CU in the City

In the heart of downtown Denver, CU Denver combines innovative research and accessible education with the advantages that only a dynamic urban environment can provide. On our campus where all are welcome, we offer the quality education that the University of Colorado is known for at an exceptional value. For 50 years, we have helped 100,000+ graduates achieve their goals—achieve yours too, with a degree from CU Denver.

Auraria Campus
1201 Larimer Street
Denver, CO 80201
(Speer Boulevard at Larimer Street)
Phone: 303-315-5969
Website: ucdenver.edu (https://www.ucdenver.edu)

How to Use this Catalog

The CU Denver Catalog is comprised of four main sections, About the Catalog and Archive Information (p. 7), About CU Denver (p. 8), Undergraduate Catalog (http://catalog.ucdenver.edu/cu-denver/undergraduate/), and Graduate Catalog (p. 36).

The About the Catalog and Archive Information (p. 7) provides information about the published catalog and information to find previous versions of the catalog.

The About CU Denver (p. 8) section provides information about CU Denver that is beneficial for undergraduate and graduate students, faculty, staff, and our campus community. The information in this section of the catalog includes:

- Campus (p. 12)
- Administration (p. 16)
- Related Organizations (p. 17)
- Student Services and Other Student Resources (p. 18)
- University Policies (p. 29)

The Undergraduate Catalog (http://catalog.ucdenver.edu/cu-denver/undergraduate/) section provides information focused towards the undergraduate student population including:

- Admissions (http://catalog.ucdenver.edu/cu-denver/undergraduate/admissions/)
- Student Finances (http://catalog.ucdenver.edu/cu-denver/undergraduate/student-finances/)
- Tuition Classification (http://catalog.ucdenver.edu/cu-denver/undergraduate/tuition-classification/)
- Records and Registration (http://catalog.ucdenver.edu/cu-denver/undergraduate/records-registration/)
- Academic Policies and Procedures (http://catalog.ucdenver.edu/cu-denver/undergraduate/academic-policies-procedures/)
- Undergraduate Advising and Other Student Services (http://catalog.ucdenver.edu/cu-denver/undergraduate/advising-other-student-services/)
- Undergraduate Core Requirements (http://catalog.ucdenver.edu/cu-denver/undergraduate/graduation-undergraduate-core-requirements/)

- Graduation (p. 70)
- Schools, Colleges, and Departments (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/)
- Courses A-Z (http://catalog.ucdenver.edu/cu-denver/undergraduate/courses-a-z/)
- Programs A-Z (http://catalog.ucdenver.edu/cu-denver/undergraduate/programs-a-z/)

The Graduate Catalog (p. 36) section provides information focused towards the graduate student population including:

- Information for Graduate Students (p. 37)
- International Admissions (p. 43)
- Student Finances (p. 46)
- Tuition Classification (p. 49)
- Records and Registration (p. 51)
- Graduation (https://nextcatalog.ucdenver.edu/cu-denver/graduate/graduation/)
- Schools, Colleges, and Departments (p. 69)
- Courses A-Z (p. 708)
- Programs A-Z (p. 978)

About the Catalog and Archive Information

The 2023-2024 CU Denver catalog is considered the source for academic and programmatic requirements for students entering programs during the Fall 2023, Spring 2024, and Summer 2024 semesters. Although this catalog was prepared using the best information available at the time, all information is subject to change without notice or obligation. The university claims no responsibility for errors that may have occurred during the production of this catalog.

The courses listed in this catalog are intended as a general indication of the University of Colorado Denver curricula on the Denver campus. Courses and programs are subject to modification at any time. Not all courses are offered every semester, and faculty teaching particular courses or programs may vary from time to time. The content of a course or program may be altered to meet particular class needs.

The catalog is published only online in an accessible format. In accordance with requirements under the Americans with Disability Act (ADA), alternate formats are available upon request.

The CU Denver catalog is produced by the Office of the Registrar (https://www.ucdenver.edu/registrar/) at the University of Colorado Denver (https://www.ucdenver.edu/). Previous archived editions of this catalog are available online through this website (http://catalog.ucdenver.edu/archive/) or for older versions the Office of the Registrar website (https://www.ucdenver.edu/registrar/catalogs/archived/).

The University of Colorado Denver is an affirmative action/equal opportunity employer and educator committed to excellence through inclusiveness.
About CU Denver
University of Colorado Denver

We are Denver’s partner in progress and ally in innovation. Our connection to our vibrant city inspires leading research, creative work, and civic engagement. Our collaboration with Denver’s businesses and local government helps set us apart from other universities.

With a history that began in 1912, CU Denver has operated independently since 1973. Our location in downtown Denver serves more than 15,000 students. In Colorado and around the world, our talented graduates form a diverse and growing Lynx family.

We work to create welcoming and respectful learning environments where a culture of inclusion can flourish. At CU Denver, we honor our diversity of experiences and perspectives in the committed belief that they enrich the educational experience for all.

Other reasons why students choose the University of Colorado Denver:

- **Small class sizes:** average undergraduate student-to-teacher ratio is 18:1.
- **Collaborative culture:** Cross-disciplinary learning and research is a core value: programs blend technology with health care, business with public policy, and behavioral health with architecture.
- **Choices:** With seven schools and colleges offering more than 110 degree programs, the University of Colorado Denver | Anschutz Medical Campus is a major university for the coming century.

About Our Students

The diversity of our student body is a source of deep pride. With students of color making up 43 percent of the student body, CU Denver is the most diverse research university in Colorado. Classes are filled with traditional students who enrolled after high school as well as transfer students and those who delayed college entry. Many professionals enroll mid-career to retool and strengthen their skills. The average age of an undergraduate student is 23 years while the average graduate student is 32 years old.

Bringing a rich mix of backgrounds, students travel across the country and the world to attend CU Denver. Domestic students come from 52 states and US territories and international students from 135 countries. All take advantage of convenient courses at times that meet their schedules. An enviable student-to-faculty ratio of 18:1 and a high-tech advising platform means students receive focused attention from professors and a clear path to graduation.

University Quick Facts

**CU Denver Quick Facts**

**Enrollment**
- 14,509 students
- 68% undergraduate, 32% graduate/professional
- 74% full-time students
- 83% from Colorado
- 17% nonresident students of which International students come from 135 different countries
- 43% male, 56% female

**Student-to-Faculty Ratio**
- 18:1

**Diverse Population**
- 50% of enrolled students are students of color
- 51% of all new enrolled students are students of color
- Average age of undergraduate students: 23
- Average age of graduate students: 32
- Students from 52 states and US territories and 135 countries

**Average entering ACT score**
- 23.2 Composite

**Average entering SAT score**
- 554 Math
- 559 Verbal

**Average high school GPA**
- 3.5

**Programs**

More than 110 degrees and programs across seven schools and colleges

**Degrees**
- Bachelor’s
- Master’s
- Doctoral
- First professional

**Most-enrolled Undergraduate Degree Programs**
- Biology
- Psychology
- Computer Science
- Music
- Fine Arts

**Most-enrolled Graduate Degree Programs**
- Business Administration
- Information Systems
- Public Administration
- Leadership for Education Equity
- Computer Science
Michelle A. Marks, PhD

Welcome to Colorado’s public urban research university, where a diverse student body through quality academics, ambitious research and creative work, and community engagement in the city we call home. We are CU in the city.

Your success is our #1 priority. At CU Denver, you will benefit from:

**Academic choices:** More than 100 high-quality, in-demand degree programs in seven schools and colleges, leading to bachelor’s, master’s and doctoral degrees; hands-on learning opportunities, including work in research labs, service learning, study abroad and work-study;

**Powerful connections:** To partnerships, projects, internships and career opportunities in downtown Denver; to the vibrant arts and culture scene at our front door; and to a network of influential alumni who are leaders in Denver’s civic, nonprofit and business communities;

**Outstanding location:** Access to a vibrant, safe urban lifestyle; resources and support to develop innovative solutions to complex local and global issues; and opportunities to build your skills in the city ranked by Forbes as the #1 Best Place for Business and Careers.

CU Denver is a place of academic excellence, where you will gain the powerful combination of immersive classroom and project-based experiences that are in demand today. Here you will meet gifted faculty, experts in their field, dedicated to student success, academic excellence and the real-world applications of their research and creative work. You’ll interact with fellow students who are diverse, goal-oriented and energetic. Whether you engage in undergraduate or graduate studies, the University of Colorado Denver degree earns global respect and you can be confident that you will have been well-prepared for the next stage of your work or academic life.

We’re delighted you’ve chosen CU Denver!

Michelle A. Marks, PhD
1800s - Early 1900s
Gold Sparks a New Neighborhood

The history of Auraria is one of the oldest of modern-day Denver. In the years leading up to the 1800s, this land was the home of the Cheyenne, Ute, and Arapaho. Auraria, or aurum, is Latin for “gold,” which was found in the Cherry Creek in 1858, igniting a small gold rush that established the Auraria settlement. Houses, businesses, and places of worship were built in the Auraria neighborhood over the next 50 years, and the neighborhood evolved over time to become largely Hispanic.

The Tivoli Brewery, built in 1870 in the Auraria neighborhood, operated for nearly 100 years before closing in 1966. Restored and opened in 1994 as the Auraria Campus Student Union. Today the Tivoli Student Union houses offices, study areas, the campus bookstore, restaurants, and a revived brewery.

1912 - 1960s
CU Expands in Denver

CU Denver originated in 1912, when the University of Colorado's Department of Correspondence and Extension was established to meet the needs of Denver’s growing population. Holding classes in buildings across Speer Boulevard from the Auraria neighborhood—including in the Frontier Hotel's bar—the institution became known as Denver’s “UCLA” (the University of Colorado between Lawrence and Arapahoe Streets).

As course offerings expanded, the Denver Extension Center was renamed the University of Colorado Denver Center in 1965. It was an institution that at its root helped nontraditional, working students pursue degrees, build skills, or simply enrich their lives near where they lived and worked. Demand grew and by 1969, 23 fields of undergraduate study and 11 of graduate study were offered. A Colorado constitutional amendment established CU Denver as an independent institution in 1973.

1970s
A Neighborhood Displaced

During the early 1970s, the U.S. Department of Housing and Urban Development designated the Auraria neighborhood an urban renewal area and Denver voters approved a referendum and bond issue to build the Auraria Campus. In a unique arrangement, three institutions of higher education—CU Denver, Metropolitan State University Denver, and the Community College of Denver—would be housed on one campus.

By 1974, most of the buildings in the Auraria neighborhood were condemned and razed.

A well-established, close-knit, largely Hispanic community of more than 300 households was displaced in the name of urban development. Thirteen cottages and one grocery store were preserved. Today they make up the 9th Street historic park on campus, the oldest restored block of residences in the city.

The university began the Displaced Aurarian Scholarship program (https://www.ucdenver.edu/student-finances/scholarships/displaced-aurarian/#---text=The%20Displaced%20Aurarian%20Scholarship%20is%20to%20descendants%20of%20these%20residents) in the 1990s to provide tuition and fees for former residents of the Auraria neighborhood and their children and grandchildren. The university expanded the program in 2021 as part of a long-term effort to honor and support the displaced Aurarians and acknowledge the long-term impacts the taking of their homes has had on them, their families, and their livelihoods.

1980s – Today
Auraria and CU Denver Today

The establishment of this unique, innovative, tri-institutional campus, while carrying a difficult history, has made it possible for hundreds of thousands of people to improve their own lives through an affordable, high-quality education. Today the Auraria Campus serves more than 40,000 students across all three institutions.

CU Denver has grown, as well. As the most diverse research university in Colorado, CU Denver today draws top students each year and offers over 110 undergraduate and graduate degree programs (https://www.ucdenver.edu/academics/) across eight schools and colleges, as well as more than 30 online degree programs and numerous certificate and non-degree programs. (https://online.uc.edu/)

Home to more than 40 research centers and institutes, the campus receives sponsored research awards annually to generate knowledge and create solutions to society’s most complex problems. CU Denver fills a singular niche as a vital contributor to the civic, cultural, and economic success of the city, the state, and beyond.

In more recent years:

- Downtown Denver has flourished, and CU Denver’s geographic footprint has expanded
- We opened the the Lola and Rob Salazar Student Wellness Center (https://news.ucdenver.edu/lola-rob-salazar-student-wellness-center-opens-july-11/)
- We introduced club and intramural sports
- We built our first freshmen dorm in City Heights and a companion Learning Commons (https://news.ucdenver.edu/new-city-heights-residence-hall-and-learning-commons-opens/) facility for teaching and learning
- We launched an ambitious 2030 Strategic Plan (https://news.ucdenver.edu/work-for-all-how-cu-denver-will-become-a-leading-public-urban-research-university-by-2030/) that aims to make education work for all
- We announced the planned revitalization of historic Ninth Street Park (https://www.denverpost.com/2022/03/31/auraria-campus-ninth-street-historic-district-renovations/) and the construction of a brand new engineering, design, and computing building (https://news.ucdenver.edu/new-engineering-design-and-computing-building-will-serve-as-anchor-for-innovation-district-outlined-in-2030-strategic-plan/), the anchor of our forthcoming innovation district
Accreditation

The University of Colorado Denver is institutionally accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools.

The commission can be contacted at:

Higher Learning Commission
230 South LaSalle Street, Suite 7-500
Chicago, IL 60604
800.621.7449
www.hlcommission.org (http://www.hlcommission.org/)

Many professional organizations have also granted accreditation to specific academic programs, colleges and schools at the Denver Campus, including:

College of Architecture and Planning (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-architecture-planning/)
  • National Architectural Accrediting Board (NAB)
  • Landscape Architecture Accreditation Board (LAAB)
  • Planning Accreditation Board (PAB)

Business School (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/business-school/)
  • Association for the Advancement of Collegiate Schools of Business - International (AACSB International)
  • AACSB
  • Commission on Accreditation of Healthcare Management Education (CAHME)

School of Education & Human Development (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-education-human-development/)
  • Colorado Department of Education and Colorado Department on Higher Education
  • Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE)
  • Council for Accreditation of Counseling and Related Educational Programs (CACREP)
  • National Association of School Psychologists
  • American Psychological Association - Commission on Accreditation

College of Engineering, Design and Computing (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-engineering-design-computing/)
  • Accreditation Board for Engineering and Technology (ABET)
  • ABET - Engineering Accreditation Commission (EAC)
  • ABET - Computing Accreditation Commission (CAC)

College of Liberal Arts and Sciences (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/)
  • American Chemical Society (ACS) approved degree
  • American Psychological Association

School of Public Affairs (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-public-affairs/)
  • National Association of Schools of Public Affairs and Administration (NASPAA)

For more information regarding specialized accreditations for degree programs, please visit this website (https://www.ucdenver.edu/offices/institutional-research-and-effectiveness/data-analysis/institutional-data/#ac-specialized-accreditations-for-degree-programs-6) or contact the school or college.

Our Programs

As Colorado’s only public urban research university, CU Denver is devoted to the needs of the residents of the city and the region. A solid foundation of academic and general education is assured through a comprehensive core curriculum. Students may pursue graduate education through all of the campus’ colleges and schools. Pre-professional training in the fields of education, architecture, law, journalism and health careers is also available. Complete listings of areas of study available on the Denver Campus are available in the Programs (http://catalog.ucdenver.edu/cu-denver/undergraduate/programs-a-z/) section of the catalog.

The colleges and schools sections of this catalog provide information on bachelor’s, master’s and doctoral degree programs, policies on requirements for graduation, course requirements, course descriptions and other similar information.

  • College of Architecture and Planning (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-architecture-planning/)
  • College of Arts & Media (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-arts-media/)
  • Business School (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/business-school/)

Continuing and Professional Education

The Division of Continuing and Professional Education offers certificate/certification courses, professional development programs, precollegiate outreach programs and personal enrichment courses across the state of Colorado. Courses are offered in a variety of formats, including traditional on-campus, off-campus, online, hybrid, weekend, evening, short and condensed courses and many others.

Registration and tuition vary by school or college. Contact the specific school or college to learn about current program and course offerings or send an inquiry to continuingeducation@ucdenver.edu.
Campus

Our Campus and Community

Located in downtown Denver, the University of Colorado Denver, Denver Campus is physically located on the 151-acre Auraria Campus, which is shared with two other institutions: Metropolitan State University of Denver and Community College of Denver. Because we share facilities, our students have access to the level of resources found at much larger public universities.

Three beautiful buildings are central to our student community: Student Commons, Student Wellness Center, and City Heights, our new first-year student housing building. Students get together at Student Commons to study and eat. It’s also home to Lynx Central, a help desk for prospective and current students that provides resources, referrals, and solutions. The Student Wellness Center houses a state-of-the-art sports and recreation facility, a Wellness Suite that includes the CU Denver Food Pantry, study lounge, a game lounge, and a two-story climbing wall. And City Heights, houses our students in the center of campus life. On the east side of Speer Boulevard, you will find our three buildings located in the heart of downtown Denver: Lawrence Street Center, CU Denver Building, and the Business School. The three buildings are within walking distance of many restaurants, cafes, and shops, as well as the 16th Street Mall.

Our campus is convenient for students who live throughout the metro area’s many diverse neighborhoods. Students who work downtown love that we are so close. And students who live north or south of the city along the Front Range Corridor also benefit from our centrally located campus.

Both our shared campus and our downtown location contribute to an inclusive community that fosters respect for diverse students and groups.

CityCenter Links Campus and Community

CityCenter provides university resources to civic, nonprofit, and business leaders. with a street-level retail-like location at the southwest corner of 14th & Lawrence Street, CityCenter provides a physical and virtual portal for the community to connect with faculty expertise, student ingenuity, and other CU Denver resources. Staffed during regular business hours, CityCenter is open to community members who would like to access the university’s knowledgeable faculty, innovative student population, and research capabilities.

About the Auraria Campus

The Auraria Campus is a dynamic and vibrant higher education community located in the heart of downtown Denver. The 150-acre campus is shared by three separate and distinct institutions of higher learning: Community College of Denver, Metropolitan State University of Denver, and University of Colorado Denver. This is the most efficiently utilized campus in the state. Classrooms on the Auraria Campus are used an average of 50+ hours per week. Classes are held from 8 a.m. to 10 p.m; for building hours, please visit the AHEC website (https://www.ahec.edu/campus-info/building-hours/).

The Auraria Campus offers numerous amenities to students, faculty and staff, from the largest bookstore in the Rocky Mountain region to a state-of-the-art fitness facility. Details of these amenities are outlined in this section.

In addition to its proximity to the thriving business and industry of downtown Denver, the Auraria Campus has a distinct historic flavor. The Tivoli Student Union is housed in a renovated brewery originally built in the 1860s. Historic Ninth Street Park, St. Cajetan’s Church/Performing Arts Center, St. Elizabeth’s Church, and the Emmanuel Art Gallery are also located on campus.

Auraria Higher Education Center

The Auraria Higher Education Center (AHEC) is a separate state entity whose role is to provide and manage shared services, facilities, and property to support these prominent institutions in achieving their goals. The collective student population is approximately 42,000, with an additional 5,000 faculty and staff.

AHEC provides common services for the campus including: classroom scheduling, facilities services and construction, campus police, telecommunications infrastructure, student union, media services, book store, early learning center, parking and transportation, mail services and facilities master planning. Visit the AHEC website (https://www.ahec.edu/) for additional information.

Auraria Campus Event Services

Location: 900 Auraria Parkway, Suite 325
Phone: 303-556-2755
Email: acesmaindesk@ahec.edu
Website: www.ahec.edu/eventservices (http://www.ahec.edu/eventservices/)

Auraria Campus Event Services (ACES) manages all non-academic events that take place on the Auraria Campus. From a simple meeting to an impactful campus event like Spring Fling or Fall Fest, our team is committed to providing quality service and producing successful events.

A majority of the event spaces on campus are located in the Tivoli Student Union, but other event venues are also available in St. Cajetan’s Event Center, the PE/Event Center, and several outdoor event spaces including the Tivoli Quad. Student groups can contact us for assistance with locating and booking a space and coordinating support services.

Services available include:

- event facility scheduling
- event coordination and planning
- audiovisual rental, set-up, and support
- management of student filming on campus
- coordination of event advertising on campus
- organization of information and fundraising tables

Auraria Early Learning Center (Child Care Center)

Location: 950 9th Street Park
Phone Number: 303-556-3188
Email: Please refer to website for more information
Website: https://www.ahec.edu/early-learning-center (https://www.ahec.edu/services-departments/early-learning-center/)

The Auraria Early Learning Center (AELC), a 5-star Colorado Shines-rated center, provides full-time programs for children 12-months to 5-years-old and summer camp for children through age 8. The center serves the

Campus information: www.ahec.edu/campus-info/building-hours/

students, faculty, and staff of the Auraria Campus. On a space-available basis, the center also serves the Denver community. All of the center’s programs are fully licensed by the Colorado Department of Human Services.

Auraria Event Center/Student Recreation Center

Location: PE Building/Event Center, 1255 10th Pl. St. Plaza, Denver, CO 80204  
Phone: 303-615-1500  
Email: campusrrec@msudenver.edu  
Website: https://www.msudenver.edu/recreation/

The Auraria PE/Event Center is a 2,800-seat facility for team and individual sport activities, academic programs, events, and conferences. Our purpose is to foster individual and community well-being through the power of engagement, leadership, partnership and recreation. We provide a wide range of affordable, high quality, and inclusive recreational and wellness opportunities designed to support personal, academic, community and institutional success of Auraria Campus students, faculty, staff, alumni and the community at-large. Our building consists of Fitness and Wellness, Outdoor Adventure and Leadership, Recreational Sports, Educations/Certification, Member Services, Employment Opportunities, Partnerships, and Community Outreach.

Auraria Library

Location: 1100 Lawrence Street Denver, CO  
Phone Number: 303-315-7763  
Email: Please refer to website for more information  
Website: https://library.auraria.edu/

The Auraria Library connects users with ideas through technology-enabled information discovery and delivery on an “anytime, anyplace” basis. The Library’s collections of learning materials, resources, and research services support the information, research, and curriculum needs of the Auraria Campus. We strive to create a welcoming environment that fosters equity, diversity, and inclusion and nurtures creativity and learning. We are deeply committed to ensuring equitable access to knowledge and information from diverse perspectives for everyone as we build a shared vision that challenges existing notions of access to knowledge and information from diverse perspectives. The library and sparks discovery and curiosity about the world around us. Assistance from Library staff is available via one-on-one meetings, by phone, text, or chat on our website (https://library.auraria.edu/).

Auraria Media Center and Classroom Support

Location: 1100 Lawrence Street (East side of the Auraria Library), 015  
Phone Number: 303-556-2426  
Service: 303-556-3342  
Email: jennifer.kerber@ahec.edu  
Website: http://mediacenterequipment.ahec.edu (https://www.ahec.edu/services-departments/classroom-support/media-center/)

The Auraria Media Center and Classroom Support Services offers a full range of media services and classroom support. The Auraria Media Center provides a full range of media services for the Auraria Campus, as well as the Denver community.

Classroom Audiovisual Equipment Checkout

Instructors may reserve audiovisual equipment for course-related needs through the Media Center. Please contact MediaCenterEquipment@AHEC.edu (mediacenterequipment@ahec.edu) to make arrangements.

Non-Classroom Audiovisual Equipment Rental

Audiovisual equipment is available for rent for non-academic purposes. Please contact Troy Lucero (troy.lucero@ahec.edu) for rates and details.

Emmanuel Gallery

Location: 10th and Lawrence Street Pedestrian Mall  
Phone Number: 303-315-7431  
Email: jeff.lambson@ucdenver.edu  
Website: http://www.emmanuelgallery.org/

Tri-institutional campus on Auraria Campus for over 35 years. Historical landmark who received the Mayor’s Art for Excellence in 2012 featuring national, international artists, designers and architects as well as featuring student and faculty shows for each school on campus. Emmanuel Gallery’s exhibitions are always free and open to the public. Stop in for a relaxing break.

Health Center at Auraria

Location: Plaza Building 150  
Phone Number: 303-615-9999  
24 Hour Mental Health Crisis Line: 303-615-9911  
Email: Please refer to website for more information  
Website: www.healthcenter1.com (https://www.msudenver.edu/healthcenter/)

The Health Center at Auraria is a tri-institutional department that provides Medical Services (https://healthcenter1.com/medical-services/) and Mental Health Services (https://healthcenter1.com/mental-health-services/) for all students, faculty and staff on the Auraria Campus. We are committed to caring for each member of this diverse community with sensitivity and respect. The Health Center at Auraria is an in-network medical provider for most Colorado offered Health Insurance (https://healthcenter1.com/health-insurance/), is easily accessible and provides high-quality care and Outreach Programs (https://healthcenter1.com/outreach-programs/).

**Tivoli Garage**

Located at 9th Street and Auraria Parkway  

- Payment required 24/7, 365 days a year, immediately upon parking.  
- Auraria Campus Community members must register their vehicle (https://www.ahec.edu/services-departments/parking/register-your-vehicle/) to ensure they pay the campus community rates no matter when they park.  
- Pay at a pay machine or pay-by-cell using the ParkMobile App (http://parkmobile.io/).  
- Parking payment is enforced and violators are subject to citation. Citations will be mailed instead of placed on the windshield.

**7th Street Garage**

- Payment required 24/7, 365 days a year, immediately upon parking.  
- Auraria Campus Community members must register their vehicle (https://www.ahec.edu/services-departments/parking/register-your-vehicle/) to ensure they pay the campus community rates no matter when they park.
• Parking payment is enforced and violators are subject to citation.
• Parking is available for 7th Street Garage Permit holders and Gold Passport holders.
• You can pay for parking with the free ParkMobile App (http://parkmobile.io/), or you can call (877) 727-5457 and enter Zone #3047.
• After you have parked your vehicle you may remit your payment at the Pay Station labeled PAY HERE located in the parking garage exit lane.

5th Street Garage
Located at 5th Street and Walnut Street

• Payment required 24/7, 365 days a year, immediately upon parking.
• Auraria Campus Community members must register their vehicle (https://www.ahec.edu/services-departments/parking/register-your-vehicle/) to ensure they pay the campus community rates no matter when they park.
• You can pay for parking with the free ParkMobile App (http://parkmobile.io/).

Vehicles that remain in garages after closing may be retrieved by contacting the Auraria Campus Police Department at 303-556-5000.

Daily Fee Lots
• Payment required 24/7, 365 days a year, immediately upon parking.
• All surface lots on campus are unattended and require payment by license plate number at a pay station or by cell phone.
• You may keep the payment receipt for your records, but it doesn’t need to be displayed on your dash.
• Auraria Campus Community members must register their vehicle (https://www.ahec.edu/services-departments/parking/register-your-vehicle/) to ensure they pay the campus community rates no matter when they park.

Metered Parking
• Payment required 24/7, 365 days a year, immediately upon parking.
• Parking meters on the Auraria Campus are intended for short-term parking.
• Parking meters accept credit cards and coins.
• Parking permits and passports issued by Auraria Campus are not acceptable forms of parking meter payment.
• State-issued blue disability placards and disability license plates are not exempt from payment at Auraria Campus parking meters.

Motorcycle Parking
• Motorcycle-designated spaces are available in the 5th Street Garage and Tivoli Parking Garage.

Overnight Parking
• Overnight parking is prohibited without prior approval from the Parking & Transportation Services Office. Please call 303-556-2003 for more information.
• If a vehicle is left overnight due to an emergency, please call Parking Services Dispatch at 303-556-2000.
• Vehicles that remain in garages after closing may be retrieved by contacting the Auraria Campus Police Department at 303-556-5000.

Parking Permits
A number of lots are reserved for permit holders who purchase a prepaid permit each semester. Prepaid permits allow in-and-out privileges. Most permits can be customized to accommodate specific days of the week.

How to Purchase a Permit
• Purchase a Permit online » (https://ahec.t2hosted.com/Account/Portal/)
• Visit the Parking & Transportation Services Office (777 Lawrence Way in the 7th Street Garage). In accordance with CDPHE Guidelines: We are practicing safe social distancing, and only 5 people are allowed in the office at a time. The parking Staff is wearing masks, and you must wear a mask when you enter the office to purchase your permit.
• Please bring the following:
  • Current campus ID (or semester schedule)
  • Current vehicle registration
  • Payment in the form of a check, cash, or charge card (Visa, MasterCard, Discover, American Express)
  • For accessible parking, a valid disability parking registration, a valid disability parking placard or a valid disability license plate is required

Parking Rules and Regulations
The Auraria Campus Parking & Transportation Services is a self-supporting auxiliary enterprise, receiving no state appropriations.

Parking fees are established by the Auraria Board of Directors to provide sufficient annual revenue to support the cost of operation, maintenance,
and development of the Auraria Campus Parking & Transportation Services.

State law prohibits the use of public funds or student bond fees for the construction or operation of the AHEC parking system. Therefore, construction improvement, maintenance, and operation of all parking facilities at Auraria Campus are financed solely through user fees.

Click here (https://www.ahec.edu/files/general/Policy-Parking-Rules-Regs.pdf) to view Parking Rules & Regulations

Public Transit (RTD) and Alternative Transportation

RTD CollegePass
The CU Denver RTD CollegePass provides students access to buses, light rail, Call-n-Ride, and Skyride. RTD CollegePass helps get you to and from campus and across the city. The cost for the pass is included in student fees.

Click here (https://www.ahec.edu/services-departments/parking/rtd-alternative-transportation/) for more information.

Bicycling
Denver and the surrounding suburbs are bicycle-friendly. Explore the Denver Bike Map (https://www.denvergov.org/content/denvergov/en/transportation-infrastructure/programs-services/bicycles/bike-maps.html). Combining bikes with transit makes it even easier to get around! RTD’s bus and rail system serves commuters, avid cyclists, and city cruisers alike. You can take advantage of RTD bike and ride (https://www.rtd-denver.com/rider-info/bike-n-ride/) by bringing your bike on the light rail or buses.

Bicycle Registration
Everyone is encouraged to register their bike with the Auraria Campus Police Department.

Bicycle Registration (https://www.ahec.edu/services-departments/parking/rtd-alternative-transportation/) for more information.

CU Denver Alumni

Mailing Address:
Lawrence Street Center
Office of Advancement | Alumni Engagement
1380 Lawrence Street Center, Suite 1201
Denver, CO 80204 (mailing and physical)

Telephone: 303-315-2333
E-mail: alumni@ucdenver.edu
Website: https://www.ucdenver.edu/offices/cu-denver-alumni (https://www.ucdenver.edu/offices/cu-denver-alumni/)

CU Denver Alumni is the formal name for our community of former students including over 110,000 graduates from any of the University’s undergraduate, graduate, and certificate programs. While 67% of our graduates stay in Colorado, our global community stretches across 105 countries.

CU Denver Alumni seeks to engage graduates in the life of the university and with each other through advocacy, philanthropy, volunteering, and lifelong learning.

CU Denver Alumni is part of the Office of Advancement (https://www.ucdenver.edu/offices/office-of-advancement/home/) which connects those who are passionate about education and research to the people and programs at CU Denver who can excel with their support. The Office of Advancement works to ensure a bright and promising future for CU Denver through robust engagement, transformative philanthropy, and a deep sense of pride in the university.

The Office of Advancement connects those who are passionate about education and research to the people and programs at CU Denver who can excel with their support. We serve as a trusted campus and community resource that inspires alumni pride and private support to advance CU Denver’s mission, and we work to ensure a bright and promising future for CU Denver through robust engagement, transformative philanthropy, and a deep sense of pride in the university. We are also grateful for the advocacy and support provided by the Chancellor’s Development Committee, a group of alumni and friends who volunteer their time and expertise in support of CU Denver’s educational mission.

Student Services and Other Student Resources

Lynx Life

Here you are: At an urban university with powerful programs and opportunities—for your education, your career, your life. On a high-energy, downtown campus right next to the Rocky Mountains. Part of a strong CU Denver Lynx community, where we lift one another up to meet our challenges. You are right where you belong. Below are some of programs you are able to utilize as a CU Denver student.

Center for Identity & Inclusion | Diversity, Equity & Inclusion

Location: Student Commons Building, Room 2007
Phone: 303-315-1880
Email: cii@ucdenver.edu
Website: http://www.ucdenver.edu/about/departments/odi/CII/Pages/default.aspx
Office Hours: 8:00 am - 5:00 pm

The Center for Identity & Inclusion (CII) provides services: a) to support underrepresented students and b) to promote a diverse and inclusive campus for all students, faculty, and staff.

CU Denver’s Center for Identity & Inclusion (CII) consists of American Indian Student Services (AISS), Asian American Student Services (AASS), Black Student Services (BSS), and Latinx Student Services (LSS). CII provides vital links to the culturally rich and diverse community surrounding CU Denver.

American Indian Student Services

Location: Student Commons Building, Room 2007C
Phone: 303-315-1882
Email: grace.tyon@ucdenver.edu

American Indian Student Services (AISS) welcomes students of all American Indian and Alaska Native heritages! AISS serves both students who are tribally enrolled and those who identify but are not enrolled in their tribes.

AISS provides culturally responsive educational support:

• Resource Referral
• Scholarship Information
• Advocacy
• Cultural Events & Student Clubs

CU Denver American Indian and Alaska Native students represent more than 100 different tribes. The Denver Indian Community is strong! Many families in Denver live far from tribal homelands, yet retain tribal identities and cultures. Twenty percent speak Native languages. The Southern Ute and the Ute Mountain Ute Tribes, located in the Four Corners area are the two federally-recognized tribes in Colorado.

Asian American Student Services

Location: Student Commons Building, Room 2007E
Phone: 303-315-1879
Email: soyon.bueno@ucdenver.edu
Website: https://www.ucdenver.edu/offices/diversity-and-inclusion/our-offices/asian-american-student-services (https://www.ucdenver.edu/offices/diversity-and-inclusion/our-offices/asian-american-student-services/)
Asian American Student Services within the Center for Identity & Inclusion offers a wide array of services and programs to support, engage, and educate all students.

Our mission:

- Support the retention, graduation, and success of Asian American Pacific Islander students
- Encourage students to become actively engaged in their learning experience
- Promote students’ exploration of social identity, leadership, and professional development
- Provide opportunities for networking

**Black Student Services**

**Location:** Student Commons Building, Room 2007F  
**Phone:** 303-315-1878  
**Email:** abenicio.rael@ucdenver.edu  
**Website:** [https://www.ucdenver.edu/offices/diversity-and-inclusion/our-offices/black-student-services/](https://www.ucdenver.edu/offices/diversity-and-inclusion/our-offices/black-student-services/)

Black Student Services Program offers a uniquely-designed network of support services to assist students in all phases of their educational career at CU Denver. Since its inception in 1969, Black Student Services has helped hundreds of students with admission into undergraduate and graduate programs, academic counseling, and peer support services. Because we believe that students should have a strong supportive environment during their education, we subscribe to the concept of Jamaa II: “a second family away from home.”

**Latinx Student Services**

**Location:** Student Commons Building, Room 2007H  
**Phone:** 303-315-1878  
**Email:** abenicio.rael@ucdenver.edu  
**Website:** [https://www.ucdenver.edu/offices/diversity-and-inclusion/our-offices/latinx-student-services/](https://www.ucdenver.edu/offices/diversity-and-inclusion/our-offices/latinx-student-services/)

The mission of Latinx Student Services is to provide an inclusive environment to support the intersectional experiences, diverse cultures, and educational goals of Latinx students at CU Denver.

We seek to accomplish this by:

- Advocating for the needs of Latinx students
- Supporting students to amplify their voice and enact agency
- Providing programs, events, and workshops that raise awareness about social justice issues that impact the diverse Latinx cultures, identities, and intersectional experiences.
- Supporting the leadership development of Latinx student organizations.
- Building community and a sense of belonging for all Latinx students, faculty, and staff.

**Undocumented Student Services**

**Location:** Student Commons Building, Suite 2007  
**Phone:** 303-315-1883  
**Email:** uss@ucdenver.edu  
**Website:** [https://www.ucdenver.edu/offices/diversity-and-inclusion/our-offices/undocumented-student-services/](https://www.ucdenver.edu/offices/diversity-and-inclusion/our-offices/undocumented-student-services/)

The mission of the Undocumented Student Services Program is to serve DREAMer and mixed status students at all intersections of documentation and equity needs, to support DREAMers in achieving their degree, to create an equitable educational environment, and to advocate alongside students for continuous improvements in the DREAMer college experience. The University of Colorado Denver remains committed to providing access to all qualified students, including students under the Deferred Action for Childhood Arrivals (DACA) and Advancing Students for a Stronger Economy Tomorrow (ASSET) program. ASSET, DACA, Mixed Family Status, and undocumented students are valuable members of our student body whom we strive to ensure are safe and respected on our campus. We are pleased to provide a variety of services, support, and information for students, faculty, and staff to help undocumented students succeed at CU Denver and CU Anschutz.

**Women & Gender Center**

**Location:** Tivoli Student Union 310  
**Phone:** 303-315-7262  
**Email:** cii@ucdenver.edu  
**Website:** [https://www.ucdenver.edu/wgc](https://www.ucdenver.edu/wgc)

The Women & Gender Center (WGC) at CU Denver is committed to advancing issues of gender equity and supporting the gender-focused needs of students, faculty, and staff on the Auraria campus. The mission of the Women and Gender Center is to address gender inequities and foster a campus community that values inclusion, social justice, equity, and respect for everyone regardless of background and experience. We are committed to enacting intersectional feminism in our programming by exploring gender as it overlaps and interacts with the multiple identities that people inhabit across their lifespans. We serve all members of the CU Denver community regardless of gender identity.

**Disability Resources and Services Office**

**Location:** Student Commons Building, Room 2116  
**Phone:** 303-315-3510  
**Email:** disabilityresources@ucdenver.edu  
**Website:** [http://www.ucdenver.edu/disabilityresources](http://www.ucdenver.edu/disabilityresources)

The Office of Disability Resources and Services (DRS) is committed to providing equal opportunities and fostering the personal growth and development of students with disabilities. The DRS staff strives to meet the needs of a large and diverse community of students with disabilities. We are available to provide assistance and to arrange for reasonable accommodations that will address specific educational needs. Accommodations may include, but are not limited to, the following:

- Priority registration for classes
- Assistance in identifying volunteer note takers
- Alternative testing for assessment tests and classroom examinations
- Oral/sign language interpreters
• Real-time captioning
• Textbooks in alternate formats (audio taped, Braille, enlarged, scanned)

ESL Academy

Location: 1100 Lawrence St #014
Phone: 303-315-2383
Email: esl@ucdenver.edu
Website: http://esl.ucdenver.edu

The University of Colorado Denver's English as a Second Language (ESL) Academy offers a rich diversity of academic, social, and cultural learning opportunities. The Academy offers high-quality, year-round ESL instruction specifically designed for university preparation. The curriculum helps students improve their language skills through a rigorous program of study, campus involvement, and cultural and educational activities.

Our program offers the following distinctive advantages when compared against other programs:

The curriculum is designed especially for university-bound students. In addition to mastering academic English, students will learn how to succeed academically at the University of Colorado Denver or any other university they choose to attend.

Students in the ESL Academy will be considered University of Colorado Denver students. They will be on the university campus from day one of our program and will be eligible to live in university housing, though there will be limited availability for students who join our program mid-term.

Students will have access to all of the activities and resources that the university has to offer, not to mention the spectacular outdoors and urban life in Denver and Colorado.

The ESL Academy also offers the LynxDirect Pathway for students. This 16-week program allows students to complete level 5, our highest level, in the first 8 weeks of the semester and then complete 6 credits towards an undergraduate degree in the second 8 weeks of the semester.

When a student completes the ESL Academy successfully, s/he will automatically fulfill the University of Colorado Denver's English language proficiency requirement and will be eligible for full admission.

Students will be issued a Form I-20 from the University of Colorado Denver for a seamless immigration experience and will not have to transfer their immigration status to begin their degree program upon completion of the ESL Academy.

Students will benefit from a seamless transition to university degree programs after they successfully complete the ESL Academy, thus maximizing the prospects of their success.

For full details, visit the ESL Academy online at esl.ucdenver.edu. Here, students can get information about:

• The online application (https://clas.ucdenver.edu/esl/future-students/application-information/)
• Program information (https://clas.ucdenver.edu/esl/academics/curriculum-overview/)
• Tuition and Fees (https://clas.ucdenver.edu/esl/future-students/ tuition-fees/)

If you have additional questions you may send an email to esl@ucdenver.edu or call 303-315-2383. Located at 1100 Lawrence Street #014 Denver, CO 80204

LGBTQ Student Resource Center at Auraria

Location: Tivoli Student Union 213
Phone: 303-615-0515
Email: lgbtq.auraria.staff@gmail.com
Website: https://www.msudenver.edu/lgbtq/

The LGBTQ Student Resource Center is a tri-institutional office on the Auraria Campus serving the students, faculty and staff of Metropolitan State University of Denver, Community College of Denver and University of Colorado at Denver. We are available to all Auraria students as a resource for exploring issues of sexual orientation and gender identity.

The LGBTQ Student Resource Center is located in the Tivoli Student Union, Room 213, and is staffed by a director and assistant director, with the support of student employees and volunteers. Input and involvement from the entire campus community are welcomed. Our center offers a variety of support, education, and advocacy services for the entire campus community including:

• Support for those who may have questions about their own sexual orientation, gender identity, gender expression, or that of a friend or family member
• Advocacy for students experiencing discrimination or harassment based on a real or perceived LGBTQ identity
• Speakers for events, workshops, and classes on various aspects of sexual orientation/gender identification
• Programs and workshops about working more effectively with the gay, lesbian, bisexual, and transgender communities and combating misinformation, misconceptions, and homophobia
• Resource library with over 1700 books and videos (documentary and cinema) available for research and leisure as well as a multitude of free literature regarding other organizations and services throughout Denver and Colorado that provide outreach, services, and advocacy.

LynxConnect

Location: 900 Auraria Parkway #439 (Tivoli Annex)
Phone: 303-315-4000
Email: LynxConnect@ucdenver.edu
Website: https://www.ucdenver.edu/lynxconnect

Need help connecting what you’re studying to your future goals? LynxConnect is your one-stop-shop for enhancing your student experience, expanding your global perspective, researching your world, discovering internships, finding campus employment and exploring your career options.

Four Offices, One Location

Our brand new 15,000 square foot center is focused on providing you with experiences outside the classroom, making you more marketable as you prepare for your next chapter in life, career and job search. Make
an appointment or drop in to meet with an expert who can tackle your questions and help you gain hands-on, real-world experience.

The Career Center
Location: Tivoli Student Union, LynxConnect, Suite 439
Phone: 303-315-4000
Email: CareerCenter@ucdenver.edu
Website: https://www1.ucdenver.edu/services/career-center

The Career Center offers a full array of services that prepare students for their transition from college to career. Students are encouraged to participate in career-related events and services as early as their freshman year. This includes obtaining help in choosing a major, deciding on career options, and mapping out experiences necessary to be successful upon graduation. The Career Center also supports students in refining job search skills like resume & cover letter writing, interview preparation, and targeting employers through our internship and job board called Handshake.

The Career Center’s mission is to provide personal and meaningful interactions with students, alumni and employers in order to prepare them for the world of work.

Internships
Location: Tivoli Student Union, LynxConnect #439
Phone: 303-315-7258
Email: Experiential.LearningCenter@ucdenver.edu
Website: https://www.ucdenver.edu/lynxconnect/internships

Experiential learning includes a variety of activities with one common goal—to immerse you in hands-on learning outside the classroom where your experience is at the heart of the learning process. The Experiential Learning Center (ELC) serves students, faculty, and employers as a resource for experiential learning opportunities. We offer information, resources and support in the development and coordination of academic and non-academic internship experiences, professional skill development opportunities, and undergraduate research experiences.

Undergraduate Research & Creative Activities
Location: Tivoli Student Union, LynxConnect, Suite 439
Phone: 303-315-4000
Email: LynxConnect@ucdenver.edu
Website: https://www.ucdenver.edu/lynxconnect/undergraduate-research

The Education Through Undergraduate Research and Creative Activities (EURēCA!) Program is your connection to the support you need to succeed in research activities at CU Denver | Anschutz. We help with grants, student research jobs, and fellowships, and feature student projects at our annual symposium.

The Office of Global Education | Study Abroad
Location: Tivoli Student Union, LynxConnect Suite 439
Phone: 303-315-2001
Email: study.abroad@ucdenver.edu
Website: https://www.ucdenver.edu/students/study-abroad

The Office of Global Education / Study Abroad provides academically and professionally relevant international experiences to a diverse student population at the University of Colorado Denver | Anschutz Medical Campus. These experiences equip students with cross-cultural skills necessary to succeed in an interconnected global society. The Office of Global Education is committed to providing students with a wide range of engaging and affordable study, internship, research, and clinical opportunities.

International program offerings vary to meet the needs and interests of all students. These programs are open to undergraduate, graduate, and international students; it is not necessary to be a particular major to participate. Program lengths range from two weeks to an academic year or more. The vast majority of programs do not require language proficiency beyond the English language.

The Office of Global Education strives to keep study abroad programs affordable. In most cases, students are able to utilize financial aid and are eligible for an array of internal and external scholarships. For the most current information on programs, policies, and funding, please visit the Office of Global Education website at https://www.ucdenver.edu/students/study-abroad or visit LynxConnect in the Tivoli.

Office of International Affairs
Location: Lawrence Street Center, Suite 932
Phone: 303-315-2230
Email: Please refer to website for more information
Website: https://www.ucdenver.edu/offices/international-affairs

The Office of International Affairs (OIA) serves the university by providing administrative support, strategic advice, technical services, collaborative educational programs with the university’s 13 schools and colleges, and related services that contribute to the strategic international goals of the university. OIA provides visa and orientation services to international students and scholars; offers expertise in the development and maintenance of undergraduate, graduate and professional global education; assists with brokering and designing bilateral international educational programs; and offers comprehensive international recruitment and admissions services. OIA addresses international policy issues, has oversight of international risk management protocols, serves as a resource for best practices in the internationalization of higher education, maintains central data bases pertaining to international activities of the university, advises on the development of international affiliations and agreements, assists departments/programs and schools/colleges with the development of comprehensive international strategic planning, and seeks to promote and support initiatives that advance
international research, education, and global cooperation in order to enhance the reputation of the University of Colorado Denver | Anschutz Medical Campus.

OIA also serves as a resource for faculty seeking international research opportunities, provides a comprehensive list of international scholarship/fellowship information, and serves as the institutional liaison for the CIES Fulbright Scholars Program.

The divisions of OIA include:

- International Operations (https://www.ucdenver.edu/offices/international-affairs/about/staff/international-operations)
- Global Education: Study Abroad (https://www.ucdenver.edu/students/study-abroad)
- International Admissions (http://www.internationaladmissions.ucdenver.edu)
- For more information, visit the Undergraduate (http://catalog.ucdenver.edu/cu-denver/undergraduate/admissions/international-admissions/) and Graduate (p. 43) catalogs.

### International Student and Scholar Services

**Location:** Student Commons Building, Suite #1119  
**Phone:** 303-315-2230  
**Email:** isss@ucdenver.edu  
**Website:** https://www.ucdenver.edu/services/international-student-and-scholar-services

The International Student & Scholar Services (ISSS) unit in the Office of International Affairs serves approximately 1,400 international students and 500 international scholars from all over the world each year. ISSS is responsible for ensuring university-wide compliance with a wide range of federal regulations relating to the enrollment and/or employment of international students and scholars. Sponsored Student Services, a sub-unit within ISSS, also provides advising to students sponsored by an international third-party organization.

ISSS collaborates with international students, faculty, researchers, and staff to contribute to the diverse teaching, research, and learning community at The University of Colorado Denver | Anschutz Medical Campus. We provide expert holistic immigration advising; partner with stakeholders to advocate for our students and scholars; and foster intercultural exchange on our campuses. We support our students and scholars as they navigate life in the U.S. and endeavor to reach their goals.

ISSS staff members serve students based on a portfolio model; to find out more about the academic portfolios and to learn about your assigned International Services Specialist, please click here (https://www.ucdenver.edu/services/international-student-and-scholar-services/appointments/). To schedule an appointment with a staff member, please click here (https://www.ucdenver.edu/services/international-student-and-scholar-services/appointments/). For additional information about ISSS and the services we provide, visit our website (https://www.ucdenver.edu/services/international-student-and-scholar-services/).

### International College Beijing

**International College Beijing**  
https://www.ucdenver.edu/offices/international-affairs/partners/international-college-beijing

International College Beijing (ICB) is a joint education program between the University of Colorado Denver (CU Denver) and China Agricultural University (CAU), located in Beijing, People's Republic of China. The partnership, formed in 1994, was one of the first of its kind approved by the Chinese Ministry of Education. ICB is accredited by the North Central Association of Colleges and Schools in the U.S. and maintains a reputation as a challenging, robust academic program.

At ICB, students earn a bachelor of arts degree from CU Denver with a major in either economics or communication. Courses are taught in English by CU Denver faculty on the China Agricultural University campus in Beijing. The curriculum is academically rigorous and equal to that of the economics or communication major on the downtown Denver campus. Beijing students have an opportunity to study on the downtown Denver campus and U.S. students may chose to study in Beijing as well, fostering a truly global classroom experience.

In Beijing, ICB is located on the east campus of China Agricultural University in the Haidian district north of downtown Beijing, the capital of the People's Republic of China. The campus is a thirty-minute ride from downtown Beijing, Beijing International Airport and major cultural centers such as Tiananmen Square, the Forbidden City, and the Summer Palace.

### The Office of Student Life and Campus Community

**Location:** Tivoli Student Union 303  
**Phone:** 303-315-7288  
**Email:** studentlife@ucdenver.edu  
**Website:** https://www.ucdenver.edu/student-life

The Office of Student Life integrates the academic, residential, and co-curricular spheres of student’s lives, linking the out-of-class experience to the academic mission of the University while enhancing the overall educational experience of students through the development of, exposure to and participation in social, cultural, intellectual, recreational, leadership and governance programs. Student Life and Campus Community is the advising, coordinating, resource and general information center for student organizations, the academic honor societies student government and the student newspaper. We collaborate with students, faculty, administrators, and other partners both inside and outside of the CU Denver community to create safe environments for students. In addition, we create opportunities for students to learn through active participation and reflection where they can develop as responsible leaders and engage with their peers and cultivate appreciation for diversity and the betterment of our global society. Student Life and Campus Community is comprised of Student Organizations and Student Leadership Programs, Volunteer and Community Engagement, and Parent and Family Program.

### Student Newspaper: CU Denver Sentry

**Location:** Tivoli Student Union, 345  
**Phone:** 303-556-2535  
**Email:** Please refer to website for more information  
**Website:** www.cu-sentry.com (http://www.cu-sentry.com)
Since 1964, The Sentry has served as CU Denver’s premier source of campus and community news for students and members of the university community. This paper has published every Wednesday and continues to do so in this new century providing the latest in campus news and events in the Denver community. Once known as The Advocate, as of 2016 The Sentry has once again revived the original name in efforts of getting back at our original history. The Sentry boasts a succinct team of more than 15 contributing members working under 4 editorial sections that help contribute to making the paper come to life each week. Students serve at The Sentry’s editors, writers, photographers, and visual designers. An editorial team composed of CU Denver students serves as the official representatives in expressing the CU Denver student body views and ideas. CU Denver may not have a journalism program, but The Sentry serves as the opportunity to expose students to the world of journalism. Learning practical skills in writing, editing, and publishing. The Sentry serves as a resource to the students, faculty, and staff and community members of Denver and the Auraria Campus. The print paper offers coverage of not only on-campus events and topics but as well as encouraging the community to find something to call their own in the city of Denver.

Student Organizations
Location: Tivoli Student Union 303
Phone: 303-315-7288
Email: studentlife@ucdenver.edu
Website: https://www.ucdenver.edu/student-life/student-organizations

Get involved with a student organization, student government or the campus newspaper. CU Denver houses over 100+ student organizations whose focus range from academics to culture, faith/spirituality, community service, professional development, and everything in between! We help students register with student organizations, and provide services, information, education, support, and advising to assist with the development and strengthening of students and student groups. In addition, we provide multiple opportunities for students to engage in practicing and developing their leadership skills. Leadership programs include diverse leadership conferences including CO-Leads, a state wide multi-cultural leadership conference; and the Lynx Leadership Conference, a program designed to increase the leadership skills of CU Denver Students. We also provide leadership trainings that enhance the co-curricular experience on campus through programs such as Leadership On demand, a program designed for students involved in student organizations on campus; and Student Government Association, providing a voice for students on campus. We encourage students to take advantage of shared governance and increase the sense of community on campus through all of the leadership programs.

Student Leadership Programs
Location: Tivoli Student Union 303
Phone: 303-315-7288
Email: studentlife@ucdenver.edu
Website: https://www.ucdenver.edu/student-life/leadership-programs

CU Denver provides leadership education programs and workshops through the Office of Student Life and Campus Community, and Peer Advocate Leaders (PAL). Leadership education programs are designed to provide students with tools and skills to become confident leaders. Participation in leadership programs may also help students connect with each other, giving them an increased sense of belonging here at CU Denver.

- Learn to be a socially responsible leader
- Develop your career readiness competencies in the areas of critical thinking/problem-solving, teamwork/collaboration, leadership, and professionalism/work ethic
- Experience the rewards of peer mentorship

Our Summit Leadership Program is open to all CU Denver students. To join the program, log into our CU Denver student engagement platform MyLynx. Members of the Summit Leadership Program receive information on leadership events, registration deadlines, and are invited to special events just for Summit members.

Student Life & Campus Community also coordinates programs and services to enhance student development and encourage students to lead an active campus life by providing opportunities for co-curricular involvement. Beyond leadership workshops & programs, our staff team supports leadership development through our work with student organizations, community service, campus speakers, leadership conferences, and a variety of campus programs.

Community Engagement
Location: Tivoli Student Union 303
Phone: 303-315-7288
Email: studentlife@ucdenver.edu
Website: https://www.ucdenver.edu/student-life/community-engagement

At the University of Colorado Denver, we are proud to not just be located in an urban setting, but to be transformative partners within our communities. CU Denver Community Engagement strives to be a connection point for students to engage with civic leaders, nonprofit agencies, and opportunities for community service. Whether you are a student looking for a one time volunteer role, to build a relationship with a community agency, or learn more about an upcoming election, our office will be there to help you navigate your options!

TRIO Student Support Services & McNair Scholars
Location: Student Commons Building Ste 2011
Phone: 303-315-3550
Email: Please refer to website for more information
Website: https://www.ucdenver.edu/trio/

CU Denver TRIO Student Support Services (TRIO SSS) at helps first-generation, low-income students and students with disabilities reach their full potential and achieve academic success. We are a supportive academic community committed to student excellence and achievement. Student success is at the center of everything we do in.

The Ronald E. McNair Post-baccalaureate Achievement Program is one of seven federally funded programs under the TRIO umbrella that supports first-generation and low-income students.

Health & Wellness
Wellness is a priority for us. The Health and Wellness website (https://www.ucdenver.edu/student/health-wellness/) is dedicated to providing an exceptional and holistic wellness experience for all CU Denver students. Below are some of the ways that CU Denver supports health
and wellness. To learn more about all of the health and wellness services at CU Denver, please visit our website.

**Food Resources**

**CU Denver Food Pantry**

*Location:* 3rd Level in the Lola and Rob Salazar Student Wellness Building  
*Phone:* 303-315-4010  
*Email:* foodpantry@ucdenver.edu  
*Website:* [https://www.ucdenver.edu/wellness/matters/food-pantry](https://www.ucdenver.edu/wellness/matters/food-pantry/)

The Lynx Food Pantry is here to help students find more resources to fight food insecurity and lack of nutritious food. CU Denver students have access to free food and hygiene products. For more information about how to utilize the Lynx Food Pantry, hours, volunteering, needed items, and the Lynx Mobile Food Pantry, please visit our website ([https://www.ucdenver.edu/wellness/matters/food-pantry/](https://www.ucdenver.edu/wellness/matters/food-pantry/)).

**Mental Health Resources**

**Counseling Center**

*Location:* Tivoli Student Union 454  
*Phone:* 303-315-7270  
*Email:* Please refer to website for more information  
*Website:* [https://www.ucdenver.edu/counseling-center](https://www.ucdenver.edu/counseling-center/)

The CU Denver Student and Community Counseling Center (SCCC) is available to all enrolled CU Denver students. The counseling center provides strength-based culturally responsive mental health services focused on relationship, support, growth, and solutions. The SCCC uses a brief, goal-directed counseling model that helps students achieve their academic and personal goals. There are no fees for counseling sessions. We also offer an array of other services, such as group therapy, drop-in workshops, and wellness-promotion activities.

The counseling center welcomes all CU Denver students seeking assistance, however the SCCC is not able to provide specialized, more intensive, or long-term clinical services. Some examples include services that are required for treatment of acute eating disorders, serious substance abuse/dependence, or acute symptoms that require hospitalization. The SCCC is not able to provide specialized assessments such as child custody evaluations or forensic assessments. If you are seeking long-term treatment or other services beyond the scope of services that the SCCC is able to provide, it is recommended that you receive care by an outside specialist. You can contact us for a list of referrals in the Denver Metro area. If you are unsure whether or not your specific mental health care needs are covered by the counseling center, please contact us and ask to speak with the “on-call counselor” or schedule a consultation appointment with us.

If you would like to learn more about services offered and/or would like to schedule an appointment, please do give us a call at 303-315-7270.

**The Phoenix Center**

*Location:* Tivoli Student Union 227  
*Phone:* 303-315-7250  
*Email:* info@thepca.org  
*Website:* [https://www.thepca.org/](https://www.thepca.org/)

The Phoenix Center at Auraria (PCA) serves students, staff, and faculty associated with University of Colorado Denver, Community College of Denver, and Metropolitan State University Denver. The PCA provides free and confidential resources and assistance to survivors of interpersonal violence (relationship violence, sexual violence, and stalking), as well as their friends, families, and concerned others. The PCA support services include academic advocacy, assistance reporting to the school and/or law enforcement at the survivor’s request, safety planning, court accompaniment, emotional support, and more. The PCA also provides campus education and training, awareness raising events, and campus policy guidance.

To learn more about the services provided by PCA, please visit our website ([https://www.thepca.org/](https://www.thepca.org/)).

**Safety & Support**

**The Office of Equity**

*Location:* Lawrence Street Center 12th Floor  
*Phone:* 303-315-2567  
*Email:* equity@ucdenver.edu  
*Website:* [https://www1.ucdenver.edu/offices/equity](https://www1.ucdenver.edu/offices/equity/)

The Office of Equity’s stated mission is to strive to stop, prevent, and remedy discrimination, harassment, sexual misconduct, and any related retaliation; provide education, training and outreach; design policies and procedures to make our campus safer and more inclusive; and ensure all individuals are treated with dignity, compassion, and respect.

**The Sexual Misconduct Policy prohibits:**

- Sexual Assault: Rape, Fondling, Statutory Rape, and Incest
- Dating Violence
- Domestic Violence
- Sexual Exploitation
- Sexual Orientation
- Stalking: Title IX Stalking and Stalking
- Sexual Harassment: Title IX Sexual Harassment Quid Pro Quo, Sexual Harassment Quid Pro Quo, Title IX Hostile Environment, & Hostile Environment

**The Nondiscrimination Policy** prohibits discrimination or harassment on the basis of:

- Race
- Color
- National Origin
- Sex
- Gender Identity
- Gender Expression
- Sexual Orientation
- Pregnancy
- Disability
- Age
- Creed
- Religion
- Veteran Status
- Political Philosophy
- Political Affiliation
To report an incident of sexual misconduct, discrimination, harassment, or retaliation or to request a training, please contact the Office of Equity at:

- **Phone number:** 303-315-2567
- **Email address:** equity@ucdenver.edu
- **Office address:** Lawrence Street Center, 12th floor, Denver, CO 80204
- **Mailing address:** Campus Box 134, P.O. Box 173364, Denver, CO 80217-3364.
- **Or visit our website for an online report and more information about our policies, procedures, trainings, and other resources:** https://www1.ucdenver.edu/offices/equity

**Website:** https://www.ucdenver.edu/student/health-wellness/case-management

The Office of Case Management was established to better serve the needs of the campus community and struggling students. Case management services include, but are not limited to, providing intervention, advocacy, resources and referrals, as well as follow-up services for students who are experiencing significant difficulties. Case managers support students struggling to navigate the university system, students with current and emerging mental or physical health issues, and students experiencing issues adjusting to academic and social life.

Case Managers coordinate student services and provide referrals to the appropriate resources on campus such as the Office of Community Standards and Wellness, Office of the Registrar, Student and Community Counseling Center, Office of Financial Aid, Disability Resources and Services, Student Mental Health Services, and student advocacy offices.

**The Office of Student Conduct and Community Standards**

**Location:** Tivoli Student Union 309  
**Phone:** 303-315-7311  
**Email:** StudentConduct@ucdenver.edu  
**Website:** http://www.ucdenver.edu/life/services/standards/Pages/default.aspx

We serve the university community by meeting the developmental and educational needs of students related to community expectations, civility and respect for self and others. We support community members with conflict management and resolution, and respond to inappropriate and threatening behaviors. We provide student-centered educational services, which promote personal development and individual responsibility. We strive to create a dynamic, open and just environment where civility, cultural competence and learning are expected and celebrated.

All students at the University of Colorado Denver are encouraged to review the Student Code of Conduct (https://www.ucdenver.edu/docs/librariesprovider122/health-and-wellness/cu-denver-student-code-of-conduct--final-with-suspension-update-9-16-20.pdf?sfvrsn=4d0ea7b9_2). This document outlines student rights and responsibilities, behavioral expectations, and the university conduct process.

**Campus Safety**

**Auraria Police Department**

**Location:** 1201 5th Street Suite 110, Denver, CO 80217  
**Police Dispatch Number:** 303-556-5000  
**Website:** https://www.ahec.edu/services-departments/police

**CAMPUS POLICE MISSION**

The Auraria Campus Police Department is committed to enhancing the quality of life on the Auraria Campus by protecting life and property, and providing a wide range of services to prevent crime and resolve problems.

**Services** (The Auraria Campus Police Department provides campus services 24 hours a day, 7 days a week.)

- Crime prevention programs
- Informational services
- Police support to campus staff
• Night escorts to your vehicle
• Security patrols, bicycle patrols, foot patrols
• Vehicle unlocks
• Emergency response (Emergency Phone Map: http://www.ahec.edu/campusmaps/)
• Timely Notification Bulletin for the Auraria Campus
• Immediate notice of crimes affecting the Auraria Campus.

The Auraria Handivan Service is offered Monday through Thursday 7:00 am-10:00 pm and on Friday’s from 7:00 am-6:00 pm. Also, take advantage of Auraria’s Nightrider escort service. It will take you to any building or parking lot on campus Monday through Thursday, Sundown to 10:00 pm. The wait time is usually no longer than 10 minutes. To arrange for the Nightrider, contact the Auraria Parking Office at (303) 556-2001. If the Nightrider is not running, contact the Auraria Campus Police Department at (303) 556-5000 to arrange for an escort to your car.

The Emergency Notification System (ENS) tool provided by the University of Colorado Denver (CU Denver) for students, faculty and staff provides timely life-safety alerts. You are able to receive these alerts via text, voice and email messaging. Your CU Denver email address has already been added to this system. If you would receive emergency alerts on your cell phone, make sure that you enter your cell phone number into the PROFILE section of your student or employee portal at https://my.cu.edu/. Identify the phone type as a “Cellular” device and check it as the “Preferred” number.

Wellness

Location: Lola & Rob Salazar Student Wellness Center
1355 12th St
Phone: 303-315-WELL (9355)
Email: lynxwellness@ucdenver.edu
Website: https://www.ucdenver.edu/wellness/

Our Purpose: To promote a culture of belonging through innovative spaces, programs & experiences.
Our Vision: To make wellness a priority for every person in the CU Denver community. To do wellness differently.
Guiding Principles: Learn about our Guiding Principles and Wellness Dimension of the Month (https://www.ucdenver.edu/wellness/about/dimension-of-the-month/).

Seven Dimensions of Wellness
1. Emotional Wellness
2. Physical Wellness
3. Spiritual Wellness
4. Social Wellness
5. Environmental Wellness
6. Financial Wellness
7. Creative Wellness

Club Sports

Location: Lola & Rob Salazar Student Wellness Center
Phone: 303-315-9355
Email: clubsports@ucdenver.edu
Website: https://www.ucdenver.edu/wellness/sports/club-sports

Club Sports is a program designed to provide students with the opportunity to engage in team sports in a friendly and competitive environment. The purpose of the program is to unite individuals with a shared interest in sports, develop lasting friendships, and build community among students across campus, while increasing their overall well-being through physical activity. Any student who is enrolled in at least 1 credit hour and is paying the Club Sports fee may participate in Club Sports. Students can pick from a variety of sports to participate in and have the chance to serve in a leadership position during their time. All Club Sports serve under the Wellness and Recreation Services department and indoor practice spaces are housed in the Lola and Rob Salazar Student Wellness Center. Club Sports policies and guidelines can be found in the Club Sports Manual.

Student Health Insurance Office

Location: Plaza Building, Suite 150
Phone: 303-615-9999
Email: Please refer to website for more information
Website: https://www.msudenver.edu/healthcenter/

Hours: Monday-Thursday: 8:00am-5:00pm, Friday 8:00am-3:00pm

The Student Health Insurance Office strongly encourages all students to have adequate health insurance coverage. The university health plan is designed to coordinate services with the Health Center at Auraria to provide quality health care at the lowest possible cost. For domestic students, the university health plan is voluntary. International students with F-1 and J-1 student visas are required to carry the health insurance plan provided by the university. For more information for international students, please visit: https://healthcenter1.com/international-health-insurance-requirement/

Housing, Dining, and Parking

There are a variety of housing, dining, and parking choices available at CU Denver. To learn more, check out the information below.

Housing and Dining

Location: 318 Walnut St
Phone: 303-315-5272
Email: Housing@ucdenver.edu
Website: https://www.ucdenver.edu/housing-and-dining/home (https://www.ucdenver.edu/housing-and-dining/home/)

Although CU Denver is located in the heart of the city, we’ve always operated with the needs of college students in mind. Whether you’re looking for on-campus housing and dining close to classrooms or wish to explore other off-campus options in Denver, we’ve got the resources to help you find the perfect environment.

Housing

Lynx Crossing Residence Hall
Website: https://www.ucdenver.edu/housing-and-dining/lynx-crossing (https://www.ucdenver.edu/housing-and-dining/lynx-crossing/)

Lynx Crossing is conveniently close to CU Denver and the heart of the city, so you’re never far away from your classes or fun. Lynx Crossing offers a wide range of floor plans and other features you can choose from at a fair price for students.

City Heights Residence Hall
Website: https://www.ucdenver.edu/housing-and-dining/city-heights (https://www.ucdenver.edu/housing-and-dining/city-heights/)
CU Denver's First-Year student residential building with dining and campus services. The facility includes two connected building components: a six to seven-story residential tower and a three-story Learning Commons—the home to student life services and faculty development services.

**Off-Campus Housing**

**Website:** [offcampushousing.ucdenver.edu](https://offcampushousing.ucdenver.edu)

The Office of Commuter Services supports students with commuting resources and an off-campus housing database that can be accessed through the link listed above.

**Dining**

The Auraria Campus offers multiple dining choices and programs for the CU Denver community. To learn more about dining choices, please visit the following websites:

- Residence Hall Dining ([https://lynxdining.sodexomyway.com/](https://lynxdining.sodexomyway.com/))
- Auraria Campus Dining ([https://www.ahec.edu/campus-info/food/](https://www.ahec.edu/campus-info/food/))

**Transportation and Parking**

**Website:** [https://www.ucdenver.edu/life/living-on-around-campus/student-transportation-parking/](https://www.ucdenver.edu/life/living-on-around-campus/student-transportation-parking/)

A degree should help you get somewhere, and how you get to campus earns that degree is an important thing to consider. CU Denver students have several options for traveling to and from campus safely and efficiently. CU Denver is conveniently located downtown near multiple light rail stations and bus stops. Bicycle commuting is also a popular option, given Denver’s sunny weather, active culture, and miles of protected bike lanes. If you prefer to drive, there are parking spots available, too.

For more information about parking and transportation options, please visit our website ([https://www.ucdenver.edu/life/living-on-around-campus/student-transportation-parking/](https://www.ucdenver.edu/life/living-on-around-campus/student-transportation-parking/)).

**Other Student Resources**

Feeling like you belong and getting support when you need it—that's what's going to help you reach your goals. As a member of the CU Denver Lynx community, you have access to student services that can support you in so many ways.

**Bursar’s Office**

**Location:** 5th Floor Student Commons Building, 1201 Larimer Street Suite 1107
**Customer Service Phone Center:** 303-315-1800
**E-mail:** bursar@ucdenver.edu
**Website:** [https://www.ucdenver.edu/student-finances/billing-payments/](https://www.ucdenver.edu/student-finances/billing-payments/)

When a student begins researching higher education institutions, tuition is often the first stop. The Bursar’s Office provides services in the following areas.

- Application Fees Payments
- College Opportunity Fund
- Departmental Deposit Transactions
- Tuition and Fee Payments
- Refunds and Direct Deposits
- Student Account Reconciliation
- Third-Party Billing
- Student Balance Outreach
- Past Due Tuition Collection
- Tax Offsets

For more information for graduate students, please visit the Student Finance (p. 46), Tuition and Fees (p. 48), and Billing and Payments (p. 48) sections in the Graduate Catalog.

**Financial Aid and Scholarships**

**Location:** 5th Floor Student Commons Building, 1201 Larimer Street Suite 1107
**Phone:** 303-315-1850
**Email:** FinancialAid@ucdenver.edu
**Website:** [https://www.ucdenver.edu/student-finances/financial-aid/](https://www.ucdenver.edu/student-finances/financial-aid/) and [https://www.ucdenver.edu/student-finances/scholarships/](https://www.ucdenver.edu/student-finances/scholarships/)

While the world of financial aid can seem intimidating, if you break it down and put in the work, making financial aid work for you will be the first step toward opening a door to your future. The Financial Aid and Scholarships Offices provides services in the following areas.

- How to apply for financial aid
- Aid Eligibility
- Types of Aid
- Financial Aid Policies
- Scholarships
- Work-study and Student Employment Opportunities

For more information for undergraduate students, please visit the Student Finance ([https://catalog.ucdenver.edu/cu-denver/undergraduate/student-finances/](https://catalog.ucdenver.edu/cu-denver/undergraduate/student-finances/)).

For more information for graduate students, please visit the Student Finance (p. 46).

**Learning Resources Center**

**Location:** Learning Commons, Suite 1231
**Phone:** 303-315-3531
**Email:** tutorialservices@ucdenver.edu
**Website:** [https://www.ucdenver.edu/learning-resources-center/](https://www.ucdenver.edu/learning-resources-center/)

The CU Denver Learning Resources Center is designed to promote student success, retention, and graduation in a supportive, vibrant
and inclusive academic setting. Our services are available to currently enrolled CU Denver undergraduate and graduate students and include free services such as CRLA certified tutoring, Supplemental Instruction (SI), Academic Development Workshops, Student Success Seminars, academic coaching, Conversation Groups, and English for Speakers of Other Languages (ESOL) support.

Lynx Central
Location: Student Commons Building, Suite 1107
Phone: 303-315-5969 (303-315-LYNX)
Email: lynx.central@ucdenver.edu
Website: https://www.ucdenver.edu/student (https://www.ucdenver.edu/student/)
Office Hours: Monday-Friday, 8am-5pm

Lynx Central provides all prospective and current CU Denver students with support throughout the admissions and enrollment process including help with financial aid and scholarships along with registration. Lynx Central staff can also help with general campus questions. For more information, check us out at https://www.ucdenver.edu/student (https://www.ucdenver.edu/student/).

Office of Information Technology
Location: Lawrence Street Center, 1380
Phone: 303-724-4357 (4-HELP)
Email: oit-servicedesk@ucdenver.edu
Website: https://www1.ucdenver.edu/offices/office-of-information-technology (https://www1.ucdenver.edu/offices/office-of-information-technology/)

The Office of Information Technology (OIT) works in partnership with academic and business units to provide technical support to meet the needs of students, faculty and staff at the CU Denver | Anschutz Medical Campus. OIT serves as the primary source of campus wide technology services (https://www1.ucdenver.edu/offices/office-of-information-technology/services/) in partnership with school, college and department IT professionals.

OIT also provides student computing services to currently enrolled students within the computer labs (https://www1.ucdenver.edu/offices/office-of-information-technology/get-help/student-labs/) and study spaces located in the North Classroom 1206, Student Commons Building 2nd floor, and the Tivoli 241. The computer labs have Macintosh and Windows-based computers with internet access, as well as printing, scanning, and copying availability with assistance from a lab advisor. For more information about these services, visit the student work spaces and computer labs webpage (https://www1.ucdenver.edu/offices/office-of-information-technology/get-help/student-labs/) or email StudentLabs@ucdenver.edu.

Office of the Registrar
Location: Student Commons Building, Suite 1107
Telephone: 303-315-2600
Fax: 303-315-2550
E-mail: registrar@ucdenver.edu
Website: www.ucdenver.edu/Registrar (http://www.ucdenver.edu/Registrar/)

CU Denver offers students a completely online system of planning their schedules and registering for classes. As a student, you are responsible for knowing the deadlines, rules, regulations, course loads, prerequisites and policies of the university, as well as those of the college or school in which you are enrolled, all of which is provided within this online catalog.

The registrar’s office will send an e-mail message to the student’s university-assigned e-mail address, inviting the student to register, including registration information and a registration time assignment. Registration is by time assignment only. Students may register via the web on or after their assigned time.

For more information for undergraduate students, please visit the Records and Registration (http://catalog.ucdenver.edu/cu-denver/undergraduate/records-registration/) section in the Undergraduate Catalog.

For more information for graduate students, please visit the Records and Registration (p. 51) section in the Graduate Catalog.

Ombuds Office
Location: Lawrence Street Center Building, Room 1003
Phone: 303-315-0846
Contact: Melissa Connell, Lisa Neal
Email: Melissa.Connell@cuanschutz.edu (Melissa.Connell@ucdenver.edu), Lisa.Neal@cuanschutz.edu (Lisa.Neal@cuanschutz.edu)
Website: www.ucdenver.edu/ombuds (http://www.ucdenver.edu/ombuds/)

The Ombuds Office is a safe, confidential, and nonbiased resource that members of the University of Colorado Denver | Anschutz Medical Campus can approach to discuss, voice, and clarify any university-related concerns. We are a neutral third-party resource that is available to hear individual complaints and help sort out and identify options for resolving those concerns.

The Ombuds Office is well-trained in listening, facilitating, recommending, mediating, and coaching. Each individual on our team is a member of the International Ombudsman Association and are Certified Organizational Ombudsman Practitioners.

We even offer trainings and seminars for groups and departments to help learn communication skills, conflict management, and effective team building.
Communications with the Ombuds Office may begin with a phone call, e-mail, letter, or visit. Please contact our office (https://www1.ucdenver.edu/offices/ombudsoffice/) to make an appointment.

**Veteran & Military Student Services**

**Location:** Tivoli Student Union, Suite 124  
**Phone:** 303-315-7300  
**Email:** vmss@ucdenver.edu  
**Website:** https://www.ucdenver.edu/veterans (https://www.ucdenver.edu/veterans/)

Veteran & Military Student Services (VMSS) is the initial point of contact for veterans, active-duty service members, reservists, National Guard, and their dependents attending CU Denver. VMSS prioritizes the verification of U.S. Department of Veterans Affairs (VA) education benefit certification for eligible students. This includes ensuring that the VA requirements for attendance, course load, content, and the additional regulations required to receive VA education benefit payments are met by each student. VMSS can assist with problem-solving issues associated with the receipt of VA related educational benefits.

VMSS offers holistic student support services via peer-to-peer mentoring, transition assistance into higher education, scholarships, mental health services specific to the military and transition issues, career preparation through the Boots to Suits program, and providing campus and community resource referrals.

**Writing Center**

**Location:** Learning Commons, First Floor  
**Phone:** 303-315-7355  
**Email:** writing.center@ucdenver.edu  
**Website:** https://clas.ucdenver.edu/writing-center/

The Writing Center at CU Denver is a free resource available to all university students who wish to improve as writers. Services include in-person and online one-on-one appointments; an asynchronous Graduate Drop Box for graduate students; an asynchronous After Hours Drop Box for all students; workshops on a variety of topics (for example: citation, literature reviews, C.V.s, and more); and downloadable handouts, podcasts, and videos. Professional Writing Consultants will work on any type of writing and any aspect of the writing process, including (but not limited to) idea-generation, organization, thesis development, source usage, and grammar. Students bring in documents ranging from resumes, personal statements, and research essays to theses, rhetorical analyses, and grant applications. All writing is welcome. Interested students can schedule appointments (required) online and get more information (hours, directions, etc.) about each of our 9 locations/services for students right from the homepage (https://clas.ucdenver.edu/writing-center/). Please check the website for each location’s hours of operation and availability.

- CU Denver: Learning Commons wing of the City Heights Residence Hall, first floor
- CU Anschutz: Strauss Health Sciences Library 1204
- Auraria Library, Space 108, 1st floor (near the 10th Street entrance, west side of building)
- Business School: Cordillera Conference Room, 1st floor
- Lynx Crossing Residence Hall (residents only): Cyber Café, 1st floor
- Online (real-time) consultations
- Undergraduate Drop Box, Graduate Drop Box, and Faculty Drop Box

**University and Campus Policies**

**University System Policies**

**Phone:** 303-860-5711  
**Website:** https://www.cu.edu/ope (https://www.cu.edu/ope/)

The University of Colorado System Office of Policy and Efficiency (https://www.cu.edu/ope/) - with input from system and campus policy owners - develops, oversees and maintains the University's system wide policy-making process; facilitates the development, review, approval, and maintenance of University-wide policies.

**Policies include:**

- Intercampus Enrollment and Tuition
- Adopting Standards for Intercampus Transfer of Credits
- Sexual Misconduct, Intimate Partner Violence, and Stalking
- Digital Accessibility
- Uniform Grading Policy

**Campus Policies**

**Phone:** 303-315-2102  
**Email:** policy@ucdenver.edu  
**Website:** http://www.ucdenver.edu/policies (http://www.ucdenver.edu/policies/)

The Campus Policy Office resides in the Provost Office. This office oversees all development, coordination, management, rescissions and archives for all CU Denver and CU Anschutz campus policies.

**Policies include:**

- Academic Standing for Undergraduates
- Academic Internships
- Denver Campus Enrollment and Billing
- Four-Year Graduation Guarantee
- Grade Forgiveness
- International Travel Policy for Students
- Transferring Undergraduate Credit

**Academic Integrity And Discipline Policies**

CU Denver defines academic misconduct and sets forth a uniform process for handling allegations of student academic misconduct at CU Denver. As members of the CU Denver community, students are expected to know, understand, and comply with the standards of the University and to accept the responsibility to maintain the highest standards of intellectual honesty and ethical conduct in completing all forms of academic work at the university. In particular, students must refrain from academic misconduct, defined in the policy as

1. a student's use of unauthorized assistance with intent to deceive an instructor or other person who is assigned to evaluate the student’s work in meeting course and degree requirements, or
2. actions that interfere with the ability of the instructor to fairly judge the work of the student or other students.

Academic integrity standards assist in promoting an academically sound, fair, and respectful community. CU Denver views the Academic
Integrity process set forth in this policy as a learning experience that can result in growth and personal understanding of one’s responsibilities and privileges within both the CU Denver community and the greater community. All students must adhere to these standards. Students who allegedly violate these standards and commit academic misconduct will be subject to the procedures described in this policy. Academic dishonesty is defined as a student’s use of unauthorized assistance with intent to deceive an instructor or other such people who may be assigned to evaluate the student’s work in meeting course and degree requirements. Examples of academic dishonesty include, but are not limited to the following:

Forms of Academic Dishonesty (Refer to Campus Policy 7050 for full policy (http://www.ucdenver.edu/policies/))

Students are expected to know, understand and comply with the ethical standards of the university. Academic dishonesty is defined as a student’s use of unauthorized assistance with intent to deceive an instructor or other such people who may be assigned to evaluate the student’s work in meeting course and degree requirements. Examples of academic dishonesty include, but are not limited to the following:

1. Plagiarism

Plagiarism is the use of another person’s distinctive ideas or words without acknowledgment. The incorporation of another person’s work into one’s own requires appropriate identification, regardless of the means of appropriation.

2. Cheating

Cheating involves the possession, communication or use of information, materials, notes, study aids or other devices not authorized by the instructor in an academic exercise or communication with another person during such an exercise for the purpose of obtaining or providing unauthorized information or materials.

3. Fabrication and Falsification

Fabrication involves inventing or counterfeiting information, i.e., creating results not obtained in a study or laboratory experiment. Falsification, on the other hand, involves the deliberate alteration or changing of results to suit one’s needs in an experiment or other academic or creative exercises.

4. Multiple Submissions

This is the submission of academic work for which academic credit has already been earned, when such submission is made without instructor authorization.

5. Misuse of Academic Materials

The misuse of academic materials includes but is not limited to the following: stealing or destroying library or reference materials, computer programs, another student’s notes or materials or illegitimate possession of examination materials, forgery, falsification of university documents.

6. Complicity in Academic Dishonesty

Complicity involves knowingly allowing or contributing to another’s academic misconduct.

School/College Specific Policy

Business School (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/business-school/

College of Engineering, Design and Computing (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/engineering-design-computing/policiestext)

College of Liberal Arts and Sciences (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/liberal-arts-sciences/policiestext)

Disruptive Student Behavior

Students are required to adhere to the behavioral standards listed in the Student Code of Conduct and the course syllabus and to refrain from disrupting classes and other academic settings.

What Constitutes Disruption? "Disruption," as applied to the academic setting, is defined as behavior a reasonable faculty member would view as interfering with normal academic functions (teaching, learning, and research). Examples include, but are not limited to: persistently speaking without being recognized, persistently interrupting other speakers, behavior which distracts the class from the subject matter or discussion, personal insults to the faculty member or other students, abusive behavior (as identified in the CU Denver Student Code of Conduct), refusal to comply with faculty direction, or verbal or physical threats.

Disagreement with the course instructor or other students, during times when the instructor permits open discussion, is not in itself disruptive behavior and is not necessarily prohibited.

Some students engaging in disruptive behavior may have developmental or other related disabilities. Although such students may be considered to have disabilities and to have protections under the Americans with Disabilities Act and the Rehabilitation Act, these students are held to the same standards of conduct and behavior as any other student. Faculty are asked to refer students to any of the resources listed at the end of this policy statement as appropriate.

Where this policy conflicts with the Student Code of Conduct, this policy will prevail with regard to disruptive behavior in the academic setting.

Please refer to Policy 7004 for the full policy (http://www.ucdenver.edu/policies/).

Email Account

Email is an official means for communication within CU Denver. Therefore, CU Denver has the right to send communications to students/staff/faculty via email and the right to expect that those communications will be received and read in a timely fashion.

FERPA: Family Educational Rights and Privacy Act

FERPA is a federal privacy law that protects students’ educational records. Under this law, students have three primary rights:

- Inspect and review their education records.
- Seek to amend incorrect education records.
- Have some control over the disclosure of information from their education record.

FERPA directory information is information contained in a student’s education record that generally would not be considered harmful or an
invasion of privacy if disclosed. Under current CU Denver policy, the following information is designated as directory information:

- Student name. If provided, a preferred name will be used when there is not a documented business or legal reason to provide a student's primary name. Students may also select a diploma name for graduation and commencement materials.
- Hometown (city, state).
- Campus email address.¹
- Dates of attendance.
- Previous educational institutions attended.
- School/college or division of enrollment.
- Majors, minors and field of study.
- Classification level (e.g., freshman, sophomore, graduate student).
- University-recognized honors and awards.
- Degree status (e.g. expected graduation date and/or conferral dates/ terms).
- Enrollment status.
- Employment related to student status (e.g. teaching assistant, resident assistant or work-study) and dates for positions held.
- Participation in officially recognized activities/sports, including height and weight of athletes.
- Photos and videos taken or maintained by the university.

¹ Campus email addresses are only disclosed to requestors who agree not to use them for solicitation.

Although these items are designated by CU Denver as directory information, only a limited amount of this information is routinely disclosed by CU Denver university officials. The university retains the discretion to refuse disclosure of directory information if it believes such disclosure would be an infringement on student privacy rights.

Students may ask the University not to publicly disclose directory information. Be aware, however, if you are seeking employment, the Registrar’s Office cannot release your enrollment, degree status or major to anyone unless you come to the Registrar’s Office with a photo ID.

Forms to prevent disclosure of directory information can be obtained at the Registrar’s Office, located in the Student Commons Building, or via the Registrar’s website at www.ucdenver.edu/registrar (http://www.ucdenver.edu/registrar/).

Information that is never released without your consent includes grades, tuition/fees owed, financial aid, etc. If you would like to give permission to someone else to have access to that information, you can submit a Release of Confidential Information Form to the Office of the Registrar. This form also must be submitted in person.

More information about FERPA can be found in the University Catalog. If you have questions regarding your rights under FERPA, please contact the Office of the Registrar.

---

**Student Bill of Rights**

The University of Colorado Denver subscribes to the Student Bill of Rights as defined in 23-1-125 of the Colorado Revised Statutes. Students enrolled in public institutions of higher education shall have the following rights:

1. Students should be able to complete their associate of arts and associate of science degree programs in no more than sixty credit hours or their baccalaureate programs in no more than one hundred twenty credit hours unless there are additional degree requirements recognized by the commission;

2. A student can sign a two-year or four-year graduation agreement that formalizes a plan for that student to obtain a degree in two or four years, unless there are additional degree requirements recognized by the commission;

3. Students have a right to clear and concise information concerning which courses must be completed successfully to complete their degrees;

4. Students have a right to know which courses are transferable among the state public two-year and four-year institutions of higher education;

5. Students, upon completion of core general education courses, regardless of the delivery method, should have those courses satisfy the core course requirements of all Colorado public institutions of higher education;

6. Students have a right to know if courses from one or more public higher education institutions satisfy the students' degree requirements;

7. A student's credit for the completion of the core requirements and core courses shall not expire for ten years from the date of initial enrollment and shall be transferrable.

**Student Code of Conduct**

The complete Code of Conduct, including a detailed explanation of the conduct process and sanctions, can be found online on the Student Conduct and Community Standards website (https://www.ucdenver.edu/student/health-wellness/student-conduct/) with the full policy here (https://www1.ucdenver.edu/docs/librariesprovider122/health-and-wellness/cu-denver-student-code-of-conduct--final-with-suspension-update-9-16-20.pdf?sfvrsn=4d0ea769_2).

You can also visit the Student Conduct and Community Standards office in the Tivoli Student Union Room 309.

Article 7, Part B of the Laws of the Regents (https://www.cu.edu/regents/regent-laws/) requires each campus to develop a student code of conduct and related processes. The Dean of Students is the designated authority to establish and enforce the CU Denver Student Code of Conduct.

Any questions regarding interpretation of this document or any of its provisions should be directed to the Dean of Students or their designee for final determination.

The Dean of Students and/or their designee shall appoint student Conduct Educators and Appeal Readers. The Director of Student Conduct and Community Standards or their designee shall determine which Conduct Educator shall be assigned to hear each matter.

The Dean of Students and/or their designee shall develop policies for the administration of the student conduct process and procedural rules. Decisions made by a Conduct 5 Educator shall be final, pending the appeal process. Proceedings initiated under this policy are separate from
civil or criminal proceedings that may exist in connection to the same incident. Investigations or conduct proceedings by the university may not be postponed while criminal or civil proceedings are pending, unless otherwise determined by the assigned Conduct Educator.

The CU Denver Student Code of Conduct shall apply to a student's behavior that violates local, state, federal, or university laws, policies, or regulations, and as a result can adversely affect the university community or damages the institution's reputation or relations with the greater community. A student's behavior may be addressed through the student conduct process if it occurs on campus, off campus, or at university sponsored events and programs, including, but not limited to, study abroad programs, alternative break trips, and student organization sponsored events and programing.

The CU Denver Student Code of Conduct shall apply to a student/campus organization's behavior that adversely affects the university community, violates local, state, federal, or university laws, policies, or regulations, or damages the institution's reputation or relations with the greater community. A student/campus organization's behavior may be addressed through the Organizational Conduct Process if it occurs in connection with a campus organization. An organization's involvement in the Organizational Conduct Process does not preclude one or more individuals from being held accountable through the student conduct process for behavior connected to the same incident.

Prohibited Student Behavior

The following has been developed in accordance with CU Regent Law 7.B.1 and Regent Policy 7.B.1. All behaviors contained in this Student Code of Conduct are subject to the Student/Organizational Conduct Process.

1. Abusive Behavior: Engaging in any act or acts that, based on a reasonable person standard, would cause substantial emotional distress to the impacted party or parties, including, but not limited to:
   a. Verbal abuse
   b. Intimidation
   c. Coercion

   NOTE: This policy should not be construed, and will not be enacted, to deny any student the right of free speech and expression.

2. Aiding and Abetting: Attempting to commit, aid, abet, or incite others to engage in behavior prohibited by law, the CU Denver Student Code of Conduct, the CU Housing & Dining Handbook, or other AHEC or university policies.

3. Alcohol: Violating any local, state, federal, or university law, policy, or regulation pertaining to alcohol, including, but not limited to:
   a. Manufacturing, selling, or providing alcohol to an individual(s) under the age of 21
   b. Possessing or using alcohol while under the age of 21
   c. Using alcohol on campus, regardless of age, with the exception of responsible use at an authorized restaurant or event and in compliance with the CU Denver Housing & Dining policy
   d. Being in the presence of alcohol or alcohol use on campus when knowledge of the alcohol or alcohol use is reasonable with the exception of responsible use at an authorized restaurant or event and in compliance with the CU Denver Housing & Dining policy
   e. Using or possessing alcohol in the presence of an individual(s) under the age of 21 on campus, with the exception of responsible use at an authorized restaurant or event
   f. Attending classes or university functions under the influence of alcohol

4. Bullying: Engaging in severe aggressive behavior likely to intimidate or intentionally harm, control, or diminish another person, physically or mentally

5. Cyberbullying: Tormenting, threatening, harassing, humiliating, embarrassing, or otherwise targeting of another person by an individual using the internet, interactive and digital technologies, or mobile telephones

6. Disrupting Emergency Response: Engaging in any act(s) that interfere with, obstruct, or disrupt the response or official action of an emergency responder, including, but not limited to:
   a. Interfering with the performance of police or fire department duties
   b. Resisting arrest
   c. Failing to abide by the directions of a police officer

7. Disruption: Materially and substantially interfering with, obstructing, or disrupting a normal university activity, including, but not limited to:
   a. Behavior resulting in injury to persons or damage to property on the campus
   b. Interference, obstruction, or disruption of the freedom of movement of students or other members of the university community and their guests

8. Driving Under the Influence: Driving under the influence of, or while one's ability is impaired by, alcohol, marijuana, or other illicit or prescription drugs

9. Failure to Comply: Failing to comply with the direction of employees of CU Denver, CU Denver Housing & Dining, and AHEC who are performing their duties

10. Failure to Report: Failing to report the behavior of another individual/student when that behavior may be a violation of any local, state, federal, or university law, policy, or regulation including, but not limited to, the CU Denver Student Code of Conduct, the CU Denver Housing & Dining Handbook, or other AHEC or university policies

11. False Information: Providing false or misleading information, including, but not limited to:
   a. Making a false statement to emergency responders or an employee of CU Denver, CU Denver Housing & Dining, and AHEC who is performing their duties
   b. Using a false identification or the identification of another to gain entrance to a facility or business
   c. Forging, altering, falsifying, or misusing documents or records
   d. Using or possessing forged, altered, or false documents or records

12. Fighting: Assaulting another person, being involved in a fight or brawl, or physically harming another person

13. Fire Safety: Violating local, state, federal, or campus fire policy, including, but not limited to:
   a. Intentionally or recklessly causing a fire
   b. Tampering with, impairing, disabling, or misusing fire protection systems such as smoke detectors, fire extinguishers, sprinklers, and alarms
   c. Failing to evacuate a university controlled building during a fire alarm
   d. Improper use of university safety equipment

14. Hazing: Engaging in or planning any act, typically associated with belonging to a group of peers, which may produce, or is intended to produce, mental or physical discomfort, embarrassment, harassment, or ridicule, or any acts which are humiliating, intimidating, or
demeaning, or that endanger the health and safety of another person, including, but not limited to:

a. Paddling in any form
b. Inducement of excessive fatigue
c. Required exercise inconsistent with the mission of the organization, team, or group
d. Physical or psychological shocks
e. Personal servitude
f. Forced or coerced consumption
g. Forced or coerced engagement in public stunts, morally degrading or humiliating games and activities, drinking games, late work sessions, other unorganized activities, and other obligations that interfere with scholastic pursuits  NOTE: See Appendix 4 – Colorado Law Regarding Hazing
15. Illicit Drugs: Violating any local, state, federal, or university law, policy, or regulation pertaining to federalally illegal drugs other than marijuana, including, but not limited to:

a. Manufacturing, selling, providing, using, or possessing federally illegal drugs other than marijuana
b. Being in the presence of federally illegal drugs other than marijuana or drug paraphernalia when knowledge of the drugs or drug paraphernalia is reasonable
c. Attending classes or university functions under the influence of federally illegal drugs other than marijuana  NOTE: See Section G.17 for marijuana
16. Inhalants: Using household or industrial chemicals in a manner not intended by the manufacturer with the intention of getting high

a. Also known as huffing, sniffing, or bagging
17. Marijuana: Violating any local, state, federal, or university law, policy, or regulation pertaining to marijuana, including, but not limited to:

a. Manufacturing, selling, providing marijuana without authorization or to an individual(s) under the age of 21
b. Possessing or using marijuana or drug paraphernalia while under the age of 21
c. Possessing or using marijuana, including medical marijuana, or drug paraphernalia on campus, regardless of age
d. Being in the presence of marijuana, marijuana use, or drug paraphernalia that violates policy when knowledge of the marijuana, marijuana use, or drug paraphernalia is reasonable
18. Attending classes or university functions under the influence of marijuana
19. Prescription Drugs: Violating any local, state, federal, or university law, policy, or regulation pertaining to prescription drugs, including, but not limited to:

a. Manufacturing, selling, or providing prescription drugs
b. Possessing or using prescription drugs prescribed to another
c. Using prescription drugs in a manner not prescribed
20. Property Damage: Intentionally or recklessly damaging property that belongs to the university, an organization, or another person
21. Public Exposure: Deliberately and publically exposing one’s intimate body parts including, but not limited to:

a. Public urination and defecation
b. Mooning
c. Public sex acts
22. Retaliation: Engaging in retaliatory acts against another person
23. Rioting: Engaging in, inciting, or arming someone for a riot or public disturbance  NOTE: See Appendix 5 – Colorado Law Regarding Riots
24. Theft: Taking property of another without permission or possessing property known to be stolen, even with the intent to return the property
25. Threats: Threatening the health or safety of a person(s) that, based on a reasonable person standard, would cause the impacted person(s) distress
26. Unauthorized Presence or Access: Entering into, exiting from, being present in, or accessing property, including, but not limited to, buildings, vehicles, 12 belongings, and digital accounts and systems, that belongs to the university, an organization, or another person without authorization
27. Unauthorized Recording: Making an audio and/or visual recording of another person without the person's expressed permission when such recording could, based on a reasonable person standard, cause the impacted person(s) substantial emotional distress and the storing, sharing, or distribution of such recordings by any means
28. Violation of Law, Policy, or Regulation: Violating any local, state, federal, or university law, policy or regulation; which includes but is not limited to noncompliance with a public health order
29. Violating the CU Denver Housing & Dining Resident Handbook: Engaging in any act or acts that violate any policy or procedure listed in the CU Denver Housing & Dining Resident Handbook while on Lynx Crossing property, regardless of individual student's status as a resident or guest
30. Weapon: Possessing firearms, explosives, fireworks, incendiary devices, ammunition, or other weapons on campus except as permitted by law, or the possession of a harmless instrument designed to look like a firearm, explosive, or dangerous weapon with the intent to cause fear in or assault to another person

a. NOTE: See Regents Policy 14I (https://www.cu.edu/regents/policy-14i-weapons-control/)
i. Students, faculty, and staff possessing a valid Concealed Handgun Permit are allowed to carry concealed handguns on campus in accordance with the law.
ii. CU Denver Housing & Dining does not permit handguns regardless of an individual's possession of a Concealed Handgun Permit.

Student Right-to-Know and Disclosure Information
The University of Colorado Denver | Anschutz Medical Campus would like to welcome you. As a prospective or enrolled student, you have the right to information regarding safety, financial aid, graduation rates, and the various costs associated with attending the university.

The Student Right-to-Know (https://www.ucdenver.edu/student/forms-policies/right-to-know/) webpage provides a full description of disclosures students have the right to know. Additional information related to complaints and grievances may be located on our Student Complaints & Grievances (https://www.ucdenver.edu/student/forms-policies/complaints/) webpage.

Academic Resources
Copyright Infringement
Our community respects the intellectual property of others (i.e. the work or product of faculty, staff, and students). Users of our intellectual property are encouraged to learn about copyright law, fair use, peer-to-peer file sharing, and penalties.

Copyright Resources (https://content.uc.edu/digitallibrary/copyright.html)

HIPAA Compliance
The University of Colorado Denver is a Hybrid Covered Entity (HCE) under the Health Insurance Portability and Accountability Act (HIPAA). While the University’s activities are primarily under the Federal Educational Rights and Privacy Act (FERPA), parts of University carry on health care activities. Learn more about the University’s HIPAA Hybrid Entity Designation (https://www.cu.edu/ope/aps/5055/).

State Authorization
The University of Colorado Denver has been approved to participate in the National Council for State Authorization Reciprocity Agreements (https://nc-sara.org/) and is authorized to provide education to students located outside of Colorado. Learn more about State Authorization (https://www.ucdenver.edu/state-authorization/) and professional licensure.

Teacher Preparation Program Report
Each higher education institution shall report to their home state information regarding their teacher education programs. Information includes program requirements, enrollment data, program completion data, and assessment rates (i.e., number of students granted their teacher certification/licenses).

Please review the Title II State Report (https://title2.ed.gov/Public/Home.aspx) to learn more about individual teaching programs or contact the School of Education and Human Development (https://education.ucdenver.edu/about-us/contact-information/) to learn about their areas of study.

Textbook Information
Textbook information is available in the UCDAccess student portal (https://www.ucdenver.edu/ucdaccess/) alongside class schedules. Information includes ISBN number and price of required and recommended textbooks. The bookstore is located in the Tivoli Station (https://ucdenver.bncollege.com/).

General University Information
College Navigator
College Navigator (https://nces.ed.gov/collegenavigator/?q=University+of+Colorado&ds=all&tid=126562) provides students and parents with a wide range of information on academic programs, retention and graduation rates, student diversity, campus safety, accreditation, and estimated student expenses as well as financial aid availability.

No High Pressure Recruitment Tactics
The University does not condone high pressure recruitment tactics for recruiting any students, specifically those receiving federal funds or military/service members. The University will not engage in harassing, multiple unsolicited contacts by phone, e-mail, or in-person for purposes of recruitment. The University will train its admissions counselors to not engage in high pressure recruitment tactics.

Student Complaint & Grievances
CU Denver Complaint & Grievances (https://www.ucdenver.edu/student/forms-policies/complaints/) Policies and Procedures are intended to ensure students are treated fairly and equally and their complaints are resolved promptly. Complaints are usually the result of behavior that the student feels is unjust, inequitable, or creates an unnecessary hardship.

Voter Registration
The Colorado Secretary of State (https://www.sos.state.co.us/pubs/elections/vote/VoterHome.html)’s website provides voter registration information.

Health and Safety
Annual Fire Safety and Security Report
The University of Colorado Denver is committed to student and community safety. In compliance with the Jeanne Clery Disclosure of Campus Policy and Campus Crime Statistics Act, information about our efforts, policies, statistics, crime logs and safety policies can be found in the Annual Security and Fire Safety Report (https://www.cuanschutz.edu/police/clery-act/).

Emergency Notification System (CU Alerts!)
Communication plays a critical role before, during, and after any emergency or disaster. The CU Denver Emergency Notification System (CU Alerts!) (https://www.ucdenver.edu/police/cu-alerts-info--denver/) provides campus emergency alerts via text and/or e-mail when conditions develop on or near CU Denver/Auraria campus, which pose an imminent threat of danger to the campus community. Sign up today!

