information: Report as Full Time. Typically Offered: Fall, Spring, Summer.

PSCI 5995 - Global Study Topics (1-3 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Prereq: Graduate standing or permission of the instructor. Cross-listed with PSCI 4995. Term offered: summer. Repeatable. Max Hours: 3 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Summer.

Psychology (PSYC)

PSYC 5164 - Psychology of Perfection (3 Credits)
Studies sensory processes and perceptual variables. Covers processes related to vision, audition, gustation and olfaction. Prereq: PSYC 1000 and 2220 with a C- or higher or Graduate standing. Cross-listed with PSYC 4164. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing

PSYC 5263 - Hormones and Behavior (3 Credits)
The hormonal regulation of behavior will be the primary focus of this course. Topics include: hormonal basis of sexual differentiation and behavioral differences, parental behavior, biological rhythms, aggression, mood and stress. Prereq: PSYC 1000 and 2220 with a C- or higher or Graduate standing. Cross-listed with PSYC 3263. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing

Typically Offered: Spring.

PSYC 5264 - Exercise, Brain and Behavior (3 Credits)
This course explores the impact of physical activity status-being sedentary or physically active-on brain function and behavior. Topics include effects of exercise on cognitive function, mood disorders, stress, anxiety, sleep and drug addiction. Emphasis will be placed on understanding the neurobiological mechanisms by which exercise impacts behavior. Students who have received credit for this topic listed under PSYC 3600 may not receive credit for this course. Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing. Term offered: fall. Cross-listed with PSYC 3264. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing

Typically Offered: Fall.
PSYC 5265 - Drugs, Brain and Behavior (3 Credits)
Explores the pharmacological, biological, and behavioral basis of drug effects. Topics include mechanisms of drug action, brain reward pathways, role of environment and history on drug effects, and the impact of science on drug abuse and medication development. Prereq: PSYC 1000 and 2220 with a C- or higher or Graduate standing. Term offered: fall, spring, summer. Cross-listed with PSYC 3265. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing
Typically Offered: Fall, Spring, Summer.

PSYC 5803 - Principles of Psychological Testing (3 Credits)
Principles underlying construction, validation, and use of tests of ability, intelligence, and personality and of attitude surveys. Covers statistical topics such as content and construct validity, item analysis, and reliability analysis. Prereq: Admission to psychology graduate program. Cross-listed with PSYC 4803. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 5822 - Aging, Brain and Behavior (3 Credits)
Examines the aging process, behavioral changes during senescence and the accompanying changes in the aged brain. Changes that are part of healthy aging are studied, as well as age-related brain disorders. Prereq: PSYC 1000 and 2220 with a C- or higher or Graduate standing. Cross-listed with PSYC 3822. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PSYC 1000 and PSYC 2220 with a C- or higher or Graduate standing
Typically Offered: Fall.

PSYC 5840 - Independent Study: PSYC (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeateable. Max Credits: 12.

PSYC 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

PSYC 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeateable. Max Credits: 12.

PSYC 5990 - Topics in Psychology (1-3 Credits)
Advanced study of special topics to be selected by the instructor. Note: May be repeated for credit. Prereq: Permission of instructor. Cross-listed with PSYC 4990. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeateable. Max Credits: 3.
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 6200 - Developmental Psychopathology (3 Credits)
The study and prediction of maladaptive behaviors and processes across time. Students develop a sophisticated understanding of important concepts related to emotional and behavioral problems in children and adolescents, including DSM-IV-TR diagnostic criteria and the basic tenets of successful intervention. Prereq: Admission to the Psychology MA, Clinical or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 6840 - Independent Study (1-3 Credits)
A structured experience, planned and implemented with the assistance of a sponsoring faculty member in ongoing programs of research or other scholarly activity. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Admission to the graduate program in psychology. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeateable. Max Credits: 12.

PSYC 6841 - Independent Study: PSYC (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeateable. Max Credits: 9.

PSYC 6910 - Research Practicum (3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeateable. Max Credits: 12.

PSYC 6930 - Clinical Internship (1-6 Credits)
Clinical experience in a setting which provides supervision by qualified professionals. Students participate in assessment, intervention, and/or evaluation and research. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Completion of 24 hours of course work in the UCD Psychology MA, Clinical program. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeateable. Max Credits: 12.
PSYC 6950 - Master's Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

PSYC 7144 - Advanced Cognition and Emotion (3 Credits)
Overview of contemporary psychological theories and research in human learning, memory, cognition, and emotion. Emphasis on cognitive and affective neuroscience and the physiological-psychological organization of functional systems. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.

PSYC 7205 - Advanced Developmental Psychology (3 Credits)
A survey of neurobiological, cognitive, social and cultural processes in human development from conception through adulthood. Prereq: Admission to the Psychology MA, Clinical program or Clinical Health Psychology Ph.D. program or with permission of instructor and a graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Admission to the Clinical Health Psychology Ph.D. Program or with Permission of instructor and Graduate program director
Typically Offered: Fall.

PSYC 7220 - Advanced Biological Bases of Behavior (3 Credits)
Survey course of advances in psychobiology which inform our understanding of the brain and behavior with special emphasis on perception, action, and cognition. A major goal of the course is to foster appreciation of the importance of interdisciplinary research. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7262 - Health Psychology I (3 Credits)
Part I of a 2-course sequence. Presents crucial aspects of health psychology and behavioral medicine, including theoretical models, anatomy and physiology epidemiology, health promotion and primary prevention of medical problems. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7350 - Psychotherapy I (3 Credits)
Surveys some of the major schools of psychotherapy, including cognitive and cognitive-behavioral therapies as well as motivational interviewing. Coverage also includes therapy techniques, process of therapy, and treatment-outcome research. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7360 - Psychotherapy II (3 Credits)
Theoretical approaches and techniques used in research, assessment and treatment of major forms of psychopathology, including anxiety, depression, schizophrenia and substance abuse, as well as marital problems and childhood disorders. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7400 - Child Assessment (3 Credits)
Psychometric theory and practice in assessment of children with focus on the diagnostics, the WISC-III, and personality assessment. Restriction: Restricted to Graduate majors in PSYC and PSYH. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 7410 - Assessment I: Personality (3 Credits)
Reviews the process of selection, evaluation, administration, utilization, and interpretation of psychological tests related to psychosocial functioning. Issues of validity, reliability, utility, clinical judgement, ethics, and cross-cultural competence are reviewed. Prereq: Admission to the Clinical Health Psychology Ph.D. program, Clinical Psychology MA program, or by permission of instructor and graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7420 - Assessment I: Intellectual and Cognitive Assessment (3 Credits)
Reviews the process of selection, evaluation, administration, utilization, and interpretation of psychological tests related to cognitive functioning. Issues of validity, reliability, utility, clinical judgement, ethics, and cross-cultural competence are reviewed. Prereq: Admission to the Clinical Health Psychology Ph.D. program, Clinical Psychology MA program, or by permission of instructor and graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7445 - Diversity in Clinical Psychology (3 Credits)
Designed to foster understanding of diversity and its implications for clinical practice, research, and mental health policy. Students will learn to orient to the worldviews of clients from diverse backgrounds and to tailor their interventions to competently serve individuals in a pluralistic society. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.

PSYC 7490 - Topics in Health Psychology Summer Lecture Series (1-3 Credits)
Weekly lectures given by Clinical Health Psychology department faculty, advanced graduate students, alumni and area professionals on selected topics in the field. Note: This course is required for first, second and third-year graduate students. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Summer.
PSYC 7500 - Advanced Psychopathology (3 Credits)
Key features of major mental disorders in adult populations. Includes classification, DSM diagnosis, epidemiology, course and prognosis, age/culture/gender features, etiology and biological bases. Prereq: Admission to Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7511 - Historical and Philosophical Foundations of Psychology (3 Credits)
Philosophical and historical antecedents to contemporary psychology, with particular emphasis on clinical psychology. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7520 - Experimental Psychopathology (3 Credits)
Theories of etiology of major psychopathologies, including: personality disorders, anxiety disorders, affective disorders, substance use disorders and schizophrenia and other psychoses. Restriction: Restricted to Graduate majors in PSYC and PSYH. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7700 - Clinical Research Methods (3 Credits)
Principles of research methodology in clinical psychology. Major topics include research ethics, subject recruitment, ethnic and cultural considerations, selecting and evaluating research measures, epidemiology and comorbidity, taxonomic and outcome research and research design. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.

PSYC 7710 - Multivariate Statistics (3 Credits)
Topics include multiple regression, logistic regression, factor analysis, and structural equation modeling. Both experimental and non-experimental designs will be considered. Students will learn underlying theory of these techniques as well as how to perform analyses using software like SPSS and Mplus. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.

PSYC 7713 - Advanced Statistics (3 Credits)
Experimental design and analysis of controlled interventions and evaluations. Emphasis on multifactor analysis of variance, orthogonal contrasts, post-hoc tests, multiple regression, and analysis of covariance. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 7730 - Ethics and Professional Issues in Psychology (3 Credits)
An in-depth exploration of the values and ethical ideas that guide professional practice in psychology, including philosophical ethical principles and professional codes of conduct. Specific topics include confidentiality, informed consent, competence, and respect for persons. Students are expected to be able to think about and communicate difficult ethical concepts in the form of class participation and a major paper. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.

PSYC 7830 - Clinical Interviewing (1-3 Credits)
Students practice interviewing and develop skills, including the ability to listen actively, to critique their own work and the work of others, and to think carefully about issues that arise in clinical work with clients. Prereq: Admission to the Psychology MA, Clinical program or the Clinical Health Psychology Ph.D. program or with permission of instructor and graduate program director. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 7910 - Clinical Practicum (1-3 Credits)
Clinical experience under supervision of licensed, doctoral-level professionals. Students participate in assessment, intervention, and/or evaluation and research in a variety of settings. Note: All field placements must be approved by the Director of Clinical Training (DCT) in advance of registration. Students should enroll in 1 credit hour during year one (spring and summer semesters only) and 3 credit hours during years two (fall, spring, and summer semesters) and three (fall semester only). A total of 14 credit hours of PSYC 7910 are required. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall, spring, summer. Repeatable. Max hours: 14 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 14.
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall, Spring, Summer.

PSYC 7911 - Clinical Practicum II (1-6 Credits)
Clinical experience under supervision of licensed, doctoral-level professionals. Students participate in assessment, intervention, and/or evaluation and research in a variety of settings. Note: All field placements must be approved by the Director of Clinical Training (DCT) in advance of registration. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall, Spring, Summer.

PSYC 8100 - Clinical Behavioral Medicine (3 Credits)
Presents basic assessment and psychotherapeutic techniques used for patients with various disorders, focusing on cognitive-behavioral methods and the unique needs of patients experiencing chronic disease. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.
PSYC 8200 - Teaching Skills Workshop (3 Credits)
Students will learn, explore, and practice the basic principles and strategies of good teaching. We will also explore research and theory for teaching at the college level. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Spring.

PSYC 8262 - Health Psychology II (3 Credits)
Part II of a 2-course sequence. Further aspects of health psychology and behavioral medicine, including health service utilization, patient-provider relationships, social support, terminal illness and issues related to chronic disease states. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 8501 - Primary Care Psychology (3 Credits)
Examines emerging trends in the role of professional psychology and psychologists serving as health care providers in primary care medical settings. Knowledge, skills and attitudes as they apply to competencies unique to primary care will be covered. Prereq: PSYC 7262 and PSYC 8262 and PSYC 7730 with a B- or higher. Restriction: Restricted to PSYH-PHD majors within the College of Liberal Arts and Sciences. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 8502 - Cardiovascular Health Psychology (3 Credits)
The course focuses on research and clinical practice regarding psychological factors related to cardiovascular functioning and disease. The physiology of the cardiovascular system will be presented and primary and secondary prevention as related to psychological functioning will be emphasized. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 8503 - Group Interventions in Health Psychology (3 Credits)
The course will serve as an introduction to group psychotherapy and group process principles with a focus on the design, implementation and delivery of evidence-based group interventions in the field of Clinical Health Psychology. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall.

PSYC 8504 - Advanced Psychopharmacology (3 Credits)
In this course, we explore topics in psychopharmacology that builds upon psychopathology knowledge by identifying neurological and physiological pathways that affect cognition and psychological health and how these pathways are affected by pharmacology. The focus is on examining and critically analyzing conceptual, theoretical, and practical aspects of psychopharmacology and psychophysiology as well as how to apply these concepts to medically ill patients in psychotherapy. Restriction: Admission to the Clinical Health Psychology PhD program or with permission of instructor and graduate program director. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate majors in PSYC and PSYH.

PSYC 8550 - Advanced Social Psychology (3 Credits)
This is a graduate level seminar that broadly covers the social bases of behavior from a social psychological perspective. It includes discussion of topics such as group processes, attribution theory, discrimination, and perspectives on attitudes. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSYC 8550 - Advanced Social Psychology (3 Credits)
This is a graduate level seminar that broadly covers the social bases of behavior from a social psychological perspective. It includes discussion of topics such as group processes, attribution theory, discrimination, and perspectives on attitudes. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade

PSYC 8590 - Advanced Clinical Practicum (1-4 Credits)
Advanced clinical experience under supervision of licensed, doctoral-level professionals. Students participate in assessment, intervention, and/or evaluation and research in a variety of health care settings to address the interface between physical and psychological functioning. Note: All field placements must be approved by the Director of Clinical Training (DCT) in advance of registration. Students should enroll in 3 credit hours during years three (spring and summer semesters only) and four (fall and spring semesters only). A total of 12 credit hours of PSYC 8910 are required. Restriction: Restricted to Graduate majors in PSYC and PSYH. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall, Spring, Summer.

PSYC 8938 - Pre-Doctoral Internship (1-3 Credits)
Intensive full-time clinical experience with supervision by licensed, doctoral-level professionals. Interns participate in assessment, intervention, and/or evaluation and research in a variety of settings. Students apply through the Association of Psychology Postdoctoral and Internship Centers (APPIC) national matching process. Note: All field placements must be approved by the Director of Clinical Training (DCT) in advance of registration. Restriction: Restricted to Graduate majors in PSYC and PSYH. Department consent required. Term offered: fall, spring, summer. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restrictions: Restricted to Graduate majors in PSYC and PSYH.
Typically Offered: Fall, Spring, Summer.
PSYC 8990 - Doctoral Dissertation (1-10 Credits)
Independent research on the doctoral dissertation in Clinical Health Psychology. Prereq: Admission to the Clinical Health Psychology Ph.D. Program. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 10 Credits. Grading Basis: Letter Grade with IP Repeatable. Max Credits: 10.
Additional Information: Report as Full Time. Typically Offered: Fall, Spring, Summer.

Public Administration (PUAD)

PUAD 5001 - Introduction to Public Administration and Public Service (3 Credits)
Examines fundamental theories, structures, and processes of governance in the United States, including the evolving roles and responsibilities of public, nonprofit, and private sectors. Covers topics including public service values and ethics, cross-sector and intergovernmental partnerships, and comparative public administration. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5002 - Organizational Management and Behavior (3 Credits)
Course covers elements which, when combined, create a resilient learning organization. Topics include organization theory and design, managing human capital, group development and performance, inter- and intra-group communication, information management, and ethical decision-making. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5003 - Research and Analytic Methods (3 Credits)
Examines qualitative and quantitative research methods used to answer questions and inform decisions in public and nonprofit settings. Methods covered include reviewing scholarly literature; formulating research questions; selecting appropriate design, data collection and sampling strategies; and analyzing data. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5004 - Economics and Public Finance (3 Credits)
Evaluates the role of government with respect to provision and financing of public goods. Explores 5 broad topics: 1) welfare & microeconomics 2) expenditure theory 3) resource mobilization (emphasis on taxation) 4) fiscal federalism 5) basic budgeting & analytical tools. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5005 - The Policy Process and Democracy (3 Credits)
Introduces theoretical and applied studies of the policy process. Policy process includes how (I) issues are conceptualized and brought forward as problems needing action; (II) policies are designed and selected; and (III) enacted policies are implemented, monitored, evaluated, and revised. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5006 - Public Service Leadership and Ethics (3 Credits)
Provides understanding of the role played by leaders within and across public and nonprofit organizations, and in complex social environments. Examines theories of leadership, skills and processes employed by effective leaders, and ethical conduct of leaders in shaping societal values. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5007 - Qualitative Research Methods (3 Credits)
Focuses on qualitative research methods that incorporate field work techniques such as observation, interviews, and content analysis. The main objective is to discover practicalities and limitations of ethnographic methods with a comparative methodology perspective. Students are required to conduct a research project. Prereq: PUAD 5003 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 7007. Max hours: 3 Credits. Grading Basis: Letter Grade Prereq: PUAD 5003 with a B- or higher. Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5008 - Evidence-Based Decision-Making (3 Credits)
Course provides opportunities for students to use skills developed in Research and Analytic Methods (including developing research/evaluation questions, designing surveys/interview guides, and analyzing data) to inform decisions and/or develop recommendations in multiple policy, management, and program evaluation scenarios. Prereq: PUAD 5003 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade Prereq: PUAD 5003 with a B- or higher. Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5010 - Rocky Mountain Program (3 Credits)
This program encourages participants to examine their public sector roles, develop an understanding of their leadership styles, develop communication skills, and enhance their ability to think more systematically and strategically in their positions. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits. Grading Basis: Letter Grade Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 5030 - Denver Community Leadership Forum (3 Credits)
Designed to increase cross sector cooperation and enhance personal leadership skills and knowledge, program is administered annually February to November. Students gain skills in conflict management, participate in Outward Bound program in July, and learn leadership theories and concepts from a variety of presenters and trainers. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5110 - Seminar in Nonprofit Management (3 Credits)
This course provides an overview of the principles and concepts that are unique to nonprofit management. Topics include executive management, funding diversity, human resource management, marketing, volunteer management and ethics. Students are also given an introduction to the history and the importance of the nonprofit sector. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 3110 and CRJU 5010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5115 - Effective Grant Writing for Nonprofit and Public Sector Managers (3 Credits)
This course is designed to provide students with the knowledge and skills to perform one of the most critical functions for any public or nonprofit sector agency today: gaining funds through proposals. Students learn how to locate and analyze funding opportunities through public and private funders and how to research, plan and write effective and competitive proposals. The course provides theoretical and practical knowledge about persuasive writing, the proposal submission and review process, building effective relationships with funders and how to proceed after post-funding decisions (positive or negative). Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5120 - Nonprofits and Public Policy (3 Credits)
Examines the intersection of public policy and the nonprofit world and the ways in which each affects the other. The course examines current policy issues that relate to the nonprofit sector such as conversion of nonprofit to for-profit status, regulation of the nonprofit sector, issues of financial management, the role of nonprofits in devolution and privatization of government services, tax exemptions, "charitable choice," donor control, governance and the future of the future of the sector. The course examines the ways nonprofits have affected the policy process and public policies by exploring the factors that shape social movements, nonprofit advocacy, strategies of influence, and the role of nonprofits in social movements such as Civil Rights and the environment. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5125 - Civil Society and Nongovernmental Organizations (3 Credits)
This course is designed for students interested in the international nonprofit sector. The course compares non-Western forms of civil society with the American tradition of civil society. Students will learn about the efforts of Nongovernmental Organizations (NGOs) working in Third World countries to influence democracy, free association, and/or increased political and societal pluralism. Additionally, the course will focus on NGO management and governance issues in countries where there are strict controls and limits on the activities of NGOs. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5130 - Collaboration Across Sectors (3 Credits)
The blurring of the three economic sectors - government, business and nonprofits-- continues to increase as more partnerships are developed across sectors. This course focuses on collaboration and partnerships involving public, nonprofit and for-profit organizations. Additionally, students are expected to gain an understanding of the issues and policies associated with the bidding, contracting, program delivery and reporting processes when nonprofit organizations are contracted to achieve public sector goals and/or private sector objectives. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5140 - Nonprofit Financial Management (3 Credits)
Provides a grounding in financial management for the "non-accountant" by focusing on an array of knowledge and management skill areas necessary for allocating and controlling resources and for analyzing, reporting and protecting the fiscal health of the organization. Topics include key accounting principles, understanding and using financial statements, the budget development process, cash flow analysis, banking relationships, using the audit report, maximizing investment policy and strategy, and understanding the boundaries of tax exemption. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 4140 and CRJU 5140. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5145 - Philanthropy (3 Credits)
Today, the organized field of philanthropy and its companion field, impact investing, are growing at a remarkable speed. This course will explore the origins of philanthropy and impact investing and provide students with in-depth understanding of how philanthropy works today and the nuances that exist among different forms of philanthropy and investment: individual giving, foundations, corporate philanthropy, and impact investing. It will also explore new trends among individual and institutional investors and unpack the different approaches that funders are taking to influence how services are delivered and the striking efforts to affect systems changes. Cross-listed with PUAD 4145. Max hours: 3 credits.
Grading Basis: Letter Grade
PUAD 5150 - Fundraising & Financial Resource Development (3 Credits)
Designed to provide a comprehensive overview of funding sources available to nonprofit organizations (e.g., foundation and governmental grants, individual and corporate donations, entrepreneurial sources of revenue and events.), as well as detailed information on how to secure support of the various sources presented. Additionally, students are expected to gain both theoretical and practical knowledge relevant to why it is important to diversify an organization's revenue streams. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5160 - Nonprofit Boards and Executive Leadership (3 Credits)
The important roles and responsibilities of a voluntary board of directors and the process of governing are often misunderstood. This course explores the special powers of a nonprofit board of directors as framed by and responsive to public policy. From the perspective of organizational behavior and theory, the course examines the leadership role and interplay between board members and the executive director. The examination includes a comparative analysis of different governing models, and explores fundamental questions of board composition, the role of advisor boards, achieving effective board meetings, the realm of liability, using committees, and the board's role in fundraising, among other special subject matter. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5170 - Strategic Management for Nonprofit and Public Managers (3 Credits)
Designed to train public and nonprofit managers in the effective use of strategic management tools and techniques traditionally used by corporations. Strategic management tools and skills, although traditionally used by business, should not be seen as the exclusive domain of corporations. The course teaches students how to adapt traditional strategic management capabilities to the particular conditions of public and nonprofit organizations. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5180 - Social Entrepreneurship (3 Credits)
Designed to introduce students to the concept of social entrepreneurship. Using nonprofit (and public) organizational examples, students gain an understanding of what it means to be an innovative manager. Students study techniques designed to advance an organization's mission and increase organizational effectiveness, accountability and efficiency through the use of for-profit techniques within a nonprofit context. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5190 - Comparative Nonprofit Sector Development (3 Credits)
Students will analyze the evolution, scope, structure, financing, and role of nonprofit sector in select countries. Through readings, lectures, case studies, students will gain a depth understanding of civil society organizations' role with respect to the market and state. Restriction: Restricted to Grad and Non-Degree Grad students only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