Drug and Alcohol Abuse Prevention
The University of Colorado Denver is committed to preventing the use of illegal substances and encourage responsible behavior regarding alcohol and legal addictive substances through policy, education, and treatment. You can learn more regarding our institutional policies and prevention program in the Annual Security and Fire Safety Report (https://www.cuanschutz.edu/police/clery-act/), and Wellness Center Health Promotions (https://www.ucdenver.edu/wellness/programs/wellness-promotions/) program.

Short-term alcohol and other drug counseling is available through the Counseling Center (https://www.ucdenver.edu/counseling-center/services/) for Denver students.

Title IX, Sexual Misconduct and Nondiscrimination
The Office of Equity (https://www.ucdenver.edu/offices/equity/) is the University office designated to respond to issues related to discrimination, harassment, and sexual misconduct, including Title IX. Make a report (https://cm.maxient.com/reportingform.php?UnivofColoradoDenver&layout_id=2).

Vaccination and Immunization Policies
According to Colorado state law and to ensure the health and safety of our campus, proof of immunization is required prior to registering for all freshmen, transfer, and graduate students. Please review the following policies regarding immunization and vaccination, including COVID-19.

COVID-19 Vaccination Requirement and Compliance (https://www.ucdenver.edu/coronavirus/)

**Student Diversity and Outcomes**

**Enrollment, Retention, and Graduation Rates**

**Post Undergraduate Degree Outcomes**
The Career Center (https://www.ucdenver.edu/lynxconnect/career-center/) collects information on what our undergraduates do after graduation. The First Destination Dashboard (https://public.tableau.com/app/profile/paula.dickson/viz/CareerCenter_FirstDestination/AdditionalInformation/#1) provides information about continuing education pursued by alumni or the type of employment obtained after graduation.
Graduate Programs

CU Denver offers many options for students who want to continue their education after earning a bachelor’s degree. From traditional master's and doctoral programs to graduate certificates and accelerated master's programs, our graduate studies help students continue their education, conduct further research, and improve career skills. Our graduate students work collaboratively with faculty who are consistently recognized for research that shapes our community, the nation, and the world.

CU Denver schools and colleges have developed master’s, doctoral, and graduate certificate degrees for students studying on campus and online. Graduate students can choose from more than 50 master's programs. We also offer doctoral degrees in 14 different programs. Additionally, we collaborate with CU Anschutz Medical Campus on combined programs in diverse health care fields, including health ethics and bioengineering.

Information for Graduate Students

For more information about Graduate Education, please refer to the links below.

- Admissions Requirements (p. 38)
- Application Procedures (p. 38)
- Requirements for Graduate Degrees (p. 39)

Additional information can be found here (https://www.ucdenver.edu/graduate-programs/).
Admissions Requirements

Note that the following are minimum requirements. College and school regulations, if more stringent, take precedence over the minimum guidelines as set forth by Graduate Education.

- Provisional Degree Students (p. 38)
- Regular Degree Students (p. 38)

Provisional Degree Students

A Graduate Program that wishes to admit an applicant who does not meet the criteria for admission as a Regular degree student can admit the applicant as a Provisional degree student. On the provisional form that accompanies the student’s admission documents, the Graduate Program Director outlines the rationale to support such an admission. The form must include a description of the conditions that the student must meet in order to become a Regular degree student.

Based on the requirements of the Graduate Program, the Program Director will advise the student of the conditions that the student must satisfy in order to be transferred from Provisional to Regular status. The Program Director, will also determine the time period (1 or 2 semesters for full-time students and a maximum of 4 semesters for part-time students) in which these conditions must be met.

Provisional students are subject to the same standards of performance required of Regular degree students, plus any other requirements imposed by Program faculty as conditions of admission. At the end of the specified probationary period, the Program Director will review the performance of the Provisional degree student. Provisionally admitted students must either have satisfied the requirements for conversion and be admitted to Regular degree status or be dismissed from the Graduate Program to which they were provisionally admitted.

The Program Director will notify the student whether the indicated requirements have been met and the student’s status has been converted to that of a Regular student, or if the student failed to meet the requirements and has been dismissed.

Regular Degree Students

Students are admitted by the Graduate Program as regular degree students provided they meet the following criteria:

- Hold a baccalaureate or master’s degree from an accredited college or university or demonstrate completion of work equivalent to the baccalaureate or master’s degree given at CU Denver. Applicants whose credentials include studies or coursework at a College or University outside the USA (not taken as part of a semester abroad program) must include original transcripts and documentation in English (or certified English translation) of the transcript as evaluated by the CU Denver Office of International Affairs.
- have an undergraduate grade point average of 3.00 or better ("A" is equal to 4.0) or a 3.00 or better GPA in twelve (12) credit hours or more of a partially completed graduate level Master’s degree program. Applications from individuals who attended a College or University that does not issue grades or a GPA will be evaluated by the Graduate Program on a case-by-case basis.
- Have adequate preparation to enter graduate study in the chosen program as demonstrated by their performance in the GRE or an appropriate substitute (i.e., MCAT, an earned MS/MA or PhD from a school in the United States, or completion of at least 12 credit hours of transferable graduate-level course work from an accredited US college or university). It is not a requirement for admission as a regular degree student if one of the other two indicators of preparedness is present. Some graduate programs, however, may require that all applicants take the GRE or an equivalent.
- Meet any additional requirements (such as particular undergraduate course work) for admission as established by the program.

International students must meet all of these requirements and also must provide:

- original transcripts and documentation in English (or a certified English translation) of the completion of a Bachelor’s degree, Master’s degree or the equivalent as evaluated by the CU Denver Office of International Affairs;
- financial and other documents as required by the International Student and Scholar Services Office to process immigration documents;
- a certified English translation of all academic records and references not in English, and
- evidence of proficiency in English (ELP). More information can be found here (p. 44).

Additional requirements and documentation may also be required.

Application Procedures

- Certificate Students (p. 38)
- New Degree-Seeking Students (p. 39)
- Nondegree-Seeking Students (p. 39)
- Readmission of Former Students (p. 39)
- Transferring Programs (p. 39)

Certificate Students

The application for students wishing to matriculate into a Graduate Certificate Program is completed online at https://ucdenver.edu/graduate-programs/admissions/.

In addition to the online application, official transcripts from Colleges, Schools, and Universities in which the student received a degree are required. Individual Certificate Programs evaluate and select the students they want to admit. A letter of offer from the Certificate Program to the applicant must include a statement indicating that admission to the University is pending final approval of the Graduate Program. The Graduate Program confirms the applicant’s credentials, including authenticating transcripts, and also determines whether the student meets the general requirements of the Graduate Program and the specific requirements of the selected Certificate Program. Students admitted to a Certificate Program must meet the same admission criteria as outlined above for degree-seeking students.

Students who are already enrolled in a Graduate Degree Program in which a Certificate is also offered may be admitted into the Certificate Program upon approval of the Program Director.
New Degree-Seeking Students

Applicants seeking admission to CU Denver’s graduate programs should apply online at https://ucdenver.edu/graduate-programs/admissions (https://ucdenver.edu/graduate-programs/admissions/).

International applicants should refer to the Information for International Students (p. 44) section of the catalog for more information regarding specific application instructions and requirements.

If applying to more than one program, you must submit a complete application and separate fee to each program.

Students transferring from another University of Colorado campus to the Denver Campus must apply and be accepted by the program on this campus.

A student who has completed a Master’s program at CU Denver must resubmit an online graduate application for acceptance into a doctoral program.

An applicant for admission must present:

- Submitted online application
- Official transcripts for all academic work in colleges and universities completed to date.
- Three letters of reference. The online application will automatically send recommendation forms to the recommenders indicated on the application.
- A nonrefundable application fee of $50 for domestic students or $75 for international students. No application will be processed until this fee is paid.
- Any other material required specifically by the program faculty. This may include scores from the GRE or other examination (GRE School code 4875). Check with program coordinators in the departments for additional information that may be required.

Check with the program for the deadline for submitting the application.

Students who wish to apply for a graduate student award (e.g., fellowship, scholarship, assistantship) should contact their department before the application deadline for information, since deadlines are usually earlier for aid requests than for admission.

Nondegree-Seeking Students

A student who wishes to take graduate courses, but is not interested in earning a specific advanced degree, may apply as a nondegree student at: https://ucdenver.edu/graduate-programs/prospective-students (https://ucdenver.edu/graduate-programs/prospective-students/).

Nondegree students will be allowed to register only on the campus to which they have been admitted.

Nondegree students who later desire to pursue a graduate degree program at this university are encouraged to submit the complete online graduate application and supporting credentials as soon as possible. Credits earned as a nondegree student at the University of Colorado may, at the discretion of the department to which the student is admitted, be transferred into a degree program. The maximum amount of credits allowed for transfer is 12 semester hours for the master’s degree, 9 hours for the EdD program, and 30 hours for PhD degrees. These limit totals include both nondegree CU credits and those transferred from other institutions.

Readmission of Former Students

Students who were previously admitted to a Graduate Program but who did not complete that degree program and who have not been registered for more than one (1) year [i.e., three (3) terms] at CU Denver| Anschutz must reapply to the Program supplying updated information and academic credentials. The following requirements must be satisfied before being readmitted:

- clarify their status with the Graduate Program to determine their eligibility to return and pursue the same degree;
- submit an application at least two weeks prior to the first day of the term in which you are interested in taking a course; and
- meet any new admission requirements required of matriculants (i.e., background checks, immunizations, etc.)

However, the Program is under no obligation to readmit the student, and the student should consult with the Program Director before applying.

Transferring Programs

Students who are currently enrolled in a Graduate Program and in good academic standing (i.e., GPA of 3.00 or better) and who want to change Programs or major departments must complete the appropriate application forms and be accepted by the new Program into which they are transferring.

Requirements for Graduate Degrees

Graduate Education Policies and Procedures

The Graduate Education posts the Graduate Education Policies and Procedures (https://www.ucdenver.edu/graduate-programs/forms-resources/) that provide information and guidelines for graduate students and faculty at the University of Colorado Denver. Students are encouraged to be familiarize themselves with the policies outlined in this handbook and to use this handbook as a supplement to the personal feedback and guidance of faculty and staff in their departments.

Each graduate program is expected to provide students with a program-specific handbook indicating in some detail the curricular requirements, the expectations for satisfactory progress toward the degree completion, a timeline for the steps needed to meet these expectations and other features unique to each program (such as the composition and formation of thesis, project and dissertation committees to guide and review the student’s progress).

GPA Requirements and Quality of Graduate Work

To maintain satisfactory academic progress, advance to candidacy, and earn a certificate or graduate degree, students are required to maintain a minimum program GPA of 3.00 for all graduate courses taken while enrolled in their graduate programs, including any undergraduate (i.e., 4000 level) courses that may be required for the certificate program or graduate degree. Failure to maintain a 3.00 cumulative GPA will result in the student being placed on academic probation. Courses in which grades below “B-” (2.7) are received may not be applied toward fulfillment
of the requirements for any graduate (doctoral or Master’s) degree or certificate. Courses required by the degree-granting program or certificate and in which the student receives a grade below "B-" must be retaken in order to achieve a "B-" or better grade.

Only earned grades of a "B-" or higher will be calculated into the program GPA. However, all grades received, including repeat courses, will appear on the student’s transcript and will be included in the cumulative GPA calculation. Only one course enrollment may be counted towards graduation credits. If a student starts a new degree program after previously having been enrolled in a different program, their program GPA with respect to Graduate Education requirements will start anew, and only grades earned while enrolled in the new graduate degree program will be considered in terms of their academic standing.

Transfer Credits

A transfer credit is any credit that a student earned at another accredited institution outside of the CU System. Transfer credit requests may be accepted provided they are recommended by the corresponding program and approved by the school or college dean. The maximum number of credits that may be transferred is 12 for a Master's degree (or 40% if the program requires more than 30 credits) and 30 semester hours for PhD degrees. Limits vary for professional doctorate programs, and individual PhD programs may also have more restrictions.

Courses taken as pass/fail or satisfactory/unsatisfactory may not be transferred. All credits requested for transfer must be graded on an A-F letter grade system. In addition, a grade of B- or above must be earned for a course to be transferred (individual programs may require a higher standard). Courses that are more than seven (7) years old will need to be validated by the Program Director. Courses transferred from a quarter-system school will also be recalculated to their semester equivalent (a 3-quarter hour course at any institution will be equivalent to 2 semester hours).

Coursework that has been applied towards an undergraduate degree or another graduate degree on the same level (e.g., MA to MS) cannot be accepted for transfer credit. Specifically, Master’s courses applied to one completed Master’s degree program may not be applied to another Master’s degree, however, graduate level coursework (5000 level or above) completed for a Master’s degree may be applied toward a doctoral degree with program approval. Also, credits earned in a graduate certificate program, that have not also been applied to a graduate degree program, may be applied to a graduate degree program with program approval.

Graduate Student Teaching Appointments

Many departments employ graduate students as part-time instructors or teaching assistants. The instructorship is reserved for those advanced graduate students already possessing appropriate degrees who may be independently responsible for the conduct of a section or course. Contact the department for further information.

Research Assistantships

Research activities provide opportunities for graduate students to obtain part-time work as research assistants in many departments. Such assistantships are funded by external grants obtained by faculty members. Contact the department for further information.

Certificate Program

The minimum number of credit hours required for a Graduate Certificate is 12, although exceptions might apply. While it is expected that most of the coursework will be at the graduate level (5000 or above), no more than three credits may be earned at the undergraduate level (4000 level only), and with the approval of the Certificate Program Director. All graduate level certificate courses (5000 or above) will be eligible for transfer into a subsequent Graduate Degree Program assuming a) they meet the minimum grade requirements of the Graduate Program (which may be more stringent than those of the Graduate Education Policies and Procedures), b) the courses are deemed appropriate for the specific program of study, and c) the courses are approved for transfer by the Graduate Program Director.

Admission to Candidacy

Students who have completed the coursework required for a Graduate Certificate must submit a Certificate of Completion form. This form is available on the Graduate Education website and must be signed by the Certificate Program Director. A form that has been approved certifies

1. That the courses listed on the Certificate Completion form are compliant with the Certificate Curriculum and the requirements of Graduate Education,
2. That the course grades meet the minimum requirement of the Certificate Program,
3. The total Graduate Certificate GPA is at least a 3.0.

Master’s Degree

The requirements stated below are minimum requirements; additional conditions may be set by the individual programs.

Students planning to graduate should obtain current deadlines from our website (https://www.ucdenver.edu/graduate-programs/forms-resources/). It is the graduate student’s responsibility to see that all requirements and deadlines are met (e.g., changing of I and IP grades, notification of final examinations, etc.).

Minimum Requirements

The minimum number of credit hours required for a Master’s degree is 30. While it is expected that most of this coursework will be at the Graduate level (5000 and above), some Graduate Programs may allow up to two undergraduate courses (4000 level and above) that are outside the specific discipline of their program to count towards the graduate degree and must be approved by the Program Director. Regardless, at least 24 credit hours of those required for completion of the Master’s program must be at the graduate level (5000 and above) and undergraduate credits (4000 level and above) cannot exceed 20% of total credit hours required. Of those, at least one has to be from outside the program’s discipline (different program four letter prefix) to count towards the graduate degree.

If the program has a thesis, research paper or internship option as the culminating requirement, the thesis/research paper must count for three to six (3-6) credits, unless specified otherwise by individual programs. Independent study coursework must not exceed 20 percent (six credits) of the 30 credits of coursework required for the Master’s degree.
Master’s Thesis Credit

Master’s students who are enrolled in a program that requires a thesis must undertake their thesis work under the supervision of a thesis advisor and a faculty advisory committee. All research conducted for a Master’s degree must meet all appropriate regulatory standards specified by federal, state and local agencies regarding ethical research, animal use, human subjects, HIPAA and environmental safety. Each thesis is presented in partial fulfillment of the requirements for the master’s degree and must meet the formatting criteria outlined in the Style and Policy Manual for Theses and Dissertations, available on the Graduate Education webpage. Prior to electronic submission to a national repository, the Graduate Program performs a format review. Before this submission, these must have been successfully defended before the student’s committee.

A grade of “In Progress” (IP) will be assigned for thesis hours in all semesters until the final approved thesis is submitted to the Graduate Program. The thesis advisor determines the final thesis grade and then submits “Change of Record” requests to the Registrar’s Office to change all IP grades to the one final grade.

Admission to Candidacy

Students who wish to earn a Master’s degree must first become candidates. After completing or registering for all program-required course work, students must apply for graduation in their student portal and submit the signed Application for Admission to Candidacy to the Graduate Program by the graduation deadline posted for the semester in which they plan to graduate. The candidacy form is available online on the Graduate Education website.

An approved form certifies that a student’s work is satisfactory and that the courses that are listed on the candidacy form are compliant with the program curriculum and the Graduate Education Policies and procedures. Students must hold a minimum GPA of 3.00 to apply for candidacy.

Master’s Degree Final Examination / Thesis Defense

All candidates for the Master’s degree are required to take a final comprehensive examination, present a cumulative professional portfolio or successfully defend a project or thesis. The final examination or defense is conducted by a committee consisting of at least three members of the graduate faculty. The student’s final examination/defense committee and the examination schedule must be approved by the Program Director. The “Request for Graduate Examination” form must be submitted to Graduate Education at least two weeks prior to the final exam/defense.

The chairperson and student must be present for the oral examination or defense, which may be held in-person or by interactive video. If one faculty member cannot be present due to an emergency, the exam can proceed with the faculty who can attend, and the student will schedule a separate meeting with the absent faculty member at an alternate time. A majority of the examination committee members must vote for one of the following examination outcomes: Pass, Conditional Pass or Fail. The original signed form is sent to Graduate Education.

For a Conditional Pass, the examining committee will clearly define the requirements for the student to receive an unconditional passing grade; these requirements must be completed to the satisfaction of the examination committee within four months. Failure to satisfy these conditions will result in failure of the examination. A student who fails the examination is subject to immediate dismissal from the program on the recommendation of the graduate program and concurrence of the Dean.

A student who fails the examination is subject to immediate dismissal from the Program on the recommendation of the Graduate Program Director and concurrence of the Dean. At the program’s discretion, a student who fails the examination may be allowed to retake the exam once. The retake must be completed by the end of the next academic semester. Both the original signed examination form noting the failure as well as the signed new exam form for the retake must be filed with Graduate Education.

Time Limit

Master’s students, whether enrolled full time (five credits or above) or part time (less than five credits), have seven years from the start of course work to complete all degree requirements, including the filing of the thesis with the Graduate Program, if the program requires a thesis. Students who fail to complete the degree in this seven-year period are subject to termination from the Graduate Program upon the recommendation of the program director. For a student to continue beyond the time limit, the Program Director must petition the dean for an extension and include:

1. Reasons why the program faculty believe the student should be allowed to continue in the program, and
2. An anticipated timeline for completion of the degree.

Doctoral Degree

Students who aim to receive a doctoral degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field. Furthermore, they must have shown the ability to work independently in their chosen field and must have made an original contribution of significance to the advancement of knowledge. The technical requirements stated below are minimum requirements for all candidates for the degree; additional conditions set by the departments or schools will be found in the announcements. Any department may make additional regulations consistent with these general rules.

Minimum Requirements

The minimum number of credit hours required for a PhD degree is 30 credits of coursework, all of which must be at the graduate level (5000 and above) and 30 dissertation credits. Selected programs might have obtained permission for an exception from this rule from the Graduate
Council. Graduate level coursework taken for a Master's degree may be applied toward a doctoral degree with Program approval.

All courses that count towards the minimum requirements for a doctoral degree must be at the graduate level, and must be graded on the A-F system (not pass/fail) and offered within a Degree Program at the 5000 level or above. With the approval of the Program Director, students enrolled in Graduate Programs at CU Denver can undertake graduate-level courses at other campuses within the University of Colorado system.

The minimum enrollment requirement at CU Denver for doctoral students is six semesters of full-time scholarly work beyond the attainment of a bachelor's degree.

PhD students must register for a minimum of five hours (and a maximum of 10 hours) of dissertation credit in each fall and spring semester following successful completion of the comprehensive examination.

Once a student has completed 30 dissertation credits, they need to enroll for only one credit in each fall and spring semester until a successful defense of their dissertation. If defending in the summer semester, they must also register for one dissertation credit.

A grade of "In Progress" (IP) will be assigned to all dissertation credits earned until the final approved dissertation is submitted to Graduate Education. The dissertation advisor determines the final dissertation grade, and then submits "Change of Record" requests to the Registrar's Office to change all IP grades to this final grade.

**Registration Requirements**

A student (who is not on a leave of absence) and fails to register continuously in a given academic year (fall and spring semesters) for dissertation credit hours after passing the comprehensive examination may, at the discretion of the program director, be required to retake and pass the examination in order to regain status as a student in "good standing."

Students who are unable to register for the minimum dissertation credits because of extenuating personal circumstances should apply for a Leave of Absence.

**Leave of Absence**

Students who need to leave a CU Denver Graduate Program for a period of time should determine, in consultation with their Program Director, whether a petition for a Leave of Absence is required for up to one (1) year. An approved Leave of Absence pauses the student’s academic record and automatically extends the time limit for completing a degree by the equivalent amount of time that the student spends on leave. Requests for leaves of absence that exceed one (1) year may be approved on a case-by-case basis with provided justification. Students who are absent for longer than one (1) year will be considered to have withdrawn from the Program and will be required to reapply for admission and be considered with all other applicants.

**Examinations**

Each doctoral program will require at least comprehensive and final examinations. Notice of all examinations must be filed with Graduate Education at least two weeks prior to administration.

**Preliminary Examination**

Each Program is responsible for ensuring that students are qualified for doctoral studies by passing a comprehensive examination or a combined preliminary and comprehensive examination. If a program evaluates students’ preparedness with a separate preliminary examination, it must be administered equitably to all students, with the limited exception of programs that require a student to have a master’s degree before entering doctoral training; a master’s degree may exempt the student from the preliminary examination but cannot exempt the student from the comprehensive examination.

**Comprehensive Examination**

After completing or registering for all program-required, non-dissertation coursework, and concurrent with applying for admission to candidacy, doctoral students must take a comprehensive examination in their respective discipline. This examination will test a student's mastery of a broad field of knowledge, not merely the formal coursework that has been completed.

The examination committee shall consist of a minimum of three graduate faculty members. A majority of the committee members, including the Chair, must be members of the degree-granting Program. The student’s dissertation advisor, if already identified, may not chair the comprehensive examination committee. The student’s comprehensive exam committee and the examination schedule must be approved by the Program Director before being submitted to Graduate Education on the Exam Request Form. Graduate Education must receive the Exam Request Form by published deadlines. Individual graduate programs may have additional requirements for registering/scheduling the exam.

At the Program’s discretion, the oral portion of the comprehensive examination may be open to all members of the Program, after which the student shall meet with the examination committee in a closed session. This examination must be completed no later than the end of the third year for full-time students, unless indicated otherwise in program-specific guidelines and communicated to Graduate Education.

All members of the committee must be present for the examination, either in person or by interactive video. Exceptions to this rule must be approved by Graduate Education. The primary faculty advisor’s participation is determined by the program, if that person is not already part of the committee. In the event of an emergency that prevents one (1) faculty committee member from attending the exam, the exam may proceed with the faculty members who are able to attend. The student must schedule a separate meeting with the absent faculty member at an alternate time. The examination form must be signed by the committee and returned to Graduate Education. If the original Chair must be absent, a replacement must be designated by the program. A majority of the examination committee must vote for one of the following outcomes: a) Pass; b) Conditional Pass; or c) Fail. All members of the committee must sign the exam report form to document their individual vote and the form, with original signatures, must be returned to Graduate Education in hard copy or high quality scan.

If a student receives a Conditional Pass, the examining committee must clearly define the requirements for the student to receive an unconditional passing grade, and these requirements must be completed to the satisfaction of the examination committee within four months. The committee Chair is responsible for monitoring the conditions and reporting their outcome to Graduate Education. Failure to satisfy these conditions will result in failure of the examination.

A student who fails the examination is subject to immediate dismissal from Graduate Education upon the recommendation of the program and concurrence of the Dean. At the program’s discretion, a student who fails the examination may retake it once. The re-examination will
be in the form designated by the committee and must be completed within twelve months. The original examination form noting the failure should be signed by the committee and returned to Graduate Education. The student will be required to meet registration requirements and be registered during the term in which the exam is repeated.

**Final/Dissertation Examination**

After the dissertation has been completed, a final examination on the dissertation and related topics is conducted in two parts: an oral presentation of the dissertation research that is open to the public and a closed examination conducted by the examining committee.

The final examination/defense committee is usually, but not necessarily, the same as the student’s Dissertation Advisory Committee. The dissertation defense committee shall consist of a minimum of four Graduate Faculty members, except for professional doctorate programs, which require a minimum of three Graduate Faculty members. A majority of the committee members, including the Chair, must be graduate faculty members of the degree-granting program. With program approval, the doctoral student’s dissertation advisor may chair the examination committee.

The student’s final examination/defense committee and the examination schedule must be approved by the Program Director before being submitted to Graduate Education on the Exam Request Form. Graduate Education must receive the Exam Request form by published deadlines. Graduate Programs may have additional requirements for registering/scheduling the exam. Graduate Education will send announcements of the examination to appropriate faculty members, and the Exam Report/signature form will be sent to the committee chair and other Program staff for completion at the examination.

The student must submit finalized draft copies of the dissertation to the defense committee at least two weeks before the examination date. Programs/committees may require an earlier deadline. All members of the committee must be present for the examination, either in person or by interactive video. Exceptions to this rule must be approved by Graduate Education. The primary faculty advisor’s participation is determined by the Program, if that person is not already part of the committee. In the event of an emergency that prevents one faculty committee member from attending the exam, the exam can proceed with the faculty members who can attend, and the student will schedule a separate meeting with the absent faculty member and the exam committee chair at an alternate time. If the original committee Chair must be absent, a replacement must be designated by the Program. A majority of the examination committee must vote for one of the following outcomes: a) Pass; b) Conditional Pass; or c) Fail. All members of the committee must sign the exam report form to document their individual vote and the form, with original signatures, must be returned to Graduate Education in hard copy or high quality scan.

If a student receives a Conditional Pass, the examining committee must clearly define the requirements for the student to receive an unconditional passing grade, and these requirements must be completed to the satisfaction of the examination committee within 60 days of the defense. Under extenuating circumstances, the graduate Program Directors may petition Graduate Education for additional time. If a student fails the examination, they may not continue in the program unless a time extension is approved.

**Dissertation Requirements**

A dissertation is based upon original research and is expected to demonstrate mature scholarship and critical judgment, as well as familiarity with the tools and methods of research. The work must be conducted and presented on a subject approved by the student’s dissertation advisor and the Dissertation Advisory Committee. The research must meet any regulatory standards specified by federal, state, and local agencies regarding ethical research, animal use, human subjects, HIPAA and environmental safety.

The dissertation is presented in partial fulfillment of the requirements for the doctoral degree and must meet the formatting criteria outlined in the Formatting Guide for Theses and Dissertations available on Graduate Education website. Substantive contributions to research and writing by other persons should be explicitly acknowledged, either in an Acknowledgements section or in the appropriate chapters. The Graduate Program conducts the final review of dissertations for proper formatting. The final, formally approved dissertation must be submitted to Graduate Education, with the completed Thesis Approval Form, within 60 days of the thesis defense unless an extension is approved by Graduate Education. The thesis must be approved by a majority of the defense committee members, plus the student’s advisor, if that person is not part of the defense committee.

**Time Limit**

Doctoral students, whether enrolled full time or part time, must complete all degree requirements within eight years of matriculation. Students who fail to complete the degree in this eight-year period are subject to termination from the Graduate Program upon the recommendation of the program director. For a student to continue beyond the time limit, the Program Director must petition for an extension and include:

1. Reasons why the program faculty believes the student should be allowed to continue in the program and,
2. An anticipated timeline for completion of the degree. Extensions for time to degree are normally issued for one year or less, but under rare circumstances, a second extension may be granted. The "Extension of Time Limit" form is posted on the Graduate Education website. Approved "Leaves of Absence" automatically extend the time limit for earning a degree by the equivalent amount of time that the student is on leave.

**Policies and Additional Information**

For general information regarding Graduate Education Policies, Procedures, Forms, and more, please visit the Graduate Programs website (https://ucdenver.edu/graduate-programs/forms-resources/).

For information for specific programs, please visit the specific school or college page:

- Business School (p. 73)
- College of Architecture and Planning (p. 168)
- College of Arts & Media (p. 225)
- College of Engineering, Design and Computing (p. 236)
- College of Liberal Arts and Sciences (p. 311)
- School of Education & Human Development (p. 534)
- School of Public Affairs (p. 658)

**International Admissions**

Director of International Enrollment Strategy and Admissions: Clay Harmon

Physical Address:
Overview

CU Denver International Admissions facilitates the evaluation of international academic credentials for international graduate applicants, as well as US citizens, permanent residents, and other applicants who have studied outside the United States before studying at CU Denver. We also manage the English language proficiency policy for international graduate applicants.

This page contains information for international applicants to graduate programs. For information about applying to an undergraduate program as an international student, please visit this page (http://catalog.ucdenver.edu/cu-denver/undergraduate/admissions/international-admissions/).

Application Information for Graduate International Students

Application and Documentation Requirements

Graduate applicants with academic background from outside the United States must provide an international credential evaluation report from Educational Credential Evaluators, Inc. (ECE (https://www.ece.org/)) or World Education Services (WES (https://www.wes.org/)). Please review the Graduate Admissions page (https://www.ucdenver.edu/international-admissions/apply-for-admission/graduate/) for information about the international credential evaluation requirement. Make sure to visit the website for your program of interest to find the list of required documents and test scores for your major. If you have any questions, International Admissions is here to help - please feel free to contact us at any time.

Note: the application fee for international applicants is $75.

Application Deadlines

Application deadlines vary significantly. Please contact your program of interest to learn more.

Non-Degree Admissions

Do you want to explore CU Denver before applying to a degree program? Would you like to complete a course for professional development or transfer credits to another institution? If so, non-degree admission is right for you.

Certificate/Continuing Professional Programs

Professionals who want to advance their careers or learn a new skill can earn a certificate from CU Denver. Our certificate programs provide specialized information delivered by knowledgeable professors. Additionally, our continuing education classes help you stay current with developments in your field.

*If you want to enroll in courses identified as Continuing and Professional Education (http://www.ucdenver.edu/academics/continuing-education/Pages/), do not apply for non-degree admission. See your program for application information.

Graduate Non-Degree/Certificate/Continuing and Professional Education Admissions

• International non-degree/certificate/CPE applicants must provide Proof of English Language Proficiency (https://www.ucdenver.edu/international-admissions/apply-for-admission/graduate/). If you have any questions regarding the ELP requirement, please contact International Admissions at application@ucdenver.edu.

• Applicants to certificate programs who have academic background from outside the United States must provide an international credential evaluation report from Educational Credential Evaluators, Inc. (ECE (https://www.ece.org/)) or World Education Services (WES (https://www.wes.org/)). Please visit the International Admissions graduate application page (https://www.ucdenver.edu/international-admissions/apply-for-admission/graduate/) for more information.

• Please contact the applicable college/graduate department below for specific admission requirements and deadlines:

Business School
College of Engineering, Design and Computing
College of Liberal Arts and Sciences
College of Nursing
Colorado School of Public Health
School of Education and Human Development
School of Public Affairs
Skaggs School of Pharmacy and Pharmaceutical Sciences

After Admission

• The Immigration Document Creation Request Form is required for all non-degree international applicants

• Non-degree coursework requires additional processing steps for the I-20. International Student and Scholar Services (https://www.ucdenver.edu/services/international-student-and-scholar-services/) (ISSS) will help with those requirements.

Proof of English Language Proficiency

International applicants to CU Denver must provide proof of English language proficiency (ELP) in order to be considered for full admission.
Some graduate programs will consider international applicants for conditional admission if they apply without adequate proof of ELP. Contact International Admissions if you have questions about ELP or conditional admission.

You may meet the ELP requirement via any of the options listed below.

### 1. Citizenship Exemption

International applicants holding citizenship from the following countries do not need to prove their English language proficiency for admission to CU Denver. This list is based on the United Kingdom government’s list of countries (https://www.gov.uk/student-visa/knowledge-of-english/) exempt from proving English ability when applying for a UK student visa.

- Antigua & Barbuda
- Australia
- The Bahamas
- Barbados
- Belize
- Canada
- Dominica
- Grenada
- Guyana
- Ireland
- Jamaica
- Malta
- New Zealand
- Saint Kitts & Nevis
- Saint Vincent & the Grenadines
- Trinidad & Tobago
- United Kingdom

### 2. ESL Academy

International applicants may meet the English language proficiency requirement for any program of study at CU Denver by successfully completing every class in level 5 at CU Denver’s ESL Academy (https://clas.ucdenver.edu/esl/).

### 3. English Language Proficiency Tests

CU Denver accepts the following tests as proof of English language proficiency.

**Notes:**

- The scores listed above are the university minimum requirements. Some graduate programs require higher scores for admission. Please visit the website for your program of interest for more information.
- CU Denver’s TOEFL code is 4875. For all other tests, please search for or choose “University of Colorado Denver.”
- CU Denver accepts TOEFL MyBest scores and superscored IELTS scores.

### 4. Coursework Completion

International applicants who have completed the following coursework will be considered to have met the English language proficiency requirement.

- The applicant has earned a bachelor degree in the United States; or has earned a post-secondary qualification, comparable to a US bachelor degree, in one of the exempt countries listed above; or has earned such a qualification at an institution accredited by an exempt country but located in a non-exempt country.
- The applicant has completed 12 or more semester hours of coursework in a master or doctoral degree program in the United States with an overall GPA of 3.0/4.0 or higher; or has completed a comparable amount of graduate coursework with a comparable GPA in one of the exempt countries listed above; or has completed such coursework at an institution accredited by an exempt country but located in a non-exempt country.

#### Immigration Process (F-1 & J-1 student visas)

International Services Specialists in International Student & Scholar Services (ISSS) (https://www.ucdenver.edu/services/international-student-and-scholar-services/) handle the immigration process for international students. ISSS will issue an immigration document (Form I-20 or Form DS-2019) to you, if applicable, only after you have accepted your offer of admission and submitted the Immigration Clearance Form (see below).

You will be contacted within five (5) business days of receiving your decision letter and will need to provide:

**Proof of Financial Support:** If you have already sent financial documents to the International Admissions Office, that information will be forwarded to ISSS. If you have not already provided this information, or if your information needs to be updated, you will have an opportunity to provide ISSS with your proof of financial support when you complete the online Immigration Clearance Form that your International Services Specialist will send to you.

**Passport/Visa Information:** If you have already sent this information to International Admissions, it will be made available to ISSS who will contact you if they need more information.

**Note:** International students living outside of the U.S. will need to provide a copy of their passport, if it has not already been sent. Those living in the U.S. should be prepared to submit a copy of their passport, visa, Form I-94 Arrival/Departure Record and Form I-20, Form DS-2019, or Form I-797 (if applicable). In all correspondence, please use your name as it appears on your passport.

Please visit ISSS (https://www.ucdenver.edu/services/international-student-and-scholar-services/) for more information on Pre-Arrival, Arrival at CU Denver, I-20/DS-2019 Timeline, and more.
Student Finances

Contact Information

Bursar’s Office

Overview

At CU Denver, we have a longstanding belief that finances should never stand in the way of motivated, talented individuals who want to better themselves and make a positive impact on the world around them. Through a tradition providing strong financial assistance and aid programs, we enforce this belief every day.

Quick Guide

Not sure of the difference between the student finance offices? Here's a quick guide to finding what you need.

Bursar

• Application Fees Payments
• College Opportunity Fund
• Departmental Deposit Transactions
• Tuition and Fee Payments
• Refunds and Direct Deposits
• Student Account Reconciliation
• Third-Party Billing
• Student Balance Outreach
• Past Due Tuition Collection
• Tax Offsets

Financial Aid & Scholarships

It’s been said that a college degree is an investment in your future. But for many, financing that investment seems unattainable. That doesn't have to be the case. While the world of financial aid can seem intimidating, if you break it down and put in the work, making financial aid work for you will be the first step toward opening a door to your future.

• How to apply for financial aid
• Free Application for Federal Student Aid (FAFSA) studentaid.gov (https://www.studentaid.gov)
• Learn about types of aid
• Financial Aid policies

Financial Aid

How to Apply for Financial Aid

1. Complete the Free Application for Federal Student Aid (FAFSA) at https://www.studentaid.gov

CU Denver School Code: 004508

Students who hold a status of ASSET and/or DACA, as well as International and undocumented students may file the CASFA (https://www.ucdenver.edu/student-finances/financial-aid/eligible/asset-daca) in lieu of the FAFSA.

2. Monitor your UCDAccess Portal "To Do List" and UC Denver email for documents to submit

You may receive an email stating that you have been selected for federal verification. This request may include tax documentation.

3. Apply for Scholarships

For more information on scholarships, please visit Scholarships (ucdenver.edu) (https://www.ucdenver.edu/student-finances/scholarships/).

4. Review your Financial Aid Offer

The financial aid offer will detail your aid eligibility.

5. Apply for Federal Student Loans

Log into your UCDAccess Portal to accept, reduce or decline your loan offer.

Types of Aid

Grants

Grants are a type of financial aid award that you don't need to repay. Students must be enrolled at least half-time to receive the grant unless specified.

Federal Grants

• Federal Pell Grant (https://studentaid.gov/understand-aid/types/grants/pell/)
• Federal Supplemental Educational Opportunity Grant (FSEOG) (https://studentaid.gov/understand-aid/types/grants/fseog/)
• Iraq and Afghanistan Service Grant (https://studentaid.gov/understand-aid/types/grants/iraq-afghanistan-service/)
• Children of Fallen Heroes Scholarship (https://www.nasfaa.org/news-item/16809/11-19_Children_of_Fallen_Heroes_Scholarship_Act/)
• Teacher Education Assistance for College and Higher Education (TEACH) Grant (https://studentaid.gov/understand-aid/types/grants/teach/)

• In order for CU Denver to determine your eligibility for the TEACH Grant, complete the Federal TEACH Grant Interest form located on our forms page under (https://www.ucdenver.edu/student-finances/financial-aid/forms/miscellaneous forms)

State

• Colorado Student Grant - Awarded to eligible undergraduate students who are Colorado residents with documented financial need as demonstrated through the FAFSA.
• Colorado Graduate Grant - Awarded to eligible graduate/professional students who are Colorado residents with documented financial need as demonstrated through the FAFSA.

Institutional Grants
• University Need Grant - Awarded to eligible CU Denver undergraduate students with documented financial need as demonstrated through the FAFSA.
• Lynx Grant - Awarded to eligible CU Denver undergraduate students with documented financial need as demonstrated through the FAFSA.

Please note: The Federal Supplemental Education Opportunity Grant, Colorado Graduate Grant, Colorado Student Grant, University Need Grant, and Lynx Grant are offered based on funding availability and are not guaranteed.

Work-Study
Work-study is a financial aid award that allows undergraduate and graduate students to work part-time to earn money to pay for educational expenses. The program encourages community service work and work related to the recipient’s course of study. Students earning work-study funds are paid bi-weekly. If awarded work-study, students may search open positions on the Handshake Job Board (https://ucdenver.joinhandshake.com/login/)

Scholarships
Scholarship opportunities are both need-based (documented financial need as demonstrated through the FAFSA) and merit-based.

For more information on scholarships, please visit Scholarships (ucdenver.edu) (https://www.ucdenver.edu/student-finances/scholarships/).

Educational Loans
Educational Loans are funds that have to be repaid.

• Federal Direct Subsidized Loan - The Federal Direct Subsidized Loan is a need-based, federally funded loan. Interest on the Subsidized Loan is paid by the federal government during certain periods. Borrowers receive a six-month grace period before entering repayment. The grace period begins six-months after the student ceases to be enrolled at least half-time, discontinues their program of study or graduates.

• Federal Direct Unsubsidized Loan - The Federal Direct Unsubsidized Loan is a non-need based, federally funded loan. Borrowers receive a six-month grace period before entering repayment. The grace period begins six-months after the student ceases to be enrolled at least half-time, discontinues their program of study or graduates.

• Federal Direct Parent PLUS Loan - The Parent PLUS Loan is a federally funded loan, available to parents of dependent students. The Parent PLUS Loan is credit-based and begins to accrue interest from the date of disbursement. If a parent cannot secure a PLUS Loan due to credit, the undergraduate student may qualify for additional Unsubsidized Loan. Repayment on the PLUS loan begins almost immediately after disbursement, however a parent may make arrangements to have repayment deferred while the student is enrolled at least half-time. The interest on this loan, even while in deferment, will continue to capitalize on the principle amount.

• Private Student Loan - Private student loans are educational loan programs established by private lenders to supplement the funding that students and parents receive from federal and state sources. Private loans are credit based and often have different lending criteria than government lending programs.

Financial Aid Policies and Regulations

Enrollment Status
Most undergraduate financial aid programs require at least half-time enrollment (6 credit hours per semester) to be eligible for awards. Higher or lower minimums may be required for specific individual awards (review your award notification for the exact number of credits required for aid eligibility).

Satisfactory Academic Progress (SAP)
To continue to be eligible for financial aid, students must meet Satisfactory Academic Progress. If a student is not meeting SAP standards, they may be ineligible for financial aid and scholarships. For more information, students should review the Satisfactory Academic Policy by visiting https://www.ucdenver.edu/student-finances/financial-aid/eligible/sap/ (https://www.ucdenver.edu/student-finances/financial-aid/eligible/sap/).

A student may appeal financial aid suspension by submitting a SAP Appeal. The SAP appeal should document the extenuating circumstances that led to the student’s suspension. All appeals should include third party supporting documentation.

Course Withdrawals and Repayments
Financial aid is disbursed based on the assumption a student will attend courses for the entire semester and earn passing grades. A student who withdraws or fails all courses and received financial aid must have a Return of Title IV (R2T4) calculation performed to determine the percentage of aid that was earned based on the amount of time the student attended their courses. Students are entitled to aid that was earned. The University will return any unearned aid to the appropriate Federal Title IV program, which may create a balance owed to the University.

The University will also determine the earned and unearned portions of any state or institutional aid. This calculation is separate from the R2T4 aid calculation.

If you withdraw on or before the University’s census date, you will be required to return all state and/or institutional aid received for the term. The Bursar’s Office will bill your account for the amount owed.

If you withdraw after the census date, you will be required to repay a portion of any state and institutional received for the term based on your withdrawal date.

CU Denver is required to verify a student began attendance in any course a student withdraws from or fails. If the Financial Aid & Scholarships Office receives notification that a student never began attendance.

For more information regarding financial aid policies and regulations, please visit the CU Denver financial Aid website (https://www.ucdenver.edu/student-finances/financial-aid/policies/)
Tuition and Fees

When a student begins researching higher education institutions, tuition is often the first stop. Graduate tuition costs are different for in-state students – students who have Colorado residency – and out-of-state students – those attending CU Denver from outside of Colorado. Tuition and fees are based largely on the classes you take, and which school or college is offering your classes, as well as your resident status. It is important that you understand your residency status (https://www.ucdenver.edu/registrar/residency/) because it impacts more than just tuition rates.

Tuition is the amount a student pays for instruction per course at a college or university. Tuition costs are often listed along with additional fees that all students must pay. These fees cover anything from the student wellness center and other facility maintenance costs to technology upgrades and transportation expenses.

All tuition and fee rates are established by the Board of Regents, the governing body of the University of Colorado, in accordance with legislation enacted annually by the Colorado General Assembly. The Regents set tuition rates and fees at a budget retreat each spring for the coming fall, spring and summer terms, but reserve the right to change rates at any time. Rates for the current year are available online to assist prospective students in anticipating costs. Please refer to the Tuition and Fees (https://www.ucdenver.edu/student-finances/tuition-fees/) site in July for new rates.

Direct Deposit

Direct deposit is the standard method of issuing student account refunds to CU Denver students with credit balances. Students are strongly encouraged to sign up for direct deposit well in advance of any anticipated student account refunds, and may do so online via the UCDAccess portal (https://passport.ucdenver.edu/login.php).

In your "Student Center", select "Student Account"
1. Go to "Direct Deposit Student Refunds"
2. Follow the instructions and input your banking information.

Students who do not sign up for direct deposit will receive a paper refund check through the mail. Refunds will only be issued via direct deposit or through the mail. Students are not allowed to pick up their refund check from the Bursar's Office.

Drop Charge

Beginning the second Tuesday of the fall and spring terms until census date, a $100 drop transaction charge will be assessed each time a student drops a course. Please refer to the academic calendar (https://www.ucdenver.edu/student/calendars/billing/spring/) for exact dates. This includes student initiated drops done in order to change sections within a course. Section changes done for an administrative purpose through the deans’ offices will be exempted from drop charges. If a student withdraws, dropping all classes, a drop charge will be assessed for each course.

Past Due Tuition and Fees

Past due student accounts will be assessed a one-time per semester late charge and a monthly service charge for every month the balance remains unpaid. After the semester of the past due debt, student accounts are referred to Student Debt Management. An overdue student account may be referred to a third party collection agency and reported to one or more credit bureau reporting services; the student explicitly authorizes University of Colorado Denver to release personal and financial information under those circumstances. To the extent permitted by applicable law, the student agrees to reimburse the University of Colorado Denver the fees of any collection agency, which may be based on a percentage at a maximum of 40% of the debt, and all costs and expenses, including reasonable attorney’s fees, the University may incur in such collection efforts. In addition, while the student maintains a past due balance with the University of Colorado Denver, a hold will be placed on the student record preventing any future registration, the release of official transcripts and diplomas.

Pursuant to C.R.S. § 23-5-115, in the event of a default on an amount owed to University of Colorado Denver, University of Colorado Denver may certify to the Colorado Department of Revenue information regarding persons with past due accounts. The Colorado Department of Revenue may then disburse funds to University of Colorado Denver in satisfaction of that debt from tax refund amounts owed to the individual, if any.

See the Tuition and Fees Payment Disclosure Statement (https://www.ucdenver.edu/docs/librariesprovider22/billing-payments/tuition-and-fee-agreement.pdf).

Students who owe a past due debt to the university in excess of $1500.00 may be administratively dropped from any future terms if the past due amount is not paid in full or set up on a payment plan. The drop will occur the Friday prior to the first day of classes of the next term. For more information, please see the Bursar’s Administrative Withdrawal Policy (https://www.ucdenver.edu/docs/librariesprovider22/billing-payments/administrative-withdrawal-of-students-with-outstanding-debt-policy_procedure-2022_updated.pdf?sfvrsn=975d79bb_2).

Tuition Appeals

Students are responsible for abiding by the published deadlines. Tuition is not refundable when students drop or withdraw from courses after the published deadlines. If circumstances beyond the student’s control have made the late drop or withdraw necessary, the student may file a tuition appeal.

Instructions and forms for submitting a tuition appeal are available here (https://www.ucdenver.edu/student-finances/tuition-fees/tuition-appeals/+).

Billing and Payments

Please visit our website (https://www.ucdenver.edu/student-finances/billing-payments/) for more information, including state and federal regulations, policies specific to CU Denver (https://www.ucdenver.edu/student-finances/billing-payments/policies/), cost per credit hour, how to make payments, important dates (https://www.ucdenver.edu/student-registration-planning/billing-calendars/), as well as Residency (https://www.ucdenver.edu/registrar/residency/) and the College Opportunity Fund (https://www.ucdenver.edu/registrar/residency/college-opportunity-fund/) (COP) and how they could affect your tuition bill.

Payment of Tuition and Fees

All tuition and fees, except the application fee, are due on the day indicated on your billing statement. Students have an option to choose a payment plan available through QuikPAY, our payment processor.
Specific information on the payment plan can be located here (https://www.ucdenver.edu/student-finances/billing-payments/payment-plans/).

Students who register for courses are liable for payment of tuition and fees if they withdraw from school after census date. Refund policies for students who withdraw from the University both before and after census date are included in the academic calendar. A student with financial obligations to the University will not be permitted to register for any subsequent term(s), or be issued transcripts or diplomas. The only exception to this policy involves federal student loans and other types of indebtedness that are due after graduation. More information about registration holds and student debt can be found here.

Students may pay tuition through the UCDAccess portal, with cash, personal checks, by credit card at the Bursar’s Office. Any payment transaction that is returned by the bank will be assessed an additional returned payment charge.

The University of Colorado Denver is committed to providing students and their families a range of options for paying their educational expenses. The credit card payment method has become prohibitively expensive due to the fees charged by credit card companies to CU Denver for credit card transaction processing. This expense has been covered by University tuition revenues, and reduces the tuition dollars available for academic programs and services for all students. Therefore, a service fee of 2.85% of the payment amount will be assessed for all credit and debit card transactions.

Students who register in a non-degree status, and who later apply and are admitted to a degree status for that term, are responsible for the difference in tuition between the non-degree program and their applicable degree program and will be billed accordingly.

Tuition Classification
Residency Classification for Tuition Purposes

Tuition classification is governed by Colorado statutes that apply to all state-funded institutions in Colorado. Institutions are bound by the provisions of this statute and are not free to make exceptions to the established rules.

Students are initially classified as in-state or out-of-state for tuition purposes at the time of application. The classification is based upon information furnished by the student and from other relevant sources. After the student’s status is determined, it remains unchanged in the absence of satisfactory evidence.

Once a student is classified as a nonresident for tuition purposes, the student must petition for a change in classification. Petitions must be submitted no later than the Monday prior to the first official day of classes of the term for which the student wishes to be classified as a resident. It is preferred that petitions be received 30 days prior to the beginning of the term. Late petitions will not be considered until the next semester. Specific information may be obtained from the Office of the Registrar.

The final decision regarding tuition status rests with the university. Questions regarding residence (tuition) status should be referred only to the tuition classification officer. Opinions of other persons are not official or binding upon the university. Additional information is available on our website (https://www.ucdenver.edu/registrar/residency/).

Basic Requirements

The statute provides that an in-state student is one who has been a legally domiciled in Colorado for one year or more immediately preceding the beginning of the term for which the in-state classification is being sought. Persons over 23 years of age or who are emancipated establish their own legal domicile. Those who are under 23 years of age and are not emancipated assume the domicile of their parent or court-appointed legal guardian. A non-emancipated minor’s parent/legal guardian must, therefore, have a legal domicile in Colorado for one year or more before the minor may be classified as an in-state student for tuition purposes.

Establishing Domicile

Domicile is established when one has a permanent place of habitation in Colorado and the intention of making Colorado one’s true, fixed and permanent home and place of habitation. The tuition statute places the burden of establishing a Colorado domicile on the person seeking to establish the domicile. The question of intent is one of documentable fact and needs to be shown by substantial connections with the state sufficient to evidence such intent. Legal domicile in Colorado for tuition purposes begins the day after connections with Colorado are made sufficient to evidence one’s intent. The most common ties with the state are

1. Obtaining a Colorado driver’s license/ID,
2. Obtaining automobile registration in Colorado,
3. Colorado voter registration,
4. permanent employment in Colorado and most important,
5. payment of state income taxes as a resident by one whose income is sufficient to be taxed.

Caution: payment or filing of back taxes in no way serves to establish legal domicile retroactive to the time filed. In order to qualify for in-state tuition for a given term, the 12-month waiting period (which begins when the legal domicile is established) must be over by the first day of classes for the term in question. If one’s 12-month waiting period expires during the semester, in-state tuition cannot be granted until the next semester.

Resident Tuition for Military-Connected Students

Military-connected students living in the state of Colorado may be able to receive in-state residency for tuition purposes at CU Denver and CU Anschutz as designated by Federal or State Law. Please review the information on the Veteran and Military Student Services website (https://www.ucdenver.edu/veterans/benefits/) for more information.

Western Regional Graduate Program (WRGP)

A student can qualify for the WRGP and pay the resident tuition rate. In order to qualify for WRGP the student must enroll into a qualifying degree program. A student can obtain more information by contacting the Office of Graduate Admissions.

Members of the American Indian Tribes with Historical Ties to Colorado

A student who is a registered member of one of the federally recognized American Indian tribes with historical ties to Colorado, as designated by the Colorado Commission of Indian Affairs in partnerships with History Colorado, is eligible to be classified as an in-state student for tuition
purposes. A student can obtain more information by contacting the Office of the Registrar.
Records and Registration

Registrar’s Office

Assistant Vice Chancellor and University Registrar: Lara Medley
Office: Student Commons Building, Suite 5005
Telephone: 303-315-5969
Fax: 303-315-2550
E-mail: registrar@ucdenver.edu
Website: www.ucdenver.edu/Registrar (http://www.ucdenver.edu/Registrar/)

Overview

CU Denver offers students a completely online system of planning their schedules and registering for classes. As a student, you are responsible for knowing the deadlines, rules, regulations, course loads, prerequisites and policies of the university, as well as those of the college or school in which you are enrolled, all of which is provided within this online catalog. Please refer to the academic policies section for more specific information related to records and registration.

Students should review the sections of this catalog that describe in detail the academic programs available at CU Denver.

The Registrar’s Office will send an e-mail message to the student’s university assigned e-mail address, inviting the student to register, including registration information and information on where to locate their registration time assignment. Registration is by time assignment only. Students may register via the web on or after their assigned time.

Services offered include:

- Academic Calendar
- Catalog
- Diplomas
- Enrollment Verification
- Grades and Academic Standing
- Name and Record Updates
- Registration including Inter-Campus and Inter-Institutional
- Residency Petition for Continuing Students
- Schedule Adjustment Forms
- Transfer Credit Evaluation
- Transcripts

FERPA

FERPA: Family Educational Rights and Privacy Act

FERPA is a federal privacy law that protects students’ educational records. Under this law, students have three primary rights:

- Inspect and review their education records.
- Seek to amend incorrect education records.
- Have some control over the disclosure of information from their education record.

FERPA directory information is information contained in a student’s education record that generally would not be considered harmful or an invasion of privacy if disclosed. Under current CU Denver policy, the following information is designated as directory information:

- Student name. If provided, a preferred name will be used when there is not a documented business or legal reason to provide a student’s primary name. Students may also select a diploma name for graduation and commencement materials.
- Hometown (city, state).
- Campus email address.¹
- Dates of attendance.
- Previous educational institutions attended.
- School/college or division of enrollment.
- Majors, minors and field of study.
- Classification level (e.g., first-year, sophomore, graduate student).
- University recognized honors and awards.
- Degree status (e.g. expected graduation date and/or conferral dates/terms).
- Enrollment status.
- Employment related to student status (e.g. teaching assistant, resident assistant or work-study) and dates for positions held.
- Participation in officially recognized activities/sports, including height and weight of athletes.
- Photos and videos taken or maintained by the university.

¹ Campus email addresses are only disclosed to requestors who agree not to use them for solicitation.

Although these items are designated by CU Denver as directory information, only a limited amount of this information is routinely disclosed by CU Denver university officials. The university retains the discretion to refuse disclosure of directory information if it believes such disclosure would be an infringement on student privacy rights.

Students may ask the university not to publicly disclose directory information. Be aware, however, if you are seeking employment, the Registrar’s Office cannot release your enrollment, degree status or major to anyone unless you come to the Registrar’s Office with a photo ID.

Forms to prevent disclosure of directory information can be obtained at Lynx Central, located in the Student Commons Building, or via the Registrar's Office forms webpage (https://www.ucdenver.edu/registrar/student-resources/forms/).

Information that is never released without your consent includes grades, tuition/fees owed, financial aid, etc. If you would like to give permission to someone else to have access to that information, you can submit a Release of Confidential Information Form to the Registrar’s Office. This form can be submitted in person with a photo ID or if sent via fax, mail, or email it needs to be notarized.

If you have questions regarding your rights under FERPA, please contact the Registrar’s Office.

Registration

For more information regarding the registration process, please see below:

- Academic Calendars (p. 52)
- Enrollment Status (p. 62)
Academic Calendars

Consult the official CU Denver academic calendar to determine when registration will open and close for each term. CU Denver academic calendars for upcoming semesters can also be found on the Lynx Central Registration and Planning web page (https://www.ucdenver.edu/student/registration-planning/academic-calendars/).

Summer degrees posted on UCDAccess and transcripts (tentative) - This is the date your degree will be recorded on your transcript; diplomas begin mailing on September 5th. August 19, 2024

**Non-standard and Intensive Courses**

Courses can be offered at a shortened, accelerated pace, in which the credit hours assigned are the same as standard semester courses. These courses require the same total amount of instructional and student work time as full semester courses, even if delivered within an accelerated time frame. Drop deadlines are unique to each course and can be viewed in UCDAccess in "My Class Schedule" under "Deadlines."
Enrollment Status

Individual students receiving financial aid may be required to complete credits in addition to those listed below. The exact requirements for financial aid will be listed in the student’s financial aid award letter.

Undergraduates and Non-degree

Undergraduate students:

- Full-time
  - 12 or more credit hours
- Half-time
  - 6 to 11.5 credit hours

Graduate and Non-degree Graduate students:

- Full-time
  - 5 or more credit hours
  - 0 credit hours as a candidate for degree
  - 1 or more credit hours of thesis or dissertation (not master’s reports or thesis preparation)
- Half-time
  - 3 to 4.5 credit hours

Notes:

Enrollment verification of full-time/part-time attendance can be certified beginning the first day of class.

Credits used for calculating full-time/part-time enrollment status do not include inter-institutional credits, nor do they include credits from another CU campus, unless the student is enrolled through the Intercampus Enrollment (p. 64) program.

Students receiving veteran benefits should contact the Veteran Student Services manager for the definition of full-time status for summer sessions. Contact information: 303-315-7300 or VMSS@ucdenver.edu.

Individual exceptions to the minimum graduate course-load levels are considered for financial aid purposes by the financial aid committee. Students must file a written appeal with the Office of Financial Aid (http://catalog.ucdenver.edu/cu-denver/undergraduate/student-finances/).

Course Load/Restrictions

In most cases, students wishing to take more than 18 semester hours (12 in the summer session) must have the overload approved by an authority in their Academic Advising office of their college or school. Students should consult with their Academic Advisor for specific guidelines as to course-load restrictions.

Registration Process

Students should review the sections of this catalog that describe in detail the academic programs available at the Denver Campus.

The registrar’s office will send an e-mail message to the student’s university-assigned e-mail address inviting the student to register, including registration information and a registration time assignment. Registration is by time assignment only. Students may register via the web on or after their assigned time.

Enrollment Appointment

An enrollment appointment is a specific time and date at which a student can register for classes through UCDAccess. This enrollment appointment is assigned to a student the semester prior to the term of registration. Students cannot enroll for classes prior to the date and time specified. Enrollment appointment dates are based on the number of academic hours completed. Enrollment appointment times are randomly assigned in fifteen minute timeslots. Students can check their UCDAccess student portal for their specific enrollment appointment date and time. The general progression of registration will start with graduate students, 5th-year seniors, seniors, juniors, sophomore, freshman, and non-degree students. Students who register as soon as their enrollment appointment begins are more likely to find space in the courses they prefer.

Course Load/Restriction

In most cases, students wishing to take more than 18 semester hours (12 in the summer session) must have the overload approved by the dean of their college or school. Consult the individual college or school for specific guidelines as to course-load restrictions.

Web Registration and Student Information

Denver Campus students can register and obtain information regarding their academic and financial records by logging into their UCD Access portal.

Online registration allows the student to check the availability of specific courses prior to their registration time and to search for available courses by department, course level, or meeting time. If registration in a course is denied, the reason will be specified in UCD Access.

Student information available online currently includes mailing address verification (or change), admission application status, financial aid information, schedule by semester, grades by semester, unofficial transcript, account balance, online payment and degree audit (for some programs).

Adding a Course

From your registration time assignment to the published add deadline, you are able to add classes through the UCDAccess portal. If a class is closed/full, you can add your name to the waitlist (if available) through this date. Click here (https://catalog.ucdenver.edu/cu-denver/undergraduate/records-registration/registration/waitlist/) for more information regarding Waitlists.

To add a class after the published add deadline date to census date, you may need to obtain the instructor’s permission by completing the Schedule Adjustment Form found here (https://www.ucdenver.edu/registrar/student-resources/forms/).

Adding a Course After Census

To add a class after census, a Schedule Adjustment Form with both the instructor’s and authority’s signatures needs to be submitted to the Registrar’s Office. These deadlines vary for intensive, module, and off-cycle classes.

Withdraw Process

From census until the 10th week of classes, a student may withdraw from most courses using the UCDAccess portal.
Students may be financially responsible for part or all tuition and fees for any class drops or withdrawals. Class withdrawals and drops or withdrawals may lead to adjustments to financial aid/awards packages, Department of Veteran Affairs education benefits, or other eligibility/benefits that are dependent upon enrollment status. Class drops or withdrawals may impact immigration status for international students. A W grade appears on the transcript after published deadlines. Contact the Registrar’s Office with questions about class drops or withdrawals.

Please review the current term’s academic calendar (https://www.ucdenver.edu/student/registration-planning/academic-calendars/) for the most recent add/drop deadlines.

Administrative Drop

An administrative drop is processed by university officials in the Registrar’s office by approval of a school/college dean’s office. A student may be administratively dropped from one or more classes or withdrawn from all classes for any of the following reasons:

- failure to meet certain preconditions, including but not limited to:
  - class cancellations
- failure to meet course prerequisites
- whenever the safety of the student, faculty member, or other students in a course would be jeopardized
- academic suspension, including but not limited to failure to attain or maintain a required GPA
- as a potential sanction for a violation of the code of student conduct
- disruptive behavior determined by the chair and/or associate dean or Office of Student Conduct and Community Standards to be detrimental to the progress of the course and the education of other students

Outstanding Debt/Administrative Drop Policy

Students who owe a past due debt to the university in excess of $1500 will be administratively dropped from any future terms if past due amount is not paid in full before the Friday prior to the first day of classes of the next term.

To Withdraw from CU Denver

To withdraw from the University of Colorado Denver, students must drop all courses for the semester. Prior to census (see current academic calendar (https://www.ucdenver.edu/student/registration-planning/academic-calendars/) for census date), students must use the web registration system to drop courses. Courses dropped during this period are not recorded on the student's permanent record.

After the census date (see current academic calendar (https://www.ucdenver.edu/student/registration-planning/academic-calendars/) for census date), through the 10th week (fourth week for summer) students may withdraw from their courses using the UCDAccess Portal. Courses dropped during this period will be recorded on the student’s permanent record with a grade of W.

Students seeking to withdraw after the 10th week (fourth week for summer) must complete a petition through their school/college.

A student who stops attending classes without officially withdrawing from the university will receive grades of F for all course work during that term.

Medical Withdrawal

A student who wishes to withdraw under the Medical Withdrawal Policy must withdraw from all classes. Additionally, international students must contact their assigned International Services Specialist to discuss visa implications associated with withdrawing. Students seeking to withdraw for non-medical reasons will need to review the withdrawal policies and procedures for their respective school/college. For more information, see The Office of Case Management (https://www.ucdenver.edu/student/health-wellness/case-management/).

Waitlist

If you are eligible to take a class but find that it is closed/full, you may request to be placed on a waitlist (if available) through the UCDAccess portal. Placing your name on a waitlist does not guarantee that you will be enrolled in that class. However, waitlists have proven to be a very effective tool for students wishing to register in closed classes.

You cannot be enrolled in, and/or waitlisted, for classes offered at the same time. You cannot be enrolled/waitlisted for two sections of the same class (except in the case of Special Topics classes). Use the ‘drop this class if enrolled’ function in the UCDAccess portal to maximize your enrollment choices.

Monitor your status on the waitlist; you will be enrolled in the class if space becomes available. You may attend all classes until you confirm whether or not you are officially enrolled in the class. You will receive an email if you get enrolled into the class. You are responsible for the tuition if you become enrolled from the waitlist, even if you do not attend. If you do not wish to take the class, you are responsible for dropping it according to the published deadlines in the Academic Calendar (https://www.ucdenver.edu/student/registration-planning/academic-calendars/).

Waitlist Positions and Enrollment

When someone drops a closed class, the student who is next in line on the waitlist is automatically enrolled. Schools and colleges reserve the right to make exceptions to manage their waitlists based on unique needs and circumstances. Please check your class schedule in the UCDAccess portal to see if you have been enrolled in the class(es).

CU Online-Waitlisted Courses

You will have access to an online class while you are on the waitlist. While you are waiting for confirmation or denial of enrollment, you may participate in a waitlisted online class. After the first week of class, if you have not been automatically enrolled into the class, you will be dropped. If you want to be added to a closed class, you must obtain permission from the instructor. Contact CU Online (https://online.cu.edu/student-support/) for assistance in contacting the instructor.

Dropping Waitlisted Courses

If you choose not to remain on a waitlist, drop the class as soon as possible. Or if you find that you have been enrolled in a class that you no longer want, drop the class as soon as possible.
Registration for Non-Degree Seeking Students

Students who have been matriculated as main campus, non-degree are eligible to enroll in classes that are offered as part of a degree program or as part of extended studies. Main campus, non-degree seeking students can register during open enrollment, which begins after enrollment periods for degree-seeking students.

Students who have been matriculated as continuing and professional education are only eligible to enroll in extended studies classes. Enrollment periods for these courses vary because not all of them meet in accordance with the regular semester. Students should check with the school or department offering the extended studies course or program for add and drop deadlines, course details, and eligibility.

Holds

A hold is a service indicator that may prevent registering for classes and receiving an official transcript and/or diploma. A hold can be placed on a student's record for a variety of reasons that may include financial, health, academic standing, required documentation, and advising. Students can view holds in UCDAccess. These holds should be resolved in a timely manner. Students should contact the appropriate department identified in the hold details to get these holds addressed.

Candidate for Degree

You must be registered for at least one course during the semester in which you take the comprehensive exam, defend your dissertation or thesis, or present your final project. If you are not registered for any other courses, you must register for CAND 5940 Candidate for Degree. You may only register for this course once.

To register for CAND 5940 Candidate for Degree (you may not be registered for any other courses) obtain the class number from your department or program director. You will be billed at one credit hour of resident tuition plus the CU-SIS fee and the information technology fee. Students registered for CAND 5940 Candidate for Degree will be considered full-time for financial aid and enrollment verification purposes.

Special Registrations

Auditing

To qualify as an auditor for fall, spring or summer semester, a student must be 21 years of age or older or approved by the Registrar’s Office. Auditors may not be registered for any other University of Colorado courses during the time they are auditing. Auditors are not eligible to audit courses if they are under suspension from the university or have outstanding financial obligations to the university.

The Registrar’s Office does not keep any record of courses audited; therefore, credit for these courses cannot be established. Auditors may attend as many courses as they wish (except those courses with laboratories or where special equipment is used), provided they have received permission from each instructor.

An auditor’s card is issued by the Bursar’s Office after classes begin. An auditor’s card is non-refundable. Auditors, whether resident or nonresident, pay for three semester hours of resident tuition for all audited courses during the fall, spring and summer semester for class instruction and library privileges only. Auditors do not receive student parking privileges and are not eligible for other student services. This card should be presented to the instructor upon entering the class. For more information, contact the Bursar’s Office (p. 46).

Intercampus Enrollment with Other CU Campuses

The Intercampus Enrollment Program is open to all CU Denver degree seeking students who are currently enrolled in CU Denver courses. This program helps students fulfill degree requirements so that they may graduate in a timely manner. Students who wish to utilize this program and enroll in courses at the Boulder or Colorado Springs campus concurrently, must meet with their Academic Advisor from their School/College at the Home (Denver) Campus to confirm that the course taken at a Host Campus is equivalent to the course needed to graduate, and to ensure that all required prerequisites/requisites are fulfilled.

ActiveCU Denver degree seeking students may be eligible for enrollment in up to two (2) courses or six (6) credit hours, whichever is greater, at another CU campus, by submitting the Intercampus Enrollment and Policy Form to the Registrar’s Office prior to the Add Deadline date of the Host Campus (Boulder/Colorado Springs). The Intercampus Enrollment and Policy Form can be obtained by accessing the CU Denver Registrar’s Office website (https://www.ucdenver.edu/registrar/student-resources/forms/).

If you are a student using VA Education benefits Chapter 33 (Post 9/11 GI Bill), you should NOT use the Intercampus Enrollment Program if you want your enrollments at a sister campus covered. Contact your VMSS Certifying Official to go over your options.

If you are a student using VA Education benefits Chapters 30, 31, 35 and Chapter 1606, you are ELIGIBLE to use the Intercampus Program and your courses will be covered under the Intercampus Enrollment Program billing policy.

Students who wish to utilize this program must meet the following requirements for eligibility:

- Must be currently enrolled in at least one (1) course at their home campus during the term in which they are seeking enrollment at CU Boulder/CU Colorado Springs.
- Students must have their Academic Advisor confirm that all requisites have been met by the student prior to enrollment in the requested Intercampus course(s).
- Courses requested through the Intercampus Enrollment Program must be Main Campus courses. Continuing Education courses are not eligible under any circumstance.
- Some Undergraduate & Graduate Students may be exempt from Home campus enrollment if seeking a degree in the following programs at the campus listed:
  - Applied Mathematics (PhD) - Boulder, Denver
  - Architecture & Planning, (PhD) - Boulder, Denver
  - Civil Engineering, (PhD) - Boulder, Denver
  - Computer Science (MS & PhD) - Boulder, Denver
  - Education Administration (All Careers) - Denver
  - Electrical Engineering - Boulder, Colorado Springs, Denver
  - Geography (MA) - Boulder, Colorado Springs
  - Master of Engineering - Boulder, Colorado Springs, Denver
  - Mechanical Engineering - Boulder, Denver
Enrollment and the dropping of Intercampus Enrollment course(s) can only be performed by the student's Home Campus Registrar's Office.

Students enrolled for course(s) at a Host Campus are responsible for requesting the adding and/or dropping of courses within the host campus's deadlines, published on the Host Campus Academic Calendar.

Any questions regarding this program should be directed to the "Home Campus" Intercampus Enrollment Coordinator within the Registrar's Office.

To review the policy in full, please click here ([https://www.cu.edu/ope/aps/](https://www.cu.edu/ope/aps/)) and search policy number 8002.

**Lifelong Learners Program**

Area residents who are 60 years of age or older may attend classes at the University of Colorado Denver on a non-credit/non-tuition basis during the fall and spring semesters.

Note: Each academic department/unit may have its own policy regarding your acceptance into a specific class. Senior citizens may take any course (offered at the Downtown Campus) listed in the online course schedule except: courses which require laboratory or special equipment use, computer courses, courses offered through the Division of Extended Studies, courses with additional fees, CU online courses, or Anschutz Medical campus courses, and intensive and/or module courses (i.e. Maymester, six-week, or hybrid).

Acceptance into a class will be determined by the instructor, based on space availability, and the previous level of education obtained by the senior citizen student. Participants may register for classes beginning on the first day of class. The last day to register for a class via the Lifelong Learners Program is the second Friday after classes begin. Submissions after this day will not be reviewed. A limit of two courses may be taken per semester.

Note: The instructor is not required to review written or oral exams, or assignments.

For more information about this program, please visit the Lifelong Learners webpage ([https://www.ucdenver.edu/lifelong-learners/](https://www.ucdenver.edu/lifelong-learners/)).

**Grading, Credits, and Exams**

For more information about Grading, Credits, and Exams, please refer to the links below.

- Credits and Grading (p. 65)
- Explanation of Course Numbers (p. 67)
- Explanation of Semester Hours (p. 67)

**Credits and Grading**

The following grading system and policies have been standardized for all academic units of the university.

**Grade Symbols**

The instructor is responsible for whatever grade symbol (e.g., A, B, C, D, F, I or IP) is to be assigned. Special symbols (NC and W) are indications of registration or grade status and are not assigned by the instructor. Pass/fail (e.g. P+, P, F) designations are not assigned by the instructor but are automatically converted by the grade application system, as explained under “Pass/Fail Procedure.”

</tbody>
</table>

**Explanation**

- Students who wish to request a course be graded on a pass/fail basis (or to revert from pass/fail to graded status) may do so up until the tenth week of the term for 16-week fall or spring session, or until the withdraw deadline of the eight-week or five-week fall or spring session, or summer session.

- Up to 16 semester hours of course work may be taken on a pass/fail basis and credited toward the bachelor's degree. Only six hours of course work may be taken pass/fail in any given semester. **(Note:** Individual schools and colleges may have additional
restrictions as to pass/fail credits. See the specific school/college specific policy.)

3. Instructors will not be informed of pass/fail registration. All students who register for a pass/fail appear on the regular class roster, and a normal letter grade is assigned by the professor. When grades are received in the Registrar’s Office, those registrations with a pass/fail designation are automatically converted by the grade application system. Courses taken pass/fail will be included in hours toward graduation. Grades of C- and above convert to P+. Grades of D+, D, and D- convert to grades of P. Pass grades (P+ and P) are not included in a student’s GPA. An F grade in a course taken pass/fail will be included in the GPA.

4. Pass/fail registration records are maintained by the Registrar’s Office.

5. Exceptions to the pass/fail regulations are permitted for specified courses offered by the School of Education & Human Development, the extended studies programs and study abroad programs.

6. Graduate degree students can exercise the pass/fail option for undergraduate courses only. A grade of P+ or P will not be acceptable for graduate credit to satisfy any degree requirement.

Students who register for a course on a pass/fail basis may not later (after the stated deadline) decide to receive a letter grade.

To request the P+/P/F grading scale, students must complete and submit the pass/fail form (https://www.ucdenver.edu/registrar/student-resources/forms/).

Notes:
- Effective Summer 2023 courses that were previously graded on the basis of Pass/Fail (P/F) are now graded with Satisfactory/Unsatisfactory (S/U). This is based on faculty approval of APS 1025 in May 2022. Students still have the option to use the P+ grading system (P+/P/F) by student selection for elective courses up to the maximum allowed by their program.
- In the event of a transfer, the receiving institution may not accept a P+ grade for transfer credit.

No Credit

Students may register for a course on a no-credit basis. Up until the tenth week of the term, for 16-week fall or spring sessions, or until the withdraw deadline of the eight-week or five-week fall or spring session, or summer session. No grade or credit is awarded but full tuition and fees will be charged. The transcript reflects the name of the course taken and a N/C notation.

Incomplete Grade

An I is an incomplete grade. Policies with respect to I grades are available in the individual college and school dean’s offices.

An I is given only when students, for reasons beyond their control, have been unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given.

The instructor who assigns an I sets the conditions under which the course work can be completed and the time limit for its completion. The student is expected to complete the requirements by the established deadline and not retake the entire course.

It is the instructor’s and/or the student’s decision whether a course should be retaken. If a course is retaken, it must be completed on the Denver Campus or in extended studies classes. The student must re-register for the course and pay the appropriate tuition.

The final grade, if retaking the course, does not result in deletion of the I grade on the original course from the transcript. A second entry is posted on the transcript to show the final grade for the new attempt.

At the end of one year, I grades for courses that are not completed are changed to an F.

Good Academic Standing

Degree Seeking Students

Students at the University are expected to maintain progress in their degree program, as defined by being in “good academic standing.” Good academic standing requires minimally a cumulative grade point average (GPA) of 3.0 on all University of Colorado course work.

Non-degree Seeking Students

Continuation as a non-degree graduate student is contingent upon maintaining an overall GPA of 3.0.

Failure to maintain the required average will result in a non-degree student being suspended. The suspension is for an indefinite period of time and becomes part of the student’s permanent record at the university. While under suspension, enrollment at the university is restricted. For more information contact the dean’s office of the school/college you are enrolled in.

Final Grades

Final grades are available approximately within one week after the end of the semester and can be accessed by logging into the UCAccess portal or by ordering an official transcript. If a final grade is not reflected on the transcript, contact the Instructor of the course.

By default, all of our instructors award letter or incomplete grades. Click here (https://www.ucdenver.edu/registrar/student-resources/grades/) for more information regarding Grades at CU Denver.

GPA Calculation

GPA is computed by multiplying the credit points per hour (for example, B = 3) by the number of semester hours for each course. Total the hours, total the credit points and divide the total points by the total hours.

Grades of P+, P, NC, S, U, ***, W, IP, and I are not included in the GPA. I grades that are not completed within one year are calculated as F in the GPA.

If a course is repeated, all grades earned are used in determining the GPA. Grades received at another institution are not included in the University of Colorado GPA.

Undergraduate, graduate and non-degree graduate GPAs are calculated separately. Enrollment in a second undergraduate or graduate program will not generate a second undergraduate or graduate GPA.

Students should refer to their academic dean’s office for individual GPA calculations as they relate to academic progress and graduation from their college or school.
Sample GPA Calculation

<table>
<thead>
<tr>

</table>

Total of 15 credit hours with 44 credit points, so 44/15 = 2.930 GPA

Explanation of Course Numbers

- Courses numbered 1000-2999 are considered lower-division undergraduate.
- Courses numbered 3000-4999 are considered upper division undergraduate.
- Courses at the 5000 level and above are graduate.

Explanation of Semester Hours

The University of Colorado Denver follows a semester term system with a standard-based academic calendar for the purposes of Title IV financial aid delivery. Semesters typically include 15 weeks of instruction, in addition to one finals week and one break week in the Fall and Spring semesters. Summer sessions are typically less than 15-weeks, but adhere to the policy in terms of contact hours and the amount of work required. Sessions within the semester term may also be scheduled for certain academic programs (for example, variable length sessions) that have a shorter number of weeks.

The University of Colorado Denver is on a semester credit hour system. A credit hour is the numeric measure of the instructional, research and/or other academic work over the length of a semester, and the value of a unit is calculated based upon standard semester credit hour formulas. A credit hour includes a combination of instructional contact time and out-of-class student work.

For every semester credit hour enrolled, students should expect to spend a minimum of 750 minutes in class and a minimum of 100 minutes spent on school work outside of class (approximately 50 minutes of instructional time per week and between one to two hours of school work outside of class).

Transcripts

The official transcript includes the complete undergraduate and graduate academic record of courses taken at all campus locations or divisions of the University of Colorado. It contains the signature of the registrar and the official seal of the university.

Official transcripts with posted grades for any given semester are available approximately one week after final exams. A transcript on which a degree is to be recorded is available approximately six weeks after final exams.

For Denver Campus students, transcripts may be ordered through the online ordering portal by visiting www.ucdenver.edu/transcripts (http://www.ucdenver.edu/transcripts/).

Colorado law allows domestic students with a past due balance to send their transcript to a school or employer only. Students can contact the Registrar’s Office for further instructions. International students that have a past due balance to the university will not be granted a transcript.

Transcripts are prepared when a student submits an order online. The official PDF transcript is delivered within 24 hours, and mailed transcripts are processed within one business day. Rush service is available and processed within one business day.

Glossary of Terms

Academic Calendar

The Academic Calendar represents important semester-specific dates and deadlines for students officially registered for courses.

Census

Last day of the semester for students to drop full term classes with a financial adjustment. Student schedule adjustments after this date may lead to adjustments to financial aid/awards package, Department of Veteran Affairs education benefits, or other eligibility benefits that are dependent upon enrollment status. Class drops or withdrawals may impact immigration status for international students. A "W" grade appears on the transcript when courses are dropped after the published Census date.

Credit or Semester Hour

The unit of measurement for college credit. For each credit hour earned, students spend a minimum of 750 minutes in class and a minimum of 100 minutes spent on school work outside of class. Credit hours may also be referred to as "hours", "units", or "credits."

College or School

An individual degree-granting unit within the University.

At CU Denver, there are seven undergraduate school and colleges:

- Architecture and Planning
- Arts and Media
- Business
- Education and Human Development
- Engineering, Design and Computing
- Liberal Arts and Sciences
- Public Affairs

All of which are part of the University of Colorado Denver. Regardless of what school or college a student has been admitted to, they are a CU Denver student.

Course Drop

Dropping one or more courses, but not all, within a specific term prior to census. Dropped courses are not reflected on the student’s transcript.

Course Withdrawal

Dropping one or more courses, but not all, within a specific term after census. When students withdraw from a course, the course earns a grade of “W” which will be reflected on the student’s transcript, but does not affect a student’s GPA.
Full Time/Part Time Enrollment
To be a full time graduate student, you must be registered for at least 5 credits. Part time enrollment is anything below 5 credits. Full time/part time status does not relate to how many days per week you come to campus for classes. Full time/part time status is defined differently for graduate students.

Grades
Please see the Grading System (http://catalog.ucdenver.edu/cu-denver/undergraduate/records-registration/grading-credits-exams/grading-system/) section of the catalog for more information.

Grade Point Average
The grade point average (GPA) is calculated by multiplying the credit hours for the course by the points for the letter grade, totaling all the credit points and dividing them by the number of credit hours included. Pass grades and no-credit courses are not included in a student’s GPA.

Student’s University of Colorado GPA will not include courses that have been taken at other institutions prior to enrollment at the University of Colorado. The GPA for graduate students includes all courses taken as a graduate student. This includes all grades for courses taken more than once.

Hold
A hold is a service indicator that prevents various services which may include registering for classes, receiving an official transcript and/or diploma, and requesting an enrollment verification. A hold can be placed on a student’s record for a variety of reasons that may include financial, health, academic standing, required documentation, and advising. Students can view holds in the UCDAccess student portal. Students should contact the appropriate department to resolve the hold in a timely manner.

Incomplete Grade
Policies with respect to "I" grades are available in the individual school dean’s offices. Use of the "I" is at the discretion of the course instructor and/or the academic dean’s office. Please see the Grades definition for more information.

Independent Study
An academic experience created collaboratively with a faculty member. A student and a faculty member would decide the work to be produced, the hours dedicated to the study, the outcomes for the experience, and the credits earned for the study.

Requisites
Prerequisites
A course that needs to be taken prior to registration for the next course in the designated sequence.

Co-requisites
A course(s) that must be completed concurrently, in the same semester, with another course. Some schools and colleges may allow students to complete co-requisites before enrolling in a concurrent course.

Restrictions
Restricted to a specific population (i.e. Restricted to MUSC majors, Restricted to junior standing, etc.).

Repeat
A course students may have re-enrolled in after completing the same course with a D- or higher. If a student has already earned credit for a course and chooses to re-enroll in the same course, the student usually will not earn credit again. Some courses are repeatable for credit up to a limit set by the school or college (“special topics” courses where the topics differ, private music lessons, or musical performance courses).

Semester/Term Withdrawal
Dropping all courses within a specific semester or term. When students withdraw from all courses, each course earns a grade of “W,” which will be reflected on the student’s transcript, but does not affect their GPA. A term withdrawal note is also reflected separately on the transcript.

Transcript
An official record of courses taken and grades earned.

Waitlist
A term commonly seen during registration periods. Students hoping to enroll in a full class can opt to be placed on a waitlist. This essentially saves a place in line in case spots open up from registered students dropping.

Waitlist Purge
The process of removing all students from the waitlist according to the date defined on the Academic Calendar.
Schools, Colleges, and Departments
Denver Campus
With a solid academic reputation and award-winning faculty, the Denver Campus offers Graduate programs through seven distinct academic units.

- Business School (p. 73)
- College of Architecture and Planning (p. 168)
- College of Arts & Media (p. 225)
- College of Engineering, Design and Computing (p. 236)
- College of Liberal Arts and Sciences (p. 311)
- School of Education & Human Development (p. 534)
- School of Public Affairs (p. 658)
**Graduation**

**General Graduation Requirements**

To receive a bachelor’s degree from the University of Colorado Denver, students must satisfy all of the requirements below, in addition to completing a Major (http://catalog.ucdenver.edu/cu-denver/undergraduate/programs-a-z/) and fulfilling all of their School or College requirements (see links below).

Please note that the requirements below are basic university requirements. Consult your School/College and Major to determine whether they have put additional requirements in place that further restrict these categories.

- A minimum of 120 credit hours is required to graduate from CU Denver with a bachelor’s level degree
- A minimum 2.000 cumulative GPA is required for all University of Colorado coursework
- Satisfactory completion of the CU Denver Core Curriculum (an 11 course, 34-38 semester hour curriculum of general education, outlined here (http://catalog.ucdenver.edu/cu-denver/undergraduate/graduation-undergraduate-core-requirements/#cudenvercorecurriculumtext))

**Repeat Statement**

Though students may take any course more than once, credit toward graduation is counted only once for a typical course, unless otherwise noted in the course description. Some types of courses (e.g. Internships, Independent Studies, etc.) may be repeatable for applicable credit within a certain range of total semester hours. See course descriptions for the max semester hours applicable from each course.

**Residency Requirement**

The Higher Learning Commission (HLC), which accredits this university, requires that at least 30 of the 120 credits earned for a baccalaureate degree be taken in residence at the University of Colorado Denver. Students are advised that individual schools/colleges may have higher residency requirements.

**School/College Specific Graduation Requirements**

- College of Architecture and Planning (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-architecture-planning/#graduationrequirementstext)
- College of Arts & Media (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-arts-media/#graduationrequirementstext)
- College of Engineering, Design and Computing (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-engineering-design-computing/#graduationrequirementstext)
- College of Liberal Arts and Sciences (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/#graduationrequirementstext)
- School of Education and Human Development (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-education-human-development/#graduationrequirementstext)
- School of Public Affairs (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-public-affairs/#graduationrequirementstext)

**Petitioning for Exceptions to Standing Academic Policy**

The Office of the Registrar does not have a specific policy regarding petitions for exceptions.

**School/College Specific Policy**

- College of Arts & Media (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-arts-media/#graduationrequirementstext)
- School of Education and Human Development (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-education-human-development/#graduationrequirementstext)
- College of Liberal Arts and Sciences (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/#policiestext)

**Selection of Catalog for Degree Requirements**

When a student is matriculated and enrolled at CU Denver, they are required to fulfill the general education and graduation requirements specified in the catalog current at that time. When students formally declare a major, they are required to fulfill the major requirements in the catalog current at that time.

**School/College Specific Policy**

- College of Arts & Media (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-arts-media/#graduationrequirementstext)

**Applying for Graduation**

Students planning to graduate must apply for graduation through the UCDAccess student portal between the first day of registration and census for the term they intend to graduate. Students must contact their academic advisor to determine what requirements remain for graduation, as well as complete any paperwork required by their school/college. Students will not be officially certified to graduate until a final audit of the student’s record has been completed approximately six weeks after the end of the term. After students have been certified to graduate, they must reapply with the Office of Admissions in order to return to the Denver Campus.

To review the official policy, please click here (https://www.ucdenver.edu/policies/) and search for policy number 7017.

**School/College Specific Policy**

- College of Architecture and Planning (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-architecture-planning/#graduationrequirementstext)
- College of Arts & Media (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-arts-media/#graduationrequirementstext)
• School of Education and Human Development (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-education-human-development/#graduationrequirementstext)
• College of Engineering, Design and Computing (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-engineering-design-computing/#graduationrequirementstext)

Commencement Ceremony
In early March, informational brochures will be mailed to students eligible to participate in the May spring-semester commencement. In early October, information regarding the December commencement will be mailed to students who graduated in summer term or expect to graduate in fall term. Information will be provided about registering for the ceremony, renting a cap and gown, and ordering diploma frames, announcements, and other memorabilia. This information is also available on the Commencement website (https://www.ucdenver.edu/commencement/).

Academic Honors
Dean’s List
CU Denver uses fixed criteria across all schools/colleges for determining eligibility for the Dean’s List. This policy applies to undergraduate students.

For fall and spring semesters, students must successfully complete nine graded hours in the semester. These courses can be both within and outside of the student’s home school/college. Metropolitan State University of Denver pooled courses will not be included in the GPA calculation nor will they apply toward the nine hours required for consideration. The GPA for inclusion in the Dean’s List is 3.750.

In the summer semester, students must complete six graded hours. Course inclusion will be the same as in fall and spring semesters. The GPA for Dean’s List in summer is also 3.750.

Scholarships tied to Dean’s Lists may have additional requirements.

The Registrar’s Office calculates the semester GPAs that are the basis for determining the Dean’s List. Incompletes will not be considered in the calculation of minimum number of hours. The Dean’s List will not be recalculated to include completed incompletes.

College Honors
School/College Specific Policy
COLLEGE OF ARTS & MEDIA (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-arts-media/#graduationrequirementstext)
BUSINESS SCHOOL (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/business-school/#graduationrequirementstext)
SCHOOL OF EDUCATION AND HUMAN DEVELOPMENT (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/school-education-human-development/#graduationrequirementstext)
COLLEGE OF ENGINEERING, DESIGN AND COMPUTING (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-engineering-design-computing/#graduationrequirementstext)
COLLEGE OF LIBERAL ARTS AND SCIENCES (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/#policiestext)

Departmental Honors
School/College Specific Policy
COLLEGE OF LIBERAL ARTS AND SCIENCES (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-liberal-arts-sciences/#policiestext)

University Honors
University Honors is awarded at the time of graduation to students who successfully completed the University Honors and Leadership Program (https://www.ucdenver.edu/honors/).

Class Rank
Class rank will be calculated by undergraduate degree program within a school or college. It is possible for more than one student to have the same class rank. If more than one student has equivalent class ranking it will be reported as such. The option for a letter indicating the student’s class rank will be provided to any graduating undergraduate, but there will be no designation on the University of Colorado transcript for Denver Campus students receiving bachelor’s degrees. There will be one class rank per student per degree. Students can obtain class rank letters through the student portal. Late postings and grade changes after degrees are posted will not recalculate rankings. Rankings will be a snapshot calculation conducted once per term for each graduating undergraduate student after degrees are posted.

Four-Year Graduation Guarantee
The University of Colorado Denver has adopted a set of guidelines to define the conditions under which an undergraduate student will be guaranteed to graduate in four years. More information is available through the undergraduate advising offices for each college and the major program offices. The Denver Campus has five undergraduate colleges in which this guarantee applies: College of Arts & Media, Business School, College of Engineering, Design and Computing, College of Liberal Arts and Sciences and School of Public Affairs.

CU Denver guarantees that if a student begins studies in a fall semester and lack of scheduling of essential courses is found to have prevented a student from completing all course work necessary for a BA, BFA or BS degree from the university by the end of the student’s eighth consecutive fall and spring semester, the college/school shall provide tuition plus
any course fees for all courses required for completion of the degree requirements. This applies only when needed courses are not offered by the college/school and does not apply to scheduling conflicts for individual students. Students must satisfy all the requirements described below to be eligible for this guarantee.

This guarantee applies to all students who enroll beginning in a fall term as first-semester, full-time freshmen without admission deficiencies, who do not need remedial course work and who satisfy all the requirements described below. This guarantee does not include completion of all options within the major, a second major, a double degree, a minor or a certificate program. The four-year graduation guarantee does not apply to programs in which the degree has been discontinued or is in the process of being phased out. In these cases, every effort will be made to allow students to fulfill requirements by taking courses at other universities and colleges to facilitate timely completion of the degree.

Some study abroad programs may not provide a sufficient range of courses to allow students to meet the requirements, thus, students who participate in study abroad programs during the fall or spring semesters may not be eligible for this guarantee. A student may be able to participate in a study abroad program during the summer semester and still meet all the requirements of this guarantee. It is essential that a student work closely with an advisor to determine if the student can participate in a study abroad program and still meet all the requirements of this guarantee.

### Requirements

**Students must satisfy all of the following requirements to be eligible for this guarantee.**

1. Students must begin studies in a fall semester and enroll in CU Denver course work as specified on the student plan of study for eight consecutive fall and spring semesters.

2. Students must complete all required course work by the end of the eighth semester.

3. No fewer than 60 semester hours of applicable course work must be completed successfully by the end of the second year (24 calendar months); 90 semester hours by the end of the third year (36 calendar months); and 120 semester hours by the end of the fourth year (48 calendar months). Students must successfully complete an average of 15 semester hours each semester.

4. Students must meet with their college advisor and their major advisor for academic advising during the first, third, fifth and seventh semesters of study.

5. The major must be declared no later than the end of the first semester of study and students must not change their major or any options within the major.

6. A required plan of study toward the major must be agreed upon and signed by the student and advisor at the end of the first semester. Thereafter students must make satisfactory progress toward completing the major, as defined by each major, and the general education requirements. Courses with certain grades may not meet the satisfactory progress requirement of this guarantee. A statement of what constitutes satisfactory progress and what grades are acceptable is available from the major or departmental office at the time the major is declared.

7. A minimum of 30 semester hours of college general education courses should be completed by the end of the second year, including core curriculum courses that also meet major requirements and foreign language proficiency.

8. All lower-division graduation requirements must be successfully completed by the 90-semester-hour mark.

9. Students must remain in good academic standing according to their school/college academic policies.

10. Grades of C-, C or C+, as defined by the college/school, must be earned in all course work required for the major, and students must have a cumulative GPA of 2.000 in all major course work attempted.

11. Students must register each semester within one week of the student’s specified eligibility to register.

12. Students must take courses that are specified in the student plan of study approved by their advisor.

13. Elective courses must be avoided if they conflict with required major or general education courses. Elective courses must not be given a higher priority than required courses.

14. Students must meet all departmental, school or college and university policies regarding graduation requirements.

15. The college/school must be notified in writing of the student’s intent to graduate no later than the beginning of the seventh semester of study. A graduation application must be filed no later than the deadline for the appropriate graduation date. The student must complete a graduation checkout/senior audit with their advisor.

The student is responsible for and must keep documentation proving that these requirements were satisfied (e.g., records of advising meetings attended, advising records and instructions, etc.).

Graduate: 303-315-8110

Overview

Located in the heart of the Rocky Mountain business community, the Business School at the University of Colorado Denver prepares students with the knowledge and skills necessary to become effective, responsible business professionals. We’re able to achieve a standard of excellence by bringing together nationally recognized faculty and highly motivated, mature students in an intellectually challenging academic environment. CU Denver’s Business School is a research institution. Because our faculty are nationally recognized for scholarly research as well as for their teaching skills, our students have the opportunity to be on the leading edge of business management theory and practice. Our class schedules and curriculum offer flexibility to meet your needs whether you plan to attend full or part time, day or evening. Whether you’re an experienced working professional seeking an advanced degree or preparing for a new career in the business world, you’ll gain the knowledge and perspective necessary to succeed in today’s challenging business environment.

Educational Goals

The Business School is committed to superb teaching, connecting theory to practice that focuses on:

- current and relevant knowledge and skills necessary for success in the highly competitive global business environment
- experience in cooperative and team-based work skills
- integrated professional and functional expertise
- sensitivity to cultural and ethnic diversity

Our graduate programs serve both traditional and nontraditional students who have extensive work experience. The MBA serves the needs of students who desire a general business education. The professionally oriented MS degrees serve the needs of students who desire greater specialization, particularly students who have already obtained an undergraduate business degree. Large numbers of our graduate students will be drawn from national and international locales.

Our undergraduate program, which serves both traditional and nontraditional students, leads to a baccalaureate degree in business with a liberal arts component. The program is closely linked, through articulation agreements, to lower-division programs offered by Colorado’s four-year and community colleges.

Key elements of our academic programs are the provision of top-quality career advising and placement services, as well as flexible schedules and programs to meet a wide range of student needs. We are committed to assisting our students’ efforts to pursue rewarding careers.

Faculty

Our nationally recognized faculty members are vigorous and enthusiastic about teaching and research. Faculty members hold degrees from the nation’s leading business schools, including Berkeley, Harvard, Stanford, University of Chicago, University of Pennsylvania, UCLA and Yale. Many of them also bring years of valuable experience in private industry. Their interdisciplinary expertise, academic achievements, scholarly research and business experience provide students with a dynamic learning environment.

Scholarships and Financial Aid

Many programs for financial aid are administered by the Office of Financial Aid (p. 46). Call 303-315-5969 or visit us in-person on the first floor of the Student Commons Building, for detailed information.

Thanks to the generous support of the Colorado business community and others, the Business School has a significant number of scholarships to offer its students. Scholarships are awarded on the basis of merit and/or financial need. The amount of the award and the number of awards available vary.

Over 30 different scholarships are available to eligible Business School students, with multiple awards from most scholarships.

Further information about these scholarships, including eligibility criteria and application forms, may be obtained by visiting the Financial Aid & Scholarships website (https://www.ucdenver.edu/student-finance/scholarships/), by calling 303-315-5969, or by viewing scholarship information on the Business School website (https://business.ucdenver.edu/).

Study Abroad

Transfer credit from study abroad programs requires prior written approval from the Assistant Dean. Students must meet with a business staff advisor to determine course acceptability prior to the semester in which they intend to study abroad. Information on the various programs is available at the Office of International Affairs (p. 43).
Institute for International Business
CU Denver’s Institute for International Business (IIB) was created in 1988 by the Board of Regents of the University of Colorado to serve as a center for the advanced study and teaching of international business (IB). The US Department of Education designated the IIB as a Center for International Business Education and Research, a prestigious center of excellence award that it has competitively held since 1993. CU Denver is one of only 15 CIBERs in the United States and the only one in Colorado. Among others, the IIB/CIBER promotes interdisciplinary and multi-campus collaboration at the University of Colorado; hosts monthly International Executive Roundtable lectures focused on global competitiveness; and sponsors IB development programs, conferences and workshops for faculty and the business community in Colorado, the Rocky Mountain region and the United States. The IIB/CIBER works closely with CU Denver’s Business School in advancing its international business programs and research, as well as other colleges, schools, and departments at CU to promote various internationalization initiatives. Call 303-315-8887 or visit the IIB website at www.ucdenver.edu/institutes/international-business (http://www.ucdenver.edu/institutes/international-business/) for more information.

Academic Programs
A carefully designed curriculum to prepare students for success in business administration is available for the student seeking either an undergraduate or graduate degree. The school offers courses leading to the bachelor of science in business administration (BSBA), master of business administration (MBA), and the master of science (MS) degrees.

As an undergraduate student, it is possible to pursue two major simultaneously or consider a major and a minor.

It is possible to pursue two graduate degrees simultaneously, such as an MBA and an MS, or two MS degrees, through our dual degree programs (p. 74). In addition to the programs in the Business School itself, we partner with other university departments to offer college programs in MS finance and risk management/economics and the MBA in combination with graduate programs in architecture, bioengineering, economics, political science, urban planning and the MD.

Graduate Business Programs (MBA/MS)
Associate Dean: TBD
E-mail: bschool.admissions@ucdenver.edu

The Business School offers programs leading to the master of business administration and the master of science in specific fields of business.

The MBA, executive MBA, MS and BS degrees in business are accredited by AACSB International, the Association to Advance Collegiate Schools of Business. The health administration MBA degree is also accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). In addition, the accounting programs have earned a separate AACSB International accreditation.

For a list of graduate business programs, see Program Curricula (p. 77) below.

Master of Business Administration Programs
The master of business administration (MBA) program provides a general background in management and administration. This background enables the student to have the breadth of exposure and depth of knowledge required for an advanced-level management career. The program is devoted to developing the concepts, analytical tools and communication skills required for competent and responsible administration of an enterprise viewed in its entirety, within its social, political and economic environment.

The professional MBA program allows the scheduling of classes with maximum flexibility so students can progress through the program at their own pace, by taking as little as one class per semester or possibly up to five classes per semester, at times that are convenient to their work schedule. The program can be completed in as little as 16 months or as long as five years.

Online and hybrid courses add additional flexibility. Students may complete all degree requirements online, or combine online, hybrid, and campus courses to fit a business travel schedule or personal learning style. All the core courses are offered online in the fall and spring terms, with limited online offerings in the summer semester. Your choice of online and hybrid electives and specializations is limited.

The MBA program is also available in different configurations: One Year (full time, see relevant section), fully online, health administration and the executive MBA (see relevant section). All MBAs have the same curriculum requirements; they differ only in their focus, the choice of electives, the flexibility of course scheduling and the time required to complete the program. The One Year and executive MBAs are lockstep programs, where all the students complete all program requirements together. No course transfers, waivers or substitutions are permitted in the lockstep programs.

For a list of MBA programs, see Program Curricula (p. 77) below.

Master of Science Programs
Master of science degrees (MS) are offered in the fields of accounting, business analytics, finance and risk management, global energy management, information systems, international business, management, marketing and Taxation. (Note, we are not accepting applications for the MS in Taxation during the 2022-2023 academic year.)

The MS degree affords the opportunity for specialization and depth of training within a particular field. The specialization and expertise developed within the MS program prepares the student for more specialized staff positions in industry, the nonprofit sector and government.

The course requirements for the MS degree in each of the fields are divided into different components - graduate core and elective requirements. The graduate core and elective courses require at least 30 semester hours of graduate-level coursework.

No comprehensive exams are required.