PUAD 5200 - Education Policy (3 Credits)
This course provides a broad overview of the history, purposes, and structure of public education in the United States, including topics such as education systems and governance, institutional actors, funding, education reform trends, and policy implementation and outcomes. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5210 - Education Finance (3 Credits)
This course provides students with a fundamental understanding of public school funding and expenditures in the United States, and the impact of school finance policy and practice in driving educational and social outcomes. Key issues addressed include revenue sources and funding mechanisms; the evaluation of school funding through the lenses of equity, adequacy, efficiency, and the achievement of desired educational outcomes; specific topics such as teacher compensation, special education, and facilities funding; the strategic use of funding to drive reform in K-12 education; and the future of public education funding. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5230 - Education Systems Leadership (3 Credits)
This class uses the combined lens of history, public administration, organizational theory, and public policy analysis to better understand the complexity of public education systems in America. The class focuses heavily on recent changes to the "one best system" model that developed from the 1850s through 2000, and particularly emphasizes reforms that aim to provide greater autonomy to individual schools and encourage more of a governance role for school districts. The class is very interactive and includes a number of guest speakers and experts. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Prereq: Graduate standing (Grad or Non-Degree Grad)
PUAD 5250 - Intergovernmental Management (3 Credits)
Surveys the basic literature of intergovernmental management and examines the interactive role of managers at federal, state, and local levels of government. Emphasis is placed on current intergovernmental issues. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5260 - Managing for Social Equity (3 Credits)
This course uses a systems approach to analyze social equity through philosophical, societal, and organizational lenses, and explores the various ways in which public and nonprofit managers can impact social equity inside and outside their organizations through inclusive management and leadership approaches and techniques. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5261 - Managing Conflict and Change (3 Credits)
Explores the process of change in organizations, communities, society, and conflicts that arise. Through the use of relevant case studies and role playing exercises, students are provided a practical framework for looking at change and managing conflict associated with change. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5270 - American Public Service Environment (3 Credits)
The American Public Service Environment. This course, intended for students from cultures outside the United States and for whom English is a second language, introduces students to public service professionals working at area government and nonprofit organizations. Students learn about the American system of government, American political and cultural values, and the workplace context for public service in America. Through interactions with public service professionals and course assignments, students improve their language skills as well as their knowledge about government and civil society in America. Restriction: This course is restricted to International students enrolled in the International MPA (IMPA program). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: This course if restricted to International students enrolled in the International MPA (IMPA program)

PUAD 5290 - Comparative Public Administration for International Students (3 Credits)
This year-long course provides mid-career international students with individualized attention as they actively compare and contrast American public administration with that of their home countries, develop their own organizational and personal leadership skills, and prepare to implement lessons learned in the U.S. in their own cultural and professional context. Restriction: Restricted to International students enrolled in the International MPA (IMPA program). Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: This course if restricted to International students enrolled in the International MPA (IMPA program)

PUAD 5310 - Principles of Policy Design (3 Credits)
This course will explore the intricacies of designing public policy in different political and institutional contexts, the ways in which different tools of policy design influence the people and organizations targeted by policies, and criteria and mechanisms for assessing policy designs. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5320 - Public Policy Analysis (3 Credits)
Provides training in the systematic analysis of policy and program initiatives using an economics orientation and employing a case method. The course covers benefit-cost analysis, cost-effectiveness analysis, present values, and the treatment of multiple criteria in public sector program analysis. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5325 - Public Private Partnerships (3 Credits)
This course has been designed to introduce students to public private partnerships (PPPs) as a field of study and practice using Colorado as a laboratory for current practice, policy, strategy, management and finance. Students will engage current examples of PPPs as cases, learn and exchange in class presentations with guest lecturers currently leading PPPs and evaluate projects in class assignments doing research, analysis, and field interviews. Students will enhance their knowledge as well as skills commonly used in public, private, nonprofit and enterprise management and the public policy context and narrative of PPPs in international and U.S. practice. Cross-listed with PUAD 4325. Max hours: 3 credits
Grading Basis: Letter Grade

PUAD 5330 - Intermediate Statistical Analysis (3 Credits)
Follows PUAD 5003/7003 and is focused on more advanced statistical techniques to be used in research. These techniques include the use of regression in time series analysis; binary response; nonlinear, logistic, and profit models; and factor and path analysis. Evaluating potential problems with model specification and the remedies are included. Students are required to test hypotheses using these models with a data set. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with PUAD 7330. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5350 - Program Evaluation (3 Credits)
Describes the theory and methodology for the design of social research and demonstration projects and the application of analytic and statistical methods for evaluating public programs. Focus is on the application of evaluation methods and techniques of data interpretation. Report preparation is emphasized. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 5361 - MPA Capstone Seminar (3 Credits)
Synthesizes competencies gained throughout the course of study into a client-based research project. Students conduct independent research, complete a final written project demonstrating their qualifications and expertise, and orally present findings to a committee of faculty and public administration professionals. Prereq: PUAD 5001, 5002, 5003, 5004 or 5503, 5005 and 5006 and 5008 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Prereq: PUAD 5001, 5002, 5003, 5004 or 5503, 5005 and 5006 and 5008 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
Additional Information: Report as Full Time.

PUAD 5362 - MPP Capstone Seminar (3 Credits)
Synthesizes competencies gained throughout the course of study into a client-based research project. Students conduct independent research, complete a final written project demonstrating their qualifications and expertise, and orally present findings to a committee of faculty and public policy professionals. Prereq: PUAD 5003, 5004, 5005, 5310, 5320, 5380, 5750 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Prereq: PUAD 5003, 5004, 5005, 5310, 5320, 5380, 5750 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Typically Offered: Fall.

PUAD 5370 - Public Discourse and the Policy Process (3 Credits)
This course will explore how public discourse (as found in the argumentations, frames, narratives, and debates in news and social media) shapes and is shaped by policy processes. Students will learn skills for analyzing public discourse and ways to contribute to it and develop a better understanding of how public discourse advances (or undermines) principles of democracy. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Typically Offered: Fall.

PUAD 5380 - Public Participation, Political Equity, and Government (3 Credits)
This course explores issues related to the various ways the public engages in public affairs, including theoretical and practical insights about engaging in the policy process, administration of government programs and service delivery, political mobilization, self-governance, and more. The course addresses engagement at local, subnational, national, and supranational levels. Woven throughout the course are normative challenges associated with political equity and different ways to assess public participation and its impacts. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Typically Offered: Fall.

PUAD 5410 - Administrative Law (3 Credits)
Examines legal aspects of policy implementation particularly the relationship between courts and administrative agencies. Covers standards of judicial review and agency action; administrative procedure and due process; selected special topics such as rights, liabilities, and immunities of public employees; and administrative discretion and scientific uncertainty. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5420 - Law and Public Policy (3 Credits)
Examines the relationship between courts and legislative assemblies. Explores how legislators use the policy process to shape and influence the exercise of judicial authority, and how the courts affect the policy process in reviewing the constitutionality of state and federal legislation. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5440 - Negotiation and Conflict Resolution (3 Credits)
Focuses on concepts and skills necessary to negotiate policy and management decisions and manage internal and external conflicts. Designed to help students understand the dynamics that affect negotiations and to apply the principles and strategies of negotiation in a variety of decision making and dispute resolution contexts. Cross-listed with PUAD 4440. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5455 - Environmental and All-Hazards Management Law (3 Credits)
Conveys knowledge of the statutes, regulations, administrative law, and court decisions governing the management of hazards, natural resources, and environmental protection, with a focus on the risk and liability that individuals and organizations face in these areas of law. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5455. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5460 - Political Advocacy (3 Credits)
Addresses advocacy & lobbying issues of public policy & govt problems. Special attention is given to how advocacy process works in the public sector & policy making bodies & how lobbying techniques & processes can be understood. General focus on practical applications at all levels of govt with primary attention to state & local govt. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 5501 - Contemporary Issues in Revenue and Tax Administration and Policy (3 Credits)
This course provides a contemporary evaluation of Colorado's tax structure, revenue system, and the state budget. The interaction of politics, the initiative process, the State Constitution, and stakeholders is studied. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5502 - Public Financial Management and Policy (3 Credits)
Provides basic understanding of issues & tools relevant to financial mgmt of public & non-profit org, including managerial acct (managing resources & obligations, investing idle funds, reporting, financial statement analysis, overview of budgeting, revenue forecasting, & costing) & debt management. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5503 - Public Budgeting and Finance (3 Credits)
Covers concepts to manage the fiscal purse, prioritize resources, use financial documentation, and analyze fiscal data. Includes budget policy, content, format, processes, performance management, forecasting, inflation adjustment, time value of money, cost analysis, financial condition analysis, and spreadsheet competency. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5504 - Organization Development (3 Credits)
Studies the dynamics involved in managing and facilitating change in organizations by application of behavioral science knowledge. Emphasis is placed on both cognitive and experiential learning. A background in organization theory and administrative behavior is required. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5615 - Health Policy (3 Credits)
Draws upon existing policy models and evaluates the status of health policy formulation and implementation. Health policy topics include Medicaid and Medicare, managed care, health care reform proposals, telemedicine, the non-profit and for-profit role in health. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5525 - Local Government Management (3 Credits)
Relates the systems, processes, and principles of public management to the local government environment. Public management concepts such as strategic planning, bureaucracy, formal and informal organizational structures, human resource planning, management control, systems theory, and administrative behavior are explored within the context of local government. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5526 - Local Government Politics and Policy (3 Credits)
Examines local government from the perspective of politics and public policy making. The course focuses on local government political structures, policy analysis and formulation, political forces in administrative decision making, and the relationships between professional administrators and elected officials. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5627 - Introduction to Smart Cities (3 Credits)
This course will explore some of the most change-making technological innovations in the 21st century and their impact on public policy in cities through a survey of best practices, model policies, and lessons learned from cities across the United States and globe. Restriction: Restricted to graduate and graduate non-degree majors within CU Denver. Cross-listed with ENGR 6299, ENVS 5660, and URPL 6299. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

PUAD 5628 - Social Problems and Policies (3 Credits)
Examines local government and nonprofit approaches to addressing common urban social problems. Topics covered may include urban poverty, crime, education, housing, and immigration. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5630 - Economic Development (3 Credits)
As governments search for new ways to be efficient, improve performance and leverage resources, they are also looking at their communities, states and regions in terms of competitiveness, international trade and globalization innovation, collaboration and partnerships. This course will look at practices where economic development includes these elements: the Colorado Innovation Network, the Colorado Office of Economic Development and International Trade, the Metro Denver and Denver South Economic Development Partnerships, Mile High Connects, the Downtown Denver Partnership, and public-private partnerships across multiple sectors in transportation, broadband, water and innovation. Students will develop an economic development strategy based on knowledge and tools learned in the course. Political and professional leadership will be part of the dialog. Cross-listed with PUAD 4630. Max hours: 3 credits
Grading Basis: Letter Grade
PUAD 5655 - Principles of Emergency Management (3 Credits)
Introduces the discipline and practice of emergency management. Topics include administrative practice and processes by which public policy shapes governmental responses to hazards, emergencies, and disasters. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5655, CRJU 4012, and PUAD 4012. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
Typically Offered: Fall.

PUAD 5710 - Public Sector Technology (3 Credits)
This course addresses the impact and current use of technology in the modern government and nonprofit sector environments, including implications for interacting with citizens and organizational stakeholders, organizational decision-making and communication, and core functions such as budgeting and human resources. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5720 - Public Policies for Hazards and Disasters (3 Credits)
Examines public policymaking and administration related to homeland security and disasters in the United States, including the interplay between security and traditional hazards management concerns. Assesses the role of institutional processes, governmental and nongovernmental organizations in policy development and implementation. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5720. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5740 - Sustainable Energy Policy (3 Credits)
This course will cover the basic principles and operation of policy and regulation that impact the production and use of energy (with a focus on transportation and electricity generation) from all of the major sources currently available and used. We will analyze (and, through a sustainability lens, critically evaluate) energy from water (hydroelectric, hydrokinetic), coal, domestic and international petroleum, natural gas and nuclear reactors. A significant portion of the course will focus on electricity generation and associated policy, technologies and regulation. In the context of each energy source and use, we will review and discuss sustainability practices, policies, and, issues. Cross-listed with PUAD 5740. Max hours: 3 credits
Grading Basis: Letter Grade

PUAD 5750 - Policy Workshop Seminar (1 Credit)
This seminar explores issues related to public policy and democracy. Students will design and develop a project of their choosing through regularly “workshopping” their ideas with fellow students and professors. Students will also discuss course readings, presentations, and contemporary events. The seminar content will vary by semester. Prereq: PUAD 5005. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Prereq: PUAD 5005. Restriction: Restricted to Graduate and Graduate Non-Degree students.
Typically Offered: Fall.
PUAD 5910 - Nature and Scope of Interpersonal Violence (3 Credits)
Analyzes the social, historical, political, legal, and psychological aspects of gender-based violence. Topics include definitions of the problem, demographics, children and youth exposure, and national and global perspectives. Strategies for prevention, intervention, treatment, and social change are explored. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5910. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5920 - The Psychology of Interpersonal Violence (3 Credits)
Addresses the contributions and limitations of current empirical and clinical psychological literatures on interpersonal violence (IPV). Special attention is paid to the effects of IPV on adult and child survivors, their psychological needs, and the contribution of psychological knowledge to understanding and addressing the problem of IPV. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5920. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5930 - Interpersonal Violence Law and Policy (3 Credits)
Examines public policy and law related to interpersonal violence (e.g., welfare reform, child maltreatment, criminal and civil court responses). Topics include the role of law enforcement agents, victim advocacy, and methods to change law and policy. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5930. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5940 - Interpersonal Violence Leadership, Advocacy, and Social Change (3 Credits)
Examines different models of social change and various approaches to public address, including social movements and campaigns. Strategies for engaging diverse individuals, systems and communities to address interpersonal violence will be emphasized. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Cross-listed with CRJU 5940. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5960 - Interpersonal Violence and Health Care (3 Credits)
Provides students with the knowledge and skills necessary for responding to the health care needs of patients experiencing interpersonal violence (IPV). Also explores how healthcare professionals can develop public & institutional discourses that transform healthcare policies & systems to address the health needs of IPV survivors. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5961 - Interpersonal Violence, Health Advocacy and Systems Change (3 Credits)
Explores how healthcare professionals can develop successful public & institutional discourses that transform healthcare policies & systems to address the health needs of patients experiencing interpersonal violence. Methods of advocacy, activism & organizational change that produce positive results including effective educ techniques. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 5995 - Global Study Topics (3 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with PUAD 4995. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall.

PUAD 6600 - Special Topics: Public Administration (1-6 Credits)
Studies special topics relevant to public administration, such as public/private sector partnerships, community participation, international development, conflict management, regionalism, managing economic options for Colorado, and nonprofit management and marketing. Each semester various topics are studied. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.

PUAD 6620 - Crisis and Emergency Communication (3 Credits)
This course examines strategic communication practices throughout the three stages of a crisis or emergency event. Special emphasis is placed on crisis planning, emergency messaging, media relationships, image restoration, ethical responses, and organizational learning. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with PUAD 4620, COMM 4557, and COMM 5557. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

PUAD 6650 - Professional Topics in Public Service (1-3 Credits)
This series of elective courses delivers just-in-time professional skills and topical content relevant to the needs of today's public service workforce. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 18.
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 6700 - Community-Based Field Experience and Seminar (3 Credits)
Students work in small groups to complete substantive projects for government agencies and community organizations, led by faculty instructor. Topics addressed will vary depending on the needs of the community partner. Prereq: Completion of PUAD 5003 and permission of instructor. Restriction: Restricted to SPA graduate students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prerequisite: Completion of PUAD 5003 and permission of instructor.
Restriction: Restricted to SPA graduate students.
PUAD 6840 - Independent Study. PUAD (1-6 Credits)
Affords students the opportunity to do independent, creative work.
Prereq: Permission of instructor. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 6910 - Internship (1-3 Credits)
For students who have not had government experience. Studies and reports are made while students have full- or part-time administrative traineeships, internships, or similar positions in government agencies or government-related organizations. Prereq: Completion of the common core courses. It is recommended that at least three of the track courses also be completed. Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
PUAD 6950 - Master’s Thesis (3-6 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors within CU Denver. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restrictions: Restricted to Graduate and Graduate Non-Degree majors within CU Denver.
Additional Information: Report as Full Time.
PUAD 7007 - Qualitative Research Methods (3 Credits)
Focuses on qualitative research methods that incorporate field work techniques such as observation, interviews, and content analysis.
The main objective is to discover practicalities and limitations of ethnographic methods with a comparative methodology perspective.
Students are required to conduct a search project. Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Cross-listed with PUAD 5007. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.
PUAD 7010 - Advanced Seminar in International Public Policy (3 Credits)
Explores advanced approaches and techniques in the study of public policy from international perspectives. The course includes lectures, student research presentations, and discussions with international public policy scholars. The course also includes public policy readings and writing assignments tailored to the student interests and needs.
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.
PUAD 8010 - Historical and Comparative Foundations of Public Administration (3 Credits)
A doctoral seminar on developments and changes in public administration as a field of study. It examines how theory and practice have evolved and how the field is defined, studied and taught. It must normally be taken during the first full semester of the doctoral program.
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.
PUAD 8020 - Seminar in Public Management (3 Credits)
An in-depth examination of contemporary literature, concepts, and theories of public management. Current issues and research problems are emphasized to prepare students for their advanced research.
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.
PUAD 8030 - Seminar in Public Policy (3 Credits)
Offers an in-depth examination of contemporary literature, concepts, and theories of public policy, with an emphasis on policy process. Current issues and research problems are emphasized to prepare students for their advanced research.
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.
PUAD 8040 - Seminar In Economic and Institutional Foundations of Public Affairs (3 Credits)
Offers an in-depth examination of the economic and institutional foundations of public affairs, with an emphasis on the evolution of theory and research in these fields.
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program (PAFF-PhD) only.
PUAD 8050 - Quantitative Methods I (3 Credits)
Introduces foundational principles & techniques of quantitative analysis
in social sciences generally & in public affairs specifically, incl statistical
inference, regression analysis, other related estimation techniques, &
commonly-used statistical software packages. Students should have
taken master level stats course w/in last 3 yrs. Restriction: Restricted to
students in the Public Affairs PhD program (PAFF-PhD) only. Max hours: 3
Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program
(PAFF-PhD) only.

PUAD 8060 - Seminar On The Conduct Of Empirical Inquiry (3 Credits)
Introduces basic elements of research design in the social sciences,
focusing on the relationship between theories and methods, concept
development and measurement, selection of observations or cases,
and alternative methods of data collection and analysis. Restriction: Restricted to
students in the Public Affairs PhD program (PAFF-PhD) only.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program
(PAFF-PhD) only.

PUAD 8070 - Quantitative Methods II (3 Credits)
Moves beyond basic linear regression techniques by covering advanced
analytic methods for improved causal inference. Students will also
be introduced to data management skills and techniques for using
longitudinal data. Restriction: Restricted to students in the Public Affairs
PhD program (PAFF-PhD) only.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in the Public Affairs PhD program
(PAFF-PhD) only.

PUAD 8840 - Independent Study: PUAD (1-6 Credits)
(Doctoral level) Affords students the opportunity to do independent,
creative work. Restriction: Restricted to students in the Public Affairs
PhD program (PAFF-PhD) only. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to students in the Public Affairs PhD program
(PAFF-PhD) only.

PUAD 8990 - Doctoral Dissertation (1-10 Credits)
Once students are admitted to candidacy, they must be continuously
registered for dissertation credit each fall and spring semester or be
automatically dropped from the program. The student must register for
5 credit hours per semester. In cases where students will not be using
any university resources during a particular semester, they may petition
the Ph.D. director to register for fewer semester credit hours. Students
must be registered for dissertation credit during the semester they have
a colloquium or defense. Restriction: Restricted to students in the Public
Affairs PhD program (PAFF-PhD) only. Repeatable. Max hours: 30 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 30.
Restriction: Restricted to students in the Public Affairs PhD program
(PAFF-PhD) only.
Additional Information: Report as Full Time.

Recording Arts (MSRA)

MSRA 5000 - Introduction to Graduate Studies (3 Credits)
Surveys existing literature and research in science, technology, and
pedagogy of recording arts. Extensive use of available resources in
library, electronic and print, trade and scientific publications are explored.
Use of computer applications for research and publication are developed.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and
Media

MSRA 5001 - MSRA Research Seminar (3 Credits)
In preparation for their thesis/portfolio, students learn research
techniques by: applying skills from MSRA 5000, learning research design,
performing research, interpreting results, and writing. Students will
discover opportunities to add to the body of audio literature and recording
techniques.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and
Media

MSRA 5125 - Sound & Music for Video Games I (3 Credits)
This course will give students an overview of the function of sound and
music for video games including: history, sound engines, types of audio
utilized, stereo and surround sound localization, music capabilities of
hardware configurations and future trends in sound for video games.
Restriction: Restricted to RCDA-MS majors within the College of Arts and
Media.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and
Media

Typically Offered: Fall.

MSRA 5135 - Sound & Music for Video Games II (3 Credits)
Course is a continuation of Sound and Music for Video Games. Topics
of study include non-linear music composition and implementation,
advanced sound design techniques, optimization, and hands-on
experience with modern game engines and game audio engines.
Prereq: MSRA 5125.
Restriction: Restricted to RCDA-MS majors within the College of Arts and
Media.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MSRA 5125.
Restriction: Restricted to RCDA-MS majors within the College of Arts and
Media

Typically Offered: Fall.