For a list of graduate MS programs, see Program Curricula (p. 77) below.

Dual Degree Programs
Dual degree program options within the Business School include:

• MBA/MS (p. 131)
• MS/MS (p. 137)
• MBA/MD (p. 132)
Executive Programs

Executive MBA

Faculty and Resources
The Executive MBA (EMBA) faculty are drawn from senior Business School faculty and regionally and nationally recognized faculty from other universities. Our EMBA faculty are also noted for their practical managerial experience and a demonstrated ability to work with executive and managerial level students. Concierge level services are provided to all students to include: registration for classes, purchase of all textbooks, graduation application and payment services. Students are also provided with professional career counseling and development services by a third party vendor.

Admission Requirements
The Executive MBA program is designed for experienced business professionals who have 8 to 10 years’ experience in a decision-making position. In the selection process, significant attention will be given to the depth and breadth of the candidate’s experience, progression in job responsibility, total work experience and the ability to benefit from this integrative classroom/work environment. The admissions committee will base its decision on the application, former academic record, relevant test scores if applicable, the employer’s nominating letter, other letters of recommendation and a personal interview.

Executive MBA in Health Administration

FACULTY AND RESOURCES
Faculty are nationally recognized, and all possess both practical managerial experience and a demonstrated ability to work effectively with executive-level students. Faculty are comprised of University of Colorado Denver Business School faculty and nationally recognized experts from academia and industry. Concierge level services are provided to all students to include: registration for classes, purchase of all textbooks, graduation application and payment services. Students are also provided with professional career counseling and development services by a third party vendor.

ADMISSION REQUIREMENTS
The Executive Health MBA program is designed for health-care professionals who have 5 or more years’ experience in healthcare. In the selection process, significant attention will be given to the depth and breadth of the candidate’s experience, progression in job responsibility, total work experience and the ability to benefit from this integrative classroom/work environment. The admissions committee will base its decision on the application, former academic record, relevant test scores if applicable, the employer’s nominating letter, other letters of recommendation and a personal interview.

Extend Your Education
Whether you are looking to advance in your current field or prepare for an entirely new career, the Business School offers opportunities to meet your goals.

A variety of classes and programs are available to community members and alumni. Classes are taught by expert faculty or influential members of the Denver business community, imparting knowledge that is readily applicable in the field.

Entrepreneurship
The Jake Jabs Center for Entrepreneurship offers programs for those looking to start a new venture or enhance their entrepreneurial skills. See the college website for more information.

Certificate Specialization Programs
Modern career paths are flexible, so it’s beneficial to have a flexible degree. If you already have a graduate business degree from an AACSB accredited school, the CU Denver Business School allows you to add specialized knowledge through our post-graduate certificates. See the college website for more information.

Business School Admissions Information

Application Deadlines
Graduate
Fall
• Domestic applications April 15
• International applications March 15

Spring
• Domestic applications October 15
• International applications September 15

Summer
• Domestic applications February 15
• International applications January 15

Applications received after these dates may not be eligible for scholarships.

One Year MBA – fall admit only.
• Domestic Applicants = Round One – December 15, Round Two – February 15, Round Three – April 15, Round Four – May 31.
• International Applicants = Round One – December 15, Round Two – February 15, Round Three – April 15, Round Four – May 15.

Requirements for Admission to the MBA and MS Programs

Admissions/Advising
Persons contemplating graduate study are encouraged to learn about admission and program requirements by scheduling an appointment.
with our recruiting staff or attending one of the regularly scheduled prospective student information meetings. Call 303-315-8110 to schedule an appointment.

Admission to the graduate programs in business is granted only to students showing high promise of success in graduate business study. Admission is based on the following indicators of the candidate's likelihood to succeed in the program.

**Academic Record**
The bachelor's degree must be earned from a regionally accredited university. The total academic record is considered, including the GPA, the course of study, and the quality of the program.

**Required Testing**
GMAT waivers are available on a case-by-case basis and can be requested while completing the online application. However, the GMAT or GRE may be required for admission consideration for any applicant who does not qualify for a GMAT waiver. The GMAT or GRE is administered at numerous centers throughout the world.

For more information about the GMAT, please visit [www.mba.com](http://www.mba.com/). The code numbers for CU Denver’s graduate business programs are as follows:

- MBA: MPB-OG-78
- One Year MBA: MPB-OG-65
- MS: MPB-OG-75
- PhD: MPB-OG-29

GMAT waivers are available on a case-by-case basis and can be requested while completing the online application. GMAT waivers are primarily considered based on a previous graduate degree and/or considerable work experience. Students may submit a GMAT or GRE score for any of the graduate degree programs, but the decision to accept the GRE is on a case by case basis. If you have not taken either the GMAT or the GRE, we strongly recommend the GMAT. Other graduate admission exams such as the MCAT and LSAT may also be considered, but, some programs will not accept either. See individual program information for specifics. The MS in Business Analytics program does not accept the LSAT or MCAT in place of the GMAT or GRE without extensive verifiable evidence of the student's prior mathematical preparation and coursework. For more detailed information on admissions requirements, phone the graduate programs office 303-315-8211 or email them at: bschool.admissions@ucdenver.edu.

**Work Experience**
While we do not require work experience, a record of appropriate employment at increasing levels of responsibility is considered a positive indicator of the likelihood of successful completion of graduate work. A resume must be submitted with the application materials.

**Background Requirements**
Students applying for graduate programs in business do not need an undergraduate degree in business. The MBA program is specifically designed so that the required courses cover the material needed for completion of the degree. There are no prerequisites needed to start the MBA program. Students with non-business backgrounds have completed the program successfully. However, applicants for some of the MS degrees may be required to take background or common body of knowledge business courses, depending on the individual's academic background. For more detailed information on which background courses may be needed refer to the individual program information in this catalog or on our website, or phone the graduate programs office to schedule an appointment with a graduate academic advisor, 303-315-8110 or email the advisors at: grad.advising@ucdenver.edu.

It is expected that students have an adequate level of personal computer proficiency in a word processing and spreadsheet software, as well as a good working knowledge of basic algebra and English grammar.

**Letters of Recommendation**
Some programs require letters of recommendation while others do not. Please see individual graduate program details for specifics.

**The Admission Process**
Mailing address for applications:

Graduate Admissions
The Business School
University of Colorado Denver
Campus Box 165, P.O. Box 173364
Denver, CO 80217-3364

Students seeking admission to the One Year MBA, MBA with an emphasis in health administration, or executive programs should consult with the relevant catalog sections for additional application criteria or requirements.

**Domestic Application Requirements**
- Complete parts I and II of the application for graduate admission and the four essay questions.
- Have required GMAT or GRE scores sent directly to the graduate business admissions office from the testing centers. The code for CU Denver’s graduate business programs are as follows:

  - MBA: MPB-OG-78
  - One Year MBA: MPB-OG-65
  - MS: MPB-OG-75
  - PhD: MPB-OG-29

- Have one official transcript (not student copies) mailed directly from each school, college, and university ever attended past high school. Transcripts must be sent even if credit course work completed was not part of a degree program or was taken after an undergraduate degree was earned.
- Résumé
- Application fee: $50 for domestic applicants/$75 for international applicants for the MBA or MS programs. Personal interviews are not required, except for the One Year MBA and the MBA in health administration. You will be contacted to schedule the interview.

**Deadlines.** To be considered for admission, applicants for graduate programs must submit all materials prior to the following dates:

**Fall**
- Domestic applications April 15
- International applications March 15

**Spring**
- Domestic applications October 15
- International applications September 15
Summer

- Domestic applications February 15
- International applications January 15

The One Year MBA option only admits students each fall. The application deadline for the One Year MBA are the following.

- International Applicants = Round One – December 15, Round Two – February 15, Round Three – April 15, Round Four – May 15.

Business School Admissions Information

Early applications are encouraged because, if admitted, the student receives priority for registration time assignment. Applications received after published deadlines with complete supporting documentation, scores, fees and transcripts will be considered; however, those students may not meet scholarship deadlines and in some cases, course availability is limited for the later applicants.

International Application Requirements
See International Students (p. 44).

Business School Policies

General Academic Policies

Academic policies that apply to all students at CU Denver are described in the Office of the Registrar website and in the Academic Policies (p. 39) and University Policies (p. 29) sections of the catalog. The policies outlined on the following pages are relevant for both undergraduate and graduate students in the Business School. Individual policies appropriate only to undergraduate or graduate students are described under separate headings. Each student is responsible for knowing and complying with the academic policies and regulations established for the school. The school cannot assume responsibility for problems resulting from a student’s failure to follow the policies stated in this catalog. Similarly, students are responsible for all deadlines, rules and regulations stated on the student portal.

Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery, falsification of official records and similar acts or any attempt to engage in such acts are grounds for suspension or expulsion from the university. In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as the student’s own. It is recommended that students consult with the instructors as to the proper preparation of reports, papers, etc., to avoid this and similar offenses. Also, actions that disrupt the administrative process, such as misrepresentation of credentials or academic status, other forms of deception or verbal abuse of university staff are grounds for suspension or probation. All discovered acts of dishonesty must be referred to the Business School’s Internal Affairs Committee.

Admission to Business Courses

Enrollment in business courses is limited to students who have been admitted to business degree programs and to other students as described in the separate undergraduate and graduate policy sections. The course registration criteria are designed to meet a number of objectives:

- to assure access to business courses for students admitted into a business degree program
- to serve students in other colleges who have business-related education objectives or requirements
- to serve nondegree students who have specific career or education goals

Refer to the student portal (https://login.ucdenver.edu/signin.html) each term for course availability and prerequisites.

Attendance Regulations

Students are required to attend classes, including online classes, on a regular basis. Absences must be arranged with the instructor and must conform with university and instructor policies on attendance. When possible alert your instructor prior to the absence.
Prerequisites
Students are expected to know and fulfill all prerequisites when registering. Prerequisites are in place for the benefit of the student. The Business School wants our students to have the best experience in their courses, and having the prerequisites for a course ensures that you are ready for the material that will be covered. See course listings in the schedule planner for relevant prerequisites as many are strictly enforced. The Business School reserves the right to administratively drop students who enroll without the correct prerequisites. This action may result in the loss of tuition.

Course Numbering
The course numbering system used at CU Denver identifies the class standing required for enrollment. Students are expected to take 1000-level courses in their freshman year, 2000-level courses in their sophomore year, 3000-level courses in their junior year and 4000-level courses in their senior year. Courses at the 5000 and 6000 level are restricted to master’s-level business students, and courses at the 7000 level are restricted to PhD students.

Adding Courses
Per the university academic calendar, students may add courses to their original schedule through the census date (first 16 days of the fall or spring regular semester; first eight days of the fall or spring semester – 8 week sessions and the summer session). The Business School may reduce this time frame for all, or specific, courses to ensure academic success in our curriculum. Instructor and Dean's signature is required to add a business course after census date for regular semester. No option to add a course after census date for 8-week session courses.

Dropping Courses
Students may drop a course through the census date (first 16 days of regular semester and the first 8 days for an 8-week course) and it will not appear on the transcript and tuition will be refunded. After census, and through the 10th week of a regular semester a student who wishes to drop a course may do so through the student portal without instructor or dean signatures. The course and a grade of W will appear on the transcript. There will be no tuition refund for courses dropped after Census. Beginning the 11th week of a regular semester, a student who wishes to drop must obtain written approval from both the instructor and assistant dean or designate. The course and a grade of W will appear on the transcript and full tuition is charged. In order to drop after the 10th week, it will also be necessary to document circumstances beyond a student’s control and complete the appropriate late withdrawal petition form. Any student who is failing a class will not be allowed to drop simply because of their grade. See the academic calendar (https://www.ucdenver.edu/registrar/) for deadlines and costs involved and for drop information for other terms. Contact the advising offices for the forms needed to drop after the 10th week of the regular semester terms.

For 8-week courses:
Students may drop a course through the census date (first eight days of an 8-week session) and it will not appear on the transcript. After census, and through the 5th week of an 8-week session course a student who wishes to drop a course may do so through the student portal without instructor or dean signatures. The course and a grade of W will appear on the transcript and full tuition is charged. See the academic calendar (https://www.ucdenver.edu/registrar/) for deadlines and costs involved and for drop information for other terms.

Withdrawal
See the Office of the Registrar (http://catalog.ucdenver.edu/cu-denver/graduate/registration-records/) chapter of the catalog and website for university-wide withdrawal policies. Note that after the 10th week of the regular semesters or the 5th week of the 8-week sessions, the Business School normally requires instructors’ signatures on withdrawal forms before the assistant dean’s approval is granted. If a Business student is dropping all courses in a particular semester, the student must complete a petition to withdraw form and submit to the assistant dean or designate for signatures. It will also be necessary to document circumstances beyond a student’s control with the petition.

Administrative Drop
The school reserves the right to administratively drop students who are incorrectly enrolled in business courses. While we do our best to administratively drop students prior to the census date to avoid tuition charges, time may not always allow for that timeline and tuition charges may apply.

Note that students who never attend class are not automatically dropped from the course. The student is responsible for dropping courses and failure to do so will result in a tuition charge for the class and an “F” grade.

Appeal Procedure
Students may contact an advisor in the Business School’s programs office (303-315-8110) for appeal and petition procedures pertaining to rules and regulations of the school.

Student Complaint/Grade Appeal Process
Students must follow the process below.

1. Discuss concerns with the faculty member.
2. If the issue is not resolved after a conversation with the faculty member, discuss concerns with the Discipline Director
3. If the issue is not resolved after a conversation with the Discipline Director, discuss concerns with the Associate Dean.

The Discipline Director and Associate Dean will evaluate the student complaint to see if the faculty or staff member behaved in accordance with Business School and University policies and will communicate any decisions related to the complaint to both the student and faculty member involved.

If the student complaint is related to grading, the Associate Dean or Discipline Director will not offer opinions with respect to the qualitative assessment of a student’s work but, may consider whether the procedures used to determine a grade were consistent with the syllabus and written amendments to the syllabus. No passing grade will be changed after one year. Requests for grade adjustments/appeals must be made in the semester immediately following the semester in which the disputed grade was earned.

General Grading Policies
For undergraduate students pursuing a BSBA, a 2.0 cumulative GPA in both campus and Business courses must be achieved to graduate. If the required cumulative GPAs are not maintained, the student will be placed on academic probation. While on probation, the student will need to follow the guidelines outlined by campus and the Business School in order to continue their education. Contact an advisor for details. The
students. It is recommended that all students meet and/or email with advising when they are assigned. A hold is placed on accounts of all newly admitted MS Accounting students. Newly admitted MS Accounting students must meet with an advisor to complete the coursework. Advising may also be done via Navigate or call 303-315-8110. Advising may be done via Navigate or call 303-315-8110. 

Academic Policies for Graduate Students Advising
After being admitted, students are encouraged to schedule an appointment with a graduate advisor to discuss degree requirements. To schedule an appointment students may go online through Navigate or call 303-315-8110. Advising may also be done via email, grad.advising@ucdenver.edu.

Newly admitted MS Accounting students must meet with an advisor to ensure their registration meets degree requirements. It is recommended that all students meet and/or email with a graduate advisor throughout their program to ensure the correct sequencing of courses and that degree requirements are met.

Course Load
The normal course load for full-time graduate students is 9-12 semester hours. However, because many students are also pursuing a career, it is possible to attend classes on a part-time basis by enrolling in 3-6 semester hours. For financial aid purposes, 5 semester hours of graduate study is considered full time during the fall and spring terms and 3 semester hours for the summer term. Graduate courses are scheduled primarily in the evening or online to accommodate work schedules.

Transfer of Credit
Upon approval of the program specific director, a maximum of 12 semester hours of graduate business course work may be transferred to the MBA and 9 semester hours for the MS degrees (9 semester hours for each the MBA and MS degree for a dual MBA/MS degree program). Note: 1. For the MS in business analytics only 6 semester hours may be transferred into the program and 2. For the MBA-Health Administration program transfer credit must be from an AACSB and/or CAHME accredited institution depending on the course. Courses must have been taken from another AACSB accredited graduate school of business or one of the top 200 universities in the country and courses must have been completed within the last five years with a grade of at least B (not B-). No transfer courses will be accepted if they have been used to satisfy degree requirements of a previously awarded degree. Graduate business courses taken at other University of Colorado Business Schools are considered transfer hours and are subject to the following credit limits:

- For the MBA, 21 credits can be accepted from CU Boulder or UCCS
- For MS, up to 15 credits can be accepted from CU Boulder or UCCS

Transfer of quarter hours of graduate business credit may satisfy a course requirement, but may not satisfy the total number of hours required. One-quarter hour equals .667 semester hour.

Transfer to Another Business School Program
Because admission standards vary between degree programs, students who wish to transfer from one CU Denver Business School degree program to a different Business School degree program must meet the admissions standards for the program they wish to apply. There are no automatic transfers between programs and admission into one program does not guarantee admission into another program. Also, graduation from one program does not guarantee admission into another program because the admissions standards vary between programs.

Time Limits
Master’s students are required to complete all degree requirements within five years (seven years to earn dual MBA/MS or MS/MS degrees). Courses completed outside of these time limits will not be accepted toward the degree without an approved petition. Time-limit extensions are given only for external situations that restrict a student’s ability to complete the program in a timely manner. If you do not take graduate business courses for more than three consecutive semesters, you will need to reapply for admission and meet the admission standards in place for the new application term. Prior coursework will need to meet degree requirements in place at time of readmission, along with the above referenced time limits. Petitions may be submitted, noting that submission of a petition does not guarantee approval.
Former Students

Any Denver campus graduate student who has not been enrolled in his or her admitted program of study for three consecutive semesters (summers included) is considered a former student and must reapply for admission to the program by submitting part I of the application for graduate admission, in-state tuition classification form, along with the applicable fee. Readmitted students must conform to degree requirements in effect during the term in which they are readmitted. If the new requirements differ significantly from the former degree plan, a petition may be submitted requesting exceptions.

Graduation

Students must apply for graduation through UCD Access (student portal) when they register for their last semester. Contact the graduate advising office with questions at grad.advising@ucdenver.edu.

Grade Point Average Requirements

A minimum cumulative graduate business GPA of 3.0 must be achieved and maintained for courses taken toward a graduate business degree. All CU Denver graduate business courses, regardless if the coursework pertains to the current degree and including courses taken as a graduate non-degree seeking business student, are computed in the graduate business cumulative GPA. Transfer hours and grades from other institutions and/or from University of Colorado courses taken on the Boulder Campus, Colorado Springs Campus, or the Anschutz Medical Campus, are not computed in the business GPA. However, degree credit may be awarded for those transfer courses through a petition process. If the required cumulative GPA does not meet the minimum requirement of 3.0 or higher when degree course requirements have been met, the student will be placed on academic probation. Academic probation will only be offered at that time if the student can mathematically achieve the required 3.0 cumulative GPA by taking up to an additional 9 semester credits of coursework by petition. If after that probation period, including any of the completed, additional 9 semester credits, the student is still not at the required 3.0 GPA to graduate, the Business School cannot confer the degree.

Probation and Suspension

If after completing 9 semester hours a student’s cumulative graduate business GPA falls below 3.0, the student will be placed on academic probation. If the student achieves that required cumulative GPA, they are cleared from probation and may continue with our programs. Failure to achieve the required GPA within the program requirements may result in suspension for one year. If suspended, students may not attend any campus of the University of Colorado including continuing education/extended studies. Students on suspension may petition for readmission to the school after waiting a minimum of one year from the term in which they were suspended. Any suspended student readmitted to the school will be placed on continued probation status to monitor required progress. To be considered for readmission, a petition form plus a new graduate application part I and in-state tuition classification form must be submitted along with the appropriate fee. Generally, petitions are granted only on rare occasions. Re-admitted students must meet any new admission requirements that may be in place. Prior coursework may no longer be applicable if program requirements have changed. In addition, if a student cannot mathematically achieve the required 3.0 cumulative GPA with the remaining required courses, the petition to return will not be approved.

PASSING GRADES

Any grade below a C (2.0) is a failing grade for graduate students (C is passing; C-, D+, D, D- and F are failing). Graduate students must repeat a required course for which they have received a grade below a C. Both the original grade and the grade for the repeated course count in the computation of the business GPA. If a grade lower than a C is earned in an elective course, the student may repeat that course or select another course. NOTE: C is a passing grade, while C-, D+, D, D- and F are failing grades.

REPEATING GRADUATE BUSINESS COURSES

A failed course (any grade below a C such as C-, D+, D, D- or F) must be repeated if it is a required course. Both the original and the repeated grade will remain on the student’s transcript and both grades will be calculated into the students cumulative GPA. A course in which a grade of C or better is obtained may not be repeated. Graduate business courses repeated without approval may not be used in the graduate business GPA calculation.

Drop/Withdrawal

Classes dropped prior to census date will not appear on the transcript. Thereafter, to drop after census date, with a grade of W, a student must be earning a grade of C or better; otherwise, an F will appear on the transcript. Students will not be permitted to drop a course or withdraw from all courses after the 10th week of the regular semester or the 5th week of the 8-week sessions, unless circumstances outside the student’s control are documented. The late request to drop or withdraw must be approved by the assistant dean and the course instructor(s). If a student requests to drop a course after the 10th week of the regular semester or the 5th week of the 8-week sessions solely due to a failing grade, the request will be denied. Requests to drop after the 10th week of the regular semester or the 5th week of the 8-week sessions must include a petition explaining the reason for the late drop.

Registration for Graduate Business Courses

Students admitted to graduate business degree programs have priority for graduate business course registration. Nondegree students and graduate students from other University of Colorado schools or colleges may be permitted to attend on a space-available basis by meeting the qualifications and submitting a nondegree application form. (See the college website for the form.) Some graduate-level (6000-level) courses may be offered simultaneously with undergraduate 4000-level courses. However, most 6000-level courses are reserved exclusively for graduate business students.

Accounting (ACCT)

ACCT 5939 - Internship (1-3 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.

ACCT 6015 - Accounting for the Public Interest (3 Credits)
Applies accounting knowledge and concepts in a not-for-profit organization. Student volunteers help with functions or special projects and are supervised by both faculty members and personnel from the agency to which they are assigned. Note: This class is rarely offered. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with ACCT 4915. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6020 - Auditing Theory (3 Credits)
Focus on the professional responsibilities of CPAs, generally accepted auditing standards, and PCAOB auditing standards, with emphasis on the theory underlying the development of standards, objectives and procedures. Students cannot receive credit for both ACCT 4620 & ACCT 6020. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 6030 or ACCT 6031 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4620. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6030 or ACCT 6031. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring.

ACCT 6024 - Advanced Financial Accounting (3 Credits)
Advanced financial accounting concepts and practices with an emphasis on accounting for equity investments, business combinations, and foreign currency. Prereq: ACCT 3230 or ACCT 6030 or ACCT 6032 each with a grade of C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4240. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 3230 or ACCT 6030 or ACCT 6032 each with a grade of C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring.

ACCT 6025 - Auditing Practice (3 Credits)
Focus on the application of generally accepted auditing standards and PCAOB auditing standards to practice. Emphasis on procedures used by CPAs to gather and document audit evidence. Prereq: ACCT 6020 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Students cannot receive credit for both ACCT 4625 and ACCT 6025. Note: A grade of C or higher must be earned to receive credit for the CPA license. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6031 - Intermediate Financial Accounting I (3 Credits)
This course is designed to provide students with a comprehensive review and understanding of financial accounting principles, procedures, and financial statements as well as the measurement of income and assets. Skills related to problem solving, analytical thinking, and writing will also be developed. Note: Students who have taken ACCT 3220 (or equivalent) may not receive credit for ACCT 6031. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
ACCT 6032 - Intermediate Financial Accounting II (3 Credits)
Continuing the intensive coverage of financial accounting from ACCT 3220/ACCT 6031, this course covers concepts of financial accounting theory and generally accepted accounting principles not covered in 3220/6031. This typically includes detailed coverage of liabilities and equity, especially the topics of leases, deferred taxes, pensions and stock-options. Note: A grade of C or higher must be earned to receive credit for the CPA license. NOTE: Students who have taken ACCT 3220 (or equivalent) may not receive credit for ACCT 6032. Prereq: ACCT 6031 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 3230. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6033 - Advanced Managerial Accounting (3 Credits)
Critical analysis of advanced topics in managerial accounting. Note: This class is rarely offered. Prereq: ACCT 3320. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6054 - Accounting Information Systems (3 Credits)
This course focuses on the analysis, design, implementation and control of accounting information systems. Emphasis is placed on primary business processes including documentation, modeling, retrieving information to support managerial decisions and controlling risks. Topics include transaction cycles, relational database modeling, data analytics and information systems risks and controls. Must earn a grade of C or better to qualify for graduation at the UB level and to receive credit for the CPA license. Prereq: ACCT 6031 or BUSN 6550 or department consent.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4054. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6070 - Intermediate Cost Accounting (3 Credits)
Cost accounting links financial and managerial accounting and emphasizes communication between accountants and managers. Topics include managerial uses of cost data for decision making, analysis of activities and cost behavior, the role of accounting in planning and control, and computer-assisted decision modelling. Note: A grade of C or higher must be earned to receive credit for the CPA license. Note: STUDENTS WHO HAVE TAKEN ACCT 3320 (or equivalent) MAY NOT TAKE THIS COURSE. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 3320. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6080 - Accounting for Government and Nonprofit Organizations (3 Credits)
Nonprofit Organizations. Planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting and fund accounting. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 3220 or BUSN 6550 or ACCT 6031 each with a C or higher, or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4800. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 3220 or BUSN 6550 or ACCT 6031 each with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6140 - Fundamentals of Federal Income Tax (3 Credits)
Typically Offered: Spring.

ACCT 6150 - Taxation of Business Entities (3 Credits)
Typically Offered: Fall, Spring.

ACCT 6160 - Advanced Taxation (3 Credits)
This course is designed to provide a comprehensive understanding of the wide ranging responsibilities of the Controller, including the timely and accurate preparation of the periodic financial statements, maintenance of an adequate records system, a comprehensive set of internal controls and budgets in order to manage and mitigate risk, how to enhance the accuracy of the company's reported financial results and ensure compliance with GAAP or IFRS. Topics also include techniques for cash forecasting, controlling and administering budgets, and developing effective long-range plans. Prereq: ACCT 6030 or ACCT 6032 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6030 or ACCT 6032. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
ACCT 6225 - Controllership: Managerial Strategy and Benefits Analysis (3 Credits)
This course is designed to provide a comprehensive understanding of the wide-ranging responsibilities of the Controller from a managerial and tax accounting perspective. Topics include establishing a cost accounting system, planning and control of manufacturing costs, business and strategic planning, mergers and acquisitions and a variety of tax-related issues such as employment tax, employee vs. contractor, and choice of entity. The course will also include a discussion of benefits analysis, stock-based compensation, ISO, NSQSO and 83b elections. Prereq: ACCT 6220 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6220 with a grade of C (2.0) or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA or NBD within the Business School.

ACCT 6230 - Advanced Topics in Mergers and Acquisitions (3 Credits)
Mergers and acquisitions are often a key component of organizational strategy for growth and competitive advantage; yet empirical studies indicate many of these transactions fail to meet their intended objectives. This course prepares accounting students as financial leaders to positively influence the achievement of planned synergies and acculturation for more successful M&A transactions. Integrating perspectives from accounting and organizational development, course topics include transaction valuation, contingent consideration, and asset impairment testing to organizational systems theory and post-transaction integration. Prereq: Grade of C (2.0) or higher in ACCT 6020 or ACCT 4620 and ACCT 6070. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA or MBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Grade of C (2.0) or higher in ACCT 6020 or ACCT 4620 and ACCT 6070 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA or MBA within the Business School.

ACCT 6250 - Seminar: Financial Accounting (3 Credits)
Nature and origin of accounting theory and the development of postulates, principles and practices. Methodology appropriate to development and evaluation of accounting theory, with special emphasis on accepted research standards and procedures. Note: A grade of C or higher must be earned to receive credit for the CPA license. Coreq: ACCT 6032 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA or MBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: ACCT 6032. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA or MBA within the Business School. Typically Offered: Fall, Spring.

ACCT 6260 - Seminar: Managerial Accounting (3 Credits)
Focuses on the conceptual foundations of managerial accounting. Behavioral and quantitative approaches regarding information for decision making, planning, control, performance evaluation and other issues are investigated. Note: A grade of C or higher must be earned to receive credit for the CPA license. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ACCT 6280 - Accounting Ethics (3 Credits)
This course examines the ethical responsibilities of accounting professionals from a personal and professional perspective, including examples of ethical dilemmas accounting professionals confront. The course utilizes various authoritative codes of conduct, professional standards and applied ethical theory as ethical guidance for auditors, accountants, tax professionals, and accounting management. A variety of case studies are employed to give students practice in developing a decision making approach in dealing with difficult ethical scenarios. Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA or MBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA or MBA within the Business School.

ACCT 6282 - Capitalism, Accounting and Ethical Choices (3 Credits)
Examines the development of the U.S. economy from 1850 to today with emphasis on the ethics of accounting, capitalism, and government controls. Prereq: ACCT 2220 or BUSN 6550 (not strictly enforced).
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School.

ACCT 6285 - Accounting and Finance for Sustainability (3 Credits)
Topics in accounting and finance related to business sustainability include the merits and challenges of a triple-bottom-line perspective, mandatory and voluntary reporting, environmental liability measurement and disclosure, emissions trading, green investments, shareholder activism, microfinance, and socially responsible investing. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School.

ACCT 6290 - Management Control Systems (3 Credits)
Focuses on the design and use of control systems which ensure that people in organizations behave consistently with the organizational goals. Controls for communication, motivation and performance evaluation (along with informational requirements) are stressed through analysis of cases and classroom discussion. Note: This class is rarely offered. Prereq: BUSN 6550 or equivalent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of MBA within the Business School.
ACCT 6320 - White Collar and Financial Crimes (3 Credits)
Course provides an opportunity to examine criminal activity perpetrated by individuals and/or organizations in a position of trust. White collar and financial crimes are qualitatively different from street crimes or violent crimes, yet they are highly destructive. Cover: types of crime, social impact, prevention, detection, regulating etc. Prereq: BUSN 6550 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6550 with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6330 - Fraud Auditing (3 Credits)
This course provides an introduction to and guidance for creation of an effective fraud audit program in core business systems. The fraud audit is designed specifically to detect potential fraud and is vastly different than the traditional audit. Fraud auditing focuses on proven fraud methodology that allows auditors to discover fraud versus investigating it. The course: • Explains how to create a fraud audit program • Shows auditors how to locate fraud through the use of data mining • Focuses on proven methodology for detecting fraudulent transactions • Explores fraud discovery within specific corporate F&A functions, such as disbursement, procurement, payroll, revenue misstatement, inventory, journal entries, and management override. Prereq: ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6020 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6340 - Financial Statement Analysis (3 Credits)
Financial statements are used as an information source on which to base investment, lending potential or even employment. Designed to develop skills in using, understanding, analyzing, and interpreting financial statements and to make students aware of the value and limitations of financial statement information. Note: Should take in the third semester of the graduate program. Prereq: BUSN 6550 or ACCT 6031 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6350 - Current Issues in Professional Accounting (3 Credits)
An in-depth analysis of current issues in the accounting profession, including ethics development, and validity of standards and regulations. Prereq: ACCT 3230, ACCT 4620, ACCT 6020 or permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Typically Offered: Fall.

ACCT 6360 - Fraud Examination (3 Credits)
This course examines the theories and methods of the full spectrum of fraud examination including prevention, detection, investigation, and adjudication. In this course, students will explore the significant differences between fraud examination and auditing, going beyond detection into the investigative and adjudication process. Prereq: ACCT 6020 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6020 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6370 - International Accounting (3 Credits)
Designed to expose students to the international aspects of accounting and financial management. Includes discussion of some of the different financial accounting practices across countries; financial statement analysis in a global context, international auditing practices and procedures, international tax implications and the implications of operating within the regulations of the Foreign Corrupt Practices Act, the European Union, North American Free Trade Agreement and General Agreement on Tariffs and Trade. Prereq: BUSN 6550 or equivalent. Note: Students cannot receive credit for both ACCT 6370 and INTB 6370. IFRS’s are reviewed and compared with the requirements of US GAAP Cross-listed with INTB 6370 and ACCT 4370. Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Typically Offered: Spring.

ACCT 6380 - Forensic Accounting (3 Credits)
An examination of investigative auditing, fraud auditing, litigation support, and economic quantification of damages. Prereq: ACCT 4620 or ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 4620 or ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6400 - Taxation of C Corporations and Shareholders (3 Credits)
This course is a study of federal income tax problems facing corporations and corporate shareholders. The course addresses introductory corporate tax issues found in Subchapter C of the Internal Revenue Code, including defining a "corporation" for federal income tax purposes; tax consequences associated with the formation of a corporation; taxation of corporate operations (including an analysis of the differences that exist between earnings and profits, dividend distributions and taxable income); corporate redemption transactions; partial liquidations; complete liquidations; and the acquisition, sale and disposition of corporate entities in transactions governed by Sections 336(e) and 338 of the Internal Revenue Code. Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Typically Offered: Fall.
ACCT 6410 - Advanced Tax for Individuals (3 Credits)
This course is an advanced federal income tax course stressing the use of the Internal Revenue Code, Treasury regulations, case law, and administrative guidance to resolve federal income tax issues affecting individuals. Topics include items of gross income inclusion, exclusions, deductions, items of non-recognition, characterization of income, and tax rates. Prereq: Grade of C or higher in ACCT 6140 or ACCT 4410. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Grade of C or higher in ACCT 6140 or ACCT 4410. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Typically Offered: Spring.

ACCT 6442 - Accounting: Professional Research and Communications (3 Credits)
This course provides students with a structured approach to researching and communicating practice-oriented financial accounting, auditing, and tax-related issues. After completing this course, students should be able to effectively: (1) Communicate (both oral and written) solutions to practice-oriented financial accounting, auditing, and tax-related issues. (2) Navigate through U.S. and international accounting, auditing, and tax authorities. (3) Conduct systematic research for all types of accounting-related problems then reach and communicate efficient conclusions using a variety of techniques. Prereq: ACCT 6030 or ACCT 6032 or ACCT 3230 each with a grade of C or higher, or department consent. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with ACCT 4442. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ACCT 6030 or ACCT 6032 or ACCT 3230 each with a grade of C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6450 - Tax Research (3 Credits)
This course provides a study of various methodologies used in tax research and tax planning and requires students to present their results through various forms of business communication. In particular, this course explores techniques (with an emphasis on electronic/on-line techniques) for locating and researching judicial cases, statutory materials and legislative histories, and administrative materials promulgated by the Internal Revenue Service applicable to tax-related issues and problems. Students must present their tax research results for various client-based hypothetical factual patterns in written formats, including memoranda and client letters, and through individual oral and group presentations. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ACCT 6030 or ACCT 6032 or ACCT 3230 each with a grade of C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

ACCT 6470 - Internal Auditing (3 Credits)
Intro course for business students and CIA candidates. Topics include: IA fundamentals; IA standards; internal controls; managing the IA department; IA working papers, procedures and evidences; fraud detection and prevention; ethics; evaluation of the IA function, and Sarbanes-Oxley Act of 2002. Prereq: ACCT 4620 or ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ACCT 4620 or ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

ACCT 6480 - Partnership Taxation (3 Credits)
This course focuses on fundamental tax issues relating to partnerships and partners arising from the formation, operation, and liquidation of partnerships. Course work includes an examination of pertinent federal income tax returns of a partnership. Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ACCT 6150 with a grade of C or higher. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA or CPA within the Business School.

ACCT 6490 - Experiential Learning (3 Credits)
Designed to provide practical knowledge on developing a professional practice in accounting or financial management. Topics: Marketing, operating a professional practice. Lectures, guest speakers (if you are interested in being a guest lecturer for the class contact the instructor), and student projects. Prereq: ACCT 3220 or permission of instructor. Cross-listed with ACCT 4490. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6510 - Advanced Accounting Information Systems (3 Credits)
The course is designed to develop knowledge and skills used to understand and evaluate corporating accounting processes and systems. Focuses on financial and information system internal controls and the flow of corporate information through an accounting system. A financial system objective and risk assessment approach is used to present concepts and techniques for evaluating the adequacy of system processes and controls. Prereq: ACCT 6054 or department consent. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ACCT 6054 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Typically Offered: Fall.
ACCT 6520 - Issues in Oil and Gas Accounting (3 Credits)
The Oil and Gas Accounting course is a course designed to give students an overview of the oil and gas industry and the particular accounting issues this industry faces. The focus is on the oil and gas industry but many of the issues discussed are appropriate and applicable to all energy-related entities. This is a valuable learning experience for those interested in acquiring an understanding of the accounting issues for energy management firms in preparation for entry into public accounting. The course enjoys support from the energy industry in the form of guest speakers and project ideas. Prereq: ACCT 3220 or permission of instructor. Cross-listed with ACCT 4520. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Hours: 8 Credits.

ACCT 6620 - Seminar: Auditing and Other Assurance Services (3 Credits)
A graduate seminar course providing in-depth exposure to specialized topics in auditing and other assurance services, with an emphasis on recent developments in the profession. Includes coverage of generally accepted auditing standards and PCAOB standards. Note: A grade of C or higher must be earned to receive credit for the CPA license. Prereq: ACCT 6020. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ACCT 3220.
Typically Offered: Spring.

ACCT 6800 - Special Topics (3 Credits)
Research methods and results, special topics and professional developments in accounting. Consult the current ‘Schedule Planner’ for semester offerings as new special topics courses are frequently added. Prereq: Varies according to topics and instructor requirements. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ACCT 6840 - Independent Study (1-8 Credits)
Permission of instructor required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6950 - Professional Certification in Accounting (3 Credits)
This course will prepare students for the Uniform Certified Public Accountant Examination, including the Auditing and Attestation (AUD), Business Environment and Concepts (BEC), Financial Accounting and Reporting (FAR), and Regulation (REG) sections. Topical coverage will include a balance of most-tested topics, difficult topics, and exposure to topics not addressed in required accounting degree courses. Note: there will be a materials fee of $1,100 for this course. All materials will continue to be available until successful passage of the CPA Exam. Note: Undergraduate Accounting students typically perform better in this class when taking it during the final semester prior to graduation. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

ACCT 6959 - Internship/Cooperative Education (3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Prereq: 15 semester hours for MS students and 21 hours for MBA students and a cumulative 3.2 GPA. Repeatable. Max Hours: 9 Credits.

ACCT 6950 - Master's Thesis (1-8 Credits)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Additional Information: Report as Full Time.

Business Analytics (BANA)

BANA 5939 - Internship (1-3 Credits)
Repeatable. Max Hours: 9 Credits.

BANA 6610 - Statistics for Business Analytics (3 Credits)
Provides a conceptual overview of statistical thinking and its applications to business problems. Topics include descriptive statistics, data exploration, probability, inferential methods, regression analysis, classification, regression with high dimensional data, etc. Students gain hands-on experience with data analytic problems via projects using real business settings and data. Restriction: Restricted to MS BANA majors within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to BANA-MS students within the Business School.

BANA 6620 - Computing for Business Analytics (3 Credits)
Introduces database and modeling software used by business analytics professionals. Includes querying relational databases, state-of-the-art statistical freeware, and modeling software. Students learn to obtain, organize, and store data needed for analytics projects, undertake data cleansing for big data tasks, and conduct statistical data visualization. Restriction: Restricted to BANA-MS students within the Business School. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to BANA-MS students within the Business School.
BANA 6630 - Time-Series Forecasting (3 Credits)
Time series analysis is critical to industries such as finance, marketing, retail, and accounting. This course introduces time-series models with emphasis on their practical applications in business. The goal is to show how dynamic financial and economic data can be modeled and analyzed using proper statistical techniques. The topics include methods for trend and seasonal analysis and adjustment, modeling and forecasting with autoregressive moving average (ARMA) processes, and model identification and diagnostics for time series. Other subjects include volatility and state space models. This course provides hands-on experience by pairing lectures on methodology with lab sessions using R to perform real-world data analyses. If you do not meet the prerequisites you may contact the instructor for permission to register. Prereq: BANA 6610. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereqs: BANA 6610. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6640 - Decision Analysis (3 Credits)
Introduces a quantitative approach to business decision making under conditions of risk and uncertainty. Emphasis will include introductions to decision analysis theory, risk analysis, utility theory, multi-criteria decision making, Bayesian decision analysis and hierarchical structured models. Psychological issues and qualitative approaches in the decision-making process will be discussed. Student computer-assisted projects are included. Prereq: BANA 6610 or permission from instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereqs: BANA 6610. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6650 - Project Management (3 Credits)
Introduces the topic of Project Management (PM) in a business environment. Emphases will include the knowledge, skills, tools, and techniques as presented in the Project Management Body of Knowledge (PMBOK), a variety of managerial aspects commonly encountered in PM, and current extensions of PM. Projects in diverse contexts are examined. Cross-listed with URPL 6249. Restriction: Restricted to Graduate level students. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

BANA 6660 - Predictive Analytics (3 Credits)
Addresses statistical and machine-learning approaches to prediction using the very large data sets increasingly common in business applications such as internet-based business, fraud detection, credit scoring and market segmentation. Methods covered in the course include data partitioning, logistic regression, clustering, decision trees, dimension reduction, and neural networks, among others. Emphasis is placed on proper choice of method and understanding of the strengths and limitations of competing methods. Students are expected to analyze and report on a variety of data sets drawn from business application areas. If you do not meet the prerequisites listed, you may contact the instructor for permission. Prereq: BANA 6610. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereqs: BANA 6610. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6670 - Prescriptive Analytics with Optimization (3 Credits)
Optimization is a key part of Business Analytics dealing with decision problems that lend themselves to modelling and analysis designed to determined optimal decisions. In this course, we’ll study methodologies for determining the best course of action in situations with a large number of alternatives, each with their own financial or other characteristics, including restrictions on our actions that must be satisfied as we search for best solutions. While the focus of the course is on modeling and solving a wide variety of optimization problems, we’ll also cover the basic mathematical underpinnings of linear programming, the most widely used form of optimization in industry and government and the foundation of many extensions into other classes of optimization. State of the art Software for solving optimization problems will be used throughout the course. Students will work in teams on a project involving optimization and some important problem. Restriction: Restricted to BANA-MS students within the Business School. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to BANA-MS students within the Business School.

BANA 6680 - Optimization for Machine Learning (3 Credits)
This course will give an introduction on numerical optimization algorithms in the context of machine learning applications. We shall discuss how optimization problems arise in machine learning and what makes them challenging. Topics include traditional nonlinear optimization, linear optimization and discrete optimization with an emphasis on effective computational techniques. We shall also talk about next generation large-scale machine learning algorithms such as stochastic gradient (SG) method. Applications to a variety of areas such as text mining and neural networks are also stressed through class projects. Problems will be solved using appropriate software tools. Prereq: BANA 6620 and BANA 6670. Restriction: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereqs: BANA 6620 and BANA 6670. Restrictions: Restricted to graduate business majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6690 - Network Modeling (3 Credits)
This course introduces network modeling. Utilizing data and metadata, programming, algorithms, statistical analysis, and visualization; networks are studied. The focus is on Business Applications to provide managerial insights and recommendations and will include transportation, social, transactional, electrical and communication networks. Prereq: BANA 6620. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BANA 6620. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
BANA 6710 - Causal Analysis (3 Credits)
This course shows how to apply causal modeling to develop robust, causally effective business policies and interventions; and quantify their impacts using realistically imperfect data under uncertain and changing conditions. Students create causal models of customer behaviors and responses to business initiatives; quantify lifts caused by campaigns; and design customer and employee policies and interventions with robust benefits despite real-world uncertainties and data limitations. Prior exposure to probability, statistics, optimization and R programming language is helpful but not essential. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

BANA 6720 - Simulation Modeling (3 Credits)
Students learn to model and analyze complex dynamic systems using state-of-the-art software. Illustrative application areas include production systems, service systems, distribution systems and health care systems. Topics include creating reliable simulation models, analyzing the input and output from the model, and managing simulation projects. A substantial part of the course will be devoted to student projects where students define, model and analyze a significant system of their choosing. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6730 - Supply Chain Analytics (3 Credits)
Introduces the design, analysis, management, and control of supply chains. Because of continuing advances in globalization, sustainability, and information technology, course emphasis will include integration of processes and systems, relationship management of upstream and downstream players, and strategies that incorporate current and future trends. Cross-listed with INTB 6730. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6740 - VBA for Business Analytics (3 Credits)
This course teaches the essentials of Visual Basic for Applications (VBA), the programming language for Microsoft Office. Focus in using VBA as a tool to automate common tasks and to create business analytic applications. Goal is to hide the details of the analytical and modeling techniques by creating user interfaces for inputs and then presenting managerially relevant results. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6750 - Large-Scale Optimization Methods for Big Data (3 Credits)
Optimization methodologies comprise one of the major components of modern business analytics. In the era of big data where problem scale is enormous, the ability to model and solve large-scale problems is increasingly important. In the first part of this course we will learn how to model and solve large scale applications by using the AMPL modeling language and solvers such as CPLEX and Gurobi. The second half of the course will be devoted to working on projects. Prereq: BUSN 6630 with a grade of “C” or better. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6630 with a grade of “C” or better Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6760 - Data Visualization (3 Credits)
The course equips the Business Analyst with foundational concepts and techniques required for telling a compelling story with large complex data sets. The importance of visualizing information for many analysts is often overlooked or downgraded as a natural product of the analytics or model but if the visualization is ineffective the decision making processes and knowledge discovery will be compromised. This is a project-based course that begins with reviewing concepts of human perception and cognition and perceptual accuracy and preferences. In the weeks we have together we will explore the basics of graphic design and making a “good” graph, explore why some data visualizations present information effectively and others do not, and we will also consider visualization as a component of systems for the Data Scientist and Business Analyst and presents examples of EDA (exploratory data analysis), visualizing time, networks, and maps. We end by reviewing methods and tools for static and interactive graphics. Tableau or other cutting-edge software will be utilized. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6770 - Evaluative Analytics (3 Credits)
Introduces principles of design of experiments (DOE), multivariate trials, randomized control trials (RCTs), A/B testing, and multi-armed bandit (MAB) optimization to evaluate and improve business processes, CRM and HR policies, and marketing campaign design and performance. Students learn to design evaluation studies and analyze data to critically evaluate and improve business process design and targeting, timing, content, context, and channel decisions to increase employee and customer satisfaction and long-term value (LTV). Note: Prior exposure to probability, statistics, and R is helpful but not essential. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.
BANA 6780 - AI for Business (3 Credits)
BANA 6780 introduces current artificial intelligence (AI) and machine learning (ML) technology, together with business use cases and AI/ML technology strategy for managers. Students learn how a variety of companies, from Netflix to electric utilities, apply modern AI/ML techniques to predict and manage customer demand, preferences, experiences, and behaviors; improve business processes and KPIs; automate and optimize routine business decisions; and develop more successful business strategies. Take-home software labs and demos enable students to experiment with recommendation engines, Bayesian probabilistic inference systems, pattern recognition and predictive analytics, natural language processing (NLP), anomaly detection, causal inference, and optimization and coordination of plans and decisions over time and within teams and organizations of AI agents. Students apply these AI/ML techniques to business strategy and use cases and present their analyses in a written report. Prereq: This course is intended to be self-contained. Previous experience with AI/ML or applied probability and statistics and R are helpful but not essential. Restriction: Restricted to graduate majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
Typically Offered: Spring.

BANA 6800 - Special Topics (3-12 Credits)
A number of different current topics in business analytics are discussed in this course. Consult the current schedule for semester offerings. Prereq: Permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6840 - Independent Study (1-6 Credits)
Instructor approval is required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BANA 6910 - Business Analytics Practicum (3 Credits)
Students apply business analytics methodologies to a real-life business problem in cooperation with a local organization. Under the supervision of faculty, students engage in problem definition, analysis and solution. Results are presented in oral and written form to the sponsoring organization. Because the practicum is a capstone course, it is not appropriate for students just beginning the program. Prereq: Will vary depending upon the particular topic (consult the schedule of classes). Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

Business (BUSN)

BUSN 5939 - Internship (1-3 Credits)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BUSN 6520 - Leading Individuals and Teams (3 Credits)
Students learn the strengths and weaknesses of their management style and how to work effectively with individual differences. Students also learn how to form teams around purpose/task, diagnose problems and identify and implement solutions by utilizing leadership skills such as setting goals, processes and measures, interpersonal communication, motivation and conflict management. Students develop an understanding of the effect of the organizational and social context on the behavior of individuals and teams. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

BUSN 6521 - Leading Individuals and Teams (3 Credits)
Students learn the strengths and weaknesses of their management style and how to work effectively with individual differences. Students also learn how to form teams around purpose/task, diagnose problems and identify and implement solutions by utilizing leadership skills such as setting goals, processes and measures, interpersonal communication, motivation and conflict management. Students develop an understanding of the effect of the organizational and social context on the behavior of individuals and teams. The emphasis is on health care issues and is intended for health care students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

BUSN 6530 - Data Analytics for Managers (3 Credits)
Provides an overview of statistical and machine learning techniques for visualizing data, developing multivariate models to explain and control variation, and predicting outcomes. Methods covered in the course include exploratory data analysis, multiple linear regression, decision trees, and time-series forecasting. The emphasis is upon application of these techniques to business problems. Students are required to analyze data and present their analyses in written or oral form. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.
BUSN 6540 - Legal and Ethical Environment of Business (3 Credits)
Students develop a working knowledge of legal and ethical parameters for business decision making. The course addresses the legal system and mechanisms for resolving disputes. Topics include constitutional law, torts, product liability, contracts, property law, consumer protection, intellectual property, business entities and employment law. It stresses the influence of legal issues on organizational decision making. Note: Students can substitute ENTP 6822 but credit cannot be received for both. Health Administration students must take BUSN 6541. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.

BUSN 6541 - Legal and Ethical Environment of Business (Health Section) (3 Credits)
Students develop a working knowledge of legal and ethical parameters for business decision making. Addresses the legal system and mechanisms for resolving disputes. Topics include business entities, torts, contracts, employment relationships, litigation and alternative dispute resolution. It stresses the influence of legal issues on organization and decision making. The emphasis is on health care issues and is intended for health care students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Spring.

BUSN 6550 - Analyzing and Interpreting Accounting Information (3 Credits)
Emphasizes the use of accounting statements and data in making business decisions. External financial accounting information and concepts are used for investment and credit decisions. Internal managerial accounting information and concepts are used for product costing, cost analysis and management control. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.

BUSN 6551 - Marketing Dynamics in the 21st Century (Health Section) (3 Credits)
Focuses on the formulation and implementation of a marketing plan in the context of the firm’s strengths, overall strategy and competitive environment. Emphasis is on understanding the marketing environment and on decision making skills regarding market selection, pricing, promotion, product configuration and management of distribution channels. Restriction: Restricted to HLAD and MBAH majors within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to HLAD and MBAH majors within the Business School.

BUSN 6610 - Information Systems Strategy (3 Credits)
Digital strategy is the application of digital technologies to business models to form new differentiating business capabilities. The course starts with the highlights of genesis and importance of IT in organizations, including the relationship between digital technology and competitiveness. Then, the development and management of an effective digital infrastructure are discussed. Realizing that the effective use of digital technology requires the alignment of competitive strategies, business processes, and applications, the course takes a top management perspective on the development of policies and plans that maximize the contribution of digital technologies to organizational goals. A broad overview of how systems support the operational, administrative, and strategic needs of organizations is covered. Note: Students cannot receive credit if they have taken BUSN 6810 or ISMG 6180. Cross-listed with ISMG 6180. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall, Spring, Summer.

BUSN 6620 - Applied Economics for Managers (3 Credits)
After taking this course, students should be able to apply economic principles to make optimal decisions given firm cost, demand and market circumstances. Also, they should be able to analyze the firms interactions with its competitive market environment. Students will learn basic aspects of federal macroeconomic policy designed to achieve stable prices and economic growth. Also, they will learn to understand the measurement of output (GDP), employment and prices; the conduct of monetary and fiscal policy; and the balance of trade. Coreq: BUSN 6550 or ACCT 6030 or ACCT 6031. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-req: BUSN 6550 or ACCT 6030 or ACCT 6031 Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

BUSN 6560 - Marketing Dynamics in the 21st Century (3 Credits)
This course focuses on the art, science, and practice of managing dynamic market environments and making decisions about alternative marketing strategies. Students use analytical frameworks to inform decision-making about the many specific aspects of marketing: e.g., value proposition, target markets, positioning, products, channels of distribution, pricing, communication, and service. Participants learn how to integrate these elements into a Marketing Plan. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.
BUSN 6621 - Applied Economics for Managers (Health Section) (3 Credits)
After taking this course, students should be able to apply economic principles to make optimal decisions given firm cost, demand and market circumstances. Also, they should be able to analyze the firm’s interactions with its competitive market environment. Students should understand basic aspects of federal macroeconomics policy designed to achieve stable prices and economic growth. Also, they should understand basic aspects of government regulation of business. The emphasis is on healthcare issues and is intended for healthcare students. Coreq: BUSN 6550 or ACCT 6030 or ACCT 6031 and BUSN 6530 or FNCE 6290 or BANA 6610. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-req: BUSN 6550 or ACCT 6030 or ACCT 6031 and BUSN 6530 or FNCE 6290 or BANA 6610. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Typically Offered: Spring.

BUSN 6630 - Management of Operations (3 Credits)
This course is concerned with the production and delivery of goods and services. It provides an overview of a variety of contemporary Operation Management topics using current techniques and modeling to solve and understand key issues. Basic Excel skills are required. The use of model-assisted decision making is emphasized. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
Typically Offered: Fall, Spring, Summer.

BUSN 6621 - Applied Economics for Managers (Health Section) (3 Credits)

Typically Offered: Fall, Spring, Summer.

BUSN 6640 - Financial Management (3 Credits)
This course is concerned with the business firm’s decisions to make investments and to finance its operations. Students learn to use the tools and theories underlying business valuation, cost of capital, capital budgeting and capital structure. Students will learn to evaluate a firm’s financial position through the examination of its financial statements and to prepare pro forma statements for the firm. Prereq: BUSN 6550 with a grade of C or better. Coreq: BUSN 6620 or BUSN 6621. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6550 with a grade of C or better Coreq: BUSN 6620 or BUSN 6621 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

BUSN 6710 - Strategic Management (3 Credits)
Concerned with the development of a general management perspective in establishing the strategic direction for an enterprise. Students gain an understanding of strategy formulation and implementation within the context of the global environment. Note: Students may not receive credit for both BUSN 6710 and MGMT 6620. Note: This course is intended as a final semester Capstone course. Coreq: BUSN 6560 or 6561, BUSN 6630 or BUSN 6631; and BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with MGMT 6620. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560 or 6561, BUSN 6630 or BUSN 6631; and BUSN 6640 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School
Typically Offered: Fall, Spring, Summer.

BUSN 6711 - Strategic Management (Health Section) (3 Credits)
Concerned with the development of a general management perspective in establishing the strategic direction for a health delivery organization. Students gain an understanding of strategy formulation and implementation within the context of the managed care environment. Emphasis is on the integration of knowledge acquired in the previous functional area courses. Note: This course is intended as a final semester course. Required of Health Administration majors. Coreq: BUSN 6560 or BUSN 6561, and BUSN 6640. Restriction: Restricted to HLAD and MBAH majors within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-requisites: BUSN 6560 or BUSN 6561, and BUSN 6640 Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Spring.

BUSN 6800 - Topics In Business (3 Credits)
Current topics in business are occasionally offered. Prerequisites vary depending on the material covered. Consult the current ‘schedule planner’ for specific offerings and prerequisites. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BUSN 6807 - Analyzing Emerging Opps & Planning During Uncertain Time (3 Credits)
To develop strategic thinking and practical planning skills. Prepare students for the dynamic and uncertain business environment. More specifically, we explore how to think innovatively and spot trends, develop formal business plans around emerging opportunities, address uncertain and volatile situations using scenarios. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
BUSN 6811 - IT and New Business Paradigms (3 Credits)
Introduces graduate students to the relationship between information technology and the other functional areas of the business. During the course, students have an opportunity to listen and learn from guest speakers who have been involved with either guiding or interpreting the impact of information technology among functional areas of existing or new business. Through the use of current readings, guest lectures and case analysis, students examine various models of IT and new business paradigms to determine the decisions and success criteria for integrating it in ongoing business. A unique feature of the class will be the opportunity for students to present proposals and projects to be critiqued by individuals with IT or business experience. Those individuals provide feedback and perspectives regarding potential IT or new business paradigm activities. Prereq: Permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

BUSN 6812 - Business Intelligence and Analytics (3 Credits)
This course covers business intelligence, analytics, and artificial intelligence technologies and is organized around three types of analytics that are enabled by those technologies: descriptive, predictive, and prescriptive analytics. The theme of artificial intelligence runs throughout the course from business intelligence to machine learning and deep learning as applied in areas such as computer vision, autonomous vehicles, and robots. The topics will be discussed using concepts and theory, business cases and applications, and hands-on analysis or model building using datasets available in the public domain, with the hands-on analysis and model building being the focus of the course. Students will use a leading BI software and a cloud computing platform to perform analysis and build machine learning models. Note: The recommended prerequisite for this course is ISMG 6080. If you are familiar with SQL and have worked with databases in the past, you satisfy the prerequisite requirement for this course. Cross-listed with ISMG 6220. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BUSN 6840 - Independent Study (1-3 Credits)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 8 Credits. Grading Basis: Letter Grade

Repeatable. Max Credits: 8.

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

BUSN 6860 - Finance in the Sports Entertainment Industries (3 Credits)
This course explores the problems and solutions of financing in sports and entertainment business. It focuses on stadium/venue financing, sports team valuation, entertainment event guarantee estimation, player/artist salary issues and managing disparate revenue streams. The course utilizes speakers, articles, problem sets and cases. Prereq: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

Commodities (CMDT)

CMDT 6240 - Environmental, Social, Governance (ESG) Trends in Energy & Commodities (3 Credits)
This course will introduce students to the fundamental concepts and terminology associated with Environmental, Social, Governance (ESG). The evolution of climate change and ESG will be reviewed in terms of policies and metrics. The critical need commodities (agricultural, energy, and minerals, and metals) are studied to support more realistic views and opinions on climate change and ESG. An overarching goal is that students completing the course will have a sound understanding of ESG related policies and standards, the measuring metrics, and the benefits and costs associated with potential future trends. Cross-listed with GEMM 6240. Repeatable. Term offered: fall, spring. Max hours: 6 Credits. Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

CMDT 6490 - Commodity Trading (3 Credits)
This is a co-listed class with the J.P. Morgan Center for Commodities and the Finance Department. This course focuses on how securities and futures contracts are designed and traded including trading exchange operations, regulation, trading mechanisms and processes. Students will learn the theory and practice of securities and futures contract trading with a focus on hands-on trading experience using industry software (CQG and Bloomberg) as well use of data sources (Morningstar). In this course, we will review the origins of liquidity, volatility, price efficiency, and trading profits. Next we will cover a host of topics concerning equity and commodity trade execution strategies, such as why and how investors trade, what and when investors profit from investing and speculating, the key principles of high-frequency trading and investor’s overconfidence, why market institutions are organized as they are, and the role of public policy in the markets. Max hours: 3 Credits. Grading Basis: Letter Grade

CMDT 6582 - Commodity Supply Chain Management (3 Credits)
This course introduces the design, analysis, management, and control of supply chains as applied to commodities. The course covers integration of processes and systems, relationship management of upstream and downstream supply chain players, and commodity-specific supply chain strategies. Cross-listed with CMDT 4582. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School.

CMDT 6852 - Commodity Supply Chain Management (3 Credits)
This course introduces the design, analysis, management, and control of supply chains as applied to commodities. The course covers integration of processes and systems, relationship management of upstream and downstream supply chain players, and commodity-specific supply chain strategies. Cross-listed with CMDT 4582. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School.
CMDT 6682 - Commodities Hedging (3 Credits)
This course is a practical introduction to commodity markets. Students will learn how commodities are managed in the global markets from a hedgers, speculators and arbitrageurs point of view. Understanding the relationships between commodities and the global economy will be investigated. In addition, commodities will be looked at as an asset class and cross-asset relationships will be studied. Students will be introduced to futures and options markets analysis deploying strategies professional traders use in diverse market conditions. Students will work with the various trading software throughout the course and gain proficiency in real-world trading. Note: Students cannot receive credit for both CMDT 6682 or FNCE 6482. Cross-listed with CMDT 4682. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBC within the Business School.
Typically Offered: Spring.

CMDT 6710 - Carbon Markets: Navigating the Future of Business (3 Credits)
Climate change is a fundamental threat to global economic development. Both public and private business practices and consumer behaviors will drive how economies will decarbonize and the extent of future impacts. Consumers, investors, and governments will increasingly look toward markets for carbon management to the bottom line, allowing participants to apply learnings to new and developing business strategies practically. Cross-listed with GEMM 6710. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring.

CMDT 6782 - Commodity Data Analysis (3 Credits)
This course is an applied introduction commodity data analysis. Students will learn how to analyze commodity prices using quantitative and qualitative techniques. Relationships between commodities and the global economy will be investigated. In addition, commodities will be looked at as an asset class and cross-asset relationships will be studied. Students will be introduced to forecasting techniques and be able to develop and evaluate various forecasting models. Students will work with the open source Python software throughout the course and gain proficiency. Topics include: regression analysis, univariate models, nonstationarity, vector autoregressions, cointegration, volatility modeling, principal component analysis, Python programming, and other topics time permitting. Cross-listed with CMDT 4782. Max hours: 3 Credits.
Grading Basis: Letter Grade

CMDT 6802 - Foundations of Commodities (3 Credits)
This course introduces students to the physical aspects of commodities and connects them to the financial markets in which commodities are traded. Fundamental concepts and terminology necessary for understanding commodity production, transportation, economics, financial analysis and marketing are described. Supply chains for several specific commodities are reviewed in detail, as examples of the production and market structure knowledge needed to be successful professional participants in commodity trading capacities. The course also serves a foundation for more focused education in the specific commodity sectors, as well as the applied use of marketing and financial trading concepts learned in other courses. Cross-listed with CMDT 4802 and FNCE 4802/6802. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

CMDT 6840 - Commodity Independent Study (1-3 Credits)
Independent study in the field of commodities. Topic of study varies according to project. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade

Finance (FNCE)

FNCE 5939 - Internship (1-3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Prereq: 21 semester hours and 3.5 GPA. Repeatable. Max Hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.

FNCE 6290 - Quantitative Methods for Finance (3 Credits)
This course provides a statistical foundation for subsequent courses in the Master of Science in Finance program. Major topics include descriptive statistics, probability theory, statistical estimation and inference and regression analysis. The emphasis is on finance applications, such as risk measurement, for portfolio diversification and the "market model". In addition, students develop competence in the use of statistical software packages. This course provides preparation for the statistical portions of the Certified Financial Analyst professional examinations. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6300 - Macroeconomics and Financial Markets (3 Credits)
Covers the U.S. financial system in the global economy. Specific topics include financial institutions, money creation and monetary policy; the Federal Reserve System and its operation; the international financial system; interest rate determination, yield curves, and their relation to fiscal policy; the role of households and business in financial markets; stock markets; and money markets and instruments. (Required for the M.S. in Finance degree.) Coreq: BUSN 6620. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6620 Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School
FNCE 6310 - Financial Decisions and Policies (3 Credits)
Emphasizes investment and financing decisions, and the analysis of the financial condition of the firm. Specific topics include capital budgeting, cost of capital, financing mix and strategy, firm valuation and management of working capital. Instruction is by the case method. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School

FNCE 6330 - Investment Management Analysis (3 Credits)
In this course students will learn investment theories and how to apply them to portfolio management. Topics covered include asset allocation, security markets, the analysis and use of investment information, risk analysis and security valuation. This course is required for the M.S. in Finance degree. Prereq: BUSN 6640 and BUSN 6620 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 and BUSN 6620 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School

FNCE 6340 - Business Firm Valuation (3 Credits)
In this class, students will learn two valuation techniques, fundamental valuation and relative valuation, to value a business. These techniques are useful in such situations as valuing firms for mergers and acquisitions and valuing stocks for investment purposes. Some of the topics included are valuation of start-up firms, valuation of privately held firms, and valuation of firms with negative earnings. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School

FNCE 6350 - Financial Innovations (3 Credits)
Innovations include zero coupon bonds, inflation indexed bonds, structured notes, asset-backed securities, collateralized mortgage obligations, and interest rate swaps. The student learns about the markets and pricing of these securities, and how they affect interest rate risk. The course prepares the student for careers in corporate treasury management, structured financing, swaps trading, and mortgage backed securities design. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School

FNCE 6360 - Management of Financial Institutions (3 Credits)
Overview of financial institutions and their risk management/financial performance management issues such as: management of operational, credit, liquidity, interest-rate, capital, off-balance sheet, and environmental risks; Uniform Bank Performance Report (UBPR) risk/ performance analysis, hedging techniques and regulations/performance/risk. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School

FNCE 6365 - Banking Principles and Practices (3-9 Credits)
Covers money and capital markets, commercial lending, asset and liability management, loan portfolio management and bank management. This class is only available to Colorado Graduate School of Banking students. Similar material is covered in FNCE 6300 and FNCE 6360. Therefore Business School students must enroll in those courses. Banking students cannot receive credit for FNCE 6300 or FNCE 6360. Repeatable. Max Hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6370 - International Financial Management (3 Credits)
Addresses financial management in an international context that considers international capital movements and foreign exchange problems, and international operations as they affect financial functions. It reviews foreign and international institutions and the foreign exchange process and considers financial requirements, problems, sources and policies of firms doing business internationally. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with INTB 6372. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School

FNCE 6372 - Time-Series Forecasting (3 Credits)
Students learn forecasting methodologies such as ARIMA, regression, smoothing, and time-series decomposition applicable to marketing, finance, accounting, human resources management, and supply chain and production management decision-making. This course focuses on practical applications of forecasting techniques, choosing and comparing appropriate methods and applying the results to workplace situations. If you do not meet the prerequisites you may contact the instructor for permission to register. Prereq: BANA 6610 or BUSN 6530 or FNCE 6290 or BUSN 6530 taken at CU Denver or consent of instructor - no CBK waivers of BUSN 6530 will be considered. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BANA 6610 or BUSN 6530 or FNCE 6290 with a grade of C or higher Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
FNCE 6380 - Futures and Options (3 Credits)
This course covers both speculation and hedging using futures and options. The student learns about futures pricing, how futures are related to the underlying commodities and how to design hedges. Stock index futures and interest rates futures get particular attention. The course covers the theory and application of option pricing, focusing on the binomial and Black-Scholes models. Popular options trading strategies are discussed. This course is useful for those who wish to trade or become portfolio managers, as well as those who plan on corporate treasury management. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6382 - Survey of Financial Derivatives (3 Credits)
This course introduces forward contracts, used in price risk management for millennia. We cover the properties of forward/futures contracts, structure of the markets and strategic implications for speculation and hedging. We price forwards from spot price, and introduce convenience yield. Options used for insurance purpose (think of your car insurance as a put option) is a more expensive way to manage risk; we cover option strategies and basic pricing. The course concludes with swaps, credit derivatives and structured products. Asset classes covered are equity, fixed income, currency, agriculture, energy (oil/gas and electricity) and metal/mining. Prereq: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BUSN 6640 with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6410 - Real Options and Decisions Under Uncertainty (3 Credits)
This is an applied course in making investment decisions under uncertainty and flexibility. Traditional NPV analysis using tools such as Discounted Cash Flow (DCF) model assumes that once an investment decision has been made, managers have no control over the outcome and they remain passive throughout the life of the project. Most corporate projects, however, have a great deal of flexibility in terms of their execution. This course will help students develop skills to identify and analyze real options so that they may approach real world corporate investment decisions in a strategic manner. This course may be used to fulfill the requirement for an options course in the MS (Finance) program. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6411 - International Corporate Governance (3 Credits)
Discusses the structure and goals of the modern corporation, the primary governance mechanisms used to help companies achieve these goals, and how and why these roles, goals, and mechanisms vary across nations. The topics covered in the course include managerial compensation, board of director structure and ethics, shareholder activism, and how governance structures differ across countries. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Note: Students cannot receive credit for both FNCE 6411 and INTB 6411. Cross-listed with FNCE 4411 and INTB 6411. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6420 - Mergers and Acquisitions (3 Credits)
Examines the processes and decisions by which mergers, takeovers and other corporate restructuring occur, the transactions occur. Analyzes merger and acquisition decisions as part of strategic decision making, and how firms are valued in mergers. Discusses the market for corporate control and the public policy implications of mergers and corporate governance. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6450 - Short-Term Financial Management (3 Credits)
This course is a survey of methods for managing short term assets and liabilities. Specific topics include the analysis of the firm’s liquidity and cash flow, banking relationships; collection and disbursement systems; management of short term investment and financing; management of receivables, payables and inventory; and short term forecasting. This course is affiliated with the Association of Financial Professionals, allowing students earning at least a ‘B’ to sit for the Certified Treasury Professional (CTP-A) exam. Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BUSN 6640 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
FNCE 6460 - Emerging Market Finance (3 Credits)
This course aims to explore key emerging market finance issues from the perspectives of corporations, investors and markets. Emerging economies are deemed to be the engine of growth opportunities in the world economy. However, compared with developed markets, they typically have some unique features in their economic systems and financial markets, and thus different risk and return characteristics, leading to special considerations of capital budgeting, financing and investing in these economies. This course is to help develop a better understanding of financial markets, corporate finance and investments in emerging economies, with case studies on some major emerging markets (e.g., China, India). Prereq: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with INTB 6460. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BUSN 6640 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School

FNCE 6470 - Behavioral Finance (3 Credits)
Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers were generally rational and the prices of securities were generally “efficient.” In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we examine how the insights of behavioral finance complements the traditional paradigm and sheds light on the behavior of asset prices, corporate finance, and various Wall Street institutions and practices. Prereq: BUSN 6640. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BUSN 6640

FNCE 6480 - Financial Modeling (3 Credits)
Develops and implements financial models for purposes of financial planning and decision making. This course is intended to allow the student to increase her or his knowledge and skill in the development of various types of computer-based financial planning models. The students are exposed to the uses of a variety of computer software packages that can be used for modeling financial planning problems. Prereq: BUSN 6640, knowledge of computer and spreadsheet software. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: BUSN 6640 with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6490 - Commodity Trading (3 Credits)
This is a co-listed class with the J.P. Morgan Center for Commodities and the Finance Department. This course focuses on how securities and futures contracts are designed and traded including trading exchange operations, regulation, trading mechanisms and processes. Students will learn the theory and practice of securities and futures contract trading with a focus on hands-on trading experience using industry software (CQG and Bloomberg) as well use of data sources (Morningstar). In this course, we will review the origins of liquidity, volatility, price efficiency, and trading profits. Next we will cover a host of topics concerning equity and commodity trade execution strategies, such as why and how investors trade, what and when investors profit from investing and speculating, the key principles of high-frequency trading and investor’s overconfidence, why market institutions are organized as they are, and the role of public policy in the markets. Cross-listed with CMDT 4490, CMDT 6490 and FNCE 4490. Max hours: 3 Credits. Grading Basis: Letter Grade

FNCE 6800 - Special Topics (1.5-3 Credits)
Experimental course offered irregularly for the purpose of presenting new subject matter in finance. Prerequisites vary depending upon topics covered. (Consult the 'Schedule Planner' for semester offerings.) Prereq: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max hours: 9 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6802 - Foundations of Commodities (3 Credits)
This course introduces students to the physical aspects of commodities and connects them to the financial markets in which commodities are traded. Fundamental concepts and terminology necessary for understanding commodity production, transportation, economics, financial analysis and marketing are described. Supply chains for several specific commodities are reviewed in detail, as examples of the production and market structure knowledge needed to be successful professional participants in commodity trading capacities. The course also serves a foundation for more focused education in the specific commodity sectors, as well as the applied use of marketing and financial trading concepts learned in other courses. Cross-listed with FNCE 4802 and CMDT 4802/6802. Max hours: 3 Credits. Grading Basis: Letter Grade

FNCE 6840 - Independent Study: FNCE (1-8 Credits)
Instructor approval required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 8 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 6995 - Travel Study (3 Credits)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

FNCE 8990 - Dissertation Development (1-15 Credits)
Supports development of a dissertation in conjunction with a student’s advisor. Repeatable. Max hours: 15 Credits. Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 15.
Additional Information: Report as Full Time.
Economics (ECON)

ECON 5030 - Data Analysis with SAS (3 Credits)
Covers techniques for handling and interpreting economic data and conducting econometric analyses using SAS programming. Provides hands-on data management and analyses with large data sets with applications to business and economics, and prepare students for SAS Base Programmer certification exam. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Statistics with Computer Applications (ECON 3811) or a similar course is strongly recommended as preparation for this course. Cross-listed with ECON 4030. Term offered: fall, spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Fall, Spring.

ECON 5050 - Special Economic Problems (1-8 Credits)
Provides students the opportunity to critically evaluate some practical and theoretical problems under supervision, and to present results of their thinking to fellow students and instructors for critical evaluation. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4050. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).

ECON 5073 - Microeconomic Theory (3 Credits)
Fundamental features of partial equilibrium theory of the firm, consumer and market. General equilibrium and welfare economic topics are examined. Features of the models that have empirical applications are accented. Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Fall.

ECON 5083 - Macroeconomic Theory (3 Credits)
Examines the major macroeconomic models within a common framework. Differences in the foundations, structure, and policy implications of the competing models are analyzed. Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Spring.

ECON 5090 - History of Economic Thought (3 Credits)
Traces the development of economic thought from ancient times to the 20th century. Considers the context in which these ideas were developed and their relationship to modern economic thought and contemporary economic problems. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Microeconomics (ECON 2022) and Macroeconomics (ECON 2012) or similar coursework is strongly recommended as preparation for this course. Cross-listed with ECON 4090. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Fall.

ECON 5150 - Economic Forecasting (3 Credits)
Teaches forecasting techniques used in business and government to project trends and short-term fluctuations. Actual data are employed in instruction and labs. State-of-the-art spreadsheet and algorithms are introduced as part of the course work. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Statistics with Computer Applications (ECON 3811) or similar coursework is strongly recommended as preparation for this course. Cross-listed with ECON 4150. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Spring.

ECON 5410 - International Trade (3 Credits)
Trade theory identifies who wins and loses from trade and why there are usually overall gains. Explores issues in immigration, globalization, income inequality, tariffs, dumping, the WTO, the environment, wages and growth strategies among others. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4410. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).

ECON 5530 - Economics of Natural Resources (3 Credits)
Examines economic models of renewable resource management and models of exhaustible resource depletion. Analyzes decisions made by private firms and governments affecting the methods and rate of resource development. Examines the effects of resource development on economic growth and environmental quality and the effects of economic development on resource scarcity. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4530. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
ECON 5540 - Environmental Economics (3 Credits)  
Economic approach to environmental problems: relationship between ownership structures, externalities and environmental damage; poverty, population pressure, and environmental degradation; valuation of environmental amenities; sustainability of economic activity; cost-benefit analysis applied to the environment; evaluation of alternative instruments for environmental control. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4540. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prerequisite ECON 5073 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).  

ECON 5660 - Health Economics (3 Credits)  
Introduces students to analytical skills and economic methods, and demonstrates how these methods can be applied to issues in health policy and management. Topics include: demand for health and medical care; health care costs, health reform, medical technology; market for health insurance; physicians, hospitals, and managed care; pharmaceuticals; regulations in the U.S. health care sector; demand for addictive substances; infant and maternal health; international comparisons of health care systems. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Max Hours: 3 Credits.  
Grading Basis: Letter Grade  
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).  

ECON 5740 - Industrial Organization (3 Credits)  
Examines the determinants of, and linkages between, market structure, firm conduct, and industrial performance. Topics include: determinants of the market size; impact of different market structures on prices and outputs; strategic behavior of firms to prevent entry or induce exit of rival firms; collusion; price discrimination; advertising: competition, monopoly, and innovation; implications for economic efficiency and public policy. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4740. Max Hours: 3 Credits.  
Grading Basis: Letter Grade  
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).  

ECON 5800 - Special Topics (1-3 Credits)  
Current economics topics to be determined by the instructor. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).  

ECON 5803 - Mathematical Economics (3 Credits)  
Application of mathematical techniques in micro-and macro-economic analysis. Topics include single and multivariable differentiation, basic matrix algebra, optimization, and integration with applications to economic models of consumption, production, market equilibrium, national accounting, and growth. Restriction: Students must be admitted to the MA in ECON, MS or PhD in Health Economics. Cross-listed with ECON 4803. Term offered: fall, spring. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Restriction: Students must be admitted to the MA in ECON, MS or PhD in Health Economics. Typically Offered: Spring.  

ECON 5813 - Econometrics I (3 Credits)  
Theory and application of statistical techniques used to analyze economic problems. Topics include simple and multiple regression models, simultaneous equation models, and the problems encountered in their application. Students formulate models, obtain data, estimate models, interpret results and, forecast. Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Term offered: fall. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Typically Offered: Fall.  

ECON 5823 - Econometrics II (3 Credits)  
Second course in the econometrics sequence, covering intermediate topics in cross-section and time series analysis. Topics include limited dependent variables, autoregressive and distributed lag models, longitudinal data analysis and unit roots, co-integration and other time-series topics. Prereq: ECON 5813 with a B- or higher.  
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Term offered: spring. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: ECON 5813 with a B- or higher Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Typically Offered: Spring.  

ECON 5840 - Independent Study (1-3 Credits)  
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.  
Grading Basis: Letter Grade  
Repeatable. Max Credits: 9.  

ECON 5880 - Directed Research (1-6 Credits)  
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.  
Grading Basis: Letter Grade  
Typically Offered: Fall, Spring, Summer.
ECON 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

ECON 5950 - Master's Thesis (1-4 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Max hours: 4 Credits.
Grading Basis: Letter Grade
Additional Information: Report as Full Time.

ECON 6010 - Advanced Microeconomic Theory (3 Credits)
Recent and contemporary literature on fundamentals of economic theory. Consideration of value theory with particular emphasis on methodology, theory of demand, theory of the firm, and theory of distribution. Prereq: ECON 5073 with a B- or better. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 6020 - Advanced Macroeconomic Theory (3 Credits)
Considers general equilibrium and aggregative analysis in economic theory, with particular emphasis given to the theory of employment, consumption and investment. Prereq: ECON 5083 with a B- or higher. Restriction: Restricted to student with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5083 with a B- or higher. Restriction: Restricted to student with graduate standing

ECON 6022 - Federal Data for Health Research & Policy (1-3 Credits)
Students will develop the knowledge and skills required to effectively use a variety of federal and statistical data sets for health research and policy analysis. Each week is devoted to one or two federal statistical datasets—data collection methods; why they are collected and what health issues they are designed to address; what population they represent and at what geographic scale. Most critically, students will be able to distinguish between questions that can be addressed with a public version of the data and questions that require restricted versions of the data that are protected by federal law and guidelines. Students will read, discuss and present research from various perspectives (Demography, Economics, Geography, Public Health, Sociology) using these data sources and apply their knowledge of data analysis from a variety of perspectives. Students will learn how to gain access to restricted data, how to protect individual anonymity with best practice disclosure avoidance techniques and will develop a research proposal for confidential research access. Note: Familiarity with SAS (preferable) or other statistical software such as SPSS or Stata and statistics or data analysis is recommended. Restriction: Restricted to degree-granting graduate programs. Cross-listed with HBSC 6022, GEOG 5022, and SOCY 5022. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.

ECON 6039 - Seminar In Applied Economics (1.5 Credits)
Familiarizes students with applied research in economics. Students read, discuss, and critique articles in economic journals. Note: Topics vary with the instructor. Prereq: ECON 5813. Term offered: spring. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5813 with a B- or higher Coreq: ECON 5823 Restriction: Restricted to students with graduate standing

ECON 6040 - Seminar In Applied Economics II (1.5 Credits)
Familiarizes students with state-of-the-art applied research. Prereq: ECON 5813 with a B- or higher. Coreq: ECON 5823. Restriction: Restricted to students with graduate standing. Term offered: spring. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5813 with a B- or higher Coreq: ECON 5823 Restriction: Restricted to students with graduate standing

ECON 6050 - Advanced Microeconomic Theory (3 Credits)
ECON 6051 - Research Seminar (3 Credits)
Recent and contemporary literature on fundamentals of economic theory. Consideration of value theory with particular emphasis on methodology, theory of demand, theory of the firm, and theory of distribution. Prereq: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with Graduate standing

ECON 6053 - Seminar In Applied Economics (1.5 Credits)
Familiarizes students with applied research in economics. Students read, discuss, and critique articles in economic journals. Emphasis is placed on research design and methods employed in these articles to prepare students for development of their own research projects in subsequent courses. Topics vary with instructor, and may include international economics, labor economics, monetary theory, public or finance and development economics. Prereq: ECON 5813 with a B- or higher. Coreq: ECON 5823. Restriction: Restricted to students with graduate standing. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5813 with a B- or higher Coreq: ECON 5823 Restriction: Restricted to students with graduate standing

ECON 6054 - Seminar In Applied Economics II (1.5 Credits)
Familiarizes students with state-of-the-art applied research. Students read, discuss, and critique articles published in economic journals. Note: Topics vary with the instructor. Prereq: ECON 5813 with a B- or higher. Coreq: ECON 5823. Restriction: Restricted to students with graduate standing. Term offered: spring. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5813 with a B- or higher Coreq: ECON 5823 Restriction: Restricted to students with graduate standing

ECON 6058 - Seminar In Advanced Microeconomics (1.5 Credits)
Topics include the analysis of large data sets, further development of econometric skills, and writing a research paper. Note: Students attend lectures and also meet regularly with the instructor in the process of doing a sophisticated research project. Prereq: ECON 5073 and ECON 5823 with a B- or higher and either ECON 6053 or ECON 6054 with a B- or higher. Restriction: Restricted to students with graduate standing.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ECON 6059 - Seminar In Advanced Macroeconomics (1.5 Credits)
Consider the analysis of large data sets, further development of econometric skills, and writing a research paper. Note: Students attend lectures and also meet regularly with the instructor in the process of doing a sophisticated research project. Prereq: ECON 5073 and ECON 5823. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5823 with a B- or higher and either ECON 6053 or ECON 6054 with a B- or higher. Restriction: Restricted to students with graduate standing

ECON 6060 - Special Topics (1-3 Credits)
Special topics in advanced microeconomics. Consideration of value theory based upon methodology, theory of demand, and theory of distribution. Restriction: Restricted to students with Graduate standing. Introduction to Mathematical Economics (ECON 3801) or similar coursework is strongly recommended as preparation for this course.
Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ECON 6073 - Research Seminar (3 Credits)
Focuses on training students to do rigorous research in economics. Topics include the analysis of large data sets, further development of econometric skills, and writing a research paper. Note: Students attend lectures and also meet regularly with the instructor in the process of doing a sophisticated research project. Prereq: ECON 5073 and ECON 5823 with a B- or higher and either ECON 6053 or ECON 6054 with a B- or higher. Restriction: Restricted to students with graduate standing.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5823 with a B- or higher and either ECON 6053 or ECON 6054 with a B- or higher. Restriction: Restricted to students with graduate standing

ECON 6080 - Public Finance (3 Credits)
Advanced economic theory applied to the problems of public and private sector decision making. Applied topics in taxation, education, voting theory, welfare economics, externalities and public goods. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to students with graduate standing.
Typically Offered: Fall.

ECON 6210 - Public Finance (3 Credits)
Advanced economic theory applied to the problems of public and private sector decision making. Applied topics in taxation, education, voting theory, welfare economics, externalities and public goods. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to students with Graduate standing
ECON 6410 - International Trade (3 Credits)
Contemporary and classical literature on theories of international trade. Topics include the determination of the pattern and terms of trade, the relationship between growth and trade, and commercial policy. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 6420 - International Finance (3 Credits)
Topics in international finance, including exchange rate determination, the adjustment process, international financial markets and the international monetary system. Prereq: ECON 5073 with a B- or better. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 6610 - Labor Economics (3 Credits)
Advanced study of the labor market, including: history, nature, and function of labor organizations; the process of wage determination; and the formation of public policy. Prereq: ECON 5073 and 5813 with a B- or higher. Restriction: Restricted to students with Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5813 with a B- or higher Restriction: Restricted to students with Graduate standing
Typically Offered: Spring.

ECON 6666 - The Economics of Health Behaviors (3 Credits)
This course teaches an economic approach to studying health behaviors and the policies that affect them. Special attention will be paid to analyzing the effects of excise taxes and to understanding the quasi experimental approach to doing applied research in economics. Prereq: ECON 5073 and ECON 5813 with a B- or higher. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5813 with a B- or higher Restriction: Restricted to students with Graduate standing

ECON 6770 - Development Economics (3 Credits)
This course provides a theoretical and empirical framework for analyzing economic problems in developing countries focusing on the role of individuals, families and institutions. Topics include poverty traps, human capital accumulation, gender discrimination, microcredit and violent conflict. Prereq: ECON 5073 and 5803 with a B- or higher. Cross-listed with ECON 4770. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5803 with a B- or higher. Typically Offered: Fall.

ECON 6801 - Advanced Mathematical Economics (3 Credits)
Addresses economic dynamics, formal mathematical modeling in economics, and optimization in economic theory. Prereq: ECON 5803 with a B- or higher or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5803 with a B- or higher.

ECON 6810 - Econometrics and Forecasting (3 Credits)
Covers advanced topics in cross-sectional and time-series analysis. Emphasizes important theoretical and empirical issues encountered in applied work in economics and business. Topics include problems of structural change and model misspecification, instrumental variables, simultaneous equations models, distributed lags, maximum likelihood estimation, qualitative and limited dependent variables, Arima models, vector-autoregressions, issues on exogeneity and causality. Through the use of econometric software programs and actual data, students learn to execute estimation and forecasting projects soundly. Prereq: ECON 5813 and 5823 with a B- or higher. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5813 with a B- or higher Restriction: Restricted to students with Graduate standing

ECON 6840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

ECON 7073 - Advanced Microeconomic Theory II (3 Credits)
This is a second-semester Ph.D. level course in microeconomics. The first semester course discussed consumer and producer theory; this course will discuss game theory, market equilibrium, and information economics. Prereq: ECON 5073 with a B- or better. Restriction: Restricted to students with Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing
Typically Offered: Spring.

ECON 7661 - Health Economics I (3 Credits)
This is the first course in the Ph.D field sequence for Health Economics. The goal of this course is to familiarize you with the basic theory and empirical findings in the part of health economics which focuses on the market for medical care and the policy that surrounds it. Prereq or Coreq ECON 5823. Students must enroll in both courses concurrently or have completed ECON 5823 with a B- or better. Restriction: Restricted to students with graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 7662 - Health Economics II (3 Credits)
This course teaches an economic approach to studying the various policies that affect these risky health behaviors. The extensive economic literature on the causes and consequences of risky health behaviors will be studied. Prereq or Coreq ECON 5823 with a grade of B- or better. Restricted to students with graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-requisite ECON 5823 OR prerequisite ECON 5823 with a grade of B- or better. Restricted to students with graduate standing.
Typically Offered: Spring.

ECON 7663 - Health Economics III (3 Credits)
This course teaches an economic approach to studying the various policies that affect these risky health behaviors. The extensive economic literature on the causes and consequences of risky health behaviors will be studied. Prereq or Coreq ECON 5823 with a grade of B- or better. Restricted to students with graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-requisite ECON 5823 OR prerequisite ECON 5823 with a grade of B- or better. Restricted to students with graduate standing.
Typically Offered: Fall.
ECON 8990 - Doctoral Dissertation (1-10 Credits)
Designed to allow doctoral students to conduct research for course credit prior to advancement to candidacy. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring. Repeatable. Max hours: 50 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 50.
Additional Information: Report as Full Time. Typically Offered: Fall, Spring.

Global Energy Management (GEMM)

GEMM 6000 - 21st Century Global Energy Issues and Realities (3 Credits)
Introduction to the global energy industry’s past, present and future. Current and historical issues in regions such as: Atlantic Basin, former Soviet Union, east of Suez, North and South America will be covered. World production centers and markets are discussed to include relevant energy security, scenario planning, risk management and regulation, deregulation, and environmental concerns. Note: Students will learn the geographic distribution of energy resources worldwide including governmental systems. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6100 - Global Energy Economics (3 Credits)
Course includes energy geo-economics with an introduction to managerial tools of the trade. Topics will include world energy markets-demand and supply, refining and marketing, energy forecasts, oil and gas transportation, and National Oil Companies vs. International Oil Companies. An introduction to environmental economics will also help students connect the energy industry to sustainable work practices. In addition students will learn the geographic distribution of energy resources worldwide along with the political and government systems associated with those resources. Max hours: 3 Credits.
Grading Basis: Letter Grade Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6200 - Environmental, Regulatory, Legal & Political Environment in the Energy Industry (3 Credits)
Exploration of current political situations regarding the energy industry, its environmental impact in the short and long term. Topics include climate change, pollution, solid wastes and conversions to natural resources. Students will become familiar with national and international energy laws and regulations, financial arrangements, confidentiality, and bidding agreements. Max hours: 3 Credits.
Grading Basis: Letter Grade Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6210 - Energy and the Law: Property and Contracts (3 Credits)
The elective will focus on the process of managing the use and development of land resources in a sustainable way. Topics such as; public controls, powers used for land regulation, and an intro to real estate will be covered to enhance students understanding of land management and its application to the energy industry. Max hours: 3 Credits.
Grading Basis: Letter Grade Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6220 - Interacting With Foreign Governments And State Enterprises (3 Credits)
Globalization of many energy companies, dwindling U.S. energy sources, and growing overseas energy demand have increased the need for energy professionals to gain expertise in doing business with foreign governments and state enterprises, which play a much greater role in the ownership and operation of energy extraction and energy delivery in virtually all countries beyond the United States and Canada. This course reviews negotiation strategies in the context of uncertain contract enforcement, volatility and uncertainty of prices and restrictions, and highly contentious political contexts. It also reviews the approaches for interacting effectively with state enterprises that are often undercapitalized and inefficient, and examines how valuation of energy assets can take into account political risk, and requirements to provide infrastructure and social services. Max hours: 3 Credits.
Grading Basis: Letter Grade Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6230 - Political Risk Management for Global Energy Environments (3 Credits)
The course examines public influence on energy business activities. Students will explore the economics of political action and methods for evaluating how stakeholder groups interact to influence political outcomes. They will use these tools to develop strategies for stakeholder engagement and to manage business risks. Max hours: 3 Credits.
Grading Basis: Letter Grade

GEMM 6240 - Environmental, Social, Governance (ESG) Trends in Energy & Commodities (3 Credits)
This course will introduce students to the fundamental concepts and terminology associated with Environmental, Social, Governance (ESG). The evolution of climate change and ESG will be reviewed in terms of policies and metrics. The critical need commodities (agricultural, energy, and minerals, and metals) are studied to support more realistic views and opinions on climate change and ESG. An overarching goal is that students completing the course will have a sound understanding of ESG related policies and standards, the measuring metrics, and the benefits and costs associated with potential future trends. Cross-listed with CMDT 6240. Repeatable. Term offered: fall, spring. Max hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.
Typically Offered: Fall, Spring.

GEMM 6300 - Technical Aspects of Energy Science (3 Credits)
This course will familiarize students with the newest renewable and alternative energy sources. The course does not focus on hydrocarbon sources but examines challenges and opportunities that exist for the establishment of the new energy sources to become viable in the industry. Max hours: 3 Credits.
Grading Basis: Letter Grade Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6400 - Leadership and Decision Making in the Global Energy Environment (3 Credits)
Students will examine leadership from an energy executive perspective. Topics include: how execs lead, change, innovation, interacting with top management teams, the board, leadership issues involved with governance of the firm, strategies for enhancing executive influence and ethics and responsibilities associated with exec. Max hours: 3 Credits.
Grading Basis: Letter Grade Restrictions: Restricted to GEMM majors within the Business School.
GEMM 6410 - People Management in the Global Energy Environment (3 Credits)
Explain that people are energy's most important asset. Students will learn the latest research in human resource theories, study models, and learn how to develop organizational effectiveness from the firm's human capital. Concepts on: effective teamwork, attracting and retaining talent and using HR processes such as performance management and development to drive engagement will be discussed. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6430 - Organizational Behavior in the Energy Industry (3 Credits)
Students will learn how to lead and manage human assets inside energy industries. Students will be exposed to fundamental principles of human behavior and increase their competence of working in diverse settings. Proper management can lead to a sustainable competitive advantage, because of management of employees and developing them into enthusiasts of your firm. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6450 - Strategic Management of the Energy Industry (3 Credits)
The course focuses on how to improve an organization's competitiveness in a changing global environment. Emphasis on sustainable strategies, students develop skills to formulate, implement and evaluate organizational strategies in the rapidly changing environment. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6460 - Integrated Information Management for Energy Firms (3 Credits)
This course covers issues associated with developing an integrated information managing strategy to identify major information categories used with an energy firm. It covers relationships to business processes to guide applications development and facilitate the integration and sharing of data. Using case studies from energy firms operational, administrative and strategic systems will be discussed. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6470 - Energy Marketing and Communications (3 Credits)
This course covers the challenges faced by energy industries in developing branding, and developing new markets. Marketing both products and the company to its stakeholders, in the face of competitive pressures, students learn practical marketing tools and how they can be used to effect corporate strategy. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6490 - Portfolio Strategy (1-3 Credits)
This elective course is intended to be a variable-credit course specially designed to provide national and international learning opportunities. The course will offer concentrated problem-solving experiences within the energy industry through travel to industry-significant cities and regions, while meeting and visiting with people working and dealing with issues in the industry. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6600 - Introduction To Financial Management In The Energy Industry (3 Credits)
Introduction to fundamental principal of asset valuation and financing in competitive global markets. Providing the tools necessary to analyze day-to-day financial issues in the energy industry (time value of money, valuation of income streams, risk weighted investment returns.) Topics such as: risk management, arbitrage, hedging and foreign exchange will be covered. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6610 - Advanced Financial Management in the Energy Industry (3 Credits)
This course is focused on understanding the costs and benefits of various forms of capital. By examining internal and external managers, students will be able to assess alternative capital sources to achieve their strategic objectives. The course will introduce effective investor communication techniques. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6620 - Energy Asset & Production Management for the Energy Industry (3 Credits)
The course covers management of an organization’s energy resources and facilities as well as broader coverage of project management. Portfolio strategy, planning, scope, time, cost, quality and organizational effectiveness will be addressed. Also when budget, material, vendor relations or other factors disrupt a project, students will be prepared on how to react. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School.

GEMM 6630 - Project Development, Management and Leadership in Renewable Energy (3 Credits)
This course will focus on project management aspects of the renewable energy value stream from project conceptualization to decommissioning, inclusive of development, engineering, construction and operations. GEMM 6630 will also focus on leadership and decision-making throughout the renewable energy value stream. Students will be exposed to decision making at corporate levels regarding directions energy and utility companies are taking towards expansion or transition into renewables. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to GEMM majors within the Business School. Typically Offered: Fall, Spring.

GEMM 6690 - Special Topics (1-3 Credits)
This elective course is intended to be a variable-credit course specially designed to provide national and international learning opportunities. The course will offer concentrated problem-solving experiences within the energy industry through travel to industry-significant cities and regions, while meeting and visiting with people working and dealing with issues in the industry. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

GEMM 6699 - International Special Topics (3 Credits)
This course will offer concentrated problem-solving experiences within the energy industry through travel to industry significant cities and regions. Learn through a combination of guest lectures, field trips, and seminars with experts. Max hours: 3 Credits.
Grading Basis: Letter Grade
GEMM 6710 - Carbon Markets: Navigating the Future of Business (3 Credits)
Climate change is a fundamental threat to global economic development. Both public and private business practices and consumer behaviors will drive how economies will decarbonize and the extent of future impacts. Consumers, investors, and governments will increasingly look toward markets for innovation and create a low-carbon economy. This course will introduce carbon markets in all their forms and elaborate on policies, trade, reporting, and tracking. This course will demonstrate the value of carbon management to the bottom line, allowing participants to apply learnings to new and developing business strategies practically. Cross-listed with CMDT 6710. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring.

GEMM 6840 - Independent Study (1-3 Credits)
Allow students to gain additional experience in a particular realm of energy business that interest them and suit their ultimate career goals. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

Health Administration (HLTH)
HLTH 5939 - Internship (1-3 Credits)
Grading Basis: Satisfactory/Unsatisfactory

HLTH 6010 - Health Care Systems (3 Credits)
Introduces the structure and function of the medical care delivery system. Includes basic concepts and measures of health, disease, quality, values, needs and utilization; issues in health care manpower, institutions and system organization; general issues in policy, reimbursement and regulation; broad community, and organizational considerations in medical care organizations. The student is introduced to the principles of epidemiology and environmental health and demonstrates the application of epidemiology concepts to planning for the healthcare service needs of a population. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Fall.

HLTH 6070 - International Health Policy and Management (3 Credits)
A framework for understanding national health reform policy and management issues in the U.S. and other nations, including industrialized, developing, and transforming nations. This course combines classroom and on-line teaching. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Fall.

HLTH 6071 - Introduction To Health Information Technology (3 Credits)
Examines what needs transforming in healthcare to improve value, safety, and appropriateness of care, and what the role of IT is in that transformation. IT also examines the challenges of cultural change and IT strategy in succeeding with clinical information projects. Differences between installation, implementation, transition and actual transformation are suggested, and methods for managing subcultures in healthcare (IT, clinical, administrative) are reviewed. Cross-listed with ISMG 6071. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD, MBAH and INFS majors within the Business School.
Typically Offered: Spring.

HLTH 6072 - Management of Healthcare Information Technology (3 Credits)
Provides an introduction to the management of information technology in healthcare. A description of information processing, the origin, content, evolution of healthcare information systems, and the methodologies deployed to acquire and manage information requirements are discussed. Cross-listed with ISMG 6072. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD, MBAH and INFS majors within the Business School.
Typically Offered: Fall.

HLTH 6075 - International Health Travel Study (3 Credits)
Experiential course, which is designed to open students up to innovative health delivery practices in an international location. Students learn how health issues such as reproductive health, infectious diseases, mental health, health and economy, and chronic diseases are handled in community and public health settings. Class trips are usually 14-18 days to an Asian country during the month of January. Prereq: HLTH 6010 or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6730 - Healthcare Operations Management (3 Credits)
Students in this course will obtain a comprehensive and practical examination of operations management with an emphasis on application to health care organizations. Students will use mathematical and basic spreadsheet skills to critically assess patient flows, volume projection, and supply chain management to improve the efficiency of service delivery in health care organizations. Detailed content on reducing cycle times (e.g., patient wait times), measuring productivity, streamlining process flows, tracking outcomes, staffing, and performance metrics will be presented in the course. Max hours: 3 Credits.
Grading Basis: Letter Grade

HLTH 6740 - Profiles in Health Care (3 Credits)
This colloquium provides a rare opportunity for students to interact with top CEOs from health care organizations around the country. Students learn about HMOs, hospitals, medical group practices, consulting, managing careers, how to get jobs, and how to be successful in a job. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.
Typically Offered: Spring.
HLTH 6770 - Healthcare Quality and Outcomes (3 Credits)
Studies the identification, measurement and improvement of healthcare quality. Covers, historic and contemporary views of quality, improvement theories and methods, organizational quality systems, leadership, patient safety, cost and quality, quality measurement and reporting, clinical outcomes, care redesign and medical terminology. Restriction: Restricted to HLAD and MBAH majors within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6800 - Special Topics (3 Credits)
Offered irregularly. Current interests in the health management field.
Topics recently offered include: international health, ethics, general systems theory, and key issues for health systems. Consult the current "Schedule Planner" for semester offerings. Prerequisites vary according to topics and instructor requirements. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6840 - Independent Study: HLTH (1-8 Credits)
Instructor approval required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6911 - Health Field Studies (3 Credits)
The objective of this course is to expose students to health care organizations with which they are not familiar. Each student is assigned to a health care organization and given a specific problem or project to complete. Prereq: HLTH 6010 or permission of instructor. After registration, please contact Errol.Biggs@ucdenver.edu for further instructions. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to HLAD and MBAH majors within the Business School.

HLTH 6912 - Internship (1-3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Repeatable. Max hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.

HLTH 6800 - Special Topics (3 Credits)

ISMG 5080 - SQL Foundations (1 Credit)
Structured Query Language (SQL or "Sequel") is a special-purpose language designed for managing data in a relational database and is necessary for careers dealing with data across many business roles. This class introduces students to data management concepts and terminology. This class will prepare you to extract data from relational databases using SQL syntax shared by many types of databases, such as PostgreSQL, MySQL, SQL Server, and Oracle. Cross-listed with ISMG 3080. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ISMG 5090 - Introduction to Python for Business (1 Credit)
Python is a high-level programming language used by companies like Google, Facebook, and JP Morgan to solve common business and decision problems. This course introduces the Python programming language and the Pandas data analysis package to enable students to write simple data manipulation and analysis programs. The course uses business applied cases and dataset to enable students to increase decision making efficiency and productivity. It introduces algorithmic thinking skills that are beneficial for every manager in today's data-rich economy and can also serve as a starting point for learning more advanced programming skills. Cross-listed with ISMG 3090. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ISMG 5939 - Internship (1-3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Repeatable. Max hours: 9 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 9.

ISMG 6020 - Programming Fundamentals with Python (3 Credits)
This course is designed to provide a thorough introduction to Python and fundamental programming concepts like data structures, networked application program interfaces, files and databases. Principles of object-oriented programming and secure programming practices are demonstrated using programming constructs taken from the business domain. Students are required to design and create their own applications for data retrieval, processing, and visualization. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Recommended prerequisite: ISMG 6080 or equivalent database experience. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall, Spring.

Information Systems (ISMG)

ISMG 5050 - Intermediate Excel for Business (1 Credit)
Spreadsheet software remains one of the essential digital skills required by businesses. In this course, you will learn key Excel skills including creating charts/graphs, filtering information, using pivot tables to summarize data, mastering Excel functions including sumif, countif, and vlookup. Cross-listed with ISMG 3050. Max hours: 1 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ISMG 5070 - Introduction to Tableau (1 Credit)
Tableau is a widely used business intelligence (BI) and analytics software that makes it easier for people to explore and understand data. This class introduces data management concepts and terminology, provides basic proficiency in analyzing and exploring data in Tableau. Students will transform raw data to meaningful visualizations and insights, create interactive dashboards and stories, and handle multiple data sources in Tableau. Cross-listed with ISMG 3070. Max hours: 1 Credit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.
ISMG 6028 - Travel Study Topics (3 Credits)
Join your classmates in an international travel study course to understand the business operations of another culture. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

ISMG 6060 - Analysis, Modeling and Design (3 Credits)
Provides an understanding and application of systems analysis and design processes. Students are exposed to system development life cycle (SDLC), structured systems analysis and design methods, object-oriented analysis and design methods, prototyping and commercial off-the-shelf package software approaches, and joint and rapid application development. Emphasizes the skills required for system analysts such as analytical, interpersonal, technical, fact-finding, and project management skills. Topics include data, process and object modeling, input-output and user interface design, and systems implementation and support. To provide an opportunity to develop these skills, an information system project is completed by a group of students. Students use a Case tool for their group project. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors

Typically Offered: Fall.

ISMG 6080 - Database Management Systems (3 Credits)
The success of today's business often hinges on the ability to utilize critical information to make the right decisions quickly and efficiently. Transforming mountains of data into critical information to improve decision making is a skill every business decision maker must possess. This focus course covers the database design topics with a focus on enabling business decision making. Detailed topics include collecting, capturing, querying and manipulating data (using SQL and QBE) for simple to medium complex business applications. Commercial database products are utilized to demonstrate the design of database applications in management, marketing, finance, accounting, and other business areas. Students will be able to demonstrate the design of database applications after successful completion of this course. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors

Typically Offered: Fall, Spring.

ISMG 6120 - Network Design and Analysis (3 Credits)
Communication, knowledge sharing, and information acquisition within and between businesses are critical for long term strategic business success. Technological advancements are radically changing the way business communication and knowledge sharing are performed. This course will briefly examine the traditional concepts of local and wide area networks for reference purposes, but then will focus on how newer technologies are changing business practices. Traditional local and wide area network concepts that will be covered in this course include WiFi wide area networks, wireless local area networks, cellular networks, and additional supporting services. Newer technologies that will be covered include social computing, Internet of Things, and artificial intelligence. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors

Typically Offered: Spring.

ISMG 6180 - Information Systems Strategy (3 Credits)
Digital strategy is the application of digital technologies to business models to form new differentiating business capabilities. The course starts with the highlights of genesis and importance of IT in organizations, including the relationship between digital technology and competitiveness. Then, the development and management of an effective digital infrastructure are discussed. Realizing that the effective use of digital technology requires the alignment of competitive strategies, business processes, and applications, the course takes a top management perspective on the development of policies and plans that maximize the contribution of digital technologies to organizational goals. A broad overview of how systems support the operational, administrative, and strategic needs of organizations is covered. Cross-listed with BUSN 6610. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors

Typically Offered: Fall, Spring, Summer.
ISMG 6220 - Business Intelligence Systems and Analytics (3 Credits)
This course covers business intelligence, analytics, and artificial intelligence technologies and is organized around three types of analytics that are enabled by those technologies: descriptive, predictive, and prescriptive analytics. The theme of artificial intelligence runs throughout the course from business intelligence, to machine learning and deep learning as applied in areas such as computer vision, autonomous vehicles, and robots. The topics will be discussed using concepts and theory, business cases and applications, and hands-on analysis or model building using datasets available in the public domain, with the hands-on analysis and model building being the focus of the course. Students will use a leading BI software and a cloud computing platform to perform analysis and build machine learning models. Note: The recommended prerequisite for this course is ISMG 6080. If you are familiar with SQL and have worked with databases in the past, you satisfy the prerequisite requirement for this course. Cross-listed with BUSN 6812. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall, Spring.

ISMG 6340 - Cloud Computing Concepts, Tools, and Security (3 Credits)
This course provides an introduction to cloud computing concepts, capabilities, and scenarios where cloud computing technology can be leveraged. Students will learn the basic building blocks of cloud computing, investigate the various types and models of cloud computing, and identify how businesses can implement these technologies. This class uses hands-on labs to give students real-world practice on how to configure and secure a cloud computing environment. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Summer.

ISMG 6470 - Text Data Analytics (3 Credits)
This course covers algorithms and tools that are required to perform quantitative analyses of unstructured text data. Concepts and algorithms that will be covered include Zipf's Law, Power Law Distribution, Pattern Discovery, Inverse Document Frequency, measurements of Document Clustering and Similarity and so on. R will be introduced as a practice tool to practice quantitative analysis of text data. After the completion of this course, students will be able to uncover and visualize underlying themes and concepts which might be latent in large text documents. Note: The recommended prerequisite for this course is ISMG 6020. If you are familiar with programming and have worked with programming languages in the past, you satisfy the prerequisite requirement for this course. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall.
ISMG 6480 - Data Warehouse and Administration (3 Credits)
Management of large, complex data warehouses and operational databases involves technical skills and background needed by information systems professionals as well as tactical and strategic issues faced by information technology managers. This course provides conceptual knowledge, practical skills, and policy background for prospective information systems professionals and information technology managers. The course covers business aspects, conceptual background, and product material about management of data warehouses and operational databases. Assignments and projects involve Oracle skills for database administration and tactical or strategic issues faced by information technology management. Prereq: ISMG 6080. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ISMG 6080 Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Spring.

ISMG 6510 - Accounting and Information Systems Processes and Controls (3 Credits)
Designed to develop knowledge and skills used to understand and evaluate corporate accounting processes and systems. Focuses on financial and information system internal controls and the flow of corporate information through an accounting system. A financial system objective and risk assessment approach issued to present concepts and techniques for evaluating the adequacy of system processes and controls. Cross-listed with ACCT 6510, 4780 and ISMG 4780. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors

ISMG 6800 - Special Topics (3 Credits)
A variety of advanced topics are offered in this course. Past topics include the human-computer interface, software engineering, artificial intelligence, graphical user interface, project management and electronic commerce. Consult the current 'Schedule Planner' for semester offerings. Note: Seldom offered. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors

ISMG 6810 - Business Intelligence in Healthcare (3 Credits)
Provides students with an overview of how business intelligence is used in the healthcare industry. Students study the evolution of IT in healthcare including digitization of electronic health records and systems integration. Next the course looks at healthcare transformation and the evolution of business intelligence in general. Using case studies and hands on exercises, students learn about different aspects of business intelligence in various subsets of the healthcare industry. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Fall.

ISMG 6820 - Business Intelligence and Financial Modeling (3 Credits)
This course will introduce students to the application of business intelligence in a corporate finance setting. Financial data intelligence is essential for effective decision making throughout the firm, in finance directly and in other functions supported by the finance department. Strategy setting, budgeting, and new product development are just a few decision areas where finance personnel play an active role. In this course, we learn how to apply business intelligence software tools to enable finance personnel to access and analyze corporate data in support of critical decision making across the enterprise. Students will also analyze data through the use of financial models built in Microsoft Excel. The development of complex financial models will provide students with valuable hands-on experience with a software tool used widely incorporate finance departments. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Cross-listed with ISMG 4750 and FNCE 4750. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Spring.

ISMG 6830 - IT Governance and Service Management (3 Credits)
Deals with interrelated decisions on clarifying the business role of IT, defining integration and standardization requirements for the IT architecture, shared and enabling services for the IT infrastructure and business need for SaaS, and governance of cloud computing, IT outsourcing, and other IT services. Restriction: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Recommended Prerequisite: ISMG 6180 or BUSN 6610. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors
Typically Offered: Spring.
ISMG 6840 - Independent Study: ISMG (1-8 Credits)
Instructor approval required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

ISMG 6860 - Ethical Hacking Concepts and Methodologies (3 Credits)
From a technical perspective, organizations need to know how hackers work so that they can build their security around it and take preemptive measures against future attacks. The goal of ethical hacking is to understand current exploits and assess weaknesses and vulnerabilities of various organizational information systems by attacking them within legal limits. This course is designed to provide students an insight into current hacking tools and techniques used by hackers and security professionals to break into any computer systems. Throughout the course, students will engage in offensive and defensive hands-on exercises stressing ethical hacking and penetration testing that will be conducted in a vendor-neutral virtual environment. Topics include security threats and attack vectors, footprinting and reconnaissance, Google hacking, social engineering, insider threat, network scanning and enumeration techniques, vulnerability assessment, the Dark Web, and attack and defense strategies in emerging technologies, such as the Internet of Things (IoT) and cloud computing. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Cross-listed with ISMG 4860. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.
Typically Offered: Fall, Spring.

ISMG 6865 - Digital Forensics Analysis (3 Credits)
From cyberterrorism to identity theft, the digital age has brought about a change in how crime is being committed. The usage of computers and the Internet in crime has led to the emerging field of digital forensics. Most businesses employ digital forensic experts to identify cyber threats, protect against insider threats, reinforce data loss prevention, reduce the risk of identity theft, fraud, and other digital crimes, and aid in the collection of digital evidence for various investigations. This course is designed to provide students the necessary skills to perform an effective digital forensics investigation. It presents a methodological approach to digital forensics, including searching and seizing, chain-of-custody, acquisition, preservation, analysis, and reporting of digital evidence. It covers major forensic investigation scenarios that enable students to acquire necessary hands-on experience on various forensic investigation techniques and standard forensic tools required to successfully carry out a digital forensic investigation leading to the prosecution of perpetrators. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Cross-listed with ISMG 4865. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.
Typically Offered: Fall, Spring.

ISMG 6885 - Ethics: A Formula for Success (3 Credits)
Students will learn how to spot and address red flags that foster unethical behavior in both publicly-traded and privately-held businesses. Governance and stakeholder management techniques that incentivize ethical behavior will be highlighted using examples of companies that are financially successful by “doing the right thing.” Principle-based ethics are emphasized, namely, integrity, trust, accountability, transparency, fairness, respect, viability, and compliance with the rule of law. Cross-listed with MGMT 3420, MGMT 6420, ISMG 4785. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business school students.

ISMG 6890 - IT Risk Management (3 Credits)
This course provides an overview of IT risk management practices. Students will learn the elements of risk management and the data necessary for performing an effective risk assessment. Various risk management models will be introduced to demonstrate the methods that can be implemented to achieve Confidentiality, Integrity, and Availability of information systems. This class uses hands-on labs to give students real-world practice utilizing Security Information and Event Management (SIEM) software to gain an understanding of how to detect and respond to a cyber threat. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.
Typically Offered: Spring.
ISMG 6910 - Design Science Practicum (3 Credits)
This is designed to be one of the final courses in the MS Information Systems degree. "Design Thinking" with user-centered perspectives will serve as a guiding principle to challenge assumptions and refine business problems to perform the final project. The instructor will provide students with tools and methods to identify, define and solve problems. Active discussion and creative presentation are core activities of this capstone course. Students will integrate what they have learned into a final project that can be either real-world problem designed in collaboration with an organization or a research paper on an emerging topic in the field. The final project will have multiple deliverables including a paper and a professional presentation to stakeholders who are directly related with the business problems defined in the project. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ISMG 6950 - Master's Thesis (1-8 Credits)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 8.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.
Additional Information: Report as Full Time.

ISMG 7800 - Special Topics (3 Credits)
A variety of advanced topics are offered at the Ph.D. level in this course. Consult the current 'Schedule Planner' for semester offering. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.
Typically Offered: Spring.

ISMG 7840 - Independent Study: Pre-Dissertation Research (1-9 Credits)
Conduct pre-dissertation research under the supervision of a faculty member. Prereq: BUSN 6530. Repeatable. Max Hours: 18 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 18.
Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.

ISMG 8990 - Dissertation Development (1-15 Credits)
Supports development of a dissertation in conjunction with a student's advisor. Prereq: Completion of first year and second year papers (ISMG 7840).
Restriction: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 15.
Restrictions: Restricted to graduate majors within the Business School, graduate majors within the College of Engineering, Design and Computing, PHCS PhD majors and PhD majors.
Additional Information: Report as Full Time.

International Business (INTB)

INTB 5800 - Special Topics in International Business (3 Credits)
Current topics in international business are occasionally offered. Consult 'Schedule Planner' for specific course offerings or contact an advisor for information. Prereq: Topics vary depending on the topic and the instructor requirements. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 9.

INTB 5939 - Internship (1-3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Prereq: 21 semester hours and a 3.5 grade-point average. Repeatable. Max Hours: 9 Credits.

INTB 6000 - Introduction to International Business (3 Credits)
This course examines the international business environment, its impact on business operations across borders, and the international dimensions of key business and managerial functions. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6020 - Cross-Cultural Management (3 Credits)
Focuses on the management of diverse socio-cultural and political norms and values in the global marketplace. The goal of this course is to develop skills in managing impacts of such values and norms on the effectiveness of international business operations and managerial activities. Prereq: INTB 6000 or permission of instructor. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6022 - International Business Negotiations (3 Credits)
Examines the international dimensions of business negotiations. It addresses the impact of the cultural, legal, political environments in the negotiation process, and examines similarities and differences in negotiation styles and approaches across borders. (This course qualifies as an international elective for the MS in International Business program.) Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
**INTB 6024 - International Trade Finance and Management (3 Credits)**
Provides an overview of international trade finance and trade management. It examines the roles played by various parties involved in international trade, addresses key methods of international payment and related financing, and provides practical experiences on how to manage the import and export trade management process. (This course qualifies as an international elective for the MS in International Business program.)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.  Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

**INTB 6026 - Marketing Challenges at the Global Frontier (3 Credits)**
Explores problems, practices, and strategies involved in marketing goods and services internationally. Emphasized analysis of uncontrollable environmental forces, including cultures, governments, legal systems, and economic conditions, as they affect international marketing planning. Emphasis on practice through the use of projects and speakers.
Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD. Note: students cannot receive credit for both MKTG 6020 and INTB 6026. Cross-listed with MKTG 6020. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560. Instructor may waive coreq for business students.

**INTB 6028 - Global Study Topics (3 Credits)**
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with ENTP 4028, ENTP 6028, and INTB 4028. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

**INTB 6030 - 11-Month MBA International Business Study Abroad (3 Credits)**
The 11-Month MBA International Business Study Abroad is an experiential learning course conducted abroad. Available for 11-Month MBA students only.
Grading Basis: Letter Grade
Restrictions: Restricted to AMBA majors within the Business School.

**INTB 6040 - Managing Global Talent (3 Credits)**
This course has two objectives: (1) to understand the impact of cultural differences in the management of people in multinational firms; and (2) to compare and contrast critical human resource issues in the contexts of domestic and international operations. Topics include recruitment, staffing, training, performance appraisal, compensation, and labor and management relations in markets around the world. (This course qualifies as an international elective for the MS in International Business program.)
Prereq: BUSN 6520 or BUSN 6521 or MGMT 6380 with a grade of C (2.0) or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with MGMT 6040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560 or BUSN 6520 or MGMT 6380 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

**INTB 6060 - The Legal Aspects of International Business (3 Credits)**
Analyzes the legal aspects of international business transactions and considers risk-reducing mechanisms such as letters of credit and arbitration. The course examines NAFTA, the European union, and other international trading structures and rules, giving the background for export or import activities. (This course qualifies as an international elective for the MS in International Business program.)
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560. Note: Students cannot receive credit for both MKTG 6080 and INTB 6060. Cross-listed with MKTG 6080. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560 or BUSN 6520 or MGMT 6380 with a grade of C (2.0) or higher. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

**INTB 6082 - Marketing in Emerging Markets (3 Credits)**
Explores problems, practices, and strategies involved in marketing goods and services in emerging markets. Emphasizes analysis of uncontrollable environmental forces, including cultures, governments, legal systems, and economic conditions, as they affect the marketing plan. (This course qualifies as an international elective for the MS in International Business program.)
Prereq: BUSN 6560. Note: Students cannot receive credit for both MKTG 6080 and INTB 6082. Cross-listed with MKTG 6080. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

**INTB 6094 - Marketing Issues in the Chinese Environment (3 Credits)**
This course assesses numerous marketing and marketing related topics in the Chinese environment with the objective of helping the graduate student develop managerial and marketing expertise. In specific, the course pinpoints key developments in the Chinese business environment, develops expertise in conducting market opportunity analysis, assesses market entry conditions and strategies and applies marketing mix strategies in the context of the Chinese environment. Note: It is recommended for students to take BUSN 6560 or INTB 6000 prior to this course. Cross-listed with MKTG 6094. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
INTB 6200 - International Business Policy (3 Credits)
The objective of this course is to develop competence relevant to strategy formulation and implementation in a multi-national enterprise, and in an international context. Provides theoretical knowledge, skills, and sensitivities that help deal effectively with the strategic and managerial problems of managing in a global environment. Prereq: INTB 6000 or ENTP 6826. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.

Grading Basis: Letter Grade
Prereq: INTB 6000 or ENTP 6826. Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6270 - Intercultural Communications (3 Credits)
The age of globalization means we are all neighbors, working across national boundaries and even continents. This class examines the philosophies, processes, problems, and potentials unique to communicating across cultures to address issues of social justice and ethical intercultural practices. We will consider the important role of context in interactions across cultures and subcultures, globally, transnationally, and within the U.S. Restriction: Restricted to NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with COMM 4270 and COMM 5270. Max hours: 3 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

Typically Offered: Fall, Spring.

INTB 6370 - International Accounting (3 Credits)
Designed to expose students to the international aspects of accounting and financial management. Includes discussion of some of the different financial accounting practices across countries; financial statement analysis in a global context. IFRS’s are reviewed and compared with the requirements of US GAAP. Note: Students cannot receive credit for both ACCT 6370 and INTB 6370. Prereq: BUSN 6550 or ACCT 6031. Cross-listed with ACCT 6370 and ACCT 4370. Max hours: 3 Credits.

Grading Basis: Letter Grade
Prereq: ACCT 6031 or BUSN 6550. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

Typically Offered: Spring.

INTB 6372 - International Financial Management (3 Credits)
Addresses financial management in an international context that considers international capital movements and foreign exchange problems, and international operations as they affect financial functions. It reviews foreign and international institutions and the foreign exchange process and considers financial requirements, problems, sources, and policies of firms doing business internationally. Meets concurrently with FNCE 6370. Prereq: BUSN 6640. Cross-listed with FNCE 6370. Max hours: 3 Credits.

Grading Basis: Letter Grade
Prereq: BUSN 6640 with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6411 - International Corporate Governance (3 Credits)
Discusses the structure and goals of the modern corporation, the primary governance mechanisms used to help companies achieve these goals, and how and why these roles, goals, and mechanisms vary across nations. The topics covered in the course include managerial compensation, board of director structure and ethics, shareholder activism, and how governance structures differ across countries. (This course qualifies as an international elective for the MS in International Business program). Prereq: BUSN 6640 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Note: Students cannot receive credit for both FNCE 6411 and INTB 6411. Cross-listed with FNCE 6411 and FNCE 4411. Max hours: 3 Credits.

Grading Basis: Letter Grade
Prereq: BUSN 6640 with a C or higher Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6460 - Emerging Market Finance (3 Credits)
This course aims to explore key emerging market finance issues from the perspectives of corporations, investors and markets. Emerging economies are deemed to be the engine of growth opportunities in the world economy. However, compared with developed markets, they typically have some unique features in their economic systems and financial markets, and thus different risk and return characteristics, leading to special considerations of capital budgeting, financing and investing in these economies. This course is to help develop a better understanding of financial markets, corporate finance and investments in emerging economies, with case studies on some major emerging markets (e.g., China, India). Prereq: BUSN 6640. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with FNCE 6460. Max hours: 3 Credits.

Grading Basis: Letter Grade
Prereq: BUSN 6640 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

INTB 6500 - International Business Consulting (3 Credits)
This action-learning course provides students the opportunity to work with and consult for a company at the senior executive level (e.g., CEO, Business Unit heads) in order to add value to the firm's international business. Students will apply international business principles and practices to address a strategic, functional, operational, or geographic opportunity facing a sponsoring organization. In addition, students will gain "on the job learning" of key protocols in an international business consulting context. Note: Because the topics change each term, student may take this course twice. Work with an advisor to make sure there is room in your degree plan before enrolling in the second course.
Repeatable. Max Hours: 6 Credits.

Grading Basis: Letter Grade

INTB 6600 - Blockchain and Emerging Technologies Impact Globalization (3 Credits)
Examines Blockchain and digital technologies powering globalization--how they are driving instant access to information, boosting transaction speed, and broadening the scope and reach of business across borders. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.

Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.
INTB 6730 - Supply Chain Analytics (3 Credits)
Introduces the design, analysis, management, and control of supply chains. Because of continuing advances in globalization, sustainability, and information technology, course emphasis will include integration of processes and systems, relationship management of upstream and downstream players, and strategies that incorporate current and future trends. Cross-listed with BANA 6730. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6750 - Research Methods in International Business (3 Credits)
Focuses on three major issues: (1) research design from an international management perspective (e.g., qualitative, quantitative and ethnographic); (2) topical issues (e.g., culture, international negotiations, mergers and alliances); (3) trends in international business research (e.g., cross-national project teams, emerging theoretical perspectives). This course qualifies as an international elective for the MS in International Business program. Note: Available to students as Independent Study only. Prereq: INTB 6000 and BUSN 6530 or equivalent. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6800 - Special Topics in International Business (3 Credits)
Current topics in international business are occasionally offered. This includes international field study courses. Consult the ‘Schedule Planner’ for specific course offerings or contact an advisor for information. (This course qualifies as an international elective for the MS in International Business program.) Prereq: Topics vary depending on topic and instructor requirements. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6830 - Marketing and Global Sustainability (3 Credits)
Marketing & Global Sustainability focuses on the role of marketing in sustainable for-profit and not-for-profit companies from a global perspective. The course examines sustainable business practices and trends; green brands, green labels, and greenwashing; socially-conscious and "green" customer segments; innovating for sustainable new products and services; sustainable retailing and supply chains; and sustainability as a competitive advantage. The course will employ a variety of pedagogical techniques including lectures, discussion, guest speakers, case studies, and projects. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Cross-listed with MKTG 6830. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Typically Offered: Fall.

INTB 6840 - Independent Study (1-8 Credits)
Instructor approval required. Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. (This course qualifies as an international elective for the MS in International Business program.) Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6870 - Global Climate Change (3 Credits)
Global climate change may be one of the most important challenges facing business in the 21st century. This course will introduce the potential impacts of climate, then discuss possible regulatory responses to and business risks and opportunities that may emerge if climate change occurs. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

INTB 6950 - Master's Thesis (1-8 Credits)
Prereq: INTB 6750. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP Repeatable. Max Credits: 8.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Additional Information: Report as Full Time.

Management (MGMT)

MGMT 5800 - Special Topics in Management (3 Credits)
A number of different topics in management are offered under this course number. Consult the Schedule Planner for current course offerings. Prerequisites vary depending on the topic and instructor requirements. Cross-listed with MGMT 4950. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

MGMT 5939 - Internship (1-3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Prereq: 21 semester hours and 3.5 GPA. Repeatable. Max Hours: 9 Credits.

MGMT 6020 - Leadership in Difficult Times (3 Credits)
The test of a leader often is their ability to lead their organizations through difficult times and crises. Such situations could be downsizing, product defects, ethical violations, a terrorist attack or a natural disaster. Successful management of these situations can strengthen and renew the organization. Inability to manage these situations can tarnish the organization's reputation and threaten its survival. This course examines leadership under stress and provides frameworks for categorizing and analyzing these difficult situations. The course also addresses strategies that leaders can use to enable their organizations to manage, recover and learn from these difficult experiences. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
MGMT 6028 - Travel Study Topics (3 Credits)
Join your classmates in an international travel study course to understand the business operations of another culture. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Additional Information: Global Education Study Abroad.

MGMT 6040 - Managing Global Talent (3 Credits)
This course has two objectives: (1) to understand the impact of cultural differences in the management of people in multinational firms; and (2) to compare and contrast critical human resource issues in the contexts of domestic and international operations. Topics include recruitment, staffing, training, performance appraisal, compensation, and labor and management relations in markets around the world. (This course qualifies as an international elective for the MS in International Business program).
Restriction: Restricted to graduate Business majors and NDGR majors with a sub-plan of NBA or NBD, within the Business School. Cross-listed with INTB 6040. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

MGMT 6320 - Leading Organizational Change (3 Credits)
The course focuses on the tasks and skills of a leader that are important for leading organizational change. Topics include: diagnosing problems, creating urgency, building the change team, creating a vision, implementing change strategies, sustaining the momentum and making change stick. These tasks and skills are studied in various change contexts. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6360 - Designing Effective Organizations (3 Credits)
Examines how to design organizations within the context of environmental, technological, and task constraints. The emphasis is on learning how to recognize and correct structural problems through the analysis of existing organizations in which the students are involved.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6380 - Managing People for Competitive Advantage (3 Credits)
Focuses on the management of human resources in organizations. Oriented toward the practical application of human resources management principles in areas such as: equal employment opportunity, affirmative action, human resources planning, recruitment, staffing, benefits and compensation, labor relations, training, career management, performance management, and occupational health and safety.
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

MGMT 6420 - Ethics: A Formula for Success (3 Credits)
Students will learn how to spot and address red flags that foster unethical behavior in both publicly-traded and privately-held businesses. Governance and stakeholder management techniques that incentivize ethical behavior will be highlighted using examples of companies that are financially successful by “doing the right thing.” Principle-based ethics are emphasized, namely, integrity, trust, accountability, transparency, fairness, respect, viability, and compliance with the rule of law. Cross-listed with MGMT 3420, ISMG 6885, and ISMG 4785. Restriction: Restricted to graduate business school students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business school students.

MGMT 6610 - Business Strategy Lab (3 Credits)
Gain strategy experience collaborating with and consulting to Senior Executives of a client company. This is a hands on, project-based course. Students will analyze a strategic initiative as defined by and with the organization’s leadership and provide their client with research, insights and actionable strategic ideas. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6620 - Strategic Management (3 Credits)
Concerned with the development of a general management perspective in establishing the strategic direction for an enterprise. Students gain an understanding of strategy formulation and implementation within the context of the global environment. Cross-listed with BUSN 6710.
Restriction: Restricted to graduate majors of ORMG within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors of ORMG within the Business School.

MGMT 6710 - HR: Talent MGT (3 Credits)
This course explores the many aspects of Talent Management including strategic talent planning, recruiting and acquisition, employee development, performance management, engagement and retention, succession planning, and compensation, with a strong focus on recruitment and acquisition. The course demonstrates how each aspect of Talent Management is interdependent. Prereq: MGMT 6380. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MGMT 6380 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6720 - Human Resources Management: Training (3 Credits)
Covers training methods, theories, research findings. Students design and deliver their own training program, including collecting and analyzing metrics to gauge training success. Coreq: MGMT 6380. Cross-listed with MGMT 4430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-req: MGMT 6380 Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
MGMT 6730 - Human Resources Management: Performance Management (3 Credits)
Focuses on the design and implementation of human resources management systems to assess and enhance employee performance. Areas of study include performance measurement, rater training, goal setting and feedback. Prereq: MGMT 6380. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380, MGMT 6530

MGMT 6740 - Human Resources Management: Compensation (3 Credits)
Develop and administer pay systems considering economic and social pressures, traditional approaches and strategic choices in managing compensation. Current theory research and practice. Students design a compensation strategy and a system that translates that strategy into reality. Prereq: MGMT 6380 and BUSN 6530. Cross-listed with MGMT 4450. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380, MGMT 6530

MGMT 6750 - HRM: Investing in People: HR Analytics (3 Credits)
Managing talent-organization and deployment- and connections between talent and strategy in organizations. Rooted in a systematic, logical approach that challenges traditional ideas. Stresses the logical connections between progressive HR practices and firm performance and the use of data to demonstrate financial impact of the connections. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380, MGMT 6530

MGMT 6760 - Employee Benefits and Workforce Risk Management (3 Credits)
The course surveys an array of popular employee benefit programs to attract, protect, and retain valued employees. It also focuses on risk management programs that invest in human capital and address the downside risks of employing a workforce. Cross-listed with MGMT 4460 and RISK 4409/6409. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380

MGMT 6761 - Human Resources Management: Career and employment coaching. (3 Credits)
Focuses on enhanced approaches to discovering employment opportunities and providing career coaching, with an emphasis on unemployed veterans. Topics include discovering the unique capabilities a job-seeking veteran possesses, addressing the barriers to employment he or she may face, and methods the job seeker can use to educate prospective employers about the contributions to organizational success he or she can make. Cross-listed with MGMT 4481. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380

MGMT 6782 - Human Resources Management: Connecting talent with business needs (3 Credits)
Focuses on methods for connecting businesses and public-sector organizations with job seekers who possess the capabilities that will fuel profitable growth and mission success. Topics include networking to establish relationships with hiring decisions makers, exploration conversations to identify an organization's success factors, and identifying job seekers (with a special emphasis on unemployed veterans) with the requisite skills, knowledge, traits, and aptitudes. Cross-listed with MGMT 4482. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380

MGMT 6800 - Special Topics in Management (3 Credits)
Current topics in management will be occasionally offered. Consult the 'Schedule Planner' for specific offerings or contact an advisor for information. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380

MGMT 6801 - Career Strategies (3 Credits)
The downsizing, restructuring, and re-engineering so prevalent in U.S. industries and companies have strongly affected the job and career market. Every individual must sharpen his/her competencies and skills in order to compete effectively in the changing job market. This course is designed to assist students in understanding and operating in this difficult job market. Using many of the concepts that organizations use in their strategy formulation process, and coupled with individual techniques and skills proven effective in job searches and career planning, this course prepares students to deal with the issues involved in finding a job and pursuing a career. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380

MGMT 6803 - Visionary Leadership (3 Credits)
Examines the challenges faced by visionary leaders and the approaches used by these individuals (creation, articulation, and implementation of vision) to transform organizations. Participants utilize these approaches employed by effective leaders to develop plans for their own organizational success. Group experiences, applied readings, and videos are used to clarify the opportunities available. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380

MGMT 6804 - Negotiation and Conflict Management. (3 Credits)
Designed as a seminar in negotiation and conflict management. Students will practice and develop negotiation and conflict management skills as they use them to craft deals and resolve differences. Students will learn how negotiation and conflict management strategies and tactics vary depending on the situation encountered. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre-requisite: MGMT 6380
MGMT 6806 - Corporate Entrepreneurship (3 Credits)
Competitive performance in a global economy requires continuous innovation and new business growth. The creation and development of new ventures is a primary strategy for internally-generated growth. Managing innovation and new ventures requires attitudes, knowledge, and practices different from those usually required for the management of mature business units. This course provides the perspective, knowledge, and specific skills required for successful entrepreneurial management. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6808 - Leadership Development (3 Credits)
Instruction in the design and practice of leadership development. Case studies of effective organizations will be examined and a variety of assessment and development activities will be completed as part of the course. Students will learn how to develop others while experiencing the development techniques first hand. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6820 - Management Field Studies (3 Credits)
The objective of this course is to provide an opportunity for the in-depth examination of an actual management problem in a local organization. Much like an independent study conducted under faculty guidance, each student will execute a unique project suited to his or her interests. Priority is given to MGMT students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6821 - Managing for Sustainability (3 Credits)
This course will consider how companies are using social responsibility as a competitive advantage. The so-called green revolution is calling for organizations to take on increased responsibility for environmental conservation, employee well being, and community development. This course considers how organizations can work with various stakeholders (employees, customers, communities, society-at-large) to develop and promote mutually beneficial products and solutions to key social needs and concerns. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6822 - Business Ethics and Corporate Social Responsibility (3 Credits)
Covers business ethics and corporate social responsibility in the global contexts of employment, marketing, product liability, the environment and other areas. Students compare ethical theories, including utilitarianism, Kantian, Rawlsian, stockholder, stakeholder and social contract and apply some or all of these theories to actual and hypothetical case studies. The doctrine of corporate social responsibility is defined and explored and diverging views of corporate social responsibility are discussed. Examples of how corporate social responsibility can increase a company's goodwill and net income are analyzed. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6823 - The Sustainable Business Opportunity (3 Credits)
This course examines the negative impact of a rapidly growing global economy on the natural and human environment. It shows that the need to create a more sustainable global economy represents a huge opportunity for business and how sustainability-based strategies drive innovation, competitive advantage and improved financial performance. It will explore both environmental aspects of sustainability like green supply chains, lifecycle analysis, energy and water efficiency, as well as initiatives that nurture and enhance the value of our human resources such as community development, employee and customer relations, employee wellness, telecommuting, and other stakeholder engagement in sustainability. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Typically Offered: Fall, Spring.

MGMT 6824 - Sustainable Business/CSR Field Study (3 Credits)
Gain practical, hands-on experience with aspects of sustainable business and/or corporate social responsibility. Work with a local company/non-profit/government organization under the direction of an executive to conduct a sustainability-focused project which is important to the organization’s sustainability initiative. Prereq: Completion of one or more sustainability focused courses or permission of instructor. Cross-listed with MGMT 4824. Max hours: 3 Credits.
Grading Basis: Letter Grade
Pre: ACCT 6285 or BUSN 6826 or 6830 or 6870 or DSCI 6826 or BANA 6730 or ENTP 6642 or 6644 or 6808 or 6850 or 6860 or INTB 6870 or MGMT 6821 or 6822 or 6823 or MKTG 6830. Restriction: Grad and NDGR majors with a sub-plan of NBA within the Business School.
Typically Offered: Fall.

MGMT 6825 - Sustainable Change Leadership: Turning Business Into a Force for Good (3 Credits)
This course develops leadership from the perspective of managing the people side of change required to transform a traditional business to one that is not only financially successful but also a genuine “force for good” for our natural and social environment. The B Lab Impact Assessment tool is used to measure, monitor, and link sustainable business practices to drive continuous improvement and innovation. Students will conduct hands-on, practical work with local businesses to develop change leadership skills as they relate to sustainability. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Cross-listed with MGMT 4825. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

MGMT 6826 - Business for a Better World (3 Credits)
Introduces the main concepts and tools of sustainable business, such as life-cycle analysis, circularity, Context-based sustainability, carbon footprinting, market failure, closed-loop systems, DfE (Design for the Environment), corporate sustainability reporting, then examines how companies can move from doing less bad to making the world better. Note: Typically offered in the Fall. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
Typically Offered: Fall.
MGMT 6827 - Global Climate Change (3 Credits)
Global climate change may be one of the most important challenges facing business in the 21st century. This course will introduce the potential impacts of climate, then discuss possible regulatory responses to and business risks and opportunities that may emerge if climate change occurs. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6830 - Sports and Entertainment Management (3 Credits)
This course is designed as a speaker series of sports and entertainment industry elite focusing on: industry trends, strategic planning, managing revenue streams, managing media, managing for effectiveness, managing post-merger integration, leadership and leading change. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6832 - Law and Negotiation in the Sports/Entertainment Industries (3 Credits)
Provides an overview of major legal issues in the sports and entertainment industries. Students develop the skills required to negotiate contracts in these industries. Topics include contracts with athletes (agency, player and sponsorship), stadium financing and sports franchises, labor law and collective bargaining agreements, entertainment contracts in the music, film and live theater fields and copyright, trademark and tort law principles in the sports and entertainment industries. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MGMT 6834 - London Calling: Global Sports and Entertainment Management (3 Credits)
Through 2 weeks of visiting organizations and talking with industry elite in London a broader perspective on the Sports and Entertainment Industry is gained. Students will be asked to do advanced reading, participate in discussions, keep a journal and write a reflection paper at the end of the experience. Site visits (to be confirmed) include: Arsenal Football Club, Premier League, the O2 Arena, NHL and NBA regular season games in London, 2012 Olympics Committee, Formula One, Hollywood Studio-International Finance Office, Theatre, Lord's Cricket Ground, All England Lawn Tennis Club/Wimbledon and the office of the Minister of Sport. MKTG 6200 - CRM, Big Data, and Marketing Metrics (3 Credits)
CRM (Customer Relationship Management) involves the management of customer relationships to maximize customer benefits at minimal cost. It facilitates decision making about marketing strategies and tactics that are informed by the actual financial outcomes of these decisions. This course provides a toolkit of skills that will help in three areas, 1) identifying important marketing metrics, 2) making accurate assessments of metrics, and 3) applying the results to future decisions. Other topics include successful models of CRM, big data, marketing research, customer trust, customer loyalty, customer profitability, and CRM software. Coreq: BUSN 6560. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

MKTG 6700 - Marketing Travel Study (3 Credits)
This is a 2-week travel course, designed to focus on the marketing of the specific country we visit. In the past the travel course has been to Spain and Costa Rica, but the country of destination may be different every time (usually offered every other year). While in the country, students will visit companies (such as advertising agencies, marketing research firms, local grocery stores, marketing departments of multinational corporations, etc.), have lectures/discussions on marketing in that country and work on a marketing plan for a local company or not-for-profit organization. Prereq: BUSN 6560 with a C or higher. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Max hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

MKTG 6800 - Topics in Marketing (3 Credits)

Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School. Typically Offered: Fall, Spring, Summer.

MKTG 6820 - Sports & Entertainment Marketing (3 Credits)
This course focuses on techniques for formulating marketing plans for various types of sports organizations. The course deals with marketing issues particularly germane to sports organizations such as: fans as consumers, fan loyalty, sports pricing, servicescapes, player development and sports sponsorships. This course includes lectures, guest speakers, cases, examinations and student group projects. Max hours: 3 Credits. Grading Basis: Letter Grade

Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.
MKTG 6822 - "Fan"tastical Consumers of American Sports and Entertainment (3 Credits)
This course explores the study of consumer behavior via the lens of American Sports and Entertainment. Class occurs while students attend a variety of sports and entertainment performances. Students engage in experiential learning via participant and observation research techniques as they attend live performances of American sports and entertainment. The class will attend and study consumers and fans in a variety of venues, (e.g., Baseball, LaCrosse, Fun Run, Hike, Golf, Symphony, Rock Concert Festival, Jazz Concert Festival, American Ninja Warrior filming, Broadway Play, Cirque de Solei, and Museum exhibition). These performances primarily take place in downtown centers, e.g., Pepsi Center, Denver Performing Arts Complex, Coors Field, Sports Authority Field at Mile High, Walk or run through various Denver parks, 16th St. Mall, The Civic Center, the Denver Art Museum. Students will engage in observational and immersive consumer behavior research techniques as part of their experience. They will complete assignments relevant for consumer understanding and business practice. Special fee. Coreq: BUSN 6560. Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD. Max hours: 3 Credits. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD

MKTG 6824 - Sales and Negotiation (3 Credits)
This course focuses on developing executive sales skills and techniques, including contract negotiation, account management, and sales force. Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD

Typically Offered: Fall.

MKTG 6826 - The Sports and Entertainment Industry (3 Credits)
This course is designed as a speaker series of sports and entertainment industry elite focusing on: industry trends, strategic planning, management challenges, financing in sports and entertainment business (e.g., stadium/venue financing, sports team valuation, entertainment event guarantee estimation, player/artist salary issues, franchises, and managing disparate revenue streams), and major legal issues in the sports and entertainment industries (entertainment contracts, copyright, trademark and tort law). Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors and NDGR majors with a sub-plan of NBA or NBD within the Business School.

MKTG 6830 - Marketing and Global Sustainability (3 Credits)
Marketing & Global Sustainability focuses on the role of marketing in sustainable for-profit and not-for-profit companies from a global perspective. The course examines sustainable business practices and trends; green brands, green labels, and greenwashing; socially-conscious and "green" customer segments; innovating for sustainable new products and services; sustainable retailing and supply chains; and sustainability as a competitive advantage. The course will employ a variety of pedagogical techniques including lectures, discussion, guest speakers, case studies, and projects. Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD. Cross-listed with INTB 6830. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6560. Restriction: Restricted to graduate business students or NDGR majors and a sub-plan of NBA or NBD

MKTG 6834 - London Calling: Global Sports & Entertainment Management (3 Credits)
Through 2 weeks of visiting organizations and talking with industry elite in London a broader perspective on the Sports and Entertainment Industry is gained. Students will be asked to do advanced reading, participate in discussions, keep a journal and write a reflection paper at the end of the experience. Site visits (to be confirmed) include: Arsenal Football Club, Premier League, the O2 Arena, NHL and NBA regular season games in London, 2012 Olympics Committee, Formula One, Hollywood Studio-International Finance Office, Theatre, Lord's Cricket Ground, All England Lawn Tennis Club/Wimbledon and the office of the Minister of Sport. Restriction: Restricted to graduate business school students. Cross-listed with MGMT 4834, MGMT 6834, and MKTG 4834. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate business school students.

Additional Information: Global Education Study Abroad. Typically Offered: Summer.

MKTG 6840 - Independent Study (1-8 Credits)
Allowed only under special and unusual circumstances. Regularly scheduled courses cannot be taken as independent study. Prereq: Permission of instructor. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Restrictions: Restricted to graduate majors and NDGR majors with a sub-plan of NBA within the Business School.

Entrepreneurship (ENTP)

ENTP 5939 - Internship/Cooperative Education. (3 Credits)
Supervised experiences involving the application of concepts and skills in an employment situation. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Graduate level students.
ENTP 6020 - Business Model Development & Planning (3 Credits)
This course familiarizes students with the key steps for preparing an effective business plan for a new (or existing) business venture. Utilizing strategies based on research, students learn how to create an effective pitch, a superb slide deck, and a cutting-edge business plan. Real-world feedback from seasoned entrepreneurs is synergistically interwoven with coursework, and THE CLIMB | Jake Jabs Business Plan Competition events are used to further enhance the quality of one's business concept. Several past students have won prizes at THE CLIMB and launched successful businesses from concepts developed in the course. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

ENTP 6022 - Digital Disruption (3 Credits)
Jointly taught by one of Colorado's great entrepreneurs and an experienced professor, this CEO profiles course explores how digital innovations are disrupting traditional business practices. Students will participate in a team project where they identify an industry positioned for disruption, and then develop a relevant digital strategy. Students can also expect to learn from some of Colorado’s greatest digital and tech business leaders as key speakers. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

ENTP 6023 - Disruption in Private Equity and Real Estate (3 Credits)
This 'profiles' class combines the elements of two important investment pathways for the entrepreneur, namely Private Equity and Real Estate investing. Both these topic areas have experienced digital disruption in recent years and the course provides students with exposure to contemporary topics in both these fields. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6028 - Global Study Topics (3 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Cross-listed with ENTP 4028, INTB 4028, and INTB 6028. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Additional Information: Global Education Study Abroad.
Typically Offered: Spring, Summer.

ENTP 6110 - Innovation in Fintech (3 Credits)
Fintech describes products and opportunities at accruing when vast synergies between finance and technology can be effectively operationalized. It is rapidly changing the way we think about money and finance and it profoundly impacts banks, global financial markets, transaction speed and government regulations. The global fintech market is predicted to reach around $250 billion by 2027. Categories include peer-to-peer lending, digital wealth management, insurance, consumer finance, real estate, blockchain, automation, and payment systems. Max hours: 3 Credits.
Grading Basis: Letter Grade

ENTP 6120 - Disruption in Private Equity (1.5 Credits)
Private Equity firms now need to contend with digital transformation as a 'new dimension' not only in terms of value creation, but also in terms of its being an imminent threat to legacy business models and industries. This course discusses sources and techniques of venture capital, including recent disruptions in the field. Additional topics covered include the critical elements in the search for financing, techniques for analyzing value, and tax considerations. Note: This 1.5-credit, 8-week course is comprised of the first half of a 3-credit, 16-week course: Disruption in Private Equity and Real Estate (ENTP 6023). Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

ENTP 6130 - Disruption in Real Estate (1.5 Credits)
Real Estate has historically been an entrepreneurial industry that has created great wealth for many. It also has the advantage of market entry on a small scale which can be grown with the entrepreneur’s success. Key topics such as commercial real estate, brokerage, property management, institutional investing, residential development, investment vehicles, and market disrupters such as Zillow and Redfin will be covered. Note: This 1.5-credit, 8-week course is comprised of the second half of a 3-credit, 16-week course: Disruption in Private Equity and Real Estate (ENTP 6023). Max hours: 1.5 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

ENTP 6200 - Mission Driven Entrepreneurship (3 Credits)
The course is designed to teach students to rethink the common market driven approach to innovation, with a mission driven focus. In this course, students will learn that impact innovation exists in the public, private and non-profit sectors. Completing this course will dispel the idea that purpose driven innovation only exists in the non-profit realm. Restriction: Graduate level students. Typically Offered: Fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

ENTP 6420 - Ethics: Formula for Success (3 Credits)
Students will learn how to spot and address red flags that foster unethical behavior in both publicly-traded and privately-held businesses. Governance and stakeholder management techniques that incentivize ethical behavior will be highlighted using examples of companies that are financially successful by "doing the right thing." Principle-based ethics are emphasized, namely, integrity, trust, accountability, transparency, fairness, respect, viability, and compliance with the rule of law. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade

ENTP 6620 - New Venture Operations and Project Management (3 Credits)
Many viable businesses have failed due to cash flow problems, poor management, and poor execution. A course provides the project management knowledge and skills needed to build strong operation plans. Restriction: Restricted to graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
Typically Offered: Fall.
ENTP 6800 - Special Topics in Entrepreneurship  (3 Credits)
A variety of topics in entrepreneurship are offered. Consult the current ‘schedule Planner’ for semester offerings. Restriction: Graduate level students. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Graduate level students.

ENTP 6801 - Healthcare Innovation and Entrepreneurship  (3 Credits)
This hybrid course is intended for STEM and business majors who are interested in digital health entrepreneurship. After completing this course, students should be able to: understand and apply the principles and practice of digital health entrepreneurship, work in project teams to pursue a digital health opportunity and validate underlying business model canvas hypotheses, present their findings and decide whether and how to proceed. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6802 - Regulatory Environment of Life Science Innovation  (3 Credits)
This course is designed to familiarize engineering, business, law and life science students with the fundamentals of life science technology commercialization including drugs, devices, diagnostics, and healthcare IT and platform applications. Restriction: Restricted to graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

ENTP 6803 - Personal Branding  (3 Credits)
This course is designed to show students how to create successful personal brand strategies for professional and personal development in both entrepreneurial and intrapreneurial environments. The course work will demonstrate the imperative link between marketing and personal branding through case studies, projects, guest speakers and reading materials. Students will also leave the course knowing how to develop and implement a personal branding plan. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring.

ENTP 6804 - Legal and Ethical Issues of Entrepreneurship  (3 Credits)
This course addresses the legal issues most frequently encountered by entrepreneurs and others involved in startups and small, closely held or family businesses. The focus is on how to avoid legal problems and how best to cope when they arise. Topics include choice of business form, legal aspects of raising capital, taxation, intellectual property law, employment law, product liability, e-commerce and the problems of managing lawyers and litigation. Note: Cannot receive credit for both BUSN 6540 and this course. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6805 - Entrepreneurial Financial Management  (3 Credits)
This course provides a foundation for the financial management of an entrepreneurial business. Topics covered include differentiation from traditional corporate financial management assumptions, financial aspects of setting up a business, and how to create, evaluate, forecast, and analyze future financial statements. Students will examine theoretical and practical valuation techniques, considerations for buying versus starting a business and franchising. The course also discusses different choices for financing a new business, venture capital, angel financing, crowd funding, private equity and security laws, harvesting alternatives, and financial distress turnaround considerations. Cannot receive credit for both FNCE 6460 and this course. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6826 - International Entrepreneurship  (3 Credits)
This course focuses on the intersection of international business and entrepreneurship. Topics addressed include international entrepreneurship theory and practice (opportunity identification, processes and route to market). This course also highlights new topics in international entrepreneurship such as digital globalization and new technologies driving international entrepreneurship (blockchain and the global supply chain). Leading practitioners and entrepreneurs will be facilitating these modules. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6834 - Lean Marketing  (3 Credits)
This course teaches students how to create successful marketing strategies in entrepreneurial environments where resources are often limited and negative outcomes can be unforgiving. The course work will demonstrate the imperative link between the fundamental marketing principles and entrepreneurial lean marketing guiding principles through real-life case studies, project, videos, podcasts and reading materials. Students will leave this course understanding how to develop an effective and pragmatic marketing plan for an entrepreneurial venture. Restriction: Restricted to Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring.

ENTP 6836 - High Impact Sales for Entrepreneurs  (3 Credits)
Selling one’s own concept to prospective customers and investors is very different from selling products in a corporate environment. In this course, you will learn how to shift your mindset to an “ownership” stance, so as to effectively persuade clients, venture capitalists and angels, and other entrepreneurs to invest in your vision, your concept, and your authentic brand. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.
ENTP 6838 - Data Analysis in Innovation and Entrepreneurship (3 Credits)
Entrepreneurial activity based on sound data analytics greatly reduces the probability of new concept failure and increases the odds of continued venture success. This quantitative analytics course covers various aspects of data collection, assimilation, and analysis. Topics covered include questionnaire design, measurement, advanced multivariate analysis, and interpretive report writing. Both primary and secondary approaches, including making sense of big data, are covered. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

ENTP 6840 - Independent Study ENTP (3 Credits)
Restriction: Graduate level students. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Graduate level students.

ENTP 6842 - New Concept Development (3 Credits)
This course provides insights and tools that will help students assess the viability of new business concepts (a.k.a. those in the very early stages of development). Unlike the "business plan" course where students create an actual plan, this course will help students determine if a new business concept is truly worthy of a business plan. The main objective of the course focuses on understanding problems and solutions from the potential market's perspective. The value of the problem-solution approach is that it quickly gets to the reason why people buy things: to solve perceived problems. Along the way students will employ various experiential and theoretical learning aids to investigate a series of relevant topics such as product markets, new business concepts and entrepreneurial risk-taking. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6848 - Leadership in New Ventures (3 Credits)
This course provides students with an overview of key leadership principles for creating strategy and managing teams in a startup environment. It introduces leadership concepts critical to gaining true organizational commitment and focuses on case studies relevant to common business issues. By exploring what entrepreneurial leaders actually do and how visionary leadership is required to develop an organization, students will learn how to execute these concepts through measurable goals and objectives. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ENTP 6860 - Innovation in Financial Technology and Blockchain (3 Credits)
The class has four focus areas. The first covers the fields in which fintech is operating, such as financial education, blockchain and crypto currency, retail banking and investment. The second examines examples of fintech, including trading apps, peer-to-peer lending and robo-advisors. The third analyzes the four types of users. The fourth is about fintech innovations in machine learning and AI. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to non-degree majors and graduate majors within UC Denver.
Typically Offered: Fall.

Risk Management (RISK)

RISK 5939 - Experiential Learning in RMI Industry (1-3 Credits)
This course connects students to risk management service providers through the Risk Management and Insurance (RMI) Program. The students will intern with a specific provider. The RMI program and faculty will supervise and monitor tasks and assignments, and coordinate with the providers to maximize the learning experience. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Typically Offered: Fall, Spring, Summer.

RISK 6129 - Practical Enterprise Risk Management (3 Credits)
Enterprise RM involves identifying the risks and opportunities faced by a firm, assessing them, developing and implementing a plan to address them, and then monitoring progress. Students will learn the basics of ERM while working with risk management professionals to develop and present such a plan to an ongoing business. Cross-listed with RISK 4129.
Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6209 - Cyber Risk Management (3 Credits)
Computer networks and the data that travels upon them are under constant and increasing attack. This course will focus on a discussion of how state and non-state actors utilize this form of asymmetrical warfare to infiltrate government and corporate networks, risk management responds and risk strategies apply. Cross-listed with RISK 4209. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6309 - Strategic Risk Management (3 Credits)
This course introduces strategic risk management, the process of managing the uncertain and unknown risks to a firm's plans to add value to its owners and society. Cross-listed with RISK 4309. Max Hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6409 - Employee Benefits and Workforce Risk Management (3 Credits)
The course surveys an array of popular employee benefit programs to attract, protect, and retain valued employees. It also focusses on risk management programs that invest in human capital and address the downside risks of employing a workforce. Cross-listed with RISK 4409 and MGMT 4460/6760. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6509 - Global Risk Management (3 Credits)
This course is designed to study how risk is transferred globally. The course will include travel to London, which is the home to many of the world's largest insurers and reinsurers. While in London, we will visit and have presentations from insurance brokers, companies, Lloyds of London, and reinsurers. Prereq: One RISK course. Cross-listed with RISK 4509. Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6609 - Risk Management (RISK) (1-3 Credits)

RISK 6709 - Life and Health Insurance (3 Credits)
This course introduces students to life and health insurance concepts and policy types with an emphasis on insurance planning for individuals and businesses. The insurance industry and trends within are also explored. Prereq: BUSN 6640. Cross-listed with RISK 4709. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: BUSN 6640.
RISK 6809 - Principles of Risk Management & Insurance (3 Credits)
This course prepares students for advanced work in insurance and RM. The course first covers the nature of risk and risk fundamentals, insurer operations and insurance regulation. It then considers the principal techniques of managing risk exposures and the basis of decision making in management of business and personal risks. Coreq: BUSN 6640 or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: BUSN 6640

RISK 6840 - Independent Study (3 Credits)
Max hours: 3 Credits.
Grading Basis: Letter Grade

RISK 6909 - Corporate Risk Management (3 Credits)
This course provides an overview of the corporate risk management process. It considers the ways companies identify their risk exposures, the tools used to measure and mitigate those exposures including the latest developments in alternative risk transfer, and ultimately, how risk management adds value to the firm. Coreq: BUSN 6640. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-req: BUSN 6640

**Sustainability (SUST)**

SUST 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Max hours: 6 Credits.
Grading Basis: Letter Grade
Accounting, MS

Program Director: Katherine Gunny
E-mail: Katherine.Gunny@ucdenver.edu

Introduction

Whether you are considering CPA licensure or just looking to accelerate your accounting career, a Master of Science in Accounting will help you achieve your goals. The coursework gives students the technical accounting competencies and critical thinking skills necessary to support a successful career in all accounting areas including public or private accounting, nonprofit, government, or tax.

We offer a 4+1 program that allows our current undergraduate accounting students to pursue the master of science degree, if they achieve a cumulative GPA of 3.00 or higher in the Intermediate series (ACCT 3220 Intermediate Financial Accounting I, ACCT 3230 Intermediate Financial Accounting II, and ACCT 3320 Intermediate Cost Accounting), without taking the GMAT test. Students are also allowed to replace two undergraduate required accounting courses with two graduate accounting courses. If you are interested, please contact the Business School Advising team.

The MS accounting degree consists of 30 required hours + 9 hours of prerequisites that may be waived based on prior coursework.

Accounting Prerequisites: (9 Hours)

The MS in accounting requires completion of the following accounting prerequisites.

Required Prerequisite Courses (advisor will evaluate transcript for possible waivers, grades must be a C or better to be considered for possible waiver):

<table>

Business Administration - Health Administration, MBA

Program Director: Jeff Helton
E-mail: jeff.helton@ucdenver.edu

Introduction
The graduate program in health administration is consistently ranked as a top program in the United States and attracts students with a variety of backgrounds and experience levels, which further enriches the classroom experience. The HA program is accredited by the Commission on Accreditation of Healthcare Management Education. Full-time faculty with distinguished research records and a select group of practicing managers provide students with the latest thinking on the most important health issues.

Degree Requirements
The curriculum of the MBA in Health Administration is a synthesis of management concepts and techniques that are applicable to any economic organization and tools that can be specifically applied to health services systems. The program emphasizes skills that strengthen basic analytic and decision-making processes used by top-level managers in selecting broad strategies and by junior managers in administering sub-units in healthcare organizations.

Students enrolled in the Master of Business Administration in Health Administration must complete a minimum of 45 semester hours of graduate-level course work to receive their degree. The curriculum is based on a series of structured learning sequences. All of the courses are available in the evening to enable working students to pursue the degree on a part-time basis. The specific course requirements are as follows:

<table>

Specialized Tracks within the MBA in Health Administration
Each track carries its own specific course requirements. To provide a variety of perspectives and experiences within a specific area of health administration, each track includes courses that span various departments within the Business School, other schools at CU Denver, and other University of Colorado campuses.

• International Health Management and Policy Track
• Financial Management Track
• Health Information Technology Management Track

Notes and Restrictions
Administrative Residency or Fellowship. An administrative residency or fellowship is optional but recommended for students with limited healthcare experience. The program faculty provide guidance to students applying for residencies or fellowships. Information on the full range of local, regional, and national residencies or fellowships is available from the program director.

Length of program. A maximum of five years and one semester is allowed to complete the Health Administration program.

1. May also include the following: ENTP 6826 International Entrepreneurship, MTAX 6431 Inbound International Taxation, or RISK 6209 Cyber Risk Management. Travel studies offered by the Business School will also apply.

2. Any course numbered 6800 or higher with BUSN prefix or any course numbered 6000 or higher with prefix of ACCT, BANA, CMDT, ENTP, FNCE, INTB, ISMG, MGMT, MKTG, MTAX, or RISK. Students may also select a MBA Specialization (p. 126).

Core Substitution: Students with extensive and comparable course work in a particular core subject area may petition to substitute a higher-level graduate course on the basis of prior undergraduate or graduate course work taken at a regionally accredited college or university for the corresponding core class. This does not waive the 48-hour requirement. If a core course is substituted, another graduate level course in the same functional area must be used as a substitute so that the student completes a total of 48 semester hours.

MBA Specializations

Graduate students will have an opportunity to take specialized tracks within the professional MBA program by completing a pre-specified program of elective courses. The following 15 specializations are available:

Accounting

Students need to complete the required courses for a total of 4 courses for the specialization. Students who have completed equivalent courses to the ones listed below can substitute any ACCT course numbered 6000 or higher for courses in which they have been waived. Please contact an advisor for course waivers.

Bio-innovation and Entrepreneurship
The Jake Jabs Center for Entrepreneurship is pleased to offer a specialization in Bio-innovation and Entrepreneurship, which is the first of its kind in the country to be offered by an AACSB accredited graduate business school. Taking advantage of the Colorado’s biocluster, in collaboration with faculty at Anschutz Medical Campus, this specialization is one-of-a-kind, and is geared to helping bio-entrepreneurs achieve commercial success. Additionally, you have opportunities to participate in a number of Jake Jabs Center programs; including the annual business plan competition, internships in area businesses, speaker programs with local entrepreneurs, and connections to many new Colorado ventures.

Business Analytics
Business analytics merges data, technology, and mathematical models to produce evidence-based information relevant for today’s business and government decision-making.

This specialization in business analytics trains you to construct and interpret models of big data, forecasting, optimization, and simulation. Analytics touch every aspect of business, driving the way businesses understand not only their own processes, but also the way their customers behave.

1 To enroll in BANA 6610 Statistics for Business Analytics, you must submit a petition that demonstrates your quantitative ability with either a GMAT quantitative score or other quantitative skills. Contact your advisor for the petition form. If approved, BANA 6610 can serve as a substitute for BUSN 6530. See advisor for details.

Business Intelligence
Modern business runs on information. Success may depend on the quality of the collection and analysis. Business Intelligence (BI) systems combine operational data with analytical tools to present complex and competitive information for planning and decision making, and improves the timeliness and quality of inputs to the planning and decision process.

**Commodities**

MBA candidates and business professionals should take this Specialization for a better understanding of the commodities market in its entirety, from both the physical and financial perspective. Students obtain the specialization by taking 4 classes (12 credits). Classes focus on commodity trading operations, investment management, investment banking, data analysis, and more. With strong industry support, courses in this specialization are catered to, and designed around, actual business problems in the commodities sector. Students will have an edge in competing for jobs in the commodity rich sectors of this state.

Managing for Sustainability
More than ever before, major companies and entrepreneurial ventures are seeking competitive advantage and success by embracing sustainability – social and environmental responsibility – as a core business strategy. Farsighted leaders recognize that this new way of doing business requires skills in sustainable management including social entrepreneurship, eco-efficiency, inter-disciplinary problem solving and a triple bottom line approach of economics, environment and society. Make your degree a green MBA by adding the Managing for Sustainability specialization and learn what businesses are facing in a world where resources are scarce, social safety nets are declining, and customers and commentators are concerned about a company's investment in corporate responsibility.

Marketing
Marketing is about building long-term relationships between your firm and those who buy its offerings. Just how important is marketing to a firm's success? Well without it there would be no way to communicate with current or potential customers and no revenues. The Marketing specialization will give you the skills and confidence needed to effectively manage a firm and in particular those aspects associated with building profitable, long-term, business relationships.

Risk Management and Insurance (RMI)
The specialization in Risk Management and Insurance is designed for students who are interested in pursuing or advancing a career in areas of risk management or the insurance industry. 50% of this industry is retiring in the next 5 to 10 years, leaving a huge need for new talent. The pervasive reality of risk affects all individuals and organizations. Specialized knowledge and understanding of risk increase students' marketability and potential for success across a wide range of industries.

Every Fall and Spring semester, the RMI Program awards about $25,000 in scholarships (https://business.ucdenver.edu/centers/risk-management-and-insurance/rmi-scholarships/). Students may apply for RMI Scholarships when they enroll in a RISK course. Students with the RMI Specialization can also take advantage of the unique opportunities offered by the RMI Program (https://business.ucdenver.edu/centers/risk-management-and-insurance/) and our industry partners.

Sports and Entertainment Business

The Sports industry is the sixth-largest industry in the United States and the Sports and Entertainment industries are converging. To become a professional in these industries, you need special skills. Through this specialization, you gain the tools to get ahead in both the sports and entertainment industries.

Total Hours 12
Business Administration/Business, MBA/MS

Introduction
The Business School also offers MBA/MS dual degree programs for each function of business. The program consists of a minimum of 63 semester hours of graduate work and leads to both an MBA degree and an MS degree, which must be completed within seven years. See MS program pages (p. 73) for a list of functional areas. Contact a graduate academic advisor for details by email at grad.advising@ucdenver.edu or by calling 303.315.8200.
Business Administration/Medicine, MBA/MD

Introduction

The MBA/MD is for medical students at the University of Colorado School of Medicine who wish to pursue a career in administrative medicine or who seek additional training in administration or business. The program is designed to be completed in five years, at which time both the MD and MBA degrees would be awarded. Candidates for the MBA/MD complete 33 semester hours of course work in the business school and all requirements for the MD.
Business Administration/Urban and Regional Planning, MBA/MURP

Introduction
This dual degree enables students to obtain both the Master of Urban and Regional Planning offered by the College of Architecture and Planning and the Master of Business Administration offered by the Business School. Candidates for this dual degree complete 33 semester hours of course work in the Business School and all program requirements as indicated by the College of Architecture and Planning. The dual degree program is composed of the core curricula in each program plus a set of electives jointly approved by the student's advisors.
Business Administration: One Year MBA

Program Director: Mary Malina
Director: Andrea Szabo
E-mail: oneyearmba@ucdenver.edu
Telephone: 303-315-8181
Website: http://www.ucdenver.edu/academics/colleges/business/degrees/mba/1yearMBA/Pages/default.aspx

Introduction
The One Year MBA is the fastest way to earn your MBA and gain valuable experience in Denver. The program includes a fast-paced curriculum with flexibility that matches today’s business world. Business consulting projects and optional competitive paid internships add experience to your degree and provide a career launchpad. The majority of classes are held in person, which provides valuable interactions with faculty and classmates. In addition, to provide flexibility, an online, at your own pace, course complements each term.

The program consists of five eight-week terms and a 10-12 night international course abroad. There are breaks between terms. Depending on the term, you should expect approximately 15 hours a week for class, with another 25 hours as an estimate for homework, studying, and group projects outside of class. Please note that these estimates do not include the time needed for consulting projects, which will generally add another 20-25 hours a week to your time commitment. These estimates also do not include possible time spent at an internship, graduate assistantship or on-campus student employment. These numbers are estimates only and may vary for each student.

The program is designed so your entire core curriculum will be taken with your cohort. This structure allows you to build lasting relationships with your peers through teamwork and group projects and presentations.

Admission and Application Process
The admissions committee considers each candidate’s entire record of achievement demonstrated through academic transcripts, GMAT scores (if applicable), essays, required letters of recommendation, work experience and/or extracurricular and community activities. Admission interviews are by invitation only and are conducted via Zoom.

Previous Education
Applicants’ complete academic records, including GPAs and previous course work, are considered. Undergraduate degrees do not have to be in business, but they must be from regionally accredited colleges or universities.

Testing
The GMAT or GRE is not a requirement for students with at least a 3.0 GPA from an accredited university. For students with lower than a 3.0 GPA, a GMAT or GRE score, or waiver request, must be included in the application to the One Year MBA Program. Both verbal and quantitative scores on the GMAT/GRE are important indicators of potential for academic success. The GMAT website is www.mba.com (http://www.mba.com).

GMAT waivers are available on a case-by-case basis and can be requested while completing the online application. GMAT waivers take into consideration professional/student experience as well as academic qualifications, including demonstrated successful academic background in both quantitative and qualitative coursework.

International applicants whose first language is not English must take the TOEFL or IELTS exam and earn a minimum score 90 (IBT) or 575 (PBT) TOEFL or 6.5 IELTS to be considered for admission to the One Year MBA Program. Information on taking the TOEFL or IELTS can be obtained by visiting www.ets.org (http://www.ets.org) and www.ielts.org (http://www.ielts.org).

Work Experience
The admissions committee does not require work experience to apply. Having some professional experience can add relevance and depth to the learning process and enables candidates to contribute to and benefit from the knowledge of fellow classmates in the accelerated time frame of the program.

Applications
The following are required for consideration of admission to the program.

• Application fee (domestic or international as appropriate)
• Online application for graduate admission
• Two (2) letters of recommendation from professional or academic acquaintances who are familiar with the applicant’s academic/professional competence
• GMAT scores or formal waiver request through online application. GMAT or GRE scores taken in the last five years sent directly from the Educational Testing Service. When registering for the GMAT, use code MPB-OG-65; for the GRE use code 4875. GMAT waiver considered on a case-by-case basis with completed waiver statement in application.
• Official transcripts from each school, college or university previously attended past high school, sent directly to the Business School admissions office. A minimum baccalaureate degree is required
• Include answers to the four essay questions demonstrating a commitment to an accelerated MBA program
• A résumé outlining work experience
• For international students, a minimum official score of 90 (IBT) or 575 (PBT) TOEFL (TOEFL school code: 4875) or 6.5 IELTS is required to apply - test scores are valid for two years after test date
• If invited, a personal interview (via Zoom)

The One Year MBA uses a rolling admission system. The committee reviews applications when they are complete in all respects, including transcripts, GMAT/GRE scores (if applicable) and letters of recommendation.

Space in each cohort is limited, so we urge you to apply as early as possible. Applications open in September for the following fall start. The admission rounds provide timing guidance for you, but the program operates on rolling admissions, meaning completed applications are reviewed as they are received.

Space in each cohort is limited, so we urge you to apply as early as possible. Applications open in September for the following fall start. The admission rounds provide timing guidance for you, but the program operates on rolling admissions, meaning completed applications are reviewed as they are received.

• Early Bird: February 15
• Priority Deadline: April 15
• Final International Student Deadline: May 15
• Final Domestic Student Deadline: June 15

Program scholarships are competitive and limited in number. Apply early for the best opportunity for consideration. In previous years, scholarships were allocated by April.
All of the required admission materials should be sent to:

University of Colorado Denver
The Business School
Graduate Admissions
Campus Box 165, P.O. Box 173364
Denver, CO 80127-3364

For further information, contact the One Year MBA Program at:
oneyearmba@ucdenver.edu.

Financial Aid/Scholarships

General financial aid is available for qualified domestic students. Students should apply directly through the CU Denver Office of Financial Aid (p. 46).

The One Year MBA program offers scholarships specifically for students enrolled in the program.

One Year MBA Scholarship

*From $1,000-$8,000 based on GPA, GMAT, and professional or personal leadership experience.* If you are awarded this scholarship, the award amount will be included in your admission letter. These scholarships are first come first served. The earlier you apply to the program, the better chance of a scholarship. In previous years, these scholarships were allocated by April, so apply to the program as early as possible to be considered.

If you are admitted to the One Year MBA program, you will be able to apply for the following additional scholarships. These scholarships are limited in number, but each category could have more than one recipient. These scholarships awards range anywhere from $500-$5,000.

- One Year MBA Leadership Scholarship
- One Year MBA CU Denver Alumni Scholarship
- One Year MBA STEM Scholarship
- One Year MBA Global Citizen Scholarship

These scholarship deadlines are in mid-May, so you must submit your application for the One Year MBA no later than April in order to apply for these scholarships.

CU Denver also has an online portal for internal and external scholarships available to admitted CU Denver students. If admitted to the program, you will be able to access this database of scholarships.

The One Year MBA program consists of 45 credit hours. Your credit hours will be made up of core courses, electives, an international course abroad, and consulting coursework.

No courses may be waived, substituted or transferred into the program.

If a student finds it necessary to leave the accelerated program, credits already earned may be transferred to the Professional MBA program.

Business Analytics, MS

Program Director: Xiang Fang
E-mail for Preferred Contact: xiang.fang@ucdenver.edu

Introduction
The MS in Business Analytics focuses on modeling and applications which prepares you for a career as a business analyst in industry or government. Today, companies in every conceivable industry are reaping the benefits of using formal mathematical models to assist them in addressing complex business problems. Business Analytics graduates hold positions that bridge the gap between operations research/statistics specialists and management.

Learn to apply quantitative methods to real-world problems using modern methodologies adopted from statistics, operations research, and management science. The MS in Business Analytics focuses on applications of mathematical models in the workplace rather than the development of new research techniques. The managerial emphasis of our degree is accomplished through a comprehensive set of elective and required coursework such as data analysis, decision analysis, predictive analytics, prescriptive analytics, causal analytics, evaluative analytics, supply chain management, forecasting, etc. Students have the opportunity to learn current analytics tools such as R, Python, database tools, and Tableau.

This degree is designed to be completed in 18 to 24 months. However, with careful planning, in consultation with an academic advisor, full-time students may be able to complete the degree in 12 months.

Program Requirements
Requirements for the MS degree in Business Analytics are met by the following courses and options:

1 Select any three courses from any BANA courses numbered 6000 or higher, ISMG 6080 Database Management Systems, ISMG 6470 Text Data Analytics, or ECON 5030 Data Analysis with SAS. (For assistance with enrollment for ECON courses, please contact Brian Duncan at brian.duncan@ucdenver.edu).

Notes and Restrictions
Courses subject to change. Please reach out to graduate advising for questions.

- Students are not required to take a comprehensive examination or complete a thesis in the major field.

Note: Business School MS degrees typically allow students to transfer in 9 semester hours from another university. However, the MS in Business Analytics (BANA) allows students to petition to have a maximum of 6 semester hours transfer from another university. The transfer of required courses must closely reflect the educational objectives of the Master’s degree in Business Analytics. The evaluation of substitute courses will include syllabi evaluation and the accreditation of the transferring institution.
Business/Business, MS/MS

Introduction

Students may concurrently pursue dual MS degrees in any two fields of business. The program consists of a minimum of 51 semester hours of core course work, which must be completed within a period of seven years.

For more information, please contact Graduate Advising by calling the front desk at either 303-315-8110 or 303-315-8111 from Monday – Friday, 8:00 AM to 5:00 PM.

• If calling between 8:00 AM and 12:00 PM, please call 303-315-8110.
• If calling between 12:00 PM and 5:00 PM, please call 303-315-8111.
Entrepreneurship, MS

Program Executive Director: Madhavan Parthasarathy
Contact: jakejabs.center@ucdenver.edu
Website (https://jakejabscenter.org/ms-entrepreneurship/)

Introduction

The MS in Entrepreneurship program equips students with a bootstrapping mindset so that they can think lean and create growth in any organization with minimal resources. Courses heavily emphasize experiential learning, and many are taught by Colorado's top entrepreneurs through a variety of methods and formats to maximize accessibility and flexibility in student schedules. Through topics covering leadership, marketing, legal, financial, analytical, and operational skills, students are tasked with going beyond the classroom to build and test their ideas in real-world settings.

Beyond business fundamentals, though, entrepreneurs need guidance, inspiration, exposure, and practice before launching or joining a successful startup. The Jake Jabs Center for Entrepreneurship will connect students to industry collaborations, mentorship opportunities, startup job openings, and collaborative events with the Denver entrepreneurial community. Studying entrepreneurship in the heart of Denver—one of the top entrepreneurial ecosystems in the country—will help bring to life how to actually launch new ideas, drive innovation within existing organizations, and disrupt traditional markets with tech-driven advancements.

At the end of this program, students will be able to:

1. **Cultivate an Entrepreneurial Practice.** Develop strategies designed to sustain competitive advantage and optimize stakeholder value. Analyze information to address an entrepreneurial concept.

2. **Communicate Effectively.** Apply effective and professional written/verbal communication skills around new concepts and ventures.

3. **Lead Entrepreneurially.** Collaborate and lead effectively within diverse business teams, leveraging teamwork and leadership skills in new ventures.

4. **Be Purpose Driven.** Gain an understanding around impact of different socio-cultural, political/institutional, legal, financial, and/or economic contexts on business ventures and new strategies.

5. **Develop Successful Business Models for Innovation.** Embrace risk-taking and creative problem solving, in both one's organization and career, to continually evolve in today's uncertain and skills-driven markets.

Requirements

The MS in Entrepreneurship program is a stackable, cross-disciplinary program that can be broken into two sections. Students must earn 18 credit hours (six courses) through graduate-level entrepreneurship courses. There are no prerequisites or required core courses in entrepreneurship. Then, students must choose an elective track—either continuing in entrepreneurship or with one of our partner disciplines—to complete the remaining 12 credit hours (four courses) for the degree.

The MS in Entrepreneurship program does not require GMAT or GRE scores in its application. Instead, applicants must have a cumulative GPA of 3.00 or better from a US accredited four-year undergraduate institution (or equivalent from an international university) or the successful completion of a graduate degree and three or more years of full-time professional work experience.

However, if you received your bachelor's degree with a grade point average of less than 3.00 or have less than 3 years of professional work experience, you will be asked to submit a statement that outlines other indicators of exceptional motivation, such as solid upper-division performance, GMAT or GRE scores, and other relevant professional experience. The MS in Entrepreneurship admissions committee may require a minimum GMAT or GRE score for students that do not automatically qualify by GPA and prior work.

How Admissions Decisions Are Made

The admissions committee considers each candidate's entire record of achievement. This is demonstrated through:

- Academic transcripts
- Essay responses
- Work experience
- Extracurricular and community activities
- Letters of recommendation if applicable
- GMAT/GRE scores (optional)

No work experience or formal business education is required for admission. However, professional experience strengthens your application. Candidates with less work experience can show potential through academic and experiential success.

Scholarships

At the graduate level, scholarships exclusive to entrepreneurship are available to only in-state students. Any in-state student, degree-seeking or non-degree, who is currently enrolled in an ENTP course(s) is eligible and strongly encouraged to apply. Out-of-state students are charged in-state tuition for all entrepreneurship courses. For more information, please visit https://jakejabscenter.org/tuition-and-scholarships/.

Program Delivery

Courses are offered in the following formats: online, in-person, and hybrid. Professors teaching in the hybrid format are required to offer 50% of the course content in an in-person format.

**Total Hours** 30

**Important Note:** Dual masters (MS) program options are available (for example: a dual MS in ENTP and INFS). Dual MS programs allow you to complete two masters programs by taking 14 classes. Certificate options within other majors (for example: management) may also be available.
within the ENTP MS. Please email JakeJabs.Center@ucdenver.edu if you are interested in exploring dual degree or certificate options.
Executive Master in Business Administration, EMBA

Program Director: David Chandler
Email: david.chandler@ucdenver.edu
Assistant Director of Operations: Bethany Cape
Email: bethany.cape@ucdenver.edu

Introduction

Please click here (https://business.ucdenver.edu/mba/emba/) to see more about the Executive MBA program.

The Executive MBA is designed for executives who want to sharpen their skills with no career disruption, leading to the Master of Business Administration degree. The program enables future leaders to tackle strategic challenges and impending issues facing the business world.

This 18-month program is designed for professionals who hold decision-making positions in private and public sector organizations. The program builds upon the knowledge and experience of these professionals with innovative curriculum delivered in a hybrid course structure.

The Executive MBA program emphasizes strategic analysis, critical thinking, digital technologies, and sustainable value creation, involving the latest in applied models of management. Courses are taught by world-class faculty and through a variety of methods and content including case studies, projects, lectures, and guest speakers from industry.

The Executive MBA program starts every August. The program is designed to accommodate demanding work schedules and make it possible for those who live outside the Denver area to participate in the program. Classes meet in person one weekend each term on a Friday and Saturday. Additional required course activities are delivered in synchronous and asynchronous online modalities.

Two courses are taken each eight-week term. Additionally, students travel abroad for an international business course.

Tuition

The tuition cost for the 18-month EMBA program is $77,500. Tuition is billed in eight equal installments as you go through the EMBA program. Tuition includes all course material required for each EMBA course. Tuition also includes travel, lodging and some meals during the International Business Experience trip.

A $1,500 non-refundable deposit is due upon acceptance into the program. This deposit will be applied to your first term’s tuition invoice.

Scholarships

The CU Denver Business School Executive MBA Program provides scholarships in varying amounts to prospective students working for the CU system or in the nonprofit sector.

Additional merit-based scholarships are available for exceptionally qualified students.

Employer support

The valuable skills you will gain in the program will immediately benefit your company, colleagues, and yourself as you apply your knowledge to business challenges. Many employers will invest in their employee’s business education and offer full or partial reimbursement. Contact your company’s human resources department to inquire about employer support.

Application process

We admit an Executive MBA cohort each August. Admissions are made on a rolling basis, meaning decisions are made as applications are completed. Applicants are required to submit all application materials (detailed below):

- There is no application fee.
- A personal interview is a part of the admission process.
- Due to the program’s competitive nature and rolling admissions policy, we strongly recommend submitting your application as soon as possible.

You can check your admission status online through the account you created for the online application. You will receive a final decision by email within two to three weeks from the submission of all materials.

Admission requirements

The CU Denver Executive MBA prepares mid- to senior-level managers for executive leadership. As such, we seek candidates who are currently in management positions with a demonstrated record of achievement and potential for further promotion. In addition, the ideal candidate has:

- A minimum of 10-12 years of full-time professional work experience.
- Prior degrees that are supported by official university transcripts, including GPA for all courses.
- Two letters of professional recommendation.
- A complete admissions form, including a self-recommendation letter and current résumé.
- A sponsorship form, to be completed by your organization, stipulating any support that will be provided and agreeing to allow you sufficient time for all classes and coursework.

All candidates must complete an interview as the final stage of the selection process. The interview helps us assess your motivation for pursuing an Executive MBA, your academic and professional experience, and your plans for the future.

In addition to the requirements above:

- If you are a citizen of a country where English is not the official language, you must present an official score from the TOEFL or IELTS tests. This requirement is waived for candidates who have previously earned a degree from a U.S. college or university.
- Candidates who wish to strengthen their applications may submit a GMAT score, but it is not necessary in all cases.

Individuals who do not meet the above criteria, but have a non-traditional background of business success or are already in a senior position in their organization, are encouraged to contact the Program Coordinator (victor.sanchez@ucdenver.edu?subject=Potential%20EMBA%20Enrollment), Victor Sanchez, to discuss the potential for enrollment in the program.

Curriculum and faculty

The program consists of 15 core courses for a total of 45 credit hours. It is designed with working professionals in mind; you will complete your degree in 18 months while you work. Courses balance an essential core (e.g. accounting, finance, leadership, marketing, strategy) with other
innovative and topical courses to accelerate the transition to executive leadership.

International trip
This 3-credit course offers students the opportunity to learn about and participate in global business through intensive classroom sessions and first-hand experiences abroad. The course overlays multiple experiential-learning models to offer students unique exposure to global teams, international business, and executive-level insights. Students will implement leadership and management tools to enhance their effectiveness in the international environment. Specifically, and dependent on university risk and safety assessments, students will travel for approximately two weeks during this course. Both before and during the trip, the students will work in teams on a consulting project with a client firm in the country to be visited.

Hybrid method of instruction
On campus: Classes meet on campus two weekends each term. Classes are held from 8:30 am-4:30 pm Friday and Saturday, and consist of traditional lectures, discussions, and group activities. They provide ample opportunities to work with peers and faculty.

Online: Virtual conferencing brings the classroom into your home, through Canvas and Zoom. You'll have access to course assignments, presentations, and discussions with professors and your classmates.

Hispanic-Serving Institution designation
CU Denver was the first research university in Colorado to attain the status of Hispanic-Serving Institution in 2021-2022. More information is available at this link (https://www.ucdenver.edu/about-cu-denver/hispanic-serving-institution/).

Program faculty
The Executive MBA faculty are hand-selected to deliver a transformative learning experience. A third of our faculty are from CU Denver, while the rest of the faculty are from other universities around the country or are leaders in industry. All of our faculty are excellent at bringing their applicable skills and expertise to the classroom. This innovative approach to executive education offers our students access to some of the best instructors in the nation. We are proud of what we are offering and do not think many programs can compete with this level of diversity and excellence.

Information about faculty biographies is available here (https://business.ucdenver.edu/sites/default/files/attached-files/emba_faculty_bios_1.pdf).

Leadership: Jung Park (Cherry Creek School District)

Mission
The CU Denver Executive MBA program produces leaders with the capabilities to manage their organization more effectively. Specifically, the program equips students with the technical knowledge and analytical skills to create value and build a sustainable competitive advantage for their firm, in a diverse and rigorous educational environment.

Goal 1: Act strategically
Formulate and implement strategies that are designed to build a sustainable competitive advantage for the firm.

Goal 2: Think critically
Analyze quantitative and qualitative information to develop counterintuitive, insightful solutions to a given business problem.

Goal 3: Embrace diversity
Appreciate the complexity of organizational life, and the significance of leading an inclusive and representative culture.

Goal 4: Demonstrate technology leadership
Apply relevant technology tools to support business processes and strategic decision making.

Goal 5: Create sustainable value
Redefine the purpose of the for-profit firm in terms of value creation for a broad set of stakeholders over the medium to long term.

These objectives are assessed in relevant courses across the curriculum using exam questions, group projects, in-class presentations, and experiential simulations.
Executive MBA in Health Administration

Program Director: Roger Japp  
Telephone: 303-315-8015  
Email: roger.japp@ucdenver.edu

Introduction

The Executive MBA in Health Administration program provides healthcare professionals with a rigorous 24-month academic experience leading to the Master of Business Administration degree. The program is designed for persons who hold decision-making positions in the private and public healthcare sectors. The program builds upon the knowledge and experience of these executives with a sophisticated, challenging curriculum that can be pursued simultaneously without career interruption.

The Executive MBA program emphasizes healthcare leadership and financial analysis. Courses are taught through a variety of methods including case studies, lectures, computer simulation combined with research projects and other teaching methods.

The Executive MBA program begins in July annually. Classes meet for 6 days at the outset of each term, with the remainder of the semester taught asynchronously online, making it possible for those who live outside of the Denver and Colorado area to participate.
Finance and Risk Management, MS

Introduction

In our MS Finance and Risk Management (https://business.ucdenver.edu/ms/finance-risk-mgmt/#program_features-427) program, you'll gain insight into the economics and finance behind modern business and add critical quantitative skills to your resume. The master of science degree provides the necessary depth and specialized expertise to meet the needs of businesses for financial managers, investment analysts and other finance specialists.

The program emphasizes a familiarity with the institutions in our financial system, an understanding of financial markets and instruments, and the analytical skills and tools necessary to make informed decisions about investment and financing.

The program is suited to students from a wide variety of undergraduate backgrounds and is particularly appropriate to students with strong technical and analytical backgrounds. Admission standards for the MS finance and risk management program are unique to the program. Therefore, admission to other graduate business programs does not guarantee admission into the MS finance and risk management program.

A hands-on degree, you'll have the opportunity to dive deep into special topics like behavioral and political finance and international corporate governance. With five specialization options, you can also choose to tailor your degree to focus on commodities, risk management and insurance, economics, financial analysis, or general finance. The MS in finance and risk management offers flexibility with on-campus and online courses, but can be completed fully online.

You may choose one of the following specializations (https://business.ucdenver.edu/ms/finance-risk-mgmt/#specializations-427) as a part of your degree. Each specialization requires 12 hours of coursework.

- General Finance
- Commodities
- Economics
- Financial Analysis and Management
- Risk Management and Insurance

Prerequisites

Prerequisites: BUSN 6550 Analyzing and Interpreting Accounting Information or the equivalent of a financial accounting course taken within the last ten years with a "B-" grade or higher. Students are also expected to be knowledgeable in spreadsheet software.

There may be additional prerequisite courses for the ECON and/or MATH selections. Please check with those departments or the graduate advisors.

## Risk Management and Insurance (RMI)

The specialization in Risk Management and Insurance is designed for students who are interested in pursuing or advancing a career in areas of risk management or the insurance industry. 50% of this industry is retiring in the next 5 to 10 years, leaving a huge need for new talent. The pervasive reality of risk affects all individuals and organizations. Specialized knowledge and understanding of risk increase students’ marketability and potential for success across a wide range of industries.

Every Fall and Spring semester, the RMI Program awards about $25,000 in scholarships (https://business.ucdenver.edu/centers/risk-management-and-insurance/rmi-scholarships/). Students may apply for RMI Scholarships when they enroll in a RISK course.

Students with the RMI Specialization can also take advantage of the unique opportunities offered by the RMI Program (https://business.ucdenver.edu/centers/risk-management-and-insurance/) and our industry partners.

Finance/Economics, MS/MA

Introduction

Students may concurrently pursue an MA in Economics offered by the College of Liberal Arts and Sciences and the MS in Finance offered by the Business School. Students must complete 30 semester hours of a combination core, 9 semester hours of combination electives and 3 semester hours of a 5000- or 6000-level economics elective. Students apply to each program separately and admission into one of the programs does not guarantee admission into the second program.

Introduction
The Master of Science in Global Energy Management (GEM) prepares individuals for leadership careers in the energy industry. This degree is particularly appropriate for individuals seeking to advance their existing careers in the energy field. Prior work experience within the field is preferred, but not required.

Program Requirements
The program consists of two components: the core curriculum and the more specialized required courses. The MS GEM program requires the completion of the following core classes as well as three required courses from the selection listed below. The required courses are

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEMM 6000</td>
<td>21st Century Global Energy Issues and Realities</td>

</tr>
</thead>
<tbody>
<tr>
<td>GEMM 6240</td>
<td>Environmental, Social, Governance (ESG) Trends in Energy &amp; Commodities</td>
<td>9</td>
</tr>
</tbody>
</table>

Notes and Restrictions
The Global Energy Management (GEM) program is a cohort group, online, 18-month Master of Science degree program. As a cohort program, all students start together, progress together, and graduate together. It is not recommended for students to take time out of the program once it starts, and students should plan on remaining in the program for the full 18 months. However, we do want to be flexible, and if it becomes necessary to take a term off, students should contact the program advisor to discuss options.

In addition to graduate courses, the GEM program has an on-campus requirement. Students must attend two Residency Weekends prior to graduating with the MS degree. The Residency Weekends are two days, Friday and Saturday, that focus on industry seminars, site tours, professional development, and networking opportunities.

Please note that the GEM degree program runs on a completely separate schedule from the normal semester terms of the Business School. Please check the Global Energy Management website (http://www.ucdenver.edu/academics/colleges/business/degrees/ms/gem/Pages/Overview.aspx) for the course schedule. All GEMM courses are restricted to those students who have been admitted to the MS GEM program. With program advisor approval, students in other programs and colleges at the University of Colorado Denver can take GEMM courses.

Dual Degrees
In order to participate in the dual degree options offered by the Business School, students in the GEM program must first complete their entire GEM degree before they can begin their second degree.

Student Learning Outcomes
MS Global Energy Management

Value 1: Business Acumen
Outcome: Demonstrate cross-functional business acumen sufficient to enable effective market and situation analysis, problem-solving, decision-making, and resource allocation to achieve expected results at both business unit (tactical) and enterprise (strategic) levels.

Value 2: Lead and Manage People
Outcome: Demonstrate the ability to lead and manage geographically and culturally diverse people and organizations at both business unit (tactical) and enterprise (strategic) levels.

Value 3: Energy Industry Expertise
Outcome: Demonstrate a comprehensive understanding of the worldwide energy marketplace and the information, methods, and strategies used by strategic decision-makers in the energy industry.

Value 4: Executive Presence
Outcome: Demonstrate a growing executive presence based on confidence, credibility, demeanor, communication, ethics, and personal brand.
These objectives are assessed in relevant courses across the curriculum using projects, presentations, assignments and exam questions.
Information Systems, MS

Program Director: Dawn Gregg
E-mail: Dawn.Gregg@ucdenver.edu

Introduction

The Master of Science in Information Systems (MSIS) program at the Business School is a 30 semester credit hour STEM (Science, Technology, Engineering, Mathematics) degree program that provides students the fundamental knowledge necessary for a career as an IS professional. The MSIS program integrates managerial training with technical concepts to help you become a leader in your chosen career path in information technology. You can choose between industry leading specializations in Business Intelligence or Cybersecurity and Information Assurance to customize your own degree to allow you to focus on topics most relevant to your interests. With hands-on software projects, each class will take you one step closer to understanding how to harness the power of technology for business.

Five core courses serve as the foundation for understanding the complex issues that occur when designing, implementing and managing information systems within an organization. Students choose five elective courses which can correspond to a declared specialization or may reflect a custom course of study.

The MSIS includes a 4+1 program that allows our current undergraduate information systems students to pursue the Master of Science degree if they achieve a cumulative GPA of 3.00 or higher without taking the GMAT test. Students are also allowed to replace two undergraduate required information systems courses with two graduate information systems courses. Interested students should contact the Business School (p. 73) advising team for more information.

</table>

**Total Hours** 30

1 This course is required for the Business Intelligence Specialization.

2 Both of these courses are required for the Cybersecurity and Information Assurance Specialization.

3 May include core classes not used to satisfy the Core MS IS requirement. In addition, selected 6000 level Business School courses, CVEN, or CSCI courses may be used to satisfy up to 6 elective credits for a customized degree.

Information Systems Specializations

Students may select from the following two specializations:

Business Intelligence

Business Intelligence (BI) systems combine operational data with analytical tools to present complex and competitive information to planners and decision makers. The objective is to improve the timeliness and quality of inputs to the decision process. BI is used to understand the capabilities available in the firm; the state-of-the-art, trends, and future directions in the markets, the technologies, and the regulatory environment in which the firm competes; and the actions of competitors and the implications of these actions. With this specialization, you get the necessary skills and knowledge in real-time data warehousing, data visualization, data mining, online analytical processing, customer relationships management, dashboards and scorecards, corporate performance management, expert and advanced intelligent systems, and hands-on experience with leading BI tools.

Cybersecurity and Information Assurance

With recent breaches in the security of many large government agencies and private corporations, cybersecurity is an issue of great importance to the global society. The Cybersecurity and Information Assurance Specialization prepares students for cybersecurity information security, and IT risk management positions in business and critical infrastructure sectors of the economy identified by the U.S. Department of Homeland Security including enterprises such as banks, governments, retail, health care institutions, law enforcement, construction, insurance agencies, transportation and the military.
### Required Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISMG 6860</td>
<td>Ethical Hacking Concepts and Methodologies</td>
<td>3</td>
</tr>
<tr>

<tr>
<td>ISMG 6865</td>
<td>Digital Forensics Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ISMG 6910</td>
<td>Design Science Practicum (^1)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours: 15

\(^1\) Students must take ISMG 6910 or an approved Internship with required paper and presentation to be completed during the final 9 credit hours of the program.

### Customized Degree

Students may choose to customize their degree by taking five ISMG graduate courses and related graduate technology courses from across the Business School, Computer Science, or GIS programs. Must see an advisor to create.
International Business, MS

Program Director: Manuel G. Serapio, Jr.
E-mail: Manuel.Serapio@ucdenver.edu

Introduction

The MS in International Business Program prepares students to lead in and contribute to a dynamic digital global economy. The program provides students the knowledge, critical thinking, and skills to identify, create, and seize international business opportunities, and to address the challenges and risks of doing business in a global economy.

The program offers multiple opportunities for immersive learning, such as live case studies, international consulting projects, internships, and study abroad trips. Each student is assigned a Faculty Advisor and an International Business Mentor.

The University of Colorado Denver is the only Colorado university, and one of just 15 universities nationwide, granted the U.S. Department of Education’s prestigious designation as a Center for International Business Education Research (http://www.ucdenver.edu/academics/internationalprograms/CIBER/Pages/IIB_CIBER.aspx) (CIBER), an honor earned in large part through the excellence of the international business program.

Program Requirements

The MS program in International Business requires the completion of the following:

Business Prerequisites

Advisors will evaluate transcripts for possible prerequisite waivers.

Students who choose to take classes for the degree that require prerequisites not previously met, may be required to take additional courses. Completion of prerequisite courses is in addition to the 30-hour MS in International Business degree. One BUSN prerequisite may be counted as a Free Elective. Meeting prerequisites is the responsibility of the student.

Total Hours 30

1 This course is repeatable up to two times with different projects.
2 INTB 6800 Special Topics not applied towards specialization may be counted/applied in International Business Core II.
3 Work with the Institute for International Business (IIB) or Experiential Learning Center (ELC) on internship opportunities.
4 Additional INTB 6028: Global Study Topics not applied towards specialization may count towards the International Immersion experience.
5 Students pursuing the Global Cross-Cultural Studies Specialization (Option 1) must complete INTB 6500 International Business Consulting because study abroad coursework is already completed as part of the specialization.
6 Some of these courses may have prerequisites of a BUSN course that may not be listed on your degree plan. Check with an academic advisor to see if it is possible to waive the prerequisite based on previous coursework. Students who require additional BUSN courses as prerequisites may count one BUSN prerequisite course as a free elective.

Specializations

Students may pursue up to two specializations. One applicable course from 1st specialization may count towards the 2nd specialization.

Select either Option 1, Option 2, or Option 3 9

**Option 1**: Approved 9 semester credit abroad program (Work with the International Business Program Director for opportunities)

**Option 2**: Complete three of the following courses:

- INTB 6022 International Business Negotiations
- INTB 6060 The Legal Aspects of International Business
- INTB 6028 Global Study Topics (Focus Area: Country/Region Focused Travel Study)
- INTB 6800 Special Topics in International Business (Global Payments in Cross-Border E-Commerce and/or Global Music Cities)
- INTB 6830 Marketing and Global Sustainability
- INTB 6870 Global Climate Change

**Option 3**: Complete 9-credit language and culture course

Option 3: Complete 9-credit language and culture course

1 Additional INTB 6800 Special Topics courses may be developed and offered that could count towards the specialization.

Total 30 hours (plus any needed prerequisites)

A course may not be counted in multiple spaces on the degree plan.
Management and Organization, MS

Program Director: Kenneth Bettenhausen, Jeffrey Nystrom
E-mail: Kenneth.Bettenhausen@ucdenver.edu, Jeffrey.Nystrom@ucdenver.edu

Introduction
The MS Management program prepares students for significant managerial responsibilities in the private and public sectors. Core course requirements provide students with an advanced understanding of how to manage interpersonal dynamics, effectively design organizations, implement planned change and organizational transformations, and develop human resources. Students build on this foundation with any four electives in MGMT, or with the courses that comprise one of the career-focused specializations.

Specializations for the MS Management and Organization degree include Business Strategy and Innovation, Leadership and Change Management, Managing for Sustainability, and a Self-Directed option.

Course Requirements
The MS management and organization degree requirements are met by the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>

Managing for Sustainability

Self-Directed

If students do not wish to pursue a specific specialization within the Management degree, they may self-direct their course selections by choosing 18 hours (6 courses) from courses numbered 6000 or higher with a prefix of MGMT.
Marketing, MS

Program Director: Lawrence F. Cunningham
E-mail: lawrence.cunningham@ucdenver.edu

Introduction

The MS in Marketing degree is designed to provide the skill sets necessary for you to succeed in Marketing Management careers. These positions include upper-level positions (e.g., Chief Marketing Officer), middle-level positions (e.g., Brand Manager, Advertising Account Executive) and positions for those who interface with an organization’s markets (e.g., Marketing Analysts). Your MS in Marketing degree from the University of Colorado Denver consists of 10 courses as follows:

- Common Core - seven courses (21 semester hours)
- Elective/Specialization Option - three courses (9 semester hours)

Everyone completes the same seven common core courses and then can choose either three marketing electives with a MKTG prefix or a Specialization option that consists of three courses. For the Specialization, you can choose from four “Signature” Specializations, three Cross-Over Specializations, or customize your program with three graduate marketing (MKTG) courses of your choice.

Brand Communication in the Digital Era

Are you interested in a career in advertising, promotions or public relations? How about furthering your career in marketing management? Advertising, promotion and public relations managers are creative, highly-motivated individuals who are flexible yet can meet a deadline. They need good verbal and written communication skills and the ability to work well with people. Similar talents are needed by those involved with brand management. This task is central to all marketers, especially those involved with perceptual positioning and the deliverance of positions in a target market (e.g., those working in any phase of market communication and R&D). The U.S. Bureau of Labor Statistics reports that, because of the high visibility of these positions, these managers are often prime candidates for top C-level positions. The job outlook remains promising but competition will be keen, and the best opportunities will go to those with an MS in marketing or an MS marketing /MBA dual degree. (Don’t take our word for it, see http://www.bls.gov/oco/ocos013.htm).

Specializations

The Specializations are areas of focus that will appeal to those who have specific interests or are looking to apply their marketing acumen in particular contexts (e.g., interface with engineering or work in a multinational or nonprofit environment).

The Signature Specializations include: Advanced Market Analytics in a Big Data World; Brand Communication in the Digital Era; Marketing Intelligence and Strategy in the 21st Century; and Sports and Entertainment Business. Students may also elect to complete the MS in Marketing by completing the required core courses and three MKTG Electives 6000 or higher.

The Cross-Over Specializations include: Global Marketing; High-Tech Entrepreneurial Marketing; and Marketing and Global Sustainability.

Total Hours: 30
Marketing Intelligence and Strategy in the 21st Century

According to the Bureau of Labor, in 2015 the median salary for Marketing, Advertising, and Promotions Managers was $124,850. This Specialization is designed to prepare students for these careers across various industries, whether services, products, global, or domestic. It provides a balance across strategy and intelligence. Skills, interests, and capabilities that are relevant include the following:

- Savvy in cultivating and maintaining business relationships
- Capacity to communicate effectively
- Interested in understanding how consumer psychology affects market success
- Fascinated with popular culture and its creation of market opportunities
- Captivated by the integration of branding with media, entertainment, and sports
- Intrigued by the "Internet of things" and how this is changing the relationships between organizations and consumers
- Focused on Creative approaches to business challenges
- Ability to think "out-of-the-box" and generate new ideas to solve market problems
- Knack for planning and organization
- Skill in managing people and resources

Sports and Entertainment Business

The sports business industry is one of the largest and fastest growing in the United States. Add to that the burgeoning music, film, theater, television, cable and other entertainment industries and you've got virtually limitless choices. Every one of those industries needs good marketers. The strong core of marketing courses in the MS marketing program will give you the skills you need to hit the ground running with the specialized courses to teach you how to tailor your skills to the unique needs of the sports and entertainment industries.