MSRA 5360 - Music, Meditation and Technology (3 Credits)
Interdisciplinary course on acoustic ecology, sound art, and music
technology. Through deep listening, compassionate listening,
soundwalking, and interactive music controlled by motion capture, the
unifying theme of this course is an engagement with sonic awareness,
environment, and self-exploration. Restriction: Restricted to RCDA-
MS majors within the College of Arts and Media. Cross-listed with
MUSC 4360.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and
Media
MSRA 5380 - Advanced Electronic Music Production & Performance (3 Credits)
This course is designed to take a deeper dive into music, electronic music, as well as perceptions of music. Students will be able to create generative compositions, single sample-based compositions, a performative electronic composition, and incorporate multimedia elements into their compositions. Restriction: Restricted to RCDA-MS majors within the College of Arts and Media. Cross-listed with MUSC 4380. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5500 - Topics in Professional Audio (1 Credit)
Selected topical subjects to include live or studio sound recording, sound reinforcement, new technologies or practices in the audio industry. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5505 - Introduction to Audio Post Production (3 Credits)
Reviews all aspects of audio synchronized with picture, including music, sound effects, narration, and dialog replacement. Topics studied with respect to film, video and multi-media. Cross-listed with MUSC 3505. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5510 - Topics in Recording Arts (3 Credits)
Selected topical subjects to include live or studio sound recording, sound reinforcement, new technologies or practices in the audio industry. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

MSRA 5515 - History of 20th Century Film Music (3 Credits)
This survey of the history of 20th century music in film will acquaint aspiring filmmakers and musicians with a history of the music, as well as concepts of film theory and the creative use of film music. Restricted to RCDA-MS majors within the College of Arts and Media. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5525 - Multimodal Interaction for Music (3 Credits)
This course explores human-computer interaction in music composition and performance. Students will learn to program and use open-source hardware to build novel and creative musical interfaces and instruments. Restriction: Restricted to Graduate Students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

MSRA 5530 - Live Sound Reinforcement (3 Credits)
This course focuses on the basic elements of sound reinforcement: acoustics, equalization, equipment and mixing techniques. The major emphasis is the production of the final sonic product. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5550 - Advanced Audio Production I (3 Credits)
Topics in professional audio production with a focus on two lab projects in the semester. Max hours: 3 Credits.
Grading Basis: Letter Grade

MSRA 5555 - Dialogue Editing & Mixing for Visual Media (3 Credits)
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5665 - Re-recording Mixing for Visual Media (3 Credits)
Techniques for mixing dialogue, ADR, music, sound effects, background ambiances and Foley. Different level standards and deliverables. Cross-listed with MUSC 4545. Prereq: MSRA 5535 or MSRA 5555. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5775 - Graduate Surround Sound (3 Credits)
This lecture-lab course deals with surround sound in film, digital TV and DVD's. Topics include monitoring, microphone techniques, recording, mixing, mastering, delivery formats and psychoacoustics. Students work on two lab projects in the semester. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media
MSRA 5576 - Surround Sound II (4 Credits)
Students will work on advanced surround sound projects and study mixing aesthetics, high-definition technology and authoring. Students will have advanced knowledge of these topics and produce professional, competitive material for their demo. Prereq: MSRA 5550, 5575 and 5505, or permission of instructor. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5580 - Graduate Audio Seminar I (3 Credits)
Faculty and majors of the music engineering program assemble to discuss and demonstrate issues of artistic and technical applications of recording technology. Student projects, faculty, and guest lectures provide topical focus. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5581 - Graduate Audio Seminar II (3 Credits)
Capstone project based course in which students complete professional quality projects in music production and/or post production. Students refine their engineering skills and develop new skills required for integration in the music industry such as portfolio design and resume development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5590 - Graduate Audio Production (3 Credits)
Deals with advanced audio skills for music recording, including technical and artistic considerations. This is a required course for the MSRA degree. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5600 - Topics in Music (1-3 Credits)
Various topics relating to the study of music performance, music technology and music business. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

MSRA 5605 - Audio Post Production II (3 Credits)
Students will learn advanced Pro Tools techniques by designing, conceptualizing, and completing sound for a student film project. This interdisciplinary course prepares students for working relationships between Recording Arts, Film and Video areas and an entry level job in post production. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5820 - Digital Music Techniques (3 Credits)
Studies the general principles and applications of digital music technology, emphasizing the function and operation of specific computer software. Topics include digital audio workstations, MIDI sequencers, digital signal processing programs, and distribution on optical discs and computer-based mediums. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5840 - Independent Study for MSRA (1-3 Credits)
Allows graduate students to pursue in-depth study of an audio-related topic, to be discussed with and approved by the Graduate Advisor. A final report or other tangible results will be determined on a case-by-case basis. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

MSRA 5939 - Master of Science in Recording Arts Internship (1-3 Credits)
Master of Science in Recording Arts Internship. Restrictions: Restricted to RCDA-MS majors within the College of Arts and Media. Repeatable.
Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media
Typically Offered: Fall, Spring, Summer.

MSRA 6214 - Forensic Audio Analysis (3 Credits)
Students learn concepts through the application of techniques related to audio enhancement, digital media authentication, acoustic analysis, and automatic speaker recognition. The acquisition and analysis of digital evidence applying reliable methods prepares students for forensic audio analysis in the laboratory. Coreq: MSRA 6254 and admittance to Certification in Forensic Audio Analysis Program required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: MSRA 6254

MSRA 6224 - Forensic Video and Image Analysis (3 Credits)
Students learn concepts through the application of techniques related to forensic video collection and image enhancement, authentication, photogrammetry, and comparison. The acquisition and analysis of digital evidence applying reliable methods prepares students for working on forensic imagery in the laboratory. Coreq: MSRA 6264 and admittance to Certification in Forensic Video and Image Analysis Program required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: MSRA 6264

MSRA 6254 - MATLAB for Forensic Audio Analysis (1 Credit)
Advanced application of MATLAB for the forensic analysis of audio will be presented including file access, FFT and waveform plotting, and signal detection. Through the exploration of correlation and using mean quadratic difference students will be prepared for media authentication.
Coreq: MSRA 6214 and admittance to Certification in Forensic Audio Analysis Program required. Max hours: 1 Credit.
Grading Basis: Letter Grade
Coreq: MSRA 6214

MSRA 6264 - MATLAB for Forensic Video and Image Analysis (1 Credit)
Advanced application of MATLAB for the forensic analysis of images will be presented covering image processing and analysis techniques. Through exploring analyses such as Photo Response Non-Uniformity and the Bi-Dimensional DFT, students are prepared for image authenticity examinations. Coreq: MSRA 6224 and admittance to Certification in Forensic Video and Image Analysis Program required. Max hours: 1 Credit.
Grading Basis: Letter Grade
Coreq: MSRA 6224
MSRA 6510 - Graduate Audio Studies Pedagogy (3 Credits)
Surveys available resources for audio education. Interdisciplinary materials in physics, acoustics, engineering, music, broadcast, medicine, psychology, multi-media, theater, and film or video are reviewed. Emphasis on design and development of new methods and materials are pursued. (MSRA graduate students only.) Prereq: MUSC 5000. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 6550 - Sound Design (4 Credits)
Deals with designing sound for live theater, film, video, television, theme parks, games and soundscapes. Focuses on using technology to achieve specific esthetic aspects of audio production. This is accomplished through lectures, listening assignments, research and lab practice. (For graduate students only.) Max hours: 4 Credits.
Grading Basis: Letter Grade

MSRA 6950 - Thesis in Professional Audio (4 Credits)
With the guidance of a thesis advisor, each candidate for the MSRA degree select an approved topic for scholarly review, research and publication. The approved materials are evaluated for written and oral defense. Prereq: MUSC 5000, 5590, 6510, 6580, 6530. Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 6951 - Professional Audio Portfolio Thesis (4 Credits)
With the guidance of a portfolio advisor, each candidate for the MSRA degree produce specified documentation and audio materials that reflect the career intentions of the candidate. A completed "Show kit" or professional "Demo" of the candidate's specialty are produced. The approved materials are evaluated for written, audio and oral defense. Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

Religious Studies (RLST)

RLST 5010 - Comparative Religious Systems (3 Credits)
A cross-cultural analysis of religious belief and behavior. Emphasis is placed on religions found among non-Western cultural groups and includes consideration of how major religions of the world are manifested on local levels. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ANTH 4130, 5130, RLST 4010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

RLST 5020 - Sociology of Religion (3 Credits)
This course introduces students to the nature and functions of religion in society, emphasizing western religions in the U.S. Students will develop and apply an understanding of classic and modern sociological theories of religion to current events and disciplinary developments. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SOCY 4610, SOCY 5610, RLST 4020. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

RLST 5030 - Race, Religion and Belonging in the United States (3 Credits)
Race/ethnicity and religion are concomitantly social and cultural formations that have played a fundamental part in determining the boundaries of belonging of the United States. In this course, students will interrogate when, why and how race/ethnicity and religion have been used to delineate borders, determine citizenship, navigate legal classifications, dictate social mobility, and regulate economic possibilities. We will analyze both primary sources such as sermons, reality TV shows, court cases and graphic images as well as scholarly writing to explore how formations of race and religion have shaped notions of belonging in the US nation#state, thereby constructing the boundaries of the state itself. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ETST 4030, ETST 5030, RLST 4030, HIST 4209 and HIST 5029. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

RLST 5040 - Psychology of Religion (3 Credits)
Examines the theories developed by some of the great names in the field of psychology and their approaches to religion. Questions addressed include why people become religious, how religion functions in their lives, religious experience and assessment of the validity of religious claims. Key theorists studied include: William James, Sigmund Freud, Carl G. Jung, Abraham Maslow and Erich Fromm. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with RLST 4040. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

RLST 5050 - Questioning Religious Belief and Practice: Introduction to Philosophy of Religion (3 Credits)
Does God exist? Can the existence of God be proved? When is believing on faith acceptable? How or why is there a “problem of evil”? What are the attributes of a “god” and how can they be known, if at all? What is the relation of God to the world we experience? How does morality relate to religious belief and practice? The goal of the course is to broaden and deepen our understanding of key philosophical debates within religious traditions as we study prominent thinkers in the history of philosophy. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5600, PHIL 4600, PHIL 5600, RLST 4060, and SSCI 5600. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

RLST 5152 - Religion & Communication (3 Credits)
This course focuses on the dynamics between religion, culture, and communication and how these have led to intercultural peace, centuries of war, and/or different visions of belonging. This class addresses these dynamics to improve intercultural dialogue and conflict resolution processes, foregrounding the search for justice. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with COMM 4152, INTS 4152, RLST 4152, COMM 5152, and INTS 5152. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.
RLST 5160 - Mysticism (3 Credits)
Explores the mystical strains within the world's great religious traditions. Jewish, Christian, and Islamic mystics did not always express the same beliefs and attitudes as mainstream adherents. When mystics are placed side-by-side, amazing similarities appear. One cannot always tell whether a given mystical statement is Hindu, Jewish, Sufi, or Christian. This class examines these mystical traditions, East and West. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with RLST 4160. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

RLST 5300 - Myth and Symbol (3 Credits)
Approaches the field of classical Greek mythology and religion from the perspective of Jungian archetypal theory. The deities of the ancient Greeks are presented as archetypal patterns with universal correlates elsewhere in world religions. A foundation in C. G. Jung's archetypal theory will be offered to ground the course material. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with RLST 4300. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

RLST 5360 - Freudian and Jungian Perspectives in Dream Analysis (3 Credits)
Focuses on the phenomenon of dreams in a way that differs distinctly from the traditional approach to the subject in the field of psychology. "Spiritual" approaches to dreams are examined, as well as some major theorists on dreams, especially the work of Sigmund Freud and C. G. Jung. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with RLST 4360. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

RLST 5400 - Differing Concepts of God (3 Credits)
God, Gods, and Goddesses have been imagined in many different modes, forms, aspects, and guises throughout human history. This course investigates Paleolithic models of God, the Great Goddess of the Neolithic era, the Gods of mythological traditions, Biblical God, the abstract God of the philosophers, the God of the pantheists, the deists, and the God of the mystics. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with RLST 4400, PHIL 4650 and 5655. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

RLST 5420 - Goddess Traditions (3 Credits)
Explores the many forms which Goddesses have assumed through history, including the Neolithic Great Mother and her heiresses in the ancient Mediterranean cultures, such as: Isis, Ishtar, Demeter, Hecate, Aphrodite, Artemis, Athena and others, and their parallels in India. Goddess traditions have encompassed a full spectrum from virgins to Great Mothers to dark underworld Goddesses of death and destruction. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with RLST 4420 and WGST 4420/5420. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

RLST 5440 - Concepts of the Soul (3 Credits)
Asks the questions: What is the nature of the human being? What makes us "human?" Do humans have a "soul?" What is its nature? Is it different from the "spirit?" What is its ultimate fate? Examines the various theories put forward by philosophers of both Eastern and Western traditions. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with RLST 4440 and PHIL 4470, 5470. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

RLST 5460 - Death and Concepts of Afterlife (3 Credits)
Examines how the major religious traditions approach the issue of death. Where the Egyptians were fascinated by death, their Mesopotamian and Hebrew neighbors saw no kind of experience continuing after death. Concepts of the Final Judgment Day and the end of the world follow in Zoroastrianism, Christianity, and Islam, while Indian religions developed a sophisticated theory of reincarnation and the "art of dying." Finally, we will turn to Chinese belief in ancestral spirits. Restriction: Restricted to Graduate level students. Cross-listed with RLST 4460. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

RLST 5462 - Islam in Modern History (3 Credits)
This course studies Islamic thought and practice over the last two centuries in terms of major historical processes that have operated at local, national, and global scales. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with RLST 4462, HIST 4462, HIST 5462. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

RLST 5480 - Perspectives on Good and Evil (3 Credits)
Examines "problem of evil" as formulated in the philosophical tradition. Presents classical formulation of the problem, traditional solutions & classical critiques of each answer. Considers perspectives of various religious orientations, which deal differently with the question of suffering. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4480/5480, RLST 4480. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

RLST 5500 - Religion and Politics (3 Credits)
Exploration of: (1) theoretical perspectives on the relationship between religion and politics; (2) causes of and justifications for the historical development of the Western separation of "church and state;" (3) contemporary responses to and analyses of this separation; and (4) several current debates about public policy in America that reveal tensions between these two spheres. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PSCI 4057, 5057 and RLST 4500. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.
RLST 5710 - Women and Religion (3 Credits)
A sociological exploration of the contemporary roles of women in religion. Course examines American and world religious groups with an eye to women's involvement. Considers how women have changed these traditions as they take on leadership roles and discusses the tensions that arise within these traditions as a result of their expanded participation. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5710, SSCI 4710/5710, WGST 4710/5710, RLST 4710. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
RLST 5730 - Whores and Saints: Medieval Women (3 Credits)
Studies how women are presented in texts, as well as works by women. Investigates the roles open to women and societal attitudes toward women, who were considered seductresses, saints, scholars and warriors in the middle ages. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ENGL 4510/5510, RLST 4730 and WGST 4510/5510. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
 Typically Offered: Spring.

Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

**Research & Eval Methods (RSEM)**

RSEM 5001 - Special Topics (3 Credits)
Specific topics vary from semester to semester. Cross-listed with RSEM 4001. Max hours: 3 Credits.
Grading Basis: Letter Grade
RSEM 5050 - Classroom Assessment (3 Credits)
This course strengthens educator classroom assessment practice. It provides students with a foundational understanding of quality measurement practices to support evaluation of assessment instruments and tasks, determination of appropriate scoring approaches, and interpretation of state and district assessment results. It also deepens students' formative assessment practice supported by practical strategies and tools. Finally, it facilitates student integration of formative and summative uses of assessment with instruction and planning. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

RSEM 5080 - Research In Schools (3 Credits)
Provides teachers with the competencies necessary for examining their professional experiences using formal and informal methods of inquiry. Teachers become more reflective practitioners who investigate questions that arise from their work in schools. The course also prepares teachers to critique published research in a thoughtful manner. The intended audience for the course is beginning and experienced P-12 teachers. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

RSEM 5100 - Basic Statistics (3 Credits)
A first-level course on the use and interpretation of descriptive and inferential statistics. Topics covered include: frequency distributions, measures of central tendency and measures of variability; shapes of distributions; standard scores; scattergrams, correlation and regression; and t-tests. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

RSEM 5110 - Introduction to Measurement (3 Credits)
A first-level course that examines the nature and purpose of psychological measurement. Particular attention is paid to the concepts of reliability, validity, norms, interpretation of scores, response sets, fairness in testing, and norm-referenced vs. criterion-referenced interpretation of scores. A variety of instruments that are used to measure human attributes and behaviors are studied. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

RSEM 5120 - Introduction to Research Methods (3 Credits)
This is a survey course that examines the purposes of research, the methods of quantitative, qualitative, and mixed research, and the processes involved in research studies. The primary aims of this course are to improve your skills as an informed consumer of research and to provide you with the skills to conduct your own research. Cross-listed with RSEM 4120. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 5600 - Issues in Assessment Development (3 Credits)
This is the first course of a three#course series for a Classroom Assessment Certificate. The course focuses on developing the conceptual knowledge and technical skills required to help K#12 practitioners to develop valid, reliable, and fair assessment of student learning. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 5610 - Formative and Summative Assessment in the Classroom (3 Credits)
This is the second course of a three#course series for a Classroom Assessment Certificate. The course focuses on developing conceptual knowledge and technical skills required to develop and implement formative and summative assessments to support student learning. Prereq: RSEM 5600. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 5600
RSEM 6500 - Analyzing, Using, and Reporting Assessment Results (3 Credits)
This is the third course of a three-course series for a Classroom Assessment Certificate. The course focuses on developing conceptual knowledge and technical skills required to develop and implement formative and summative assessments to support student learning. Prereq: RSEM 5610. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 5610

RSEM 5800 - Workshop: Topics in Research and Evaluation Methodology (1-4 Credits)
Topics and credit hours vary from term to term. Often workshops address a current topic in research, evaluation, or measurement by considering its scholarly foundations and its application to schools and other educational settings. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

RSEM 5840 - Independent Study: RSEM (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

RSEM 5910 - Practicum in Research and Evaluation Methodology (1-4 Credits)
Supervised work in projects that provide experience in data analysis, research, measurement, or evaluation. Requires a minimum of 75, 150, 225, or 300 clock hours under supervision (for 1, 2, 3, or 4 credit hours, respectively). Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.

RSEM 6050 - Seminar in Assessment Policy Issues (3 Credits)
Three public policy issues involving educational assessment are analyzed. The policy issues selected vary to reflect current policy debates. Sample issues are school accountability, grading and report cards, performance-based graduation standards, classification of students as having special needs, merit pay for teachers, and retaining students in grade. Each analysis examines (a) policy history; (b) value assumptions and constituency interests; (c) validity of assessment procedures; and (d) consequences of policy alternatives. Prereq: RSEM 5050 or RSEM 5110. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 5050 or RSEM 5110

RSEM 6200 - Single Case Research Design for Education (3 Credits)
This course provides an overview of Single Case research Design (SCRD) within educational settings. The course will describe single case designs (SCD), specify the types of questions that SCD’s are designed to answer, discuss the internal and external validity of SCD’s, outline SCD standards, and describe implementation of different SCD’s. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 6500 - Teacher as Researcher (3 Credits)
Taken concurrently with Contextual Curriculum II, this course provides opportunities to engage in inquiry while analyzing professional experiences within their classroom context, sharing data/results from an action research project and critiquing and synthesizing published educational research. Max Hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 6950 - Master’s Thesis (1-4 Credits)
A master's thesis is part of the degree track options. Credit hours, topic, and workload are determined by the student's advisor. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP

RSEM 7000 - Doctoral Seminar in Research Methods (3 Credits)
Designed for students beginning doctoral work, explores conducting and evaluating qualitative and quantitative research. The chain of reasoning linking the conceptualization of a research problem, the posing of questions, and the collection and interpretation of evidence is examined. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHDPPhD, LDRE-EDD, EDLI-PhD and SPSY-PsyD majors within the School of Education and Human Development.
Typically Offered: Fall.

RSEM 7001 - Applied Research Methods I (3 Credits)
Introduces students to principles of quality research design, and provides a conceptual and hands-on procedural introduction to quantitative and qualitative methods common in education-related research. Takes an explicit focus on understanding and mitigating potential biases in research methods and design. Restriction: Restricted to LDRE-EDD students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to LDRE-EDD majors within the School of Education and Human Development

RSEM 7002 - Applied Research Methods II (3 Credits)
Prepares students with conceptual knowledge and procedural skills of designing quality, applied research from critical and pragmatic perspectives. Focus on quantitative analysis methods, including survey and assessment item development. Students continue deeper review of extant literature for intended dissertation topic. Prereq: RSEM 7001 or permission from the instructor. Restriction: Restricted to LDRE-EDD students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 7001. Restriction: Restricted to LDRE-EDD students.

RSEM 7003 - Applied Research Methods III (3 Credits)
Content will focus on qualitative data collection and analysis methods, and mixed methods design including program evaluation and improvement research. Students will work with faculty on development of dissertation in practice design. Prereq: RSEM 7002 or permission from the instructor. Restriction: Restricted to LDRE-EDD students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 7001. Restriction: Restricted to LDRE-EDD students.

RSEM 7010 - Educational Assessment And Measurement (3 Credits)
This advanced course incorporates foundational knowledge and application of assessment and measurement tools in school settings. Foundational concepts are utilized to better understand student achievement and growth indicators, and inferences about school and educator effectiveness; survey measures are also addressed. Max hours: 3 Credits.
Grading Basis: Letter Grade

CU Denver 2023-24 Graduate Catalog 943
RSEM 7050 - Methods of Survey Research (3 Credits)
Covers the purposes and methods of survey research. Topics included are: goals and uses of survey research, data collection methods, questionnaire and interview protocol design, reliability and validity of data collection methods, sampling, ways to reduce error in data collection and sampling, data analysis techniques commonly used in survey research studies, interpreting and reporting results, and ethical issues. Students design and conduct a survey as part of the course requirements. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

RSEM 7080 - Methods of Qualitative Inquiry (3 Credits)
Prepares graduate students to conduct field research employing qualitative methods and perspectives. Students become familiar with evolving theoretical and methodological perspectives in qualitative research. Students practice and apply observation, interview, and discourse data collection and analysis techniques. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

RSEM 7100 - Advanced Methods of Qualitative Inquiry (3 Credits)
An advanced seminar directed at individuals who have completed an introductory course in methods of qualitative research. Topics included are qualitative data collection, data analysis, and writing about data. Prereq: RSEM 7080. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 7080
Typically Offered: Spring.

RSEM 7110 - Intermediate Statistics (3 Credits)
Prepares graduate students with advanced methods of analyzing quantitative data using inferential statistics. Topics covered are chi-square; one-way ANOVA and factorial ANOVA; correlation and multiple regression; introductions to other multivariate techniques; power and effect size; and quantitative methodology. Software: SPSS, JASP, R, JAMOVI. Prereq: RSEM 5100. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 5100

RSEM 7120 - Advanced Methods in Quantitative Inquiry and Measurement (3 Credits)
Covers advanced topics in quantitative design and analysis, including advanced measurement topics. Topics include: specific types of design used in experimental, quasi-experimental, co-relational, and survey research; multivariate ANOVA, ANCOVA and MRC; factor and trend analyses; classical test theory; and IRT approaches. Students analyze their own data using techniques presented in the course. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 5100

RSEM 7130 - Advanced Measurement: Item Response Theory (3 Credits)
This course will consider theory and methods for the educational and psychological measurement of latent variables using item response theory. Students will understand and be able to apply concepts from item response theory, specifically the Rasch model, to understand, evaluate, and construct measures. Recommended students have Introduction to Statistics and a survey design course. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7140 - Management & Secondary Analysis of Large Datasets (3 Credits)
Large education, community, and health datasets are underutilized research resources, providing large samples and longitudinal data otherwise too costly and time-consuming to collect. Students will work in their discipline area to learn to access, manage, and appropriately analyze extant datasets. Prereq: RSEM 7110 Intermediate stats or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7150 - Mixed Methods Research (3 Credits)
This seminar is directed at individuals who have completed both qualitative and quantitative research courses and are interested in combining these in the mixed-method approach. Focus will be on developing the skills and knowledge needed to formulate mixed-methodological research questions in which quantitative and qualitative data collection, analysis and interpretational techniques are utilized simultaneously or sequentially. Prereq: RSEM 6100 and RSEM 7110. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 6100 and RSEM 7110

RSEM 7200 - Ethnography (3 Credits)
This course is designed for persons interested in studying the phenomenon of learning in family and community contexts. The course blends foundational readings in the learning sciences and the ethnography of education with "participant-observation" fieldwork. The fundamentals of ethics regarding studies involving human persons, building relationships with study participants, becoming an "observant participant," writing field notes, and co-authoring meaning with study participants will be covered. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7210 - Program Evaluation in Schools (3 Credits)
This advanced course incorporates foundational knowledge and application of the topic of program evaluation as it applies to inquiry and decision making in schools and other educational settings. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7220 - Program Evaluation Theory and Design (3 Credits)
This course introduces a variety of program evaluation theories, designs, approaches, and tools useful for evaluating a program or policy, including needs assessment, formative and summative evaluations, process evaluation, monitoring outputs and outcomes, impact assessment, and cost analysis. Max hours: 3 Credits.
Grading Basis: Letter Grade

RSEM 7300 - Research Grant Writing (3 Credits)
The purpose of this course is to provide students with a deep understanding of grants and writing grant proposals targeted to major funders’ requests for proposals. Students will learn the parts of a grant proposal, writing style difference, budgets, participate in a mock grant reviewer panel, and write a full grant proposal. Max hours: 3 Credits.
Grading Basis: Letter Grade
RSEM 7400 - Culturally Responsive Research and Evaluation Methods (3 Credits)
This course introduces a variety of culturally responsive paradigms, theories, and methodologies to examine their impact on traditional research and evaluation methods. The course will examine the role of ways of addressing power, privilege, and social justice frameworks. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Summer.

RSEM 7500 - Special Topics: Research and Evaluation Methods (1-6 Credits)
Specific topics vary from semester to semester. Restriction: Restricted to graduate level students. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Graduate level students.

RSEM 7700 - Multilevel Modeling: HLM (3 Credits)
Focus is on the analysis of nested data (e.g., students within classrooms and schools, public transportation users within cities) using HLM. Applications include multilevel multiple regression, growth models, and experimental designs. Familiarity with multiple regression and factorial ANOVA is required. Prereq: RSEM 7110 Intermediate Statistics or equivalent. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

RSEM 7800 - Structural Equation Modeling (3 Credits)
This course assumes no prior experience with Structural Equation Modeling, and serves as both theoretical and practical introduction. We will relate SEM to participants' previous knowledge of multiple linear regression, then expand to examine correlated and causally related latent constructs. Prereq: RSEM 7110: Intermediate Statistics or equivalent, or instructor consent. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: RSEM 7110
Typically Offered: Fall.

RSEM 7840 - Independent Study: RSEM (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

RSEM 7900 - Thesis/Dissertation Proposal Writing (3 Credits)
This course is designed to provide you with a structure and support for developing the initial elements of your dissertation or thesis proposal. This course can be considered an 8-week intensive writing session providing a framework for completing a solid first draft by week 8. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK Management (RISK)

RISK 5939 - Experiential Learning in RMI Industry (1-3 Credits)
This course connects students to risk management service providers through the Risk Management and Insurance (RMI) Program. The students will intern with a specific provider. The RMI program and faculty will supervise and monitor tasks and assignments, and coordinate with the providers to maximize the learning experience. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Typically Offered: Fall, Spring, Summer.

RISK 6129 - Practical Enterprise Risk Management (3 Credits)
Enterprise RM involves identifying the risks and opportunities faced by a firm, assessing them, developing and implementing a plan to address them, and then monitoring progress. Students will learn the basics of ERM while working with risk management professionals to develop and present such a plan to an ongoing business. Cross-listed with RISK 4129. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6209 - Cyber Risk Management (3 Credits)
Computer networks and the data that travels upon them are under constant and increasing attack. This course will focus on a discussion of how state and non-state actors utilize this form of asymmetrical warfare to infiltrate government and corporate networks, risk management responds and risk strategies apply. Cross-listed with RISK 4209. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6309 - Strategic Risk Management (3 Credits)
This course introduces strategic risk management, the process of managing the uncertain and unknown risks to a firm's plans to add value to its owners and society. Cross-listed with RISK 4309. Max Hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6409 - Employee Benefits and Workforce Risk Management (3 Credits)
The course surveys an array of popular employee benefit programs to attract, protect, and retain valued employees. It also focuses on risk management programs that invest in human capital and address the downside risks of employing a workforce. Cross-listed with RISK 4409 and MGMT 4460/6760. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6509 - Employee Benefits and Workforce Risk Management (3 Credits)
This course introduces strategic risk management, the process of managing the uncertain and unknown risks to a firm’s plans to add value to its owners and society. Cross-listed with RISK 4509. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6609 - Global Risk Management (3 Credits)
This course is designed to study how risk is transferred globally. The course will include travel to London, which is the home to many of the world’s largest insurers and reinsurers. While in London, we will visit and have presentations from insurance brokers, companies, Lloyds of London, and reinsurers. Prereq: One RISK course. Cross-listed with RISK 4609. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6709 - Life and Health Insurance (3 Credits)
This course introduces students to life and health insurance concepts and policy types with an emphasis on insurance planning for individuals and businesses. The insurance industry and trends within are also explored. Prereq: BUSN 6640. Cross-listed with RISK 4709. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6809 - Principles of Risk Management & Insurance (3 Credits)
This course prepares students for advanced work in insurance and RM. The course first covers the nature of risk and risk fundamentals, insurer operations and insurance regulation. It then considers the principal techniques of managing risk exposures and the basis of decision making in management of business and personal risks. Coreq: BUSN 6640 or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6640

RISK 6840 - Independent Study (3 Credits)
Max hours: 3 Credits.
Grading Basis: Letter Grade
RISK 6909 - Corporate Risk Management (3 Credits)
This course provides an overview of the corporate risk management process. It considers the ways companies identify their risk exposures, the tools used to measure and mitigate those exposures including the latest developments in alternative risk transfer, and ultimately, how risk management adds value to the firm. Coreq: BUSN 6640. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-req: BUSN 6640

School Library Program (SCHL)

SCHL 5030 - Cultivating Learning Skills in Library Leadership (3 Credits)
In an increasingly shifting world and work force, both our student and adults will need to demonstrate learning skills to thrive in K-12 and post-secondary world. Teacher-librarians are guides for students and staff in ALL learning skills. Collaboration, innovative thinking, critical thinking and are areas of library leadership covered. Cross-listed with SCHL 4030. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCHL 5040 - Information Storage and Utilization (2 Credits)
Provides basic principles and practices of utilizing standard methods for organizing, accessing and storing information. Includes cataloging and classification in text-based and electronic systems. Max hours: 2 Credits.
Grading Basis: Letter Grade

SCHL 5100 - School Libraries in the Digital Age (3 Credits)
An introduction to the School Library profession, including its history, standards, organizations, and current trends. Course focuses on foundational principles and roles of school librarianship, as well as methods for developing a culturally responsive resource collection, both print and electronic. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCHL 5160 - Managing School Libraries (3 Credits)
Case studies in the organization and administration of school library and instructional leadership of programs and projects. Topics include project management, personnel administration, budget development, management strategies, copyright and intellectual freedom. Cross-listed with SCHL 4160. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCHL 5200 - Promoting Literature in Schools (3 Credits)
Approaches the school library as a resource to promote literacy and development in children and young adults. Topics include genres of literature, methods for advising students towards appropriate reading and media resources, and the promotion of multiple literacies - information, new media, and transliteracy. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCHL 5830 - School Library Workshop (0.5-4 Credits)
Specific content and titles vary depending upon the particular school library skills addressed in the course. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

SCHL 5913 - School Library Field Experience (3 Credits)
Field experiences in selected K-12 school libraries that meet a high professional standard. The course serves as a capstone experience for endorsement and master's degree plans and helps induct students into the School Library profession by bridging theory and practice. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP

School Psychology (SPSY)

SPSY 5010 - Introduction to Counseling in School Psychology (3 Credits)
Provides an overview of the counseling theories relevant to the practice of school psychology and an understanding of the role of theory in practice. Includes consideration of legal/ethical issues and both the cultural and developmental context of the major theories. Max Hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 5100 - Introduction to the Neurosequential Model in Education™ (3 Credits)
Introduction to the core concepts of the Neurosequential Model™ (NM) that impact learning. Core concepts include basics of brain organization, brain development, understanding state-dependent learning, the stress response systems, and the impact of trauma and neglect on children. Typically offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall

SPSY 5200 - Application of Neurosequential Model in Education™ (3 Credits)
Focuses on helping educators and other school personnel better understand and teach challenging children by offering practical strategies and classroom practices related to structuring classroom schedules, activities and interactions that can help all children (not just children impacted by trauma and adversity) learn in an optimal way. Prereq: SPSY 5100. Typically offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 5100 - Introduction to the Neurosequential Model in Education™ (3 Credits)
Introduction to the core concepts of the Neurosequential Model™ (NM) that impact learning. Core concepts include basics of brain organization, brain development, understanding state-dependent learning, the stress response systems, and the impact of trauma and neglect on children. Typically offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall

SPSY 5600 - Behavior Analysis and Intervention (3 Credits)
This course introduces knowledge and skills necessary for school psychologists to proactively address child problem behaviors. Content includes application of Positive Behavioral Support (PBS), functional behavior analysis and intervention, evaluation of behavior change. Relevant federal, state regulations are also addressed. Restriction: Restricted to SPSY majors within the School of Education and Human Development or consent of the instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to SPSY majors within the School of Education and Human Development.

SPSY 5800 - Workshop: Topics in School Psychology (1-6 Credits)
Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade

SPSY 5840 - Independent Study: SPSY (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

SPSY 5900 - School-Based Multicultural Interventions (3 Credits)
The course will foster students' understanding and appreciation of diversity and its applications for school psychology practice, educational contexts, and mental health policy. Students will learn to evaluate and implement school-based mental health and educational interventions with a multicultural lens. Prereq: SPSY 6100. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Prereq: SPSY 6100
SPSY 6100 - School Psychology: Professional and Legal Foundations (3 Credits)
This course covers topics related to the practice of school psychology, both past and present, including legal/ethical obligations/issues, accreditation, certification/licensure, culturally competent practice, roles/responsibilities, and evaluation and accountability. Observation in schools and related settings is required. Prereq: Admission to School Psychology Program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to SPSY majors within the School of Education and Human Development.

SPSY 6150 - Psychoeducational Assessment I (3 Credits)
Foci on assessment of cognitive ability, cognitive processes, and achievement in children and adolescents. Topics include selection, administration, and interpretation of ability and achievement tests; psychological report writing, and psychometric, historical, theoretical, and cultural issues in assessment. Test administration required. Restriction: SPSY PsyD: Restricted to SPSY PsyD majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to SPSY majors within the School of Education and Human Development.

SPSY 6160 - Psychoeducational Assessment II (3 Credits)
Focuses on assessment of cognitive ability, cognitive processes, and achievement in children and adolescents. Topics include selection, administration, and interpretation of these types of measures; cultural considerations in psychological assessment, psychological report writing, and developing interventions. Test administration required. Prereq: SPSY 6150. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6170 - Applied Developmental Science and Assessment (3 Credits)
Examines theories and research in developmental psychology to provide a foundation for clinical services to children and families in applied settings. Includes coverage of developmental assessments and services for infants/toddlers. Prereq: SPSY 6150. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6350 - School-Based Interventions: Children, Youth and Families (3 Credits)
Provides theoretical and practice-oriented introduction to child therapy in schools. Weaves together skills and techniques essential to theory and implementation of psychotherapeutic techniques. Course activities compliment the systemic and group-based interventions examined in SPSY 6400. Prereq: SPSY 5010. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6400 - School-Based Interventions: Groups, Classrooms and Systems (3 Credits)
Provides students with advanced study of research on and techniques of classroom and small group interventions. Includes instruction on the evaluation of intervention effectiveness. Systemic, school-wide interventions are addressed. Prereq: SPSY 5010. Restriction: Restricted to SPSY majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6410 - Psychoeducational Assessment of Culturally and Linguistically Diverse Students (3 Credits)
Prepares students to provide psychoeducational assessments to children who are culturally and/or linguistically diverse. Content includes differentiation of language disorders versus language acquisition, and developing recommendations for accommodations and interventions to meet the unique psychoeducational needs of diverse children and youth. Prereq: SPSY 6150. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6420 - Crisis Prevention, Planning and Intervention (3 Credits)
Introduces students to crisis theory, prevention research, and intervention strategies. The course is designed for school mental health professionals interested in developing advanced crisis counseling and intervention skills sufficient for use in school settings. The course emphasizes the importance of practical hands-on opportunities for skills development. Prereq: COUN 5010 or SPSY 5010. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6450 - School-Based Consultation for Mental Health Professionals (3 Credits)
A wide range of traditional or emerging consultation models emphasizing practical application of empirically-based approaches to advance the social or academic competence of students, classrooms, schools and districts. Hands-on experience supplement course content as students develop, refine, and practice their own eclectic consultation approach. Prereq: SPSY 6100. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6500 - Affective Bases of Behavior and Psychopathology (3 Credits)
This course provides students with advanced concentrated study of the affective bases of behavior, including affect, mood, and emotion. This course also includes coverage of psychopathology and the diagnosis of mental disorders. Restriction: Restricted to SPSY majors within the School of Education and Human Development or consent of the instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6550 - Academic Interventions in School Psychology (3 Credits)
Provides training in knowledge and skills for the use of educational intervention practices in school psychology, including the development, implementation, and evaluation of academic interventions in the areas of reading, math, and written language; curriculum based measurement and progress monitoring. Prereq: SPSY 6150. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6700 - Advanced Seminar in School Psychology (3 Credits)
This course covers advanced topics related to the practice of school psychology including applying and interpreting for internship, certification/licensure, capstone preparation and completion, and the development of a professional identity. Prereq: SPSY 6911. Restriction: Restricted to School Psychology majors. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPSY 6910 - Psychoeducational Assessment of Culturally and Linguistically Diverse Students (3 Credits)
Prepares students to provide psychoeducational assessments to children who are culturally and/or linguistically diverse. Content includes differentiation of language disorders versus language acquisition, and developing recommendations for accommodations and interventions to meet the unique psychoeducational needs of diverse children and youth. Prereq: SPSY 6150. Max hours: 3 Credits.
SPSY 6911 - School Psychology Practicum (3 Credits)
Supervised practice in providing comprehensive psychological services to children in grades preschool to 12. Students are placed in public schools or affiliated school-related agencies and supervised by practicing, licensed school psychologists. Prereq: SPSY 5600, SPSY 6100, SPSY 6150, SPSY 6160 or consent of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade with IP
Prereq: SPSY 5600, SPSY 6100, SPSY 6150, and SPSY 6160

SPSY 6915 - Practicum with Culturally and Linguistically Diverse Students (3 Credits)
This school psychology practicum experience is focused on developing multicultural competencies with culturally and linguistically diverse students through either a cultural immersion experience in Mexico or a local practicum placement in a culturally and linguistically diverse setting. Prereq: SPSY 6100 and SPSY 6150 and consent of the instructor. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 9.
Prereq: SPSY 6100 and SPSY 6150.

SPSY 6917 - Advanced Practicum in Psychological Assessment (1 Credit)
Under faculty supervision provide psychological assessment services to clients in the UC Denver Student and Community Counseling Center. Prereq: SPSY 6150, SPSY 6160, and consent of the instructor. Max hours: 1 Credit.
Grading Basis: Letter Grade
Repeatable. Max Credits: 1.

SPSY 6918 - Clinical Externship (1-3 Credits)
Clinical experience under supervision of licensed mental health professionals. Students participate in assessment and/or intervention in a variety of settings. Note: All field placements must be approved by the SPSY Program Director in advance of registration. Prereq: SPSY 6911.
Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade with IP
Prereq: SPSY 6911

SPSY 6930 - School Psychology Internship (1-6 Credits)
Supervised experience in the practice of school psychology with children and adolescents in a school or clinic setting. Prereq: SPSY 5900, SPSY 6100, SPSY 6410, SPSY 6911, SPSY 6350, SPSY 6400, SPSY 6450, SPSY 6500, or instructor consent. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Prereq: SPSY 5900, SPSY 6100, SPSY 6410, SPSY 6911, SPSY 6350, SPSY 6400, SPSY 6450, SPSY 6400, SPSY 6450, and SPSY 6500

SPSY 7500 - Biological and Neuropsychological Bases of Behavior (3 Credits)
Examines the biological basis of behavior emphasizing the relationship between the functions and structures of the brain including neuroanatomy, brain development, neurophysiology, neurochemistry, and psychopharmacology; and neuropsychological assessment principles. Prereq: SPSY 6150. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6150.

SPSY 7980 - Clinical Supervision & Admin of Psych Services (3 Credits)
Course prepares school psychologists to function in supervisory and administrative capacities in delivering mental health services. Content includes examination of clinical supervision theories, models, techniques; focus on development of skills for administrative roles, and understanding organizations from a systems perspective. Prereq: SPSY 6918. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: SPSY 6918 Restriction: Restricted to SPSY PsyD majors within the School of Education and Human Development

SPSY 8980 - School Psychology Doctoral Capstone Project (2 Credits)
The Capstone Project is a culminating component of the program. Production of a scholarly project that illustrates the student’s understanding of relevant topics in school psychology, the scope of contemporary practice, and the various roles of the professional school psychologist. Prereq: SPSY 6911 and SPSY 6700. Restriction: Restricted to SPSY-PSYD majors within the School of Education and Human Development or consent of the instructor. Repeatable. Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 4.
Prereq: SPSY 6911 and SPSY 6700. Restriction: Restricted to SPSY-PSYD majors within the School of Education and Human Development.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

Science Education (SCED)

SCED 5004 - Elementary Science Teaching (3 Credits)
This course explores issues in elementary school science learning and teaching. Teacher candidates will develop knowledge of the nature of science and science content, engage in scientific inquiry, work to identify student conceptions, and plan and enact science instruction. Cross-listed with SCED 4004. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: TCHR-MA plan or BMA subplan.

SCED 5050 - Introduction to Science Teaching and Learning (2 Credits)
Focus on conceptual development, conceptual change, collaborative learning, students’ conceptions of various topics in science, practical issues encountered in facilitating learning, managing the classroom, formative and summative assessment, and differentiating instruction in a collaborative environment. Seminar for Learning Assistants. Student must be serving as a Learning Assistant in the CU Denver LA program.
Max hours: 2 Credits.
Grading Basis: Letter Grade

SCED 5340 - Equity & Culture in Science Education: Local/Global (3 Credits)
This course examines literature in science education related to issues of culture and equity. Topics will be framed by an understanding of equity in diverse classrooms and how it informs research, curriculum and instruction. Cross-listed with SCED 4340 and ENVS 5340. Max hours: 3 Credits.
Grading Basis: Letter Grade
SCED 5350 - Issues and Trends in Science Education (3 Credits)
Explores the current issues and trends in science education related to theory, pedagogy, practices, curriculum, and other contemporary topics. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with SCED 4350. Max hours: 3 Credits. Grading Basis: Letter Grade

SCED 5360 - Physics Teaching and Learning (3 Credits)
In this course, we will explore how people learn physics, and how physics is and can be taught. We will read literature in physics, physics education research, education, psychology, and cognitive science and apply it to your physics teaching. Max hours: 3 Credits.

SCED 5365 - Physics Teaching as Research (3 Credits)
In this course, you will research your teaching of physics, with the explicit goals of improving your teaching practice and improving student learning of physics. Max hours: 3 Credits.

SCED 5400 - Theory and Pedagogy of Science Learning (3 Credits)
Examines current issues, strategies, materials, and technology related to the teaching and learning of science at the middle and secondary school levels. Science curriculum, teachers' pedagogical content knowledge, and research in science education are investigated. Cross-listed with SCED 4400. Repeatable. Max Hours: 9 Credits.

SCED 5401 - Inquiry Science Pedagogy and Practices (3 Credits)
An in-depth study of inquiry science pedagogy and practices and how inquiry science supports standards-based education to make science accessible to ALL learners. The course provides a review of research on pedagogy and practices that support student understanding, problem solving and creativity through the use of inquiry science. Prereq: Concurrent enrollment in an internship or permission of instructor is required. Cross-listed with SCED 4401. Max hours: 3 Credits.