No Specialization

Students may also elect to complete the MS in Marketing by completing the seven required core courses and any three of the MKTG electives that fit with their career goals. This is also part of our signature specializations.

Cross-Over Specializations

Global Marketing

One of the growing themes of the 21st century economy is the growth of world trade. There is continuing demand for individuals who understand the how to conduct marketing across many different international environments as well as rapidly growing areas such as China and the emerging markets. This specialization prepares you to effectively compete and succeed in this environment.
High-Tech/Entrepreneurial Marketing

The American economy was built on a spirit of innovation, hard work and entrepreneurship, and this is surely going to be the path that assures continued American dominance in the technology and business development fields. Most smart innovators know that, in addition to the financial and managerial aspects of a business, it is the marketing function that often makes the difference between success and failure. Whether your interest is in corporate entrepreneurship and the development of high-technology oriented innovations or individual entrepreneurship and the development of a small business with minimal funds, knowing how to create and implement appropriate marketing strategies is fundamental to achieving your goals. This specialization allows you to focus on the type of new business creation path that best suits your aspirations while greatly enhancing your endeavors probability of success. If you aspire to be the next Bill Gates, this is a "must take" degree path for you.

Marketing and Global Sustainability

The world has changed. More than ever, companies around the globe need to introduce smart, sustainable brands to lead the way into the future. The strong core of MS marketing courses will give you the skills to become an effective marketing manager, while the specialized set of sustainability courses will give you the knowledge to work toward a better tomorrow. The sustainability courses will focus on the triad of economic, environmental and social sustainable development.

MBA/MS in Bioengineering

Introduction

The Business School and the Department of Bioengineering offer this degree option for students admitted into the Bioengineering MS program and the MBA program. This dual degree is an excellent opportunity for students who are planning a career in industry or as an entrepreneur. Bioengineering students including those who create medical devices, often launch their own venture upon graduation or thereafter. Business skills (especially in the areas of marketing, legal environments, and/or finance and operations) are critical to enhance the probability of venture success. A dual degree also opens up new doors with regard to career choice, either in business or in one's core field.
Bioinnovation and Entrepreneurship Certificate

Introduction

The Business School’s graduate certificates are primarily intended to give individuals with an undergraduate degree in any discipline access to business courses that can help them succeed in their current job, transition into a new role, or even launch their own company.

Students can pursue entrepreneurship certificates even if they are not CU Denver degree-seeking students. The GMAT is not required. Certain certificate credits are eligible to satisfy requirements within some of the MS or MBA degrees.

Classes are taught in a variety of formats, including in-person (evening), online, and hybrid. They are offered in 8-week or 16-week timeframes during the Fall, Spring, and Summer semesters.

Bioinnovation and Entrepreneurship Certificate

This Bioinnovation and Entrepreneurship Certificate provides students with the opportunity to gain insight into the rapidly growing field of bioinnovation. Taking advantage of the incredible Colorado biocluster, in collaboration with faculty at Anschutz Medical Campus, this certificate is one-of-a-kind and geared toward helping bioentrepreneurs achieve commercial success.

All three courses from this certificate are eligible to count towards the Masters of Science in Entrepreneurship (https://jakejabscenter.org/ms-entrepreneurship/).

Scholarships

At the graduate level, scholarships exclusive to entrepreneurship are available to only in-state students. Any in-state student, degree-seeking or non-degree, who is currently enrolled in an ENTP course(s) is eligible and strongly encouraged to apply. However, out-of-state students are charged in-state tuition for all entrepreneurship courses. For more information, please visit https://jakejabscenter.org/tuition-and-scholarships/.

Certificate Requirements

1. Students must pass required courses with a grade of C or higher to earn this certificate

Commodities Certificate

Introduction
From the food we eat, to how we build our homes and cities and the energy that powers our lives, commodities underlie our global economy. Businesses around the world rely on professionals whom understand the critical relationships across, geopolitics and financial markets to drive success. The 100% online Commodities Certificate from the University of Colorado Denver Business School prepares you to build a successful career in the fast-paced world of commodities. Our program is designed for students who want to explore the commodity sector, learn from professors with deep-industry experience, and develop an in-demand set of practical business skills.

During your certificate program, you’ll complete three graduate-level courses, gaining valuable insights from industry experts at the J.P. Morgan Center for Commodities and acquire essential knowledge about a broad range of commodities, including agriculture, energy, minerals, and metals. Our program’s strong industry support means that each of our career-focused courses will prepare you to solve real-world business problems in the commodities sector.

Courses are offered in an online, 8-week format. We recommend that students begin with Foundations of Commodities, taught by commodity industry experts in the energy, mining and metals, and agriculture sectors. From there, students can select particular areas of focus within the field of commodities to complete their remaining 2 classes.

Please contact the Commodities Center for more information at Commodities.Center@ucdenver.edu.
Cyber Security and Information Assurance Certificate

Introduction

Graduate certificates are offered in specialized business areas and are designed to update skillsets or explore a new area of business. Courses are tailored to the working professional with online and evening class options.

The Cybersecurity and Information Assurance certificate places an emphasis on the use of tools and technologies for information assurance rather than on design and development of protocols to secure an enterprise infrastructure.

With recent breaches in the security of many large government agencies and private companies, cybersecurity is an issue of great importance to the global society. As corporations increasingly depend on digital solutions in new product development, the consequence of an electronic security breach will likely become more severe.

Certificate Requirements

The certificate requires students to complete four three credit eight-week courses offered in a fully online format. Credit from these courses can be applied to a future graduate degree at the CU Denver Business school. Courses in this certificate include:

- Information systems security and privacy
- Cloud computing
- Ethical hacking
- IT risk management
- Digital forensic analysis
Digital Marketing Certificate

Introduction
The evolving digital landscape has completely changed how companies and consumers connect. But digital techniques that do not incorporate the best marketing practices are doomed to fail. Learn how to combine brand-building strategies with traditional and digital tools.

Certificate Requirements

- BUSN 6560 is a prerequisite for the certificate

Entrepreneurship Certificate

Introduction

The Business School's graduate certificates are primarily intended to give individuals with an undergraduate degree in any discipline access to business courses that can help them succeed in their current job, transition into a new role, or even launch their own company.

Students can pursue entrepreneurship certificates even if they are not CU Denver degree-seeking students. The GMAT is not required. Certain certificate credits are eligible to satisfy requirements within some of the MS or MBA degrees.

Classes are taught in a variety of formats, including in-person (evening), online, and hybrid. They are offered in 8-week or 16-week timeframes during the Fall, Spring, and Summer semesters.

General Entrepreneurship Certificate

This 3-course Entrepreneurship Certificate provides a range of focused courses geared toward individuals looking to start their own business. Students can select any three graduate level courses offered by the Jake Jabs Center for Entrepreneurship which is located in the heart of downtown Denver, voted the top city for business and careers in the nation by Forbes. Students are given the opportunity to learn from case studies, classroom instruction, and guest lectures featuring successful entrepreneurs and renowned business leaders.

All three courses from this certificate are eligible to count towards the Master of Science in Entrepreneurship (https://jakejabscenter.org/ms-entrepreneurship/).

Scholarships

At the graduate level, scholarships exclusive to entrepreneurship are available to only in-state students. Any in-state student, degree-seeking or non-degree, who is currently enrolled in an ENTP course(s) is eligible and strongly encouraged to apply. International Entrepreneurship Certificate

Offered jointly with CU Denver’s Center for International Business Education and Research (CIBER), the International Entrepreneurship Badge is an exciting, 3-course certificate program in International Entrepreneurship. Designed with the global entrepreneur in mind, this certificate empowers students with a balanced synergy of educational fundamentals and experiential opportunities needed to succeed internationally with topics like digital globalization, global supply chain, and opportunity identification. The certificate is designed to provide a foundation for internationally based entrepreneurship skills that are applicable for startups and large companies alike. Courses are taught by leading practitioners and entrepreneurs and often include guest presentations from leading industry partners in the US and Colorado.

All three courses from this certificate are eligible to count towards the Master of Science in Entrepreneurship.

Students can pursue entrepreneurship certificates even if they are not CU Denver degree-seeking students. The GMAT is not required. Classes are taught in a variety of formats, including in-person (evening), online, and hybrid. They are offered in 8-week or 16-week timeframes during the Fall, Spring, and Summer semesters.

Optional International Entrepreneurship Badge

Students interested in taking one additional International Business based course are eligible to receive an International Entrepreneurship badge in addition to the certificate. The badge is granted by the Institute for International Business. For questions about the badge opportunity, contact Manuel.Serapio@ucdenver.edu.

Scholarships

At the graduate level, scholarships exclusive to entrepreneurship are available to only in-state students. Any in-state student, degree-seeking or non-degree, who is currently enrolled in an ENTP course(s) is eligible and strongly encouraged to apply. Risk Management Graduate Certificate

Introduction

Broaden your knowledge of risk management by completing a one-year Graduate Certificate in Risk Management from the University of Colorado Denver. By completing four semester-long RMI courses, all available online, and meeting a prior finance course requirement, you will be on your way to enhancing your personal knowledge and providing your employer with RMI awareness and professional skills. Previous coursework and some professional designations may waive the prerequisites.

The Risk Management and Insurance industry is actively seeking young talent and the RMI program has 100% job placement of our graduates at competitive salaries. 50% of this industry is retiring in the next 5 to 10 years, leaving a huge need for new talent. The pervasive reality of risk affects all individuals and organizations. Specialized knowledge and understanding of risk increase students’ marketability and potential for success across a wide range of industries.

This certificate is for students currently pursuing a degree in any graduate discipline that wants to expand their business and knowledge of risk management to give themselves a leg up when they enter the workforce. Degree-seeking students are eligible to apply for RMI scholarships each semester they are enrolled in a certificate course. However, this certificate can also be taken by those that have completed their degree.

Students can pursue this certificate, even if they are not CU Denver students. Credit earned as a part of the certificate does count towards a full graduate MBA or master’s degree.

Potential Career Opportunities in Risk Management:

- Underwriter
- Broker
- Risk Manager
- Claims Adjustor
- Risk Analyst
- Account Executive
- Loss Control
- Agent

Add an RMI Certificate to your degree in:

- Business
- Economics
- Math
- Actuarial Science
- Criminal Justice
- Information Technology
- Engineering
- Other Majors

Program Delivery

- This certificate can be completed fully online or through a combination of on-campus and online classes in as little as one year.

Declaring This Certificate

- See the Risk Management Graduate Certificate page here (https://business.ucdenver.edu/academics/professional-development/credit-certificates/risk-management-and-insurance-graduate/) for more information. Current CU Denver students can contact their advisor to add this certificate to their major. Non-students can apply here (https://business.ucdenver.edu/academics/professional-development/credit-certificates/risk-management-and-insurance-graduate/) or contact lori.genuchi@ucdenver.edu for more information.

- RISK 6809 Principles of Risk Management & Insurance 3
- Choose three of:
  - RISK 6129 Practical Enterprise Risk Management 3
  - RISK 6209 Cyber Risk Management 3
  - RISK 6309 Strategic Risk Management 3
  - RISK 6709 Life and Health Insurance 3
  - RISK 6909 Corporate Risk Management 3

Not all RISK courses are offered every semester

Basic Eligibility: Undergraduate degree and relevant professional experience

Time of completion:

- 2 semesters (if prerequisites waived)

Online Option:

- all courses are available online

Admission:

- Admission will be as a non-degree student. Registration is through Extended Studies.
- For further information, contact Lori Genuchi lori.genuchi@ucdenver.edu or 303-315-8153
- Click here for information about Academic Policies

Waiver of BUSN 6550 and BUSN 6640 courses:

Following professional finance-related credentials considered as equivalencies

- CMA - Certified Management Accountant
- CFM - Certified Financial Manager
- CFA - Certified Financial Analyst – (passed level 1)
- CTP - Certified Treasury Professional
- CPA - Certified Public Accountant
- FRM - Financial Risk Manager (GARP) – (passed part 1)
- CRP - Certified Risk Professional
- CBM - Certified Business Manager – (passed part 2)
- CVA/AVA - Certified/Accredited Valuation Analyst
- ARM - Associate in Risk Management (passed ARM 54 or ARM 56)
- CRM – Certified Risk Manager
- CPCU - Chartered Property and Casualty Underwriters – (passed CPCU 540)
• **Relevant** certifications outside the certification list above will be updated
• **Relevant** undergraduate or graduate degree (Finance major, MBA, MS with Finance)

The committee of faculty teaching RISK 6809 and RISK 6909 will assess waiver requests for professional applicants.
Sustainability Certificate

Introduction

The Business Schools graduate certificates are primarily intended to give individuals with an undergraduate degree in any discipline access to business courses that can help them succeed in their current job or even help them launch their own company.

Students can pursue one of our graduate certificates, even if they are not CU Denver students, without taking the GMAT. Credit earned as a part of the certificate does count towards your graduate business degree, should you choose to pursue a degree here.

The Managing for Sustainability Certificate is designed for business professionals seeking a deeper understanding of sustainability and/or the technical knowledge to lead sustainability initiatives in their companies. To earn a Managing for Sustainability Certificate, students complete four semester-long graduate Business School courses. Contact a graduate advisor for more information, 303.315.8110 or grad.advising@ucdenver.edu.
Post-Graduate Certificates

Introduction

Post-Graduate certificates are offered in specialized business areas and are designed to update skillsets or explore a new area of business. Courses are tailored to the working professional with online and evening class options. Some post-graduate certificates require prior knowledge in the area being studied.

More details on Post-Graduate Certificates can be found here (https://business.ucdenver.edu/professional-development/credit-certificates/#post_graduate_certificates-1025). For questions, please contact an advisor.

Overview

The College of Architecture and Planning is the only college in the State of Colorado that offers an accredited bachelor's degree in architecture; master's degrees in architecture, urban and regional planning, landscape architecture, historic preservation, and urban design; and the only doctoral degree in geography, planning, and design. Additionally, students in the undergraduate architecture program can earn a Minor in Landscape Architecture (https://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-architecture-planning/undergraduate-graduate-degrees/ga/landscape-architecture-minor/) and a Minor in Interior Design (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-architecture-planning/undergraduate-graduate-degrees/ga/interior-design-minor/), and CAP offers fourteen options for earning dual graduate degrees (https://architectureandplanning.ucdenver.edu/academics/dual-degree-programs/). Programs are accredited by the National Architectural Accrediting Board (NAAB), Planning Accreditation Board (PAB), and Landscape Architectural Accreditation Board (LAAB).

Annually, over 700 students are pursuing a degree at CAP. Many students intending to enter the design and planning professions complete the college's undergraduate degree as preparation for our graduate-level professional programs. Students who hold an undergraduate degree in an unrelated field are eligible for admission into our graduate programs.

We offer graduate certificates in Design Build (https://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-architecture-planning/graduate-certificates/design-build-graduate-certificate/), Historic Preservation (https://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-architecture-planning/graduate-certificates/historic-preservation-graduate-certificate/), Integrated Construction Management and Leadership (https://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-architecture-planning/graduate-certificates/integrated-construction-management-leadership-graduate-certificate/) (with Business and Engineering), Interior Design (p. 223), and Landscape Architecture (https://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-architecture-planning/graduate-certificates/landscape-architecture-graduate-certificate/), as well as fourteen options for earning dual graduate degrees (https://architectureandplanning.ucdenver.edu/academics/dual-degree-programs/). Students can also earn a certificate in Geospatial Information Science (https://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-architecture-planning/graduate-certificates/geospatial-information-science-graduate-certificate/) with either an Urban and Regional Planning Track or a Landscape Architecture track. In addition, students can earn a Classical Studies Certificate (https://architectureandplanning.ucdenver.edu/academics/certificate-programs/#ClassicalStudies) from the Institute of Classical Architecture and Art, by taking focused courses in this area.

With an outstanding faculty committed to excellence in teaching, research, scholarship and creative work, the college provides students with opportunities beyond the classroom including study abroad, internships, mentorships, and participation in design and planning competitions.

College Facilities

The college is located at 1250 14th Street in downtown Denver, on the northeastern edge of the Auraria Campus, adjacent to Larimer Square. This favorable location provides easy access to extensive campus facilities and the urban dynamism of Denver's lively lower downtown. Many of Denver's major professional design offices as well as planning firms and agencies are nearby, offering many opportunities for contact between students and practitioners.

Facilities in the CU Denver Building include studio spaces for students, lecture and seminar rooms, studio review spaces, exhibition spaces, and faculty offices. Students have access to our well-equipped and well-maintained 3,000-square-foot Design Fabrication Lab that houses a full-scale wood shop, 3D print lab, a large spray booth, and four laser cutters. Additional fabrication space is available in an annex adjacent to the building with a 5-AXIS CNC Router, metalworking equipment and a CNC Plasma cutter. The Visual Resource Center (VRC) provides access to a variety of photographic and audiovisual equipment, two portfolio photography studio rooms, and digital image collections.

There are two computer labs focused on computer aided design (CAD), computer 2-D and 3-D imaging and analytic tools for planning. These computer labs include Windows PCs and Macs, small and large format scanners, large format plotters, laser printers and computer data projection devices. All systems are 100base T Ethernet / Internet savvy and accessible in secure rooms. A geographic information systems (GIS) computer laboratory is also available and open to all CU Denver students. Find more details about college facilities on the website.

Computing in the College

The College of Architecture and Planning requires all incoming graduate students to acquire and use their own computers and software applications in their studies. In general, students widely use products like Microsoft Office for word processing, e-mail, presentations, and spreadsheet applications. Consult with instructors or view course syllabi regarding specific software application (program) requirements for imaging, CAD, GIS, modeling or rendering before you buy them. For further information, consult the college website.

Professional Development

The College of Architecture and Planning supports students in professional and career-related activities through a wide range of...
services and workshops. While attending CAP, students have access to an annual career fair, portfolio critiques, professional mentorship, an online job board, and numerous trainings related to effective employment strategies. Being in the heart of Denver, many students work as interns in their field of study. Visit our Career Connections website for more information.

**Graduate Programs**

**Learning Experiences**

Learning experiences address real issues facing designers and planners as they create healthier, more sustainable, more meaningful environments. Through hands-on education, CAP students learn how to apply knowledge to real-world projects. The faculty and students are extensively engaged with Colorado communities, in-service learning, and applied research. Students have built award-winning solar-powered homes; discovered ecological design principles in Colorado ranches; helped re-envision the I-70 corridor through north Denver; proposed ways for communities to recover from natural disasters; and designed learning landscapes for all 96 Denver elementary school playgrounds. The award-winning ColoradoBuildingWorkshop design build program has developed projects as varied as micro cabins for the Colorado Outward Bound School, environmentally sustainable homes in the Navajo Nation, schools in Guatemala and Nicaragua, a performing arts stage for a mountain community, and outdoor classrooms for urban farming education and environmental groups.

**Special Activities**

The college provides a diverse range of opportunities that enrich and enhance the education of its students. Through activities and functions - including a lecture series, design juries, exhibitions, publications and active student organizations - the college encourages contact among students, faculty, and members of the design professions. The college is a leader in providing international study opportunities. In addition to numerous study abroad courses, there is a summer urban design studio that has been held in Copenhagen, China's Shanghai-Nanjing corridor, and Greece. The Bixler International Initiatives encompass travel opportunities, scholarships, lectures, and exhibitions. The college supports an active and focused internship program for its students, giving them access to elective internship opportunities in the Denver metropolitan area and beyond. There are extensive opportunities for civic engagement, including through paid internships at the college's University Technical Assistance Program and other funded research and service projects.

**Scholarships/Financial Aid**

Graduate students in the college have access to a number of scholarships and other financial assistance funds. Some are based on need, others on performance and still others are specifically intended to provide enrichment opportunities. Some of these funds are provided by the institution itself, while others are provided by external sources like the American Institute of Architects Architectural Education Foundation, the American Planning Association and the Associated Landscape Contractors of Colorado. For further information on scholarships and graduate tuition awards, visit the college's website. For information on federal and state financial aid, contact the Office of Financial Aid at the University of Colorado Denver or visit its website (https://www.ucdenver.edu/student-finances/financial-aid/).

**College of Architecture and Planning Courses**

To see complete lists of courses in our college, please see the below links:

Architecture (p. 719), Landscape Architecture (p. 872), Urban and Regional Planning (p. 967), Urban Design (p. 972), Historic Preservation (p. 843), and Interior Design (p. 866)

---

**College of Architecture and Planning Admissions Information**

**Application Deadlines**

**For Fall Semester:**

- Master of Architecture Program (MArch) Priority Deadline: January 1*
- Master of Landscape Architecture Program (MLA) Priority Deadline: January 15*
- Master of Urban and Regional Planning Program (MURP) Priority Deadline: January 1*
- Master of Science in Historic Preservation Program (MSHP) Priority Deadline: March 15*
- Master of Urban Design Program (MUD) Priority Deadline: February 15*
- PhD in Geography, Planning, and Design (PhD): January 1*

*Late Applications will be reviewed on a space available basis. Late applicants will not be eligible for scholarship consideration

For the most up-to-date information on program application deadlines, please visit our departmental websites (https://architectureandplanning.ucdenver.edu/). Decision notification dates vary by program.

**For Spring Semester:**

- Please visit our departmental websites (https://architectureandplanning.ucdenver.edu/) for spring admission deadlines and information. Not every department offers spring admission each year.

**General Requirements**

The college periodically updates admissions deadlines and application procedures. Please visit the college website to view current deadlines, application procedures and required materials.

Applicants to the College of Architecture and Planning graduate programs are required to submit the following credentials:

- University of Colorado Denver online application.
- Official transcripts from each U.S domestic institution the applicant has attended excluding study abroad institutions where the courses are included on the home institution transcripts.
- A statement of purpose that addresses career objectives and reasons for pursuing the intended program of study.
- A portfolio of creative work - required for Architecture, Landscape Architecture and Urban Design. Suggested for Historic Preservation for students with prior design experience.
- A sample of writing or a work project - required for Urban and Regional Planning.
- Three letters of recommendation.
• Graduate Record Exam (GRE) scores are encouraged for the Urban and Regional Planning program.
• However, if you are applying to the Urban and Regional Planning program and your GPA is below 3.0, you must submit GRE scores.
• Graduate Record Exam (GRE) scores are highly advised if your GPA is below 3.0 and you are applying for the Architecture, Landscape Architecture, Historic Preservation or Urban Design programs.
• GRE scores are strongly encouraged for applicants to the PhD program.
• You must hold at least a bachelor’s degree for admission to all professional master’s programs. For admission to the Master of Urban Design program, a prior professional degree in architecture, planning, or landscape architecture is required in addition to a bachelor’s degree.
• Application fee. Nonrefundable: $50, U.S. residents; $75, International applicants (waived if international transcript evaluation is required).
• English language proficiency scores are required for international applicants when English is not their first language. Please see the International Admissions website (https://www.ucdenver.edu/international-admissions/) for current minimum

  • Urban Design, MUD (p. 214)
• Graduate Certificates (p. 217)
  • Design Build Graduate Certificate (p. 218)
  • Geospatial Information Science Graduate Certificate (p. 219)
  • Historic Preservation Certificate (p. 221)
  • Integrated Construction, Management + Leadership Graduate Certificate (p. 222)
  • Interior Design Certificate (p. 223)
  • Landscape Architecture Certificate (p. 224)

College of Architecture and Planning Policies

Academic Standing
Students must maintain a minimum overall GPA of 3.0 in the graduate programs to remain in good standing and to graduate. If a student’s GPA falls below a 3.0, then he or she will be placed on academic probation beginning the following semester. If the GPA remains below a 3.0 after the probationary semester, then he or she may be dismissed from the college.

Grade Policy
In addition to maintaining a GPA of 3.0 or above, each program requires specific minimum grades which a student must earn in order to count a class towards their degree. Students should meet with their academic advisor or reference the student handbook to learn more about the minimum passing grades.

Grade Appeals
The College of Architecture and Planning recognizes the right of the student to appeal a grade received in a course taken in the college. The college also recognizes the responsibility on the part of the college to respond to student grade appeals, and to do so in a judicious and timely manner.

Any student wishing to appeal a course grade must first contact the course instructor to discuss issues pertaining to the student’s performance, evaluation criteria, final grade, reason(s) for the appeal, and adjustment sought. If the course instructor determines that a change of grade is not warranted and the disagreement remains unresolved, the student may then initiate the formal appeal process.

Please visit the College of Architecture and Planning Student Policies, Handbooks, and Forms (https://architectureandplanning.ucdenver.edu/student-life/academic-advising/#policies) for additional information.

Attendance and Timeliness of Work
The College of Architecture and Planning recognizes the right of the student to appeal a grade received in a course taken in the college. The college also recognizes the responsibility on the part of the college to respond to student grade appeals, and to do so in a judicious and timely manner.

Students’ assignments are to be completed in a timely manner. Any assignment turned in late may have its grade reduced by an amount set at the discretion of the instructor. An assignment may be turned in late without penalty for verified medical reasons, religious obligations or for extreme personal emergencies. Students must have their instructor’s written permission to turn an assignment in late. Students with excused late work may turn in the assignment by the end of finals week without penalty. Otherwise, the grade “I” will be assigned at the discretion of the faculty.

Course Sequencing and Advancement
Programs in the college are structured so that certain courses must be taken concurrently, others sequentially. Students will not be allowed to enroll in a course if its co-requisites or prerequisites have not been satisfied.

Originality of Work
Students must submit their own work. Where other sources are used in a student submission, they are to be clearly identified and referenced. The university considers plagiarism and similar acts of falsification to be a serious matter that may result in suspension or expulsion. Information on codes of conduct and grievance procedures are available from the university’s Office of Community Standards and Wellness.
Retention of Student Work

The College of Architecture and Planning may, with a student's written permission, retain student work submitted in fulfillment of class requirements for a period of time. This retained work is normally used to provide accrediting agencies with tangible evidence of performance, to serve as additional visual aid material in presentations to other students and to contribute to possible educational exhibits requested by the university community and the general public.
Architecture

Chair: Marc Swackhamer
Telephone: 303-315-1000

Overview

The College of Architecture and Planning offers a pre-professional Bachelor of Science in Architecture (BSArch) degree and the professional Master of Architecture (MArch) degree which is fully accredited by the National Architectural Accrediting Board (NAAB).

Architecture, MArch

The Master of Architecture is offered to students who have completed a pre-professional architecture degree, as well as to students who have completed an unrelated undergraduate or graduate degree. Students holding a pre-professional degree will be evaluated individually for advanced standing in the MArch program, commensurate with their previous educational experiences.

Our program prepares students for entry into the architecture profession and licensure. Our mission is to lead in the discovery, communication and application of knowledge in the discipline of architecture by integrating theory and practice. In this collaborative educational model, environmental, economic, social, cultural, aesthetic and ethical concerns are fundamental.

The curriculum responds to and aligns with the evolving nature of professional practice including collaborative work environments, critical thinkers, problem-solving team players, builders and leaders with excellent communication skills. Recognizing that the practice of architecture is global, we provide students with international perspectives and experiences giving them a competitive edge when they enter the profession.

Students whose undergraduate degree was not a design related degree will take a minimum of three years to complete the Master of Architecture. Students who have an undergraduate design related degree may receive credit for courses previously taken and can typically complete the program in two years depending on advanced standing given. The program provides the skills and bodies of knowledge nationally specified for graduate study in architecture and is fully accredited by the National Architectural Accrediting Board (NAAB).

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or a two-year term of continuing accreditation, or a three-year term of initial accreditation, depending on the extent of its conformance with established education standards.

The University of Colorado Denver, Department of Architecture offers the following NAAB-accredited degree:

- Four-Studio Track Master of Architecture—Preprofessional Bachelor’s Degree + 60 credit hours in the Master of Architecture Program
- Six-Studio Track Master of Architecture—Non-Preprofessional Bachelor’s Degree + 105 credit hours in the Master of Architecture Program

Both tracks of study are up for reaccreditation in the Spring of 2023.

(For Undergraduate Programs and information please refer to the Undergraduate catalog.)

Programs

- Architecture, MArch (p. 182)

(For Undergraduate Programs and information please refer to the Undergraduate catalog.)

Faculty

Professors:
Amir Ameri, PhD, Cornell University
Julee Herdt, MArch, Southern California Institute of Architecture
Michael K. Jenson, PhD, University of Edinburgh
Laurence K. Loftin III, MArch, University of Virginia
Marc Swackhamer, March, Rice University
Ekaterini Vlahos, MArch, University of Colorado Denver

Associate Professors:
Osman Attmann, PhD, Georgia Institute of Technology
Christopher Koziol, PhD, University of Colorado Denver
Erik Sommerfeld, MArch, University of Colorado Denver

Assistant Professors:
Kevin Hirth, MArch, Harvard Graduate School of Design
Matthew Shea, MArch, University of Colorado Denver
Sarah Hearne, PhD, University of California
Assia Crawford, MArch, Newcastle University
José Ibarra, MArch, Princeton

Assistant Professors (Clinical Teaching Track):
Mira Woodson, MFA, University of New Mexico

Visiting Assistant Professors:
Leyuan Li, MArch, Rice

Instructors:
Matt Gines, MArch, University of North Carolina Charlotte
Jo VanenBurg, MArch, University of Colorado Denver

Visiting Teaching Fellow:
Will Koning, MArch, University of Colorado, Denver

Additional information about faculty in this department is available on the college website. (https://architectureandplanning.ucdenver.edu/)
**Architecture (ARCH) Courses**

**ARCH 5110 - Design Studio I (6 Credits)**
The first of two elemental design studios focused on the language of design, organizational and spatial systems and principles as well as on analog and digital methods of visualizing architectural ideas and forms. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

**ARCH 5120 - Design Studio II (6 Credits)**
The second of two elemental design studios focused on translating organizational and spatial systems, principles and concepts into architectural systems. Through a number of small scaled design exercises students learn how organizational and spatial systems can be leveraged in the design of their buildings. Prereq: ARCH 5110 and ARCH 5510. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

**ARCH 5130 - Design Studio III (6 Credits)**
The first of the two analytical design studios addresses how design ideas are formed through the analysis of the program in terms of action and perception and how to transform those ideas into formal strategies and specific architectural experiences. Prereq: ARCH 5120. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

**ARCH 5140 - Design Studio IV (6 Credits)**
The second of the two analytical studios will build upon ideas developed in the previous studio concerning how the analysis in terms of action and perception inform the formal strategies and the design of specific architectural experiences. Prereq: ARCH 5130. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

**ARCH 5210 - Introduction to Architecture (3 Credits)**
Introduces important ways of looking at architecture and acquaints students with the various perspectives that will later find in the rest of the curriculum. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

**ARCH 5220 - History and Theory Architecture I (3 Credits)**
Introduces world architecture and urbanism from prehistory to the Italian Renaissance. The course helps students understand the various cultural, technological, philosophical, and aesthetic ideas that helped shape buildings through history. Buildings and settlements on all continents and in all of the major world cultures are discussed. Restriction: Restricted to graduate and doctoral students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate and doctoral students.

**ARCH 5230 - History and Theory Architecture II (3 Credits)**
Examines world architecture and urbanism from the Italian Renaissance to the present. Helps students understand the various cultural, technological, philosophical and aesthetic ideas that helped shape buildings through history. Buildings and settlements on all continents and in all of the major world cultures are discussed. Restriction: Restricted to graduate and doctoral students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate and doctoral students.
Typically Offered: Fall.

**ARCH 5240 - History and Theory Architecture III (3 Credits)**
This course traces the history of Architecture from the mid-19th century to the early 21st century. The various theories and formal languages that shaped the history of Architecture within the specified period will be explored through the close examination of a select group of buildings and the specific cultural, social, political, and economic contexts of their design and construction. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

**ARCH 5310 - Building Construction I (3 Credits)**
The first of a two-course sequence that provides an overview of the structure, systems, assemblies and processes that make a building. Provides a broad view of building technology and an understanding of the interrelationship of all the parts. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

**ARCH 5320 - Building Construction II (3 Credits)**
This course focuses on principles and processes of building construction, and introduces major constructional systems. It stresses the relationship between architectural concepts and building technology and assemblies. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

**ARCH 5330 - Sustainable Systems I (3 Credits)**
The first course in the sustainable systems sequence introduces concepts and design methods of energy-efficient environmental control in buildings including thermal and moisture loads, heating, ventilation and air conditioning equipment and systems, and active and passive thermal strategies. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

**ARCH 5340 - Sustainable Systems II (3 Credits)**
The second course in the sustainable systems sequence introduces concepts and design methods of plumbing, power distribution, renewable electricity, artificial illumination, daylighting, acoustics, vertical transportation, fire protection, and telecommunication systems in buildings with a focus on energy and resource efficiency. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
ARCH 5350 - Structures I (3 Credits)
The first course in the structures sequence introduces the analysis and design of structural elements and focuses on the principles of static's and the strength of materials. Topics include stress determination, deflection and the behaviors of tension, compression and shear in various structural elements. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 5360 - Structures II (3 Credits)
Focuses on the relationship between architectural concepts and the selection of structural systems. Addresses the qualitative and quantitative analysis of reinforced concrete, steel and wood structural systems and members. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 5410 - Professional Practice (3 Credits)
Introduces the essential elements of professional practice through topics such as internship, licensing, services, modes of practice, fees, marketing, documents, specification and production procedures. Examines traditional and emerging forms of practice. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 5420 - BIM: Principles & Practices (3 Credits)
Introduces basic aspects of building information modeling (BIM) concepts, software, development, management and delivery for architectural projects. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 5430 - Social Context of Design (3 Credits)
Focuses on the ethical, social, cultural and psychological principles, which people bring to the perception and design of the built environment. Its major topics include: ethical values; cultural patterns and values; social, cultural and personal ritual; and pre-design and programming. Prereq: Graduate ARCH students only. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 5450 - Sustainable Design Practices (3 Credits)
This course explores sustainable principles and practices as it relates to the design, construction of both the building and its site. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 5510 - Architectural Graphics (3 Credits)
This course explores the development of graphic skills emphasizing drawing as a means to design. It includes investigation of drawing types and methods; diagramming of ideas and systems; informative, exploratory and developmental sketching. Restriction: Restricted to Graduate Architecture students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6150 - Design Studio V (6 Credits)
The first of two reflective studios will assume reflective/critical stance towards programmatic issues or rather cultural presuppositions and critically explore the ways in which architecture can play a critical as well as an affirmative role within the broader cultural context. Prereq: ARCH 5140. Coreq: ARCH 6151. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6170 - Design Studio VI (6 Credits)
This is the second of two reflective studios, which focuses on the comprehensive design of an architectural project including considerations of structural systems, environmental systems, life safety concerns, regulatory considerations, wall sections, building assemblies and significant detail. Prereq: ARCH 6150. Coreq: ARCH 6171. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Coreq: ARCH 6171 Restriction: Restricted to ARCH graduate students within the College of Architecture and Planning
ARCH 6171 - Integration Seminar (3 Credits)
In this seminar students will develop and document the technical aspects of their Design Studio VI design projects including, life safety, mechanical, electrical, plumbing, conveyance, accessibility systems and material assemblies. Prereq: ARCH 6150, ARCH 6151. Coreq: ARCH 6170. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Coreq: ARCH 6170 Restriction: Restricted to ARCH graduate students within the College of Architecture and Planning
ARCH 6180 - Furniture Design (3 Credits)
Students learn how to design and build furniture in the College's woodshop. Topics include ergonomics, properties of materials, principles and techniques of joinery and techniques of hand and machine tools. Cross-listed with ARCH 3709. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6185 - Digital Design & Fabrication (3 Credits)
An introductory class to Computer Aided Design (CAD) and Computer aided manufacturing (CAM). Students explore how these technologies apply to the field of architecture with a focus on parametric/algorithic design approaches and mass customization manufacturing techniques. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6190 - Special Topics in Design Studies (3 Credits)
Various topics in design, according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6195 - Aspen Summer Workshop (6 Credits)
Three weeks with three world class architecture firms in Roaring Fork Valley. The firms lead students through a unique design project that develops and challenges their observational, conceptual, and visualization abilities. Drawing as a means of seeing, understanding and creating dominates the process/ethic of the course. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
Typically Offered: Summer.

ARCH 6198 - Essentials of Biomimicry (3 Credits)
Biomimicry is the conscious emulation of nature's genius that can be applied to the fields of design, engineering, medicine, transportation, and social interaction. This class will be geared towards designers and will give an overview of the discipline, the (3) Essential Elements, the human-nature connection, The Biomimicry Thinking Methodology, and Life's Principles. Prereq: ARCH 5110. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ARCH 5110.
Typically Offered: Spring.

ARCH 6205 - Urban Housing (3 Credits)
This course examines housing trends and patterns; supply and demand factors; housing policies; housing challenges (e.g., inequitable distribution, special needs, segregation/discrimination, and homelessness); sociological, demographic, and economic considerations; and the roles of planners and the public and private sectors. Restriction: Restricted to graduate students. Cross-listed with LDAR 6755 and URPL 6405. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

ARCH 6210 - A History of American Architecture (3 Credits)
This course traces the history of architecture in North America from the early colonial settlements in the late 17th century to the corporate architecture of the late 20th century. The various formal languages and theories that have shaped the history of American architecture will each be discussed through the close examination of a select group of buildings within their specific cultural, social, political, and economic contexts. Restriction: Restricted to Graduate students. Cross-listed with ARCH 4610. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

ARCH 6212 - A History of Modern Architecture (3 Credits)
This course traces the various theoretical and formal developments in European and American Architecture from the end of the 19th century through the 20th century. The works of a select group of architects will be examined and discussed in relation to the diverse body of goals and objectives, ideas and ideals that constituted the Modern movements in architecture. Restriction: Restricted to Graduate students. Cross-listed with ARCH 4612. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

ARCH 6220 - A History of Theoretical Discourse on Architecture (3 Credits)
This course traces the history of theoretical discourse on architecture from the Renaissance to the present. It explores the genealogy of current theoretical stances and critical methodologies in the discipline of Architecture through the close reading of a select group of historic and contemporary texts. Prereq: ARCH 5230. Restriction: Graduate level students. Cross-listed with ARCH 4220. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ARCH 5230. Restriction: Graduate level students.

ARCH 6222 - Contested Terrains (3 Credits)
Explores the different processes, factors and forces and determines and influences occupation, land use and built form through the phenomena of conflict and contestation. Design is inherently located within the disputes and discourses involving landscape as location and resource. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 6230 - Preservation Theory and Practice (3 Credits)
The practice of historic preservation has evolved in a specific policy context. This introductory course introduces basic American institutions and laws associated with preservation as well as standards, definitions, and practices associated with these. Cross-listed with HIPR 6010.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6231 - Regionalisms & the Vernacular (3 Credits)
This class explores the history of the built environment from the perspective of evolutionary change; peoples attempting to meet utilitarian needs, respond to environmental forces, societal expectations, and aesthetic aspirations through design. The course looks closely at vernacular structures in a global context. Cross-listed with HIPR 6110.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6232 - Reading the City (3 Credits)
Design and planning professionals, including preservationists, must learn to work in environments with which they have had little previous knowledge. This course emphasizes gaining understanding of a novel environment and translating that knowledge into a well researched and media savvy professional presentation. Restriction: Graduate level students. Cross-listed with HIPR 6610. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
ARCH 6233 - Historic Buildings in Context (3 Credits)
This course covers the concept of "historic significance" and develops skills in understanding and professionally utilizing this concept. Procedures and skills are introduced. Restriction: Restricted to Graduate Students in the College of Architecture and Planning. Cross-listed with HIPR 6210. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

ARCH 6240 - History Of The City (3 Credits)
Introduces students to the history of global cities through selected typologies. Explores similarities and differences among cities considered against the larger cultural, political and socio-economic envelope of which they are part. Provides awareness of origins, growth and evolution of urban form. Cross-listed with URBN 6640. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6241 - Studies in Tectonics (3 Credits)
This research seminar focuses on tectonics - the logic of structure & material combinations (wood, metal, stone, masonry etc.). Through case studies, the relationship between function, aesthetics, detail, and tectonics are explored in relation to contemporary architectural concerns. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 6245 - Architecture, In Theory (3 Credits)
Explores theories and texts that have influenced the analysis and the production of architectural form. The focus is on the expressive potential of architectural forms and the modalities of the realization of this potential. Cross-listed with DSPL 7016. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6250 - Architectural Precedents (3 Credits)
Explores a number of traditional answers to recurring design issues, such as how to approach and enter a building or how to design a facade. In a seminar setting, students examine traditional ideas for their underlying principles and design new architectural compositions based on those principles. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6251 - Community Development (3 Credits)
This course introduces community development, examining planners' and other stakeholders' roles in the field; key theories and practices; community dynamics; community-based organizations; asset-based development; social equity; and the influence of local physical and economic factors on community development. Cross-listed with URPL 6400. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6252 - Urban Design Economics and Equity (3 Credits)
Obtain real-world pre-design and conceptual design experience in complex urban environments focusing on evolving trends in sustainability. Using digital trans-disciplinary learning students will develop comprehensive sustainable strategies that draw from their own sustainable philosophy developed during this class. Cross-listed with LDAR 6635 and LDAR 4435. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

ARCH 6255 - Social Justice in Planning (3 Credits)
This course investigates various social justice issues encountered in planning, including conflict resolution; advocacy; environmental justice; social equity; culture and diversity; disadvantaged populations; public engagement techniques; affordability; equal access; and policy impacts. Cross-listed with URPL 6410 and LDAR 6637. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6256 - Community Engaged Design Practice (3 Credits)
Obtain real-world pre-design and conceptual design experience in complex urban environments focusing on evolving trends in sustainability. Using digital trans-disciplinary learning students will develop comprehensive sustainable strategies that draw from their own sustainable philosophy developed during this class. Cross-listed with LDAR 6635 and LDAR 4435. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

ARCH 6257 - The Art of Traditional Design (3 Credits)
Introduction to Philosophy, History and Design Methods of Traditional Design derived from Greek precedents developed through the Renaissance and later the Beaux Arts. The course will emphasize this influence on the Architecture of the United States. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

ARCH 6258 - Architectural Precedents (3 Credits)
Explores a number of traditional answers to recurring design issues, such as how to approach and enter a building or how to design a facade. In a seminar setting, students examine traditional ideas for their underlying principles and design new architectural compositions based on those principles. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6259 - Urban Design Economics and Equity (3 Credits)
Explores the economics of urban design through its relationship with private-sector real estate development, public-sector infrastructure, and budgetary/fiscal constraints on design implementation while emphasizing the critical role of urban design in advocating for social equity, affordable housing, and related issues. Restriction: Graduate level students. Cross-listed with URBN 6625 and URPL 6395. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
ARCH 6270 - City Design Fundamentals (3 Credits)
Investigates the historical roots, spatial patterns, and physical forms of cities and their evolution over time; the environmental, cultural, and economic forces influencing city design; and urban design as the nexus of the planning and design professions in contemporary city-building. Cross-listed with URPL 6350, URBN 6525, and LDAR 5530. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

ARCH 6275 - History Native Amer Arch (3 Credits)
Introduces Native American architecture from the 12th century to the present. The course helps students understand the various cultural, technological, philosophical and aesthetic ideas that helped shape these buildings throughout history. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6290 - Special Topics in Cultural Studies (3 Credits)
Various topics in cultural studies, according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable.
Max hours: 21 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 21.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
Additional Information: AP Cultural Studies Area.

ARCH 6293 - Architect as Advocate (3 Credits)
This course will encourage students to become advocates for the profession by investigating the activities of advocates who have initiated and realized significant architectural opportunities. Students will then develop a proposal in which they practice becoming an Architect as Advocate. Prereq: ARCH 5110 and 5120 or ARCH 2111 and ARCH 2121.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ARCH 5110 and 5120 or ARCH 2111 and ARCH 2121.
Typically Offered: Fall.

ARCH 6310 - Greenbuilding Tech (3 Credits)
This seminar will advance the student’s knowledge of environmental building and construction methods through studies in material resources, innovative green systems, alternate green technology, energy efficiency, and affordability in “green architectural design.” Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6313 - LEED Certification, Greenbuilding Seminar (3 Credits)
This RIGOROUS course will use the LEED Certification process to provide a framework for assessing building performance and meeting sustainability goals, following the 1st step in a two stage Professional Accreditation process, focusing on LEED GA, Green Associate Accreditation. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6314 - LEED AP Advanced Greenbuilding Seminar (3 Credits)
This advanced LEED Certification and Accreditation course builds on the first LEED GA course, providing a framework for assessing green building performance and sustainability goals, exploring advanced green building concepts and preparing the student for the LEED AP BD+C exam. Prereq: ARCH 6313 or instructor approval. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ARCH 6313 Restriction: Restricted to majors within the College of Architecture and Planning

ARCH 6351 - Building Conservation (3 Credits)
This course emphasizes the relationship between knowledge acquisition, professional judgement, and design modification. Topics include: 1) Historic Building Types & Methods, 2) Field and Lab Methods of Building Assessment, and 3) Management of Building Rehabilitation. The course takes an integrative approach to the scientific, aesthetic, managerial and legal dimensions of preservation. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6352 - Building Conservation (3 Credits)
This methods course focuses on skills development in in-situ documentation of the historic environment. The course includes modules on: a) historic records, b) archaeological evidence, c) building and site measurement, d) photographic & Photometric methods, e) geo-spatial data, f) graphic representation, and g) reporting formats. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with HIPR 6310. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6353 - Documentation, Analysis, Representation (3 Credits)
This methods course focuses on skills development in in-situ documentation of the historic environment. The course includes modules on: a) historic records, b) archaeological evidence, c) building and site measurement, d) photographic & Photometric methods, e) geo-spatial data, f) graphic representation, and g) reporting formats. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with HIPR 6310. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6354 - Daylighting Design (3 Credits)
Daylighting is the use of light from the sky to illuminate building interiors. The objective of this course is to introduce students to the fundamentals of daylighting design including how it is perceived and how it impacts building energy flows. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
ARCH 6355 - Urban Conservation: Context for Reuse (3 Credits)
Human habitats (especially cities) are dynamic. The preservationist
cannot freeze cities in a static representation of the past. The course
deals with philosophical and political contexts, but emphasizes the
role of strategic design intervention in the shaping of evolving cities.
Restriction: Graduate level students. Cross-listed with HIPR 6410. Max
hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ARCH 6356 - Adaptive Reuse: Business and Practice (3 Credits)
Existing buildings and infrastructure afford challenges and opportunities
for reuse. This course explores the business, and financial aspects
of adapting the built environment for contemporary uses. The course
is suitable for designers, planners, historians and social scientists.
Restriction: Restricted to majors within the College of Architecture and
Planning. Cross-listed with HIPR 6220. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of
Architecture and Planning.

ARCH 6357 - The Poetic Detail-Studies in Tectonics—Wood (3 Credits)
This research seminar focuses on tectonics through traditional timber
frame and wood construction case studies. The relationship between
function, aesthetics, detail, and tectonics are explored in relation to
contemporary concerns. Learning by making. Cross-listed with ARCH
3704. Restriction: Restricted to ARCH-BS majors with sophomore
standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the
College of Architecture and Planning.

ARCH 6370 - Introduction To Design Build (3 Credits)
Introduction to Design Build project delivery methods important to
architects. Lecture, research on the industry and an individual student
project are the methods used to introduce ethical questions, role of the
architect, owner, consultant and subcontractors. Work leads to studio
project or case study. Restriction: Restricted to Architecture graduate
students within the College of Architecture and Planning. Max hours: 3
Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the
College of Architecture and Planning.

ARCH 6373 - Construction in Design Build (3 Credits)
Using a single project, students fully explore the design phase,
estimating, scheduling and project management skills in traditional
construction. Course is concurrent with an advanced studio and builds
a project on a site. Restriction: Restricted to Architecture graduate
students within the College of Architecture and Planning. Max hours: 3
Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the
College of Architecture and Planning.

ARCH 6375 - Green Tech Eco-Furniture Fabrication I (3 Credits)
Green Tech I is the first of two courses that are a "real build" course
in which students advance their knowledge of environmental design
through full-scale construction of architectural elements, furnishings,
accessories, finishes, outdoor gear, or even clothing. Coreq: ARCH 6376.
Restriction: Restricted to Architecture graduate students within the
College of Architecture and Planning. Cross-listed with ARCH 3804. Max
hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: ARCH 6376 Restriction: Restricted to Architecture graduate
students within the College of Architecture and Planning

ARCH 6376 - Green Tech Eco-Furniture Fabrication II (3 Credits)
Green Tech II is the second of two courses that is a "real build" course
in which students advance their knowledge of environmental design
through full-scale construction of architectural elements, furnishings,
accessories, finishes, outdoor gear, or even clothing. Students must be
enrolled in both Green Tech I and Green Tech II in the same semester.
Coreq: ARCH 6375. Restriction: Restricted to Architecture graduate
students within the College of Architecture and Planning. Cross-listed
with ARCH 3806. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: ARCH 6375 Restriction: Restricted to Architecture graduate
students within the College of Architecture and Planning

ARCH 6377 - EcoFAB: Furniture Design and Fabrication for Small-Scale
Residential Architecture (3 Credits)
This unique, quick-paced seminar focuses on small-scale residential
design, from tiny-homes, to prefab, and movable residences. Students
learn Small Home design, methods, and techno-systems, then using
green materials, they design and fabricate architectural elements and
furniture for enhancing small-scale living. Restriction: Restricted to ARCH
graduate students. Cross-listed with ARCH 3807. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the
College of Architecture and Planning.

ARCH 6390 - Special Topics in Technology (3 Credits)
Various topics in technology, according to current faculty and student
interests. Restriction: Restricted to Architecture graduate students within
the College of Architecture and Planning. Repeatable. Max hours: 18
Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 18.
Restriction: Restricted to Architecture graduate students within the
College of Architecture and Planning

Additional Information: AP Technology Studies Area.

ARCH 6412 - Construction Documents (3 Credits)
Introduces the concepts and techniques of construction documents.
Restriction: Restricted to Architecture graduate students within the
College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the
College of Architecture and Planning.
ARCH 6413 - Construction Leadership (3 Credits)
The final course is an integrated architecture, engineering, and construction business course bringing together executives, principals, and managers to current industry topics and provide students opportunities to apply management and leadership principles from the various fields to case study projects. Cross-listed with CVEN 5238. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6420 - Integrated Practice & BIM Technology (3 Credits)
This class will be a general overview of integrated practices and technologies used in today's industry. Understanding the nature of how information is created and managed using BIM technologies will help us define a road map for how information passes downstream and bring value to a project. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6450 - Pre-Design (3 Credits)
Course lectures, readings, and case studies cover pre-design methodologies, research, documentation, facilitation and consensus building. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6463 - BIM: Emerging Prof. Practices (3 Credits)
The 21st century architect's emerging role is designing the design process. BIM (Revit) attempts to optimize the entire process, including all participants, from conceptual design, through post-building occupancy. These capabilities are explored and developed. Prereq: ARCH 5430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6464 - BIM: Advanced Design Concepts (3 Credits)
BIM's complexity (Revit) challenges all designers. The emerging tool is very sophisticated, but its benefit are not realized from modeling alone. We address architectural design as a multifaceted optimization process: concept, form, and function. Prereq: ARCH 5430. Cross-listed with ARCH 6390. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6470 - ACE Mentoring (3 Credits)
Graduate students work with professional architects, designers, and engineers mentoring students in selected local high schools to learn problem solving, graphics and model making to produce a design project. Student mentors develop lesson plans, outcomes and keep a weekly journal. Cross-listed with LDAR 6470 and URPL 6850. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6471 - Managing Quality & Risks (3 Credits)
A lecture and seminar on approaches to risk management including contracts, insurance, financial analysis, dispute resolution and client relationships. Utilizing case study approach, quality assurance will be defined and studied in the design and building phase of workings. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6472 - Architecture in a Single Source Project Delivery (3 Credits)
 Directed to the practice of architecture with design build and other single source delivery systems. This course examines requirements of codes, zoning, building systems and legal questions for the architect. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6473 - Research Tools & Methods (3 Credits)
Introduces the thesis in architecture and establishes the scholarly basis for the research and construction of a Master's Thesis project. This course will provide the student with the research practices and methodologies to develop the scholarship and products required to produce a Thesis Project Proposal. Completion of this course is a prerequisite for the student to submit the Thesis Proposal for departmental approval to continue with the remaining 9 credits of thesis work. Cross-listed with LDAR 6949. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6475 - BIM/Flow of Information (3 Credits)
The course is geared toward CAP students, non-degree seeking working professionals and other students interested in the Integrated Construction, Management and Leadership (ICML) Certificate. This class will be a general overview of Virtual Design and Construction (VDC) in today's AEC industry. Restriction: Graduate students. Junior standing and above undergraduate students are eligible to take course with approval by instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6490 - Special Topics in Professional Studies (3 Credits)
Various topics in professional studies according to current faculty and student interests. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Repeatable. Max Hours: 18 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 18.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

Additional Information: AP Professional Studies Area.
ARCH 6510 - Digital Applications in Design (3 Credits)
This course introduces first year design students to the Graphic Design Concepts and Digital Applications necessary to create digital, printed and physical presentations of their work. Students learn computer skills including: raster and vector based programs and digital modeling. Prereq: ARCH 5110 and ARCH 5510. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6515 - Adv. Digital Representation (3 Credits)
In this course students will learn advanced techniques of architectural representation using digital modeling, rendering engines, and post processing in the Adobe Creative Suite. Prereq: ARCH 5110 and 6510 or equivalent. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6530 - The Classical Elements (3 Credits)
Classical Elements provides skills for the Classical Studio (optional) and prepares students to apply for Certificate in Classical Architecture from the Institute of Classical Architecture and Art (optional). The course addresses the basic vocabulary, proportional systems, and theory of classical architecture. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
Typically Offered: Fall.

ARCH 6550 - Digital Portfolio Design (3 Credits)
This course introduces students to the Graphic Design Concepts and the Digital Applications used to create both Printed and Web-based Portfolios. Students must have completed ARCH 5110 and have a working knowledge of Photoshop. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6560 - Architecture Photography (3 Credits)
Emphasizes and understanding of light, composition, color and problem solving, with a particular goal of applying these skills to the photography of architectural exteriors and interiors. For students who have access to adjustable 35 mm digital cameras. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6570 - Sketching As Seeing (3 Credits)
Sketching promotes seeing, and seeing promotes thinking. This course is designed to help you think & see by the regular practice of sketching & the discipline of keeping a sketchbook. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6575 - 2D-3D & 4D Design Space (3 Credits)
The graphics language of words and art bridge intention and design. Passing ideas and mental imagery through digital technology's 2D, 3D and 4D filters is the challenge. Students develop concepts in AutoCAD, visualize in 3DStudio Max, and narrate the process in Adobe Premiere. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6580 - High-Performance Façade Design (3 Credits)
It is the intent of the course to provide graduate students with a comprehensive understanding of the technical concepts and specific skills necessary to undertake in actual practice the design, detailing, specification, and construction administration of high-performance building facades. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max Hours: 3 Credits
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6700 - Architecture in Other Cultures I: Research Design (3 Credits)
Various studies of architecture and urbanism in foreign countries. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning
Typically Offered: Summer.

ARCH 6715 - The Built Environment in Other Cultures I: Research Design (3 Credits)
The intent is to broaden students’ perspectives by asking them to examine design within another culture. Each student prepares a proposal of study including a statement of the problem to be addressed, the type of field research to be undertaken and the nature of the report to be produced. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning

ARCH 6755 - Rome: Architecture & Urbanism (3 Credits)
The objective of this course is to provide a broad overview of the city's major architectural sites, topography, infrastructure and systems of urban design and organization through the study of the rich palimpsest of buildings, piazzas and landscapes from antiquity to the present day. Coreq: ARCH 6760. Restriction: Restricted to ARCH graduate students. Cross-listed with ARCH 3693. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: ARCH 6760. Restriction: Restricted to ARCH graduate students. Additional Information: Global Education Study Abroad.
ARCH 6760 - Rome: Documentation, Analysis and Design (3 Credits)
With graphic representation as the primary mode of inquiry, this course is an intensive study of a single building, piazza or landscape within the rich urban fabric of Rome. The graphical inquiry will be supported by pre-departure research and onsite observation and presentations. Coreq.
ARCH 6755. Restriction: Restricted to ARCH graduate students. Cross-listed with ARCH 3694. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq. ARCH 6755. Restriction: Restricted to ARCH graduate students.
Additional Information: Global Education Study Abroad.

ARCH 6840 - Independent Study (1-3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to architecture. Restriction: Graduate level students. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Graduate level students.

ARCH 6930 - Architecture Internship (3 Credits)
Designed to provide professional practice experience. The internship is composed of eight hours per week working in a practicing professional's office during the regular semester. Students must complete the second-year level before taking this course. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Graduate level students.

ARCH 6931 - Architecture Internship (3 Credits)
Designed to provide professional practice experience. The internship is composed of eight hours per week working in a practicing professional's office during the regular semester. Students must complete the second-year level before taking this course. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Graduate level students.

ARCH 7840 - Independent Study (1-3 Credits)
Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
Architectural, MArch

Introduction

The Master of Architecture is offered to students who have completed a pre-professional architecture degree, as well as to students who have completed an unrelated undergraduate or graduate degree. Students holding a pre-professional degree will be evaluated individually for advanced standing in the MArch program, commensurate with their previous educational experiences.

Our program prepares students for entry into the architecture profession and licensure. Our mission is to lead in the discovery, communication and application of knowledge in the discipline of architecture by integrating theory and practice. In this collaborative educational model, environmental, economic, social, cultural, aesthetic and ethical concerns are fundamental.

The curriculum responds to and aligns with the evolving nature of professional practice including collaborative work environments, critical thinkers, problem-solving team players, builders and leaders with excellent communication skills. Recognizing that the practice of architecture is global, we provide students with international perspectives and experiences giving them a competitive edge when they enter the profession.

Students whose undergraduate degree was not a design related degree will take a minimum of three years to complete the Master of Architecture. Students who have an undergraduate design related degree may receive credit for courses previously taken and can typically complete the program in two years depending on advanced standing given. The program provides the skills and bodies of knowledge nationally specified for graduate study in architecture and is fully accredited by the National Architectural Accrediting Board (NAAB).

Prerequisites

Students must complete the prerequisites of college-level trigonometry and physics before enrolling in the MArch program.

The architecture skills workshop is highly recommended for students who do not have a background in architectural drawing, model making or digital graphics work. This class is offered each year before the beginning of the fall semester.

Students are expected to have achieved a basic level of computer literacy and should be familiar with PC or Mac operating systems.

Program Tracks

There are two curriculum tracks leading to the MArch degree.

Four Studio Track (p. 182) - minimum 63 Semester Hours

This course of study allows those students with a pre-professional degree to pursue a professional Master of Architecture degree in a minimum of two years (the total duration of the program will vary). The curriculum follows a prescribed sequence of four design studios combined with core courses and electives. Applicants must hold a Bachelor of Science in Architecture, Bachelor of Art in Architecture or Bachelor of Environmental Design to be considered for this track.

Six Studio Track (p. 183) - 105 Semester Hours

This course of study allows students without a pre-professional degree to pursue a professional Master of Architecture degree in a minimum of three years (the total duration of the program will vary). The curriculum follows a prescribed course of six design studios, fundamental core courses and electives. Applicants must hold a baccalaureate degree from an accredited university in any field.

All degrees awarded by universities outside the United States will be reviewed on a case-by-case basis and the admissions committee will determine the appropriate track.

Four Studio Track

Curriculum Overview

The Four Studio Track curriculum for the Master of Architecture (MArch) program is divided into six major components, totaling a minimum of 63 semester hours in residence at the University of Colorado Denver.

¹ Required Elective.

Electives

A wide array of electives in these areas allows students to tailor their graduate studies to their own interests. Students may choose to take elective courses in the summer session. It is highly suggested that students use the summers to study abroad or participate in a professional internship.

In order for a student to complete the course of study within the 60 semester hours (two years of study) a student must have completed the following courses with a grade of B or better:

- 4 design studios (six credits each)
- 2-3 course sequence covering the history of architecture
- 1 course introduction to the theory of architecture
- 2 course sequence on sustainable environmental control systems
• 2 course sequence on structures addressing statics, material mechanics, structural analysis, and design of simple structural elements and systems
• 2 course sequence on building materials and construction
• 1 course on architectural visualization and representation

Above courses not completed by the time the student enrolls in the program will be added onto the 60 semester hours and will need to be completed at the University of Colorado Denver prior to graduation. An official review of the student’s previous course work will be conducted in the spring following admissions and will be sent to the student upon the receipt of the student’s intent to attend.

**Six Studio Track**

**Curriculum Overview**

The curriculum for the Master of Architecture (MArch) program is divided into six major areas of study, totaling 105 semester hours:

1 Required Electives

**Electives**

A wide array of electives in these areas allows students to tailor their graduate studies to their own interests. Advanced standing in core course work can be given for prior architectural studies. Students may choose to take elective courses in the summer session. It is highly suggested that students use the summers to study abroad or participate in a professional internship.

**Four-Studio Course Sequence**

This schedule shows the recommended sequence of courses. To modify this schedule, students should consult their CAP academic advisor.

1. Students are expected to complete ARCH 5350 Structures I prior to taking ARCH 5360 Structures II.
Landscape Architecture

Chair: Louise, Bordelon, PhD
Email: louise.bordelon@ucdenver.edu

Overview
The Master of Landscape Architecture (MLA) program balances theory and practice to prepare students to create health, well-being, and environmental resilience through design in the public realm. Our fully accredited professional program takes advantage of our location in the heart of Denver and the rapidly growing metro area. The program prepares students to enter practice and offers distinctive opportunities for students to engage in meaningful projects that impact our communities and our built environment. We educate landscape architects to lead the design and planning process; successful graduates pursue diverse practices and occupations in public and private arenas around the world.

Our students study relevant issues through classes and immersive experiences that challenge them to think critically about the applications and implications for the work we do. While grounded in design and professional skills, the curriculum is structured to address evolving concerns for our profession, our communities and our environment through topics such as learning landscapes, water in the west, inclusive landscapes, food systems and insecurity, and emerging sustainable practices.

Programs
• Landscape Architecture, MLA (p. 190)
• Landscape Architecture Certificate (p. 224)

Faculty
Professors:
Lois A. Brink, MLA, University of Pennsylvania
Ann Komara, MLA, MArch Hist, University of Virginia

Associate Professors:
Joern Langhorst, Dipl. Ing. (MLA), University of Hannover
Jody Beck, MArch, PhD, University of Pennsylvania

Assistant Professors (Tenure Track):
Louise Bordelon, MLA, PhD, Louisiana State University

Additional information about faculty in this department is on the college's website (https://architectureandplanning.ucdenver.edu/architecture/academics/masters-programs/master-landscape-architecture/).

Landscape Architecture (LDAR) Courses
LDAR 5501 - Landscape Architecture Design Studio 1 (3 Credits)
Introduction to basic strategies, methods and techniques of landscape architectural design and representational techniques. Explores fundamental issues of spatial form and landscape experience and meaning. Prereq: LDAR 5510. Restriction: Restricted to graduate majors within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: LDAR 5510. Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 5502 - Landscape Architecture Design Studio 2 (6 Credits)
Problem-based studio course covers strategies, methods and techniques of landscape architectural design with emphasis in more complex social and urban issues, design processes and development and the application of theory and research. Prereq: LDAR 5501 and LDAR 5540 or GEOG 4080/5080, or permission of instructor. Restriction: Restricted to graduate majors within the College of Architecture and Planning. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: LDAR 5501 and LDAR 5540 or GEOG 4080/5080. Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 5503 - Landscape Architecture Design Studio 3 (6 Credits)
Problem-based studio covering the approaches, techniques and means for planning and designing sites to accommodate development program on a particular site within an identifiable context. Covers issues definition, site analysis, programming, development of design strategies, evaluation site planning, and communication. Prereq: LDAR 5501 and LDAR 5502 or permission of department chair. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 5510 - Graphic Media in Landscape Architecture (3 Credits)
Introduces basic principles and methods associated with analog and digital drawing-plan, sections, perspectives, color, shading, composition and projection. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 5521 - History of Landscape Architecture (3 Credits)
Intro survey course fosters workable understanding of landscape architecture design history and theory and offers a base for understanding trends and ideas influencing contemporary practice. Emphasizes Western Europe and the United States from antiquity to early twentieth century. Cross-listed with LDAR 4421. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate level or senior level or higher students
LDAR 5530 - City Design Fundamentals (3 Credits)
Investigates the historical roots, spatial patterns, and physical forms of cities and their evolution over time; the environmental, cultural, and economic forces influencing city design; and urban design as the nexus of the planning and design professions in contemporary city-building. Cross-listed with URPL 6350, UBKN 6525, and ARCH 6270. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning
LDAR 5532 - Landform Manipulation (3 Credits)
Focuses on the fundamental technical aspects of landscape architectural design and site engineering of related topography, grading, drainage design, landform manipulation, earthwork calculations, and road alignment. Prereq: LDAR 6641 or higher or permission of instructor. Cross-listed with LDAR 4432. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: LDAR 6641 or higher or permission of instructor.
Typically Offered: Spring.
LDAR 5540 - Introduction to GIS (3 Credits)
An introduction to GIS as a set of strategies, methods and techniques used to facilitate the inventory and analysis of complex systems. Restriction: Restricted to graduate students. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Spring, Summer.

LDAR 5572 - Ecology for Landscape Architects (3 Credits)
Course emphasizes continuity and change in an ecology of the natural and man-made landscape. Focuses on biological, geophysical, cultural, and perceptual factors involved in landscape, spatial organization, and urban and regional structure. Introduces field ecology for landscape architecture. Restriction: Restricted to graduate students. Cross-listed with LDAR 4472. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

LDAR 5573 - Advanced Landscape Ecology (3 Credits)
Critically investigates the performance of complex landscape systems on multiple spatial and temporal scales, with emphasis on the interaction of human and non-human systems. May address issues of sustainability, disaster recovery, mitigation, etc. Prereq: LDAR 5572 or permission of instructor. Restriction: Restricted to graduate students. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: LDAR 5572 or permission of instructor. Restriction: Restricted to graduate students.

LDAR 6470 - ACE Mentoring (3 Credits)
Graduate students work with professional architects, designers, and engineers mentoring students in selected local high schools to learn problem solving, graphics and model making to produce a design project. Student mentors develop lesson plans, outcomes and keep a weekly journal. Cross-listed with ARCH 6470 and URPL 6850. Restriction: Restricted to majors within the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6520 - Landscape Architecture in Other Cultures (1-9 Credits)
Study abroad. Various studies of landscape architecture, architecture, urbanism, and design to destinations outside of the continental United States. Cross-listed with LDAR 3690. Restriction: Restricted to majors within the College of Architecture and Planning. Repeatable. Max Hours: 9 Credits. Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6604 - Landscape Architecture Design Studio 4 (3 Credits)
Intermediate landscape design studios engage design projects and topics that cover diverse design approaches, contexts, and landscape processes at various scales and complexities. Design projects will vary. Students are expected to expand their graphic, oral communication, and design skills. Prereq: LDAR 5501, 5502, 5503 or permission of department chair. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6605 - Landscape Architecture Design Studio 5 (3 Credits)
Intermediate landscape design studios engage design projects and topics that cover diverse design approaches, contexts, and landscape processes at various scales and complexities. Design projects will vary. Students are expected to expand their graphic, oral communication, and design skills. Prereq: LDAR 5501, 5502, 5503, 6604 or permission of department chair. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6606 - Landscape Architecture Design Studio 6 (6 Credits)
Advanced design studio covering landscape change in diverse contexts at various scales and complexities. Recommended: completion of 2 graduate level landscape studios or permission of department chair. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 6 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning.

LDAR 6607 - Landscape Architecture Design Studio 7 (3 Credits)
Advanced landscape design studios engage design projects and topics that cover diverse design approaches, contexts, and landscape processes at various scales and complexities. Design projects will vary. Students are expected to demonstrate mastery of graphic, oral communication, and design skills. Prereq: LDAR 5501, 5502, 5503, 6604, 6605, 6606 or permission of department chair. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6608 - Landscape Architecture Design Studio 8 (3 Credits)
Advanced landscape design studios engage design projects and topics that cover diverse design approaches, contexts, and landscape processes at various scales and complexities. Design projects will vary. Students are expected to demonstrate mastery of graphic, oral communication, and design skills. Prereq: LDAR 5501, 5502, 5503, 6604, 6605, 6606, 6607 or permission of department chair. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6620 - Landscape Architecture Theory and Criticism (3 Credits)
Explores and assesses theory in landscape architecture and the concepts, ideas and discourses underlying contemporary design approaches. Emphasizes developing critical understanding of the roles and agency of theoretical inquires in landscape architecture in relation to aligned disciplines. Cross-listed with ARCH 3620. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6625 - Landscape Architecture Field Studies (3 Credits)
Critical field evaluation of built works of landscape architecture using methodological approaches like field measurement, mapping, sketches, photography, written evaluations and applied research. It may also assess the performative aspects of designed landscapes. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6630 - Site, Society and Environment (3 Credits)
Sites are defined by relationships within environmental and social settings. Therefore site design should be primarily ethical and secondarily technical. This course examines the implications of this idea through site methodologies, conceptual construction of site, site analysis and site typologies. Restriction: Restricted to graduate majors within the College of Architecture and Planning. Cross-listed with LDAR 4430. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6631 - Landscape Construction Materials and Methods (3 Credits)
Develops understanding of detailed design processes, construction materials and selection of construction methods and documents. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6632 - Site Planning (3 Credits)
Focuses on site planning processes, criteria and decision-making. Includes research, site analysis, and data synthesis as they relate to site context and design concepts. Also addresses site work (grading and drainage, utilities), cost computation, and creating site and building program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6635 - Community Engaged Design Practice (3 Credits)
Obtain real-world pre-design and conceptual design experience in complex urban environments focusing on evolving trends in sustainability. Using digital trans-disciplinary learning students will develop comprehensive sustainable strategies that draw from their own sustainable philosophy developed during this class. Cross-listed with ARCH 6257 and LDAR 4435. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6636 - Urban and Local Food Systems (3 Credits)
In this seminar, we will examine the connections between landscape architecture and food production in cities as well as the role that food production plays in rural landscapes. The course material may be historical, theoretical, or oriented toward contemporary research. Cross-listed with LDAR 4436. Restriction: Restricted to graduate students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning.
LDAR 6637 - Social Justice in Planning (3 Credits)
This course investigates various social justice issues encountered in planning, including conflict resolution; advocacy; environmental justice; social equity; culture and diversity; disadvantaged populations; public engagement techniques; affordability; equal access; and policy impacts. Cross-listed with URPL 6410 and ARCH 6258. Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Architecture graduate students within the College of Architecture and Planning.
LDAR 6641 - Computer Applications in Landscape Architecture (3 Credits)
Introduces digital technologies and methods commonly used in landscape architecture including primarily CADD, visualization, graphic design, and other emerging applications. Includes hands-on exercises. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6642 - Landscape Architecture Digital Design Workshop (3 Credits)
Provides hands-on experiences in the principles, software, and theories for emergent 3-D and 4-D design in landscape architectural practice and research. Prereq: LDAR 6641. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: LDAR 6641 Restriction: Restricted to majors within the College of Architecture and Planning.
LDAR 6655 - Urban Ecology (3 Credits)
This lecture/seminar will cover ecological principles as applied to urban systems (lecture portion) and students will do an intensive study, presentation, and discussion on the topic of their choosing (seminar portion). Cross-listed with URPL 6547. Restriction: Restricted to graduate students in the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.
LDAR 6670 - Plants in Design (3 Credits)
Explores the challenges, opportunities and responsibilities of designing with living, growing, and ever-changing organisms. Students learn to identify plants that are commonly used in the Colorado region and the principles, theories, methods, and techniques for planting design. Restriction: Restricted to graduate majors within the College of Architecture and Planning. Majors and minors outside of landscape architecture and non-degree seeking students can ask the Department Chair for course permission. Cross-listed with LDAR 4470. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6671 - Plant Material Identification (3 Credits)
Students learn the names, characteristics and site requirements of plants including trees, shrubs, ground covers and perennials commonly used in built works in the Colorado region. Methods are transferable to other regions. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.
LDAR 6686 - Special Topics: Landscape Architecture (3 Credits)
Various topical concerns are offered in landscape architecture history, theory, elements, concepts, methods, implementation strategies, and other related areas. Restriction: Restricted to graduate students. Repeatable. Max hours: 21 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 21.
Restriction: Restricted to students with graduate standing.
LDAR 6706 - Advanced Landscape Architecture Design Studio Immersive I (4 Credits)
Advanced design studio forms core of the Immersive experience; covers landscape change in diverse contexts at various scales and complexities. Travel competent also required (LDAR 6707). Recommended: complete 2 previous landscape graduate studios or permission of department chair. Coreq: LDAR 6707 and LDAR 6740 or LDAR 6745. Max hours: 4 Credits. Grading Basis: Letter Grade Coreq: LDAR 6707 and LDAR 6740 or LDAR 6745.

LDAR 6707 - Advanced Landscape Architecture Design Studio Immersive II (2 Credits)
Advanced design studio forms core of the Immersive experience; covers landscape change in diverse contexts at various scales and complexities. Travel anticipated. Recommended: complete 2 previous landscape graduate studios or permission of department chair. Coreq: LDAR 6706 and LDAR 6740 or LDAR 6745. Max hours: 2 Credits. Grading Basis: Letter Grade Coreq: LDAR 6706, and LDAR 6740 or LDAR 6745.

LDAR 6711 - Advanced Graphics Landscape Architectural (3 Credits)
Focuses on developing practical and applied expertise in various manual and digital visualization and representation techniques and media used for enhanced effectiveness in visual communication. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6712 - Green Roofs/Living Systems (3 Credits)
The primary objective for this seminar is to give students a general understanding of green roof systems, vegetated roofs above underground architecture and vertical vegetated systems. The seminar will engage in critiques and discussions using international, national and local case studies, covering history, typologies, function, design, master planning and costs. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6720 - Finding Common Ground (3 Credits)
Focuses on principles and societal variables that influence the structure of urban neighborhood space through research application. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6722 - Contested Terrains (3 Credits)
Explores the different processes, factors and forces that determine and influence occupation, land use and built form through the phenomena of conflict and contestation. Design is inherently located within the disputes and discourses involving landscape as location and resource. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6723 - Cinema and the Landscape (3 Credits)
Explores the relationships between landscape and film through theoretical and practical investigations. Explores film’s roles in understanding and investigating landscapes, their dynamic qualities and processes, and issues related to film’s capacity to construct spatial meaning. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 6. Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6724 - American Landscapes (3 Credits)
Historical, theoretical and critical evaluation of the development of American landscapes. May cover the economic, philosophical and social trends behind changes in the landscape as well as the intellectual and contextual changes to the theory and practice of landscape architecture. Prereq: LDAR 5521 Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6725 - Design Communications (3 Credits)
In this seminar students will learn research and writing skills to produce articles in clear, readable, and substantial prose, from academic criticism to general interest reviews; writing forms and styles, including essays, reports, award applications and writing for oral presentation; and editing basics. Prereq: History and/or theory of landscape architecture or architecture. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6735 - The Landscape of Food (3 Credits)
An examination of the reciprocal relationships between landscapes and patterns of food production, distribution, and consumption. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6740 - Advanced History/Theory Seminar - Immersive Semester (3 Credits)
Investigates topical issues in landscape architecture history/theory, process and methods within the framework of themes/issues running through the immersive semester course of study. Coreq: LDAR 6706. Restriction: Restricted to graduate CAP students. Max hours: 3 Credits. Grading Basis: Letter Grade Coreq: LDAR 6706. Restriction: Restricted to graduate CAP students.

LDAR 6741 - Urban Design Process (3 Credits)
Advances current practice by exploring innovative methods of design analysis, production, representation, and communication. Community participation and civic engagement are integral components of seminar. Cross-listed with URBN 6641 and URPJ 6398. Restrictions: Restricted to Graduate level students in the college of Architecture and Planning. Max Hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to Graduate Level students in the College of Architecture and Planning.
LDAR 6745 - Advanced Media/Technology Seminar - Immersive Semester  (3 Credits)
Advances landscape architectural practice by exploring innovative methods of design analysis, production, representation, and communication. Community participation and civic engagement are integral components of this seminar aligned with the immersive studio core track. Coreq: LDAR 6706. Restriction: Restricted to graduate CAP students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: LDAR 6706. Restriction: Restricted to graduate CAP students.

LDAR 6750 - Professional Practice  (3 Credits)
Explores the essential elements of professional practice and equips students with the fundamental knowledge and skills requisite to understand and participate in this practice. Covers office organization, project management, contracts, professional ethics and non-traditional careers. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

LDAR 6755 - Urban Housing  (3 Credits)
This course examines housing trends and patterns; supply and demand factors; housing policies; housing challenges (e.g., inequitable distribution, special needs, segregation/discrimination, and homelessness); sociological, demographic, and economic considerations; and the roles of planners and the public and private sectors. Cross-listed with ARCH 6205 and URPL 6405. Restriction: Restricted to graduate students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

LDAR 6840 - Independent Study  (1-3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to landscape architecture or urban design. Restriction: Graduate level students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

LDAR 6850 - GIS Capstone  (3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to GIS. Serves as Capstone for LA GIS certificate. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

LDAR 6930 - Landscape Architecture Internship  (3 Credits)
This experiential learning course provides students the opportunity to participate in and reflect on the practice of landscape architecture by working in a design office. Students will reflect on and critically analyze issues such as leadership, management and collaboration. This course may only be taken once during a student's academic career and is to be taken after the first year of graduate study. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Graduate level students.

LDAR 6949 - Research Tools & Methods  (3 Credits)
Introduces students to research in landscape architecture and related fields and disciplines. Provides students with research practices, methods, and methodologies and a critical framework to identify suitable approaches based on diverse projects and contexts. Supports studio, independent study and thesis. Restriction: Restricted to graduate students. Cross-listed with ARCH 6473. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
Typically Offered: Fall.

LDAR 6950 - Thesis Research  (3 Credits)
Student works closely with a landscape architecture faculty advisor and thesis committee to develop the thesis through focused research. Research might entail both written and graphic inquiry leading to specific products with conclusive ideas setting the stage for final thesis. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restriction: Graduate level students.
Additional Information: Report as Full Time.

LDAR 6951 - Landscape Architecture Thesis  (6 Credits)
The Landscape Architecture thesis is expected to advance the field of landscape architecture by offering new insights into aspects of design, technology, history or professional principles. In this course, the student continues to work independently, but closely with a landscape architecture faculty advisor and thesis committee to complete the thesis. The thesis might take on different final forms (written volume, drawings, maps, digital images), depending on the subject inquiry. For further information on the Landscape Architecture Thesis Track consult the Landscape Architecture Thesis Guidelines. Restriction: Graduate level students. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Graduate level students.
Additional Information: Report as Full Time.
Landscape Architecture, MLA

Chair: Louise Bordelon, PhD

Introduction

The Master of Landscape Architecture (MLA) program balances theory and practice to prepare students to create health, well-being, and environmental resilience through design in the public realm. Our fully accredited professional program takes full advantage of our location in the heart of Denver and the rapidly growing metro area. The program enables students to enter practice and offers distinctive opportunities for students to engage in meaningful projects that impact our communities and our built environment. We educate landscape architects to lead the design and planning process; successful graduates pursue diverse practices and occupations in public and private arenas around the world.

Our students study relevant issues through classes and immersive experiences that challenge them to think critically about the applications and implications for the work we do. While grounded in design and professional skills, the curriculum is structured to fluidly address evolving concerns for our profession, our communities, and our environment through topics such as health and well-being, water in the west, food systems, and emerging sustainable practices.

The Degree

The Master of Landscape Architecture (MLA) curriculum revolves around a sequence of design studios, supported by core content classes and a variety of seminar courses. We deliver a fully accredited Master of Landscape Architecture for first professional degree students and post-professional students (those already holding a Bachelor of Landscape Architecture or Bachelor of Architecture degree).

Our program balances theory and practice and emphasizes design to create health and well-being and environmental resilience through design in the public realm. The curriculum fosters an ethic of responsibility grounded in natural systems and processes and an understanding of cultural and community values. Students learn skills working on relevant urban and civic projects in both local and global contexts and at a variety of scales. Studios and courses engage current issues, define future trends, and explore the role of landscape architecture in a rapidly changing world. Throughout the program, our students learn and apply design and planning skills, approaches, and technologies to enhance community, foster equity and environmental balance, conserve, and regenerate resources, and create places that hold value for current and future generations.

Denver’s vibrant professional design and planning community supports our students through guest lectures and participation in design reviews, internships and mentor programs, and opportunities to visit offices and meet practitioners and leaders in our fields.

Program Objectives

The department has developed five broad program objectives in support of our educational mission. These objectives identify what students should know and be able to do by the time they graduate and are linked to a series of measurable student learning outcomes. The five categories are:

- Design: Students will be able to formulate questions and arguments about landscape and its role as a significant cultural medium and determine processes and practices that lead to transformative actions based on ethical, communicative, and content knowledge criteria.
- Students will be able to create and employ appropriate representational media to effectively convey ideas on subject matter contained in the professional curriculum to a variety of audiences, and to articulate and convey ideas orally and in writing.
- Professional Ethics: Students will be able to critically evaluate local and global ramifications of social issues, diverse cultures, economic and ecological systems, and professional practice as guiding principles for design thinking and implementation.
- Content Knowledge: Students will be able to develop a critical understanding and application of the histories, theories and practices of landscape architecture and its role in reflecting and shaping culture and environments.
- Research: Students will be able to develop and apply diligent and systematic critical paths of inquiry in support of design and scholarship.

Central Themes

The MLA program prepares students to address current and future problems and challenges in local, regional, and global contexts. An issues-based approach ensures that students will be exposed to and participate in the development of new responses to emergent and ongoing crises and opportunities, emphasizing environmental and social justice as a key element for the design of livable, sustainable, and resilient places and landscapes. Examples of this are deep in the department’s work over the past forty years, with examples such as working for five years with the local community of the Lower 9th Ward in New Orleans addressing issues around recovery after Hurricane Katrina, and the Learning Landscapes initiative that recently won a Student ASLA award for a design-build project in Wheat Ridge, Colorado. We address issues of water, food scarcity, and urban agriculture, the redesign and recovery of post-industrial sites and mining landscapes throughout the state, and issues of health and livability in marginalized and under-served communities and neighborhoods. Many of these projects involve multiple courses over several years and have made major impacts on the places and communities they have engaged. Students are immersed in interdisciplinary opportunities to not just learn, but to make meaningful change, and interact with community members and professionals from many different backgrounds and disciplines, gaining invaluable experience and skills in working and communicating in interdisciplinary teams.
BIG THINKING
We believe that the issues, challenges, and opportunities landscape architects face are interrelated, spanning all scales from a small private yard to neighborhood to city to region to the world, and involve a wide range of social, cultural, ecological, and economic systems, requiring critical and creative thinking that transcends scales and is cross-, trans- and interdisciplinary.

CRITICAL ISSUES
We strongly believe that Landscape Architecture is uniquely positioned to make major contributions to the big and urgent questions and issues that affect human and non-human systems. Climate change, resource scarcity, water and food are as critical as the design and building of landscapes and places that are about more than just sustainability and resilience and provide opportunities for people to thrive.

MEANINGFUL CHANGE
While the functioning and performances of human and non-human systems are critical, good design does more than just provide solutions to problems. It provides opportunities for people to interact with places over time, and it empowers them to understand the dynamics that affect their environments and to participate in the ongoing processes of changing place and changing communities, thus becoming authors and co-authors of the places they shape and inhabit.

Dual Degree and Certificate Options
There are many dual degree and certificate options available to MLA students. For more information on currently available programs, please visit the CAP website. (https://architectureandplanning.ucdenver.edu/)

Prerequisites
Students are expected to have achieved a basic level of computer literacy prior to enrolling in the first semester of classes. No design or art background is required. Most of our students comes from non-design backgrounds.

Program Requirements
The landscape architecture program offers first professional and post-professional graduate courses leading to the degree Master of Landscape Architecture (MLA). The program is fully accredited by the Landscape Architecture Accreditation Board (LAAB) and recognized by the Council of Educators in Landscape Architecture (CELA).

1. The first-professional degree program requires a six-semester sequence of course work totaling 90 semester hours.
2. The post-professional degree program is for qualified students who have already earned a first professional degree in landscape architecture (BLA) or related discipline. It requires a minimum of 60 semester hours. Advanced standing is based on prior academic accomplishment.
3. Students completing the College of Architecture and Planning’s BS Arch degree or an accredited undergraduate design degree at another institution may be given advanced standing in the three-year program. Advanced standing is based on prior academic accomplishment, and is evaluated on an individual basis upon acceptance into the program.

The curriculum consists of core and elective course work.

Course Requirements (First Professional Degree)
(90-semester-hour MLA for students without an accredited professional degree in landscape architecture)

**Thesis**

The graduate thesis in landscape architecture provides an opportunity for students to conduct independent research and design investigations that demonstrate their capacity for rigorous original thinking. The thesis is not required for graduation and not all students are approved to write a thesis. Choosing to pursue a thesis project constitutes a significant commitment to the endeavor; the topic must be chosen with care and thoughtfully and critically developed. Topics can explore material that has been previously unstudied, reinterpret existing material in a new light, or engage research and design practices in ways that strengthen and define the final project. For all theses, the research and products must meet the highest standards of academic excellence and contribute significantly to the discipline and/or profession.

Pursuing a thesis requires students to enroll in a three-course sequence for a maximum total of 12 semester hours. Students are required to formulate their research proposals two full semesters prior to their enrollment for the 6-semester-hour thesis, typically taken in lieu of the final studio. To proceed through the sequence, students must have completed and passed the research tools and methods class (LDAR 6949 Research Tools & Methods) and have secured departmental approval of the thesis proposal. The completion of the thesis is dependent on acceptance of the student’s work by the faculty member acting as the thesis chair and by the committee. For work to be accepted it must meet the standards established by the University of Colorado Denver for graduate thesis projects.
Course Sequence (First Professional Degree)
(90-semester-hour MLA for students without a professional degree in landscape architecture or related professional field)

The curriculum consists of core and elective course work, including the integral (interdisciplinary) and the immersive semester.

Typical 90-semester-hour sequence of courses for the first professional MLA degree (subject to change)

1. Students are required to take either LDAR 6740 or LDAR 6745, dependent upon which course is offered in conjunction with LDAR 6706/LDAR 6707 in the semester in which they register in the Immersive curriculum.

2. Beginning with the fall 2022 cohort, LDAR 6641 Computer Applications in Landscape Architecture will be a prerequisite to LDAR 6630 Site, Society and Environment and LDAR 5532 Landform Manipulation.
Urban and Regional Planning

Chair: Carrie Makarewicz
Office: CU Denver Building 330F
Telephone: 303-315-1000
Fax: 303-315-1050

Overview

The Master of Urban and Regional Planning (MURP) at the University of Colorado Denver, the only accredited graduate planning degree in the state of Colorado, has evolved to become one of the strongest, most unique graduate planning programs in the United States, offering a real-world, experientially oriented program that uses Denver and towns throughout the Metro region and state of Colorado as a classroom and engages students with planning professionals and the community.

We believe that planning successful places, from small towns to large cities, and both urban and rural, requires expertise, breadth, interdisciplinary understanding, principles of equity and justice, and creativity. Our program looks beyond traditional professional silos and instead centers on issues at the forefront of planning practice. Our three program Pillars—Healthy Communities, Equitable Urbanism, and Regional Sustainability—form the basis of our instruction, community outreach, and research. We encourage all students to follow their passion and develop expertise in the areas that matter most to them. Our unique, self-directed curriculum allows students to understand the breadth of the planning field while gaining the technical expertise demanded by the profession.

Our program faculty includes some of the most respected researchers and educators in the planning field, as well as top local planning practitioners, all of whom bring a wealth of experience to the classroom. All our faculty make teaching a top priority.

Our presence in a College of Architecture and Planning ensures that our approach to planning education has a strong connection to design, and our location in the heart of downtown Denver presents our students with endless opportunities to learn the complexities of planning for healthy, equitable, and resilient cities.

Our Faculty

The faculty of the Department of Urban and Regional Planning consists of a purposeful mix of full-time tenured/tenure-track faculty, full-time clinical-track faculty, and a diverse group of part-time lecturers who keep one foot in the professional practice of planning and one in the classroom. The MURP program and its students benefit from the rich contributions of the scholarly research accomplished by our tenured/tenure-track faculty, and the practice-oriented instruction provided by our clinical faculty, lecturers and instructors. To learn more about our MURP faculty members, please visit the College of Architecture and Planning website (https://architectureandplanning.ucdenver.edu/architecture/our-people/planning-faculty/).

Our Students

Our commitment to our students extends across many areas: providing them with exceptional instruction and research-backed knowledge about planning; inspiring them to achieve great things in their personal and professional lives; exposing them to planning professionals, real-world planning situations, and state-of-the-art learning resources; and helping them choose their best academic and career paths through advising and mentoring.

Advising

Roxy New serves as the MURP Academic Advisor and Course Coordinator on the College staff. She maintains MURP student records and is knowledgeable about academic policies and forms. Roxy can help students with registering for classes and ensuring graduation requirements are being met. Contact Roxy at roxy.new@ucdenver.edu or 303-315-0343.

The Planning faculty are also an important advising resource for MURP students. They enjoy discussing with students specific course content, career advice, and any other issues relating to the MURP curriculum, academic achievement, extracurricular activities, or urban and regional planning in general. We have an “open door” policy on advising, which means students may select a single faculty advisor to work with consistently or have multiple faculty advisors. Students choose faculty advisors based on their expertise in a particular area of interest (see list below) or other criteria. Students may work with their faculty advisor as much or as little as they need.

MURP program planning forms, as well as dual degree planning forms, are available on the college website to help students keep track of the courses they have taken and plan to take. Dual degree students will have an advisor in each relevant department or college. Electronic Degree Auditing is available for all MURP students. This online system allows students to check which degree requirements they have satisfied and which ones remain. Instructions for accessing the degree audit are available in the Electronic Degree Auditing Info document available on the college website.

The following list offers suggestions for which faculty members to consult with regarding different areas of interest or expertise:

- Priyanka deSouza: public health, air pollution, climate change, data science, environmental justice, environmental planning, thesis, and research
- Carrie Makarewicz: Community development, economic development, transport equity, regional planning, affordable housing, urban public schools, disaster recovery, equitable development, thesis, and research
- Jeremy Németh: Placemaking and urban design, urban politics, land use planning, land use conflict, politics of public space, environmental justice, thesis and research
- Manish Shirgaokar: Transportation planning, transportation equity, travel behavior, GIS and spatial analysis, thesis, and research
- Ken Schroeppe: Urban development and revitalization, urban form, planning methods, planning history of Denver, professional engagement and networking, careers in planning
- Jennifer Steffel Johnson: Affordable housing, housing policy, social justice, diverse communities, community development, public engagement, internships
- Austin Troy: Land use policy, environmental planning, urban green infrastructure, GIS, spatial analysis, regional sustainability, thesis, and research

Programs

- Urban and Regional Planning, MURP (p. 202)
Dual Degrees

As part of encouraging among planners an appreciation for and a knowledge of the perspectives and practices of the other disciplines that participate in planning and city-building, we offer several dual degree opportunities, both with programs within the College of Architecture and Planning and with other units across the University of Colorado system. In every instance, the total credit requirement of the Dual Degree is considerably less than would be needed if each degree were independently pursued. The degrees that may be combined with the Master of Urban and Regional Planning include:

- Master of Architecture (MURP+MARCH)
- Master of Landscape Architecture (MURP+MLA)
- Master of Public Health (MURP+MPH)
- Master of Public Administration (MURP+MPA)
- Master of Business Administration (MURP+MBA)
- Master of Science in Historic Preservation (MURP+MSHP)
- Master of Engineering - Transportation Systems (MURP+MENG)
- Master of Applied Geography/Geospatial Sciences (MURP+MAAGS)
- Juris Doctorate (Law Degree) (MURP+JD in collaboration with the CU Boulder Law School)

Information about the dual degrees can be found on the College of Architecture and Planning website.

Faculty

Professors:

- Nan Ellin, PhD, Columbia University
- Austin Troy, PhD University of California, Berkeley
- Jeremy Nemeth, PhD, Rutgers University

Associate Professors:

- Carrie Makarewicz, PhD, University of California, Berkeley

Assistant Professors:

- Ken Schroeppe1, MURP, University of Colorado Denver
- Jennifer Steffel Johnson, PhD, University of Colorado Denver
- Manish Shirgaokar, PhD, University of California, Berkeley
- Priyanka DeSouza, PhD, Massachusetts Institute of Technology

Urban and Regional Planning (URPL) Courses

URPL 5000 - Planning History and Theory (3 Credits)

This course offers a comprehensive review of the major historical and theoretical developments in planning; the human aspects of planning as a social, political, and community-oriented process; public engagement; social justice; planning leadership and advocacy; and the future of planning. Cross-listed with URPL 4000. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Graduate level students.

URPL 5010 - Planning Methods (3 Credits)

This course focuses on the most commonly applied quantitative and qualitative methods used in planning; data organization and management principles; and various ways to collect, analyze, and communicate data as a fundamental component of the planning process.

Prereq: GEOG 4640 and GEOG 4680 or permission of instructor, and minimum cumulative GPA of 3.00. Restriction: Senior standing by the start of the enrollment semester. Please contact instructor for permission to register in this course. Cross-listed with URPL 4010. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Graduate level students.

URPL 5020 - Planning Law and Institutions (3 Credits)

This course covers the legal basis for planning; the evolution of planning law through a comprehensive review of landmark court decisions; and the types and hierarchies of governments, their powers and relationships, and how planning operates within those governmental contexts. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Graduate level students.

URPL 5030 - Planning Technologies (3 Credits)

This flexibly designed course provides introductory to intermediate instruction on three software packages that are core to the planning profession; Adobe Suite (Illustrator, Photoshop, and InDesign), ESRI ArcGIS Pro, and Trimble Sketchup. Students can select the appropriate level of instruction for each software based on their prior experience. Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Graduate level students.

URPL 5040 - Urban Sustainability (3 Credits)

Examines the interface of the natural and social realms in cities. Topics include the environmental history of cities; the causes, environmental impacts and mitigation of sprawl; urban green infrastructure; and best practices in planning environmentally sustainable cities and suburbs.

Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Graduate level students.

URPL 5050 - Urban Development (3 Credits)

Explores the procedures, policies, financing, and politics of planning and real estate development. Topics include the relationship between planning goals and regulations; real estate development and finance; site planning and development review for societal impacts, such as traffic, health, and safety; and financing and planning public infrastructure.

Max hours: 3 Credits.

Grading Basis: Letter Grade

Restriction: Graduate level students.

Typically Offered: Spring.

URPL 5060 - Planning Workshop (3 Credits)

An introduction to the studio environment, this course provides students with experience and knowledge/skills development in physical planning and design, the planning process, plan making, and collaborative planning, plus introductory instruction in GIS and SketchUp.

Prereq: 9 hours of URPL Core Coursework.

Restriction: Graduate level students.

Max hours: 3 Credits.

Grading Basis: Letter Grade

Prereq: 9 hours of URPL Core Coursework (URPL 5000, 5010, 5020, 5030, 5040, 5050). Restriction: Graduate level students.
URPL 5070 - Planning Practice & Engagement (3 Credits)
This course offers a comprehensive survey of planning practice; types of planning positions and employers; business aspects of planning; planning ethics; planning engagement, and professional/career development in planning. The planning engagement component includes planning advocacy; public meetings; public engagement techniques; diverse publics; controversial planning topics; and mediation. Restriction: Graduate students in the Master of Urban and Regional Planning program. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate Urban and Regional Planning students.
Typically Offered: Spring.

URPL 6000 - Planning Project Studio (6 Credits)
This studio course requires students to complete a substantial planning project using a comprehensive set of knowledge/skills for real-world clients. Five focus area options offered annually: Healthy Communities, Urban Revitalization, Regional Sustainability, International Experience, and Summer in Colorado. Prereq: URPL 5060. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: URPL 5060.
Additional Information: Global Education Study Abroad.

URPL 6200 - Land Development Regulations (3 Credits)
This course provides a comprehensive exploration of the various components of land development regulation, including preliminary plats; general/ final development plans; zoning; PUDs; variances; site plan/ development review; land use regulators; regulatory processes. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6205 - Plan Making (3 Credits)
This course offers a broad overview of the various types of plans and the specific processes involved in their creation, including comprehensive plans; rural/small town plans; corridor plans; small area plans; campus/institutional plans; special plans. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6210 - Planning Engagement (3 Credits)
This course focuses on roles and methods of public engagement in planning. Topics include planning advocacy; public meetings; public engagement techniques; diverse publics; controversial planning topics; mediation. Restriction: Restricted to Graduate Urban and Regional Planning students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate Urban and Regional Planning students.

URPL 6220 - Advanced Research Techniques (3 Credits)
This course offers an in-depth look at a variety of research principles and techniques, including advanced qualitative and quantitative data collection; survey design; sampling; probability distributions; hypothesis testing; inferential statistics; other topics associated with scholarly research. Prereq: URPL 5040. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: URPL 5040. Restriction: Graduate level students

URPL 6225 - Urban Policy Analytics (3 Credits)
This course teaches quantitative analysis techniques to answer questions about Planning. Topics include population/economic forecasting, analysis of census data, research design, and survey design. Relying on the software R, students learn how to manage datasets and run bivariate/multivariate statistical analysis. Prereq: URPL 5010 - Planning Methods or instructor’s permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: URPL 5010 or Instructor’s permission.

URPL 6230 - Urban Data Science (3 Credits)
This course takes a computational social science approach to working with urban data. It uses R to introduce coding and statistical methods that students can reproduce and experiment with. The course presumes no prior knowledge of R as it introduces coding (data cleaning, web scraping, running various statistical analyses) from the ground up. We will partner with city agencies who will provide datasets for the class to work with and who will serve as clients for the class. The final project will consist of a product for our clients. Restriction: Restricted to Graduate Students in the College of Architecture and Regional Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning
Typically Offered: Fall.