SCED 5416 - Math-Science Connections: Outdoor (3 Credits)
(Primarily for pre-secondary teachers.) Explores science concepts through outdoor activities appropriate for middle-grade students. Topics include how the nature of science and mathematics informs pedagogy, national and state standards, earth science and paleontology, orienteering and map usage, water analysis, astronomy and entomology. Max hours: 3 Credits.

SCED 5500 - The Nature of Science (3 Credits)
This course is a critical exploration of science and scientific knowledge using an epistemological approach to ask (and possibly answer) questions about sociological issues in science and implications for science research, teaching and learning. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with SCED 7500. Max hours: 3 Credits.

SCED 5540 - Foundations of School Health Education (3 Credits)
This course is an overview of the principles of behavior theory as they relate to health education in both theory and practice. The course will examine the characteristics of effective school-based health education programs. Issues of ethnicity, culture, and race as they relate to health will be examined throughout the course. Max hours: 3 Credits.

SCED 5550 - Curriculum Materials in Health Education (3 Credits)
This course will support the application of behavior theory as it applies to specific health content knowledge and skills. Special attention will be given to the skills, instructional strategies, and techniques needed to develop a culturally responsive classroom to promote success for all learners. Max hours: 3 Credits.

SCED 5560 - Health Education Teaching Practices (3 Credits)
The course provides an overview of health education teaching and learning strategies for use in school settings. Action research will be introduced and utilized as a method to examine current teaching practices. Role-play, student assessment development, differentiation of instruction, and culturally responsive classroom practices will be examined. Max hours: 3 Credits.

SCED 5565 - Environmental Education (3 Credits)
This course links the theory and practice of environmental education to inform curricular development and pedagogical knowledge. Cross-listed with ENVS 4650 and ENVS 5650. Max hours: 3 Credits.

SCED 5650 - Environmental Education (3 Credits)
Explores current energy problems. Students examine such topics as fuels from plants, fuels from wastes, fossil fuels, nuclear energy, wind energy, geothermal energy, solar energy, and energy conservation. Includes demonstration of available educations resources for grades K-12. The purpose of the course is to make technical aspects of energy accessible to the lay person. Max hours: 3 Credits.

SCED 5660 - Energy Education (3 Credits)
Explores current energy problems. Students examine such topics as fuels from plants, fuels from wastes, fossil fuels, nuclear energy, wind energy, geothermal energy, solar energy, and energy conservation. Includes demonstration of available educations resources for grades K-12. The purpose of the course is to make technical aspects of energy accessible to the lay person. Max hours: 3 Credits.

SCED 5690 - Curriculum Development in Place-Based Education (3 Credits)
Students in this course apply knowledge about place-based education in schools and communities for educational purposes. Max hours: 3 Credits.

SCED 5780 - Storytelling (1-4 Credits)
Explores the history, function, philosophy, and techniques of storytelling. This class also includes collecting, selecting, preparing, developing, and delivering stories. Research and resources are emphasized. Repeatable. Max Hours: 4 Credits.

---

**CU Denver 2023-24 Graduate Catalog**
SCED 5800 - Curriculum Workshop for Science Teachers (0.5-4 Credits)
Opportunity to work on curricular projects and problems in the schools. Explore various formal and informal learning environments such as study groups and after-school activities. Prereq: 18 semester hours in education and teaching experience or permission of instructor. Repeatable. Max Hours: 36 Credits.
Grading Basis: Letter Grade

SCED 5840 - Independent Study (1-4 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade

SCED 5920 - Readings in Elementary Education (1-4 Credits)
Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

SCED 5930 - Internship in Secondary Education (3 Credits)
Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 5950 - Master's Thesis (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.

SCED 5960 - Independent Study (1-4 Credits)
Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

SCED 6110 - Science and Math Curriculum Studies (3 Credits)
Students examine frameworks for curriculum design, discuss the psychological and philosophical foundations of curricula, and analyze the curriculum that they use in their own teaching. Students synthesize what teachers must do in order to effectively implement curricula. Prereq: Graduate student status. Cross-listed with SCED 6110. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

SCED 6120 - International Perspectives on the Curriculum (3 Credits)
Considers schooling patterns in the U.S., the U.K., Japan, Australia, and several European countries, examining different approaches to curriculum issues in relation to social, historical, and economic factors. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 6140 - Independent Study (1-4 Credits)
Repeatable. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.

SCED 6150 - Master's Thesis (1-8 Credits)
Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.

SCED 6840 - Special Topics (1-6 Credits)
Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

SCED 7110 - Science Math Curriculum Study (3 Credits)
Students examine frameworks for curriculum design, discuss the psychological and philosophical foundations of curricula, and analyze the curriculum that they use in their own teaching. Students synthesize what teachers must do in order to effectively implement curricula. Restriction: Graduate student status. Cross-listed with SCED 6110. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

SCED 7500 - The Nature of Science (3 Credits)
This course is a critical exploration of science and scientific knowledge using an epistemological approach to ask (and possibly answer) questions about sociological issues in science and implications for science research, teaching and learning. Cross-listed with SCED 5500. Max hours: 3 Credits.
Grading Basis: Letter Grade

SCED 7840 - Independent Study (1-3 Credits)
Max hours: 3 Credits.
Grading Basis: Letter Grade

Science, Technology, Engineering & Math Education (STME)

STME 5001 - Planning for Learning in Mathematics and Science (3 Credits)
This course explores aspects of complex curriculum and instructional concepts through the lens of mathematics and science educators. A focus will include: Socio-cultural learning theory in Math and Science; standards-based instruction; instructional design; formative & summative assessment, and differentiation so that meaningful instruction becomes accessible to all students. Cross-listed with STME 4001. Max hours: 3 Credits.
Grading Basis: Letter Grade

STME 5051 - STEM Capstone: Secondary Education (3 Credits)
This course provides Secondary STEM Education students with a capstone learning experience that integrates knowledge of STEM content, students, and school context into socially-just and culturally responsive practices. Cross-listed with STME 4051. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.

STME 7010 - Community-Engaged STEM Leadership (3 Credits)
In this learning opportunity, we will explore ways to think about informal and formal learning spaces with a lens of STEM Leadership. Restriction: Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to EDHD-PhD and LDRE-EDd majors within the School of Education and Human Development.
Typically Offered: Fall.

STME 7020 - Power of Data (3 Credits)
In this course we will focus on uncovering the biases in research and data, support students in using data for public good, and employ methodological frameworks which help make sense of the complex intersectionalities between race, gender, and socioeconomic class. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.
STME 7030 · Decolonizing STEM spaces: Beyond Equity and Access (3 Credits)
In this course we will extend the equity and access conversations in educational spaces including STEM education by focusing on indigenous knowledge systems and ways of knowing. We will explore the epistemological frameworks and knowledge claims within this space. Max hours: 3 Credits.
Grading Basis: Letter Grade

Social Justice (SJUS)

SJUS 5050 · Special Topics: Social Justice (3 Credits)
Special Topics in Social Justice will be covered. Cross-listed with SJUS 4050. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

SJUS 5770 · Selling Empires: The Art of Visual Propaganda (3 Credits)
Western empires disseminate political, social, economic & cultural practices through complex interplay of cultural practices. Visual production is a complex site for meaning making within imperialism. Examines how visual discourses operated to create meaning for audiences, through focus on postcolonial critique. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5770, SSCI 5770, WGST 5770, HUMN 4770, SJUS 4770, SSCI 4770, and WGST 4770. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SJUS 5880 · Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

Social Sciences (SSCI)

SSCI 5000 - 19th and 20th Century Continental Philosophy (3 Credits)
A seminar on key problems and thinkers in the nineteenth & twentieth century continental philosophical traditions and their contemporary significance. Restriction: Restricted to Graduate and Graduate Non-Degree majors. PHIL 3002 or PHIL 3022 are strongly recommended preparation for optimal student success. Cross-listed with PHIL 4000/5000 and HUMN 5000. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5013 · Methods and Practices of Graduate Interdisciplinary Humanities (3 Credits)
The second of three required Master of Humanities core courses, this course introduces beginning graduate students to methodologies and intellectual frameworks for gathering, organizing, and developing interdisciplinary research. Focus is on the application of theories and methods of research, interpretation and analysis in humanistic research through readings that explore philosophical and cultural discourses have altered theory and method. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN/PHIL 5013. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

SSCI 5020 · Foundations and Theories of Interdisciplinary Social Science (3 Credits)
The first of the Master of Social Science core courses, this course exposes beginning graduate student to critical, key analytic models, and their application in disciplines that comprise the social sciences (classical anthropology, sociology, sociology of religion, philosophy of history, political theory, classical psychology, etc.) for the purpose of graduate-level interdisciplinary social science research. Course note: Students must repeat this course if they earn a C+ or lower and must have permission from the instructor to repeat the course. Students will only earn 3 credits for this course, even if they must repeat it. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HUMN 5020 and PHIL 5020. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SSCI 5023 · Research Perspectives in Social Science (3 Credits)
Introduces interdisciplinary social research through a critical examination of various methodological approaches. Each student formulates a research proposal which includes a research question, a review of the literature, and methods of study. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Term offered: spring, fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SSCI 5025 · Foundations and Theories of Interdisciplinary Humanities (3 Credits)
Exposes the beginning graduate student to exemplary works and methodologies of disciplines oriented to humanities and social sciences, such as philosophy, sociology, history, communication, fine arts, and literature. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5025. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring, Summer.
SSCI 5050 - Topics in Social Science (1-3 Credits)
These topic seminars are concerned with specialized aspects of the social sciences from various theoretical and research perspectives. These courses are interdisciplinary and serve as a forum for discussion of individual projects and theses. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Term offered: fall. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SSCI 5101 - Pragmatism: Classical American Philosophy (3 Credits)
The most significant philosophical tradition born in the United States is pragmatism. Examines several of the most important classical works of this tradition, the influence of thinkers who have helped pragmatism, and the contemporary relevance of this tradition. Figures who may be included in this course are: Emerson, Pierce, Royce, James, Dewey, Mead, Rorty. Restriction: Restricted to Graduate and Graduate Non-Degree majors. An introductory course in philosophy is strongly recommended for optimal success. Cross-listed with PHIL 4101, 5101, HUMN 5101. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SSCI 5242 - Medicine, Health Care, and Justice: Bioethics (3 Credits)
Anyone entering a medical profession must confront tough ethical issues and dilemmas. These often arise suddenly, so practitioners best preparation is to think ahead about what will likely occur. This course introduces students to a variety cases and philosophical theories useful to healthcare careers. For example, What is “health” and who determines it? Is there a right to health care? How should medical scarcity (vital organs, vaccines, supplies, etc.) be addressed? What duties are owed to patients by healthcare providers, and why? On what grounds may medical treatment be demanded — or refused? The goal of the class is to train students to be nimble and imaginative in how they reason about the difficult cases they will face in their career. Suggested prerequisite one or two previous courses in philosophy, and a minimum grade of C in each course are strongly recommended; if the student lacks this coursework, consult with the professor prior to registration. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4242, PHIL 5242, HUMN 5242. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SSCI 5251 - Introduction to Legal Studies (3 Credits)
A survey of the United States legal system, including lawmakers powers, jurisdiction, court procedures, professional ethics and major principles of business law, contracts, estates and probate, family law, property and torts. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SSCI 4251/HUMN 4251/HUMN 5251. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SSCI 5252 - First Amendment: Theory and Context (3 Credits)
First Amendment jurisprudence including free speech/responsibility, sedition/seditious libel/dissent, prior restraints, time/place/manner restrictions, hate/intimidating speech, defamation, privacy/security tensions, intellectual property/public good, advertising, corporate speech, sexual expression, and public status of religion. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 4252, HUMN 5232, SSCI 4252, PCI 4252 and SSCI 5232. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

SSCI 5430 - How to think green: Environmental Ethics (3 Credits)
Is it wrong to extinguish a species? What makes cruelty to animals wrong? Do trees have rights? Is the earth a resource we can use any way we want? Is vegetarianism a more ethical way to live — or just another lifestyle choice? As citizens of the world, we are bombarded by such questions. Understanding what is fundamental clarifies thinking and coordinates action. This course introduces ethical theories relevant to problems such as animal and species welfare, deforestation, pollution, climate change, and the sustainability of the planet. By examining multiple perspectives, students gain confidence judging which issues and data are significant and deciding what kind of world we should create with our actions and inactions. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 3430, PHIL 5430 and HUMN 5430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SSCI 5450 - Law, Diversity and Community in United States History (3 Credits)
Engaging extensive primary and secondary source material, course applies an interdisciplinary approach to diversity and conflict that often surrounds the quest for economic, moral and social inclusion in the United States. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5540. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
SSCI 5600 - Questioning Religious Belief and Practice: Introduction to Philosophy of Religion (3 Credits)
Does God exist? Can the existence of God be proved? When is believing on faith acceptable? How or why is there a “problem of evil”? What are the attributes of a “god” and how can they be known, if at all? What is the relation of God to the world we experience? How does morality relate to religious belief and practice? The goal of the course is to broaden and deepen our understanding of key philosophical debates within religious traditions as we study prominent thinkers in the history of philosophy. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5600, PHIL 4600, PHIL 5600, RLST 4060, and RLST 5060. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Summer.

SSCI 5620 - Western Emperors: The Art of Visual Propaganda (3 Credits)
Explores modernity as a historical epoch and a theoretical space, looking at the commentary and reflections of influential 20th century thinkers including Adorno, Arendt, Levinas, Merleau-Ponty, Habermas and Foucault. Examines how the theoretical inclinations of modernity were influenced by politics, art, literature and culture. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5600 and PHIL 5650. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5650 - Reflections on Modernity (3 Credits)
Examines one of the most influential movements in recent European thought, beginning with existentialism’s 19th century roots, and continuing on to the existentialist philosophers of the 20th century. Figures covered may include Dostoyevsky, Kierkegaard, Nietzsche, Heidegger, Sartre and de Beauvoir. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 3833, PHIL 5833, and HUMN 5833. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

SSCI 5680 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring.

SSCI 5720 - Sexuality, Gender and Their Visual Representation (3 Credits)
Studies sexuality, gender and identity representation from classical antiquity through the present in the visual arts. Uses the literature of visuality, feminism, race and queer theory. Explores representations of femininity, masculinity and androgyny and their reinforcement and challenge to gender-identity norms. Cross-listed with HUMN 5720 and WGST 5720. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5770 - Selling Empires: The Art of Visual Propaganda (3 Credits)
A philosophical examination of interrelationships between contemporary media, technology, and their impacts on character of contemporary life and values. Topics may include ethics, epistemology, democracy, advertising, media literacy and criticism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4920, 5920, HUMN 5920. Max Hours: 3 Credits.
Grading Basis: Letter Grade

SSCI 5833 - Existentialism (3 Credits)
Explores modernity as a historical epoch and a theoretical space, looking at the commentary and reflections of influential 20th century thinkers including Adorno, Arendt, Levinas, Merleau-Ponty, Habermas and Foucault. Examines how the theoretical inclinations of modernity were influenced by politics, art, literature and culture. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HUMN 5600, PHIL 4600, PHIL 5600, RLST 4060, and RLST 5060. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SSCI 5833 - Philosophy of Media and Technology (3 Credits)
A philosophical examination of interrelationships between contemporary media, technology, and their impacts upon character of contemporary life and values. Topics may include ethics, epistemology, democracy, advertising, media literacy and criticism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4920, 5920, HUMN 5920. Max Hours: 3 Credits.
Grading Basis: Letter Grade

SSCI 5880 - Independent Study, SSCI (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring.

SSCI 5920 - Philosophy of Media and Technology (3 Credits)
A philosophical examination of interrelationships between contemporary media, technology, and their impacts upon character of contemporary life and values. Topics may include ethics, epistemology, democracy, advertising, media literacy and criticism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4920, 5920, HUMN 5920. Max Hours: 3 Credits.
Grading Basis: Letter Grade

SSCI 5933 - Philosophy of Eros (3 Credits)
What does it mean to understand philosophy as an erotic activity? This question will be examined, first by studying Plato’s dialogues such as Lysis, Symposium and Republic and then by reading texts from Sigmund Freud, Michael Foucault and others. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with PHIL 4933, BGST 4933/5933 and HUMN 5933. Max Hours: 3 Credits.
Grading Basis: Letter Grade

SSCI 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.
Sociology (SOCY)

SOCY 5000 - Professional Seminar: Sociological Inquiry (3 Credits)
Introduces sociology graduate students to sociology as a discipline and profession. Conveys practical skills and knowledge useful to the pursuit of a graduate degree. Introduces students to sociology graduate faculty members and their research interests. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA). Cross-listed with SOCY 4020, ETST 4020 and ETST 5020. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA)
Typically Offered: Fall.

SOCY 5016 - Social Theory (3 Credits)
An overview of major theories across the social behavioral sciences examining social order, integration, conflict, and change. The course emphasizes a cross disciplinary approach, highlighting works of historical and contemporary relevance. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SOCY 5020 - Race, Culture and Immigration (3 Credits)
In this course, we will consider the social and legal construction of race and immigration. We will also explore how immigrants have been racialized both historically and in the current moment. In addition, we will consider the role of culture in shaping the immigrant experience and immigrant outcomes. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA). Cross-listed with SOCY 4020, ETST 4020 and ETST 5020. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5022 - Federal Data for Health Research & Policy (1-3 Credits)
Students will develop the knowledge and skills required to effectively use a variety of federal and statistical data sets for health research and policy analysis. Each week is devoted to one or two federal statistical datasets—data collection methods; why they are collected and what health issues they are designed to address; what population they represent and at what geographic scale. Most critically, students will be able to distinguish between questions that can be addressed with a public version of the data and questions that require restricted versions of the data that are protected by federal law and guidelines. Students will read, discuss and present research from various perspectives (Demography, Economics, Geography, Public Health, Sociology) using these data sources and apply their knowledge of data analysis from a variety of perspectives. Students will learn how to gain access to restricted data, how to protect individual anonymity with best practice disclosure avoidance techniques and will develop a research proposal for confidential research access.
Note: Familiarity with SAS (preferable) or other statistical software such as SPSS or Stata and statistics or data analysis is recommended.
Restriction: Restricted to degree-granting graduate programs. Cross-listed with ECON 6022, HBSC 6022, and GEOG 5022. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

SOCY 5024 - Seminar: Research Methods I (3 Credits)
Problems and procedures in research design, data collection and processing. Note: Required for M.A. graduate students in sociology. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SOCY 5050 - Health Disparities (3 Credits)
This course focuses on social, economic, and political factors that shape the uneven distribution of health and illness in the United States. Social determinants of health are explored, including socioeconomic status, race and ethnicity, neighborhood environments, social relationships, and gender. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA). Cross-listed with SOCY 4050. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor’s to Master’s program (SOCI-BA-BMA)
SOCY 5110 - Sociology of Health Care (3 Credits)
Examines U.S. health care institutions and issues such as rising costs, the effects of class, racial and gender inequality, professionalization and monopolization of roles, construction of illness and health, managed care, for-profit health care, and ethics of health care decisions. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Cross-listed with SOCY 4110. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Fall.

SOCY 5183 - Seminar: Quantitative Data Analysis (3 Credits)
A research-oriented seminar stressing the utilization of social data already collected in the test or generation of sociological theory. Note: Required for M.A. graduate students in sociology. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SOCY 5193 - Seminar: Qualitative Data Analysis (3 Credits)
Develops skills for designing studies, collecting and analyzing data, and evaluating qualitative research. Concentrates on ethnography, in-depth interviewing, and content analysis. Students read examples of qualitative research and about the process of qualitative research, as well as conducting independent research. Note: Required for M.A. graduate students in sociology. Prereq: graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SOCY 5220 - Population Change and Analysis (3 Credits)
Concepts of population change, methods of analysis, and applications to contemporary social issues. Topics include age and sex distributions, fertility, mortality, and migration, and the social causes and consequences of these phenomena. Cross-listed with SOCY 4220. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5270 - Socl Meanings of Reproduction (3 Credits)
Reproduction involves more than biological processes, assuming symbolic, political, and ideological meanings. This course examines contested meanings of reproduction, including how people experience reproduction, controversies over who should reproduce (and under what circumstances), and how public policy mediates these conflicts. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Cross-listed with SOCY 4440, WGST 4270 and WGST 5270. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5290 - Aging, Society and Social Policy (3 Credits)
A sociological examination of central issues (e.g., work, retirement, family support, health) pertaining to the aging population. Heterogeneity in aging, as shaped by gender, race, ethnicity and social class is addressed, as well as policies pertaining to the adult population. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SOCY 4290. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

SOCY 5440 - Poverty and Social Inequality (3 Credits)
Investigates the distribution of wealth, income, and economic power in the United States with a focus on social institutions and factors that shape inequality. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Cross-listed with SOCY 4440. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Spring.

SOCY 5460 - Hate Groups and Group Violence (3 Credits)
Social sciences help us understand the phenomena of hate groups and group violence and contribute toward their elimination. Examples are examined using theoretical perspectives on different levels of analysis and within different areas of research. Cross-listed with SOCY 4460. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)
Typically Offered: Fall.

SOCY 5475 - Self and Identity (3 Credits)
A course in social psychology focusing on individuals in social interaction. Focuses of self-conception, identity, presentation of self, and self and emotion management. Examines major theories and research in social psychology. Prereq: Graduate standing. Cross-listed with SOCY 4475. Term offered: summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Summer.
Typically Offered: Spring. Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Grading Basis: Letter Grade
Max Hours: 3 Credits. Cross-listed with SOCY 4650. Prereq: Graduate standing. Term offered: spring.

Sociology of Adulthood and Aging (3 Credits)
Examination of the adult life course—post-adolescence to death, focusing on key social transitions of adulthood (e.g., independence from parents, marriage, retirement), and historical, institutional, and social factors that create variation in their timing, meaning, and individuals' role experiences. Cross-listed with SOCY 4650. Prereq: Graduate standing. Term offered: spring. Max Hours: 3 Credits.

SOCI 4660 - Seminar: Social Psychology (3 Credits)
Sociological approaches to the study of the self, role theory, persons in situations, identifications, socialization, and other characteristics of persons in society. Prereq: Graduate standing. Term offered: summer. Max hours: 3 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

SOCI 4690 - Crime and Inequality Over the Life Course (3 Credits)
Life-course perspective on inequality and crime. Studies transitions, trajectories and turning points as key features of the life course. Considers how inequalities and criminal behavior are shaped by timing of experiences, historical and geographic contexts, others' lives, and human agency. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Cross-listed with SOCY 4690. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)

Typically Offered: Spring.