URPL 6235 - Environmental Justice (3 Credits)
This class explores the foundations of the environmental justice movement, current and emerging issues, and the application of environmental justice analysis to environmental policy and planning. It examines claims made by diverse groups along with the policy and civil society responses that address perceived inequity and injustice. While focused mainly on the United States, international issues and perspectives are also considered. Restriction: Restricted to Graduate Students or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

URPL 6249 - Project Management (3 Credits)
Introduces the knowledge and skills of Project Management (PM) in a business environment. Emphasis will be on the entire project life cycle, the project management process groups and the knowledge areas as presented in the Project Management Body of Knowledge (PMBOK), from the Project Management Institute (PMI). Managerial aspects, quantitative tools, and traditional techniques of Project Management will be covered. A variety of projects will be examined. Note: Cannot receive credit for both DSCI 6820 and BUSN 6820. Restriction: Graduate level students. Cross-listed with BANA 6650. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning

URPL 6250 - GIS for Urban Planning (3 Credits)
This course is a detailed introduction to GIS that focuses on spatial analytics for Urban Planning using vector and raster data. Aimed at professionals and researchers, this course includes advanced ArcGIS applications and tools, and innovations in geo-spatial data analysis. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

</tr>
</thead>
<tbody>
<tr>
<td>URPL 6260</td>
<td>Advanced Geo-Spatial Methods (3 Credits)</td>
<td></td>
<td></td>
<td>Students will be introduced to the hardware, software, theory, and skills required to use Geographical Information Systems (GIS). In this course, students will learn how to use GIS software to manage, analyze, map, and present spatial data to support the planning and design processes.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6265</td>
<td>Visualization for Planning (3 Credits)</td>
<td></td>
<td></td>
<td>This course covers visual design theory and advanced instruction in Adobe Illustrator, Photoshop, and InDesign to create compelling infographics, renderings, and reports, as well as advanced instruction in SketchUp to create 3D visualizations at multiple urban scales.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6299</td>
<td>Introduction to Smart Cities (3 Credits)</td>
<td></td>
<td></td>
<td>This course will explore some of the most change-making technological innovations in the 21st century and their impact on public policy in cities through a survey of best practices, model policies, and lessons learned from cities across the United States and globe.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6310</td>
<td>Community Food System Planning (3 Credits)</td>
<td></td>
<td></td>
<td>Healthy communities require sustainable local and regional food systems. This course examines how communities can collaboratively develop and implement programs, processes and practices that help ensure food security and equitable access to healthy food options for all populations.</td>
<td>Letter Grade</td>
<td>Graduate Urban and Regional Planning students.</td>
</tr>
<tr>
<td>URPL 6349</td>
<td>Global Health Studies II (3 Credits)</td>
<td></td>
<td></td>
<td>The course has three parts: (1) examines the social and cultural construction of sickness, systems of etiology cross culturally, the therapeutic encounter, varying roles of healer and patient, and the cultural basis of all healing systems; (2) considers health systems in the context of global planning reform, and the history, organization, and roles of institutions of global health governance; and (3) considers the interrelationship of health, foreign policy and global security.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6350</td>
<td>City Design Fundamentals (3 Credits)</td>
<td></td>
<td></td>
<td>Investigates the historical roots, spatial patterns, and physical forms of cities and their evolution over time; the environmental, cultural, and economic forces influencing city design; and urban design as the nexus of the planning and design professions in contemporary city-building.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6355</td>
<td>Urban Redevelopment Strategies (3 Credits)</td>
<td></td>
<td></td>
<td>This course focuses on the best practices and strategies used to help revitalize urban areas. Topics include urban infill development; TODs; adaptive reuse; historic preservation; design review; parking; public spaces; brownfield/grayfield redevelopment; culture/tourism; special districts; incentives/funding; and revitalization policies.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6360</td>
<td>Urban Infrastructure (3 Credits)</td>
<td></td>
<td></td>
<td>This course provides a comprehensive exploration of transit planning, including transit planning fundamentals; transit routes and systems; transit modes and technologies; ridership modeling; scheduling; operations; funding; policies and regulation; relationship to land use; and facilities/design requirements.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6365</td>
<td>Parks and Public Spaces (3 Credits)</td>
<td></td>
<td></td>
<td>This course offers a focused look at the role of parks and public spaces in the development and activation of cities; their designs, qualities, and components; management/operations; funding; policies; equal access; role as community and economic development tool.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6366</td>
<td>Urban Redevelopment Strategies (3 Credits)</td>
<td></td>
<td></td>
<td>Provides an understanding of the inextricable relationship between urban design and the natural environment. Students learn how to design sustainable public spaces, promote environmental resilience, combat climate change, and foster environmental justice and healthy communities through urban design.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6369</td>
<td>Urban Design and Environment (3 Credits)</td>
<td></td>
<td></td>
<td>Explores the economics of urban design through its relationship with private-sector real estate development, public-sector infrastructure, and budgetary/fiscal constraints on design implementation while emphasizing the critical role of urban design in advocating for social equity, affordable housing, and related issues.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6395</td>
<td>Urban Redevelopment Strategies (3 Credits)</td>
<td></td>
<td></td>
<td>Explores the interrelationship between urban design and the natural environment. Students learn how to design sustainable public spaces, promote environmental resilience, combat climate change, and foster environmental justice and healthy communities through urban design.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6396</td>

<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6397</td>
<td>Design Policy, Process, and Regulation (3 Credits)</td>
<td></td>
<td></td>
<td>Explores the many design regulations that shape the urban form, how they are created and evolve, and how they impact design ideation, analysis, and communication using real-world scenarios to experiment with and test iterative design processes and techniques.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
<tr>
<td>URPL 6398</td>
<td>Design Process (3 Credits)</td>
<td></td>
<td></td>
<td>Advances current practice by exploring innovative methods of design analysis, production, representation, and communication. Community participation and civic engagement are integral components of seminar.</td>
<td>Letter Grade</td>
<td>Graduate level students.</td>
</tr>
</tbody>
</table>
URPL 6399 - Sustainable Urban Infrastructure (3 Credits)
Focuses on developing uniform vocabulary on sustainable infrastructure across science & technology, architecture & planning, public policy, and health & behavioral sciences. Students learn concepts, principles/pathways and evaluation techniques for promoting the diffusion of sustainable urban infrastructures. Restriction: Graduate level students. Cross-listed with CVEN 5460. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6400 - Community Development (3 Credits)
This course introduces community development, examining planners' and other stakeholders' roles in the field; key theories and practices; community dynamics; community-based organizations; asset-based development; social equity; and the influence of local physical and economic factors on community development. Cross-listed with ARCH 6256. Restriction: Graduate level students. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6405 - Urban Housing (3 Credits)
This course examines housing trends and patterns; supply and demand factors; housing policies; housing challenges (e.g., inequitable distribution, special needs, segregation/discrimination, and homelessness); sociological, demographic, and economic considerations; and the roles of planners and the public and private sectors. Restriction: Restricted to graduate students. Cross-listed with LDAR 6755 and ARCH 6205. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URPL 6410 - Social Justice in Planning (3 Credits)
This course investigates various social justice issues encountered in planning, including conflict resolution; advocacy; environmental justice; social equity; culture and diversity; disadvantaged populations; public engagement techniques; affordability; equal access; and policy impacts. Cross-listed with LDAR 6637 and ARCH 6258. Restriction: Graduate level students. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6449 - Preservation Theory and Practice (3 Credits)
Philosophical questions in preservation practice; balancing significance in the environment with natural decay and demands for change. Policy issues as well as preservation and adaptation design. Cross-listed with HIPR 6010. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6500 - Environmental Planning/Management (3 Credits)
This course addresses issues related to planning under major environmental laws, ecosystem service-based management, urban green infrastructure, urban watershed and river management, urban forest and parks planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6505 - Enviro. Policy & Regulation (3 Credits)
This course focuses on the important field of environmental policy and regulation, including topics such as the National Environmental Policy Act (NEPA); environmental justice; environmental law; land use conflicts; contamination/remediation; environmental regulators; and regulatory policies and enforcement. Restriction: Graduate level students. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6510 - Energy/Natural Res. Planning (3 Credits)
This course provides an overview of the issues associated with energy and natural resource planning. Topics include: energy policy; alternative energy development; water resources; extraction/mining; natural resource protection and regulation; resource management, policies, politics, and technologies. Cross-listed with GEOG 4260. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6547 - Urban Ecology (3 Credits)
This lecture/seminar will cover ecological principles as applied to urban systems (lecture portion) and students will do an intensive study, presentation, and discussion on the topic of their choosing (seminar portion). Cross-listed with LDAR 6655. Restriction: Restricted to graduate students in the College of Architecture and Planning. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

URPL 6548 - Defining & Measuring Sustainability (3 Credits)
Unique cross-disciplinary course that teaches students community engagement strategies to define sustainability goals. Life cycle assessment and material flow analysis tools used to measure environmental sustainability benchmarks. Fieldwork applies both tools to cities in Colorado. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6549 - Environmental Impact Assessment (3 Credits)
The objective of this course is to provide the foundation for understanding the environmental impact assessment process, its legal context, and the criteria and methods for procedural and substantive compliance. Prereq: URPL 5530 or permission of instructor. Cross-listed with GEOG 4220, 5220. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Graduate level students.
URPL 6550 - Transportation Planning/Policy (3 Credits)
This course examines policy issues in urban transportation planning: how transportation system design and political/institutional contexts shape transportation decision-making; major modes of urban transportation; and the social, environmental, economic, energy, and health impacts of transportation systems. Cross-listed with URPL 4550. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6555 - Transportation, Land Use, and the Environment (3 Credits)
This course teaches how current transportation modes shape regions and how future transportation technologies might impact us. Topics include policy making and governance; land use interactions with transportation investments; climate change and resilience; energy use; environmental justice; and equity considerations. Restriction: Graduate level students. Cross-listed with URPL 4555. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6565 - Pedestrian & Bicycle Planning (3 Credits)
This course provides a detailed focus on the unique planning issues and factors involved with bicycle and pedestrian modes of transportation, including pedestrian/bicycle planning fundamentals; routes and systems; facilities and design requirements; funding; maintenance and operations; policies; and best practices. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6598 - Traffic Impact Assessment (3 Credits)
Covers (1) procedures to satisfy state and local requirements for transportation impact studies, (2) methods to perform trip generation, distribution, and traffic assignment for impact analyses, and (3) analysis of transportation impacts on residential communities, mode choice, regional business (downtown or suburban), peak and off-peak travel times, noise, safety, parking and pedestrians. A course project requires students to develop an application of analysis software to a case study area. Cross-listed with CVEN 6512. Restriction: Graduate standing or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URPL 6599 - Sustainable Transportation Systems (3 Credits)
This course examines notable topics in sustainable transportation: demystifies conventional transportation engineering methods; and explores empirical examples of why such methods are often misguided. The intent is to enlighten engineering students and help support planning/policy students interested in transportation sustainability. Cross-listed with CVEN 5633. Restriction: graduate standing or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URPL 6600 - Regional Growth and Equity (3 Credits)
Explores the institutions, policies, laws, data, and funding that support planning for housing, transportation, infrastructure, and jobs at the regional scale with a focus on equity. Students will learn analytic techniques to study the labor market, economic growth and performance, transportation systems, and affordable housing strategies. Restriction: Restricted to graduate level students. Cross-listed with URPL 4600. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Typically Offered: Fall.

URPL 6605 - Regional Economic Systems (3 Credits)
This course offers a comprehensive investigation into regional economic systems; metropolitan economies; regional economic development; regional market assessment; job generation; taxes/spending; and fiscal/economic policies and impacts at the metropolitan, regional, and statewide scale. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6615 - Small Town, Rural, and Tourism Planning (3 Credits)
This course investigates issues and challenges associated with rural, small town, and tourism planning including farmland conservation, growth management, sustainable food systems, economic development, and revitalization. It reviews global trends, national policies, and local planning processes through case studies. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6620 - Sustainable Tourism Planning (3 Credits)
This course investigates the unique aspects associated with planning and developing sustainable tourism infrastructure. Topics include: eco-tourism; historic tourism; cultural tourism; urban tourism; sports and recreation planning; regional tourism planning; and sustainable resort planning and development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6645 - Disaster/Climate Change Planning (3 Credits)
Introduces students to concepts and debates that shape disaster and climate change studies. Features case studies of disaster and climatic issues affecting Colorado and the Rocky Mountain region. Looks specifically at how planning can reduce risk and increase local resilience.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6650 - International Development Planning: Theory and Practice (3 Credits)
This course examines key development issues and planning approaches in cities of the Global South. Topics include: development theory; legacies of colonial urbanisms; actors and institutions in development; urban informality; water and sanitation; housing and land tenure; and climate change, among other topics. Max hours: 3 Credits.
Grading Basis: Letter Grade

URPL 6675 - International Field Research: Methods and Analysis (3 Credits)
This course will teach students the fundamentals of data collection, analysis, and dissemination in an international - and mostly developing world - context. Restriction: Restricted to graduate students within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning.

URPL 6800 - Special Topics: Urban and Regional Planning (3 Credits)
Various topical concerns are offered in urban and regional planning theory, concepts, methods, case studies and practice. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeateable. Max Credits: 9.
Restriction: Graduate level students.
URPL 6805 - Planning Internship (3 Credits)
Designed to provide professional practice experience in urban and regional planning. The emphasis is on actual work experience in settings with client groups as the students assist them in determining solutions to their problems. Restriction: Graduate level students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6810 - Independent Study: URPL (1-3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to urban and regional planning. Restriction: Graduate level students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URPL 6850 - ACE Mentoring (3 Credits)
Graduate students work with professional architects, designers, and engineers mentoring students in selected local high schools to learn problem solving, graphics and model making to produce a design project. Student mentors develop lesson plans, outcomes and keep a weekly journal. Cross-listed with ARCH 6470 and LDAR 6470. Restriction: Restricted to majors within the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

URPL 6900 - Planning Capstone (6 Credits)
Planning Capstone A requires students to identify an independent study/small group project of their choosing and develop a detailed plan to complete the project. Prereq: URPL 6000 or instructor consent. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: URPL 6000 Restriction: Restricted to MURP graduate majors within the College of Architecture and Planning.

URPL 6920 - Planning Thesis A (3 Credits)
Spanning two semesters, Planning Thesis requires students to plan and complete a research thesis of their choice. Part A provides instruction for proper thesis research, analysis, and writing while students develop a detailed work plan and begin their research. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Restriction: Graduate level students.
Additional Information: Report as Full Time.

URPL 6925 - Planning Thesis B (3 Credits)
Spanning two semesters, Planning Thesis requires students to plan and complete a research thesis of their choice. Part B includes the completion of the research and the thesis document, and presentation of the project to the student’s thesis committee. Prereq: URPL 6920. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Prereq: URPL 6920.
Additional Information: Report as Full Time.
Urban and Regional Planning, MURP

Chair: Carrie Makarewicz
Office: CU Denver Building 330F
Telephone: 303-315-1008
Fax: 303-315-1050

Overview

The Master of Urban and Regional Planning (MURP) at the University of Colorado Denver, the only accredited graduate planning degree in the state of Colorado, has evolved to become one of the strongest and most unique graduate planning programs in the United States, offering a real-world, experientially oriented program that uses the city of Denver, the metro region, and Colorado as a classroom and engages students with planning professionals and the community.

We believe that successful city-building requires expertise, breadth, interdisciplinary understanding, principles of equity and justice, and creativity. Our program looks beyond traditional professional silos and instead centers on issues at the forefront of planning practice. Our three program Pillars—Healthy Communities, Equitable Urbanism, and Regional Sustainability—form the basis of our instruction, community outreach, and research. We encourage all students to follow their passion and develop expertise in the areas that matter most to them. Our unique, self-directed curriculum allows students to understand the breadth of the planning field while gaining the technical expertise demanded by the profession.

Our program faculty includes some of the most respected researchers and educators in the planning field, as well as top local planning practitioners, all of whom bring a wealth of experience to the classroom. All our faculty make teaching a top priority.

Our presence in a College of Architecture and Planning ensures that our approach to planning education has a strong connection to design, and our location in the heart of downtown Denver presents our students with endless opportunities to learn the complexities of planning for healthy, equitable, and resilient cities.

Curriculum

The total number of credit hours required to earn the Master of Urban and Regional Planning (MURP) degree is 54. Required core courses, including two studio-format courses and a final capstone or thesis project, comprise 36 of these credits. Students complete an additional 18 credits of elective courses of their choice, including one course that is an advanced skills/method elective.

Across the 54 credits, students must also meet final course grade minimums and cumulative grade point average requirements (see the GPA Requirements and Grading Policy tab on the Curriculum section of our website) in order to earn the MURP degree. The required 54 credits may be reduced in some cases for students who meet the requirements for advanced standing or who have transfer credits (see the Advanced Standing Credit Waiver tab on our website). Students may also substitute required core courses with another course if they have completed courses that include substantially similar information. Full details of program requirements can be found in the MURP Student Handbook, posted under the Curriculum section of the program web page.

New students typically begin the program of study in the fall semester, but we permit spring admissions. Full-time students typically take approximately 12 semester hours per semester; taking more than 15 per semester is generally not advised. Some students take the 6-credit Planning Project Studio in the summer between their first and second years in the program. The summer studio options include an international option and an option for a small town in Colorado.

Core Courses

The MURP Program curriculum includes 10 required “core” courses totaling 36 semester hours. These courses provide students with a comprehensive survey of the planning field and the foundational knowledge, skills, and values important to the profession. The core courses have been carefully designed to fully comply with the Planning Accreditation Board’s required educational outcomes. The list below shows the core courses and the recommended program year to take them.

Total Hours 36

Elective Courses

Beyond the core curriculum, MURP students follow a self-directed educational path in completing 6 elective courses, totaling 18 hours. Students may choose any combination from our broad offering of elective courses. In addition, numerous other electives applicable for MURP credit are available through our allied programs within the college (Architecture, Urban Design, Historic Preservation, and Landscape Architecture) and through cross-listed courses offered by other CU Denver programs, such as Public Affairs, Geography, Civil Engineering, Health and Behavioral Science, and Business. MURP students may take two of their six elective courses entirely outside of the MURP department, such as in Sociology, Computer Science, or Anthropology, as long as the courses are relevant to the student’s interests in planning.

Potential Specializations

Through our self-directed elective curriculum, students have the ability to craft a MURP degree suited to their career goals and personal interests. Students may choose any combination of elective courses, whether oriented towards a traditional planning field such as “Transportation Planning,” a customized emphasis on a more unique planning niche, such as planning for refugees, or a general survey of diverse planning topics and skills.

Students are not required to identify or pursue any type of planning specialization unless they want to (specializations do not appear on
transcripts). Ultimately, this means students may choose whichever combination of elective courses they desire.

The most helpful resource for assisting students in choosing their self-directed path through the MURP program is the planning faculty, all of whom are happy to provide advice about which electives to take or any topic relating to the MURP program or careers in planning. For more information, see the Advising section of the website.

**Independent Study**

Independent Study is a student self-directed learning experience with faculty oversight, guidance, and evaluation. Independent Study offers students an important opportunity to engage in research or creative activity in an area of inquiry not offered through regular courses, or in greater depth than offered in regular courses. Students must secure a full-time MURP faculty member to advise their Independent Study course. A MURP Independent Study project should have a focus within the field of Urban and Regional Planning, although it may be of an interdisciplinary nature. The project specifics are to be provided by the student in the Independent Study Proposal and approved by the student’s Independent Study faculty advisor. Students can apply a maximum of one three-credit Independent Study course towards their MURP degree. (However, under special circumstances, and with departmental approval, students may be able to take two Independent Study courses.) A document with complete Independent Study guidelines, including enrollment process, is available from MURPspace in Microsoft Teams.

**Internships**

Internships are an important way the MURP program helps students learn experientially. The difference between an internship and a part-time job is that an internship is specifically intended to be a learning experience. To help students get the most of their internship experience, students can meet with the college’s Director of Internship and Professional Development and the Department’s Associate Chair to discuss their experiences in relation to the student’s career interests, whether their work tasks are what they expected, and how to request feedback or time with their supervisor, among other topics related to having a successful internship.

Internship opportunities from employers in the area will be posted to the Department’s Microsoft Teams space, MURPspace, for current students, and to Handshake. Students should register on Handshake, the online career system used by the university, to find and be notified of available internship and career positions. More information on Handshake is available on the college website. Students are also encouraged to pursue internship opportunities on their own through networking with planning professionals and reaching out directly to planning-related organizations. More detailed information on internships is available in the MURP Student Handbook.

**Planning Workshop/Project Studio**

URPL 5060 Planning Workshop and URPL 6000 Planning Project Studio are the two studio core courses. These courses are a key part of the hands-on, real-world focus of the MURP program.

Planning Workshop is the introductory studio for MURP students. It provides students an opportunity to address actual planning problems, issues, and processes; apply previously acquired knowledge and skills; and develop new knowledge and practical skills in an applied context.

Students will develop basic competence in accessing existing information, generating new information, and performing planning analysis and synthesis. Students will also learn to enhance their graphic, written, and oral communication capabilities. Through the Planning Workshop experience, students will develop an understanding of the relationship between planning theory and practice, as well as gain the ability to formulate compelling planning arguments in applied settings.

Students will also receive introductory instruction in Trimble SketchUp, which complements the introductory instruction in ArcGIS Online and Adobe Photoshop, Illustrator, and InDesign that students receive in the Planning Practice and Technology course. The integration and use of all of these common planning technology applications is a critical component of the Planning Workshop experience.

Planning Project Studio is the MURP program’s advanced studio course and is offered in the fall and summer semesters. This studio requires students to work together as a “planning consultant team” to complete a single planning project or study from beginning to end for a real-world client. It is expected that students enrolled in Planning Project Studio will have already gained the fundamental planning knowledge, skills, and values from their experience in Planning Workshop and other MURP courses. Consequently, the emphasis in Planning Project Studio is on putting everything together into a complete real-world planning project. The project locations and clients vary. In the fall semester, projects are commonly located in Denver; travel-based summer studios are offered in international locations and in communities across Colorado.

The studio will emulate the typical planning consultant/client experience, including: refining the project scope and schedule with the client; establishing guiding principles and expected outcomes; conducting case studies and existing plans background research; gathering and analyzing existing conditions data; formulating alternative plan concepts; assessing alternative concepts through specific criteria; identifying and refining the preferred alternative; and preparing and presenting the final plan deliverables to the client. Emphasis is also placed on professionalism, project management, team-building and collaboration, client management, public involvement, and other aspects of the real-world planning consultant realm.

**Planning Capstone/Planning Thesis**

The culminating component of the MURP curriculum is the Planning Capstone/Planning Thesis requirement, which challenges students to utilize to the fullest extent the planning knowledge, skills, and values gained during their MURP program experience. Students must choose which option to undertake—Planning Capstone or Planning Thesis—based on their career goals, personal interests and aptitudes, and the advice of their faculty advisor.

Planning Capstone is a six-credit, project-oriented, one-semester course that results in a substantial deliverable upon completion. The Capstone option is best suited for students who wish to pursue a career as a professional planner after graduation. Most students undertake an individual capstone project, but some may complete a project with a team of two or three students. On a team project, each student must be individually responsible for a clearly defined component of the project as each student will be graded independently for their work.

If students do not identify their own Planning Capstone client and project topic, they may select from a list of Capstone clients/projects that have been pre-arranged and approved by the MURP faculty. During the semester before enrolling in Planning Capstone, students will be required
to: (a) identify their Capstone client and project topic, (b) determine if they will be working independently or as part of a small group, and

(c) begin preparing a detailed project prospectus (work plan, schedule, methodology, and deliverables). Also, during the semester before Capstone, students must attend a mandatory Capstone Orientation to receive instruction and guidance on project planning and management. Students must have a completed and approved project prospectus by the second week of their Capstone semester.

During the Planning Capstone semester, students complete their project work while maintaining regular contact with their Capstone faculty advisor and client to ensure sufficient progress and work quality, as well as periodically meeting with other Capstone students to discuss common issues and challenges, share experiences, and receive continued instruction and guidance from the Capstone faculty on project management and methodologies. The Planning Capstone semester concludes with the submission of all deliverables to the client and faculty advisor, a formal presentation to the client, and a poster presentation of the project to the MURP community.

For more information about the Planning Capstone option, please visit the Capstone webpage on the college website (https://architectureandplanning.ucdenver.edu/architecture/our-work/urban-and-regional-planning-work/1/).

Planning Thesis comprises a pair of three-credit courses (A and B) taken over two semesters that together constitute a six-credit effort. The thesis option is most appropriate for outstanding MURP students, working in close consultation with a primary DURP Faculty advisor, and two other committee members (see below).

While the thesis should address an aspect of urban and regional planning, it may be qualitative or quantitative in design, and directed toward the discovery of new facts, the development of theory or frameworks, or an investigation of an existing body of knowledge. The thesis document usually includes an abstract, a literature review that delineates the problem of interest or a gap in existing knowledge, a statement of research objectives, an explanation of the research design and methods, a report of the results of the research, and a discussion of the findings and their implications for planning.

A three- person thesis committee guides the thesis, including a Thesis Advisor who must be a full- time member of the MURP faculty who holds a professional degree or Ph.D, a second faculty member, and a third member who may be a professional from outside the university who has relevant experience, pending the student’s interest and topic. Students interested in pursuing the thesis option must complete and submit the Planning Thesis Proposal to their intended Thesis Advisor. Students must have their project approved by their Thesis Advisor prior to the course drop deadline in the Planning Thesis A semester. If the proposal is not approved, or the student’s prior academic performance is not deemed adequate for participation in the thesis option, the student would enroll in Planning Capstone instead. Once the Thesis Advisor approves the proposal, the student must enroll in the Planning Thesis course using a Special Processing Form that is signed by their Thesis Advisor and submitted to Roxy New.

During the Planning Thesis A (URPL 6920 Planning Thesis A) semester, students identify their research question and study design, work on their literature review, and begin their research. If human subjects research is involved (e.g., interviews, surveys, focus groups, or the like), students should work with their Thesis Advisor to submit their application to the Colorado Multiple Institutions Review Board during Thesis A.

During the Planning Thesis B (URPL 6925 Planning Thesis B) semester, students complete their research and write the bulk of the final thesis. Throughout, thesis students will meet regularly with their committee members to ensure sufficient progress and work quality. To graduate, the completed thesis must be successfully defended in an Oral Examination before the Thesis Committee, formatted according to department guidelines, and submitted to the online thesis repository ProQuest by the official deadline.

Program Values and Hallmarks

Our vision is to be a national leader in educating skilled, engaged planners and creating vibrant, sustainable communities.

Our Program Values include:

- **Advocacy** - Planners must be visionary in their work, politically engaged, and articulate proponents for positive change.

- **Diversity** - Planning should reflect, draw from, and be responsive to the diversity of the population it serves.

- **Collaboration** - Planners must understand and value the principles and perspectives of allied disciplines that participate in planning and city building.

- **Engagement** - Students should learn planning by interacting directly with professionals and the public to solve real- world planning challenges.

- **Evidence-based approaches** - Planning research and practice should be rooted in critical thinking, appropriate methods, and rigorous analysis for developing evidence-based solutions.

- **Service** - Our program should serve as a resource for planning professionals and the public by offering ideas, solutions, research, advocacy, and inspiration.

- **Social Justice and Equity** - Planning must strive to create the most just and equitable processes and outcomes for historically marginalized, underrepresented, and disenfranchised individuals and communities.

- **Sustainability** - We believe planning must be based on the principles of economic viability, environmental resiliency, and social equity

Our Program Hallmarks include:

**ENGAGED AND EXPERIENTIAL LEARNING**

We give students numerous opportunities throughout our program to gain hands-on experience by participating in real-world projects and interacting with professional planners and community stakeholders. We use Denver’s diverse urban setting and Colorado’s rural and mountain landscapes as a real-world classroom for students to engage with the built, natural, and social environments.

**PHYSICAL PLANNING ORIENTATION**

We emphasize physical planning and design throughout our curriculum and connect them to policy, research, and the social sciences. We work closely with the College’s Architecture, Urban Design, Landscape Architecture, and Historic Preservation programs to explore and develop applied solutions to urban social, economic, and environmental issues.
INTERNATIONAL LEARNING OPPORTUNITIES
We provide students the opportunity to study planning from an international perspective. By offering lecture courses that focus on global planning and development issues, studios that involve on-site coursework and engaged learning in other countries, and collaborations with universities and organizations abroad, we help students expand their personal and educational worldview.

INTEGRATED PLANNING TECHNOLOGIES
We integrate into our curriculum key professional technologies in realms such as digital mapping, 3D modeling, data visualization, and spatial analysis. We capitalize on Denver’s entrepreneurial spirit and tech-focused economy to provide students with state-of-the-art resources and numerous opportunities to learn a variety of technologies and applications used as critical tools in the planning process.

SELF-DIRECTED ELECTIVE CURRICULUM
We empower students with the opportunity to craft a planning education suited to their career goals and personal interests. Students may choose any combination of elective courses, whether oriented toward one of our three curriculum pillars, a traditional or customized planning specialization, or a generalist survey of the planning field.

PROFESSIONAL AND CAREER DEVELOPMENT
We present students with instruction, guidance, and resources for understanding the many career paths within planning and allied fields, and for strategically positioning themselves to successfully achieve their professional and personal goals. We enable students to be prepared for not only their first planning job, but for a lifelong career.

DIVERSE FACULTY EXPERIENCE
We embody a planning faculty comprised of a mix of clinical professors and lecturers who bring to the classroom years of professional expertise in planning-related fields, and tenure-track professors who bring cutting-edge scholarship and research expertise. All of our faculty make teaching a top priority.

The total number of credit hours required to earn the Master of Urban and Regional Planning (MURP) degree is 54. Required core courses, including two studio-format courses and a final capstone or thesis project, comprise 36 of these credits. Students complete an additional 18 credits of elective courses of their choice, including one course that is an advanced skills/methods elective.

1. Elective courses and URPL 6000 Planning Project Studio are also offered in the summer for students who wish to take credits between their first and second year of the program.
2. At least one URPL elective must be taken from the Advanced Skills/Methods URPL course list. Please consult the MURP Student Handbook for this list of courses.
3. MURP students may take two of their six elective courses entirely outside of the MURP department, as long as the courses are relevant to the student’s interests in planning.

**Other Programs**

**Programs**

- Geography, Planning, and Design, PhD (p. 210)
- Historic Preservation, MS (p. 213)
- Urban Design, MUD (p. 214)

**Historic Preservation (HIPR)**

**HIPR 6010 - Preservation Theory and Practice** (3 Credits)
The practice of historic preservation has evolved in a specific policy context. This introductory course introduces basic American institutions and laws associated with preservation as well as standards, definitions, and practices associated with these. Cross-listed with URPL 6499. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning or History graduate majors.

**HIPR 6090 - Special Topics in Historic Preservation** (3 Credits)
Various topics in historic preservation, according to current faculty and student interests. Prereq: HIPR 6010 or permission of instructor. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

**HIPR 6110 - Regionalisms & the Vernacular** (3 Credits)
This class explores the history of the built environment from the perspective of evolutionary change; peoples attempting to meet utilitarian needs, respond to environmental forces, societal expectations, and aesthetic aspirations through design. The course looks closely at vernacular structures in a global context. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with ARCH 6350. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

**HIPR 6170 - Preservation Design Studio** (6 Credits)
Preservation Design Studio provides a project-based learning experience for Historic Preservation students; who are typically integrated into a pre-approved studio of one of the College of Architecture & Planning's departments. Topics vary according to faculty interests. Cross-listed: Varies by semester. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to HIPR majors within the College of Architecture and Planning.

**HIPR 6210 - Historic Buildings in Context** (3 Credits)
This course covers the concept of "historic significance" and develops skills in understanding and professionally utilizing this concept. Procedures and skills are introduced. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with ARCH 6233. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

**HIPR 6220 - Adaptive Reuse: Business and Practice** (3 Credits)
Existing buildings and infrastructure afford challenges and opportunities for reuse. This course explores the business, and financial aspects of adapting the built environment for contemporary uses. The course is suitable for designers, planners, historians and social scientists. Restriction: Restricted to majors within the College of Architecture and Planning. Cross-listed with ARCH 6356. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

**HIPR 6230 - Reusing Buildings for a Changing Climate** (3 Credits)
This class will explore design, planning, and policy strategies to reduce carbon emissions and support sustainable communities through conservation and adaptive reuse of buildings. Case studies will highlight innovative approaches and emerging practices. Restriction: Restricted to graduate students in Historic Preservation or History. Typically offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students in Historic Preservation or History. Typically Offered: Spring.

**HIPR 6240 - Cultural Resource Management and Preservation Law** (3 Credits)
This course is designed for historic preservation, planning or anthropology students who are considering a career in the government, non-profit or for-profit sectors where a basic knowledge of compliance with federal, state and local laws that pertain to resource management is expected. Topics will include an overview of the American legal system, constitutional law, federal statutes and their related regulations including the National Environmental Policy Act, the National Historic Preservation Act, the Endangered Species Act, working with Native American Tribes, local and state government agency involvement in resource management and related topics. Restriction: Graduate level students. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students. Typically Offered: Fall.

**HIPR 6250 - Contextual Design in Historic Districts** (3 Credits)
This classes focuses on design in the context of historic resources and in established neighborhoods with distinct features that are highly valued. These are places where preserving and enhancing community character are key objectives. The class investigates a range of approaches to alterations and additions for historic buildings and the design of new buildings in historic districts, including how these contribute to placemaking and livability. It also how design in historic contexts is guided by public policies, incentives and regulatory tools, especially design guidelines and zoning codes and provides an overview of how to decide which tools to use and how to develop them. The course will be thought-provoking, challenging concepts of "compatibility" in the context of historic resources. Case studies from across the nation will raise a series of challenging design questions about what "preservation" means while accommodating change. Other case studies are examples of success stories in the creative application of approaches to design in historic contexts. Guest lecturers with experience throughout the country will supplement the core curriculum provided by the instructor. Restriction: Restricted to graduate students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students. Typically Offered: Spring.
HIPR 6310 - Documentation, Analysis, Representation (3 Credits)
This methods course focuses on skills development in in-situ documentation of the historic environment. The course includes modules on: a) historic records, b) archaeological evidence, c) building and site measurement, d) photographic & photometric methods, e) geo-spatial data, f) graphic representation, and g) reporting formats. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with ARCH 6352. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

HIPR 6330 - The Politics of Preservation (3 Credits)
Achieving the preservation of historic properties requires an ability to effectively use legal tools and successfully articulate the case for preservation to a broad audience. Students will learn how to deploy the theories, tools, and techniques for the protection of historic properties. Restriction: Restricted to Graduate students in a CAP program or Graduate students in the History Department. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate students in a CAP program or Graduate student in the History Department.

HIPR 6410 - Urban Conservation: Context for Reuse (3 Credits)
This course begins with the premise that human habitats, and especially cities, are dynamic and ever changing; and that the preservationist cannot (and should not) to freeze cities in a static representation of the past. The course deals with both the philosophical and political contexts, but emphasizes the role of strategic design intervention in the shaping of evolving cities. This includes traditional preservation activities, but also recognizes the importance of progressive change. Readings are diverse, but at least two case study cities are used to ground the concepts. Class activities include: a) research, b) field study, c) design, and d) presentation. Restriction: Restricted to graduate students in the College of Architecture and Planning. Cross-listed with ARCH 6355. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

HIPR 6510 - Building Materials Conservation (3 Credits)
This course emphasizes the relationship between knowledge acquisition, professional judgement, and design modification. Topics include: 1) Historic Building Types & Methods, 2) Field and Lab Methods of Building Assessment, and 3) Management of Building Rehabilitation. The course takes an integrative approach to the scientific, aesthetic, managerial and legal dimensions of preservation. Restriction: Restricted to graduate students in the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate CAP students.

HIPR 6610 - Reading the City (3 Credits)
Design and planning professionals, including preservationists, must learn to work in environments with which they have had little previous knowledge. This course emphasizes gaining understanding of a novel environment and translating that knowledge into a well researched and media savvy professional presentation. Students prepare a research plan, then conduct research on a relatively unfamiliar urban environment, such as Chicago (or other major city), returning to prepare, present, and critically reflect upon their applied research through a media-savvy final project. Prereq: HIPR 6410 is recommended. Cross-listed with ARCH 6232. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

HIPR 6840 - Independent Study (1-3 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to historic preservation. Prereq: Permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

HIPR 6851 - Professional Project (1-3 Credits)
The Professional Project is one of two options for completing the Capstone Requirement. There are multiple ways of satisfying this requirement, but the agreed upon Project must show critically reviewed evidence of professional competence in the field of historic preservation. Prereq: Permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate majors within the College of Architecture and Planning.

Urban Design (URBN)

URBN 6500 - Urban Design Studio I (6 Credits)
Introduces urban design at a city-wide scale through the evaluation of urban structures, systems, networks, and spatial forms that create the complex organism known as the city. Students explore urban design concepts as physical solutions to real-world issues. Restrictions: Restricted to Master of Urban Design students. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.
Typically Offered: Fall.

URBN 6525 - City Design Fundamentals (3 Credits)
Investigates the historical roots, spatial patterns, and physical forms of cities and their evolution over time; the environmental, cultural, and economic forces influencing city design; and urban design as the nexus of the planning and design professions in contemporary city-building. Restriction: Restricted to students with graduate standing. Cross-listed with URPL 6350, ARCH 6270, and LDAR 5530. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
URBN 6550 - Design Policy, Process, and Regulation (3 Credits)
Explores the many design regulations that shape the urban form, how they are created and evolve, and how they impact design ideation, analysis, and communication using real-world scenarios to experiment with and test iterative design processes and techniques. Restriction: Restricted to students with graduate standing. Cross-listed with URPL 6397. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URBN 6575 - Advanced Visualization for Urban Design (3 Credits)
Provides advanced instruction in effective communication and visualization through the use of digital tools commonly used in urban design (e.g. Photoshop, Illustrator, InDesign, SketchUp, Lumion). Topics include graphic design theory, use of storyboards, renderings, diagrams, maps, sketches, photographs, and infographics. Prereq: Intermediate-level knowledge and experience in the Adobe applications covered in the course. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Non-degree students

URBN 6600 - Urban Design Studio II (6 Credits)
Advances the understanding and application of urban design tools, methods, and practices and engages students in a real-world project with a community partner. Students integrate real estate development, economics, environmental and social equity, aesthetic criteria, historic preservation, and community engagement. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6625 - Urban Design Economics and Equity (3 Credits)
Explores the economics of urban design through its relationship with private-sector real estate development, public-sector infrastructure, and budgetary/fiscal constraints on design implementation while emphasizing the critical role of urban design in advocating for social equity, affordable housing, and related issues. Restriction: Restricted to graduate-level students. Cross-listed with URPL 6395 and ARCH 6261. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

URBN 6640 - History of the City (3 Credits)
Introduces students to the history of global cities through selected typologies. Explores similarities and differences among cities considered against the larger cultural, political and socio-economic envelope of which they are part. Provides awareness of origins, growth and evolution of urban form. Cross-listed with ARCH 6240. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6641 - Design Process (3 Credits)
Advances current practice by exploring innovative methods of design analysis, production, representation, and communication. Community participation and civic engagement are integral components of seminar. Restriction: Restricted to students with graduate standing. Cross-listed with URPL 6398 and LDAR 6741. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

URBN 6643 - Visualization for Planning (3 Credits)
This course covers visual design theory and advanced instruction in Adobe Illustrator, Photoshop, and InDesign to create compelling infographics, renderings, and reports, as well as advanced instruction in SketchUp to create 3D visualizations at multiple urban scales. Restrictions: Restricted to ARUR-MUD majors in the College of Architecture and Planning. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6644 - Sustainable Urbanism (3 Credits)
This seminar explores the connections between ecology and urbanism. It will examine the multiple, interrelated ecological and social systems operating in the city. Students will explore innovative design processes and techniques that serve to create a higher quality of life and place with a particular emphasis on the effectiveness of sustainable design approaches at varying scales. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6645 - Global Design Practice (3 Credits)
This seminar will educate students about critical issues related to practicing design in a global context. Course will examine diverse issues of design and planning practice from contracts, communication and culture to remote research, design opportunities and ethics. Prereq: URBN 6612. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6646 - Urban Design and the Environment (3 Credits)
Provides an understanding of the inextricable relationship between urban design and the natural environment. Students learn how to design sustainable public spaces, promote environmental resilience, combat climate change, and foster environmental justice and healthy communities through urban design. Restriction: Restricted to graduate-level students. Cross-listed with URPL 6396. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

URBN 6652 - Design Seminar (3 Credits)
Investigates topical issues in urban design, typically within the framework of a theme running through an entire course of study. Focus is on critical evaluation of theory, process and methods. Cross-listed with LDAR 6652. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6653 - Design Practice and Leadership (3 Credits)
Provides students with an understanding of urban design as a professional practice; how it functions within a collaborative, interdisciplinary environment; and the interpersonal skills needed to successfully work as part of and be a leader in a complex design team. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
URBN 6686 - Special Topics: Urban Design (3 Credits)
Various topical concerns are offered in urban design history, theory, elements, concepts, methods, implementation strategies, and other related areas. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restrictions: Restricted to Master of Urban Design students in the College of Architecture and Planning.

URBN 6700 - Urban Design Advanced Travel Studio (6 Credits)
Travels to international or US urban location(s) to engage in advanced urban design development, analysis, and production on a real-world project that includes multiple environmental, cultural, and economic influences; wide-ranging urban planning contexts, and various design dimensions and functional considerations. Restriction: Restricted to graduate students in the College of Architecture and Planning. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students within the College of Architecture and Planning
Additional Information: Global Education Study Abroad.
Typically Offered: Summer.

URBN 6725 - Urban Design Capstone (6 Credits)
Requires students to work individually, paired with an urban design practitioner mentor, on a complete design solution for a real-world client that incorporates the full spectrum of urban design knowledge, methods, and skills to produce professional-grade urban design plan deliverables.
Prereq: URBN 6600: Urban Design Studio II. Max hours: 6 Credits.
Grading Basis: Letter Grade
Prereq: URBN 6600

URBN 6840 - Independent Study: URBN (1-6 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to urban design. Restriction: Graduate level students. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

URBN 6930 - Urban Design Internship (3 Credits)
Designed to provide professional practice experience in urban design. Emphasis on actual work experience in settings with client groups as students assist them in determining solutions. Program directors approval required. Restriction: Graduate level students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.
Geography, Planning, and Design, PhD

Overview
The Ph.D. in Geography, Planning, and Design at the University of Colorado is a research-oriented degree offered by the College of Architecture and Planning (CAP) at the University of Colorado Denver. Initiated in 1997, the program is dedicated to the education of future intellectual leaders in the fields of the built environment who have a critical understanding of the social, political, and global conditions that influence their profession.

It is the intent of the program to prepare students to excel in research regarding the planning and design of built environments through the incorporation of intellectual, analytical, and integrative aspects of the involved professions. Within this context, students and faculty seek to creatively shape the built environment and understand it in relation to institutional, political, economic, social, and natural environments.

Admission to the program is competitive and based on merit and available funding. Excellent academic performance, references, and a commitment to critical issues in the built environment are prerequisites.

The minimum residency requirement is four semesters, not including summer semesters. In the first two years of residence, students take courses to satisfy the credits relevant to preparation for writing their dissertation and the core requirement of the program, as well as additional electives. After completing these requirements, the student takes a comprehensive exam.

After satisfying program requirements, students move on to preparing a dissertation topic and research proposal which is presented and defended in a public event. With the successful defense of the dissertation topic and research proposal, students are admitted to candidacy. Finally, the completed dissertation is defended in a public examination involving external examiners in addition to the members of the committee. Upon successful completion of the dissertation defense, the program recommends the awarding of the Ph.D. degree.

One of the strengths of the College of Architecture and Planning and Ph.D. program is that students can take advantage of resources in all departments and fields in the College and elsewhere in the university. In addition to faculty from within the College of Architecture and Planning, we have a broad and exciting group of affiliated faculty from many departments across the university.

The Ph.D. degree in Geography, Planning, and Design is appropriate for those seeking careers in research and teaching or roles in government or professional consultation, all of which require a research specialization. So far, over 60 graduates of the program have gone on to faculty positions at universities in the United States and elsewhere, post-doctoral work, and into private consulting, non-profit organizations, and the federal government.

Admission Requirements

Prerequisites
Applicants admitted to the PhD program normally will have completed the requirements for the Master of Architecture, Master of Planning, Master of Landscape Architecture, or a related master’s degree program. Students from allied fields are encouraged to apply. Field specialization and background are open.

GPA and TOEFL Scores
Consistent with the University requirements, applications are evaluated based on Grade Point Average (GPA) scores, and the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam. All exams must have been taken within a year before applying to the program:

- Academic achievement as evidenced by an undergraduate grade point average of 3.0 (on a 4.0 scale) or better, and a graduate grade point average of 3.5 or better.
- Applicants whose native language is not English must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam, or have a graduate degree from a university in the U.S. or another English-speaking country. The minimum TOEFL score required for acceptance by the University of Colorado at Denver is 80 or higher on the TOEFL (sub-scores of 20 in Reading, Listening, and Speaking, and 24 in Writing) or 6.5 on the IELTS (sub-scores of 5.5 in each area). However, the Ph.D. program typically does not accept a student with a score lower than 85 on the TOEFL and 6.8 on the IELTS.

Application Checklist
The following documents must be submitted before an application will be considered:

- Application Forms - Apply online!
- Application Fee
- Three Letters of Recommendation
- Examples of previous research and written works
- Official transcripts from all previously attended institutions of higher learning
- Statement of Personal and Professional Goals
- Scores of Test of English as a Foreign Language (TOEFL) for non-U.S. residents whose native language is other than English
- Financial Statement (for non-U.S. residents/citizens)

Program Requirements

Overview
Successful completion of the PhD program requires fulfilling course requirements, passing the comprehensive examinations, preparing and defending a dissertation proposal, and undertaking research, writing and defending a dissertation. This is a multi-year process that involves a close mentoring relationship with the student’s advisor.

A student’s program of study must include at least 12 semester hours of Ph.D. Program core classes and 24 semester hours of study within the area(s) of focus established with the Primary Advisor. The student may focus on one main field of interest or a major and minor field.

Students shall complete the minimum of 36 semester hours in their area(s) of focus and Ph.D. Program core requirements prior to advancement to candidacy. Credit transfers are not allowed. Credits
earned from previous courses before the student is enrolled in the Ph.D. program cannot be used as credit toward the Ph.D. degree.

Students must maintain a 3.0 GPA in all their coursework. A grade of less than B in any Ph.D. Program requirement shall not be accepted as meeting those requirements. For Program Core courses, the student must retake the course. A Program Core course may be retaken only once. The student shall be terminated from the program if a grade less than B is received more than once in a Ph.D. Program Core Course.

In addition, students must also pass a comprehensive exam as well as write and defend a dissertation proposal and dissertation.

Graduate Education Policies and Procedures apply to this program

Residency and Enrollment Requirements
The minimum enrollment requirement at CU Denver for doctoral students is six semesters of full-time scholarly work beyond the attainment of a bachelor's degree.

The doctoral program requires a minimum of two years of residency (not fewer than four semesters enrolled in a minimum of six semester hours each, excluding summer) devoted to coursework and other preparation for advancement to doctoral candidacy status. Ordinarily, research for the dissertation will also be completed while in residence. After that time, special arrangements can be made with the CAP Ph.D. Committee if substantial work needs to be performed elsewhere.

Students must complete the comprehensive examinations and dissertation proposal within four years from the beginning of their first semester in which they are enrolled as a Ph.D. student at the University of Colorado Denver. In addition, the University of Colorado Denver requires that all degree requirements be completed within eight years of matriculation.

Active Status
To remain actively enrolled, students must register for six semester hours or more each academic semester (excluding summer) until they become a doctoral candidate. Once they become a doctoral candidate, students must register for at least one semester hour per semester. Students who are not so registered are automatically withdrawn from the University of Colorado Denver and must apply for readmission to the program. The readmission decision will depend on the student's academic record and progress toward the degree.

Doctoral students must register for a minimum of one hour of dissertation credit in the term of graduation. If all requirements for graduation, including submission of the final approved dissertation, have been completed prior to the last day of registration, and the student was registered for the preceding term, the student may apply for a waiver of the enrollment requirement.

Advising and Committees
Overview
Each student entering the program shall have a Primary Advisor. Students wishing to change their Primary Advisor should do so during their first year. All appointments of Primary Advisor must be approved by the Ph.D. Program Director. Students wishing to change their Primary Advisor after the first year must petition the Ph.D. Program Director for approval. The Dissertation Advisory Committee is comprised of a Primary Advisor and at least two additional members. Any of these three may serve as the Chair of the Dissertation Advisory Committee.

Primary Advisor
The Primary Advisor guides the student through the completion of the course requirements, the preparation for the comprehensive examinations, the dissertation proposal, and the dissertation. The Primary Advisor must have a doctoral degree and be a tenured/tenure-track member of the College's Ph.D. Program or an invited affiliate faculty with a regular appointment to graduate education. The Primary Advisor may serve as the Chair of the Dissertation Committee but may not serve as the Chair of the Comprehensive Exam Committee.

Committee Chair
The Committee Chair's primary responsibility is serving on the student’s Advisory Committee and chairing the dissertation defense.

Dissertation Advisory Committee
The Dissertation Advisory Committee provides guidance for the investigated dissertation topic, comprehensive examination, dissertation, and the final dissertation examination.

This Committee includes at least three faculty members: the Primary Advisor and at least two additional committee members. One of the committee members must be a full-time faculty member of the College, and the majority of the committee members must have a Ph.D. degree. All committee members must hold Graduate Faculty appointments. This Committee must be fully formed by the beginning of the student’s third semester of study.

Membership of this Committee may change if the student's interests and needs change. Any changes should be developed in consultation with the student’s advisor and must be approved by the Ph.D. Program Director. The Dissertation Advisory Committee must meet with the student at least once each year to assess progress.

Comprehensive Examination Committee
This Committee consists of a minimum of three graduate faculty members, including the Primary Advisor. Although it is not a requirement, this Committee should mainly consist of the Dissertation Advisory Committee. At least one member of the Comprehensive Examination Committee must be a full-time faculty member of the College, and the majority of the committee members must have a Ph.D. degree. All committee members must hold Graduate Faculty appointments.

Final Dissertation Examination Committee
The final Dissertation Examination Committee shall be formed according to the Policies and Procedures of Graduate Education. All committee members must hold Graduate Faculty appointments.

Special Circumstances
If the Primary Advisor leaves the faculty of the College before the comprehensive exam and/or dissertation topic is approved, the Ph.D. Program Director will work with the student to identify a new Primary Advisor and Chair for the Committee.

If the Primary Advisor leaves the faculty of the College after the comprehensive exam and/or dissertation topic is approved, and both the Primary Advisor and the student wish to continue in the advising relationship, the original Primary Advisor can continue to be co-advisor with the appointment of a co-advisor from within the Program. The Primary Advisor may be appointed as adjunct faculty in Graduate Education and will continue to hold a regular graduate faculty
appointment until the student graduates, in order to recognize his or her continuing role, with approval of the Ph.D. Program Director.

If a member of the Dissertation Committee other than the Primary Advisor is unable to continue in this role, for any reason, the Primary Advisor will work with the student to identify a new member for the Committee. Upon accepting to serve in this role, the new member of the Committee must sign on the dissertation topic and dissertation proposal documents as they were previously approved.

Curriculum

The minimum requirement is 36 semester hours of coursework, all of which must be at the Graduate level (5000 and above) and 30 hours of dissertation semester hours. All Ph.D. students are required to take 12 semester hours of core courses.

The curriculum is divided into three stages consisting of core courses, major and minor field courses, and the dissertation. The program requires a minimum of 66 semester hours of graduate work, 36 of which must be earned while in residence.

Each student’s curriculum is tailored to his/her individual needs and is determined in close consultation with the dissertation advisor. Within their area of specialization, students will identify a major area of study and an outside field of study. All students are required to enroll in the Ph.D. Colloquium and Research Methods core courses during the first and second years of course work.

Core Courses (12 semester hours, minimum with B or better grade)

Courses supporting the Area(s) of Interest (24 semester hours, minimum grade of B)

Students work with their Dissertation Advisory Committee to designate their area(s) of interest. This designation is not intended to reflect the particular focus of their dissertation topic but rather the disciplinary context within which their dissertation topic resides. Students, in consultation with their advising team, may select one central area of study or a major and minor area of study. This designated course of study forms the basis for their comprehensive exam.

Dissertation Credits (variable): (30 semester hours, minimum of B or better grade)

During the course of doctoral study, students may enroll for credits related to their preparation for comprehensive exams, the dissertation proposal and preparation, or advisor approved independent study as dissertation credits.

Typical Course of Study

First Year
Students develop their degree plan, take six semester hours of the required Core Curriculum, complete additional courses in their specialty area, and any prerequisite courses.

Second Year
Students take the remaining core courses, continue to take electives in their specialty areas, begin literature surveys and reviews, and prepare for their comprehensive exam.

Third Year
Students complete their specialization papers, prepare a dissertation proposal, complete the literature review, and take the comprehensive exam.

Fourth/Fifth Year
Fourth and fifth years are spent researching and writing the dissertation.

Ph.D. Degree Time Limit: Eight Year Completion Requirement

The University of Colorado Denver requires that doctoral students, whether enrolled full time or part time, must complete all degree requirements within eight years of matriculation. Students who fail to complete the degree in this eight-year period are subject to termination from Graduate Education upon the recommendation of the program director and concurrence of the Dean. For a student to continue beyond the time limit, the program director must petition the Dean for an extension and include:

1. reasons why the program faculty believes the student should be allowed to continue in the program and
2. an anticipated timeline for completion of the degree.

Approved leaves of absence do not automatically extend the time limits for earning a degree, but they may be used as a reason to request an extension if needed.

For more information on the Ph.D. in Geography, Planning, and Design, visit the College of Architecture and Planning website.
Historic Preservation, MS

Program Director: Steve Turner
Office: CU Denver Building, 2nd Floor
Telephone: 303-315-1000
E-mail: steve.turner@ucdenver.edu

Introduction
The Master of Science in Historic Preservation (MS HP) in the Dana Crawford Preservation Program is a 45 semester-hour program, usually completed in 15 or 18 months (three regular semesters and possibly part or all of one summer). The curriculum equips you to participate in the preservation of historic buildings and sites. It also presents opportunities for you to study large-scale landscape conservation, the preservation of cultural heritage and underrepresented communities, the impact of gentrification in cities and how preservation can be tied in with affordable housing. As our global climate changes, environmental sustainability and historic preservation are even more closely linked.

Graduates will be prepared to become the new leaders of the cultural heritage movement. The course of study is very broad to provide students skill in the political, economic, and legal aspects of historic preservation.

Throughout your time in the program, you will have the opportunity to carve a unique path and personalize your degree through independent study

Admissions
Application to the Master of Science in Historic Preservation program is open to all students holding the bachelor’s (undergraduate) degree from an accredited college (or its equivalent from a foreign institution).

Materials Required
• A brief statement of interest (500 word max.)
• A compact sample of work (max. 15 pages 8.5” X 11”) of writing samples, and optionally, graphic work and professional resume is recommended.
• Submission of Graduate Record Exam (GRE) scores is optional. [There is an expedited application procedure for current CU Denver students in another CAP master’s program. Please inquire to the MS in Historic Preservation program director.]

Transfer Credit
In accordance with the graduate education policies, coursework that has been applied towards an undergraduate degree or another graduate degree on the same level (e.g., MA to MS) cannot be accepted for transfer credit. Specifically, master’s courses applied to one completed master’s degree program may not be applied to another master’s degree. Credits earned in a Graduate Certificate Program, that have not also been applied to a graduate degree program may be applied to a graduate degree program with program consent. Please see the Graduate Education Policies and Procedures for more information.

Program Requirements
The course of study is designed to accommodate the background and needs of both those students with substantial experience, and those new to the field. The curriculum is flexible but rigorous, requiring:

Urban Design, MUD

Program Director: Ken Schroepell  
Program Advisor: Roxy New  
Telephone: 303-315-1000  
Email: ken.schroeppel@ucdenver.edu (ken.schroeppel@ucdenver.edu)

Program Description
The Master of Urban Design (MUD) is an advanced post-professional degree program for individuals who seek a career in urban design practice or for current planning and design professionals who want to enhance and expand their existing practice with urban design knowledge and expertise.

To be accepted into the MUD program, an individual must hold a master's degree in architecture, urban planning, or landscape architecture, or an accredited professional undergraduate degree in architecture, urban planning, or landscape architecture. Students in CU Denver's MArch, MLA, and MURP programs may be eligible to apply to the MUD program and begin earning MUD credits before they complete their prerequisite master's degree through the MUD Overlapping Dual Degree option (see below).

The MUD program consists of nine courses: one studio and three lecture courses in the fall, one studio and three lecture courses in the spring, and either a travel studio or capstone project in the summer. To earn the MUD degree, a student must complete all nine courses totaling 36 credits. The MUD program is designed to be accomplished in a single calendar year (fall, spring, and summer semesters) as a full-time, immersive experience; however, students with qualifying circumstances or students admitted through the MUD Overlapping Dual Degree option may complete the program over a longer timeframe.

Using Colorado's diverse urban landscapes as a laboratory for real-world learning experiences, our MUD program teaches and trains students to become exceptional urban design thinkers, practitioners, and leaders in their communities; collaborates with urban designers to advance the profession and position it at the intersection of the city-building disciplines; and engages with the community to create great places that are sustainable, inclusive, equitable, healthy, and inspiring.

Graduate Education Policies and Procedures apply to this program.

Prerequisites
The Master of Urban Design at CU Denver is an advanced post-professional degree. In order to be admitted to the program, an individual must hold (or will hold by the start of their MUD studies) a professional degree in architecture, urban planning, or landscape architecture (minimum GPA 3.00) from an accredited program. Professional degrees in architecture, urban planning, and landscape architecture can be obtained at either the undergraduate or graduate levels.

Qualifying Degrees:
- Master of Architecture (M.Arch)
- Bachelor of Architecture (B.Arch)
- Master of Urban Planning (MUP, MURP, MCP or similar)
- Bachelor of Urban Planning (BSUP, BSURP or similar)
- Master of Landscape Architecture (MLA)
- Bachelor of Landscape Architecture (BLA or BSLA)

The qualifying degree must be accredited through the National Architectural Accrediting Board (for architecture), the Planning Accreditation Board (for urban planning), or the Landscape Architectural Accreditation Board (for landscape architecture) for programs in the United States. For international applicants, please contact us for more information.

Overlapping Dual Degree for current CAP students:
The MUD Overlapping Dual Degree option gives students in the MArch, MLA, and MURP programs at CU Denver the opportunity to apply to the MUD program and begin earning MUD credits before they complete their prerequisite master’s degree. By taking MUD lecture courses that qualify as open or cross-listed electives toward their prerequisite degree, students can reduce the total number of credits required to earn both degrees. For details about the Overlapping Dual Degree option, current CU Denver CAP graduate students should contact their Academic Advisor.

Admissions
The Master of Urban Design program accepts applications for fall semester entry. The program does not encourage entry to the program in any spring semester due to the specific sequencing of the classes.

The priority deadline (consideration for scholarships) for all applicants is Feb 15; final deadline is May 1. The requirements the admissions committee considers are:
- Academic transcripts of the qualifying degree(s)—see Prerequisites section above.
- A minimum 3.00 GPA is required to apply to the MUD program. Applicants with a 3.00 GPA or higher do not need to submit Graduate Record Examinations (GRE) scores. Applicants with a GPA below 3.00 may be required to submit GRE scores.
- A portfolio that includes examples of student or professional projects that show your planning/design-related knowledge and skills, ability to graphically express planning/design and spatial concepts and processes, organizational and communication (written and graphical) capabilities, and competency in various planning/design computer applications.
- A statement of purpose that includes your educational and professional goals and a thoughtful explanation of how a MUD degree will allow you to achieve your goals.
- Resume describing your educational and professional background.
- Three letters of reference, at least one from an academic reference if your most recent academic degree was earned within the last five years.
- International applicants must submit proof of English language proficiency. For more information regarding English Language Proficiency and international transcripts at the CU Denver International Admissions website.

Transfer Credit
In accordance with Graduate Education policies, coursework that has been applied towards an undergraduate degree or another graduate degree on the same level (e.g., MA to MS) cannot be accepted for transfer credit. Specifically, master’s courses applied to one completed master’s degree program may not be applied to another master’s degree. Credits earned in a Graduate Certificate Program, that have not also been applied to a graduate degree program may be applied to a graduate degree program with program consent. This policy applies to previously completed College of Architecture and Planning (CAP) undergraduate and
Program Requirements

The MUD curriculum features a mix of lecture and studio courses that comprehensively cover the spectrum of urban design theory and practice and emphasizes hands-on experiential learning and skills development. The curriculum consists of nine courses: one studio and three lecture courses taken in the fall semester, one studio and three lecture courses taken in the spring semester, and the final requirement—a capstone project or advanced travel studio (student’s choice)—taken during the summer. To earn the MUD degree, a student must successfully complete all nine courses totaling 36 credits.

Students entering the MUD program who lack certain design knowledge or skills may be required to take the program’s Design Skills Workshop before the start of the Fall semester, as determined by the program’s admissions review committee.

The program curriculum is 36 credit hours and consists of the courses shown below:

Program Vision, Mission, and Hallmarks

THE VISION FOR URBAN DESIGN EDUCATION AT THE COLLEGE OF ARCHITECTURE AND PLANNING:

• We are an international model for training the urban designers of tomorrow and for working closely with urban design professionals and the community to create places that enrich people and the planet.

THE URBAN DESIGN MISSION IS TO:

• Teach and train students to become exceptional urban design thinkers, practitioners, and leaders in their communities.
• Collaborate with urban designers to advance the profession and position it at the intersection of the city-building disciplines.
• Engage with the community to create great places that are sustainable, inclusive, equitable, healthy, and inspiring, while providing students with real-world learning experiences.

THE MASTER OF URBAN DESIGN PROGRAM’S FOUR HALLMARKS:

• Professional Engagement: Our Master of Urban Design program prepares students for professional practice and positions them for career advancement through ongoing engagement and partnerships with distinguished practitioners in urban design, architecture, city planning, landscape architecture, and related fields. The curriculum, which balances theory and practice, draws significantly from practicing faculty to elevate the professional competency of students, and prepare them for long-term career success. Students are exposed to the many issues that cities currently face, including elements of planning policy; zoning and development regulations; public realm design; mobility and transportation; economics; social equity and environmental sustainability; and community engagement. This allows students to develop a deep understanding of the role of urban design in the city-building process and learn urban design by engaging with practitioners who are implementing projects and actively working in the delivery and evolution of urban places.
• Community Engagement: Our Master of Urban Design program develops sustained partnerships with local communities and organizations to work together to advance the goals of the MUD program, urban design practice, and the broader community through the exchange of ideas and the exploration of creative design concepts. It is critical that the design of cities and the spaces and places that urban designers help shape have people as their central focus. For urban designers to best design cities as people-centered places, they must engage with the community in meaningful ways. These partnerships recognize the wealth of resources and wisdom that already exists within communities and focus on understanding their issues, problems, and challenges. These community partnerships require students and faculty to approach engagement with a “listen and learn” attitude, foster mutually beneficial relationships, and ultimately create lasting positive impacts for all people and places.
• Environment and Equity: Our Master of Urban Design program focuses on the connections between urban form, public space, social equity and justice, ecological systems, environmental quality, and public health that exist at multiple scales. From the street to the neighborhood and from the city to the region, students explore the complex infrastructure systems, social networks, and ecosystems that affect our built and natural environments and look to develop new paradigms and design solutions that fight against environmental degradation, climate change, and social and racial inequities. Emphasizing the imperative for multidisciplinary approaches, the MUD program focuses on the triple bottom line of social, economic, and environmental sustainability and resilience in our cities and towns and the ever-increasing role that urban design plays in addressing climate change, disparities and displacement in underserved and historically marginalized communities, and public health and wellness.
• Leadership: Our Master of Urban Design program is structured to train students how to communicate confidently with other disciplines, facilitate effective teamwork, and tackle complex urban issues to create the next generation of civic and design leaders. Urban design is positioned at the intersection of multiple professions that participate in the city-building process including architecture, landscape architecture, city planning, civil engineering, and public policy and finance. A strong urban designer has a working knowledge of these allied disciplines and applies a breadth of knowledge to their professional work. The MUD program curates a student’s skillset to position them to play critical leadership roles guiding multi-disciplinary teams and to advance the careers of those already working in urban design as well as provide a rigorous and
Plan of Study

The MUD program consists of nine courses: one studio and three lecture courses in the fall, one studio and three lecture courses in the spring, and either a travel studio or capstone project in the summer. To earn the MUD degree, a student must complete all nine courses totaling 36 credits. The MUD program is designed to be accomplished in a single calendar year (fall, spring, and summer semesters) as a full-time, immersive experience; however, students with qualifying circumstances or students admitted through the MUD Overlapping Degree Option may complete the program over a longer timeframe.

Introduction
The College of Architecture and Planning offers a graduate certificate in design build as an extension of the MArch program. The certificate course work totals 18 credit hours and emphasizes design build from the designer’s point of view.

Certificate Requirements
Five courses totaling 18 semester hours can be applied to the MArch graduation requirements.

Introduction

Geospatial Information Science (GIS), known to some as computer mapping, is used to store, manage, analyze, synthesize, and display spatial data and information. In the College of Architecture and Planning we use GIS to understand and describe the spatial nature of data, to answer place-based questions posed by stakeholders and clients, and to create planning- and research-oriented maps and analyses that are critical to communicating with stakeholders. Our work with GIS in the college is built on the many advances in Geospatial Information Science over the last 40 years.

This certificate program is intended for individuals with an interest in the application of GIS to the design and planning professions. It is open to both currently enrolled students in a University of Colorado degree program who wish to add a credential to their degree, as well as working professionals who are not enrolled as degree-seeking students but who wish to pursue a certificate to improve job skills.

Students who earn this Certificate through the College of Architecture and Planning at the University of Colorado Denver will exit the program with the following:

- An understanding of GIS theory and concepts
- Technical mastery of general GIS methods using ArcGIS Pro and other GIS platforms as well as familiarity with remote sensing
- Familiarity with common public geospatial data sources, as well as metadata standards
- Knowledge of data interoperability, including how to move data and maps from one software platform to another
- Specialized skills in geospatial technologies and methods related to the design and planning professions, including rendering and visualizations, infrastructure and transportation network analysis, municipal cadastral mapping, LiDAR-based 3D city modeling, Census data mapping and analysis, process automation, site selection and analysis, geodesign, and many others

A minimum of a 3.0 GPA in all GIS related course work is required to earn the GIS Certificate, and for certificate credit a B- or better is required in all GIS course work.

Eligibility, Application, and Tuition and Fee Information

The certificate program is open to all. Applicants already enrolled in a University of Colorado degree program need only submit an internal application to the CAP GIS certificate program. Applicants who are not currently enrolled in a degree program must apply to CU Denver as non-degree seeking students.

All interested program participants must complete one of the online application forms found on the CAP website (https://architectureandplanning.ucdenver.edu/academics/certificate-programs/#ac-admissions-2). Failure to submit an official application may result in the inability for CAP to officially award the certificate upon student completion.

Materials required for all applicants:

- A short statement of interest (250-500 words) explaining previous work and/or educational experience with GIS, and how this certificate will assist in current or future career or personal goals
- Unofficial transcripts (if not already admitted to CU Denver)

Find tuition and fee information in the Bursar’s Office area of the university website (https://www.ucdenver.edu/tuition-cost/#:~:text=Non%20Resident%20Tuition%20&%20Fees%3A,12%20credit%20hours%20each%20term). Failure to submit an official application may result in the inability for CAP to officially award the certificate upon student completion.

Students interested in pursuing the GIS Certificate may start the conversation with the Program Coordinator, Austin Troy or the Program Academic Advisor, Roxy New

Course Requirements

The GIS Certificate is designed to supplement students’ course work in their field of study and requires 18 credits to complete. Degree seeking students in the College of Architecture and Planning wishing to pursue the GIS Certificate may count 6 credits from their degree-based course of study towards the certificate, meaning that there are 12 additional semester hours of course work required to complete the certificate beyond the total credit hour amount for their degree.

Achieving the GIS certificate in your degree program requires you to follow the appropriate advising sheet.

- Master of Urban and Regional Planning - GIS Advising Sheet (https://architectureandplanning.ucdenver.edu/docs/librariesprovider18/student-services/giscert_murpadvisingsheet_6_15_16.pdf?sfvrsn=9e1a9ab8_2)

### Geospatial Information Science Graduate Certificate

- **GEOG 5090**: Environmental Modeling with Geographic Information Systems
- **GEOG 5091**: Open Source Software for Geospatial Applications
- **GEOG 5092**: GIS Programming and Automation
- **GEOG 5095**: Deploying GIS Functionality on the Web
- **GEOG 5230**: Hazard Mitigation and Vulnerability Assessment
- **GEOG 5235**: GIS Applications in the Health Sciences
- **CVEN 5382**: Geospatial Data Development
- **CVEN 5385**: GIS Relational Database Systems
- **CVEN 5390**: Interactive Web Mapping GIS

Any course from the Part 3 list (either track) not already used to fulfill the Part 3 requirement

Up to 3 semester hours from a studio course where intensive GIS is used.

Up to 3 semester hours for an internship using GIS in a planning or design context, also by petition.

Other relevant courses by permission

**Total Hours**: 18

Historic Preservation Certificate

Introduction

Historic Preservation is significantly more than the restoration of buildings from the past. It is frequently a part of dynamic and inviting public spaces. It is at the forefront of the green building movement and environmental sustainability, and it can advance social equity while celebrating cultural diversity.

The Historic Preservation Certificate is designed for students and professionals who are pursuing or already hold a Master of Architecture, Master of Urban Planning, Master of Landscape Architecture, or anyone who wants to explore the diverse issues around Historic Preservation.

The Certificate is a 15 Credit Hour Program which can be completed in conjunction with other CAP programs or as a separate area of study for students or professionals who are already in the work environment.

Admissions

Application to the Historic Preservation (HIPR) Certificate is open to all students holding a Bachelor of Architecture (B.Arch) degree from an accredited institution, or are currently pursuing or have completed a master’s degree from an accredited institution. Upon submitting an application, students currently pursuing a master’s program in the College of Architecture & Planning (CAP) will be admitted on an automatic basis. Submission of one of the following applications is required for any student interested in pursuing the HIPR Certificate:

All interested program participants must complete one of the online application forms found on the CAP website (https://architectureandplanning.ucdenver.edu/academics/certificate-programs/#ac-admissions-2). Failure to submit an official application may result in the inability for CAP to officially award the certificate upon student completion.

Certificate Completion Form

All students pursuing the Historic Preservation Certificate will be required to submit a CAP Certificate Completion Form (https://ucdenverdata.formstack.com/forms/cap_certificate_completion_form/) upon successfully completing the certificate curriculum. Failure to submit this form will result in your certificate not being official certified or posted to your CU Denver transcript. Please only submit the form in the semester in which you are completing the certificate. Applications submitted for future semesters will not be accepted. The CAP Certificate Completion Form does not replace the required graduation application for degree-seeking students. If you are also completing a degree program in the current semester, you must follow the graduation procedures (http://catalog.ucdenver.edu/cu-denver/graduate/graduation/) for your college.

Certificate Curriculum Requirements

Historic Preservation Certificate students will complete five graduate-level courses for a total of 15 hours. The following are the required courses for the certificate:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 5232</td>
<td>Historic Preservation</td>
<td>3</td>
</tr>
<tr>
<td>HIPR 6210</td>
<td>Historic Buildings in Context</td>
<td>3</td>
</tr>
<tr>
<td>HIPR 6220</td>
<td>Adaptive Reuse: Business and Practice</td>
<td>3</td>
</tr>
</tbody>
</table>

Select two of the following:

- HIPR 6090 Special Topics in Historic Preservation
- HIPR 6110 Regionalisms & the Vernacular
- HIPR 6230 Reusing Buildings for a Changing Climate
- HIPR 6240 Cultural Resource Management and Preservation Law
- HIPR 6250 Contextual Design in Historic Districts
- HIPR 6310 Documentation, Analysis, Representation
- HIPR 6330 The Politics of Preservation
- HIPR 6410 Urban Conservation: Context for Reuse
- HIPR 6510 Building Materials Conservation

Total Hours: 15

Optional Course Selection Suggestions

Students are permitted to select any combination of courses within the "select two of following" portion of this program. However, students in the Master of Urban and Regional Planning or the Master of Architecture programs may find the following suggested course options to be the most relevant to their interests and studies.

- For Master of Architecture students, it is recommended that they select HIPR 6510 Building Materials Conservation and HIPR 6250 Contextual Design in Historic Districts.
- For Master of Urban and Regional Planning Students, it is recommended that they select HIPR 6240 Cultural Resource Management and Preservation Law and HIPR 6230 Reusing Buildings for a Changing Climate

These are not required course tracks for students in either program. Selecting the above suggested courses does not result in a special designation for the certificate on a transcript. Students who are not in the Master of Urban and Regional Planning Program or Master of Architecture program are welcome to take the suggested combination of courses above as well.

Grading Policy

A minimum of a 3.0 GPA in the above course work is required to earn the Historic Preservation Certificate, and no grade below a B- will count toward the certificate.

Certificate Learning Outcomes

Student who successfully complete the Historic Preservation Certificate will be able to:

1. Be familiar with the philosophical foundations of preservation and possess a fundamental understanding of how to apply philosophical consideration in the preservation of the past.
2. Assess a building or site for its historical significance and develop a preservation strategy based on the level of significance.
3. Plan for the proper restoration or preservation of the building or site utilizing proper materials and methods.
4. Demonstrate awareness of environmental sustainability, social equity, and economic development and how to incorporate these issues into the practice of historic preservation.
Integrated Construction, Management + Leadership Graduate Certificate

leonard.darnell@ucdenver.edu

Introduction

The College of Architecture and Planning, the College of Engineering, Design and Computing, and the Business School at the University of Colorado Denver have formed a partnership to create an innovative and interdisciplinary leadership program. The Integrated Construction, Management and Leadership (ICML) Certificate is a four-course certificate designed to launch designers, architects, engineers, and business entrepreneurs into the world of construction or rapidly update an existing skill-set.

As disciplinary identities, project boundaries, and conventional markets blur, leadership, management skills, and civic mindfulness are key aspects to successfully navigating a rapidly transforming 21st century built environment. Many new ideas are emerging around how projects are conceived and delivered that better integrate the complex relationships among finance, marketing, design, and construction. These new interdisciplinary management and construction techniques streamline the construction of increasingly large-scale and complex projects. Leadership skills are necessary for success in the central activities of contemporary engineering, architectural design firms, business, government, and non-profits. The demands of project management in firms today involve more than specific technical expertise in a given field. Firms need creative individuals who can effectively innovate, execute, and communicate across disciplines. This certificate program capitalizes on these changes and the new opportunities they present.

ICML is an interdisciplinary program designed for working or aspiring professionals, and upper-level students interested in expanding their knowledge base in the fields of engineering, architecture, business, and their intersections. The courses include introductions to and explorations of current trends in the construction industry, project management and building information modeling (BIM). The final course is an integrated course that brings together top executives in the architecture, engineering and construction (AEC) business to discuss current industry topics and provides students an opportunity to apply principles from the various fields to case study projects.

- The courses can be used to partially fulfill requirements for the MEng in Construction Engineering and Management or other eligible graduate programs such as the Master of Architecture degree upon acceptance into these programs.
- Approved courses in this Certificate may also count toward related Certificates offered by the Business School and Construction Engineering and Management.

Note: A grade of B- or higher is required in all courses applied toward the certificate.

- Students can earn graduate-level credit for each course they successfully complete. If students have an undergraduate degree, they can earn the ICML Certificate upon completion of all four courses.
- They can take the courses as a non-degree student or while enrolled in a degree program at the University of Colorado Denver.
Interior Design Certificate

Program Chair: Sarah McGarry
Telephone: (303) 315-1000
E-mail: sarah.mcgarry@ucdenver.edu

Introduction
The certificate provides aspiring interior designers the professional knowledge, competency, and applied skills necessary for the practice of interior design. With a focus on sustainability, environmental stewardship, and health and wellness, this certificate integrates human-centered approaches with appreciative inquiry, critical thinking, creativity, and innovation for interior environments.

Eligibility
Application to the Interior Design Certificate is open to all students holding a completed bachelor’s degree, or are currently pursuing or have completed a master’s degree. Upon submitting an application, students currently pursuing a master’s degree in the College of Architecture and Planning (CAP) are admitted on an automatic basis.

All interested program participants must complete one of the online application forms found on the CAP website (https://architectureandplanning.ucdenver.edu/academics/certificate-programs/#ac-admissions-2). Failure to submit an official application may result in the inability for CAP to officially award the certificate upon student completion.

Program Requirements

GPA Requirements
Students must earn at least a B- grade in all required courses for the certificate. Required courses must be repeated if the student earns less than a B- grade. A cumulative GPA of 3.0 or higher is required in the courses for the certificate.

Curriculum
The Interior Design Certificate requires students to complete four classes in the Department of Interior Design for a total of 15 hours. The following are all required core classes.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

6 hours of additional INTD coursework (5000 level or above) 6

Total Hours 15
Landscape Architecture Certificate

Introduction

The Certificate in Landscape Architecture provides an overview of the foundational knowledge and skills for students and practitioners who want to more fully engage landscape practices. The certificate will provide the foundation to understand and design landscape as a tool for meaningful cultural, social, and environmental change. Upon successful completion of the course sequence students will graduate with a highly valuable skillset and knowledge.

The Certificate in Landscape Architecture will provide students and professionals with the intellectual and practical skills necessary to bring critical landscape practice to a broad range of fields from design fields to geography, engineering, and the humanities among others. The course content will merge theoretical inquiry with skill-based learning to provide a solid foundation.

Admissions

Application to the Certificate in Landscape Architecture is open to all students holding a completed bachelor's degree, or who are currently pursuing or have completed a master's degree. Students currently pursuing a non-landscape architecture master's program in the College of Architecture & Planning (CAP) are admitted on an automatic basis.

All interested program participants must complete one of the online application forms found on the CAP website (https://architectureandplanning.ucdenver.edu/academics/certificate-programs/#ac-admissions-2). Failure to submit an official application may result in the inability for CAP to officially award the certificate upon student completion.

Materials Required for Non-CAP Graduate Students and Non-Degree Seeking Students:

- A brief statement of interest (500-word max.)
- Professional resume
- College transcripts (only needed for non-degree seeking applicants)
- One letter of recommendation
- A portfolio submission is highly recommended but not required

CURRENT MLA STUDENTS

Students who are (1) currently active in the CU Denver Master of Landscape Architecture (MLA) program, and (2) intend to complete the MLA program are ineligible for the Certificate in Landscape Architecture. Current MLA students who wish to transfer from the masters program to the certificate program should contact their academic advisor to discuss this option further.

Certificate Requirements

GPA Requirements:

Students must make a B- or higher in all required coursework for the certificate and maintain a 3.0 cumulative GPA in the curriculum to be eligible for the certificate conferment.

Curriculum Requirements (18 Hours)

Any Semester

3 hours of LDAR elective

Total Hours: 15

Students successfully completing the courses in the required curriculum for the certificate will acquire:

- Basic tools and skills for communication and visualization (Graphic Media and Studio)
- Knowledge and skills in the foundations of landscape architectural design process (Graphic Media and Studio)
- Knowledge and skills in the fundamentals of landscape architecture as a socially and culturally embedded practices (Site, Society and Environment)
- Applicable knowledge in the historical development, methods and fundamentals of landscape architecture (History of Landscape Architecture)
- Knowledge and skills in fundamental principles, values and design practices in the theory of landscape and landscape architecture (Theory)

Overview

Mission
Our mission is to effect change by preparing students to successfully pursue their passions. Our students acquire the skills they need to excel in an academically rigorous, experiential learning environment energized by creative exchange, real-world experience and diversity of voice.

Vision
The College of Arts & Media envisions a world made smaller, and more fully human, by the artist’s interpretation of the human experience. Our students come to us with passion for artistic expression. Our goal is to send them out into the world confident of purpose, ready to succeed.

Values
Creative Excellence - Academic and artistic rigor, creativity and innovation are bedrock principles of the CAM community and the cornerstone of how we define excellence. As champions of creative excellence in art marking and artistic expression we support risk-taking, intellectual freedom and social responsibility.

Discovery - We believe in a culture of shared discovery. Our students learn by doing, and as emerging peers, are important contributors to the knowledge exchange. We value rigorous investigation, critical thinking, diversity, collaboration and invention.

Facilities
CAM is constantly working to enhance and add to its facilities; see below for just some of the resources.

National Center for Media Forensics Facilities
• Computer lab featuring multimedia analysis and processing software from companies such as Cognitech, Amped, Foclar, Ocean Systems, iZotope, Adobe, MATLAB, Cellebrite, and Cedar Cambridge hardware/software systems
• Security DVRs and camera lab
• Graduate student workstations accessible from anywhere in the world via Remote Desktop Connection
• ENF (Electric Network Frequency) databases around the US

College of Arts & Media Departments and Programs
• Music & Entertainment Industry Studies (p. 227)
• Media Forensics, MS (p. 232)
• Recording Arts, MSRA (p. 234)

CAM also offers a wide range of undergraduate degree options. Please see the Undergraduate Catalog (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-arts-media/) or contact CAM@ucdenver.edu for more information.

College of Arts & Media Polices
Please see the Information for Graduate Students (p. 37) pages of this catalog for policies that apply to all students at the university. The policies that follow apply specifically to all graduate students in the College of Arts & Media. Contact recording arts or media forensics programs with any questions about these or other college/university policies.

Students must also follow the policies outlined in the Graduate Policies and Procedures.

Adding/Withdrawing from Courses After Census
Students wishing to add or withdraw from a course after the semester add/drop deadline (census) should contact t (ncmf@ucdenver.edu)heir program for guidelines and instructions.

Grade Appeals
For College of Arts & Media courses:
• When a student has questions or concerns regarding academic issues such as project grades, final grades, attendance policies, etc., the student is encouraged to speak directly with the faculty member teaching the course.
• If resolution or clarity of understanding is not reached, the following procedure should be followed:
• The student contacts the chair of the department offering the course to discuss the concerns.
• The department chair speaks with the faculty member to ascertain the faculty member’s point of view.
• The department chair facilitates a meeting between the student and faculty member to discuss the issue.
• If the student still has concerns after completion of these procedures, the student should contact the College of Arts & Media associate dean of academic and student affairs.

Incompletes

The College of Arts & Media has strict policies for granting incomplete grades. They include but are not limited to the following:

• Reason for incomplete must be a verifiable circumstance beyond the student’s control that made completion of the course impossible. The student must provide documentation.
• The majority of course requirements (75%) must have been completed with a passing grade to be eligible for an incomplete (B (3.0) for courses toward recording arts; B- (2.7) for courses toward media forensics).
• Whether the student has successfully completed 75% of the course with a passing grade is determined by the instructor and based on the requirements listed in the syllabus.
• CAM course completion agreement must be signed by both the instructor and student, with final approval by the dean’s/advising office.
• All course work must be completed within one calendar year of the end of the original course, unless an earlier deadline is specified.
• The final grade (earned by completing the course requirements) does not result in deletion of the incomplete (I) from the transcript. A second entry is posted on the transcript to show the final grade for the course, with a notation that the course was ‘Originally graded as Incomplete.’
• At the end of one year, I grades for courses that are not completed will automatically revert to an F.
• Requests for a retroactive change from a letter grade to an incomplete will not be considered.

The student is responsible for requesting an incomplete grade, submitting all of the appropriate paperwork and obtaining approvals. Please contact the program for additional information.

Applying to Graduate

Students expecting to graduate are required to apply to graduate by the published deadline. Students who do not apply by the deadline must apply to graduate for the following semester.

Applications will be accepted starting the first day of the student’s registration for the semester in which the student plans to graduate. Applications are due by 5 p.m. on census date (the drop/add deadline) of the semester in which the student is applying to graduate, as noted on the published academic calendar. Students are encouraged to meet with a faculty advisor the semester before they intend to graduate to review graduation procedures and degree requirements.

Students who have not attended the university for one calendar year (three consecutive semesters, including summer term) or longer must gain readmission to the university prior to applying for graduation. It is the student’s responsibility to apply with enough time for the readmission process to be finalized by the census date.

Academic Policies, Procedures and Curriculum Committee

The CAM Academic Policies, Procedures and Curriculum Committee is the appellate committee for all student-related academic petitions, issues and appeals. The committee is responsible for the evaluation and interpretation of the approved academic policies of the college. Questions about the interpretation of policies may be directed to CAM Advising and Student Services. Procedures and petition guidelines are available at the CAM website or by emailing the program.

Curricular Changes and Course Substitutions

Graduate students fall under the degree requirements that were in place when they first enrolled in their programs. If a program revises its curriculum, students have the option of following their original degree requirements or the revised curriculum. Courses under the original requirements may no longer be taught or may not be available for a set duration. In this case, the department faculty will approve reasonable course substitutions.

Course substitutions in the graduate degree must be approved by the designated area head in the specific program area, the department chair and/or possibly the associate dean. Please contact the program for additional information.
Music & Entertainment Industry Studies

Chair: Sean McGowan  
Office: Arts Building, Suite 288  
Telephone: 303-315-7450  
Email: CAM@ucdenver.edu  
Website: https://artsandmedia.ucdenver.edu/meis

Overview

Music & Entertainment Industry Studies offers the following graduate programs:

- Media Forensics, MS (p. 232)
- Recording Arts, MSRA (p. 234)

Programs

Music & Entertainment Industry Studies offers the following graduate programs:

- Media Forensics, MS (p. 232)
- Recording Arts, MSRA (p. 234)

Please see the Undergraduate Catalog (http://catalog.ucdenver.edu/cu-denver/undergraduate/schools-colleges-departments/college-arts-media/music-entertainment-industry-studies/) or contact CAM@ucdenver.edu for information about the Bachelor of Science (BS) in Music with emphases in performance, singer/songwriter, music business and recording arts.

Faculty

Associate Professors:

David Bondelevitch, MFA, University of Southern California  
Lorne Bregitzer, MS, University of Colorado Denver  
Catalin Grigoras, PhD, University Politehnica Bucharest  
Sam McGuire, MS, University of Colorado Denver

Assistant Professor:

Cecilia Wu, PhD, University of California Santa Barbara

Contact the Department of Music & Entertainment Industry Studies for information about additional graduate program faculty.

Media Forensics (MSMF) Courses

MSMF 5000 - Experiential Lab (1 Credit)  
Students will understand laboratory procedures and the application of A/V technology in the field and in analysis through professional conferences and site visits to crime labs and government agencies. Students will respond to experiences regarding presentation, demonstration, and discussion components. Restriction: Restricted to MFOR-MS students. Repeatable. Max hours: 5 Credits.  
Grading Basis: Letter Grade  
Repeatable. Max Credits: 5.  
Restriction: Restricted to MFOR-MS students.

MSMF 5050 - Topics in Media Forensics (1-3 Credits)  
Students learn theory and application through topical subjects designed to enhance theoretical and practical training in the analysis of forensic media. Emphasis will be placed on emerging technologies, methodological developments, and strengthening fundamental skills. These courses are repeatable for credit. Repeatable. Max hours: 5 Credits.  
Grading Basis: Letter Grade  
Repeatable. Max Credits: 5.

MSMF 5100 - Forensic Science and Litigation (3 Credits)  
Critical analysis of legal precedent and court proceedings reveal to students the correlation between science and law in the litigation of forensic evidence. Assigned reading and research papers regarding evidence admissibility and scientific methodology will prepare students for evidence examination. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Restriction: Restricted to MFOR-MS students.  
Typically Offered: Fall.

MSMF 5150 - Research Practices in Media Forensics (3 Credits)  
An introduction to practical research techniques and forensic science periodicals provides students with a foundation for projects and reports in subsequent classes and for the research thesis. Library resources, research design, writing styles, and information technology will be discussed. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Restriction: Restricted to MFOR-MS students.  
Typically Offered: Fall.

MSMF 5200 - Foundations in Media Forensics (3 Credits)  
Students learn the foundational processes integral to forensic audio, video, and image analysis demonstrating knowledge through reading responses and documentation of procedures and methodology used in assigned projects. Topics include: media recording technology, analog/digital theory, multimedia compression, and equipment characterization. Prereq: MSMF 5100 and 5150 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.  
Grading Basis: Letter Grade  
Prereq: MSMF 5100 and 5150 with a B- or higher. Restriction: Restricted to MFOR-MS students.  
Typically Offered: Spring.

MSMF 5250 - MATLAB Foundations (2 Credits)  
An introduction to MATLAB workflow and its use in Media Forensics will be explored. Students will learn how to build program commands in scripts for signal analysis and to display graphical representations of data and statistics. Prereq: MSMF 5100 and 5150 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 2 Credits.  
Grading Basis: Letter Grade  
Prereq: MSMF 5100 and 5150 with a B- or higher. Restriction: Restricted to MFOR-MS students.  
Typically Offered: Spring.
MSMF 5300 - Computer Forensics (3 Credits)
Students explore computer forensics through guided projects and group discussion. An overview of computer hardware/software and characterization of storage media and file types will be covered through mock evidence examination documenting the search, seizure, and acquisition of forensic media. Prereq: MSMF 5200 and MSMF 5250 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MSMF 5200 and MSMF 5250 with a B- or higher. Restriction: Restricted to MFOR-MS students.

MSMF 5350 - Mobile Phone Forensics (1 Credit)
Students learn concepts regarding the proper handling of mobile phones to ensure evidence integrity and approaches to address the ever-changing field. Students are prepared for the acquisition and analysis of forensic media on personal devices through exercises and group projects. Prereq: MSMF 5200 and MSMF 5250 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 1 Credit.
Grading Basis: Letter Grade
Prereq: MSMF 5200 and MSMF 5250 with a B- or higher. Coreq: MSMF 5400. Restriction: Restricted to MFOR-MS students.

MSMF 5400 - Forensic Audio Analysis (3 Credits)
Students learn concepts through the application of techniques related to audio enhancement, digital media authentication, acoustic analysis, and automatic speaker recognition. The acquisition and analysis of digital evidence applying reliable methods prepares students for forensic audio analysis in the laboratory. Prereq: MSMF 5300 and 5350 with a B- or higher. Coreq: MSMF 5450. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MSMF 5300 and 5350 with a B- or higher. Coreq: MSMF 5450. Restriction: Restricted to MFOR-MS students.

MSMF 5450 - MATLAB for Forensic Audio Analysis (1 Credit)
Advanced application of MATLAB for the forensic analysis of audio will be presented including file access, FFT and waveform plotting, and signal detection. Through the exploration of correlation and using mean quadratic difference students will be prepared for media authentication. Prereq: MSMF 5300 and 5350 with a B- or higher. Coreq: MSMF 5400. Restriction: Restricted to MFOR-MS students. Max hours: 1 Credit.
Grading Basis: Letter Grade
Prereq: MSMF 5300 and 5350 with a B- or higher. Coreq: MSMF 5400. Restriction: Restricted to MFOR-MS students.

Typically Offered: Fall.

MSMF 5500 - Forensic Video and Image Analysis (3 Credits)
Students learn concepts through the application of techniques related to forensic video collection and image enhancement, authentication, photogrammetry, and comparison. The acquisition and analysis of digital evidence applying reliable methods prepares students for working on forensic imagery in the laboratory. Prereq: MSMF 5400 and 5450 with a B- or higher. Coreq: MSMF 5550. Restriction: Restricted to MFOR-MS. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MSMF 5400 and 5450 with a B- or higher. Coreq: MSMF 5550. Restriction: Restricted to MFOR-MS. Typically Offered: Spring.

MSMF 5550 - MATLAB for Forensic Video and Image Analysis (1 Credit)
Advanced application of MATLAB for the forensic analysis of images will be presented covering image processing and analysis techniques. Through exploring analyses such as Photo Response Non-Uniformity and the Bi-Dimensional DFT, students are prepared for image authenticity examinations. Prereq: MSMF 5400 and 5450 with a B- or higher. Coreq: MSMF 5500. Restriction: Restricted to MFOR-MS. Max hours: 1 Credit.
Grading Basis: Letter Grade
Prereq: MSMF 5400 and 5450 with a B- or higher. Coreq: MSMF 5500. Restriction: Restricted to MFOR-MS.

Typically Offered: Spring.

MSMF 5600 - Report Writing and Court Testimony (3 Credits)
Students are prepared for expert witness testimony through the analysis of mock evidence, complimentary report preparation, and subsequent mock trial. This capstone experience will demonstrate a student's technical writing and presentation skills and exercise the creation of demonstrative materials. Prereq: MSMF 5500 and 5550 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MSMF 5500 and 5550 with a B- or higher. Restriction: Restricted to MFOR-MS students.

MSMF 6900 - Research Thesis in Media Forensics (4 Credits)
Students work closely with their thesis advisor in selecting a topic for original research and scientific publication. This capstone project creates an area of specialty for degree candidates. Approved materials are evaluated through report submission and thesis defense. Prereq: MSMF 5600 with a B- or higher. Restriction: Restricted to MFOR-MS students. Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Prereq: MSMF 5600 with a B- or higher. Restriction: Restricted to MFOR-MS students.

Recoding Arts (MRSA) Courses

MSRA 5000 - Introduction to Graduate Studies (3 Credits)
Surveys existing literature and research in science, technology, and pedagogy of recording arts. Extensive use of available resources in library, electronic and print, trade and scientific publications are explored. Use of computer applications for research and publication are developed. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5001 - MSRA Research Seminar (3 Credits)
In preparation for their thesis/portfolio, students learn research techniques by: applying skills from MSRA 5000, learning research design, performing research, interpreting results, and writing. Students will discover opportunities to add to the body of audio literature and recording techniques. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSRA 5125</td>
<td>Sound &amp; Music for Video Games I (3 Credits)</td>
<td>This course will give students an overview of the function of sound and music for video games including: history, sound engines, types of audio utilized, stereo and surround sound localization, music capabilities of hardware configurations and future trends in sound for video games. Restriction: Restricted to RCDA-MS majors within the College of Arts and Media. Max hours: 3 Credits. Grading Basis: Letter Grade</td>
<td></td>
</tr>
<tr>
<td>MSRA 5125</td>
<td>Sound &amp; Music for Video Games II (3 Credits)</td>
<td>Course is a continuation of Sound and Music for Video Games. Topics of study include non-linear music composition and implementation, advanced sound design techniques, optimization, and hands-on experience with modern game engines and game audio engines. Prereq: MSRA 5125. Restriction: Restricted to RCDA-MS majors within the College of Arts and Media. Max hours: 3 Credits. Grading Basis: Letter Grade</td>
<td>Restriction: Restricted to RCDA-MS majors within the College of Arts and Media. Typically Offered: Fall.</td>
</tr>
<tr>
<td>MSRA 5360</td>
<td>Music, Meditation and Technology (3 Credits)</td>
<td>Interdisciplinary course on acoustic ecology, sound art, and music technology. Through deep listening, compassionate listening, soundwalking, and interactive music controlled by motion capture, the unifying theme of this course is an engagement with sonic awareness, environment, and self-exploration. Restriction: Restricted to RCDA-MS majors within the College of Arts and Media. Cross-listed with MUSC 4360. Max hours: 3 Credits. Grading Basis: Letter Grade</td>
<td>Restriction: Restricted to RCDA-MS majors within the College of Arts and Media. Typically Offered: Fall.</td>
</tr>
<tr>
<td>MSRA 5380</td>
<td>Advanced Electronic Music Production &amp; Performance (3 Credits)</td>
<td>This course is designed to take a deeper dive into music, electronic music, as well as perceptions of music. Students will be able to create generative compositions, single sample-based compositions, a performative electronic composition, and incorporate multimedia elements into their compositions. Restriction: Restricted to RCDA-MS majors within the College of Arts and Media. Cross-listed with MUSC 4380. Max hours: 3 Credits. Grading Basis: Letter Grade</td>
<td>Restriction: Restricted to RCDA-MS majors within the College of Arts and Media.</td>
</tr>
<tr>
<td>MSRA 5500</td>
<td>Topics in Professional Audio (1 Credit)</td>
<td>Selected topical subjects to include live or studio sound recording, sound reinforcement, new technologies or practices in the audio industry. Repeatable. Max Hours: 9 Credits. Grading Basis: Letter Grade</td>
<td>Repeatable. Max Credits: 9. Restriction: Restricted to RCDA-MS majors within the College of Arts and Media.</td>
</tr>
<tr>
<td>MSRA 5505</td>
<td>Introduction to Audio Post Production (3 Credits)</td>
<td>Reviews all aspects of audio synchronized with picture, including music, sound effects, narration, and dialog replacement. Topics studied with respect to film, video and multi-media. Cross-listed with MUSC 3505. Max Hours: 3 Credits. Grading Basis: Letter Grade</td>
<td>Restriction: Restricted to RCDA-MS majors within the College of Arts and Media.</td>
</tr>
<tr>
<td>MSRA 5510</td>
<td>Topics in Recording Arts (3 Credits)</td>
<td>Selected topical subjects to include live or studio sound recording, sound reinforcement, new technologies or practices in the audio industry. Max hours: 9 Credits. Grading Basis: Letter Grade</td>
<td>Repeatable. Max Credits: 9. Typically Offered: Fall, Spring, Summer.</td>
</tr>
<tr>
<td>MSRA 5515</td>
<td>History of 20th Century Film Music (3 Credits)</td>
<td>This survey of the history of 20th century music in film will acquaint aspiring filmmakers and musicians with a history of the music, as well as concepts of film theory and the creative use of film music. Restricted to RCDA-MS majors within the College of Arts and Media. Max hours: 3 Credits. Grading Basis: Letter Grade</td>
<td>Restriction: Restricted to RCDA-MS majors within the College of Arts and Media.</td>
</tr>
<tr>
<td>MSRA 5525</td>
<td>Multimodal Interaction for Music (3 Credits)</td>
<td>This course explores human-computer interaction in music composition and performance. Students will learn to program and use open-source hardware to build novel and creative musical interfaces and instruments. Restriction: Restricted to Graduate Students. Max hours: 3 Credits. Grading Basis: Letter Grade</td>
<td>Restriction: Graduate level students.</td>
</tr>
<tr>
<td>MSRA 5530</td>
<td>Live Sound Reinforcement (3 Credits)</td>
<td>This course focuses on the basic elements of sound reinforcement: acoustics, equalization, equipment and mixing techniques. The major emphasis is the production of the final sonic product. Max hours: 3 Credits. Grading Basis: Letter Grade</td>
<td>Restriction: Restricted to RCDA-MS majors within the College of Arts and Media.</td>
</tr>
<tr>
<td>MSRA 5535</td>
<td>Sound Effects &amp; Foley for Visual Media (3 Credits)</td>
<td>Techniques for recording sound effects in the field and recording Foley in the studio. Use of library effects. Use of mixing techniques and plugins to create more complex sounds. Cross-listed with MUSC 4535. Prereq: MSRA 5505. Max Hours: 3 Credits. Grading Basis: Letter Grade</td>
<td>Prereq: MSRA 5505.</td>
</tr>
</tbody>
</table>
MSRA 5550 - Audio Production III (3 Credits)
Advanced studies in sound recording and reinforcement, aesthetics and techniques of multi-track analog and digital recording and stereo imaging. Team lab recording projects. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5555 - Dialogue Editing & Mixing for Visual Media (3 Credits)
Grading Basis: Letter Grade
Prereq: MSRA 5505.

MSRA 5560 - Mastering & Advanced Digital Audio (3 Credits)
A study and practice of the art of mastering. Topics covered include: history, monitoring, signal flow, metering, jitter, audio restoration, limiting, creating a CD pre-master, & mastering for new media. Students will get practical experience mastering their own projects. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5565 - Re-recording Mixing for Visual Media (3 Credits)
Techniques for mixing dialogue, ADR, music, sound effects, background ambiances and Foley. Different level standards and deliverables. Cross-listed with MUSC 4545. Prereq: MSRA 5535 or MSRA 5555. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MSRA 5535 or MSRA 5555.