SOCI 5640 - Sociology of Childhood and Adolescence (3 Credits)
An in-depth overview of the theories and research regarding the life course understanding of infancy, childhood and adolescence. Children's lives and cultures in relation to adults and their transition from childhood to adolescence are studied. Cross-listed with SOCY 4640. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

SOCI 5650 - Sociology of Adulthood and Aging (3 Credits)
Examination of the adult life course—post-adolescence to death, focusing on key social transitions of adulthood (e.g., independence from parents, marriage, retirement), and historical, institutional, and social factors that create variation in their timing, meaning, and individuals' role experiences. Cross-listed with SOCY 4650. Prereq: Graduate standing. Term offered: spring. Max Hours: 3 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

SOCI 5660 - Seminar: Sociology of the Family (3 Credits)
An intensive review and analysis of the family as a social institution. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA). Term offered: spring. Max hours: 3 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate students in the Sociology Bachelor's to Master's program (SOCI-BA-BMA)

Typically Offered: Spring.
SOCY 5780 - Violence in Relationships (3 Credits)
Course focuses on the study of violence among individuals involved in intimate relationships; factors in society such as norms, laws and institutions that are related to creating violence among intimates; and social policies, prevention, intervention and treatment programs.
Prereq: Graduate standing. Cross-listed with SOCY 4780, WGST 4780 and WGST 5780. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SOCY 5840 - Independent Study: SOCY (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: spring. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

SOCY 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Term offered: fall. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SOCY 5955 - Master's Thesis (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Additional Information: Report as Full Time. Typically Offered: Fall, Spring, Summer.

SOCY 5964 - Master's Report (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Additional Information: Report as Full Time. Typically Offered: Fall, Spring, Summer.

SOCY 5995 - Global Study Topics (3-6 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Department consent required. Repeatable. Max hours: 12 Credits
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

Spanish (SPAN)

SPAN 5000 - Introduction to Graduate Studies in Spanish (3 Credits)
Introduces critical methodologies and critical perspectives of practices of signification such as literature and film, among others, in the context of culture and history. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

SPAN 5010 - History of the Spanish Language (3 Credits)
Studies the history of the Spanish language, both internal and external, from the language's Latin roots to the present. Historical phonetics are emphasized, though all features of the language are discussed. Prereq: Graduate standing. Cross-listed with SPAN 4010. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5020 - Spanish Sociolinguistics (3 Credits)
Studies the Spanish language in its social context. In addition to specific regional linguistic features, social factors such as geography, social class, politics, race, gender, economics, education and history are discussed as determiners of the linguistic landscape. Prereq: Graduate standing. Cross-listed with SPAN 4020. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5030 - The Learning and Teaching of Heritage Speakers (3 Credits)
Studies Spanish heritage speakers, including characteristics of how they learn and how best to teach them. Includes definitions of heritage speakers, strengths and weaknesses in learning Spanish, and attitudes of and towards heritage speakers in the classroom. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SPAN 4030. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

SPAN 5040 - Spanish Classroom Methods and Practice (3 Credits)
Focuses on the second language learning and teaching of Spanish in a classroom context. Looks at topics including second language vocabulary, pronunciation, grammar, and types of feedback. Practical component of activity design and learning/teaching strategies. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SPAN 4040. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.
SPAN 5060 - Dialects of the Spanish-Speaking World (3 Credits)
Studies the geography of the Spanish language in those countries where it is spoken as a primary language. Includes a comparison of dialect features and a study of factors that contribute to the diversity of the Spanish language. Prereq: Graduate standing. Cross-listed with SPAN 4060. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5070 - Spanish Applied Linguistics & Second Language Acquisition (3 Credits)
This course is a survey of various areas of the field of linguistics in general (e.g. morphology, syntax, semantics, pragmatics, etc.) as well as specific aspects of the structure (and acquisition) of the Spanish language. Prereq: Graduate standing. Cross-listed with SPAN 4070. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5076 - Spanish in Colorada (3 Credits)
A study of the Spanish language in its social context in Colorado and New Mexico. We will study historical factors as well as current social factors that contribute to the use of the Spanish language in this region. Prereq: Graduate standing. Cross-listed with SPAN 4076. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5080 - Spanish in the United States (3 Credits)
A study of the Spanish language in its social context as a language of the United States. In addition to studying bilingualism and language traits, factors such as race, gender, class, education, nationality, age, generation and language attitudes are considered. Prereq: Graduate standing. Cross-listed with SPAN 4080. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

SPAN 5130 - Medieval Spanish Literature (3 Credits)
Examines Spanish literature from the jarchas and the Cid through the Celestina in the context of the reconquest. Considers the construction of the Christian knight as a hero and the corresponding representations of women, Jews and Muslims. Prereq: Graduate standing. Cross-listed with SPAN 4130. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5150 - Masterpieces of Spanish Literature (3 Credits)
The most enduring works in the literature of Spain across the centuries. Prereq: Graduate standing. Cross-listed with SPAN 4150. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5170 - Generation of 1898 (3 Credits)
Spanish drama of the 16th and 17th centuries, the period of greatest dramatic productivity in the nation's history. Readings include selections from Lope de Vega, Tirso de Molina, Calderon de La Barca, and others. Prereq: graduate standing. Cross-listed with SPAN 4170. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5190 - Nineteenth-Century Spanish Novel (3 Credits)
The Spanish novel in one of its most productive periods, beginning with romanticism and carrying through the realist and naturalist movements. Prereq: graduate standing. Cross-listed with SPAN 4190. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5200 - Nineteenth-Century Spanish Drama (3 Credits)
The Spanish drama of the 18th and 19th centuries, the period of greatest dramatic productivity in the nation's history. Readings include selections from Lope de Vega, Tirso de Molina, Calderon de La Barca, and others. Prereq: graduate standing. Cross-listed with SPAN 4200. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5300 - Generation of 1898 (3 Credits)
Spanish literature from around the turn of the century through the first third of the 20th century, reflecting the deep intellectual and cultural foment occasioned in part by Spain's loss of the Spanish-American War of 1898. Prereq: Graduate standing. Cross-listed with SPAN 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
SPAN 5320 - Interculturalism and Transnationalism in Modern Spain (3 Credits)
Students will examine experiences of Spaniards living in different parts of the world and the circumstances of either foreigners or migrants living in Spain, through their visual and literary texts, film, photographs, documentaries and other products of current popular culture, such as contemporary television. Prereq: Graduate standing. Cross-listed with SPAN 4320. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5330 - Modern Culture of Spain through Film and Narrative (3 Credits)
Culture of modern Spain studied through Spanish film. The death of military dictator Francisco Franco opened the process for the recuperation of a usurped democratic, representational system that has become the basis of a cultural and economic resurgence. Taught in Spanish. Prereq: graduate standing. Cross-listed with SPAN 4330. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5340 - Race, Class, and Gender in Spanish Golden Age Literature (3 Credits)
Explores works of various genres in relation to their social and political contexts in 16th and 17th century Spain, emphasizing the cultural attitudes toward race, class, and gender that inform them. Prereq: graduate standing. Cross-listed with SPAN 4340 and WGST 4540/5540. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5350 - Don Quijote (3 Credits)
The complete Don Quijote in Spanish, focusing on its historical, social, and philosophic context, and its role in the emergence of the modern novel. Prereq: graduate standing. Cross-listed with SPAN 4350. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5360 - Women and the Spanish Civil War (3 Credits)
Focuses on the role of Spanish women during the Second Republic, the Civil War, the dark & starving postwar, & the inescapable exile that was a consequence of the conflict. Discusses several texts & films that portray this silenced odyssey, as well as historical, ideological & cultural documents of critical value & significance. Cross-listed with SPAN 4360. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

SPAN 5380 - Romanticism in Spain (3 Credits)
The romantic movement in 19th century Spain through plays, poems, essays. Prereq: graduate standing. Cross-listed with SPAN 4380. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5399 - Special Topics: Spanish Peninsular Literature (3 Credits)
Varying topics in Spanish peninsular literature not otherwise covered by regular courses. Note: May be taken more than once, provided that the topic is different each time. Prereq: graduate standing. Term offered: spring, fall. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5401 - Survey of Spanish-American Literature I: Pre-1898 (3 Credits)
The most important works in the literature of Spanish America from the Colonial Period to the Late 19th Century. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with SPAN 4401. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPAN 5411 - Contemporary Spanish-American Novel (3 Credits)
The novel in Spanish America since the Second World War, the period in which the greatest number and quality of works has been produced. Prereq: graduate standing. Cross-listed with SPAN 4411. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPAN 5450 - Masterpieces of Spanish-American Literature (3 Credits)
Focuses on a limited number of outstanding works in Spanish-American literature across the centuries. Prereq: graduate standing. Cross-listed with SPAN 4450. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPAN 5499 - Masterpieces of Spanish-American Literature (3 Credits)

SPAN 5501 - Borges: An Introduction to His Labyrinths (3 Credits)
The works of Jorge Luis Borges (short stories, essays, poetry, translations, essays anthologies, lectures) will be studied with the goals of teaching students to think globally as well as critically about literature and other cultures. Prereq: graduate standing. Cross-listed with SPAN 4501. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPAN 5512 - Contemporary Argentine Short Stories (3 Credits)
The short stories by extraordinary Argentine writers, such as Jorge Luis Borges, Silvina Ocampo, Julio Cortazar, Griselda Gambaro, Adolfo Bioy Casares, and Manuel Muica Lainez, among others, will be studied with the goals of teaching students to think globally as well as critically about literature and other cultures. Prereq: graduate standing. Cross-listed with SPAN 4512. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPAN 5521 - Mexican Literature I: pre-Columbian and Colonial (3 Credits)
Survey of Mexican literature and culture from pre-Columbian times to the colonial era. Prereq: graduate standing. Cross-listed with SPAN 4521. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPAN 5539 - Special Topics: Spanish Peninsular Literature (3 Credits)
Varying topics in Spanish peninsular literature not otherwise covered by regular courses. Note: May be taken more than once, provided that the topic is different each time. Prereq: graduate standing. Term offered: spring, fall. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

SPAN 5540 - Masterpieces of Spanish-American Literature (3 Credits)
Focuses on a limited number of outstanding works in Spanish-American literature across the centuries. Prereq: graduate standing. Cross-listed with SPAN 4450. Term offered: spring, fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5560 - Seminar in Spanish Creative Writing: Poetry and Short Fiction (3 Credits)
A capstone writing course. Semester writing project will be collected poems and short stories. Prereq: graduate standing. Cross-listed with SPAN 4600. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPAN 5568 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPAN 5599 - Special Topics: Latin American Literature (3 Credits)
Varying topics in Latin American literature not otherwise covered by regular courses. Note: May be taken more than once, provided that the topic is different each time. Prereq: graduate standing. Term offered: spring, fall. Repeatable. Max Hours: 6 hours.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

SPAN 5593 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
SPAN 5950 - Master’s Thesis (1-6 Credits)
This course is for students writing a master’s thesis. It includes individual mentoring with one or more faculty members, individualized and library-based research. May also include field research. Students must consult with a faculty member before enrolling. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
SPAN 5970 - Special Topics in Literature (3 Credits)
Varying topics in Hispanic literature not otherwise covered by regular courses. Prereq: Graduate standing. Cross-listed with SPAN 4970. Term offered: spring, fall. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

**Special Education (SPED)**

SPED 5000 - Universal Design for Learning (UDL) (3 Credits)
This course introduces Universal Design for Learning (UDL), an important educational philosophy and set of principles & techniques that focuses on strategies and tools to help ALL students by accommodating their differences in inclusive classroom settings. Cross-listed with SPED 4400. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5010 - Intentional Interventions for Exceptional Learners (3 Credits)
This course provides instructional strategies and interventions for students with a wide variety of disabilities. Implications for targeted and intensive interventions and assessment are considered. Cross-listed with SPED 4010. Max hours: 3 Credits
Grading Basis: Letter Grade

SPED 5030 - Understanding (dis)Ability in Contemporary Classrooms (3 Credits)
This course provides an overview of special education by examining the history of special education, construction of dis/ability, characteristics of individuals with disabilities, aspects of disproportionality, and introduction to evidence-based instructional practices. Restriction: Restricted to graduate students in the SEHD or Teacher Education minors. Cross-listed with SPED 4030. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in the SEHD or Teacher Education minors.

SPED 5050 - Assessment & Advocacy for Multilingual Learners (3 Credits)
Students learn to gather and use assessment results within a strengths-based framework to advocate for appropriate programming, placement, instruction, and ongoing progress monitoring of multilingual students. Special attention is paid to linguistic and cultural bias in the field of assessment. Cross-listed with CLDE 5050. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5120 - Negotiating The Special Education Teaching Process (3 Credits)
This course explores both theoretical and practical aspects of educating students with special needs. Students will examine the nature of disability, the history and legal basis for special education programming in American schools, as well as contemporary law governing the education of persons with disabilities. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5140 - Assessment: Inquiry, Instruction, & Intervention (3 Credits)
Using a variety of assessment tools, students will focus on the educational assessment methods and procedures used in decision making and program planning for students with exceptional learning needs, with attention to pervasive issues pertaining to students from culturally and linguistically diverse backgrounds. Cross-listed with SPED 4140. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5151 - Slashing Stigmas: Promoting Positive Behaviors (3 Credits)
This course works to transform perspectives and practices related to supporting student behavior in classrooms. Students will learn important considerations related to culture, race, gender and socioeconomic status, as they intersect with behavior and social emotional development. Cross-listed with SPED 4151. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5210 - Foundations for Understanding Behavior (3 Credits)
This course is designed to provide a foundational understanding of behaviors commonly witnessed in the classroom. It will provide strategies for assessment and guidance on legal processes which guide the development of individualized education and behavior plans. Specialize instructional methods and current events impacting the social emotional educations of students will also be discussed. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5300 - Family, Professional, and Community Collaboration (3 Credits)
Focuses on the development of competencies in consultation and collaboration. The overall purpose is to encourage the development of understanding and skills that enhance a teacher’s ability to work and communicate effectively with school personnel, including paraprofessionals and parents. The goal of collaboration is to support and determine together the instructional scenarios that best meet the needs of students. Specific competencies include problem solving, conflict resolution, data collection or observation skills, conferencing, facilitating meetings, and interacting with others while respecting diverse discourses and multicultural backgrounds. Cross-listed with SPED 4300. Max hours: 3 Credits.
Grading Basis: Letter Grade

SPED 5401 - Advanced Seminar in Special Education (3 Credits)
Designed to allow an opportunity for special educators to compare and contrast the service delivery, funding mechanisms, professional ethics, and underlying assumptions of special and regular education. Trends in the field of special education are examined through review of current research. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.
MTAX 6420 - Estate and Gift Taxes (3 Credits)
This course is an introduction to principles and practices associated with the taxation of estates, gifts, and other gratuitous transfers under Subtitle B of the Internal Revenue Code. Using relevant examples, this course also focuses on the practical aspects of completing IRS Form 706, United States Estate and Generation-Skipping Transfer Tax Return, and IRS Form 709, United States Gift and Generation-Skipping Transfer Tax Return. Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Typically Offered: Spring.

MTAX 6425 - Taxation of S Corporations and Their Shareholders (3 Credits)
This course focuses on fundamental tax issues relating to S corporations and their shareholders arising from the formation, operation, and liquidation of S corporations. Course work includes an examination of pertinent federal income tax returns of a S corporation. Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6431 - Inbound International Taxation (3 Credits)
An inbound transaction deals with a foreign person (e.g., a foreign individual, partnership, or corporation) doing business in the U.S. This course begins by discussing that a foreign person is taxed on two types of U.S. income: (1) FDAP (generally, investment income) and (2) effectively connected income (business income). FDAP includes a foreign person investing in marketable securities, as well as key planning issues when a foreign person invests in U.S. real estate. The effectively connected income discussion includes the branch profits tax. Planning opportunities such as avoiding U.S. income tax when a foreign person exports goods into the U.S.; choice of U.S. business entity; and structuring U.S. business entities between different foreign tax systems (world-wide taxation by the foreign country or territorial taxation by the foreign country) are also presented. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6432 - Outbound International Taxation (3 Credits)
Outbound international taxation addresses U.S. tax issues when a U.S. person (e.g., U.S. individual, partnership, or corporation) is investing or doing business abroad. For U.S. individuals working abroad, this course covers the foreign income exclusion and the housing exclusion. The foreign tax credit protects both the U.S. individual or business from double taxation, but only if correctly structured when dealing with closely held U.S. businesses. From a business perspective, the deferral aspects of a foreign corporation are covered, as well as the anti-deferral regimes of (1) a controlled foreign corporation with subpart F income and (2) the passive foreign income company (PFIC). Planning issues such as creating foreign source income, corporate reorganizations under IRC § 367 are also discussed. Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6435 - Income Tax Accounting and Methods (3 Credits)
Topics in this course include the adoption of and change in accounting periods; income recognition and deduction allowance under the cash and accrual methods of accounting; the time value of money and original interest discount rules; prepaid and contested income and expenses; income and deduction reversals; accounting method changes; installment sales; long-term contracts; inventory accounting, including LIFO, FIFO and manufacturers' inventories; and net operating losses. Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.
MTAX 6440 - Tax Practice and Procedures (3 Credits)
This course provides a study of the organization, policies, and procedures of federal and state taxing authorities. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6445 - Entrepreneurs’ Tax and Finance (3 Credits)
This course focuses on entrepreneurs and start-ups. Topics include choice of entity considerations regarding the proper business entity for conducting the new venture, tax efficient ways of raising capital, incentivizing employees, planning for retirement, and taking a successful company public. This course provides students with the tools and background to make intelligent, thoughtful decisions regarding tax and finance issues impacting the formation, operation, funding, and expansion of entrepreneurial ventures. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6455 - Tax Aspects Relating to Exempt Organizations (3 Credits)
This course focuses on various methodologies that allow auditors to develop standards, objectives and procedures to examine systematically tax returns and tax strategies for misreported tax items and tax fraud. This course provides an introduction to and guidance for creation of an effective audit program for tax-based systems, with a focus on auditing tax fraud. The tax audit is designed specifically to detect potential misreporting of income and deductions and potential tax fraud. This course focuses on various methodologies that allow auditors to develop standards, objectives and procedures to examine systematically tax returns and tax strategies for misreported tax items and tax fraud. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6460 - Advance Topics in Taxation (3 Credits)
This course focuses on a variety of advanced tax topics for businesses and individuals. This course is offered on an infrequent basis. Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6465 - State and Local Taxation (3 Credits)
This course focuses on various state and local taxation issues, such as the constitutionality of certain state and local tax regimes; nexus or jurisdictional tax due process; allocation and apportionment formulae under various state and local tax regimes; business versus nonbusiness income; the multi-state tax compact; the “unitary” concept; residency definitions; nonresident income sources; sales of tangible personal property and their taxation, including the impact of sales and use taxes on selected transactions, such as interstate purchases and sales, drop shipments, purchases from and sales to state and federal governments, occasional or “casual” sales, leasing transactions, and construction and manufacturing transactions; retail and wholesale sales; valuation techniques for real and personal property for purposes of certain state and local property taxes; and administrative procedures applied by various state and local tax jurisdictions. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6470 - Professional Judgment and Ethical Decision Making in Accounting and Tax (3 Credits)
The content of this course includes the following: the ethical responsibilities of accountants, both personal and professional; ethical dilemmas facing accountants; ethical theory; the various accounting codes of conduct and ethical guidance for accountants; and the application of ethical theory; codes of conduct, and professional standards. In addition, this course includes discussions on ethical considerations, mandates, and penalties germane to a tax accounting practice, with an emphasis on Treasury Department Circular No. 230; on tax penalties under IRC Code sections 6662, 6664, 6694, 6695, and 6696 as those penalties relate to taxpayers and tax return preparers; on the standards governing the issuance of tax opinions to clients, and on AICPA statements on standards for tax services. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6473 - Auditing for Taxes and Tax Fraud (3 Credits)
This course provides an introduction to and guidance for creation of an effective audit program for tax-based systems, with a focus on auditing tax fraud. The tax audit is designed specifically to detect potential misreporting of income and deductions and potential tax fraud. This course focuses on various methodologies that allow auditors to develop standards, objectives and procedures to examine systematically tax returns and tax strategies for misreported tax items and tax fraud. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.
MTAX 6475 - Accounting for Income Taxes (3 Credits)
This course addresses financial accounting reporting standards for income taxes. Principal topics include an understanding financial statement disclosures, identification of permanent and temporary differences, and calculation of current and deferred tax provisions. Additional topics include uncertain tax positions and valuation allowances. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

MTAX 6482 - Advanced Partnership Taxation (3 Credits)
Advanced federal income tax course focusing on the taxation of partnerships and their partners. Topics: "substantial economic effect", allocation of debt to partners' bases, "hot assets", profits interests, related-party transactions, distribution "waterfalls", profit and loss allocation "waterfalls", and taxation of retiring partners. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

MTAX 6485 - Advanced Partnership Taxation (3 Credits)
This course is an advanced federal income tax course focusing on the taxation of partnerships and their partners. Topics often include discussions on allocations of partnership income and loss under the "substantial economic effect" and the partner's interest in the partnership rules, targeted capital accounts, allocation of debt to partners' bases, "hot assets", profits interests, related-party transactions, distribution "waterfalls", profit and loss allocation "waterfalls", and taxation of retiring partners. Students cannot receive credit for both MTAX 6485 and MTAX 6482. Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6490 - Income Tax of Trusts, Estates, and Beneficiaries (3 Credits)
There are five major income tax areas that are fundamental to a CPA or legal tax practice: (1) individual; (2) partnership; (3) C corporations; (4) S corporations; and (5) "fiduciary" taxation. This course focuses on the last of the core types of income taxation – fundamentally, the taxation of trusts, estates and their beneficiaries under Subchapter J of the Internal Revenue Code. There are three major areas covered by Subchapter J. First, the grantor trust rules deal with revocable trusts and, to many practitioner's surprise, many irrevocable trusts. Second, estates and irrevocable trusts that are not grantor trusts are governed by the distributable net income rules. Third, when someone inherits an asset that was not taxed to the decedent, such as a retirement plan, the income in respect of a decedent rules apply to the heir. This course examines each of these three major areas of income taxation under Subchapter J and focuses on the practical aspects of completing IRS Form 1041, U.S. Income Tax Return for Estates and Trusts, using real life examples. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6495 - Travel Study: Washington, D.C. Tax Experience (2 Credits)
By petition only. This course is a travel program. Students will travel to Washington, D.C. to meet with representatives from the various governmental entities that influence federal taxation. In particular, students will meet with representatives (i) from the various Congressional committees and legislative advisory committees involved in drafting tax legislation, (ii) from the Internal Revenue Service and Treasury Department, and (iii) from the United States Tax Court and other courts that consider federal tax cases. Prereq: At least 6 credit hours of MTAX courses and a cumulative MTAX GPA of no less than 3.00. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 2 Credits.
Grading Basis: GRD
Prereq: At least 6 credit hours of MTAX courses and a cumulative MTAX GPA of no less than 3.00. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6499 - Consolidated Group Returns (3 Credits)
This course focuses on the preparation of consolidated group corporate tax returns filed pursuant to Internal Revenue Code section 1501 and the Treasury Regulations promulgated thereunder. Corporate affiliated groups are also discussed. Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.
MTAX 6500 - Advanced Corporate Taxation (3 Credits)
A study of the statutory and judicial tax rules and problems relating primarily to corporate reorganizations and commonly controlled corporations, with a special emphasis on the tax rules associated with restructing of corporate entities in the context of corporate merger and acquisition transactions. Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6140 or ACCT 4410 or at least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6840 - Tax Independent Study (1-3 Credits)
Permission of instructor required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Prereq: At least 9 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: At least 9 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

MTAX 6939 - Tax Internship/Cooperative Education (1-3 Credits)
Supervised experiences involving the application of tax return preparation and tax planning concepts and skills in an employment situation. Prereq: At least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Prereq: At least 6 credit hours of MTAX courses. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

URPL 5010 - Planning Methods (3 Credits)
This course focuses on the most commonly applied quantitative and qualitative methods used in planning; data organization and management principles; and various ways to collect, analyze, and communicate data as a fundamental component of the planning process. Prereq: GEOG 4640 and GEOG 4680 or permission of instructor, and minimum cumulative GPA of 3.00. Restriction: Senior standing by the start of the enrollment semester. Please contact instructor for permission to register in this course. Cross-listed with URPL 4010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: GEOG 4640 and GEOG 4680 and minimum cumulative GPA of 3.00. Restriction: Senior standing by the start of the enrollment semester.

URPL 5020 - Planning Law and Institutions (3 Credits)
This course covers the legal basis for planning; the evolution of planning law through a comprehensive review of landmark court decisions; and the types and hierarchies of governments, their powers and relationships, and how planning operates within those governmental contexts. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 5030 - Planning Technologies (3 Credits)
This flexibly designed course provides introductory to intermediate instruction on three software packages that are core to the planning profession; Adobe Suite (Illustrator, Photoshop, and InDesign), ESRI ArcGIS Pro, and Trimble SketchUp. Students can select the appropriate level of instruction for each software based on their prior experience. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 5040 - Urban Sustainability (3 Credits)
Examines the interface of the natural and social realms in cities. Topics include the environmental history of cities; the causes, environmental impacts and mitigation of sprawl; urban green infrastructure; and best practices in planning environmentally sustainable cities and suburbs. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 5050 - Urban Development (3 Credits)
Explores the procedures, policies, financing, and politics of planning and real estate development. Topics include the relationship between planning goals and regulations; real estate development and finance; site planning and development review for societal impacts, such as traffic, health, and safety; and financing and planning public infrastructure. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 5060 - Planning Workshop (3 Credits)
An introduction to the studio environment, this course provides students with experience and knowledge/skills development in physical planning and design, the planning process, plan making, and collaborative planning, plus introductory instruction in GIS and SketchUp. Prereq: 9 hours of URPL Core Coursework. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: 9 hours of URPL Core Coursework (URPL 5000, 5010, 5020, 5030, 5040, 5050). Restriction: Graduate level students.
URPL 5070 - Planning Practice & Engagement (3 Credits)
This course offers a comprehensive survey of planning practice; types of planning positions and employers; business aspects of planning; planning ethics; planning engagement, and professional/career development in planning. The planning engagement component includes planning advocacy; public meetings; public engagement techniques; diverse publics; controversial planning topics; and mediation. Restriction: Graduate students in the Master of Urban and Regional Planning program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate Urban and Regional Planning students.
Typically Offered: Spring.

URPL 6000 - Planning Project Studio (6 Credits)
This studio course requires student teams to complete a substantial planning project using a comprehensive set of knowledge/skills for real-world clients. Five focus areas offered annually: Healthy Communities, Urban Revitalization, Regional Sustainability, International Experience, and Summer in Colorado. Prereq: URPL 5060. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Required to Graduate Urban and Regional Planning students.
Additional Information: Global Education Study Abroad.

URPL 6200 - Land Development Regulations (3 Credits)
This course provides a comprehensive exploration of the various components of land development regulation, including preliminary plats; general/final development plans; zoning; PUDs; variances; site plan development review; land use regulators; regulatory processes. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6205 - Plan Making (3 Credits)
This course offers a broad overview of the various types of plans and the specific processes involved in their creation, including comprehensive plans; rural/small town plans; corridor plans; small area plans; campus/institutional plans; special plans. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6210 - Planning Engagement (3 Credits)
This course focuses on roles and methods of public engagement in planning. Topics include planning advocacy; public meetings; public engagement techniques; diverse publics; controversial planning topics; mediation. Restriction: Restricted to Graduate Urban and Regional Planning students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate Urban and Regional Planning students.

URPL 6220 - Advanced Research Techniques (3 Credits)
This course offers an in-depth look at a variety of research principles and techniques, including advanced qualitative and quantitative data collection; survey design; sampling; probability distributions; hypothesis testing; inferential statistics; other topics associated with scholarly research. Prereq: URPL 5040. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students
Prereq: URPL 5040. Restriction: Graduate level students

URPL 6225 - Urban Policy Analytics (3 Credits)
This course teaches quantitative analysis techniques to answer questions about Planning. Topics include population/economic forecasting, analysis of census data, research design, and survey design. Relying on the software R, students learn how to manage datasets and run bivariate/multivariate statistical analysis. Prereq: URPL 5010 - Planning Methods or instructor's permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Required to Graduate Urban and Regional Planning students.
Typically Offered: Fall.

URPL 6230 - Urban Data Science (3 Credits)
This course takes a computational social science approach to working with urban data. It uses R to introduce coding and statistical methods that students can reproduce and experiment with. The course presumes no prior knowledge of R as it introduces coding (data cleaning, web scraping, running various statistical analyses) from the ground up. We will partner with city agencies who will provide datasets for the class to work with and who will serve as clients for the class. The final project will consist of a product for our clients. Restriction: Restricted to Graduate Students in the College of Architecture and Regional Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning
Typically Offered: Fall.

URPL 6235 - Environmental Justice (3 Credits)
This class explores the foundations of the environmental justice movement, current and emerging issues, and the application of environmental justice analysis to environmental policy and planning. It examines claims made by diverse groups along with the policy and civil society responses that address perceived inequity and injustice. While focused mainly on the United States, international issues and perspectives are also considered. Restriction: Restricted to Graduate Students or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning
Typically Offered: Fall.

URPL 6249 - Project Management (3 Credits)
Introduces the knowledge and skills of Project Management (PM) in a business environment. Emphasis will be on the entire project life cycle, the project management process groups and the knowledge areas as presented in the Project Management Body of Knowledge (PMBOOK), from the Project Management Institute (PMI). Managerial aspects, quantitative tools, and traditional techniques of Project Management will be covered. A variety of projects will be examined. Note: Cannot receive credit for both DSCI 6820 and BUSN 6820. Restriction: Graduate level students.
Cross-listed with BANA 6650. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6250 - GIS for Urban Planning (3 Credits)
This course is a detailed introduction to GIS that focuses on spatial analytics for Urban Planning using vector and raster data. Aimed at professionals and researchers, this course includes advanced ArcGIS applications and tools, and innovations in geo-spatial data analysis. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
URPL 6250 - Advanced Geo-Spatial Methods (3 Credits)
Students will be introduced to the hardware, software, theory, and skills required to use Geographical Information Systems (GIS). In this course, students will learn how to use GIS software to manage, analyze, map, and present spatial data to support the planning and design processes. Prereq: An introductory GIS class is required before taking this class. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6255 - Visualization for Planning (3 Credits)
This course covers visual design theory and advanced instruction in Adobe Illustrator, Photoshop, and InDesign to create compelling infographics, renderings, and reports, as well as advanced instruction in SketchUp to create 3D visualizations at multiple urban scales. Restriction: Restricted to graduate level MURP and MUD students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate level MURP and MUD students.

URPL 6299 - Introduction to Smart Cities (3 Credits)
This course will explore some of the main change-making technological innovations in the 21st century and their impact on public policy in cities through a survey of best practices, model policies, and lessons learned from cities across the United States and globe. Restriction: Restricted to graduate students in the Urban & Regional Planning program. Cross-listed with ENGR 6299, ENV 5660, and PUAD 5627. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate Urban and Regional Planning students.

URPL 6310 - Community Food System Planning (3 Credits)
Healthy communities require sustainable local and regional food systems. This course examines how communities can collaboratively develop and implement programs, processes and practices that help ensure food security and equitable access to healthy food options for all populations. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6349 - Global Health Studies II (3 Credits)
Global Health Studies II: Comparative Health Systems. The course has three parts: (1) examines the social and cultural construction of sickness, systems of etiology cross culturally, the therapeutic encounter, varying roles of healer and patient, and the cultural basis of all healing systems; (2) considers health systems in the context of global health reform, and the history, organization, and roles of institutions of global health governance; and (3) considers the interrelationship of health, foreign policy and global security. Cross-listed with PBHL 4020. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6350 - City Design Fundamentals (3 Credits)
Investigates the historical roots, spatial patterns, and physical forms of cities and their evolution over time; the environmental, cultural, and economic forces influencing city design; and urban design as the nexus of the planning and design professions in contemporary city-building. Cross-listed with ARCH 6270, URBN 6525, and LDAR 5530. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6355 - Urban Redevelopment Strategies (3 Credits)
This course focuses on the best practices and strategies used to help revitalize urban areas. Topics include urban infill development; TODs; adaptive reuse; historic preservation; design review; parking; public spaces; brownfield/grayfield redevelopment; culture/tourism; special districts; incentives/funding; and revitalization policies. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6360 - Urban Infrastructure (3 Credits)
This course provides a comprehensive exploration of transit planning, including transit planning fundamentals; transit routes and systems; transit modes and technologies; ridership modeling; scheduling; operations; funding; policies and regulation; relationship to land use; and facilities/design requirements. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6365 - Parks and Public Spaces (3 Credits)
This course offers a focused look at the role of parks and public spaces in the development and activation of cities; their designs, qualities, and components; management/operations; funding; policies; equal access; role as community and economic development tool. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6395 - Urban Design Economics and Equity (3 Credits)
Explores the economics of urban design through its relationship with private-sector real estate development, public-sector infrastructure, and budgetary/fiscal constraints on design implementation while emphasizing the critical role of urban design in advocating for social equity, affordable housing, and related Issues. Restriction: Restricted to graduate level students. Cross-listed with URBN 6625 and ARCH 6261. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

URPL 6396 - Urban Design Policy, Process, and Regulation (3 Credits)
Provides an understanding of the inextricable relationship between urban design and the natural environment. Students learn how to design sustainable public spaces, promote environmental resilience, combat climate change, and foster environmental justice and healthy communities through urban design. Restriction: Restricted to Graduate level students. Cross-listed with URBN 6650. Max hours: 3 Credits.
Grading Basis: Letter Grade

URPL 6397 - Design Policy, Process, and Regulation (3 Credits)
Explores the many design regulations that shape the urban form, how they are created and evolve, and how they impact design idealization, analysis, and communication using real-world scenarios to experiment with and test iterative design processes and techniques. Cross-listed with URBN 6650. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

URPL 6398 - Design Process (3 Credits)
Advances current practice by exploring innovative methods of design analysis, production, representation, and communication. Community participation and civic engagement are integral components of seminar. Cross-listed with URBN 6641 and LDAR 6741. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
URPL 6399 - Sustainable Urban Infrastructure (3 Credits)
Focuses on developing uniform vocabulary on sustainable infrastructure across science & technology, architecture & planning, public policy, and health & behavioral sciences. Students learn concepts, principles/pathways and evaluation techniques for promoting the diffusion of sustainable urban infrastructures. Restriction: Graduate level students. Cross-listed with CVEN 5460. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6400 - Community Development (3 Credits)
This course introduces community development, examining planners' and other stakeholders' roles in the field; key theories and practices; community dynamics; community-based organizations; asset-based development; social equity; and the influence of local physical and economic factors on community development. Cross-listed with ARCH 6256. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6405 - Urban Housing (3 Credits)
This course examines housing trends and patterns; supply and demand factors; housing policies; housing challenges (e.g., inequitable distribution, special needs, segregation/discrimination, and homelessness); sociological, demographic, and economic considerations; and the roles of planners and the public and private sectors. Restriction: Restricted to graduate students. Cross-listed with LDAR 6755 and ARCH 6205. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URPL 6410 - Social Justice in Planning (3 Credits)
This course investigates various social justice issues encountered in planning, including conflict resolution; advocacy; environmental justice; social equity; culture and diversity; disadvantaged populations; public engagement techniques; affordability; equal access; and policy impacts. Cross-listed with LDAR 6637 and ARCH 6258. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6449 - Urban Social Problems (3 Credits)
Examines local government from the perspective of sociology and group dynamics. Course could include some or all of the following subjects: neighborhoods and community groups, class and race relations, community crime, social service issues, immigration, the underclass in American society, and related urban social problems. Cross-listed with PUAD 7628. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6455 - Real Estate Development and Finance (3 Credits)
The course offers a detailed analysis of the real estate development process, its relationship to the planning/design profession, and financial aspects of real estate development including measures of value, capitalization rates, capital budgeting, debt and equity markets and taxation. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6499 - Preservation Theory and Practice (3 Credits)
Philosophical questions in preservation practice; balancing significance in the environment with natural decay and demands for change. Policy issues as well as preservation and adaptation design. Cross-listed with HIPR 6010. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6500 - Environmental Planning/Management (3 Credits)
This course addresses issues related to planning under major environmental laws, ecosystem service-based management, urban green infrastructure, urban watershed and river management, urban forest and parks planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6505 - Enviro. Policy & Regulation (3 Credits)
This course focuses on the important field of environmental policy and regulation, including topics such as the National Environmental Policy Act (NEPA); environmental justice; environmental law; land use conflicts; contamination/remediation; environmental regulators; and regulatory policies and enforcement. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6510 - Energy/Natural Res. Planning (3 Credits)
This course provides an overview of the issues associated with energy and natural resource planning. Topics include: energy policy; alternative energy development; water resources; extraction/mining; natural resource protection and regulation; resource management, policies, politics, and technologies. Cross-listed with GEOG 4260. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6547 - Urban Ecology (3 Credits)
This lecture/seminar will cover ecological principles as applied to urban systems (lecture portion) and students will do an intensive study, presentation, and discussion on the topic of their choosing (seminar portion). Cross-listed with LDAR 6655. Restriction: Restricted to graduate students in the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

URPL 6548 - Defining & Measuring Sustainability (3 Credits)
Unique cross-disciplinary course that teaches students community engagement strategies to define sustainability goals. Life cycle assessment and material flow analysis tools used to measure environmental sustainability benchmarks. Fieldwork applies both tools to cities in Colorado. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6549 - Environmental Impact Assessment (3 Credits)
The objective of this course is to provide the foundation for understanding the environmental impact assessment process, its legal context, and the criteria and methods for procedural and substantive compliance. Prereq: URPL 5530 or permission of instructor. Cross-listed with GEOG 4220, 5220. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
URPL 6550 - Transportation Planning/Policy (3 Credits)
This course examines policy issues in urban transportation planning: how transportation system design and political/institutional contexts shape transportation decision-making; major modes of urban transportation; and the social, environmental, economic, energy, and health impacts of transportation systems. Cross-listed with URPL 4550. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6555 - Transportation, Land Use, and the Environment (3 Credits)
This course teaches how current transportation modes shape regions and how future transportation technologies might impact us. Topics include policy making and governance; land use interactions with transportation investments; climate change and resilience; energy use; environmental justice; and equity considerations. Restriction: Graduate level students. Cross-listed with URPL 4555. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6565 - Pedestrian & Bicycle Planning (3 Credits)
This course provides a detailed focus on the unique planning issues and factors involved with bicycle and pedestrian modes of transportation, including pedestrian/bicycle planning fundamentals; routes and systems; facilities and design requirements; funding; maintenance and operations; policies; and best practices. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6598 - Traffic Impact Assessment (3 Credits)
Covers (1) procedures to satisfy state and local requirements for transportation impact studies, (2) methods to perform trip generation, distribution, and traffic assignment for impact analyses, and (3) analysis of transportation impacts on residential communities, mode choice, regional business (downtown or suburban), peak and off-peak travel times, noise, safety, parking and pedestrains. A course project requires students to develop an application of analysis software to a case study area. Cross-listed with CVEN 6512. Restriction: Graduate standing or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URPL 6599 - Sustainable Transportation Systems (3 Credits)
This course examines notable topics in sustainable transportation: demystifies conventional transportation engineering methods; and explores empirical examples of why such methods are often misguided. The intent is to enlighten engineering students and help support planning/policy students interested in transportation sustainability. Cross-listed with CVEN 5633. Restriction: graduate standing or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URPL 6600 - Regional Growth and Equity (3 Credits)
Explores the institutions, policies, laws, data, and funding that support planning for housing, transportation, infrastructure, and jobs at the regional scale with a focus on equity. Students will learn analytic techniques to study the labor market, economic growth and performance, transportation systems, and affordable housing strategies. Restriction: Restricted to graduate level students. Cross-listed with URPL 4600. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

URPL 6605 - Regional Economic Systems (3 Credits)
This course offers a comprehensive investigation into regional economic systems; metropolitan economies; regional economic development; regional market assessment; job generation; taxes/spending; and fiscal/economic policies and impacts at the metropolitan, regional, and statewide scale. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6615 - Small Town, Rural, and Tourism Planning (3 Credits)
This course investigates issues and challenges associated with rural, small town, and tourism planning including farmland conservation, growth management, sustainable food systems, economic development, and revitalization. It reviews global trends, national policies, and local planning processes through case studies. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6620 - Sustainable Tourism Planning (3 Credits)
This course investigates the unique aspects associated with planning and developing sustainable tourism infrastructure. Topics include: eco-tourism; historic tourism; cultural tourism; urban tourism; sports and recreation planning; regional tourism planning; and sustainable resort planning and development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6645 - Disaster/ClimateChangePlanning (3 Credits)
Introduces students to concepts and debates that shape disaster and climate change studies. Features case studies of disaster and climatic issues affecting Colorado and the Rocky Mountain region. Looks specifically at how planning can reduce risk and increase local resilience.
Grading Basis: Letter Grade

URPL 6650 - International Development Planning: Theory and Practice (3 Credits)
This course examines key development issues and planning approaches in cities of the Global South. Topics include: development theory; legacies of colonial urbanisms; actors and institutions in development; urban informality; water and sanitation; housing and land tenure; and climate change, among other topics. Max hours: 3 Credits.
Grading Basis: Letter Grade

URPL 6655 - International Field Research: Methods and Analysis (3 Credits)
This course will teach students the fundamentals of data collection, analysis, and dissemination in an international - and mostly developing world - context. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning.

URPL 6675 - Special Topics: Urban and Regional Planning (3 Credits)
Various topical concerns are offered in urban and regional planning. theory, concepts, methods, case studies and practice. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Graduate level students.
URPL 6850 - Independent Study: URPL 6920. Max hours: 3 Credits. Grading Basis: Letter Grade with IP

URPL 6810 - Independent Study: URPL (1-3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to urban and regional planning. Restriction: Graduate level students. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade with IP

URPL 6820 - Planning Internship (3 Credits)
Designed to provide professional practice experience in urban and regional planning. The emphasis is on actual work experience in settings with client groups as the students assist them in determining solutions to their problems. Restriction: Graduate level students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6810 - ACE Mentoring (3 Credits)
Graduate students work with professional architects, designers, and engineers mentoring students in selected local high schools to learn problem solving, graphics and model making to produce a design project. Student mentors develop lesson plans, outcomes and keep a weekly journal. Cross-listed with ARCH 6470 and LDAR 6470. Restriction: Restricted to majors within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

URPL 6805 - Planning Capstone (6 Credits)
Planning Capstone A requires students to identify an independent study/ small group project of their choosing and develop a detailed plan to complete the project. Prereq: URPL 6000 or instructor consent. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: URPL 6000
Restriction: Restricted to MURP graduate majors within the College of Architecture and Planning.

URPL 6820 - Planning Thesis A (3 Credits)
Spanning two semesters, Planning Thesis requires students to plan and complete a research thesis of their choice. Part A provides instruction for proper thesis research, analysis, and writing while students develop a detailed work plan and begin their research. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restriction: Graduate level students.

Additional Information: Report as Full Time.

URPL 6825 - Planning Thesis B (3 Credits)
Spanning two semesters, Planning Thesis requires students to plan and complete a research thesis of their choice. Part B includes the completion of the research and the thesis document, and presentation of the project to the student’s thesis committee. Prereq: URPL 6920. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Prereq: URPL 6920.
Additional Information: Report as Full Time.

**Urban Design (URBN)**

URBN 6500 - Urban Design Studio I (6 Credits)
Introduces urban design at a citywide scale through the evaluation of urban structures, systems, networks, and spatial forms that create the complex organism known as the city. Students explore urban design concepts as physical solutions to real-world issues. Restrictions: Restricted to Master of Urban Design students. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

Typically Offered: Fall.