MSRA 5575 - Graduate Surround Sound (3 Credits)
This lecture-lab course deals with surround sound in film, digital TV and DVD's. Topics include monitoring, microphone techniques, recording, mixing, mastering, delivery formats and psychoacoustics. Students work on two lab projects in the semester. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5576 - Surround Sound II (4 Credits)
Students will work on advanced surround sound projects and study mixing aesthetics, high-definition technology and authoring. Students will have advanced knowledge of these topics and produce professional, competitive material for their demo. Prereq: MSRA 5550, 5575 and 5505, or permission of instructor. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5580 - Graduate Audio Seminar I (3 Credits)
Faculty and majors of the music engineering program assemble to discuss and demonstrate issues of artistic and technical applications of recording technology. Student projects, faculty, and guest lectures provide topical focus. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5581 - Graduate Audio Seminar II (3 Credits)
Capstone project based course in which students complete professional quality projects in music production and/or post production. Students refine their engineering skills and develop new skills required for integration in the music industry such as portfolio design and resume development. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5590 - Graduate Audio Production (3 Credits)
Deals with advanced audio skills for music recording, including technical and artistic considerations. This is a required course for the MSRA degree. Max hours: 4 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 4.
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5820 - Digital Music Techniques (3 Credits)
Studies the general principles and applications of digital music technology, emphasizing the function and operation of specific computer software. Topics include digital audio workstations, MIDI sequencers, digital signal processing programs, and distribution on optical discs and computer-based mediums. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 5840 - Independent Study for MSRA (1-3 Credits)
Allows graduate students to pursue in-depth study of an audio-related topic, to be discussed with and approved by the Graduate Advisor. A final report or other tangible results will be determined on a case-by-case basis. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

MSRA 5939 - Master of Science in Recording Arts Internship (1-3 Credits)
Master of Science in Recording Arts Internship. Restrictions: Restricted to RCDA-MS majors within the College of Arts and Media. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

Typically Offered: Fall, Spring, Summer.
MSRA 6214 - Forensic Audio Analysis (3 Credits)
Students learn concepts through the application of techniques related to audio enhancement, digital media authentication, acoustic analysis, and automatic speaker recognition. The acquisition and analysis of digital evidence applying reliable methods prepares students for forensic audio analysis in the laboratory. Coreq: MSRA 6254 and admittance to Certification in Forensic Audio Analysis Program required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: MSRA 6254

MSRA 6224 - Forensic Video and Image Analysis (3 Credits)
Students learn concepts through the application of techniques related to forensic video collection and image enhancement, authentication, photogrammetry, and comparison. The acquisition and analysis of digital evidence applying reliable methods prepares students for working on forensic imagery in the laboratory. Coreq: MSRA 6264 and admittance to Certification in Forensic Video and Image Analysis Program required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Coreq: MSRA 6264

MSRA 6254 - MATLAB for Forensic Audio Analysis (1 Credit)
Advanced application of MATLAB for the forensic analysis of audio will be presented including file access, FFT and waveform plotting, and signal detection. Through the exploration of correlation and using mean quadratic difference students will be prepared for media authentication. Coreq: MSRA 6214 and admittance to Certification in Forensic Audio Analysis Program required. Max hours: 1 Credit.
Grading Basis: Letter Grade
Coreq: MSRA 6214

MSRA 6264 - MATLAB for Forensic Video and Image Analysis (1 Credit)
Advanced application of MATLAB for the forensic analysis of images will be presented covering image processing and analysis techniques. Through exploring analyses such as Photo Response Non-Uniformity and the Bi-Dimensional DFT, students are prepared for image authenticity examinations. Coreq: MSRA 6224 and admittance to Certification in Forensic Video and Image Analysis Program required. Max hours: 1 Credit.
Grading Basis: Letter Grade
Coreq: MSRA 6224

MSRA 6510 - Graduate Audio Studies Pedagogy (3 Credits)
Surveys available resources for audio education. Interdisciplinary materials in physics, acoustics, engineering, music, broadcast, medicine, psychology, multi-media, theater, and film or video are reviewed. Emphasis on design and development of new methods and materials are pursued. (MSRA graduate students only.) Prereq: MUSC 5000. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 6550 - Sound Design (4 Credits)
Deals with designing sound for live theater, film, video, television, theme parks, games and soundscapes. Focuses on using technology to achieve specific esthetic aspects of audio production. This is accomplished through lectures, listening assignments, research and lab practice. (For graduate students only.) Max hours: 4 Credits.
Grading Basis: Letter Grade

MSRA 6950 - Thesis in Professional Audio (4 Credits)
With the guidance of a thesis advisor, each candidate for the MSRA degree select an approved topic for scholarly review, research and publication. The approved materials are evaluated for written and oral defense. Prereq: MUSC 5000, 5590, 6510, 6580, 6530. Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media

MSRA 6951 - Professional Audio Portfolio Thesis (4 Credits)
With the guidance of a portfolio advisor, each candidate for the MSRA degree produce specified documentation and audio materials that reflect the career intentions of the candidate. A completed "Show kit" or professional "Demo" of the candidate's specialty are produced. The approved materials are evaluated for written, audio and oral defense. Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to RCDA-MS majors within the College of Arts and Media
Media Forensics, MS

Graduate Education Policies and Procedures apply to this program.

Introduction

The Master of Science in Media Forensics (MSMF) prepares students from various backgrounds for work in the field of forensic audio, video and image analysis, utilizing the state-of-the-art methods and technology necessary to fight crime in the digital age. Housed in the National Center for Media Forensics (NCMF), this program is unique in providing a hybrid format (online and onsite) graduate education in forensic multimedia analysis.

MSMF classes are presented in a hybrid format combining mostly online learning with a small portion of concentrated in-person classes in a two-year cohort curriculum. With a maximum of 6 credit hours per semester and 5 weeks total spent in residency over two years, this format allows for students to work full-time while pursuing the degree. Classes are comprised of online self-guided lectures, interactive learning, discussion boards, reading responses, and scheduled video conferencing. Onsite coursework provides students hands-on and practical experiences which augment and enrich the curriculum. Additionally, experiential learning activities include visits to regional crime labs and scientific conferences to understand the application of forensic media technology and laboratory procedures. This course of study allows students to complete the MSMF degree in a minimum of two and a half years.

MS Media Forensics Application

Admission to the MSMF program is competitive. The MSMF program accepts students in the fall only. Admission decisions are made by committee and are based on the entirety of the applicant’s submitted materials and the strength of the pool of applicants in each admission cycle. Admission to the program is contingent upon:

• Formal documentation of an earned bachelor’s degree in a related field. (International students must document an equivalent.) Field of prior study is open
• For international students, submission of evidence of English Language Proficiency. Please contact the Office of International Admissions (p. 43) for more information.
• Strength of application components as they relate to:
  • Scientific competency
  • Writing skills
  • Desire to work in the field of digital and multimedia forensic analysis
  • Strength of academic/professional background
  • Strength of references through letters of recommendation

Application Components

Required application components include:

• Graduate Application for Admission
• Application Fee
• Official Transcripts
• Cover Letter
• Resume
• Three (3) Letters of Recommendation
• Two (2) Writing Samples

• International Applicants Only: Evidence of English Language Proficiency (contact the Office of International Admissions for more information)

Applications that do not include all of the requirements or that include partial components are considered incomplete and will not be reviewed.

International applicants are encouraged to visit the Office of International Admissions website (https://www.ucdenver.edu/international-admissions/) for detailed information.

Application requirements are subject to change. Refer to the National Center for Media Forensics MSMF program website for detailed information and updates regarding the application process and requirements.

Curriculum

The MSMF program comprises 33 semester hours of credit: 29 hours are required courses and 4 hours are thesis. All courses must be completed with a grade of B- (2.7) or better and students must maintain at least a 3.0 cumulative GPA. Grades of C+ (2.3) or lower, or a cumulative GPA below 3.0, will result in the student’s dismissal from the program. Students are admitted to the program in the fall as a cohort, and must follow the curriculum in sequence.

Recording Arts, MSRA

Please click here (p. 227) to see general Music & Entertainment Industry Studies information.

Introduction

Recording Arts is a field that deals with all aspects of recorded music and sound art including mixing, mastering, production, sequencing, calibration, live sound reinforcement, and post-production. CU Denver Recording Art students refine skills in sound recording, aesthetics, multi-track recording, digital signal processing, automated mixing, synchronization, stereo imaging and monitoring, mastering and post-production.

Recording Arts at CU Denver recognizes the need for pedagogy, industry-oriented, and research-based degrees. Our program takes into account the student’s own interests and prepares them the best to meet their career goals. The Master of Science in Recording Arts (MSRA) has the only pedagogy track in the nation. Pedagogy is synonymous with teaching, and this program specifically includes a survey of available resources for audio education. The curriculum offers an interdisciplinary approach including physics, acoustics, audio engineering, music, broadcast, medicine, psychology, multimedia, theatre, and film/video. The program emphasizes music technology innovation, design, and new methods and materials development. Working with influential faculty mentors, students are prepared for professional portfolios, networking, and the possibility of entering into a doctoral program through specialized research, creative work, and practical experience in the vibrant arts and cultural scene of the Rocky Mountain region.

This graduate degree is designed to:

• Help audio professionals advance their careers
• Help to prepare music educators of the future
• Help to prepare music researchers for the future

In their final semester, students will create and defend a thesis or a portfolio.

• Thesis – Written research
• Portfolio – Research in conjunction with a recorded work. This could be a music recording, audio for video, or other media.

Graduate courses comprising the core of the program advance students’ artistic, pedagogical, technical, and problem-solving abilities. Elective courses allow each student to develop additional skills and knowledge in related areas, including surround sound, acoustics, studio design, digital signal processing and others.

The Department of Music & Entertainment Industry Studies encourages students from allied disciplines (music, physics, engineering, etc.) to apply. Students are not required to have their bachelor’s in recording arts; the bachelor’s degree can be from any discipline. Applicants can qualify for the MSRA program by having equivalent level preparation (e.g., work experience). Candidates without sufficient experience/training in recording arts may be required to take preparatory courses at the undergraduate level.

Note: The application process and requirements for the MSRA program differ from those listed for the media forensics emphasis.

MSRA Application Components

Admission to the MSRA program is competitive. Applications are accepted for fall-only admission to the cohort. Admission decisions are made by committee and are based on the entirety of the applicant’s submitted materials.Incomplete applications are not considered, and application requirements may vary between domestic and international students.

• Graduate Application for Admission
• In-State Tuition Classification Application (if applicable)
• Application Fee
• Entrance Examinations: (TOEFL/IELTS or other evidence of English proficiency, if applicable)
• Official Transcripts
• Three (3) Letters of Recommendation
• Application Essay
• Resume
• Portfolio

Applications that do not include all of the requirements or that include partial components are considered incomplete and will not be reviewed.

International applicants are encouraged to visit the Office of International Admissions (p. 43) website for detailed information.

Refer to the MSRA website for deadlines, detailed information and updates regarding the application process and requirements.

Graduate Education Policies and Procedures apply to this program.

MSRA 6510  Graduate Audio Studies Pedagogy

| Total Hours | 34 |

1 Students may take courses not listed here upon approval of the faculty or academic advisor.

*Students should plan to graduate in a minimum of four semesters. Students can apply for graduation in any semester (fall, spring or summer), provided they have completed the required course work. All course work must be completed with a satisfactory grade of "B" (3.0) or higher. Students should not register for thesis/portfolio unless approved by the faculty advisor.*

Overview

The College of Engineering, Design and Computing at the University of Colorado Denver provides nationally accredited engineering education programs that serve a diverse population of traditional and non-traditional students. The programs are delivered in a flexible format emphasizing experiential learning, interdisciplinary design, and leveraging of the latest digital tools.

An engineering degree opens the door to a wide range of careers and employment opportunities. The following is a brief summary of the engineering disciplines taught at CU Denver.

Bioengineering offers opportunities for interdisciplinary graduate training for master of science and doctor of philosophy degrees. Our programs are uniquely integrated with the CU Anschutz Medical Campus. Students enjoy opportunities to learn from clinicians and engineers and to perform research or medical device design in world-class hospitals and clinical research labs. Bioengineering is one of the fastest growing job markets this decade, according to the Bureau of Labor Statistics. A degree in this area provides numerous opportunities to work in health care, biomedical industry, government regulatory agencies and academia.

Civil engineering offers interesting and challenging careers in the design and construction of buildings, bridges, dams, aqueducts and other structures; in transportation systems including highways, canals, pipelines, airports, rapid transit lines, railroads and harbor facilities; in the distribution of water and the regulation of rivers; in the development of water resources for urban use, industry and land reclamation; in the control of water quality through water purification and proper waste treatment; in the construction and contracting industry; and in the problems concerned with our physical environment and the growth of cities.

Computer science offers graduates the solid foundation needed for jobs in computing and enabling technology encompassing many areas across diverse fields such as healthcare, business, natural & applied sciences, mathematics and visual arts. Career paths in computer science involve designing and implementing software, devising new computer applications and developing effective ways to solve computing problems.

Electrical engineering’s graduate program prepares students for technical leadership roles in industry, academia and government in our rapidly changing technological world. The program offers numerous specialties within electrical engineering, including computer engineering, embedded systems, electromagnetics, microwave systems, optics, electrical neuroscience engineering, control systems, communications and signal processing, power systems, smart grids, renewable energies, VLSI system design, and electron devices.

Mechanical engineering offers a wide range of interesting and challenging career opportunities in research, design, development, manufacturing, testing and marketing for either private industry or government. Mechanical engineers help develop a wide range of products such as engines, transmissions, compressors, pumps, oil field drilling rigs, missiles, space satellites, earth-moving equipment, container-manufacturing machines, medical equipment and many other products encountered in daily life.

Graduate Study in Engineering

The College of Engineering, Design and Computing offers graduate programs in bioengineering, civil engineering, computer science and engineering, electrical engineering, and mechanical engineering, as well as an interdisciplinary doctoral degree in engineering and applied science.

For information regarding courses and requirements leading to the master of science, master of engineering, or the PhD degree, see the appropriate discipline heading in this section. For general graduate admission information and policies, see the Information for Graduate Students (p. 37) section of this catalog.

TOEFL/Language Requirements

For the most up-to-date information about TOEFL/language requirements, please visit the Office of International Admissions website (https://www.ucdenver.edu/international-admissions/apply-for-admission/).
received by the relevant deadlines below. Applications with outstanding materials are considered incomplete and will be canceled unless a request for deferment to a later term is requested.

Bioengineering
- MS: July 15 (fall), Dec. 15 (spring)
- PhD: December 1 (fall admittance only)

Civil Engineering
- MS/MEng (domestic): April 15 (fall), October 15 (spring)
- PhD (domestic): March 15 (fall), September 15 (spring)
- MS/MEng/PhD (international): March 15 (fall), September 15 (spring)

Computer Science
- MS (domestic): April 15 (fall), October 15 (spring)
- CSIS PhD (domestic): March 15 (fall), September 15 (spring)
- MS/PhD (international): February 15 (fall), September 15 (spring)

Electrical Engineering
- MS/MEng (domestic): April 15 (fall), October 15 (spring)
- PhD (domestic): March 15 (fall), September 15 (spring)
- MS/MEng/PhD (international): March 15 (fall), September 15 (spring)

Mechanical Engineering
- MS/MEng (domestic): April 15 (fall), October 15 (spring)
- PhD (domestic): March 15 (fall), September 15 (spring)
- MS/MEng/PhD (international): February 15 (fall), September 15 (spring)

Engineering and Applied Science PhD
- February 15 (fall), September 15 (spring)

College of Engineering, Design and Computing Departments and Programs

Courses listed in the following curricula are typical illustrations. Changes in specific courses may be necessary to accommodate students’ needs and/or changes in institution requirements; students should take courses in logical sequence.

Departments & Programs
- Bioengineering (p. 238)
  - Assistive Technology and Inclusive Engineering Certificate (p. 242)
  - Bioengineering Dual, MS-MBA (p. 243)
  - Bioengineering, MD-MS (p. 244)
  - Bioengineering, MD-PhD (p. 245)
  - Bioengineering, MS (p. 246)
  - Bioengineering, PhD (p. 247)
  - Medical Device Design and Entrepreneurship Certificate (p. 248)
  - Neural Engineering Graduate Certificate (p. 249)
- Civil Engineering (p. 250)
  - Civil Engineering, MEng (p. 259)
  - Civil Engineering, MS (p. 262)
  - Civil Engineering, PhD (p. 265)
  - Construction Project Management Graduate Certificate (p. 266)
  - Engineering and Applied Science, PhD (p. 267)
- Geographic Information Systems and Geomatics Graduate Certificate (p. 268)
- Integrated Construction, Management + Leadership Graduate Certificate (p. 269)
- Computer Science and Engineering (p. 270)
  - Computer Science and Information Systems, PhD (p. 282)
  - Computer Science, MS (p. 283)
  - Cybersecurity and Defense Graduate Certificate (p. 284)
  - Engineering and Applied Science, PhD (p. 285)
  - Software Engineering Graduate Certificate (p. 286)
- Electrical Engineering (p. 287)
  - Electrical Engineering, MEng (p. 295)
  - Electrical Engineering, MS (p. 296)
  - Engineering and Applied Science, PhD (p. 297)
  - Engineering and Applied Science, PhD (p. 298)
- Inworks (p. 299)
  - Human-Centered Design and Innovation Graduate Certificate (p. 302)
- Mechanical Engineering (p. 303)
  - Engineering and Applied Science, PhD (p. 308)
  - Mechanical Engineering, MEng (p. 309)
  - Mechanical Engineering, MS (p. 310)
**Bioengineering**

**Chair:** Kristyn Masters  
**Office:** Bioscience 2, Suite 100,12705 E. Montview Blvd, Aurora CO 80045  
**Telephone:** 303-724-4196  
**Fax:** 303-724-5800  
**E-mail:** bioengineering@cuanschutz.edu  
**Website:** engineering.ucdenver.edu/bioengineering (http://engineering.ucdenver.edu/bioengineering/)

**Overview**

**Mission Statement**

The Department of Bioengineering bridges the fields of engineering and medicine with a core mission of applying engineering principles and analyses to improving human health. The department will fulfill this mission by providing opportunities for training, research, and service in bioengineering to faculty, students, and residents of Colorado and the greater Rocky Mountain region.

**Program Objectives**

The Department of Bioengineering offers high-quality training in bioengineering that is both flexible and multidisciplinary. A design-based focus permeates every aspect of our training philosophy which can be summarized by the following question: what does the user want and how can I best utilize my bioengineering training to achieve this need? Our academic instruction focuses on developing core competencies in life sciences, quantitative methods, technology, and research methods.

**Graduate Program**

All graduate students begin the program with intensive study of the bioengineering core. In consultation with an advisor, each student chooses elective courses, training pathways, and research to fit talents, preparation, and career plans. Students earn the MS, MS-MBA, MD-MS, MD/PhD, or PhD degree in bioengineering with a choice of training pathways in basic research, clinical applications, or commercialization of medical technologies. Graduate Education Policies and Procedures apply to all programs. Please consult our website (ucdenver.edu/bioengineering (http://www.ucdenver.edu/bioengineering/)) for more information on admissions requirements, degree requirements, core courses, training pathways, faculty research areas and student learning outcomes.

**Admission Requirements**

1. Application
2. Application fee - $50 domestic; $75 international
3. Statement of purpose – must be an original essay submitted with application. Scanned copies will not be accepted for submission.
4. Resume – must be submitted with application  
   Bioengineering applicants must complete essay questions and an application background survey (https://engineering.ucdenver.edu/docs/libraries/provider29/college-of-engineering-and-applied-science/bioengineering/academic-program-documents/bioe_applicant_background_survey.pdf?sfvrsn=79a597b8_2). Contact the department (bioengineering@cuanschutz.edu) for more information
5. Official transcripts – we require one official copy of each previous transcript. Send e-transcripts to Graduate Admissions at graduateadmissions@ucdenver.edu
6. Letters of recommendation – three are required (two for civil engineering); a 4th is optional
7. GRE scores are not required. If choosing to submit, send scores officially through ETS using code #4875.

**Eligibility Requirements**

Applicants to the master of science in bioengineering should meet the following minimum requirements:

1. Prior GPA in most recent degree of 3.0 (B) or higher
2. Completion of a bachelor’s degree in engineering from an accredited United States institution or comparable international institution, or the provision that, in addition to the required courses, they take any missing courses at CU Denver.

All math requirements must be completed prior to matriculation. There are no exceptions to this.

**Programs**

- Assistive Technology and Inclusive Engineering Certificate (p. 242)
- Bioengineering Dual, MS-MBA (p. 243)
- Bioengineering, MD-MS (p. 244)
- Bioengineering, MD-PhD (p. 245)
- Bioengineering, MS (p. 246)
- Bioengineering, PhD (p. 247)
- Medical Device Design and Entrepreneurship Certificate (p. 248)
- Neural Engineering Graduate Certificate (p. 249)

**Faculty**

**Professors**

Robin Shandas, PhD robin.shandas@cuanschutz.edu  
Specialties: Novel methods for translational bioengineering

Keith Neeves, PhD keith.neeves@cuanschutz.edu  
Specialties: Hematology and oncology

**Associate Professors**

Richard Benninger, PhD richard.benninger@cuanschutz.edu  
Specialties: Optical microscopy, pancreatic islet biology and biophysics, diabetes

Cathy Bodine, PhD cathy.bodine@cuanschutz.edu  
Specialties: Assistive technology, rehabilitation engineering

Emily Gibson, PhD emily.gibson@cuanschutz.edu  
Specialties: Microfluidics technology, optical microscopy, and spectroscopy
Kendall Hunter, PhD kendall.hunter@cuanschutz.edu
Specialties: Soft tissue mechanics, vascular and cardiac imaging diagnostics, translational biomechanics

Jeffrey Jacot, PhD jeffrey.jacot@cuanschutz.edu
Specialties: Stem cells and heart tissue engineering

Daewon Park, PhD daewon.park@cuanschutz.edu
Specialties: Biomaterials, drug delivery, tissue engineering and regenerative medicine

Research Associate Professors
Richard Weir, PhD richard.weir@cuanschutz.edu
Specialties: Neural engineering, biomechatronic design, and rehabilitation engineering

Assistant Professors
Morris Huang, PhD morris.huang@cuanschutz.edu
Specialties: Assistive technology for mobility

Chelsea Magin, PhD chelsea.magin@cuanschutz.edu
Specialties: Bio-inspired materials for tissue engineering, R & D product development

Bradford Smith, PhD bradford.smith@cuanschutz.edu
Specialties: Lung structure-function relationships, optimized mechanical ventilation, and high performance computing

Assistant Research Professors
Brisa Peña, PhD brisa.penacastellanos@cuanschutz.edu
Specialties: Material science, atomic force microscopy, cardiac tissue engineering, and miRNA delivery

Instructors
Mary Bevilacqua, mary.bevilacqua@cuanschutz.edu
Specialties: Design and prototyping

Steven Lammers, PhD steven.lammers@cuanschutz.edu
Specialties: 3D printing & design, bioprintable materials, tissue engineering of 3D cellularized scaffolds

Affiliated Faculty
Students receive instruction from affiliate faculty in the University of Colorado system, including CU Boulder and the CU School of Medicine. Faculty research areas include imaging and biophotonics, cardiovascular biomechanics and hemodynamics, orthopedic biomechanics, neuromuscular control and assistive technology, surgery and urological sciences, ophthalmology, neuroscience engineering, polymers and diabetes. Please consult our website (ucdenver.edu/bioengineering) for more information.

Bioengineering (BIOE) Courses

BIOE 5010 - Cell and Molecular Biology for Bioengineers (3 Credits)
Introduction to cellular and molecular biology, with a focus on using engineering methods and literature to analyze structure and function of cells throughout lifecycle and multiple scales. Design experiments to test hypotheses. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.

BIOE 5011 - Systems Physiology for Bioengineers (3 Credits)
Use engineering principles to study key physiological systems. Topics: cardiovascular, neuroscience, urological, or renal medicine. Related engineering principles: pressure-flow relationships, stress-strain, electromechanical coupling and signal transduction. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5020 - Analytics and Machine Learning in Bioengineering (3 Credits)
This course provides mathematical tools essential for graduate level bioengineering work. Studies selected topics from probability, linear algebra, and vector calculus, with emphasis on bioengineering applications. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5021 - Numerical Methods for Engineering Analysis (3 Credits)
Provides computational skills and knowledge of numerical methods for engineering/scientific computation using Matlab. Topics: root finding, interpolation, difference and integration rules, solution of initial and boundary value ODEs, and introduction to the solution of PDEs. Prereq: Graduate standing in Bioengineering or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5039 - Mechatronics and Embedded Systems (3 Credits)
The course focuses on the design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics (Ohm's law, RLC circuits, DC and AC signals, diode and transistor circuits, operational amplifiers, and digital signals), introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems, and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic and embedded systems design. Students must design and build an embedded systems device related to assistive technology. Note: Project expenses may be incurred ($50 maximum). Cross-listed with BIOE 4039. Restriction: Restricted to graduate students in the Department of Bioengineering. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5040 - Research Methods for Bioengineers (2 Credits)
This course introduces research methods that will prepare bioengineering graduate students for completing basic or translational research and communicating the results. Topics include setting expectations with mentors, finding, reading, analyzing, citing, and reviewing scientific literature, technical writing, research presentations, and responsible conduct of research. Restriction: Graduate standing in Bioengineering (MS/PhD). Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to BIOE graduate majors within the College of Engineering, Design and Computing
Typically Offered: Spring.
BIOE 5041 - Clinical Experiences for Bioengineers (1 Credit)
This course provides opportunities for clinical experiences such as observing surgeries and touring intensive care units to prepare students for clinical applications and foster collaborations with clinical practitioners. Experiences take place through the school year. Prerequisites: Graduate standing in Bioengineering (MS/PHD).
Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 2.
Typically Offered: Fall.

BIOE 5053 - Optics & Microscopy in Biomedical Research (3 Credits)
Graduate overview of optical imaging, ranging from classical microscopy to advanced non-linear techniques and includes theory, technology and applications in biomedical sciences. This will prepare students for developing and applying state-of-the-art optical imaging in their research. Cross-listed with BIOE 4053. Prereq: Grad standing or permission from the instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5054 - Regulatory Affairs (3 Credits)
This course covers standards of quality assurance and regulatory pathways that guide biomedical engineering industry. Cross-listed with BIOE 4054. Restriction: Restricted to BIOE majors or with instructor permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.

BIOE 5057 - Rehabilitation and Assistive Technology (3 Credits)
This course provides students with an overview of technologies and their use by and for persons with disabilities. Cross-listed with BIOE 4057. Restriction: Restricted to students with BIOE designation, or with instructor permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.

BIOE 5058 - Intro to Design, Disability, and Aging (3 Credits)
This course provides an introduction to the topic of disability and aging and the application of bioengineering principles for persons living with functional impairment(s) across the lifespan. Cross-listed with BIOE 4058. Restriction: Restricted to BIOE majors or with instructor permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.

BIOE 5063 - 3D Modeling for Bioengineers (3 Credits)
Course instills 3D modeling skills specific to biomedical industry. Topics include computer aided design, medical imaging, image processing, patient specific image to three-dimensional model reconstruction, non-uniform rational b-spline surfaces, finite element, computational fluid dynamics analyses, physical modeling using rapid prototyping. Restrictions: Matriculated CEDC students. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

BIOE 5064 - Advanced MatLab For Bioengineers And Life Scientists (3 Credits)
MatLab programming for graduate bioengineers and life scientists. Topics include MatLab syntax and optimization as well as techniques for working with scalars, time-series, images and multi-dimension datasets. Surface/Curve fitting, modeling, automation and classification will be covered. Cross-listed with BIOE 4064. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5067 - Human Factors and Usability Testing for Bioengineers (3 Credits)
This course provides an introduction to human factors testing and evaluation in the context of medical devices and assistive technology (AT). Particular focus will be given towards designing and applying usability testing to inform product design decisions or improvements. Topics include human factor considerations for aging and disabled populations (and their care providers), usability techniques, user experience data collection and interpretation, etc. Students will engage in hands-on human factors assessments such as contextual inquiry of surgery patients, cognitive walkthroughs with simulating disability, and product usability testing and iteration. Max hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5068 - Introduction to Medical Imaging (3 Credits)
This course will introduce graduate students to the basic physics, technologies, and clinical methodologies underlying Ultrasound, MRI, CT, PET and SPECT imaging systems. The course will include lectures, and visits to campus hospital and research imaging systems as well as hands on ultrasound labs. Cross-listed with BIOE 4068. Restriction: Restricted to Bioengineering students with graduate student status. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Bioengineering students with graduate student status.

BIOE 5069 - Advanced Biomechanics for Graduates (3 Credits)
This course covers advanced topics such as blood flow dynamics, introduction to non-linear finite deformation techniques, blood rheology, and computational techniques. Restriction: Restricted to Bioengineering students with graduate student status, or by Permission of Instructor. Cross-listed with BIOE 4069. Max hours: 3 credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

BIOE 5073 - Neural Interfaces and Bionic Limbs (3 Credits)
This course will introduce graduate students to topics in neural interfaces (Brain machine interfaces, peripheral nerve interfaces etc), the issues involved in the design of mechatronic limb systems and the decoding algorithms used to map the neural interface to the mechatronic limb. Cross-listed with BIOE 4073. Restrictions: Matriculated CEDC students. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5074 - Introduction to Laboratory Animal Research (3 Credits)
This course provides basic theoretical and practical knowledge on the use of the most common laboratory animal species, animal models and welfare, general concepts on animal biology and husbandry, and essential principles of anesthesia, analgesia, surgery and peri operative care. Max Hours: 3 Credits.
Grading Basis: Letter Grade
BIOE 5083 - Polymers in Biomedical Applications (3 Credits)
This course will introduce graduate students to fundamental synthetic method and basic characteristics of various polymeric biomaterials and their crucial roles in different biomedical applications. It will also cover how the polymers can be modified to enhance biomedical applications. Cross-listed with BIOE 4083. Prereq: Graduate standing at CU Denver or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade

BIOE 5420 - Special Topics in Bioengineering (1-6 Credits)
Special topics of particular interest to graduate students in Bioengineering. Prereq: Graduate standing within the Department of Bioengineering or permission of instructor. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

BIOE 5840 - Independent Study in Bioengineering (1-6 Credits)
Graduate level independent study in Bioengineering with a faculty mentor. Prereq: Graduate standing within the Department of Bioengineering or permission of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

BIOE 5939 - Graduate Internship (1-6 Credits)
Department of Bioengineering Internship. Credit may not be applied toward the MS in Bioengineering degree. Enrollment by department permission only. Max Hours: 6 Credits.
Grading Basis: Letter Grade

BIOE 6655 - Foundations of Doctoring MS Years (1-5 Credits)
This course is for CU MD-MS students who are on leave of absense from SOM and wish to maintain clinical exposure and training during the leave. Prereq: Phase I & II SOM classes and graduate standing in BIOE. Repeatable. Max Hours: 20 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 20.
Restriction: Restricted to BIOE graduate majors within the College of Engineering, Design and Computing

BIOE 6950 - Masters Thesis (1-6 Credits)
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

BIOE 6960 - Master's Project (1-6 Credits)
Training for Master's Project under the supervision of faculty project advisor. Prereq: Department Consent. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.

BIOE 8990 - Doctoral Dissertation (1-10 Credits)
Research for doctoral dissertation under supervision of faculty advisor. Prerequisites: Consent of dissertation advisor. Restrictions: Satisfactory progress toward PhD-Bioengineering Degree. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
Assistive Technology and Inclusive Engineering Certificate

Introduction

A Rehabilitation Engineering Technologist (RET) is a person who applies engineering principles to the design, modification, customization, fabrication, and/or integration of assistive and inclusive technologies for persons with disabilities. RESNA, the Rehabilitation Engineering and Assistive Technology Society of North America, offers an Assistive Technology Professional (ATP/RET) certification program for assistive technology professionals including engineers and technologists.

The Assistive Technology and Inclusive Engineering graduate certificate provides an in-depth introduction to the area of inclusive and assistive technologies for individuals aspiring to either work in the field of technology, disability, and/or aging into disability; and/or to sit for the national RESNA credentialing examination for one of two certifications to recognize assistive technology service providers who have met a national standard of job-based knowledge and experience.

This program directly benefits students and professionals by providing an in-depth introduction to the rapidly growing field of inclusive and assistive technologies and is responsive to industry leaders who have requested this certificate program.

The certificate is open to students from inside and outside the university as well as professionals interested in furthering their education in this fast-growing area.

Admission Requirements:
Degree: BA/BS
GPA: A minimum GPA of 3.00 is recommended

Bioengineering Dual, MS-MBA

Introduction

We offer a dual MS-MBA in partnership with the CU Denver Business School (p. 73). Please contact either program for more information and advising. Students registered in other MS programs in the University of Colorado system may be able to combine the two degrees; please contact us at bioengineering@cuanschutz.edu for more information.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. The MS program is 30 credit hours.
2. Fifteen credit hours of core coursework
3. Fifteen credit hours of research and electives.
   • This must include three to six credit hours of project or thesis (BIOE 6960 or BIOE 6950) plus nine to twelve credit hours of elective courses.
4. Students may not exceed 6 credit hours for project/thesis.
5. Students must maintain a cumulative GPA of 3.0. This will include all coursework that students take during their graduate program, regardless of where the courses are taught (Anschutz Medical Campus, Denver Campus or the Boulder Campus) or what level they are (graduate or undergraduate). Please note that CU Denver does not allow grade replacement: all grades count towards cumulative GPA.
6. A passing grade as defined by the Graduate Education is a B- or better; only courses with a grade of "B-" or better will count towards the final degree requirements.
7. Any courses that fulfill the Certificate in Entrepreneurial Studies or the Bio-innovation and Entrepreneurship Certificate requirements can be counted as Bioengineering Free Electives (6 credits)
8. The Master’s Thesis or Project (BIOE 6950 or BIOE 6960) also fulfills the capstone requirement for the Certificate in Entrepreneurial Studies or the Bio-innovation and Entrepreneurship Certificate offered by the Jake Jabs Center for Entrepreneurship. (3 credits)
9. Students must apply and be accepted to both degrees.

More information on MBA program requirements can be found at the Business School website (https://business.ucdenver.edu/academics/mba-programs/).

To learn more about the Student Learning Outcomes for this program, please visit our website (https://engineering.ucdenver.edu/bioengineering/accreditation/).
Bioengineering, MD-MS

Introduction

We offer an MD-MS in bioengineering in partnership with the University of Colorado Anschutz Medical Campus School of Medicine (http://catalog.ucdenver.edu/cu-anschutz/schools-colleges-programs/school-medicine/). This dual degree option is available to current CU medical students only. Prospective students should contact the department at bioengineering@cuanschutz.edu as early in their medical school training program as possible for more information and advising.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

To meet the MS requirements of the dual MD/MS- BIOE, students must:

1. Complete a modified BIOE core (14 credit hours) + 1-2 electives (3-6 credit hours. Please note that exact course numbers are subject to change):
2. Complete BIOE 5020 and/or BIOE 5021 (Quantitative Core; 3-6 credit hours)
3. Complete the Technology Core (6 credit hours)
4. Complete BIOE 5040 – may satisfy the research ethics course requirement (2 credit hours)
5. Complete the elective requirement: any graduate-level class agreed to by the academic and/or research mentors
6. Conduct research and produce a project or thesis under the mentorship of an approved faculty member and earn six credit hours of BIOE 6960 or 6950 (project or thesis hours)
7. Establish a committee of at least two Graduate Faculty members to oversee the research and administer the final defense examination
8. Pass a final defense examination
9. MD/MS students will count the following classes towards their life sciences and clinical experiences core requirements, in lieu of BIOE 5041, BIOE 5010 & 5011 or equivalent:
   • Molecules to Medicine
   • Cardiovascular, Pulmonary and Renal Systems
   • Nervous System
   • Digestion, Endocrine and Metabolic

To learn more about the Student Learning Outcomes for this program, please visit our website (https://engineering.ucdenver.edu/bioengineering/accreditation/).

To review the Degree Map for this program, please visit our website (https://engineering.ucdenver.edu/bioengineering/accreditation/).
Bioengineering, MD-PhD

Introduction

For students already enrolled or accepted into the Medical Scientist Training Program (MSTP) in the School of Medicine (http://catalog.ucdenver.edu/cu-anschutz/schools-colleges-programs/school-medicine/) at the University of Colorado Anschutz Medical Campus. Degree completion in 7-8 years with highly individualized training pathway and a multidisciplinary research dissertation. Please contact us for advising at bioengineering@cuanschutz.edu.

Graduate Education Policies and Procedures apply to this program.

To learn more about the Student Learning Outcomes for this program, please visit our website (https://engineering.ucdenver.edu/bioengineering/accreditation/).
Bioengineering, MS

Introduction

The master of science degree is offered to students with an undergraduate degree in the life sciences or engineering. Students complete the degree in 18 months to two years with the choice of a project or thesis, either of which may be completed in academia or industry. Program details are available on the Department of Bioengineering website at ucdenver.edu/bioengineering (http://www.ucdenver.edu/bioengineering/).

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete 30 credit hours
   - Fifteen credit hours of core coursework
   - Fifteen credit hours of research and electives.
     - This must include three to six credit hours of project or thesis (BIOE 6960 or BIOE 6950) plus nine to twelve credit hours of elective courses.

2. Students may not exceed 6 credit hours for project/thesis.

3. Students must maintain a cumulative GPA of 3.0. This will include all coursework that students take during their graduate program, regardless of where the courses are taught (Anschutz Medical Campus, Denver Campus or the Boulder Campus) or what level they are (graduate or undergraduate). Please note that CU Denver does not allow grade replacement: all grades count towards cumulative GPA.

4. A passing grade as defined by Graduate Education is a B- or better; only courses with a grade of "B-" or better will count towards the final degree requirements.

To learn more about the Student Learning Outcomes for this program, please visit our website (https://engineering.ucdenver.edu/bioengineering/accreditation/).

To review the Degree Map for this program, please visit our website (https://engineering.ucdenver.edu/bioengineering/graduate-programs/ms-in-bioengineering/#ac-resources-for-current-students-3).
Bioengineering, PhD

Introduction
The PhD is offered to students with an undergraduate or master’s degree in engineering or the life sciences. Students complete the degree in three to five years with a highly individualized training pathway. All PhD students complete a dissertation, which may have an industry component.

Visit our website ucdenver.edu/bioengineering or contact us at bioengineering@cuanschutz.edu for more information.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

The PhD in bioengineering requires 21 credits of didactic coursework, 30 credits of research coursework, and 9 credits of electives.

• 6 credits of life sciences core
• 6 credits of quantitative core
• 6 credits of technology core
• 3 credits of research and clinical core
• 9 credits of electives
• 30 credits of research

To learn more about the Student Learning Outcomes for this program, please visit our website. (https://engineering.ucdenver.edu/bioengineering/accreditation/)

To review the Degree Map for this program, please visit our website (https://engineering.ucdenver.edu/bioengineering/graduate-programs/phd-in-bioengineering/#ac-resources-for-current-students-3).
Medical Device Design and Entrepreneurship Certificate

Introduction

This Certificate provides an in-depth introduction to the area of medical device design and entrepreneurship. Learning goals are designed around the idea that there is a common set of skills and knowledge that successful entrepreneurs possess. In this program, students explore the key ingredients needed to develop value in medical devices. Students will work directly with experienced mentors to learn the practical skills for success in this space. The certificate culminates in a semester-long project focusing on generated deeper understanding of one important area within medical device entrepreneurship.

Ongoing / new projects are available on: New Device for Microbiome Sampling; New Surgical Instruments for Hip Arthroscopy; Development of a Business Plan around a Novel Method for Evaluating Reflux Disease; New Devices for Vascular Embolization; Biochemical Sensors for More Sensitive Cancer Detection; Minimally Invasive Techniques to Characterize GI Inflammation in COVID-19; Simulation Tools to Optimize Battlefield Triage; and many others. Students are welcome to propose their own project as well.

Admissions

Anyone who is interested in a graduate certificate is eligible to apply. Applicants must have a BA/BS and a recommended GPA of 3.0.

Certificate Requirements

The graduate certificate in medical device design and entrepreneurship includes nine credits of coursework and three credits of project work.

Neural Engineering Graduate Certificate

Introduction

The certificate in neural engineering will provide students with focused knowledge in this growing sub-discipline of bioengineering, with a focus on use of engineering techniques to understand, repair, replace, or enhance neural systems. The certificate will provide students with an in depth introduction to cellular and systems neuroscience, neural interfaces, neuroimaging, and neurocomputation. Learning goals are designed to prepare students to work in industry or academia in this fast-paced and growing field. Instruction will be provided under experienced world-class faculty to gain expertise in current state-of-the-art technologies. The certificate has elective course options to allow the student to develop a deeper understanding of a particular focus area within neural engineering.

Admissions

The certificate is twelve credit hours and is open to all graduate students in Engineering or Neuroscience at University of Colorado Denver | Anschutz Medical Campus.

Certificate Requirements

Civil Engineering

Chair: Kevin L. Rens
Office: North Classroom 3037
Telephone: 303-315-7160
Email: civilengineering@ucdenver.edu
Website: engineering.ucdenver.edu/civil

Overview
Mission Statement
The mission of the Department of Civil Engineering:

• deliver high-quality comprehensive degree programs (BS, MS, MEng, PhD, EAS PhD) to all of our students at both the undergraduate and graduate levels
• matriculate students who excel in professional practice and leadership and who possess compassion and respect for people of all cultural backgrounds
• teach our classes with excellence, whether in a traditional classroom setting or online
• offer our students state-of-the-art laboratories, equipment and classrooms with the latest technology needed for a complete learning experience
• develop ambitious and innovative research programs involving both faculty and students through funding from federal, state and local sources
• provide supportive mentoring and guidance to our students through teaching, research and advising
• produce students who can work as leading professionals in civil engineering and in many other fields for which civil engineering knowledge can be a foundation

Civil Engineering Graduate Admissions
Information
Requirements for Admission
All engineering graduate applicants must submit the following materials.

• Application
• Application fee – $50 domestic; $75 international
• Statement of purpose – must be an original essay submitted with application. Scanned copies will not be accepted for submission.
• Resume – must be submitted with application
• Official transcripts – we require one official copy of each previous transcript. Send e-transcripts to Graduate Admissions at graduateadmissions@ucdenver.edu
• Letters of recommendation – two are required; a 3rd is optional
• Official GRE scores – Not required. If choosing to submit, send scores officially through ETS using code #4875.

Notes:
1. Written application materials submitted are scanned for plagiarism and are added to a local database used for plagiarism detection.
2. Funding is not guaranteed. All students should seek additional, external resources to fund their studies.

English Language Proficiency (ELP) requirements
In addition to the above requirements, applicants earning from non-English speaking countries need to demonstrate English language proficiency. Please visit International Admissions Graduate Admissions Process page (https://www.ucdenver.edu/international-admissions/apply-for-admission/graduate/) for ELP delivery instructions and additional information.

Application deadlines
Applicants must make arrangements to ensure all their materials (including transcripts, references, and any required test scores) are received by the relevant deadlines below. Applications with outstanding materials are considered incomplete and will be canceled unless a request for deferment to a later term is requested.

Programs

• Civil Engineering, MEng (p. 259)
• Civil Engineering, MS (p. 262)
• Civil Engineering, PhD (p. 265)
• Construction Project Management Graduate Certificate (p. 266)
• Engineering and Applied Science, PhD (p. 267)
• Geographic Information Systems and Geomatics Graduate Certificate (p. 268)
• Integrated Construction, Management + Leadership Graduate Certificate (p. 269)

Faculty
Professors:
Caroline Clevenger, PhD, Stanford University, PE, RA-Colorado
Yail Jimmy Kim, PhD, Queen’s University, PE-Canada
Wesley Marshall, PhD, University of Connecticut, PE-Connecticut
David C. Mays, PhD, University of California at Berkeley, PE-Colorado, California
Kevin L. Rens, PhD, Iowa State University, PE-Colorado

Associate Professors:
Arunprakash Karunanithi, PhD, University of Connecticut
Civil Engineering (CVEN)

CVEN 5025 - Autocad Civil 3d & Advanced Civil Engineering Graphics (3 Credits)
Lectures target civil engineering industry specific site information modeling software and geospatial industry specific geographical information systems software to elevate students’ knowledge of each software to an in-depth understanding. Laboratory exercises will focus on civil drafting and design, producing documentation, and general project workflows. Additional laboratory exercises will focus on geospatial data creation, data management, and cartographic display. Prereq: CVEN 1025. Max Hours: 3 Credits. Grading Basis: Letter Grade. Prereq: CVEN 1025

CVEN 5087 - Engineering Contracts (3 Credits)
Laws met by the practicing engineer, types of contracts, specification writing, laws on contracts, agency, partnership, sales and property, with primary emphasis on rights and duties of the engineer. Cross-listed with CVEN 4087. Max Hours: 3 Credits. Grading Basis: Letter Grade. Prereq: CVEN 1025

CVEN 5110 - Advanced Structural Classical Analysis (3 Credits)
Understanding classical hand-solved analysis techniques in civil and structural engineering. Methods to be studied include: Moment Area, Conjugate Beam, Virtual Work, Stiffness Method, Force Method, Slope Deflection, and Moment Distribution. Prerequisite: CVEN 3505 with B- or better or graduate standing. Max Hours: 3 Credits. Grading Basis: Letter Grade. Prereq: CVEN 3505 with B- or better or graduate standing.

CVEN 5111 - Structural Dynamics (3 Credits)
Vibration and dynamic response of simple linear and nonlinear structures to periodic and general disturbing forces. Frequency domain analysis, response analysis of multi-degree-of-freedom systems. Wind and earthquake effects. Prereq: CVEN 3505 with a B- or higher or graduate standing. Max Hours: 3 Credits. Grading Basis: Letter Grade. Prereq: CVEN 3505 with a B- or higher or graduate standing.

CVEN 5121 - Structural Design Loads (3 Credits)
The course will review the probabilistic approach for load determination used in modern building codes from theoretical and applied perspectives. The course is intended to study design dead loads, live loads, snow loads, earthquake loads, wind loads, construction loads, and load combinations for buildings. There will be off-campus events at times other than regular class hours. Other topics may be treated as time permits. Prereq: CVEN 3505 with a C- or higher or graduate standing. Max hours: 3 Credits. Grading Basis: Letter Grade. Prereq: CVEN 3505 with a C- or higher or graduate standing (GRAD or NDGR).

CVEN 5121 - Intermediate Mechanics of Materials (3 Credits)
Intermediate-level course in the mechanics of deformable bodies. Plane stress and strain; stress-strain relation with emphasis on elastic and inelastic behavior of members, and theories of failure. Discussion of basic methods of structural mechanics, with applications to asymmetric and curved beams, thick walled pressure vessels, torsion of members of noncircular section, and other selected problems in stress analysis. Prereq: CVEN 3121 or MECH 3043 and MATH 3191 and 3200 or MATH 3195 with a C- or higher, or graduate standing. Max Hours: 3 Credits. Grading Basis: Letter Grade. Prereq: CVEN 3505 or graduate standing or instructor permission.

CVEN 5333 - Surface Water Hydrology (3 Credits)
Fundamentals of hydrology emphasizing surface water processes. Topics include the hydrologic cycle, frequency analysis, drought management, flood routing, rainfall-runoff relationships (rational method, unit hydrograph, and hydrologic software) and hydrologic design. Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission. Max Hours: 3 Credits. Grading Basis: Letter Grade. Prereq: CVEN 3313 or graduate standing or instructor permission.

CVEN 5334 - Groundwater Hydrology (3 Credits)
Topics include groundwater occurrence, hydrologic cycle and budget, interactions with surface waters, principles of groundwater flow, well hydraulics, well field design, regional flow systems, water and pollutant chemistry, computer modeling and groundwater management. Emphasis is on quantitative analysis methods for groundwater resource inventory, design and management. Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission. Max Hours: 3 Credits. Grading Basis: Letter Grade. Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission.

CVEN 5335 - Vadose Zone Hydrology (3 Credits)
Engineering analysis of the vadose zone, the unsaturated porous media linking the earth surface to groundwater. Darcy’s law for flow. Richards equation for moisture content. The advection-dispersion equation for solutes. Analytical solutions and numerical modeling applied to infiltration, evaporation, drainage, and subsurface remediation. Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission. Max Hours: 3 Credits. Grading Basis: Letter Grade. Prereq: B- or better in CVEN 3313 or graduate standing or instructor permission.
CVEN 5343 - Open Channel Hydraulics (3 Credits)
Engineering analysis and design of natural and artificial open channels. Application of uniform flow concept to design of erodible and non-erodible channels. Application of energy and momentum principles to conditions of gradually varied flow, spatially varied flow and rapidly varied flow. Prereq: CVEN 3323 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3323 with a C- or better or graduate standing (GRAD or NDGR).

CVEN 5381 - Introduction to Geographic Information Systems (3 Credits)
Provides an overview exposure and experience with various aspects of GIS technology and its uses for natural resource and infrastructure, planning, design and management. This course involves a survey of GIS software and hardware, review of cartographic mapping principles, hands-on applications to environmental impact assessment, municipal facilities management, transportation, water resources and demographics. GIS project management factors are addressed. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381 with a B- or better OR graduate standing.

CVEN 5382 - Geospatial Data Development (3 Credits)
This second GIS course builds on the introductory course and addresses principles and technologies for development and conversion of spatial databases, including photogrammetry, surveying and geodesy, coordinate systems and transformations, and remote sensing. Prereq: CVEN 5381 with a B- or better OR graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381 with a B- or better OR graduate standing.

CVEN 5383 - GIS Analysis – Theory and Practice (3 Credits)
This third course reviews GIS software functions and terminology, including data entry (input, editing), manipulation (projection, merge, window, aggregate), analysis (map algebra, overlay, Boolean, interpolation network, measurements, distance, terrain modeling, statistical analysis), query (spatial, attribute), and display/reporting. Integration of various domain-specific systems analysis models with GIS databases is also addressed. Laboratory activities involve programming applications using available GIS. Prereq: CVEN 5381. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381

CVEN 5384 - GIS Project Management (3 Credits)
This course explains how to build a foundation for GIS project success and deliver results. Topics include data governance, administration of technical infrastructure, managing roles and skills, key leadership concepts, and project management methodologies like Agile/Scrum. Best practices and real world applications are discussed. Also addressed are issues of GIS institutional acceptance, the role of computerized spatial data systems in decision-making, application of planning techniques for accomplishing resource goals, and administrative structures that enhance efficiency of use. Prereq: CVEN 5381 with a B- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381 with a B- or better OR graduate standing.

CVEN 5385 - GIS Relational Database Systems (3 Credits)
Introduces relational database management system concepts with emphasis on GIS. Includes examination of relational database systems from conceptual design through relational schema design and physical implementation. Topics include SQL, database design and implementation for large database systems, transaction management, concurrency control, distributed database management systems and the interaction and progressive integration of GIS technologies and RDBMS technologies. Prereq or Coreq: CVEN 5381 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq or Coreq: CVEN 5381 or graduate standing.

CVEN 5387 - Advanced Remote Sensing (3 Credits)
Addresses remote sensing concepts including 1) imaging sensors and geo-referencing; 2) image processing for radiometric, multi-spectral image enhancement, and multi-sensor image fusion; and 3) multi-spectral image classification, including feature extraction, supervised and unsupervised classification, and extensions to hyper-spectral data. Prereq: CVEN 5382 with a B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5382 with a B- or better OR graduate standing.

CVEN 5390 - Interactive Web Mapping GIS (3 Credits)
This course introduces students to designing, creating, delivering, and using interactive web maps. Many people rely daily on web maps to direct us from point A to point B and more. After starting with a broad introductory background, this is a technical hands-on course in which students use several open source (FOSS) technologies. Prereq: CVEN 5381 or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381 or graduate standing (GRAD or NDGR).

CVEN 5391 - Introduction to Geomatics (3 Credits)
This course presents the concepts of Geomatics along with spatial data, tools, and their connection. This course covers spatial data collection methods, data assessment, and processing. The course also covers projections, methods of coordinate conversion and transformation, and data transfer across different spatial analysis platforms. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5381 or graduate standing (GRAD or NDGR).

CVEN 5392 - Unmanned Aerial Systems (3 Credits)
This course presents concepts and practical methods of using Unmanned Aerial Vehicles for engineering projects. The course covers mission planning, operations, field data collection and processing, and data analysis. Legal and ethical considerations are also covered, as well as the relative costs and benefits of using UAV. Prereq: CVEN 5391. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5391

CVEN 5395 - GPS/GNSS (3 Credits)
This course presents the practical concepts and implications of using GPS/GNSS for engineering projects. The course covers a variety of techniques for field data collection, processing, and data analysis. The course emphasis is on changes that are occurring because of using GPS/GNSS in the field. Prereq: CVEN 5391. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5391
CVEN 5396 - HDS/LIDAR Tools & Data Analyses (3 Credits)
High Definition Surveying (HDS) scanners are extremely reliable and accurate geospatial data collection devices for surveyors, GIS analysts, engineers, and planners. The goal of this unique course is to present the instrumentation and technological principals used in data collection, project phases, data processing and analyses. This course is designed to provide information and practical skills for students wanting to learn how to plan and execute terrestrial LIDAR data collection projects with HDS scanners and HDS data processing software. Max hours: 3 Credits.
Grading Basis: Letter Grade

CVEN 5397 - Unmanned Aerial Systems Data processing (3 Credits)
This course will provide information and practical skills for unmanned aerial systems data processing and analyses. The course focuses on sensor selection, ground control, data processing, and data analyses. Prereq: CVEN 5391 and CVEN 5392. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5391 and CVEN 5392

CVEN 5401 - Introduction to Environmental Engineering (3 Credits)
Introduces students to the broad field of environmental engineering. Topics include essential chemical, biological, and risk assessment concepts needed for addressing environmental problems. Major unit operations and processes used for treating wastewater and potable drinking water. An overview of technologies used for treating particulate and gaseous air pollutants, managing solid wastes, and remediating hazardous wastes. The course also introduces environmental sustainability, green engineering, life cycle assessment and other systems oriented concepts. Includes graduate-level analysis, modeling, or reflection on the refereed literature. Prereq: CHEM 1130, CHEM 2031, or ENGR 1130, and Graduate standing or permission of instructor. Cross-listed with CVEN 3401. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 1130, CHEM 2031, or ENGR 1130 or Graduate standing or instructor permission.

CVEN 5402 - Contaminant Fate and Transport (3 Credits)
Provides unified understanding of fundamental physical, chemical and biological processes that govern the transport and fate of pollutants in environmental systems - water, air and subsurface. The course focuses on multimedia modeling and model solution methods. The course also introduces exposure and risk assessment techniques. Prereq: CHEM 1130, CHEM 2031, or ENGR 1130 or graduate standing or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 1130, CHEM 2031, or ENGR 1130 or Graduate standing or instructor permission.

CVEN 5403 - Environmental Regulations and Management Systems (3 Credits)
Students will receive an overview and understanding of major environmental laws and will be introduced to legal concepts used to develop environmental laws. In addition, students will learn about environmental management systems and their applications to environmental problems. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate standing majors in the College of Engineering, Design and Computing

CVEN 5404 - Water and Wastewater Treatment (3 Credits)
Water and wastewater treatment, including aqueous chemistry (equilibrium, reaction kinetics, redox reactions, and acid-base equilibria), physicochemical processes (sedimentation, filtration, adsorption, membrane separation), and biological processes (applied microbiology, reactor configuration, waste-to-energy technology). Prereq: CHEM 1130, CHEM 2031, ENGR 1130, graduate standing or instructor permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 1130, CHEM 2031, or ENGR 1130 or Graduate standing or instructor permission.

CVEN 5405 - Environmental Life Cycle Assessment (3 Credits)
This course covers cradle-to-grave systems thinking and focuses on quantitative methods for environmental systems modeling, analysis and assessment. The primary method covered is life cycle assessment (LCA). The students will learn the various steps for conducting a process-based LCA including goal and scope definition, life cycle inventory (LCI), life cycle impact assessment (LCIA) and interpretation. For a broader life cycle perspective Economic Input-Output LCA (EIO-LCA) will be introduced. Emphasis will also be placed on framing the LCA analysis around attributional (technology/process) versus consequential (policy/decision) focus. Mathematical techniques for uncertainty & sensitivity analysis, such as Monte Carlo simulations will be covered. Students will be exposed to several LCA case studies. Prereq: Graduate standing or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

CVEN 5406 - Engineering and Science Informatics (3 Credits)
Students will learn applied, basic statistics & probability concepts and provide experience in the correct use and interpretation of those techniques. The course is designed in such a way that any graduate or undergraduate level student wanting to learn data analysis will benefit. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

CVEN 5407 - Complex Systems Methods (3 Credits)
This graduate course introduces nonlinear dynamics, information theory, and network analysis in an environmental engineering, earth sciences, and sustainability context. Techniques will be applied to analyze environmental and weather data in addition to other examples relevant to engineering and critical zone science. Restriction: Restricted to graduate standing or with instructor's permission. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

CVEN 5426 - Pipe Network and Sewer Design (3 Credits)
Design of pressurized pipe networks for water supply and sanitary sewers for wastewater collection. Topics include the civil engineering design process, estimation of water and wastewater design loads, and design of pressurized pipe networks and sanitary sewers including pump selection, service reservoirs, lift stations, and relevant software. Design project and field trip required. Includes graduate-level analysis, modeling, or reflection on the refereed literature. Cross-listed with CVEN 4426. Prereq: CVEN 3313 and Prereq or Coreq: ENGR 1100 OR graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3313 and Prereq or Coreq: ENGR 1100 OR graduate standing.
CVEN 5427 - Storm Water System Design (3 Credits)
This course covers urban watershed analysis, design rainfall and hydrologic losses, flood frequency and design event, rational method for peak runoff prediction, street hydraulic capacity and safety, culvert hydraulics, street inlet collection system, and storm sewer system design and flow analysis. Includes graduate-level analysis, modeling, or reflection on the refereed literature. Prereq: CVEN 3323 with a C- or better or graduate standing. Cross-listed with CVEN 4427. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: CVEN 3323 with a C- or better or graduate standing (GRAD or NDGR).

CVEN 5434 - Biological Treatment Processes (3 Credits)
A comprehensive course that covers the theory and application of biological processes used in water quality engineering, with an emphasis on state-of-the-art water pollution control and waste-to-energy technologies. The initial lectures will introduce material on microbial energetics, diversity, and kinetics. The reminder of the course will involve the application of fundamental principles to treatment and energy recovery processes, including bioreactor configurations and design considerations. Prereq: Graduate standing or permission of instructor. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: CVEN 3323 with a C- or better or graduate standing (GRAD or NDGR).

CVEN 5460 - Introduction to Sustainable Urban Infrastructure (3 Credits)
This course takes a systems approach to urban infrastructures that deliver critical materials to cities; primarily water, energy, transportation, buildings, and food systems. The focus is on the current state of sustainable development, cities, and infrastructure systems, exploring sustainability strategies and measuring their effectiveness, and analyzing implementation and diffusion of sustainability strategies. Cross-listed with URPL 6399. Prereq: Graduate standing or instructor permission. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to graduate standing majors in the College of Engineering, Design and Computing

CVEN 5464 - Sustainability and Climate Change (3 Credits)
This course explores environmental sustainability in the context of climate change, emphasizing feedbacks and interactions within the climate-ecosystem-water-energy-food system. Course topics include climate and ecosystem modeling, climate data analysis, and testing students' assumptions and inferences regarding various sustainability topics. Prereq: Graduate standing or instructor permission. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CVEN 5515 - Introduction to Finite Element Analysis (3 Credits)
Systematic formulation and application of the finite element approximation to the solution of engineering problems. Topics include one- and two-dimensional elasticity problems, two-dimensional heat flow and irrotational fluid flow. Elements considered include triangular and quadrilateral elements formulated by elementary and isoparametric techniques. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CVEN 5520 - Structural Engineering and the Ocean Environment (3 Credits)
This course explores the design of structures for coastal and ocean resilience within the broader context of climate change adaptation. The following subjects will be introduced: coastal and oceanic wave dynamics; hydrodynamic forces on coastal structures and methods for attenuation; analysis and design of floating structures. Prereq: MATH 2421 with a C- or better and CVEN 3121 or MECH 3043 with a C- or better OR graduate standing (any program, including non-degree). Cross-listed with CVEN 4520. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: MATH 2421 with a C- or better and CVEN 3121 or MECH 3043 with a C- or better OR graduate standing (any program, including non-degree).

CVEN 5540 - Masonry Design (3 Credits)
The course will review the probabilistic approach for load determination used in modern building codes from theoretical and applied perspectives. The course is intended to study design dead loads, live loads, snow loads, earthquake loads, wind loads, construction loads, and load combinations for buildings. There will be off-campus events at times other than regular class hours. Other topics may be treated as time permits. Prereq or Coreq: CVEN 4585 or graduate standing. Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq/Coreq: CVEN 4585 or graduate standing.

CVEN 5550 - Highway Bridge Design (3 Credits)
Design of highway bridges in accordance with the ASSHTO LRFD Bridge Design Specification. Topic coverage includes bridge planning, construction materials in bridges, bridge systems, design loads, structural modeling and analysis, design of concrete deck system, and design of concrete and steel superstructures. Prereq: CVEN 4575 and CVEN 4585 with a C- or better or graduate standing. Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq: CVEN 4575 and CVEN 4585 with a C- or better or graduate standing.

CVEN 5555 - Advanced Timber Structure Design (3 Credits)
Design of wood framing systems including beams, columns, trusses, and diaphragms. Wood as a material, framing terminology, connection design, structural composite lumber, glued-laminated members, and plywood are covered. The course will emphasize on preparing students for a career in structural engineering. Prereq: Graduate Standing or (CVEN 3505 and 3141 with a C- or higher and Civil Engineering major). Cross-listed with CVEN 4565. Max hours: 3 Credits. Grading Basis: Letter Grade
Prerequisite: Graduate Standing or (CVEN 3505 and 3141 with a C- or higher and Civil Engineering Majors.)

CVEN 5557 - Advanced Topics in Structural Steel Design (3 Credits)
Plate buckling, plate girder design and other topics determined by class interest. Prereq: CVEN 4575 with a C- or better or graduate standing. Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq: CVEN 4575 with a C- or better or graduate standing.

CVEN 5558 - Advanced Topics in Reinforced Concrete (3 Credits)
Advanced topics relating to design and analysis of reinforced concrete structures. Prereq: CVEN 4585. Max Hours: 3 Credits. Grading Basis: Letter Grade
Prereq: CVEN 4585
CVEN 5590 - Design of Prestressed Concrete (3 Credits)
To learn the basic concepts of analysis and design of prestressed concrete, which is reinforced concrete in which steel is tensioned against the concrete, thereby introducing compression in concrete and hence overcoming the tensile weakness of concrete relative to its compressive strength. Cross-listed with CVEN 4590. Prereq: CVEN 4585 with a C- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 4585 with a C- or better or graduate standing.

CVEN 5591 - Design of Composite Structures (3 Credits)
The objective of this course is to provide engineering students with an overall awareness of the application and design of composite structures. Practical examples are discussed based on theory. Prereq: CVEN 4585 with a C- or better or graduate standing. Cross-listed with CVEN 4591.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 4585 with a C- or better or graduate standing.

CVEN 5592 - Computer-Aided Structural Analysis and Design (3 Credits)
The objective of this course is to introduce students to the fundamentals of computer-aided structural analysis and design. The course emphasizes different theoretical formulations of computational mechanics and the practical use of computer programs used worldwide in the structural engineering profession. Emphasis is also placed on techniques to check the reliability and quality of solutions. Prereq: CVEN 3505 with a C- or better or graduate standing. Cross-listed with CVEN 4592.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3505 with a C- or higher or graduate standing (GRAD or NDGR).

CVEN 5602 - Advanced Highway Design (3 Credits)
This course delves into the art and science of designing sustainable and context sensitive street and highway facilities. Topics include road classification, transportation planning, road alignments, cross-section design, bicycle and pedestrian facilities, intersections, and street network design. Such details are a focus of the course; however, the overarching theme reflects upon the social, economic, and environmental implications of highways and as well as proper integration into the overall transportation system. Prereq: CVEN 3602 and CVEN 3718 with a B- or better or graduate standing or instructor permission. Cross-listed with CVEN 4602.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3602 and CVEN 3718 with a B- or better or graduate standing or instructor permission. Typically Offered: Fall.

CVEN 5611 - Transportation Engineering Statistics (3 Credits)
Covers statistical analysis methods for engineering studies in general, and for highway accident and traffic flow data in particular. Topics include data needs, sampling designs, survey methods, hypothesis testing, tests of proportions, non-parametric tests, analysis of variance, multivariate regression, and other tests of fit. Introductory overview of state and federal accident databases. Comparisons of accident rates by highway type, vehicle speeds, vehicle types, weather conditions and other factors also presented. Restriction: Graduate standing majors in the College of Engineering, Design and Computing or instructor permission. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate standing majors in the College of Engineering, Design and Computing

CVEN 5612 - Traffic Impact Assessment (3 Credits)
Covers (1) procedures to satisfy state and local requirements for transportation impact studies, (2) methods to perform trip generation, distribution, and traffic assignment for impact analyses, and (3) analysis of transportation impacts on residential communities, mode choice, regional business (downtown or suburban), peak and off-peak travel times, noise, safety, parking and pedestrians. A course project requires students to develop an application of analysis software to a case study area. Prereq: CVEN 3602 with a B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3602 with a B- or better or graduate standing.

CVEN 5621 - Highway Capacity Analysis (3 Credits)
Covers the principles and applications of highway capacity analysis for freeways and arterials, ramps and interchanges, weave and merge sections, signalized and unsignalized intersections, roundabouts, pedestrian areas and transit. Emphasis is on level-of-service analysis procedures in the Highway Capacity Manual, although other approaches are also discussed. Additional topics include roadway characteristics, vehicle dynamics, human factors, speed and volume studies, travel time surveys and traffic flow characteristics. Prereq: CVEN 3602 with a B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3602 with a B- or better or graduate standing.

CVEN 5622 - Traffic Operations and Control (3 Credits)
Covers principles of traffic flow and analysis methods for surface street traffic systems. Emphasis is on network modeling and simulation of coordinated signal systems, together with unsignalized intersections and freeway junctions using modern software tools. Additional topics include alternative signal timing plans, signal controllers, vehicle detection systems for volume, speed, occupancy and ramp metering. A course project requires students to develop and apply modeling software to a case study area. Prereq: CVEN 5621 with a B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5621 with a B- or better or graduate standing.

CVEN 5631 - Transport Modeling and Big Data (3 Credits)
This course is an introduction to the models, frameworks and techniques used in estimating demand for passenger travel across modes and regions. The goal is to provide you an overview of the different steps involved in traditional travel demand forecasting methods and then delve into newer "big" data sources and methods that will allow us to observe and analyze travel in completely new ways. We will also briefly cover sampling techniques and survey design as part of data collection for estimation of travel demand. Prereq: Graduate standing or any statistics course with a C- or better(MATH 2830, 3800, CVEN 3611, ELEC 3817, or BANA 2010). Cross-listed with CVEN 4631.
Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing or any statistics course with a C- or better(MATH 2830, 3800, CVEN 3611, ELEC 3817, or BANA 2010).

CVEN 5632 - Traffic Impact Assessment (3 Credits)
Covers the principles and applications of highway capacity analysis for freeways and arterials, ramps and interchanges, weave and merge sections, signalized and unsignalized intersections, roundabouts, pedestrian areas and transit. Emphasis is on level-of-service analysis procedures in the Highway Capacity Manual, although other approaches are also discussed. Additional topics include roadway characteristics, vehicle dynamics, human factors, speed and volume studies, travel time surveys and traffic flow characteristics. Prereq: CVEN 3602 with a B- or better or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing or any statistics course with a C- or better(MATH 2830, 3800, CVEN 3611, ELEC 3817, or BANA 2010).

CVEN 5633 - Sustainable Transportation Systems (3 Credits)
This course examines notable topics in sustainable transportation: demystifies conventional transportation engineering methods; and explores empirical examples of why such methods are often misguided. The intent is to enlighten engineering students and help support planning/policy students interested in transportation sustainability. Restriction: Graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)
Standing.

Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate
Grading Basis: Letter Grade
Hours: 3 Credits.

of consolidation and critical state concept. Special attention is directed
to laboratory and inference tests to examine the validity of shear
strength and compressibility theories and their application to stability
settlement analyses. Prereq: CVEN 3708 or 3718, and CVEN 4718 or
4728, or Graduate Standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate
Standing.

CVEN 5719 - Design and Construction of Geosynthetic-Reinforced Soil
Structures (3 Credits)
Theory of reinforced soil; mechanical and hydraulic properties of
geosynthetics; soil-geosynthetic interaction behavior; design concepts
of GRS structures; design and construction of GRS retaining walls;
design and construction of GRS embankments and slopes; design and
construction of GRS foundations. Prereq: CVEN 5708. Max Hours: 3
Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5708

CVEN 5738 - Advanced Soils Engineering (3 Credits)
A unified treatment of the foundation of soil engineering analysis. Topics
include stress-strain-strength of soils; generalized limiting equilibrium
analysis; stability analyses of earth-retaining structures, slopes, and
shallow foundations; probabilistic approach of stability assessment;
computation of settlement of foundations in sand and clay and time-rate
of consolidation and critical state concept. Special attention is directed
toward the illustration of theory through practical examples. Prereq:
CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate Standing. Max
Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate
Standing.

CVEN 5718 - Engineering Properties of Soils (3 Credits)
Engineering properties of soils, including index properties, permeability,
stress-strain behaviors, shear strength, compressibility, critical state soil
models and their application in interpreting soil behaviors. Attention also
is directed to laboratory and in situ tests to examine the validity of shear
strength and compressibility theories and their application to stability
settlement analysis. Prereq: CVEN 3708 or 3718, and CVEN 4718 or
4728, or Graduate Standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate
Standing.

CVEN 5662 - Transportation System Safety (3 Credits)
This is a graduate-level course on road safety that will: investigate
contemporary safety analysis techniques; highlight the disconnect
between the current safety paradigm and actual safety outcomes; cover
drive, bicyclist and pedestrian safety concerns; and discuss notable
efforts such as Vision Zero. Restriction: Graduate standing. Max Hours: 3
Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CVEN 5708 - Advanced Soils Engineering (3 Credits)
A unified treatment of the foundation of soil engineering analysis. Topics
include stress-strain-strength of soils; generalized limiting equilibrium
analysis; stability analyses of earth-retaining structures, slopes, and
shallow foundations; probabilistic approach of stability assessment;
computation of settlement of foundations in sand and clay and time-rate
of consolidation and critical state concept. Special attention is directed
toward the illustration of theory through practical examples. Prereq:
CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate Standing. Max
Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate
Standing.

CVEN 5682 - Pavement Design (3 Credits)
This course addresses both the structural analysis and design methods
for pavements. Emphasis will be on mechanistic analysis. It covers very
broad areas of properties of pavement materials such as concrete and
hot-mix asphalt, base course, and subgrade; traffic loads, the design and
performance of flexible pavements and rigid pavements; and drainage.
Computer codes included in the textbook package will be used in the
course, mainly because of its availability without additional cost. Other
topics may be treated as time permits. Prereq: CVEN 3141, 3505, and
3708/3718 with a C- or higher, recommend B- or higher. Prereq or coreq:
CVEN 3602 with a C- or higher and Prereq or Coreq: CVEN 4602 or
CVEN 5602; OR Graduate standing(GRAD/NDGR).

CVEN 4738. Prereq: CVEN 3141 and 3718 with a C- or higher. Restriction:
Methods of subsurface exploration and sampling of soils, lateral support
in open cuts, control of groundwater, analysis and design of shallow
foundations, analysis and design of deep foundations, bridge abutments
and cofferdams, underpinning, and application of modern computational
techniques to analysis and design of foundations. Cross-listed with
CVEN 4738. Prereq: CVEN 3141 and 3718 with a C- or higher. Restriction:
Restricted to Civil or Construction Engineering majors or graduate
standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3141 and 3718 with a C- or higher. Restriction: Restricted to
Civil or Construction Engineering majors. OR Graduate standing.

CVEN 5758 - Foundations on Expansive Soils (3 Credits)
Expansive soils swell upon wetting because of the swelling nature of
constituent clay minerals, particularly montmorillonite. This course
studies swelling nature of different clay minerals, effects of wetting,
swelling potential, swelling pressures, and design of different foundation
systems. Prereq: CVEN 4738, B.S.C.E. or permission of instructor. Max
Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5708, 5718, and Graduate Standing

CVEN 5798 - Dynamics of Soils and Foundations (3 Credits)
Principles of vibrations of, and wave propagation in, elastic,
homogeneous, isotropic media; laboratory and in situ measurements of
soil properties; applications of these principles and properties to
the design of foundations subject to dynamic loading generated by
machinery, earthquakes, or blasts. Prereq: CVEN 5708, 5718, and
graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5708, 5718, and Graduate Standing

CVEN 5719 - Design and Construction of Geosynthetic-Reinforced Soil
Structures (3 Credits)
Theory of reinforced soil; mechanical and hydraulic properties of
geosynthetics; soil-geosynthetic interaction behavior; design concepts
of GRS structures; design and construction of GRS retaining walls;
design and construction of GRS embankments and slopes; design and
construction of GRS foundations. Prereq: CVEN 5708. Max Hours: 3
Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5708

CVEN 5738 - Advanced Soils Engineering (3 Credits)
This course delves into the art and science of designing sustainable and
context sensitive street and highway facilities. This course is intended
to intersect with CVEN 4602/5602 – Advanced Highway Design, which
covers rural highway design. Topics for this course will focus on urban
street design principles, including transportation planning, bicycle and
pedestrian facilities, intersections, and street network design, as well as
techniques and software for coordinated signal timing. Such details are
a focus of the course; however, the overarching theme reflects upon the
social, economic, and environmental implications of highways and as
well as proper integration into the overall transportation system. Prereq:
CVEN 3602 with a C- or higher, recommend B- or higher. Prereq or coreq:
CVEN 4602 or CVEN 5602. Cross-listed with CVEN 4650. Max hours: 3
Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3602 with C- or higher and Prereq or Coreq: CVEN 4602 or
CVEN 5602; OR Graduate standing(GRAD/NDGR).

CVEN 5662 - Transportation System Safety (3 Credits)
This is a graduate-level course on road safety that will: investigate
contemporary safety analysis techniques; highlight the disconnect
between the current safety paradigm and actual safety outcomes; cover
drive, bicyclist and pedestrian safety concerns; and discuss notable
efforts such as Vision Zero. Restriction: Graduate standing. Max Hours: 3
Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CVEN 5682 - Pavement Design (3 Credits)
This course addresses both the structural analysis and design methods
for pavements. Emphasis will be on mechanistic analysis. It covers very
broad areas of properties of pavement materials such as concrete and
hot-mix asphalt, base course, and subgrade; traffic loads, the design and
performance of flexible pavements and rigid pavements; and drainage.
Computer codes included in the textbook package will be used in the
course, mainly because of its availability without additional cost. Other
topics may be treated as time permits. Prereq: CVEN 3141, 3505, and
3708/3718 with a C- or higher, OR graduate standing. Max Hours: 3
Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3141, CVEN 3505, and CVEN 3718 with a C- or higher OR Graduate
Standing.

CVEN 5708 - Advanced Soils Engineering (3 Credits)
A unified treatment of the foundation of soil engineering analysis. Topics
include stress-strain-strength of soils; generalized limiting equilibrium
analysis; stability analyses of earth-retaining structures, slopes, and
shallow foundations; probabilistic approach of stability assessment;
computation of settlement of foundations in sand and clay and time-rate
of consolidation and critical state concept. Special attention is directed
toward the illustration of theory through practical examples. Prereq:
CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate Standing. Max
Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 3708 or 3718, and CVEN 4718 or 4728, or Graduate
Standing.
CVEN 5800 - Special Topics (3 Credits)
Topical courses offered once or on irregular intervals. Typical topics include: computer-aided structural engineering, pre-stressed concrete, non-matrix structural analysis, geotechnical aspects of hazardous waste management, geographic information systems and facility management, groundwater hydrology, engineering project management, structural planning, engineering practice, spreadsheet application, field instrumentation, hazardous wastes engineering, bridge super and substructure design, advanced steel design, hydraulic transients, foundations – expansive soils, sludge process design. Prereq: Variable. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade

CVEN 5840 - Independent Study (1-6 Credits)
Available only through approval of the graduate advisor. Subjects arranged to fit needs of particular student. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

CVEN 5939 - Internship (1-3 Credits)
Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

CVEN 5950 - Master’s Thesis (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.

CVEN 5960 - Master’s Report (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.

CVEN 5970 - Doctoral Dissertation (1-15 Credits)
Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 15.
Additional Information: Report as Full Time.

CVEN 6111 - Structural Dynamics II (3 Credits)
Analyzes and designs structures for earthquake load including: earthquake ground motions, response of linear and nonlinear structures, response and design spectra, seismic design load, seismic analysis, building code requirements and design of steel and concrete structures for seismic load. Prereq: CVEN 5111. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CVEN 5111
Typically Offered: Spring.

CVEN 7840 - Independent Study (1-3 Credits)
Available only through approval of the graduate advisor. Subjects arranged to fit needs of particular student. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

CVEN 8990 - Doctoral Dissertation (1-15 Credits)
Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 15.
Additional Information: Report as Full Time.

Construction Engineering and Management (CEMT)

CEMT 5231 - Construction Materials and Methods (3 Credits)
This course serves as an introduction to the primary materials and methods used to construct buildings and infrastructure across the United States, including concrete, wood and steel. Students explore processes related to specifying and installing materials, as well as analyze various material performance characteristics. Students are required to complete lectures, videos and class activities. Students also research and present information on a wide range of materials and construction processes. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5232 - Construction Planning and Control (3 Credits)
This course presents knowledge on planning and controlling of construction projects. Students will learn the basics of construction planning to develop work breakdown structure and activity list, estimate activity cost and duration, and identify job logic and precedence relationships. Several scheduling techniques will be presented in this class, including bar chart, network scheduling, uncertainty in scheduling (PERT), limited resources scheduling, resource leveling, line of balance, and time-cost tradeoff analysis. Furthermore, this class will provide knowledge on cash flow analysis and construction control techniques such as Earned Value method. Students will acquire skills on the use of currently available computer scheduling and planning software such as Primavera 6 and Navisworks Manage to create 5D models to visualize sequence of the construction activities. In addition, students will forms teams and work on a project throughout the semester to apply the skills that they learn in class. Prereq: CEMT 2100 or CVEN 4230 with a C- or better and a statistics course (MATH 2830, 3800, CVEN 3611, ELEC 3817, or BANA 2010) with a C- or better or graduate standing. Cross-listed with CVEN 4232. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better and a statistics course (MATH 2830, 3800, CVEN 3611, ELEC 3817, or BANA 2010) with a C- or better or graduate standing.

CEMT 5233 - Construction Cost Estimating (3 Credits)
This course presents the application of scientific principles to rough and detailed cost estimating for construction. The course starts with an introduction to estimating and how it fits in bid/proposal process and construction management. Quantity take offs, putting costs to those quantities, overhead costs, cost markups and profits; and computerized estimating will be explored. The project includes quantity take and cost estimate for the concrete and metals portion of an actual project. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.
CEMT 5234 - Sustainable Construction (3 Credits)
This course will serve as an introduction to major components and technologies used in sustainable design and construction to create healthy, environmentally-sensitive built environments. Content focuses on construction processes, renewable energy systems, healthy buildings, natural and cultural resources, and traditional as well as cutting-edge building techniques. Course participants will gain knowledge about effective sustainable practices through active learning by engaging in case studies, class presentations, and group activities. Numerous guest speakers will share first-hand experience regarding implementation and professional practice of sustainable principles in the real-world. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4240 with a C- or better or graduate standing.

CEMT 5235 - Advanced Construction Engineering (3 Credits)
This course starts with a high-level overview of Construction Engineering Management including organizations involved, current approaches and industry challenges. The course delves into contracts, estimating and managing earthwork, temporary construction, scheduling, quality and costs. The course is delivered in an accelerated 8-week format. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5236 - Project Management Systems (3 Credits)
Address the basic nature of managing projects and the advantages and disadvantages to this approach. Introduce the characteristics, techniques, and problems associated with initiating, planning, executing, controlling, and closeout of projects. Learn about the International Standards of PM and how to use them. Develop a management perspective about projects to help develop future project managers. Restriction: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CEMT 5237 - Advanced Project Management (3 Credits)
A survey of advanced topics in project management building on the Project Management Systems course and utilizing the Project Management of Knowledge. Case studies, complex problems, and a class project will be utilized in the course to bring a practical perspective to the conceptual lessons. Restriction: Graduate standing. Cross-listed with CVEN 6237. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing (Grad or Non-Degree Grad)

CEMT 5238 - Integrated Construction Leadership (3 Credits)
This interdisciplinary course focuses on leadership. It is structured to feature top level executives in architecture, engineering and construction (AEC) industries to discuss current industry practice. It provides students opportunities to apply management and leadership principles in construction related projects and activities. The course is delivered in an accelerated 8-week format. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4240 with a C- or better or graduate standing.

CEMT 5239 - Building Information Modeling (BIM) (3 Credits)
Building Information Modeling is an advanced approach to facility design and construction using object-oriented 3-D models. It can be integrated in the design and construction for analytical purposes, including design, visualization, quantity takeoff, cost estimating, planning, and facility management. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5240 - Construction Safety (3 Credits)
This course is a study of safety practices in the construction industry and the specific safety procedures used in safety management of a construction project. Topics include safety risks inherent in construction projects, the roles of government, the judicial system, the insurance industry, designers and project owners in safety management and the economic impact of injuries. Advanced topics include safety risk quantification and analysis, design for safety and emerging technologies. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5242 - Construction, Business and Innovation (3 Credits)
AEC professionals rely on technical and soft (social) skills to solve complex challenges. The interdisciplinary nature of project delivery, to an increasing extent, requires professionals to collaborate across disciplines. This course explores innovation and collaboration at the interface of construction and business. Restriction: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5246 - Construction, Business and Innovation (3 Credits)
This course will serve as an introduction to major components and technologies used in sustainable design and construction to create healthy, environmentally-sensitive built environments. Content focuses on construction processes, renewable energy systems, healthy buildings, natural and cultural resources, and traditional as well as cutting-edge building techniques. Course participants will gain knowledge about effective sustainable practices through active learning by engaging in case studies, class presentations, and group activities. Numerous guest speakers will share first-hand experience regarding implementation and professional practice of sustainable principles in the real-world. Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CEMT 2100 or CVEN 4230 with a C- or better or graduate standing.

CEMT 5250 - Special Topics in Construction (3 Credits)
These special topics courses cover a variety of topics in construction engineering and management. Restriction: Restricted to students with graduate standing. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: Graduate standing (Grad or Non-Degree Grad)
Civil Engineering, MEng

Introduction
Graduate Education Policies and Procedures apply to this program.

There are many reasons to consider a Master’s of Engineering degree in Civil Engineering:

- Gain advanced training in your chosen civil engineering specialty.
- Become an expert in your chosen thesis (or report) research.
- Position yourself in a competitive employment market.
- Earn more than those with only a bachelor’s degree.

The Master of Engineering (MEng) in Civil Engineering at CU Denver is intended for students who have a non-engineering undergraduate degree. The program is structured to give basic knowledge in engineering in an interdisciplinary manner, allowing students to enhance their engineering education with courses from complimentary areas of study.

Our graduate programs offer ample opportunities for hands-on research. The civil engineering graduate program is designed for both full-time and part-time students who want to advance their academic and professional skills in civil engineering and related areas. Many students are full-time, while many also work full-time jobs and complete evening classes. Depending on a student’s pace, the MEng program typically takes 2-4 years to complete. Most graduate courses are offered in the afternoons or evenings.

Specialty Areas
- Construction Engineering and Management
- Geomatics and Geographic Information Systems (GIS)
- Hydrologic, Environmental, and Sustainability Engineering
- Transportation Engineering

Program Prerequisites
Prerequisite classes are in addition to the 30 semester hours needed to complete a master’s degree, as they are necessary background information that is usually included in an engineering bachelor's program. Students must receive a grade of C minus (C-) or better for the prerequisite class to apply to the program.

Students may complete prerequisite classes either before or after being admitted to a degree program. However, applicants with 5 or more incomplete prerequisites will not be admitted. Students may complete no more than nine credit hours of graduate work before completing these prerequisites. Note, all courses taken while enrolled in graduate studies at CU Denver count toward your grade point average (GPA).

If prerequisites are taken while admitted to the master’s program, students must maintain a 3.0 overall GPA, per Graduate Education policies and procedures.

Transfer Credit
Master’s students may transfer up to 9 semester hours from another institution toward their master’s degree, if approved by their advisor

Program Requirements

1. Students must complete a minimum of 30 credit hours at the graduate level
2. Students must complete 3 credit hours of master’s report including a written comprehensive exam and an oral defense to a committee of at least two graduate faculty. The student’s topic must be approved by the faculty advisor.
3. 15 credit hours of course work must be completed with civil or construction engineering classes; this includes the master’s report hours.
4. 15 credit hours may be completed outside of the civil engineering department in related disciplines that supplement the student’s area of study. This requirement gives the Master of Engineering degree the ability to be interdisciplinary and tailored to the student’s exact area of interest.
5. Students must earn a minimum grade of B (3.0) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete any course requirements as pass/fail, or satisfactory/unsatisfactory.
6. Every graduate student must also satisfy the degree requirements of Graduate Education on the Denver campus, specified in the Information for Graduate Students section of this catalog.
7. The MEng must be completed within seven years of the date the student begins the degree program.

Construction Engineering and Management
The Master’s program in construction engineering and management provides the necessary decision-making skills to support complex construction projects and subsequent management throughout their useful life. Construction engineering and management concerns the design, planning and management of the construction, maintenance and disposal of structures, infrastructure, transportation systems, site work, and commercial, industrial, residential and environmental projects (for example: highways, bridges, airports, buildings, dams, reservoirs, light and high-speed rail systems, hospitals, laboratories, residential communities, utilities and environmental restoration projects).

General Electives

9
Course selection should be based on planned career path, masters report focus, eligibility and availability of the courses. The following courses are some of the possibilities, but you should discuss course choices with your advisor.

- Any 5000+ CVEN or CEMT course
- ARCH 5450 Sustainable Design Practices
- ARCH 6313 LEED Certification, Greenbuilding Seminar
- BANA 6720 Simulation Modeling
- BIOL 5460 Environmental Toxicology
- BUSN 6520 Leading Individuals and Teams
- ENGR 5301 Systems Engineering: Principles and Practice
- ENTP 6020 Business Model Development & Planning
- ENV 5010 Landscape Biogeochemistry
- GEOG 5220 Environmental Impact Assessment
- INTB 6020 Cross-Cultural Management
- LDAR 5532 Landform Manipulation
- MGMT 6808 Leadership Development
- PUAD 5644 Environmental and Hazards Law
- URPL 5050 Urban Development
- URPL 6500 Environmental Planning/Management
- Other topics as approved by faculty advisor

Total Hours: 30

**General Civil Engineering**

The General Civil Engineering focus is structured to allow students to customize their engineering graduate education with courses from complimentary areas of study.

Students will work with their advisor to develop appropriate graduate course choices across multiple disciplines within civil engineering. Example of disciplines include transportation, sustainability, geomatics, and construction. This does not lead directly to engineering licensure and is not appropriate for a structural engineering focus.

A reflection essay must be written by the student before being approved for graduation.

**Geomatics and Geographic Information Systems (GIS)**

Our Geomatics and GIS curriculum covers a wide range of geospatial principles. Students learn from industry professionals in areas of surveying, geodesy, mapping science and cartography, photogrammetry, remote sensing, high-definition surveying, and relational GIS databases.

Our program prepares graduates for careers in industry and/or science. Students who complete the program have a comprehensive understanding in these disciplines, empowering them to advance their careers in geospatial engineering and analysis or to continue their research.

**Hydrologic, Environmental, and Sustainability Engineering**

The graduate track in hydrologic, environmental, and sustainability engineering (HESE) in the Department of Civil Engineering at the University of Colorado Denver brings together the hydrologic cycle, environmental processes, and sustainability—the powerful notion that everything we engineer should support economic prosperity, environmental health, and social justice.

Graduate coursework in the HESE track requires breadth and depth. Students are required to take at least one graduate course in each of the three areas plus at least two additional courses in one of those three areas. The program also includes graduate-level electives, allowing students to customize their program to match their professional needs and intellectual curiosity.

---

**Transportation Engineering**

The Master of Engineering program in transportation places an emphasis for courses and research on transportation engineering, planning, operations and management. Our studies address local, state, national and international issues with funding from federal, state, local and private sources. We develop and investigate new methods and technologies to analyze the performance and safety of alternative transportation operations and designs.

Civil Engineering, MS

Introduction

Graduate Education Policies and Procedures apply to these programs.

There are many reasons to consider a master’s degree in Civil Engineering:

- Gain advanced training in your chosen civil engineering specialty.
- Become an expert in your chosen thesis (or report) research.
- Position yourself in a competitive employment market.
- Earn more than those with only a bachelor’s degree.

The Master of Science (MS) in Civil Engineering at CU Denver is intended for students who have previously earned an undergraduate degree in engineering or a similar field. Students of other backgrounds are welcome but usually have more prerequisites to complete before they can be admitted to the MS program.

The Civil Engineering graduate program is designed for both full-time and part-time students who want to advance their academic and professional skills in civil engineering and related areas. Our graduate programs are designed for working professionals and offer ample opportunities for hands-on research.

Many students are full-time, while many also work full-time jobs and complete evening classes. Depending on a student’s pace, the master’s program typically takes 2-4 years to complete. Most graduate courses are offered in the afternoons or evenings.

Specialty Areas

- Construction Engineering and Management
- Geomatics and Geographic Information Systems (GIS)
- Geotechnical Engineering
- Hydrologic, Environmental, and Sustainability Engineering
- Structural Engineering
- Transportation Engineering

Program Prerequisites

Prerequisite classes are in addition to the 30 semester hours needed to complete a master’s degree, as they are necessary background information that is usually included in an engineering bachelor’s program. Students must receive a grade of C minus (C-) or better for the prerequisite class to apply to the program.

Students may complete prerequisite classes either before or after being admitted to a degree program. However, applicants with 5 or more incomplete prerequisites will not be admitted. You may complete no more than nine credit hours of graduate work before completing these prerequisites. Note, all courses taken at CU Denver while enrolled graduate studies count toward your grade point average (GPA).

If prerequisites are taken after admission to the master’s program, students must maintain a 3.0 overall GPA, per Graduate Education policies and procedures. The student’s faculty advisor may also specify undergraduate courses that must be completed before starting graduate course work, but these will not count toward the semester hour requirements for the degree.

Transfer Credits

Master’s students may transfer up to 9 semester hours from another institution toward their master’s degree, if approved by their advisor. Students who completed their undergraduate degree at CU Denver many have additional options available.

Program Requirements

1. Students must complete a minimum of 30 credit hours at the graduate level, including a master’s report or thesis.
2. Students must complete 6 credit hours of master’s thesis or 3 credits of master’s report. Both require a written comprehensive exam and an oral defense to a committee of at least two graduate faculty for a report and three graduate faculty for a thesis. The student’s topic must be approved by the faculty advisor.
3. Students must complete a minimum of 15 credit hours in your chosen host department or within Civil Engineering, not including master’s report or thesis. Any courses taken outside your host department must be approved by advisor.
4. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete any course requirements as pass/fail, or satisfactory/unsatisfactory.
5. The MS must be completed within seven years of the date the student begins the degree program.

Construction Engineering and Management

The Master’s program in construction engineering and management provides the necessary decision-making skills to support complex construction projects and subsequent management throughout their useful life. Construction engineering and management concerns the design, planning and management of the construction, maintenance and disposal of structures, infrastructure, transportation systems, site work, and commercial, industrial, residential and environmental projects (for example: highways, bridges, airports, buildings, dams, reservoirs, light and high-speed rail systems, hospitals, laboratories, residential communities, utilities and environmental restoration projects).

Geomatics and Geographic Information Systems (GIS)

The Geomatics Engineering and Geographic Information Systems (GIS) graduate program at the University of Colorado Denver provides broad-based expertise and cutting-edge skills that span the growing geospatial field and helps alleviate the shortage of well-educated geospatial professionals. The program is intended for engineers and other geospatial, environmental and urban infrastructure professionals seeking skills in using and managing rapidly developing geospatial data technologies.

All GIS graduate courses are entirely online, as they have been for more than 20 years. However, master’s degree students have the option of taking some courses on the CU Denver campus from other programs such as geography or computer science.

Our Geomatics and GIS curriculum covers a wide range of geospatial principles. Students learn from industry professionals in areas of surveying, geodesy, mapping science and cartography, photogrammetry, remote sensing, high-definition surveying, and relational GIS databases.

Our program prepares graduates for careers in industry and/or science. Students who complete the program have a comprehensive understanding in these disciplines, empowering them to advance their careers in geospatial engineering and analysis or to continue their research.

Geotechnical Engineering

The Master of Science program in geotechnical engineering offers opportunities for study and research in design and construction of structures built on, in or of natural/improved soils or rocks. As desirable construction sites in urban settings are fast becoming fewer, innovations in geotechnical engineering are arguably some of the most intriguing and interesting. Geotechnical engineering covers diverse areas such as earth retaining structures, reinforced soil structures, dams, tunneling, bridge abutments, landslide stabilization, environmental geotechnics, in-situ testing, new soil composites, soil-structure interaction, earthquake engineering, subsurface characterization, ground improvement, computational geomechanics, and geosynthetics.

### Structural Engineering

Structural engineering is the analysis and design of structures that support or resist loads. At CU Denver the area of structural engineering includes structural and bridge engineering; repair, evaluation, maintenance and rehabilitation of civil infrastructure, maintenance and experimental analysis of concrete; and more.

Civil Engineering, PhD

Introduction

Graduate Education policies and procedures apply to this program.

The PhD degree in civil engineering is offered through a coordinated program with the University of Colorado Boulder.

Specialty Areas for Degrees:

• Civil Engineering Systems
• Construction Engineering and Management
• Geomatics and Geographic Information Systems (GIS)
• Hydrologic, Environmental, and Sustainability Engineering
• Structural Engineering
• Transportation Engineering

Note: The multidisciplinary engineering and applied science PhD is also offered through the Department of Civil Engineering.

What is Civil Engineering Systems?

The doctoral program in civil engineering systems has different rules than the four other traditional doctoral tracks in order to facilitate more interdisciplinary research. This doctoral track can be the degree that would follow a master of engineering.

Additional Doctoral Admissions Requirements

In addition to the admissions requirements listed for master’s students, doctoral applicants need to have the support of a faculty advisor before they are admitted. Once doctoral students are approved by the graduate admissions committee, their application must be reviewed again by the Department of Civil, Environmental and Architectural Engineering at CU Boulder as the programs are jointly administered. Prospective PhD students should contact the Department of Civil Engineering at CU Denver to inquire about application requirements and to obtain the “Rules and Policies for the Coordinated PhD Program.”

Requests for applications for graduate study in civil engineering should be addressed to

CU Denver Department of Civil Engineering
Campus Box 113
P.O. Box 173364
Denver, CO 80217-3364

Degree Components:

The PhD in civil engineering systems requires the completion of at least 60 credit hours, including at least 30 dissertation research hours and at least 30 credit hours of coursework relevant to the student’s dissertation research. Nine (9) credit hours must be completed at CU Boulder.

Doctoral students may transfer up to 15 credit hours toward their required coursework, but not for dissertation hours. Students who complete their master’s degree at CU Denver or CU Boulder may transfer up to 21 credit hours.

Program Requirements:

Each candidate for the degree is expected to take a preliminary examination by the end of the second year. After successful completion of this exam, the student is required to take the comprehensive examination and the doctoral dissertation defense examination.

Additional requirements are outlined in the Rules and Regulations document that each student signs after being admitted to the program. Each student must also satisfy the degree requirements of the CU Denver Graduate Education.

The program must be completed within eight years of the date the student begins the degree program.

Degree Requirements:

Students must hold an earned master’s degree before they can be admitted to a doctoral program in the Department of Civil Engineering; there is no direct admission from a bachelor’s program to the doctoral program. However, a student enrolled in a master’s program may apply for the doctoral program before the master’s degree is granted, as long as the master’s degree is conferred before they enroll as a doctoral student at CU Denver.
Construction Project Management Graduate Certificate

Introduction

The Construction Project Management (CPM) Certificate is a four-course certificate designed to build skills and teach critical management tools and techniques that enable individuals and teams to run projects within schedule, budget and quality requirements. This certificate focuses on the challenging and growing field of construction project management and is designed for working or aspiring professionals and graduate students interested in developing a level of expertise in construction project management.

The certificate starts with two required classes on project management that teach the fundamentals of the International Project Management Institute’s (PMI) Project Management Body of Knowledge and provide a solid foundation for anyone involved in project or program management. The PMI program is based on rigorous standards and ongoing research to meet the real-world needs of organizations worldwide. The electives focus on various components of the PMI knowledge areas-project integration, scope, time, cost, quality, human resource, communications, risk, procurement and stakeholder management- from a construction engineering and management perspective.

You can earn graduate-level credit for each course successfully completed and earn the CPM certificate upon completion of the four courses and can take these courses as a non-degree student or by being enrolled at the University of Colorado Denver. Students must have a bachelor's degree to take these classes. These courses can also be used to partially fulfill requirements for the Master of Engineering in Construction Engineering and Management or other eligible graduate programs.

Contact the Department of Civil Engineering (p. 250) for more information.

Engineering and Applied Science, PhD

Introduction
The multidisciplinary Engineering and Applied Science Doctor of Philosophy degree program is offered by the College of Engineering, Design and Computing (p. 236) and consists of a primary and secondary concentration. Applicants apply and enter the program through one of four departments, called the host department, which is chosen based on the applicant’s intended primary concentration of study. The four departments that serve as host departments are:

- Civil Engineering (p. 250)
- Computer Science and Engineering (p. 270)
- Electrical Engineering (p. 287)
- Mechanical Engineering (p. 303)

Each host department offers several concentrations. A list of concentrations can be found on each department’s website. Go to engineering.ucdenver.edu (http://engineering.ucdenver.edu) to learn more.

The required secondary concentration can be chosen from any remaining department within the college, including the Department of Bioengineering (p. 238). The secondary concentration may also be chosen from another CU Denver school or college. A student chooses his/her secondary concentration with the help of a faculty advisor after entering the program.

Graduate Education Policies and Procedures apply to this program.

Requirements for Admission
Requirements for admission to the Engineering and Applied Science PhD program can be found at engineering.ucdenver.edu/graduate-admissions.

Program Requirements
The minimum degree requirements consist of:

- 30 semester hours of course work in the primary and secondary areas of concentration
- 30 semester hours of research/dissertation credit
- Each candidate for the degree is expected to take a preliminary examination by the end of the second year. After successful completion of this exam, the student is required to take the comprehensive examination and the doctoral dissertation defense examination.
- Additional requirements are outlined in the Rules and Regulations document that each student signs after being admitted to the program. Each student must also satisfy the degree requirements of the CU Denver Graduate School.
- Program must be completed within eight years of the date the student begins the degree program.

NOTE: for students applying through the Department of Civil Engineering, students must hold an earned master’s degree before they can be admitted to a doctoral program in the Department of Civil Engineering; there is no direct admission from a bachelor’s program to the doctoral program. However, a student enrolled in a master’s program may apply for the doctoral program before the master’s degree is granted, as long as the master’s degree is conferred before they enroll as a doctoral student at CU Denver.
Geographic Information Systems and Geomatics Graduate Certificate

Introduction

The graduate certificate in geographic information systems (GIS) is designed to supplement knowledge needed in the professional work environment or as a way to see if a graduate degree in GIS is a good fit. Students may earn this certificate without formal admission to a master’s degree program in engineering if they take these classes as a non-degree student.

Program Requirements

The GIS graduate certificate requires the successful completion of four core GIS classes with a grade of B- or better; any prerequisites for those individual classes are also required.

leonard.darnell@ucdenver.edu

Introduction

The College of Architecture and Planning, the College of Engineering, Design and Computing, and the Business School at the University of Colorado Denver have formed a partnership to create an innovative and interdisciplinary leadership program. The Integrated Construction, Management and Leadership (ICML) Certificate is a four-course certificate designed to launch designers, architects, engineers, and business entrepreneurs into the world of construction or rapidly update an existing skill-set.

As disciplinary identities, project boundaries, and conventional markets blur, leadership, management skills, and civic mindfulness are key aspects to successfully navigating a rapidly transforming 21st century built environment. Many new ideas are emerging around how projects are conceived and delivered that better integrate the complex relationships among finance, marketing, design, and construction. These new interdisciplinary management and construction techniques streamline the construction of increasingly large-scale and complex projects. Leadership skills are necessary for success in the central activities of contemporary engineering, architectural design firms, business, government, and non-profits. The demands of project management in firms today involve more than specific technical expertise in a given field. Firms need creative individuals who can effectively innovate, execute, and communicate across disciplines. This certificate program capitalizes on these changes and the new opportunities they present.

ICML is an interdisciplinary program designed for working or aspiring professionals, and upper-level students interested in expanding their knowledge base in the fields of engineering, architecture, business, and their intersections. The courses include introductions to and explorations of current trends in the construction industry, project management and building information modeling (BIM). The final course is an integrated course that brings together top executives in the architecture, engineering and construction (AEC) business to discuss current industry topics and provides students an opportunity to apply principles from the various fields to case study projects.

- The courses can be used to partially fulfill requirements for the MEng in Construction Engineering and Management or other eligible graduate programs such as the Master of Architecture degree upon acceptance into these programs.
- Approved courses in this Certificate may also count toward related Certificates offered by the Business School and Construction Engineering and Management.

Total Hours 12

Note: A grade of B- or higher is required in all courses applied toward the certificate.

- Students can earn graduate-level credit for each course they successfully complete. If students have an undergraduate degree, they can earn the ICML Certificate upon completion of all four courses.
- They can take the courses as a non-degree student or while enrolled in a degree program at the University of Colorado Denver.
Computer Science and Engineering

Overview

Mission Statement

With the advances in technology and the rapid and prevalent growth of the information-based economy, computer science has become an enabling science for nearly all disciplines that impact engineering, science, business, health and government. The future of the discipline promises even more innovative advances. The Department of Computer Science and Engineering at the University of Colorado Denver is committed to providing outstanding education and research training to our diverse undergraduate and graduate students for productive careers in industry, academia and government in the Denver metropolitan area, state and beyond. Our faculty strives for excellence in teaching, research and service by covering a broad spectrum of the discipline’s core fundamentals, as well as applied aspects including those of interdisciplinary nature. We actively engage our students in classroom and out-of-classroom research and help them develop the skills needed to solve complex real-world technological problems of modern society.

The Department of Computer Science and Engineering offers MS and PhD degrees:

- The MS degree (p. 283) is awarded in computer science (CS) to those students who wish to pursue graduate studies to further develop their education. The MS in CS graduate program covers the core knowledge of key concepts of computer science as well as offers flexibility to pursue specializing in various fields of interests.
- A track in Data Science in Biomedicine is offered as a MS thesis option. Students who choose this track will adopt biomedical applications of data science to learn data science methodologies and technologies.
- The graduate certificate in software engineering is designed for working professionals, or computer science students beginning their careers, who are in the field of software engineering and/or software development.
- The graduate certificate in cybersecurity & defense is designed for working professionals, or computer science students beginning their careers, who are in the field of cybersecurity and/or security operations. The certificate program in Cyber Security and Defense will prepare Computer Science professionals to identify, analyze, and mitigate technical cybersecurity related vulnerabilities, exploits and attacks against network and critical cyber infrastructure.
- The Computer Science and Information Systems PhD (p. 282) is awarded from the College of Engineering, Design and Computing.
- The multidisciplinary Engineering and Applied Science PhD degree is available through the Department of Computer Science and Engineering.

Most up-to-date information on all programs offered through the Computer Science and Engineering Department can be obtained from the department’s website at: engineering.ucdenver.edu/cse (http://engineering.ucdenver.edu/cse/).
Each host department offers several concentrations. A list of concentrations can be found on each department's website. Go to engineering.ucdenver.edu (http://engineering.ucdenver.edu) to learn more.

The required secondary concentration can be chosen from any remaining department within the college, including the Department of Bioengineering. The secondary concentration may also be chosen from another CU Denver school or college. A student chooses his/her secondary concentration with the help of a faculty advisor after entering the program.

Degree Requirements
The minimum degree requirements consist of 30 semester hours of course work in the primary and secondary areas of concentration, as well as 30 semester hours of research/dissertation credit. Each candidate for the degree is expected to take a preliminary examination by the end of the second year. After successful completion of this exam, the student is required to take the comprehensive examination and the doctoral dissertation defense examination. Additional requirements are outlined in the Rules and Regulations document that each student signs after being admitted to the program. Each student must also satisfy the degree requirements of the CU Denver Graduate Education.

Program Requirements and Milestones
For details about program requirements in the computer science track, see the CSIS PhD Handbook (https://engineering.ucdenver.edu/docs/librariesprovider29/college-of-engineering-and-applied-science/computer-science/academic-and-program-materials/phd-handbook-2022-2023-final.pdf?sfvrsn=816aa0ba_2).

Admissions to Computer Science and Engineering Graduate Programs
Requests for applications for graduate study in computer science and engineering should be addressed to:

Office of Admissions
Campus Box 167
P.O. Box 173364
Denver, CO 80204

Courier Address (UPS, FEDEX, etc.):
Office of Admissions
1201 Larimer Street, Suite 1005
Denver, CO 80204

Contact Email: graduateadmissions@ucdenver.edu
Phone: 303-315-5969

All applicants for admission must submit complete credentials as outlined in the instructions that accompany the application materials.

Master of Science (MS) in Computer Science
Admission Requirements
Applicants should hold a bachelor's degree from an institution comparable to the University of Colorado. They need to have sufficient programming experience and mathematical maturity to understand advanced courses. Qualified applicants holding a degree outside computer science or equivalent fields may need to take additional foundational undergraduate courses before starting the graduate program.

Admission decisions are based on prior academic performance, letters of recommendation, English proficiency, if applicable, as well as the applicant's written statement of purpose.

Additional requirements include:
1. 10 credit hours, on the semester basis, of university-level calculus
2. At least one math course beyond calculus, such as advanced calculus, differential equations, linear algebra, probability, statistics or combinatorial analysis

Students lacking some of these requirements, whose background is otherwise satisfactory, may be admitted with the understanding that the certain undergraduate courses have to be completed after admission. Additional information regarding the admissions process may be found at engineering.ucdenver.edu/cse (http://engineering.ucdenver.edu/cse/).

Required GPA
Regular admission: Applicants should have an undergraduate GPA of at least 3.0.

Transfer Credit
A maximum of 9 semester hours of graduate course work may be transferred into the program based on department approval. In principle, core courses must be taken from the CSE department at CU Denver.

Note: Candidates applying for MS study will be individually evaluated by the department's graduate committee. A letter with a decision will be sent to the applicant by the graduate committee chair.

Computer Science and Information Systems (CSIS) PhD
Admission
Admission criteria include GPA (undergraduate and graduate), letters of recommendation, prior achievements in academia and industry and an application portfolio essay describing an applicant's motivation and an initial plan for doctoral study. The application portfolio is important to gauge an applicant's motivation for research training.

Exceptionally motivated students with BS degrees in computer science, information systems, or closely related fields may apply to the CSIS PhD program directly. Students without a master's degree must complete at least 30 hours of CSIS PhD required course work in addition to the 30 hours of dissertation.

Engineering and Applied Science PhD
Graduate Education Policies and Procedures apply to this program.

Requirements for Admission
Requirements for admission to the Engineering and Applied Science PhD program can be found under the Degree Programs link on each host department's website.

- Civil Engineering (engineering.ucdenver.edu/civil (http://engineering.ucdenver.edu/civil/))
- Computer Science and Engineering (engineering.ucdenver.edu/cse (http://engineering.ucdenver.edu/cse/))

• Engineering and Applied Science, PhD (p. 285)
• Software Engineering Graduate Certificate (p. 286)

Faculty

Professors
Gita Alaghband, PhD, University of Colorado
Research areas: parallel and distributed systems, parallel algorithms, applications and languages, high-performance computing

Tom Altman, PhD, University of Pittsburgh
Research areas: algorithms, optimization, theory

Min-Hyung Choi, PhD, University of Iowa
Research areas: computer graphics, animation, virtual reality, human computer interface

Dave Ogle, PhD, Ohio State University, Clinical Teaching Track
Research areas: networks

Douglas Sicker, PhD, University of Pittsburgh
Research areas: cybersecurity and wireless systems

Associate Professors
Farnoush Banaei-Kashani, PhD, University of Southern California
Research areas: big data, data science, data management and mining, database systems, applied machine learning, computational biomedicine and biology

Ellen Gethner, PhD, University of British Columbia; PhD, Ohio State University
Research areas: graph theory, number theory, combinatorics, discrete geometry, computational geometry, visualization, algorithms

Ilkyeun Ra, PhD, Syracuse University
Research areas: computer networks, cloud computing, high-performance computing, distributed computing systems

Assistant Professors
Mazen Al Borno, PhD, University of Toronto
Research areas: computational motor control and mobile health

Ashis Biswas, PhD, University of Texas at Arlington
Research areas: machine learning, data mining, big data analysis, bioinformatics

Madhuri Debnath, PhD, University of Texas at Arlington, Clinical Teaching Track
Research areas: data mining, spatio-temporal data analysis, data science, machine learning

Liang He, PhD, Nankai University
Research areas: cyber-physical systems, cognitive battery management, IoTs, mobile computing

Haadi Jafarian, PhD, University of North Carolina Charlotte
Research areas: proactive security for cyber threats, big data analytics for cyber threat intelligence, security for cyber-physical systems & critical infrastructures, security for IoTs, security analytics & automation, science of security

Salim Lakhani, PhD, Purdue University, Clinical Teaching Track
Research areas: cloud computing and security, distributed computing & database systems

Zhengxiong Li, PhD, SUNY Buffalo
Research areas: Internet of Things, cybersecurity, emerging technologies and applications

Javier Pastorino, PhD, University of Colorado Denver, Clinical Teaching Track
Research areas: artificial intelligence, cybersecurity, privacy & awareness, and machine learning

Senior Instructor
Sung-Hee Nam, MS, University of Colorado Denver, Clinical Teaching Track
Research areas: programming languages, distributed computing

Diane Ricciardella, MS, University of Colorado Denver, Clinical Teaching Track
Research areas: artificial intelligence, linguistic geometry, natural language processing

Professor Emeriti
Boris Stilman, PhD, National Research Institute for Electrical Engineering, Moscow, Russia

Computer Science (CSCI)

CSCI 5010 - Software Architecture (3 Credits)
This course will focus on two major areas. The first part of the course will cover Software Requirements Analysis and Development as well as Software Architecture and the Soft Skills needed by high level Software Architects. The second part of the course will cover how Persistent Data fits into different types of Software Systems. The primary focus of the second part of the course will be on incorporating larger scale Enterprise Data Systems into Software Systems and will be an application of the first part of the course material. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5011 - Software Project Management Support (3 Credits)
Large Software Systems must be Planned, Scheduled, and Staffed. To accomplish these tasks Software Engineers must understand the Software Architecture, the Software System Dependencies, Effort Estimation and the various Project Development Models that might be used. This course will look at different Project Models, Project Management Needs, and various Effort Estimation tools and techniques. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5098 - Computer Science for Bioscientists (3 Credits)
Provides a broad but detailed overview of the computer science field to graduate students in the biosciences, with emphasis on web technologies, programming languages, algorithms and database systems. No credit for CS graduate students. Prereq: Working knowledge of programming language (e.g., Java). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

CSCI 5110 - Applied Number Theory (3 Credits)
Every year, Topics include divisibility, prime numbers, congruences, number theoretic functions, quadratic reciprocity, special diophantine equations, cryptography, computer security, and engineering applications. Cross-listed with CSCI 4110. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5172 - Complexity and Problem Solving (3 Credits)
Theoretical and practical aspects of solving complex problems, in particular, but not limited to, NP-complete and PSPACE-complete problems. Various heuristic and approximation algorithms, including greedy, ant, and Genetic Algorithms will be studied. This course is by instructor's permission only. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5173 - Computational Complexity and Algorithms (3 Credits)
A solid, in-depth theoretical foundations in computing, computational complexity, and algorithmics. Various algorithms, including both discrete and non-discrete problem domains. NP-complete and other complete classes of problems/languages. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5203 - Simulation (3 Credits)
This class in simulation spans three different disciplines: Computer Science, Modeling and Simulation, and Analysis. These will have approximately equal weight with respect to this class, but with more breadth in the Modeling and Simulation and Analysis disciplines and more depth in the supporting Computer Science topics. Excursions are planned for agent-based simulations, knowledge-based simulations, and animation and visualization of simulation results. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 4203. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
Typically Offered: Fall.

CSCI 5211 - Mobile Computing and Programming (3 Credits)
This course contains two main simultaneous tracks, namely mobile computing and mobile programming. A series of lectures on various aspects of mobile computing provides an understanding of challenges and solutions in design and implementing mobile systems. The main topics include mobile sensing, human mobility and its technical implication. Students are expected to have undergraduate knowledge of operating systems and computer networks. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5217 - Information Theory (3 Credits)
Introduces information theory and its application in computer science, communication theory, coding and applied mathematics. Entropy, mutual information, data compression and storage, channel capacity, rate distortion, hypothesis testing. Error detecting and correcting codes, block codes and sequential codes. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5220 - Social Networks & Informatics (3 Credits)
The main topics covered by the course will include 1) social network data structures, 2) basic random graph models and graph algorithms; 3) recommendation systems and predictive models 4) query suggestion and content analysis 5) link analysis and community detection 6) the spread of information, disease, and influence on networks. This course builds a solid foundation in social informatics technology. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 4220. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5255 - Object Oriented Design (3 Credits)
Software system design using object-oriented techniques, responsibility driven design and agile development practices. Topics include objects, classes, interfaces, inheritance, polymorphism, exception handling and testing. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5407 - Security & Cryptography (3 Credits)
A broad overview of cryptography and its relation to computer security. Topics include basic standard cryptographic techniques, a history of codes and ciphers, RSA, DES, AES, Elliptic Curve Cryptography, ElGammal, and applications to current and future technologies. Restriction: Restricted to Graduate Standing. Cross-listed with CSCI 7407 and CSCI 4407. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5408 - Applied Graph Theory (3 Credits)
Introduces discrete structures applications of graph theory to computer science, engineering and operations research. Topics include connectivity, coloring, trees, Euler and Hamiltonian paths and circuits. Matching and covering problems, shortest route and network flows. Restriction: Restricted to students with graduate standing. Note: Expected knowledge of abstract mathematics including discrete structures. Cross-listed with MATH 4408. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5409 - Graph Theory and Graph Algorithms (3 Credits)
Studies geometric graphs and other geometric objects, both analysis and algorithmic construction, leads to interesting connections among VLSI design, graph theory and graph algorithms. Studies a subset of the recent literature, with special emphasis on visibility graphs, thickness of graphs, graph coloring and the surprising and elegant connections among them all. Other topics are introduced as time permits. Prereq: CSCI 5408. Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5409 - Graph Theory and Graph Algorithms (3 Credits)
Studies geometric graphs and other geometric objects, both analysis and algorithmic construction, leads to interesting connections among VLSI design, graph theory and graph algorithms. Studies a subset of the recent literature, with special emphasis on visibility graphs, thickness of graphs, graph coloring and the surprising and elegant connections among them all. Other topics are introduced as time permits. Prereq: CSCI 5408. Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to student with graduate standing.
CSCI 5411 - Computational Geometry (3 Credits)
Many practical and aesthetic algorithmic problems have their roots in geometry. Applications abound in the areas of computer graphics, robotics, computer-aided design, and geographic information systems, for example. A selection of topics from convex hull, art gallery problems, ray tracing, point location, motion planning, segment intersection, Voronoi diagrams, visibility and algorithmic folding will be covered. Cross-listed with CSCI 4411. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5446 - Theory of Automata (3 Credits)
Studies the relationships between classes of formal languages (regular, context-free, context-sensitive, phrase-structure) and classes of automata (finite-state, pushdown, Turing machines). Additional topics include decidability and computability issues. Restriction: Restricted to students with graduate standing. Note: Expected knowledge of algorithms equivalent to CSCI 3412.Cross-listed with MATH 5446. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5451 - Algorithms (3 Credits)
Advanced design and analysis techniques: dynamic programming, greedy algorithms, amortized analysis. Advanced data structures: Fibonacci heaps, union-find data structures. Study of variety of special topics, which may include: graph algorithms, optimization problems, Fast Fourier Transform, string matching, geometric algorithms, NP-completeness and approximation algorithms. Restriction: Restricted to students with graduate standing. Note: Expected knowledge of algorithms equivalent to CSCI 3412. Cross-listed with MATH 5446. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5455 - Data Mining (3 Credits)
Introduces concepts, techniques and methodologies to discover patterns in data. Topics include (but are not limited to) data preprocessing and cleansing, data warehousing, pattern mining, classification, prediction, cluster analysis, outlier detection, and online data analytics. Restriction: Graduate Standing. Cross-listed with CSCI 4455. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5452 - Neural Networks (3 Credits)
Parallel distributed representations, dynamics of Hopfield-style networks, content addressable memories, and Hebbian learning are the major topics of the first half. The last half consists of simulated annealing back propagation, competitive learning, and self-organizing networks. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5511 - Parallel and Distributed Systems (3 Credits)
Examines a range of topics involving parallel and distributed systems to improve computational performance. Topics include parallel and distributed programming languages, architectures, networks, algorithms and applications. Prereq: Graduate standing. Cross-listed with CSCI 7551. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5552 - Advanced Topics in Parallel Processing (3 Credits)
Examines the advances of sequential computers for gaining speed and application of these techniques to high-speed supercomputers of today. Programming methodologies of distributed and shared memory multiprocessors, vector processors and systolic arrays are compared. Performance analysis methods for architectures and programs are described. Cross-listed with CSCI 7552. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5559 - Database Systems (3 Credits)
Introduces database system concepts, with examination of relational database systems from conceptual design through relational schema design and physical implementation. Topics include database design and implementation for large database systems, transaction management, concurrency control, object-oriented and distributed database management systems. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5565 - Introduction to Computer Graphics (3 Credits)
Introduces two and three dimensional computer graphics. Topics include scan conversion, geometric primitives, transformation, viewing, basic rendering, and illumination. Emphasis is on the programming using C and C++ Open GL. Cross-listed with CSCI 4565. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5570 - Virtual and Augmented Reality (3 Credits)
This course covers the fundamental concepts and technologies of virtual and augmented reality, and it introduces recent advances in the field. Topics include 3D user interaction, immersive environments, tele-presence, mobile AR, human perception, and VR/AR applications. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 4570. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5573 - Operating Systems (3 Credits)
Students study the principles of computer operating systems and their essential components. Team projects expose students to a variety of system design issues as they relate to the functionality and performance of the system. Topics include I/O devices, Disk Scheduling, File System Organizations, Directory Systems, Sequential and Concurrent process, CPU Scheduling, Memory Management, Deadlock, Process and Threading, and review of some related articles in the literature. Prereq: Expected knowledge of operating systems equivalent to CSCI 3453. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5574 - Advanced Topics in Operating Systems (3 Credits)
Covers the advanced topics in operating systems by examining functionality and performance issues in CPU Scheduling, communications, distributed file systems, distributed operating systems, shared-memory multiprocessors and real-time operating systems. In addition to studying papers, reviews and presentations, students carry out a semester long team project within the scope of one of the above topics. Cross-listed with CSCI 7574. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5575 - Cyber-Physical Systems (3 Credits)
Cyber-physical systems (CPS) bridge the cyber-world of computing, communication and control with the physical world. This course offers an interdisciplinary perspective of CPS within computer science and its applications to understand the issues in the full lifecycle of CPS. Prereq: Graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5580 - Data Science (3 Credits)
Introduces concepts and techniques that enable data cycle from data extraction to knowledge discovery, including but not limited to data exploration, hypotheses testing, data organization, data featurization, supervised and unsupervised data modeling and learning, scaling-up analytics, and data visualization. Restriction: Graduate Standing. Cross-listed with CSCI 4580. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5582 - Artificial Intelligence (3 Credits)
Approaches to design of systems for solving problems usually solved by humans, especially those related to intelligent decision making. Emphasis on various types of knowledge representation. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 7582. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5585 - Advanced Computer Graphics (3 Credits)
An in-depth study of active research topics in computer graphics. Topics include advanced rendering, global illumination, scientific visualization, geometric modeling, simulation and animation. Emphasis is on readings from literature and on a term project. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5593 - Advanced Computer Architecture (3 Credits)
Important concepts in the structural design of computer systems are covered. Topics include memory hierarchy, super pipelining and super scalar techniques, dynamic execution, vector computers and multiprocessors. Expected knowledge of Computer Architecture equivalent to CSCI 4591. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5595 - Computer Animation (3 Credits)
This course introduces the state of the art techniques for modern computer animation focused on a practical, example driven approach to learning the unique art of 3D animation. Topics include modeling, kinematics, rigging, textures, physically based dynamics, and rendering. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5610 - Computational Biology (3 Credits)
Designed to introduce a broad range of computational problems in molecular biology. Solution techniques draw from several branches of mathematics: combinatorics, probability, optimization, and dynamical systems. No prior knowledge of biology is critical, but it would be at least helpful to have the equivalent of BIOL 5099. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5619 - Complex Intelligent Systems (3 Credits)
Prepares the cutting-edge results of research in AI: advanced topics in linguistic geometry. LG is an approach to construction of mathematical models for reasoning about large-scale multi-agent concurrent games. The purpose of LG is to provide strategies to guide the participants of a game to reach their goals. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5620 - Computational Motor Control (3 Credits)
This course introduces techniques for the modeling, simulation and control of movement. These techniques come from computer graphics, robotics and machine learning. The topics that we will cover include robot modeling, trajectory optimization, feedback control, deep reinforcement learning, the neuroscience of movement, and neural network models of the brain. At the end of the course, students will learn how train control policies for virtual agents in computer animation or robotics applications. Restriction: Restricted to Graduate Standing. Cross-listed with CSCI 4620. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5630 - Linguistic Geometry (3 Credits)
Linguistic Geometry (LG) is a type of Game Theory in Artificial Intelligence, which permits to overcome combinatorial explosion and generate optimal strategies in real time. LG is currently changing the paradigm of military command and control in the USA and abroad. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5640 - Universal Compiler: Theory and Construction (3 Credits)
Theoretical foundations and step-by-step hands-on experience in the development of a compiler, which can tune itself to a new programming language. This is a must-take course for future software developers as well as those interested in applications of the theory of Computer Science. Cross-listed with CSCI 4640. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5654 - Algorithms for Communication Networks (3 Credits)
Algorithmic and mathematical underpinnings of communication networks. A taxonomy of data-packet networks depending on modes of communication: fixed-interconnection networks, radio networks and multiple-access channel. Algorithms to implement packet routing and broadcasting. Cross-listed with CSCI 7654. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5660 - Numerical Analysis I (3 Credits)
A first semester course in numerical methods and analysis fundamental to many algorithms encountered in scientific computing, data science, machine learning, and computational models in science and engineering. Rounding errors and numerical stability of algorithms; solution of linear and nonlinear equations; data modeling with interpolation and least-squares; and optimization methods. This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411), linear algebra (e.g., MATH 3191 or 3195), and computer programming (e.g., MATH 1376 or CSCI 1410). Cross-listed with CSCI 4650, MATH 4650, and MATH 5660. Restriction: Restricted to students with graduate standing. Term offered: fall, spring, summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

Typically Offered: Fall, Spring, Summer.

CSCI 5661 - Numerical Analysis II (3 Credits)
A second semester course in numerical methods and analysis fundamental to many algorithms encountered in scientific computing, data science, machine learning, and computational models in science and engineering. Numerical differentiation and integration; random numbers and stochastic modeling; Fast Fourier Transform; data compression; eigenvalues and singular value decompositions with application to regression and dimension reduction. This course assumes that students have the equivalent of differential and integral calculus (e.g., MATH 2411), linear algebra (e.g., MATH 3191 or 3195), and computer programming (e.g., MATH 1376 or CS 1410). Cross-listed with CSCI 4660, MATH 4660 and 5661. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

Typically Offered: Spring.

CSCI 5667 - Introduction to Approximation Theory (3 Credits)
Normed linear spaces, convexity, existence and uniqueness of best approximations. Tchebychev approximation by polynomials and other related families. Least squares approximation and splines. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5682 - Expert Systems (3 Credits)
Reviews and analyzes many expert systems documented in the literature, such as Mycin, Macsyma, and Xcon. Emphasis is given to the design of rule-based systems, the use of uncertain and incomplete information and system shells. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5690 - Knowledge Representation for Intelligent Systems (3 Credits)
An in-depth study of different types of knowledge representation in artificial intelligence for the efficient control of complex real-world systems like autonomous robots, space vehicles, and military units. Major emphasis is on search algorithms and heuristics, logical representation with applications to planning, formal linguistic representation. At the conclusion, all the theories studied are combined in the form of introduction to the state-of-the-art linguistic geometrical representation of complex control systems. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5701 - High-Performance Communication Systems and Network Analysis (3 Credits)
Protocols and architectures related to high performance communication systems as well as network performance analysis techniques are covered. Topics include Integrated Services Digital Networks (ISDN), Broadband ISDN, protocols such as ATM and SONET, and high performance network architectures such as optical networks. Analytical analysis of network performance includes queuing theory and stochastic processes. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5702 - Big Data Mining (3 Credits)
Introduces techniques to discover patterns in Big Data. Selected topics: scalable high-dimensional data clustering, scalable dimensionality reduction, locality sensitive hashing, PageRank, scalable data stream filtering and querying, and scalable classification, in the context of different applications such as Social Network Analysis, Spam Detection, Association Rule Analysis, and Recommender Systems. Cross-listed with CSCI 4702 and CSCI 7702. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5704 - Introduction to Distributed Systems (3 Credits)
Studies design, implementation and management of distributed systems, including communication issues, security reliability, resource sharing, and remote execution. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5728 - Software Engineering (3 Credits)
Groups of students plan, analyze and design large software projects. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5741 - Principles of Cybersecurity (3 Credits)
Focuses on the most common threats to cybersecurity as well as ways to prevent security breaches or information loss. Topics will include: understanding and thwarting hacker methods, authentication, cryptography, programming security, malware analysis, web, database and file server security, network and enterprise security methods. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5742 - Cybersecurity Programming and Analysis (3 Credits)
Focuses on cybersecurity related programming and analysis skills. Topics include: network and security application development, intrusion detection, automating security hardening. Students will design and develop security applications in multiple programming languages. Undergraduate algorithms and programming knowledge expected. Cross-listed with CSCI 4742. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5743 - Cyber and Infrastructure Defense (3 Credits)
This course concentrates on state-of-the-art attack and defense paradigms in cyber systems and infrastructures. Analysis will focus on: theoretical foundations of cybersecurity, practical development of novel technical defense techniques and analysis of alternatives. Knowledge of undergraduate-level networking. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 4743. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5756 - Computer Networks (3 Credits)
An in-depth study of topics in computer networks. Topics include: Internet protocols, TCP/UDP, fast/flow control, IP routing, mobile IP, and P2P overlay networks, networking security, performance, and other current research topics. Prereq: Graduating standing. Cross-listed with CSCI 7765. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5771 - Introduction to Mobile Computing (3 Credits)
This course introduces the fundamentals of mobile computing. Studies existing and proposed solutions for ubiquitous computing. This course focuses on systems and networking issues involved with supporting mobility. Cross-listed with CSCI 4771. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5772 - Mobile and IoT Security (3 Credits)
This course concentrates on the computing of emerging mobile and IoT systems security in the Computer Science domain. The seminar will discuss recent research on computing for mobile user authentication, vulnerability risk detection of mobile/IoT systems, and software based defense mechanism. Restriction: Restricted to graduate school standing. Cross-listed with CSCI 4772. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5773 - Introduction to Emerging System Security (3 Credits)
This course concentrates on the security of the emerging system in the Computer Science domain. It focuses on radically novel systems, relatively fast-growing and potentially exerting a considerable impact on society, such as mobile systems, AI systems, and quantum systems. The security topics cover adversarial attacks, side/covert-channel attacks, co-attack attacks, user authentication, biometrics, vulnerability risk detection, and defense countermeasure. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 4773. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5780 - Theory of Distributed Computing (3 Credits)
Elements of the theory of distributed computing through fundamental algorithmic ideas, lower bound techniques, and impossibility results. Timing assumptions (asynchrony and synchrony), simulations between models (message passing and shared memory), failure types (crash and Byzantine). Restriction: Restricted to students with graduate standing. Note: Expected knowledge of algorithms equivalent to CSCI 3412. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5799 - Cloud Computing (3 Credits)
This course studies fundamental designs and key technologies in Cloud Computing by reading technical articles, and conducting a semester group project. Topics include cloud computing design and architectures, service models, virtualization, advanced computer networks, programming, software, and security. Note: Operating System, Computer Networks, and programming experience are recommended for success in this course. Prereq: Graduate standing. Cross-listed with CSCI 7799. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5900 - Special Topics (3 Credits)
These special topics courses cover recent developments in an aspect of computer science. Restriction: Restricted to students with graduate standing. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5940 - Independent Study (1-3 Credits)
For graduate computer science students. Repeatable. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5986 - Advanced Mobile and Ubiquitous Systems (3 Credits)
This course covers various aspects of mobile and ubiquitous systems to provide an in-depth understanding of principles, state-of-the-art solutions and challenges in design and implementation of such systems. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 4866. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5990 - Computer Game Design and Programming (3 Credits)
Computer Game Design and Programming introduces practical and example driven approaches to modern 3D game development. Topics include 3D modeling, character animation, UI design, level design, scripting, texture mapping, and sound effect. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5993 - Machine Learning (3 Credits)
Provides theoretical and computational foundations in machine learning to design and develop intelligent applications to perform object recognition, personalized recommendations, improve cybersecurity, fact-checking, forecasting and finding communities based on three classes of algorithms: supervised, unsupervised, semi-supervised and reinforcement learning. Restriction: Graduate Standing. Cross-listed with CSCI 4930. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 5997 - Deep Learning (3 Credits)
Provides a foundation on deep learning; a sought-after skill in machine learning. Topics include neural network design & learning, restricted Boltzmann machine, convolution neural network, recurrent neural network, LSTM, deep reinforcement learning, autoencoders, and evolving computation frameworks like TensorFlow, Keras. Restriction: Graduate Standing. Cross-listed with CSCI 4931. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
CSCI 5939 - Internship (1-3 Credits)
Faculty or employer-supervised employment in industry. Enrollment is limited to students who fully complete a contract for cooperative education credit by the last day of the drop or add period. Students who want to enroll this course should submit an official job description that must clearly show the level of work requires a bachelor's degree in the computer science field or equivalent work experience. This course will not be counted towards either MSCS or PhD in CSIS or EAS. Prereq: Complete at least two of category A courses (for MS) or complete Preliminary exam (for PhD) and 3.0 or better GPA. Restricted to students with a minimum of 1 full academic year of study at the graduate level. Repeatable. Max Hours: 3 Credits.
Grading Basis: Satisfactory/Unsatisfactory
Repeatable. Max Credits: 3.

CSCI 5941 - Directed Study, Programming Project (3 Credits)
Software development project supervised by a faculty member approved by the Center for Computational Biology. Used towards a certificate in Computational Biology. Counts as an independent study. Prereq: CSCI 5451 and CSCI 5610. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 5951 - Big Data Systems (3 Credits)
Introduces methodologies that enable Big Data lifecycle. Selected topics: topic modeling, causality analysis, structure learning, learning with less supervision, and massive-scale data analytics, with applications in social media analysis, computational biology, climate modeling, health care, and traffic monitoring. Restriction: Restricted to students with graduate standing. Cross-listed with CSCI 7951. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 5952 - Big Data Science (3 Credits)
Introduces methodologies that enable Big Data lifecycle. Selected topics: topic modeling, causality analysis, structure learning, learning with less supervision, and massive-scale data analytics, with applications in social media analysis, computational biology, climate modeling, health care, and traffic monitoring. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6010 - Principles of Programming (3 Credits)
This course introduces students to fundamental principles and techniques in the design and implementation of modern programming such as C++, Java. Students learn how to write programs in an object oriented high level programming language. Weekly laboratory assignments will provide hands-on experience in this course. (non-CS majors) Prereq: meet MAPS requirements and familiarity with computer use. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6020 - Data Structures and Algorithms (3 Credits)
This course introduces students to fundamental skills in computer science such as data structures and computer algorithms. Students will learn how to design efficient algorithms and analyze them. (non-CS majors) Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6030 - Computer Systems & Application (3 Credits)
This course surveys essential technologies such operating systems, database systems, and the Internet. Students study the basic of operating systems, database systems, and the Internet. Weekly laboratory experiments will provide hands-on experience. (non-CS majors) Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6040 - Teaching Practice of Computer Science (3 Credits)
This course provides students the opportunity for practicing and developing courses for adolescents using previously acquired knowledge. Students will design and develop a computer science class of their interest and appropriate to their area of expertise which they will offer at their school. (non-CS majors) Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6595 - Computational Methods in Nonlinear Programming (3 Credits)
Introduces fundamental algorithms and theory for nonlinear optimization problems. Topics include Newton, quasi-Newton and conjugate directional methods; line search and trust-region methods; active set, penalty and barrier methods for constrained optimization; convergence analysis and duality theory. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6664 - Numerical Linear Algebra (3 Credits)
Offered every other year. Solution of linear equations, eigenvector and eigenvalue calculation, matrix error analysis, orthogonal transformation, iterative methods. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 6950 - Master's Thesis (1-9 Credits)
Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 12.
Additional Information: Report as Full Time.

CSCI 6960 - Master's Report (3 Credits)
Students seeking a Master of Science in computer science, who do not choose to do a thesis, must complete an individual project of an investigative and creative nature under supervision of a full-time CS graduate faculty. Student must present their results to a faculty committee. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.

CSCI 6970 - MS Course Project Report (0 Credits)
This course is for students who select Plan III (Course Only) option to complete their MS degree requirements. Graduating students must register for this course concurrent with a corresponding three credit CSCI course sponsoring course projects and submit a final written research paper on a subject approved by a CSE faculty. Prereq: Completion of at least 3 of the following courses with a B- or higher: CSCI 5446, CSCI 5451, CSCI 5573, and CSCI 5593.
Grading Basis: Satisfactory/Unsatisfactory

CSCI 5446, CSCI 5451, CSCI 5573, and CSCI 5593.
Typically Offered: Fall, Spring.
CSCI 7002 - Computer Security (3 Credits)
A broad overview of computer security, roughly divided into three unequal components: a) the history of codes and ciphers; b) basic cryptographic techniques, for example, symmetric cryptography, authentication techniques, and asymmetric cryptosystems; and c) applications to current and future computer-related technologies, for example, network security, wireless communication, quantum cryptography, and more. Prereq: CSCI 5451. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7173 - Computational Complexity and Algorithms (3 Credits)
A solid, in-depth theoretical foundations in computing, computational complexity, and algorithms. Various algorithms, including both discrete and non-discrete problem domains. NP-complete and other complete classes of problems/languages. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7200 - Advances in Management Information Systems (3 Credits)
Provides a broad coverage of research on the management of information technology. The course covers the systems-oriented research, organizational-oriented research, and information systems economics research. Prereq: PhD standing. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7210 - Topics in Analytical Research in Management Information Systems (3 Credits)
Covers a variety of analytical research topics of interest to the IS research community including the evaluation of data mining algorithm performance, cost sensitive learning and outlier detection. Prereq: Admission to the CSIS PhD program. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7211 - Topics in Behavioral-Organizational Research in Management Information Systems (3 Credits)
Provides in-depth exposure to some key behavioral, management and organizational theories and models used in Information Systems research. Covers topics in socio-technical, trust, computer self-efficacy, organizational transformation, organizational learning, resource-based and coordination theories. Prereq: Admission to the CSIS PhD program. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7407 - Security & Cryptography (3 Credits)
A broad overview of cryptography and its relation to computer security. Topics include basic standard cryptographic techniques, a history of codes and ciphers, RSA, DES, AES, Elliptic Curve Cryptography, ElGamal, and applications to current and future technologies. Restriction: Restricted to Graduate Standing. Cross-listed with CSCI 5407. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7411 - Security & Cryptography (3 Credits)
A broad overview of cryptography and its relation to computer security. Topics include basic standard cryptographic techniques, a history of codes and ciphers, RSA, DES, AES, Elliptic Curve Cryptography, ElGamal, and applications to current and future technologies. Restriction: Restricted to Graduate Standing. Cross-listed with CSCI 5411. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7502 - Research Methods (3 Credits)
Promotes research skills. Involves presenting a research topic and discussions of its merits, reviewing journal articles, writing a paper and/or a proposal in the NIH/NSF format in the student's area of research. Prereq: PhD student standing or permission of instructor for MS students who are writing a thesis. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7511 - Parallel and Distributed Systems (3 Credits)
Examines a range of topics involving parallel and distributed systems to improve computational performance. Topics include parallel and distributed programming languages, architectures, networks, algorithms and applications. Prereq: Graduate standing. Cross-listed with CSCI 5551. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7552 - Advanced Topics in Parallel Processing (3 Credits)
Examines the advances of sequential computers for gaining speed and application of these techniques to high-speed supercomputers of today. Programming methodologies of distributed and shared memory multiprocessors, vector processors and systolic arrays are compared. Performance analysis methods for architectures and programs are described. Cross-listed with CSCI 5552. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7574 - Advanced Topics in Operating Systems (3 Credits)
Covers the advanced topics in operating systems by examining functionality and performance issues in CPU Scheduling, communications, distributed file systems, distributed operating systems, shared-memory multiprocessors and real-time operating systems. In addition to studying papers, reviews and presentations, students carry out a semester long team project within the scope of one of the above topics. Cross-listed with CSCI 5574. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7582 - Artificial Intelligence (3 Credits)
Approaches to design of systems for solving problems usually solved by humans, especially those related to intelligent decision making. Emphasis on various types of knowledge representation. Cross-listed with CSCI 5582. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7595 - Computer Animation (3 Credits)
This course introduces the state of the art techniques for modern computer animation focused on a practical, example driven approach to learning the unique art of 3D animation. Topics include modeling, kinematics, rigging, textures, physically based dynamics, and rendering. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7654 - Algorithms for Communication Networks (3 Credits)
Algorithmic and mathematical underpinnings of communication networks. A taxonomy of data-packet networks depending on modes of communication: fixed-interconnection networks, radio networks and multiple-access channel. Algorithms to implement packet routing and broadcasting. Cross-listed with CSCI 5654. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7655 - Algorithms for Communication Networks (3 Credits)
Examines the advances of sequential computers for gaining speed and application of these techniques to high-speed supercomputers of today. Programming methodologies of distributed and shared memory multiprocessors, vector processors and systolic arrays are compared. Performance analysis methods for architectures and programs are described. Cross-listed with CSCI 5655. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7702 - Research Methods (3 Credits)
Promotes research skills. Involves presenting a research topic and discussions of its merits, reviewing journal articles, writing a paper and/or a proposal in the NIH/NSF format in the student's area of research. Prereq: PhD student standing or permission of instructor for MS students who are writing a thesis. Max Hours: 3 Credits.
Grading Basis: Letter Grade
CSCI 7702 - Big Data Mining (3 Credits)
Introduces techniques to discover patterns in Big Data. Selected topics: scalable high-dimensional data clustering, scalable dimensionality reduction, locality sensitive hashing, PageRank, scalable data stream filtering and querying, and scalable classification, in the context of different applications such as Social Network Analysis, Spam Detection, Association Rule Analysis, and Recommender Systems. Cross-listed with CSCI 4702 and CSCI 5702. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 7711 - Bioinformatics I (4 Credits)
(BIOL 7711-Offered on a semester basis from H.S.C.) What is Bioinformatics and why study it? How is large-scale molecular biology data generated, where and how can researchers gain access to it, what computational analyses are possible and computational techniques for solving inference problems in molecular biology? Prereq: Permission of instructor. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.

CSCI 7712 - Bioinformatics II (4 Credits)
(BIOL 7712-offered on a semester basis from H.S.C.) Inference problems and computational techniques for molecular biology, with emphasis on machine learning approaches. Use of computational induction techniques focused on information extraction from biomedical literature, inference of biochemical networks from high-throughput data and prediction of protein function. Estimation, clustering, discrimination and regression. Prereq: CSCI 7711. Max Hours: 4 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

CSCI 7765 - Computer Networks (3 Credits)
An in-depth study of active research topics in computer networks. Topics include: Internet protocols, TCP/UDP, congestion and flow control, IP routings, mobile IP, P2P overlay networks, network security, performance, and other current research topics. Prereq: Graduate standing. Cross-listed with CSCI 5765. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7799 - Cloud Computing (3 Credits)
This course studies fundamental designs and key technologies in Cloud Computing by reading technical articles, and conducting a semester group project. Topics include cloud computing design and architectures, service models, virtualization, advanced computer networks, programming, often software, and security. Note: Operating System, Computer Networks, and programming experience are recommended for success in this course. Prereq: Graduate standing. Cross-listed with CSCI 5799. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.

CSCI 7800 - Special Topics (3 Credits)
These special topics courses cover recent developments in an aspect of computer science. Prereq: As determined by instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 7840 - Independent Study (1-6 Credits)
Offers doctoral students opportunity for independent, creative work under supervision of a CSE full-time graduate faculty. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

CSCI 7866 - Advanced Mobile and Ubiquitous Systems (3 Credits)
This course covers various aspects of mobile and ubiquitous systems to provide an in-depth understanding of principles, state-of-the-art solutions and challenges in design and implementation of such systems. Restriction: Restricted to students with graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

CSCI 7952 - Big Data Science (3 Credits)
Introduces methodologies that enable Big Data lifecycle. Selected topics: topic modeling, causality analysis, structure learning, learning with less supervision, and massive-scale data analytics, with applications in social media analysis, computational biology, climate modeling, health care and traffic monitoring. Restriction: Graduate standing. Cross-listed with CSCI 5952. Max Hours: 3 Credits.
Grading Basis: Letter Grade

CSCI 8990 - Doctoral Dissertation (1-9 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 9.
Additional Information: Report as Full Time.

Engineering (ENGR)

ENGR 5150 - Seminar: Special Topics in Engineering (1 Credit)
A flexible seminar format dealing with topics of special interest in engineering on a graduate level. Topics vary from semester to semester. Prereq: Graduate standing. Cross-listed with ENGR 4150 and 7150. Max hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students.
Typically Offered: Fall, Spring.

ENGR 5208 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ENGR 5301 - Systems Engineering: Principles and Practice (3 Credits)
Max Hours: 3 Credits.
Grading Basis: Letter Grade

ENGR 5302 - Systems Engineering: Planning and Management (3 Credits)
Max Hours: 3 Credits.
Grading Basis: Letter Grade

ENGR 5303 - Special Topics: Systems Engineering (3 Credits)
Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ENGR 5800 - Long Range Infrastructure Planning and Design: Colorado 2050 (3 Credits)
The goal of this course is to equip students to address the problems of long term future resource limitation and its influence on urban infrastructure in Colorado. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
ENGR 6299 - Introduction to Smart Cities (3 Credits)
This course will explore some of the most change-making technological innovations in the 21st century and their impact on public policy in cities through a survey of best practices, model policies, and lessons learned from cities across the United States and globe. Cross-listed with ENVS 5660, PUAD 5627, and URPL 6299. Max hours: 3 Credits.
Grading Basis: Letter Grade

ENGR 7150 - Seminar: Special Topics in Engineering (0.5 Credits)
A flexible seminar format dealing with topics of special interest in engineering on an advanced graduate level. Topics vary from semester to semester. Prereq: Graduate standing. Cross-listed with ENGR 4150 and 5150. Repeatable. Max hours: 1 Credit.
Grading Basis: Letter Grade
Repeatable. Max Credits: 1.
Restriction: Restricted to graduate students
Typically Offered: Fall, Spring.
Computer Science and Information Systems, PhD

Introduction

Graduate Education Policies and Procedures to apply to this program

Program Director: Gita Alaghband
Website: engineering.ucdenver.edu/CSISPhD (http://engineering.ucdenver.edu/CSISPhD/)

The Computer Science and Information Systems PhD is awarded from the College of Engineering, Design and Computing. The CSIS PhD supports interdisciplinary research between computer science and many fields of interest.

Our students work with research centers and researchers from a variety of disciplines, including the CU School of Medicine, chemistry, mathematics, biology, all engineering disciplines, economics, health, and education, in addition to industry and businesses. This distinctive infrastructure supports basic research in both computer science and information systems as well as the demand of computing and IT integration with all other scientific and business fields.

Admission Requirements

For more information regarding the admission requirements for the CSIS PhD, visit engineering.ucdenver.edu/CSISPhD (http://engineering.ucdenver.edu/CSISPhD/).

Advisor

Upon entering the program, each student must find and be accepted by a research advisor to provide mentoring and guidance throughout the program and work with the student to prepare a program of study. Requests to change advisors must be approved by the program director, and this happens in very rare circumstances. PhD advisors must be full-time tenured or tenure-track faculty within the department of Computer Science and Engineering.

Computer Science Doctoral Committee

The advisor and four other members form a doctoral committee. The advisor must be a full-time current graduate faculty member in the CSE department. One committee member may be from outside the CSE department.

Program Components

Plan of Study

A list of course work and other requirements for the degree should be prepared with the advisor and then submitted to the director for approval. The successful completion of all work indicated on the plan of study is an important prerequisite for the conferring of the degree. A plan of study should be prepared in consultation with the student's research advisor, periodically updated, and reviewed for approval.

CS Preliminary Exam

Students are required to select three out of four core knowledge areas and pass a written exam. The exam must be taken within the first year of the program. Students may take one, two, or all three exams within the first year of their admission. Students may repeat an exam area once. A guide for the exam is available on the department website.

CS Comprehensive Exam

Upon successful completion of the preliminary exam and coursework, students enroll for their dissertation. The Comprehensive Exam (Thesis Proposal) is intended to test student's ability to perform, present and discuss his/her research. This exam has both a written and an oral component.

Dissertation Proposal

A dissertation proposal after the student completes the comprehensive exam is required for the CSIS PhD program. The dissertation proposal will consist of a written proposal detailing the proposed work, advances in the proposed field, partial results, and future work toward completing the student's dissertation.

Dissertation Completion

Once the dissertation proposal is approved, each student prepares and submits a dissertation. The dissertation is defended before the doctoral committee in a public meeting. Final approval for the dissertation is given by a vote of the dissertation committee after the public defense.

Graduation

Upon completion of all degree requirements including the dissertation defense, the student receives the degree of doctor of philosophy in CSIS from the College of Engineering, Design and Computing.
Computer Science, MS

Introduction

Graduate Education Policies and Procedures apply to this program

The Department of Computer Science and Engineering requires master’s degree candidates to complete a program of study consisting of at least 30 semester hours of graduate level computer science courses while maintaining a grade point average of at least 3.0. Graduate courses with grades below B- cannot be applied toward the completion of the graduate degree. With prior approval by the Graduate Committee, a student may substitute up to nine semester hours with graduate mathematics or other engineering courses.

Students in the CSE department are required to have a personal laptop that satisfies the requirements listed on the CSE Laptop Requirement Website (https://engineering.ucdenver.edu/laptops/#ac-computer-science-bachelor-of-science-master-of-science-3).

Data Science in Biomedicine Track

The Data Science in Biomedicine Track is offered under the Computer Science Master of Science degree program for students who choose Plan I - Thesis.

With this new track, students will adopt biomedical applications of data science (as a sample data science application domain) to learn data science methodologies and technologies. Upon successful graduation from the Computer Science MS program under the Data Science in Biomedicine track, students will have an official designation of data science training within their degree, which will help with employment and other opportunities.

The Data Science in Biomedicine Track requires master’s degree candidates to complete a program of study consisting of at least 36 semester hours of graduate level computer science courses while maintaining a grade point average of at least 3.0. Graduate courses with grades below B- cannot be applied toward the completion of the graduate degree. In this plan students will take three “category A” courses, a minimum of four “category B” courses, six hours of MS thesis and an additional 3 courses of electives from a list of courses related to Biomedical Computing and Informatics, Bioinformatics, Health Informatics, etc.

Adequate Progress Toward MS in Computer Science Degree

Students are expected to finish the MS degree program within five years. Candidates for the MS degree may not get credit for a course taken longer than five years before the date on which the degree is to be granted.

Students who do not enroll for any course work relevant to computer science in a given semester (summer semesters excluded) must supply the Department of Computer Science and Engineering with a written statement describing the reason for the inactivity. Students who are inactive for three consecutive semesters (summer semesters excluded) will be removed from the program, and must re-apply for admission.

Program Requirements

Students need to submit an approved Plan of Study to the department during the first semester of their admission. An academic advisor
Cybersecurity and Defense Graduate Certificate

Introduction
This certificate is designed for working professionals in the field of computer science, network and/or security operations. Students are highly recommended to have a background in Computer Science, but will be individually evaluated during the application process. It consists of graduate-level courses in cybersecurity, operating systems, and computer networks or cloud computing. The certificate program in Cyber Security and Defense will prepare Computer Science professionals to identify, analyze, and mitigate technical cybersecurity related vulnerabilities, exploits and attacks against network and critical cyber infrastructure. The coursework emphasizes practical technical skills, analysis and research focused on current cybersecurity issues.

Certificate Objectives
With the advent of greater network, application, and infrastructure connectivity there are more advanced methods of cyber-attack. This certificate program focuses on both the technical and analytical aspects of advanced cybersecurity and defense. Graduates of this certificate program will learn how to mitigate known cyber-related attacks against multiple network and infrastructure devices. Graduates will also learn how to design secure solutions, analyze new cyber-attacks and provide solutions that balance risk, security, privacy, cost, and operations. Each course in this certificate program provides project-based opportunities to extend technical skills in programming, network, operating system, infrastructure design and analysis as well as understanding prevention of cybersecurity breaches and incidents.

Certificate Eligibility
A BS or equivalent in Computer Science is ideal. Applicants with BS degrees other than computer science will be individually evaluated for adequate knowledge in programming, algorithms, and system design and may be assigned additional courses to take as part of the certificate program to address deficiencies in their background.

Students currently in BS-CS degree or in CS Scholars (Dual BS-MS) program at CU Denver need to have completed the undergraduate Operating Systems & Computer Networks and the recommendation of their academic advisor.

In order to receive the Cybersecurity and Defense Graduate Certificate, students in the MSCS program must declare it using the CSE Certificate Declaration Form (https://engineering.ucdenver.edu/docs/librariesprovider29/college-of-engineering-and-applied-science/computer-science/student-resources/certificate—grad-intent-to-complete.pdf?sfvrsn=739efb9_4) and submitting to the CSE department.

Program Requirements
Process to Attain Certificate Objectives
Students will need to complete a sequence of four separate graduate-level courses

Students must take and pass each course with a grade of B- or better and earn a GPA of at least 3.0 to obtain the Cybersecurity and Defense Certificate.

Program Learning Outcomes
1. Demonstrate an in-depth understanding of cybersecurity principles and practices.
2. Identify and analyze various types of cyber and infrastructure threats and apply basic cybersecurity defense concepts to develop and assess defensive solutions against them.
3. Apply cybersecurity knowledge and skills to maintain operations in the presence of risks.
4. Understand the national needs in the area of cybersecurity and learn the necessary skills to advance their careers as practicing cybersecurity professionals.
5. Understand their professional responsibilities and make informed judgments in their cybersecurity practices based on legal and ethical principles.
Engineering and Applied Science, PhD

Introduction

The multidisciplinary Engineering and Applied Science Doctor of Philosophy degree program is offered by the College of Engineering, Design and Computing (p. 236) and consists of a primary and secondary concentration. Applicants apply and enter the program through one of four departments, called the host department, which is chosen based on the applicant’s intended primary concentration of study. The four departments that serve as host departments are:

- Civil Engineering (p. 250)
- Computer Science and Engineering (p. 270)
- Electrical Engineering (p. 287)
- Mechanical Engineering (p. 303)

Each host department offers several concentrations. A list of concentrations can be found on each department's website. Go to engineering.ucdenver.edu (http://engineering.ucdenver.edu) to learn more.

The required secondary concentration can be chosen from any remaining department within the college, including the Department of Bioengineering (p. 238). The secondary concentration may also be chosen from another CU Denver school or college. A student chooses his/her secondary concentration with the help of a faculty advisor after entering the program.

Graduate Education Policies and Procedures apply to this program.

Requirements for Admission

Requirements for admission to the Engineering and Applied Science PhD program can be found at engineering.ucdenver.edu/graduate-admissions.

Program Requirements

The minimum degree requirements consist of:

- 30 semester hours of course work in the primary and secondary areas of concentration
- 30 semester hours of research/dissertation credit
- Each candidate for the degree is expected to take a preliminary examination by the end of the second year. After successful completion of this exam, the student is required to take the comprehensive examination and the doctoral dissertation defense examination.
- Additional requirements are outlined in the Rules and Regulations document that each student signs after being admitted to the program. Each student must also satisfy the degree requirements of the CU Denver Graduate School.
- Program must be completed within eight years of the date the student begins the degree program.

NOTE: for students applying through the Department of Civil Engineering, students must hold an earned master’s degree before they can be admitted to a doctoral program in the Department of Civil Engineering; there is no direct admission from a bachelor’s program to the doctoral program. However, a student enrolled in a master’s program may apply for the doctoral program before the master’s degree is granted, as long as the master’s degree is conferred before they enroll as a doctoral student at CU Denver.
Software Engineering Graduate Certificate

Introduction

This certificate is designed for working professionals, or computer science students beginning careers, in the fields of software engineering and software development. Students are highly encouraged to have a previous computer science or systems engineering degree. At the start of the certificate program students are expected to have a strong understanding of software development in terms of software construction, software coding and basic software design.

In order to receive the Software Engineering Graduate Certificate, students must declare it using the CSE Certificate Declaration Form (https://engineering.ucdenver.edu/docs/librariesprovider29/college-of-engineering-and-applied-science/computer-science/student-resources/certificate-grad-intent-to-complete.pdf?sfvrsn=739eaf9_4) and submitting to the CSE department.

Certificate Objectives

• To provide working or career-oriented students with knowledge and practice of the applied skills needed to become successful software engineers.
• To provide working or career-oriented students with knowledge and understanding of the skills needed to successfully advance their careers as software engineers.

Program Requirements

Process to Attain Certificate Objectives

Students will complete a sequence of three separate graduate-level courses

Students must take and pass each course to obtain the Software Engineering Certificate.
Electrical Engineering

Chair: Mark Golkowski
Program Manager: Annie Schweitzer Bennett
Administrative Assistant: Karla Flores
Office: North Classroom, 2615
Telephone: 303-315-7520
Website: engineering.ucdenver.edu/electrical (http://engineering.ucdenver.edu/electrical/)

Overview

Electrical Engineering Programs
Modern electrical engineering is a very broad and diverse field. Never before has there been such a challenge and opportunity for electrical engineering to serve mankind. Today’s electrical engineers are involved in the development of technology, materials and products to improve the quality of life. They are concerned with the generation and transmission of power, the control and utilization of natural and synthetic resources, the communication of data and information and the intelligent use of computers in consumer as well as industrial products and processes. Systems in electrical engineering range in size from microprocessors through megawatt energy conversion systems to global audio and video communication networks.

Mission Statement
We provide graduate programs and an ABET-accredited undergraduate program that are accessible to a diverse group of students—students of different racial and cultural backgrounds, full-time students as well as those who have considerable work and family commitments outside their academic learning and students with a wide variety of work experiences.

Graduate Program
The Department of Electrical Engineering offers graduate programs with the following areas of emphasis: communications and signal processing; controls and signal processing; microelectronics and VLSI; fields, waves and optics; computer engineering and embedded systems design; and energy and power systems. The department offers graduate programs leading to the degrees of master of science in electrical engineering (p. 296) and master of engineering (p. 295). In addition, the multidisciplinary engineering and applied science doctor of philosophy (p. 298) degree is available through the Department of Electrical Engineering.

Requirements for Admission

Additional admissions information, including links to the online application, is available on the college website.

The minimum requirements for “regular” admission to the master’s program are: BS in electrical engineering, or equivalent degree in math, physics or other engineering disciplines, from a reputable institution, with a GPA of at least 3.0, on a 4.0 scale. Satisfaction of minimum requirements does not guarantee admission: The grades obtained in the student’s area of concentration are important factors in the consideration, and so are possible multiple repetitions of fundamental courses. Students who do not meet the requirements for direct admission to the program may be admitted “conditionally”: that is, they may be required to take or repeat certain undergraduate courses before their admission to the program is official.

For those undergraduate students with degrees in science and non-electrical engineering wishing to pursue graduate study in the electrical engineering department, there is no restriction or constraint in being admitted into the master of science in electrical engineering graduate program. However, they must fulfill any prerequisite course requirements assigned to any graduate course in the department. Students with an undergraduate degree in areas other than electrical engineering must receive approval from their graduate advisor before registering for a class in electrical engineering.

Applicants must submit evidence of adequate preparation for graduate study by either
1. Documenting an earned bachelor’s degree with a GPA of 3.00 or higher from an institution accredited by a U.S. accreditation body, or an earned master’s degree with a GPA of 3.50 or higher from an institution accredited by a U.S. accreditation body.
2. Or submitting official GRE scores (not required).

All applications must be submitted online (https://graduateschool.ucdenver.edu/admissions/apply/). Send all supporting application materials to the Graduate School at the following address:

Mailing Address:
Office of Admissions
Campus Box 167
P.O. Box 173364
Denver, CO 80204

Courier Address (UPS, FEDEX, etc.):
Office of Admissions
1201 Larimer Street, Suite 1005
Denver, CO 80204

For admissions questions, contact graduateadmissions@ucdenver.edu or 303-315-5969.

International Applicants
More information for international applicants is available through the Office of International Admissions (p. 43).

Electrical Engineering (ELEC) Courses

ELEC 5005 - IC Design (3 Credits)
Explores digital integrated circuit design including MOS processing steps, physical operation, building blocks of digital circuits, advanced nMOS, pMOS and CMOS circuit design, silicon VLSI technology and circuit and chip level. Spice and lay-out Editor are used. The physical relationship between circuit design and actual silicon layout and structure and technology are emphasized. Prereq: Graduate standing or permission of instructor. Cross-listed with ELEC 4005. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

ELEC 5025 - Device Electronics (3 Credits)
A course relating performance and limitations of solid state devices to their structures and technology. For both advanced circuit and device engineers. Semiconductor physics and technology, p-n junction and MOS devices used in modern integrated circuits. Prereq: ELEC 3225 and senior standing. Cross-listed with ELEC 4025. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3225 Restriction: Senior standing

ELEC 5033 - Advanced Electromagnetic Fields (3 Credits)
A course focused on electromagnetic waves. Topics include: Poynting's power theorem, reflection and transmission of uniform plane waves in layered media, two-conductor transmission lines, rectangular wave guides, Smith Chart elements of radiation and antenna. Prereq: ELEC 3133 and permission of instructor for undergraduates. Cross-listed with ELEC 4133. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4133 or ELEC 5033

ELEC 5133 - Electromagnetic Radiation and Antenna (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 4133 or ELEC 5033

ELEC 5164 - Electric Machines and Drives (3 Credits)
Covers power electronics drives for rotating electric machinery. Topics include power electronics elements for drives, load characteristics, dynamic modeling of AC machines, fundamental control algorithms, simulation and practical commercial drives. Prereq: ELEC 3164. Cross-listed with ELEC 4164. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall.

ELEC 5170 - Electric Machines and Drives Laboratory (1 Credit)
Offers hands-on experience on rotating electric machine drive simulations and commercial systems. Sessions include pulse-width modulation (PWM) inverter, induction, DC, and synchronous machine drives. Matlab/Simulink and a commercial inverter will be utilized. Prereq: ELEC 4164 or equivalent. Cross-listed with ELEC 4170. Max hours: 1 Credit.
Grading Basis: Letter Grade

ELEC 5194 - Power Systems Operation and Control (3 Credits)
This course introduces the student to various operational strategies the power industry uses today to operate the power system. Topics to be covered include: economic dispatch, unit commitment, optimal power flow problem; economic dispatch; faults and sequence networks; and an introduction to power system protection and dynamics. Prereq: ELEC 3164 and graduate standing or permission of instructor. Cross-listed with ELEC 4194. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3164 or Graduate Standing

ELEC 5184 - Power Systems Analysis (3 Credits)
Topics to be covered include: complex power, per-unit quantities; modeling of generators, transformers and transmission lines; power flow problem; economic dispatch; faults and sequence networks; and an introduction to power system protection and dynamics. Prereq: ELEC 3164 and graduate standing or permission of instructor. Cross-listed with ELEC 4184. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3164 or Graduate Standing

ELEC 5210 - Optimization Methods in Engineering (3 Credits)
Unconstrained optimization, gradient methods, conjugate direction methods, data fitting and function estimation. Applications in control, system identification and radar systems. Optimization over a convex set, LMS algorithms in adaptive systems, convergence properties. Nonlinear programming, Lagrange multipliers, projection algorithms, games and minmax theorem, application to H infinity control, communication and signal processing. Prereq: MATH 3191 and 3200/3195. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MATH 3191 and (3200 or 3195)
ELEC 5220 - Methods of Engineering Analysis (3 Credits)
Grading Basis: Letter Grade
Prereq: (MATH 3191 and 3200) or MATH 3195 or Graduate Standing

ELEC 5230 - Advanced Linear Systems (3 Credits)
Mathematical description of both continuous and discrete-time systems; vector, normed and inner-product spaces; state-space, impulse response and transfer function descriptions; state-transition response matrices; eigenvalues and eigenfunctions; controllability; canonical form; state feedback; observers; realization theory. Prereq: MATH 3191, MATH 3200/3195 and permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: (MATH 3191 and 3200) or MATH 3195 or Graduate Standing

ELEC 5249 - Digital Communication Systems (3 Credits)
Introduces digital communication systems covering elements of information theory; mathematical representation of signals and systems; modulation and demodulation for the additive Gaussian noise channel; Performance analysis of various transmission formats; synchronization; coded waveforms; decoding algorithms; and other related topics. Prereq: ELEC 3316, 3817; recommended ELEC 4247. Cross-listed with ELEC 4248. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: (ELEC 3316 and 3817) OR Graduate Standing

ELEC 5250 - Introduction to Computational Electromagnetics (3 Credits)
An intro to computational electromagnetics based on the Finite Difference Time-Domain (FDTD) covering, finite difference methods, the Yee algorithm, numerical error, stability, boundary conditions, source excitations, hands-on programming experience and application of FDTD to real problems. Prereq: ELEC 3133 or grad standing. Cross-listed with ELEC 4333. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133 or graduate standing

ELEC 5252 - Computer Communication Networks (3 Credits)
Comprehensive study of issues arising in modern computer-communication networks, both wire-line and wireless, carrying traffics with heterogeneous characteristics. A conceptual and analytical approach to the design of network protocols in harmony with the appropriate modeling of the traffic and network environments. Issues covered include routing, transmission, performance monitoring, as well as and network management in ATM multi-media networks. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5256 - Digital Control Systems (3 Credits)
Analysis and design of discrete-time systems, as occurs when a digital computer is used to control physical systems. Topics include difference equations, Z-transform, sampled-data system modeling, sampling, discrete equivalents, stability, and discrete control design by root locus, direct design, frequency-response, and state space. Prereq: ELEC 3316, ELEC 3817, and graduate standing. Cross-listed with ELEC 4276. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Prereq: ELEC 4136 or Graduate Standing

ELEC 5258 - Wireless Networking (3 Credits)
Fundamentals of wireless communication from a physical-layer perspective. Multipath signal propagation and fading channel models. Design of constellations to exploit time, frequency, and spatial diversity. Reliable communication and single-user capacity. Interference management, multiple-access protocols, and multi-user capacity. Cellular uplink and downlink. Multiple-antenna systems and architectures. Communications with Intelligent Reflecting Surfaces. mmWave and THz communications. Connections to modern standards. Prereq: ELEC 3137 and ELEC 3316. Cross-listed with ELEC 4249. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: (ELEC 3316 and 3817) OR Graduate Standing

ELEC 5259 - Advanced Power Electronic Systems (3 Credits)
The course focuses on the design, modeling, modulation, control and simulation of three-phase two-level voltage sourced inverters with emphasis on applications. Student will also be introduced to advanced topologies including diode clamped multilevel inverters, modular multilevel inverters and matrix converters. Prereq: ELEC 4174 or ELEC 5174. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4174 or 5174

ELEC 5260 - Advanced Control Algorithms (3 Credits)
This course focuses on advanced control algorithms that encompass modern control theory, including linear control, nonlinear control, adaptive control, and robust control. Topics include state-space modeling, linearization, stability analysis, and controller design for both continuous and discrete-time systems.
Prereq: ELEC 4250. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4250 OR CSCI 4535 OR MATH 3800 OR Graduate Standing

ELEC 5262 - Information Inference and Learning Algorithms (3 Credits)
We indulge in a journey from the theory of information to the world of applications. We talk about what information means and provide the means to measure it. We then investigate various methods for extracting what matters from the available data. We bring in topics such as Bayesian data modeling, clustering algorithms, and neural networks to name a few. Prereq: ELEC 3817 or CSCI 4535 or MATH 3800. Cross-listed with ELEC 4250. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3817 OR CSCI 4535 OR MATH 3800 OR Graduate Standing

ELEC 5264 - Computer Engineering (3 Credits)
This course introduces some of the most important concepts in computer engineering and prepares students a solid foundation to apply them to applications in the industry and academic research. Prereq: ELEC 3133. Cross-listed with ELEC 4373. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133 Restriction: Restricted to students within the College of Engineering, Design and Computing
ELEC 5375 - Engineering Neuroscience (3 Credits)
In this course, mathematical models and data processing strategies will be introduced as well as other cutting-edge research techniques to help students understand how these techniques can be applied to solve modern neuroscience problems. Prereq: ELEC 3817 or MATH 3800 AND (ELEC 4136 or 4276) OR Graduate Standing. Cross-listed with ELEC 4735 and NRSC 7674 (Anschutz Medical Campus course). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3316 or Graduate Standing

ELEC 5423 - Radio Frequency Laboratory (1 Credit)
Projects involve modern RF analyzers, waveguide devices, time-domain techniques, characterization of devices, signal propagation and scattering, harmonic mixing, and radio frequency identification. Students will gain experience using MATLAB for data acquisition and processing. Graduate students will explore projects in greater detail. Cross-listed with ELEC 4423. Max Hours: 1 Credit.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring.

ELEC 5433 - Fundamentals and Applications of Plasmas (3 Credits)
This course provides an introduction to plasmas, also known as the fourth state of matter, in nature and industry. Topics covered include single particle motions, plasma kinetic and fluid theory, cold and warm plasma models and interaction of electromagnetic waves with plasmas. Applications ranging from space sciences to medicine are explored. Prereq: ELEC 3133 for undergraduate students or permission of the instructor. No prerequisite for CEDC graduate students. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133 + Engineering undergraduates or Prereq: Graduate Engineering
Typically Offered: Fall, Spring.

ELEC 5436 - Nonlinear Control Systems I (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 4136 or ELEC 4276 or Graduate Standing

ELEC 5444 - Power System Laboratory (1 Credit)
This lab introduces the student to modern computational tools used in power system analysis. Algorithms to solve the "power flow problem", the "economic dispatch problem", and the "optimal power flow problem" are discussed and implemented in the Matlab-Simulink mathematical analysis software package. Coreq: ELEC 4184. Max hours: 1 Credit.
Grading Basis: Letter Grade
Coreq: ELEC 4184.

ELEC 5446 - Introduction to Modern Control Theory (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 4136 or ELEC 4276.

ELEC 5455 - Computer Methods for Device Electronics (3 Credits)
Numerical analysis of PN junctions, Bipolar transistors, GaAs MESFETS, and MOSFETS. Numerical solution of discrete-form equations. Finite-difference method for semiconductor devices. Two-dimensional models: DC, transient, and small signal numerical analysis. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

ELEC 5456 - Sampled Data and Digital Control Systems (3 Credits)
Elements of sampling theory. Overview of design approaches via transform methods. Analysis and design in state space. Optimal control systems. Emphasis is placed on computer-aided design projects. Prereq: ELEC 4276. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4276 or Graduate Standing

ELEC 5466 - Adaptive Control System Design (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 4136 or ELEC 4276.

ELEC 5474 - Power Electronics Laboratory (1 Credit)
The power electronics laboratory introduces students to seven fundamental switchmode power conversion topologies, along with voltage and current feedback control, assembled on a reconfigurable power pole circuit board with external power supplies and laboratory. Cross-listed with ELEC 4474. Max Hours: 1 Credit.
Grading Basis: Letter Grade

ELEC 5476 - Optimal Control Systems (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 4136 or ELEC 4276 or Graduate Standing

ELEC 5486 - Modeling and System Identification (3 Credits)
Grading Basis: Letter Grade
Pre-req: (ELEC 3817 or MATH 3800) AND (ELEC 4136 or 4276) OR Graduate Standing
ELEC 5496 - Robust Control (3 Credits)
Background mathematics: function spaces and operators, and factorization theory. Stability theory: stability and stabilizability parameterization, closed-loop transfer matrices. Model-Matching Theory: solution existence, SISO Design, the Nehari problem. Performance bounds. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5501 - Microprocessor-Based Design (3 Credits)
Covers advanced treatment of embedded system design using microprocessors. Analog input circuitry is interfaced to a microprocessor, and a PC board layout is created to develop a complete system design. Software/Operating System is implemented for real-time I/O. Prereq: Graduate standing or permission of instructor. Cross-listed with ELEC 4501. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5511 - Hardware-Software Interface (3 Credits)
Computer engineering methods in hardware and software design applied to problems drawn from the mini- and micro-computer systems field. Hardware and software techniques for the design of combined hardware or software are developed. Interface and real-time programming techniques are considered. Graduate level requires additional projects and homework. Prereq: ELEC 3520. Cross-listed with ELEC 4511. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5521 - Design and Test of Digital Systems (3 Credits)
Application of hardware description languages to the design, synthesis, analysis, and testing of digital and computer systems. Modeling and simulation constructs; modern hardware description languages, including VHDL, logic and behavioral synthesis; rapid-prototyping; FPGA and standard-cell ASIC design; design for testability; and electronic design automation. Prereq: ELEC 3651 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5522 - VLSI Systems (3 Credits)
Examines the design of very large-scale integrated (VLSI) systems from the logic to physical levels, including MOS transistor design, CMOS fabrication and design rules, device and wafer processing, inverter and complex gate design, mask level layout, VLSI system components and architectures, algorithms for VLSI computer-aided design, and testability. Prereq: ELEC 3215 and 3651 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5531 - Introduction to Deep Learning and PyTorch (3 Credits)
This course provides a foundation on neural networks of deep learning. Students will gain both theoretical and practical understanding of different deep neural networks and will work on a few real-world problems. Prereq: ELEC 3520. Cross-listed with ELEC 4531. Max hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5541 - Advanced Deep Learning for Computer Vision (3 Credits)
This course introduces the state-of-the-art deep learning research work. Students will gain both theoretical and practical understanding of deep learning in computer vision area. Prereq: ELEC 3520. Cross-listed with ELEC 4541. Max hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5551 - Pattern Recognition (3 Credits)
Pattern recognition techniques from image processing and artificial intelligence are explored. Topics include neural networks, morphological processing, wavelets, fractals, and basic image understanding. Prereq: ELEC 3316 and 3651. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5555 - VLSI Circuit Simulation (3 Credits)
Grading Basis: Letter Grade

ELEC 5617 - Random Processes for Engineers (3 Credits)
Probability, sequences of random variables, specification of stochastic processes, stationarity, correlation functions and spectral densities, linear mean-square estimation, central limit theorems, law of large numbers, non-stationary random processes, stochastic differential equations and Karhunen-Loeve expansion, Kalman filtering. Prereq: ELEC 3316 and ELEC 3817 and permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5627 - Stochastic Point Processes (3 Credits)
Presents modeling physical phenomena characterized by highly localized events distributed randomly in a continuum. Applications include optical communications, queueing theory, decision theory, nuclear medicine and electron microscopy. Topics include Poisson counting processes and its generalizations; stochastic differential equations used in filtering; martingales and Brownian motion. Prereq: ELEC 3817 or ELEC 5617. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5637 - Digital Signal Processing (3 Credits)
Grading Basis: Letter Grade

ELEC 5651 - Advanced Digital Electronics (3 Credits)
Grading Basis: Letter Grade
ELEC 5638 - Digital Image Processing (3 Credits)
Basics of two-dimensional (2-D) systems theory, including 2-D Fourier transform, Z-transform, and difference equations. Design of 2-D filters for image processing applications. Image transforms, including the 2-D FFT, cosine, Hadamard and KL. Image enhancement and restoration techniques. Method of image coding and compression. Prereq: ELEC 3133, 3215, 3225, 3316, 3817 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5644 - Introduction to Biomedical Imaging (3 Credits)
An important component of the recent expansion in biomedical engineering is the area of biomedical imaging. This ELEC 4644/5644 course is an introduction to biomedical imaging systems, not only covering the fundamentals of imaging physics but also the applications of four primary biomedical imaging modalities: X-Ray Computed Tomography (CT), Magnetic Resonance Imaging (MRI), Nuclear Medicine (i.e. PET, SPECT), and Ultrasound Imaging. Prereq: Graduate standing, or permission of instructor. Cross-listed with ELEC 4644. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133, 3215, 3225, 3316, 3817 or graduate standing

ELEC 5646 - Adaptive Signal Processing (3 Credits)
Grading Basis: Letter Grade
Prereq: ELEC 5637

ELEC 5648 - Blind Signal Processing (3 Credits)
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

ELEC 5657 - Detection and Estimation Theory (3 Credits)
Introduces detection and extraction methods used in signal processing, including decision theory; detection of known and random signals; optimum receiver design; estimation theory; Wiener filtering; Kalman-Bucy filtering; and applications to communication systems. Prereq: ELEC 5617. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 5617

ELEC 5667 - Wavelet Theory and Applications (3 Credits)
Topics include: fundamentals of signal decomposition; theory of filter banks; multi-resolution analysis and fast wavelet transforms; applications image and video image and video compression; and denoising and feature detection. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5678 - Quantum Computing (3 Credits)
The course teaches students the principles, the algorithms and the programming methods of quantum computing, and also discusses the associated physics and mathematics background required. Other related topics such as quantum communication and quantum entanglement will also be discussed. Prereq: PHYS 2331 and ELEC 3817 with a C- or better. Cross-listed with ELEC 4678, PHYS 4678, and PHYS 5678. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: PHYS 2331 with a C- or better, and ELEC 3817 with a C- or better.

ELEC 5679 - Quantum Computing Algorithms (3 Credits)
The course discusses several seminal quantum algorithms, including the quantum Fourier transforms, Grover’s and Shor’s algorithms, followed by explaining several advanced quantum computing algorithms, including quantum error correction, sparse linear systems, and variational eigensolver. Google Cirq quantum programming library will be used for actual quantum programming implementations of the algorithms discussed. Restriction: Restricted to students with graduate standing. Cross-listed with ELEC 4679, PHYS 4679, and PHYS 5679. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

ELEC 5680 - Quantum Computing Technology (3 Credits)
Students will explore some of the concepts and experimental practices for realizing quantum computers. They will engage in laboratory practice of relevant skills including high-performance analog electronics; optics based quantum encryption and eraser implementations; RF electronics; and vacuum and cryogenic techniques. Restriction: Restricted to students with graduate standing. Cross-listed with ELEC 4680, PHYS 4680, and PHYS 5680. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

ELEC 5681 - Quantum Technology Systems (3 Credits)
Students will explore a systems approach toward experimental practices for realizing quantum information science and engineering (QISE), with a focus on vacuum and cryogenic techniques and integration of electronics subsystems into a "dry" cryostat. They will engage in laboratory practice of relevant skills including creation and measurement of high vacuum, methods for reaching ultra-low temperatures, concerns in the design and construction of cryogenic apparatuses, and operation of a "dry" cryogenic system at 4 K, including measurements on superconducting quantum interference devices. Cross-listed with ELEC 4681, PHYS 4681 and PHYS 5681. Max hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5687 - Optical Communication Systems (3 Credits)
System aspects of optical communication system design. Basic principles of sources, channels, detectors, counting statistics, amplifiers, and coding with regard to the performance limitations they place on the communication system. Prereq: ELEC 3133. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3133 Restriction: Restricted to students within the College of Engineering, Design and Computing
ELEC 5688 - Introduction to Nondestructive Testing (3 Credits)
A basic, broad understanding of the principles of nondestructive testing and evaluation is provided. The main objective of this course is to attract students to NDT fields and eventually help address the increasing needs of NDT engineers and technicians. Interaction and collaboration with local NDT industries will also be emphasized. As an introductory course, a broad interdisciplinary knowledge of NDT will be covered in the following sub-areas: Visual, Penetrant, Magnetic Particle, Eddy Current, Microwaves, Ultrasonic, and Radiography. Prereq: Graduate standing, or permission of instructor. Cross-listed with ELEC 4688. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Graduate level students.

ELEC 5697 - Optical and Spatial Information Processing (3 Credits)
Processing of two- and three-dimensional spatial information. The scalar diffraction theory necessary to describe the information-bearing wave-front. Wave-front recording, modulations, and reconstruction. Holography. Fourier transform properties of lenses, two-dimensional convolution and correlation, pattern recognition, and optical information processing. Prereq: ELEC 3316. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3316 or Graduate Standing

ELEC 5710 - Advanced Electric Drive Systems (3 Credits)
Covers advanced theory and implementation techniques for rotating electric machinery drives. Topics include field oriented control theory, detailed dynamic modeling of induction machine/drive system, advanced control algorithms and controller design. Prereq: ELEC 4164/5164 or equivalent. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4164 or Graduate Standing

ELEC 5714 - Energy Systems Analysis (3 Credits)
Transmission line constants, including details of GMD methods, skin effect. Analysis of balanced and unbalanced line using distributed parameters, energy flow from circle diagram approach, traveling-wave phenomena, corona, power cables and fundamentals of DC transmission. Prereq: ELEC 4184. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4184

ELEC 5720 - Practical Electric Drive Systems (3 Credits)
Covers practical control theory and implementation techniques for electric machine drives for rotating electric machinery using high-performance hardware and software. Topics include machine theory review, power converter, control theory, controller design and actual implementation of an induction machine drive using up-to-date microcontroller hardware and software. Prereq: ELEC 2520, ELEC 4164/5164 or equivalent. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 4164

ELEC 5723 - High Performance Computer Architecture (3 Credits)
High Performance Computer Architecture covers the design of advanced computing systems. In particular, the course includes the design of modern microprocessors, characteristics of the memory hierarchy, and issues involved in multithreading and multicore architectures. Prereq: ELEC 3651 Digital Hardware Design. Cross-listed with ELEC 4723. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5725 - Advanced Electric Machinery (3 Credits)
Covers theoretical principles and techniques of electric machine analysis focusing on rotating machinery. Topics include various machine definitions, properties and analysis, software tools, and examples. Prereq: ELEC 3164 or equivalent. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5727 - Computer Vision & Image Processing Acceleration (3 Credits)
Real-time constraints on computer-vision and image processing applications have motivated numerous explorations of multicore architectures to provide more efficiency through hardware parallelism and acceleration. This course undertakes the study of image processing and computer vision algorithms in the context of parallel hardware. Prereq: ELEC 3520. Cross-listed with ELEC 4727. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ELEC 3520.

ELEC 5755 - Renewable Energy Systems (3 Credits)
This course focuses on the modeling, analysis and control of grid-connected wind and photovoltaic energy systems. Prereq: permission of instructor. Cross-listed with ELEC 4755. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 5764 - Power Distribution Systems (3 Credits)
Use of per-unit methods to find transient voltage behavior of industrial power systems resulting from motor starting, spot welders and similar stimuli. System and device responses due to series and shunt capacitors and problems of subharmonics and over-excitation on induction motors. Design of power distribution systems. Prereq: ELEC 4184. Max hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5774 - Power Systems Dynamics and Protection (3 Credits)
Topics to be covered include: power system dynamic fundamentals, various stability problems, such as angle, frequency and voltage stability; protection of power systems apparatus and protective relays coordination. Prereq: ELEC 4184/5184 or graduate standing. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 5780 - Special Topics (1-3 Credits)
Intermediate courses of variable title and variable credit, usually offered once by guest lecturers. See current departmental notices for details. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 5840 - Independent Study: ELEC (1-6 Credits)
Offers the opportunity for independent, creative work. Prereq: Permission of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
ELEC 5939 - Internship Master Student (1-3 Credits)
Student will outline internship tasks every 2-3 weeks in a progress report. Reports will include the details of exposure to electrical/computer engineering concepts. Each concept will be described with respect to CU Denver Electrical Engineering degree program. Courses that were taken pre-internship that prepared student for successful understanding for the task requirements. In addition, preparations that would be help, will also be mentioned. Engineering training in design and software tools related to internship tasks will be clearly described. Final semester report will describe all experiences and include recommendations on how students might prepare to be successful for other common tasks. Requisite: Graduate students must have completed 6 credit hours with a cumulative GPA of 3.0. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Graduate students must have completed 6 credit hours with a cumulative GPA of 3.0.

ELEC 5980 - Statistical Quality Control (3 Credits)
Introduces statistical methods of quality control. Statistical process control, process capability, statistical design of experiments and total quality management. Prereq: Graduate standing or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 6000 - Statistical Signal Processing (3 Credits)
The objective of this course is to present a systematic coverage of statistical signal processing methods which are fundamental for processing, identifying and classifying stochastically (randomly) generated data sequences. Emphasis will be given to methods which resist data outliers. Important applications include communications and biological systems. Prereq: ELEC 5617 or consent of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade

ELEC 6800 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 6950 - Master's Thesis (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.

ELEC 6960 - Master's Report (1-8 Credits)
Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.

ELEC 7800 - Special Topics (1-3 Credits)
Courses of variable title and variable credit, usually offered once by guest lecturers. See current departmental notices for details. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7802 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7803 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7804 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7805 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7806 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7807 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7808 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7809 - Special Topics (1-3 Credits)
Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ELEC 7840 - Independent Study: ELEC (1-6 Credits)
Offers the opportunity for independent, creative work. Prereq: Permission of instructor. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ELEC 8990 - Doctoral Dissertation (1-10 Credits)
Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.
Additional Information: Report as Full Time.
Electrical Engineering, MEng

Introduction
The master of engineering in electrical engineering at CU Denver is a broad-based, interdisciplinary degree designed especially for students who want to further their education in electrical engineering in areas such as engineering administration, where coursework in business management would logically supplement engineering studies.

Areas of concentration
Graduate programs in electrical engineering offer the following areas of concentration:

- Communications and signal processing
- Controls and signal processing
- Microelectronics and VLSI
- Fields, waves and optics
- Computer engineering and embedded system design
- Energy and power systems

Program Requirements
A minimum of 30 semester hours of academic work acceptable to the Advisory Committee (within the rules established by the College of Engineering, Design and Computing) will be required for the Master of Engineering degree. In compliance with the Graduate Education Policies and Procedures, the minimum grade required for a unit to count toward the 30 semester hours is a B minus (2.7).

To couple this degree with electrical engineering, at least 15 of these hours must be 5000-level or above electrical engineering courses and must be taken in the CU Denver Department of Electrical Engineering. As many as 12 hours can be taken outside of electrical engineering. Students must complete a 3 credit hour master of engineering project, ELEC 6960 Master’s Report. The project should cover some area of creative investigation performed by the student and may relate directly to the student's professional work. The project must be defended orally before the Advisory Committee.

Contact the Department of Electrical Engineering (electrical@ucdenver.edu) for more information.
Introduction
The master of science in electrical engineering at CU Denver is geared toward electrical engineers who are interested in advancing their careers or move into leadership positions. There is no specific curriculum for the master of science degree except for a breadth requirement, which is a combination of electrical engineering courses chosen by the student.

Areas of concentration
Graduate programs in electrical engineering offer the following areas of concentration:

- Communications and signal processing
- Controls and signal processing
- Microelectronics and VLSI
- Fields, waves and optics
- Computer engineering and embedded system design
- Energy and power systems

Program Requirements
To fulfill the requirements for the master of science in electrical engineering, the Electrical Engineering Department requires that, within a seven-year period, the candidate completes an approved program in one of two options:

1. A thesis option consisting of at least 30 semester hours, including 6 credit hours of MS thesis, or
2. A course-only option consisting of at least 30 semester hours.

It is also required the candidate maintain a grade point average of 3.0 or higher. In compliance with the Graduate Education Policies and Procedures, the minimum grade required for a unit to count toward the required semester hours is B minus (2.7).

The student must take at least four 3-hour graduate courses (12 credit hours) in the primary area of concentration, and at least two 3-hour graduate courses (6 credit hours) in the secondary area. All of these courses must be taken through the CU Denver Department of Electrical Engineering. The remaining courses may be taken from any area of concentration. A student may also take one 3-credit independent study course with a graduate faculty member of the CU Denver electrical engineering department.

At least 21 graduate credit hours must be taken from the CU Denver Department of Electrical Engineering. At the discretion of the graduate committee, a maximum of nine graduate credits may be transferred from other programs. A request to take a course(s) out side of the department must be approved by the advisor and then approved by a vote from the graduate committee.

Contact the Department of Electrical Engineering (electrical@ucdenver.edu) for more information.
Engineering and Applied Science, PhD

Introduction

The multidisciplinary Engineering and Applied Science Doctor of Philosophy degree program is offered by the College of Engineering, Design and Computing (p. 236) and consists of a primary and secondary concentration. Applicants apply and enter the program through one of four departments, called the host department, which is chosen based on the applicant's intended primary concentration of study. The four departments that serve as host departments are:

- Civil Engineering (p. 250)
- Computer Science and Engineering (p. 270)
- Electrical Engineering (p. 287)
- Mechanical Engineering (p. 303)

Each host department offers several concentrations. A list of concentrations can be found on each department's website. Go to engineering.ucdenver.edu (http://engineering.ucdenver.edu) to learn more.

The required secondary concentration can be chosen from any remaining department within the college, including the Department of Bioengineering (p. 238). The secondary concentration may also be chosen from another CU Denver school or college. A student chooses his/her secondary concentration with the help of a faculty advisor after entering the program.

Graduate Education Policies and Procedures apply to this program.

Requirements for Admission

Requirements for admission to the Engineering and Applied Science PhD program can be found at engineering.ucdenver.edu/graduate-admissions.

Program Requirements

The minimum degree requirements consist of:

- 30 semester hours of course work in the primary and secondary areas of concentration
- 30 semester hours of research/dissertation credit
- Each candidate for the degree is expected to take a preliminary examination by the end of the second year. After successful completion of this exam, the student is required to take the comprehensive examination and the doctoral dissertation defense examination.
- Additional requirements are outlined in the Rules and Regulations document that each student signs after being admitted to the program. Each student must also satisfy the degree requirements of the CU Denver Graduate School.
- Program must be completed within eight years of the date the student begins the degree program.

NOTE: for students applying through the Department of Civil Engineering, students must hold an earned master’s degree before they can be admitted to a doctoral program in the Department of Civil Engineering; there is no direct admission from a bachelor’s program to the doctoral program. However, a student enrolled in a master’s program may apply for the doctoral program before the master’s degree is granted, as long as the master’s degree is conferred before they enroll as a doctoral student at CU Denver.

Overview

Inworks is an innovation initiative of the University of Colorado Denver | Anschutz Medical Campus, based in the College of Engineering, Design, and Computing. As a home for creators, thinkers, designers, and makers, we're a collaborative community of learners and leaders committed to solving humanity’s most pressing problems. In our two state-of-the-art prototyping labs, we draw on expertise from many disciplines to synthesize unique solutions to real-world challenges. At Inworks, we learn and teach through making, but we don't just make things – we make them matter.

Our mission is to impart skills and habits of minds that allow people to collaboratively create impactful solutions to human problems.

When you take an Inworks course, the process of innovation is demystified. You’ll learn the human-centered design process; it will guide you as you move from problem to prototype. In our prototyping labs you can access technologies to 3D print or solder a circuit. But don’t expect to do it alone, because Inworks is a space that catalyzes meaningful collaboration. Students of all majors will find a place here.

Inworks offers an undergraduate or graduate certificate, as well a minor in Human-Centered Design and Innovation.

Programs

- Human-Centered Design and Innovation Graduate Certificate (p. 302)
- Advanced Human-Centered Design and Prototyping (3 Credits)
- IoT: The Internet of Things (3 Credits)
- Introduction to Collaborative Interdisciplinary Design and Innovation (3 Credits)
- Design and Computer-Controlled Fabrication of Three-Dimensional Objects (3 Credits)
- Working individually and in teams, students will develop projects using Inworks’ materials, devices, and fabrication tools. The course involves considerable prototyping and software development but requires only introductory programming and prototyping experience. Suggested Background: IWKS 5100 & some computing experience. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.

Grading Basis: Letter Grade

Inworks: Choose Your Own Adventure: Experiences in Design, Innovation and Prototyping (1-3 Credits)

Provides weekly speakers, workshops and other experiences that educate and enrich across the design, innovation and prototyping landscape. Students may choose to participate in any five (for one credit), ten (for two credits) or fifteen (for three credits) activities. Each week, participating students will attend the scheduled activity, and then create a meaningful response that reflects the impact of that activity on their thinking or practice. Prerequisites: None.

Repeatability: Max hours: 12 Credits.

Grading Basis: Letter Grade

Repeatable. Max Credits: 12.
IWKS 5200 - Data Science for Innovators (3 Credits)
Graduate version of IWKS 3200. Introduces techniques for capturing, processing, visualizing, and making meaning out of large datasets. With the exponential growth and decreasing cost of data collection tools such as genome sequencing, social media, crowd sourced data, mobile phone apps, remote sensors, and data from other publically available sources, innovators are able to harness a rich array of data in their designs. This course will introduce the fundamentals of working with online data and large data sets, introduce widely used data analysis and visualization tools, and culminate in a cumulative project that incorporates data in a significant way. Suggested Background: IWKS 5350 or similar computing experience. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5300 - NAND to Tetris: Foundations of Computer Systems (3 Credits)
Graduate version of IWKS 3300. Introduces the principles of computer systems that underlie the global information age. Starting from first principles, students gradually construct a simple hardware platform and a modern software hierarchy, yielding a working basic yet powerful computer system. Suggested Background: IWKS 2300 or similar computing experience. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5350 - Computational Foundations of Innovation (3 Credits)
Graduate version of IWKS 2300. Introduces the technological underpinnings of modern society, introducing the fundamental principles of computing. Students create realistic artifacts, and imbue those artifacts with interesting behavior by writing computer programs in online virtual world similar to Second Life and for simple Arduino-connected devices. In-class and in-world discussions and readings introduce important computing ideas and concepts. Completion of this course will prepare students for more advanced IWKS graduate courses that require knowledge of computing principles and practices. Prerequisites: None. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5400 - Game Design and Development I (3 Credits)
Graduate version of IWKS 3400. Introduces principles of computer game development, building on the rich interplay of computer science, graphics design, physics, music, and narrative. Students develop interactive 2D and 3D games and a final project. Substantial software development involved, but requires only introductory programming experience. Suggested Background: IWKS 2300 or similar computing experience. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5450 - Game Design and Development II (3 Credits)
Graduate version of IWKS 4450. Continuation of IWKS 5400, with increased emphasis on more advanced techniques including 3D rendering; multimodal music; complex narrative, animation, non-player AI, and advanced 3D techniques including diffuse, ambient, specular, and emissive lighting; vertex, pixel and geometry shaders; shadows; terrain building; reflective and refractive lighting; bump, parallax, and parallax occlusion mapping; Phong and Gouraud shading; “cell” shading; ray tracing; bloom; and high dynamic range lighting. Suggested Background: IWKS 5400 or similar experience in game development. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5500 - Bio-Design and Innovation (3 Credits)
Introduces the biodesign innovation process, which involves identifying important human needs and inventing meaningful solutions to address them. The course examines how biotechnology and bio-inspired innovation improve the form and function of our design world through innovative materials and novel approaches to developing buildings, food, medicine, infrastructure and more. Readings and in-class debates will raise critical issues in contemporary bioethics. For their final projects, students will choose to create and prototype a speculative biodesign concept, or work in the bio lab on the development of a real-world biodesign solution of their choosing. Suggested Background: IWKS 2100 & 3100. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5520 - Design for Healthful Human Longevity (3 Credits)
Graduate version of IWKS 4520. Introduces contemporary studies, therapies, theories, and research on aging, age related disease, and innovations for longer healthier human lives. Guest lecturers, seminar discussions, readings and discussions will inform student projects that address challenges to prolonged, healthy, disease-free lives. Suggested Background: IWKS 5100 and 5700. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5540 - Synthetic Biology for Innovators (3 Credits)
Graduate version of IWKS 3540. Introduces the fundamentals of synthetic biology for those who seek to use it as tool for innovation. Synthetic biology allows us to engineer new biological systems and redesign existing biological components by integrating aspects of biotechnology, evolutionary and molecular biology, systems biology, computer engineering, computational biology, and genetic engineering. Advancement in technological tools and techniques make this material accessible to motivated individuals from many disciplines, and no biology background is required. Culminates with a final team project focused on designing synthetic biology solutions that address human need. Suggested Background: None. No previous background in biology is required. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5550 - Innovation Law and Policy (3 Credits)
Graduate version of IWKS 3550. Introduces legal and regulatory foundations related to innovation, including intellectual property, telecommunications, electronic commerce, the Internet, biotechnology, ethical and equity considerations, and financing. These issues are examined from the perspectives of the legal, business, capital, development, consumer, and policy-making communities. Suggested Background: IWKS 5100. Max hours: 3 Credits.
Grading Basis: Letter Grade
IWKS 5600 - Innovating for the Developing World (3 Credits)
Graduate version of IWKS 3600. Explores the design and development of products and services that can be sustainably and gainfully used by the world's poorest citizens. Students in interdisciplinary teams will design, implement and evaluate viable solutions to real problems faced by people in the developing world. The goal is to develop an understanding of the extraordinary challenges faced by individuals for whom basic survival is not a given, and the knowledge and skills necessary to create designs that respond appropriately to those unique circumstances. Provides a foundation for further study and practice in the area of technology and development. Suggested Background: IWKS 5100. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5620 - Mobile App Development (3 Credits)
Graduate version of IWKS 3620. Introduces mobile application development, including front-end mobile application clients, data handling, connectivity to back-end services and cloud hosting. The course provides an overview and comparison of technical approaches employed by Apple iOS, Google Android, and cross-platform development environments. Students will install, develop, test, and distribute mobile applications while addressing challenges associated with development for any mobile platform: limited screen size and memory, gesture based GUI, varying connectivity, and the wide variety of target mobile devices. Suggested Background: IWKS 5100 & IWKS 5350 or similar computing experience. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5650 - Innovating for the Developing World (3 Credits)
Explores the design of products and services that can be sustainably used by the world's poorest citizens. Students design, implement and evaluate solutions to real problems in the developing world. Provides a foundation for further study and practice. Suggested Background: IWKS 5100. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5660 - Case Studies in Design (3 Credits)
Graduate version of IWKS 4680. Explores why some projects succeed and others fail. Many human-centered interventions fail to meet their designers' objectives, reflecting the unique challenges associated with matching human need with feasibility. Explores how innovators can increase their chances for success by examining several successful (and unsuccessful) designs. Suggested Background: IWKS 5100 & 5700. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5700 - Innovation and Society (3 Credits)
Graduate version of IWKS 3700 Analyzes impact of innovative design on work, sense of self, and social systems, in education, healthcare, finance, and other sectors. Investigates how people customize / "hack" technologies they use, and the moral / ethical implications of being designers. Students will research the impact of an innovation of their choice and share via essays, models, videos, or another medium of their choice. Suggested Background: IWKS 5100. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.

IWKS 5750 - Critical Analysis of Design (3 Credits)
Graduate version of IWKS 3700. Examines technologies that pervade daily life. Analyzes impact of designs on work lives, sense of self, and social systems, within education, healthcare, finance, and other sectors. Investigates how technologies are customized and ethical implications of designing systems for others. Suggested Background: IWKS 5100. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5800 - StartUp: Creating New Ventures (4 Credits)
Teams of students are guided to create and launch a new company in a single semester. Culminates in a "pitchfest" to area entrepreneurs and venture capitalists. One of two alternative capstone courses for the Inworks Minor in Design and Innovation. Restriction: Requires enrollment in the Inworks HCDI minor or certificate, or instructor permission. Suggested Background: Completion of at least three other Inworks courses. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Requires enrollment in the Inworks HCDI certificate.

IWKS 5850 - Product Design (3 Credits)
Graduate version of IWKS 3850. Explores the design requirements associated with creating a product that will be manufactured in large quantities and used by potentially thousands of users. These requirements are often very different from those associated with creating a working prototype. This gap between prototype creation and starting a business offers an interesting and unique set of design challenges. As part of the course, teams of students will engage in a realistic product design cycle. Max hours: 3 Credits.
Grading Basis: Letter Grade

IWKS 5900 - Graduate Capstone (4 Credits)
Graduate version of IWKS 4900. Working closely with project sponsors, students design, implement, and evaluate a project for use in local industry and non-profit organizations. One of two alternative capstone courses for the Inworks Graduate/Professional Certificate in Design and Innovation. Prereq: IWKS 5100 and enrollment in the Inworks graduate certificate. Max hours: 4 Credits.
Grading Basis: Letter Grade
Prereq: IWKS 5100 and enrollment in the Inworks graduate certificate.

IWKS 5930 - Special Topics in Human Centered Design and Innovation (1-4 Credits)
Emergent issues and professional developments in design, innovation and prototyping. Consult the current online Inworks Course List for semester offerings as new special topics courses are frequently added. With permission, may be repeated for credit. Restriction: Restricted to students with graduate standing. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.

IWKS 5970 - Independent Study in Human Centered Design and Innovation (1-6 Credits)
Studies initiated by students or faculty and sponsored by a faculty member to investigate a special topic or problem related to design, innovation and prototyping. With permission, may be repeated for credit. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 8.
Human-Centered Design and Innovation Graduate Certificate

Introduction
Augment your existing expertise with an interdisciplinary understanding of design and innovation processes. The graduate certificate in Human-Centered Design and Innovation will expand your ability to contribute to interdisciplinary teams that seek to address complex human problems.

Please contact your graduate advisor about pursuing the Human-Centered Design and Innovation graduate certificate or email us at inworks@ucdenver.edu for more information.

Certificate Eligibility
Any CU Denver graduate student, degree or non-degree seeking, is eligible to earn the certificate in Human-Centered Design and Innovation.

Students planning to pursue a Human-Centered Design and Innovation certificate should complete a certificate declaration form and obtain approval from an Inworks advisor.

Certificate Requirements
The following classes must be completed with a grade of C- or better:

Overview

Mission Statement
The mission of the Department of Mechanical Engineering is to contribute to the economic development of the state of Colorado and the Denver metropolitan area by providing high-quality bachelor’s, master’s (BS, MS and MEng) and PhD programs in mechanical engineering for a diverse group of working students.

Program Objectives
The programs offered by the Department of Mechanical Engineering of the University of Colorado Denver can be completed in the afternoon and evening hours to accommodate both working and traditional students. The department seeks to graduate a diverse population of students with bachelor’s and master’s degrees, who within a few years of graduation are able to:

• be employed by a diverse group of industries, research laboratories and educational institutions
• pursue careers in engineering, interdisciplinary areas, research and education
• pursue postgraduate education and advanced degrees

Graduate
The Department of Mechanical Engineering offers graduate courses, a master of science (MS) (p. 310) degree program and a master of engineering (MEng) (p. 309) program. In addition, the multidisciplinary engineering and applied science doctor of philosophy (p. 298) degree is available through the Department of Mechanical Engineering. The areas of research interest in which a student may undertake studies at the Denver campus include manufacturing processes, fluid mechanics, solid mechanics, bioengineering, energy thermodynamics and composite materials.

As a student in the MS or MEng program, you must meet with your graduate advisor before or during your first semester and design a sequence of elective courses that form a coherent program plan.

Concurrent Bachelor’s/Master’s Degrees
Students wishing to obtain a BS degree with a major in mechanical engineering and either the MS or the MEng degree in mechanical engineering may do so with up to 6 semester hours of 5000-level or above courses applying to both degrees. The 5000-level courses must meet the degree requirements for the graduate degree sought and must be suitable technical electives for the undergraduate degree. This option is open only for students seeking both degrees at CU Denver. Students must meet admission requirements to be accepted into the graduate program. Completion of two 5000-level courses does not guarantee admission into the graduate program. Please see an advisor for restrictions and guidelines.

Engineering and Applied Science PhD Program
The engineering and applied science doctor of philosophy program consists of studies in engineering and engineering-related disciplines. It is a multidisciplinary program in keeping with the interdisciplinary nature of modern research. The degree is conferred by the College of Engineering, Design and Computing. However, applicants to the degree program apply to and enter the program through one of four departments, called the host department, of the college. The applicant chooses his/her host department based on his/her intended primary concentration of study. The four departments of the college that serve as host departments are Civil Engineering, Computer Science and Engineering, Electrical Engineering and Mechanical Engineering. Each host department offers several concentrations. The secondary concentration can be chosen from any remaining department of the college, including Bioengineering. The secondary concentration may also be chosen from another college/school at CU Denver. The course work in the primary and secondary areas must consist of ten courses (30 semester hours). In addition to other courses, a student must take at least five courses in his/her primary area of concentration and at least three courses in a secondary area of concentration. Other courses may be recommended by the student’s advisor. Research that spans across two or more of the five college departments is strongly encouraged and is a major strength of the program.

Admissions to Mechanical Engineering
All applicants should apply online at: www.ucdenver.edu/academics/colleges/Graduate-School/prospective/Pages/apply.aspx (See the International Students (p. 43) section of the catalog.) All applicants for admission must submit complete credentials as outlined in the instructions that accompany the application materials.

Inquiries about graduate study in mechanical engineering should be addressed to:

CU Denver Department of Mechanical Engineering  
Campus Box 112  
P.O. Box 173364  
Denver, CO 80217-3364

Applicants who are not citizens or permanent residents of the United States should make application through the

Office of International Admissions  
Campus Box 185  
P.O. Box 173364  
Denver, CO 80217-