URBN 6525 - City Design Fundamentals (3 Credits)
Investigates the historical roots, spatial patterns, and physical forms of cities and their evolution over time; the environmental, cultural, and economic forces influencing city design; and urban design as the nexus of the planning and design professions in contemporary city-building. Restriction: Restricted to students with graduate standing. Cross-listed with URPL 6350, ARCH 6270, and LDAR 5530. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URBN 6550 - Design Policy, Process, and Regulation (3 Credits)
Explores the many design regulations that shape the urban form, how they are created and evolve, and how they impact design ideation, analysis, and communication using real-world scenarios to experiment with and test iterative design processes and techniques. Restriction: Restricted to students with graduate standing. Cross-listed with URPL 6397. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URBN 6575 - Advanced Visualization for Urban Design (3 Credits)
Provides advanced instruction in effective communication and visualization through the use of digital tools commonly used in urban design (e.g. Photoshop, Illustrator, InDesign, SketchUp, Lumion). Topics include graphic design theory, use of storyboards, renderings, diagrams, maps, sketches, photographs, and infographics. Prereq: Intermediate-level knowledge and experience in the Adobe applications covered in the course. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduates and non-degree students.

URBN 6600 - Urban Design Studio II (6 Credits)
Advances the understanding and application of urban design tools, methods, and practices and engages students in a real-world project with a community partner. Students integrate real estate development, economics, environmental and social equity, aesthetic criteria, historic preservation, and community engagement. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.
URBN 6625 - Urban Design Economics and Equity (3 Credits)
Explores the economics of urban design through its relationship with private-sector real estate development, public-sector infrastructure, and budgetary/fiscal constraints on design implementation while emphasizing the critical role of urban design in advocating for social equity, affordable housing, and related issues. Restriction: Restricted to graduate-level students. Cross-listed with URPL 6395 and ARCH 6261. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

URBN 6640 - History of the City (3 Credits)
Introduces students to the history of global cities through selected typologies. Explores similarities and differences among cities considered against the larger cultural, political and socio-economic envelope of which they are part. Provides awareness of origins, growth and evolution of urban form. Cross-listed with ARCH 6240. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6641 - Design Process (3 Credits)
Advances current practice by exploring innovative methods of design analysis, production, representation, and communication. Community participation and civic engagement are integral components of seminar. Restriction: Restricted to students with graduate standing. Cross-listed with URPL 6398 and LDAR 6741. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URBN 6643 - Visualization for Planning (3 Credits)
This course covers visual design theory and advanced instruction in Adobe Illustrator, Photoshop, and InDesign to create compelling infographics, renderings, and reports, as well as advanced instruction in SketchUp to create 3D visualizations at multiple urban scales. Restrictions: Restricted to ARUR-MUD majors in the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6644 - Sustainable Urbanism (3 Credits)
This seminar explores the connections between ecology and urbanism. It will examine the multiple, interrelated ecological and social systems operating in the city. Students will explore innovative design processes and techniques that serve to create a higher quality of life and place with a particular emphasis on the effectiveness of sustainable design approaches at varying scales. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6645 - Global Design Practice (3 Credits)
This seminar will educate students about critical issues related to practicing design in a global context. Course will examine diverse issues of design and planning practice from contracts, communication and culture to remote research, design opportunities and ethics. Prereq: URBN 6612. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6650 - Urban Design and the Environment (3 Credits)
Provides an understanding of the inextricable relationship between urban design and the natural environment. Students learn how to design sustainable public spaces, promote environmental resilience, combat climate change, and foster environmental justice and healthy communities through urban design. Restriction: Restricted to graduate-level students. Cross-listed with URPL 6396. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

URBN 6652 - Design Seminar (3 Credits)
Investigates topical issues in urban design, typically within the framework of a theme running through an entire course of study. Focus is on critical evaluation of theory, process and methods. Cross-listed with LDAR 6652. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6675 - Design Practice and Leadership (3 Credits)
Provides students with an understanding of urban design as a professional practice; how it functions within a collaborative, interdisciplinary environment; and the interpersonal skills needed to successfully work as part of and be a leader in a complex design team. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URBN 6686 - Special Topics: Urban Design (3 Credits)
Various topical concerns are offered in urban design history, theory, elements, concepts, methods, implementation strategies, and other related areas. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6700 - Urban Design Advanced Travel Studio (6 Credits)
Travels to international or US urban location(s) to engage in advanced urban design development, analysis, and production on a real-world project that includes multiple environmental, cultural, and economic influences; wide-ranging urban planning contexts, and various design dimensions and functional considerations. Restriction: Restricted to graduate students in the College of Architecture and Planning. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning.
Additional Information: Global Education Study Abroad. Typically Offered: Summer.

URBN 6725 - Urban Design Capstone (6 Credits)
Requires students to work individually, paired with an urban design practitioner mentor, on a complete design solution for a real-world client that incorporates the full spectrum of urban design knowledge, methods, and skills to produce professional-grade urban design plan deliverables. Prereq: URBN 6600: Urban Design Studio II. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: URBN 6600
URBN 6840 - Independent Study: URBN (1-6 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to urban design.
Restriction: Graduate level students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URBN 6930 - Urban Design Internship (3 Credits)
Designed to provide professional practice experience in urban design. Emphasis on actual work experience in settings with client groups as students assist them in determining solutions. Program directors approval required. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

Urban Teacher Education (UEDU)

UEDU 5015 - TFA Professional Learning Communities (3 Credits)
The Teach for America Professional Learning Communities are designed to be a resource and forum for content groups to collaborate on best practices in assessment, instruction, and data gathering. As truly purposeful communities, they exhibit five characteristics: a shared mission and vision, high levels of collective efficacy, strategic use of all available assets, outcomes that matter to all, and adherence to agreed-upon processes. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to CIED-MA majors with an option UBL within the School of Education and Human Development.

UEDU 5040 - Planning for Learning (3 Credits)
This course explores multiple aspects of student learning: including 1) standards-based instruction 2) cultural responsive instructional design, 3) assessment and data, and 4) differentiation in curriculum and instruction so that meaningful instruction becomes accessible to all students. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Cross-listed with 4040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.

UEDU 5050 - Capstone: Planning, Instruction & Assessment (3 Credits)
The purpose of this course is to re-visit multiple aspects of instructional and curriculum design, implementation, and evaluation. The goal is to promote access to knowledge for all learners, including those who are diverse linguistically and culturally and those identified with special needs. Cross-listed with UEDU 4050. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.

UEDU 5052 - English/LA & Social Studies Capstone: Secondary Ed (3 Credits)
Through teaching units of instruction in school placements, secondary English/LA and Social Studies teacher candidates learn both unit and lesson design, assessment of student learning, and differentiation of curriculum and instruction to promote access to knowledge for all learners. Cross-listed with UEDU 4052. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.

UEDU 5060 - Motivation and Engagement in Curriculum and Learning (3 Credits)
This course focuses on the Six Cs of motivation and engagement; the framework designed to reach these students who are not complaint learners. This course allows teachers to think deeply about their role in motivating and engaging students and allows participants to apply the research to their individual classrooms. The classes incorporate the M.E. (motivation and engagement) Framework into each lesson. Teachers will gain a deep understanding of motivation and engagement through modeling, research, and a "transfer" of knowledge. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5070 - Curriculum Theories in Urban Education (3 Credits)
Topics in this course include: curriculum theory; the debate on the purpose of curriculum; multicultural education; critical race theory; social class and school improvement; the intended and unintended consequences of school accountability, reform and closures; teacher retention; and teacher burnout. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5075 - Transforming Pedagogy for the 21st Century (3 Credits)
This course is designed to support teachers in establishing a classroom culture centered on fostering students’ 21st Century Success skills: collaboration, communication, creativity, and critical thinking. Teachers will explore ways of implementing and supporting 21st-century skills in planning and instruction. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5110 - Tchg Literacy in Eng Ed (3 Credits)
Designed to meet both Colorado Literacy Council & Colorado Performance-Based Standards for prospective secondary English/LA teachers concerning Knowledge of Literacy, the course provides knowledge and practice using specific literacy methods to enhance students’ literacy development in English/LA/reading classrooms. Cross-listed with UEDU 4110. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5120 - Teachers as Leaders (3 Credits)
Introduction to teacher leadership when mentoring pre-service and novice teachers. Includes exploration of teacher leadership dimensions, self-analysis of own potential and impact as a teacher leader, and beginning skills necessary to operationalize emerging roles as a mentor and teacher leader. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5130 - Mentoring Novice Teachers (3 Credits)
This course prepares mentor teachers to understand dispositions and mind-sets for mentoring, coaching, co-teaching, and collaboration skills and approaches to providing effective feedback to ensure pre-service and novice teachers are well-supported to continually develop and grow. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5140 - Model and Apprenticing Effective Practice (3 Credits)
This course supports mentor teachers to provide guided apprenticeship for pre-service and novice teachers related to effective practices in facilitating inclusive classroom learning communities, planning, instruction, and assessment that are grounded in equity-focused, asset-based approaches to supporting diverse learners. Max hours: 3 Credits.
Grading Basis: Letter Grade
UEDU 5240 - Culture of Education Policy (3 Credits)
This course examines major issues in education policy analysis. Students will be required to critically analyze an educational policy issue uncovering the context, determining how the policy was implemented and what the outcomes were, intended as well as unintended. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5340 - Leading Social Emotional Learning in P-12 Schools (3 Credits)
In this course, scholars will learn the various definitions, purposes and value of social-emotional learning (SEL) in order to lead social-emotional learning in P-12 schools. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5464 - Methods Teachg Social Studies (3 Credits)
One of two courses on linguistically and culturally relevant social studies teaching. Course content includes geography, economics, civics. Cross-listed with UEDU 4464. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.

UEDU 5465 - Methods of Teaching History (3 Credits)
One of two courses on linguistically and culturally relevant history teaching. Cross-listed with UEDU 4465. Restriction: Restricted to students in the Teacher MA or undergraduates in the BAMA. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: TCHR-MA plan or BMA subplan.

UEDU 5470 - Democracy and Social Studies Education (3 Credits)
This course explores the current and historical relationship between democracy and social studies education and challenges teachers to think critically about challenging students to not only participate in democracy but transform it. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5660 - History of Schooling in the United States (3 Credits)
This course introduces education professionals to the history of contemporary public school. The contents of this course emphasize the ways in which people from marginalized national and cultural groups have experienced education through eras of compulsory schooling, school segregation, and the contemporary context of school reform. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5705 - Global Experiential Learning (3 Credits)
Develop global competency skills. Research problems or opportunities of global significance using 21st century skills. Engage in learning communities to reflect, analyze and communicate international educational experiences. Design global education teaching and learning or compare education perspectives. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5710 - Global Education Capstone Project (3 Credits)
Propose a culminating project that allows integration of previous coursework and travel experience to translate into practice. Collaborate to develop a product that will be of use in a work setting, school, or classroom. Present and defend the capstone project. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5840 - Independent Study (1-6 Credits)
Independent Study in Urban Community Teacher Education, Topic of study varies according to project. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

UEDU 5845 - Special Topics: (1-5 Credits)
Course topics will vary depending on faculty and student interests. Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.

UEDU 5850 - Capstone for Integrated MA (3 Credits)
The capstone is a culminating project that provides a way for students to demonstrate the knowledge and skills they acquired during the MA program skills by planning, completing, and presenting a culminating project linked to the United States educational system. Max hours: 3 Credits.
Grading Basis: Letter Grade

UEDU 5931 - Internship & Lrg Comm I (2 Credits)
Teacher candidates engage in systematic observation of, participation in, design of, and reflection on curricular, instructional, and management practices across the full range of educational programs within a school. Additionally, teacher candidates participate in the activities of a school community (the school, its classrooms and the community in which the school exists). Graduated learning activities for each internship and time requirements are specified in the program handbook. Cross-listed with UEDU 4931. Max hours: 2 Credits.
Grading Basis: Letter Grade

UEDU 5932 - Internship & Lrg Comm II (2 Credits)
Teacher candidates engage in systematic observation of, participation in, design of, and reflection on curricular, instructional, and management practices across the full range of educational programs within a school. Additionally, teacher candidates participate in the activities of a school community (the school, its classrooms and the community in which the school exists). Graduated learning activities for each internship and time requirements are specified in the program handbook. Cross-listed with UEDU 4932. Max hours: 2 Credits.
Grading Basis: Letter Grade

UEDU 5933 - Internship & Lrg Comm III (8 Credits)
Teacher candidates engage in systematic observation of, participation in, design of, and reflection on curricular, instructional, and management practices across the full range of educational programs within a school. Additionally, teacher candidates participate in the activities of a school community (the school, its classrooms and the community in which the school exists). Graduated learning activities for each internship and time requirements are specified in the program handbook. Prereq: UEDU 5931 and UEDU 5932. Cross-listed with UEDU 4933. Max hours: 8 Credits.
Grading Basis: Letter Grade

UEDU 5934 - Extended Internship & Learning Community (3-8 Credits)
Teacher candidates engage in systematic observation of, participation in, design of, and reflection on curricular, instructional, and management practices across the full range of educational programs within a school. Additionally, they participate in the activities of a professional learning community. Cross-listed with UEDU 4934. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
**Women's Studies (WGST)**

**WGST 5010 - Special Topics in Women's and Gender Studies (1-3 Credits)**
Examines current topics in the field of Women's studies and Gender studies. Topics vary from term to term. May be repeated as long as the topic is distinct and different from courses student has already received credit for. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

**WGST 5225 - Women in the West (3 Credits)**
This course will explore how Americans experienced their rapidly growing and changing cities during the past two hundred years. This course will cover a wide range of urban themes, including segregation and gentrification, self-invention and policing, ethnic gangs and race riots, skyscrapers and suburbia, and commercial sex and Hollywood. The course will ultimately chart how a range of Americans - including immigrants, teenagers, laborers, women, LGBTQ+ people, and people of color – all fought for their own "right to the city". Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4225, HIST 5225, WGST 5225, GEOG 4625. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

**WGST 5230 - Women in the West (3 Credits)**
Focuses on ways in which women, from the mid-19th century through the mid-20th century, of different races, classes, and ethnic background, have interacted and been active participants in the development of the Western states. Cross-listed with WGST 4230 and HIST 4230/5230. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

**WGST 5250 - Gender, Development and Globalization (3 Credits)**
Examining the cost and impact of globalization; not only on women and gender but economic equality, human movement and displacement, sustainable development and the environment. Highlighting the complexities of a higher interconnected world and intersectional nature of a globalized world, answering the question: Who Wins? Who Loses? Prereq: Graduate standing. Cross-listed with WGST 4248, PSCI 4248 and PSCI 5245. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

**WGST 5305 - Women of Color Feminisms (3 Credits)**
This course is an overview of women of color feminist theorizing (thinking) and praxis (practice) in the U.S. We will explore these feminisms through the writing, art, and organizing efforts of women and trans, femme, and non-binary people of color with a focus on key themes and concepts including identity, difference, oppression, intersectionality, representation, violence, resistance, empowerment, solidarity, and coalition. Texts for the course highlight key issues in the feminist theorizing and praxis of Black, Latina/x, Chicana/x, Asian (American), Pacific Islander, Indigenous, and Arab (American) women and trans, femme, and non-binary people of color, especially the politics of identity and representation; structural oppressions and violations; and practices of survival, resistance, and activism. Not only will we examine how these feminists have critiqued oppression(s) based on race, class, gender, sexuality, nationality, and religion, (as well as how these systems of domination intersect), but what kinds of approaches, strategies, and changes these thinkers and activists have organized for and promoted. Cross-listed with WGST 4305, ETST 4305 and ETST 5305. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

**WGST 5306 - History of Sexuality (3 Credits)**
Examines modern British history by focusing on sex and gender as central aspects in people's lives. Considers the ways gender shapes the realms of politics, economics, society and culture in Britain from the 18th century to present. Cross-listed with WGST 4303 and HIST 4303/5303. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

**WGST 5307 - History of Sexuality (3 Credits)**
Explores the relationships between gender and norms, sexual practice, and ideas about sexuality in Europe and the United States. Examines how sex and sexuality have changed over time and how those changes relate to social, cultural, political and economic history. Cross-listed with WGST 4307 and HIST 4307/5307. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

**WGST 5308 - Contemporary Feminist Thought (3 Credits)**
This course explores contemporary feminist thought in philosophy and literature in the 20th and 21st centuries. Topics include lesbianism, black feminism, Chicana feminism, transgender identity, women and work and others. Cross-listed with ENGL 4308, ENGL 5308, PHIL 4308, PHIL 5308, WGST 4308. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
 WGST 5343 - Women & Gender in US History (3 Credits)
This course will explore women and gender as drivers of US history. From politics to popular culture, jobs to sexual empowerment, civil rights to economic restructuring, we will use gender as a lens to re-envision familiar stories about American history. Cross-listed with WGST 3343, HIST 3343, and HIST 5343. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

 WGST 5345 - Gender, Science and Medicine: 1600 to the Present (3 Credits)
Examines the ways science and medicine have both shaped and been shaped by ideas about gender. Pays particular attention to the relationship between scientific/medical ideas about the sexes and the social organization of gender. Cross-listed with WGST 4345 and HIST 4345/5345. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

 WGST 5420 - Goddess Traditions (3 Credits)
Explores the many forms which Goddesses have assumed through history, including the Neolithic Great Mother and her heiresses in the ancient Mediterranean cultures, such as: Isis, Ishtar, Demeter, Hecate, Aphrodite, Artemis, Athena and others, and their parallels in India. Goddess traditions have encompassed a full spectrum from virgins to Great Mothers to dark underworld Goddesses of death and destruction. Cross-listed with WGST 4420 and RLST 4420/5420. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

 WGST 5449 - Whores and Saints: Medieval Women (3 Credits)
Studies how women are presented in texts, as well as works by women. Investigates the roles open to women and societal attitudes toward women, who were considered seductresses, saints, scholars and warriors in the middle ages. Prereq: Nine hours of literature courses or instructor permission. Cross-listed with WGST 4511 and FREN 4510/5510 and RLST 4730/5730. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

 WGST 5511 - French Women Writers (3 Credits)
Designed to explore writings by French and Francophone women from the Middle Ages to the present. Addresses the question of what it means to be a woman and want to write. The selections include a wide variety of genres: autobiographical writings, stories, poems, manifestos, letters, political and historical documents. Note: This course assumes that students have passed FREN 3112 or 3122 or an equivalent course, plus one other 3000 level course in French. Prereq: Graduate standing. Cross-listed with WGST 4511 and FREN 4510/5510. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

 WGST 5540 - Race, Class and Gender in Spanish Golden Age Literature (3 Credits)
Explores works of various genres in relation to their social and political contexts in 16th and 17th century Spain, emphasizing the cultural attitudes toward race, class, and gender that inform them. Prereq: graduate standing. Cross-listed with WGST 4540 and SPAN 4340/5340. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

 WGST 5550 - Feminist Philosophy (3 Credits)
Seminar on key debates & figures in historical & contemporary feminist philosophy. Topics may include: rights, embodiment, gender, sexuality, race, reason, & violence. Figures may include: Wollstonecraft, Stanton, Beauvoir, Judith Butler, and bell hooks. Cross-listed with WGST 4500, PHIL 4500 & 5500. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
WGST 5710 - Women and Religion (3 Credits)
A sociological exploration of the contemporary roles of women in
religion. Course examines American and world religious groups with
an eye to women's involvement. Considers how women have changed
these traditions as they take on leadership roles and discusses
the tensions that arise within these traditions as a result of their
expanded participation. Cross-listed with HUMN 5710, SSCI 4710/5710,
WGST 4710, RLST 4710/5710. Prereq: Graduate standing. Max hours: 3
Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5720 - Sexuality, Gender and Their Visual Representations (3 Credits)
Studies sexuality, gender and identity representation from classical
antiquity through the present in the visual arts. Uses the literature of
visuality, feminism, race and queer theory. Explores representations
of femininity, masculinity and androgyne and their reinforcement and
challenge to gender-identity norms. Cross-listed with HUMN 5720 and
SSCI 5720. Prereq: Graduate standing. Term offered: fall, spring. Max
hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

WGST 5770 - Selling Empires: The Art of Visual Propaganda (3 Credits)
Western empires disseminate political, social, economic & cultural
practices through complex interplay of cultural practices. Visual
production is a complex site for meaning making within imperialism.
Examines how visual discourses operated to create meaning for
audiences, through focus on postcolonial critique. Restriction: Restricted
to Graduate and Graduate Non-Degree majors. Cross-listed with
HUMN 5770, SJUS 5770, SSCI 5770, HUMN 4770, SJUS 4770, SSCI 4770,
and WGST 4770. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

WGST 5780 - Violence in Relationships (3 Credits)
Course focuses on the study of violence among individuals involved
in intimate relationships; factors in society such as norms, laws and
institutions that are related to creating violence among intimates;
and social policies, prevention, intervention and treatment programs.
Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with SOCY 4780, SOCY 5780 and WGST 4780. Max hours: 3
Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely
filled out and signed by the student and faculty member, describing the
course expectations, assignments and outcomes, to the CLAS Graduate
Academic Services Coordinator for approval. Prereq: permission of
instructor. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

WGST 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and
mentored by faculty. Students must work with faculty prior to registration
to develop a proposal for their project and receive permission to take
this course. Note: Students must submit a special processing form
completely filled out and signed by the student and faculty member,
describing the course expectations, assignments and outcomes, to the
CLAS Graduate Academic Services Coordinator for approval. Repeatable.
Max hours: 6 Credits.
Grading Basis: Letter Grade

WGST 5900 - Smart Girl Coaching Training and Practicum (3 Credits)
Course provides training (lecture and role-playing) in coaching and
mentoring which will be applied to support near-peer guides in delivering
the Smart Girl curriculum in school settings. Following the completion of
the training, students work as coaches for teams of near-peer mentors
and groups of teenage girls in the Denver Community, and apply the skills
learned in their training. Prereq: Graduate standing. Repeatable. Max
Hours: 6 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 5933 - Philosophy of Eros (3 Credits)
What does it mean to understand philosophy as an erotic activity? This
question will be examined, first by studying Plato's dialogues-such as
Lysis, Symposium and Republic-and then by reading texts from Sigmund
Freud, Michael Foucault and others. Cross-listed with PHIL 4933/5933,
WGST 4933, SSCI 5933 and HUMN 5933. Prereq: Graduate standing. Max
hours: 3 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

WGST 6010 - Methods and Theories of Feminism and Gender Studies (3 Credits)
Provides graduate-level interdisciplinary study in historiography,
methodologies and theories of women's, gender and sexuality studies
and considers how culture is constructed around these categories. Cross-
listed with SSCI 6010 and HUMN 6010. Prereq: Graduate standing. Max
hours: 3 Credits.
Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors
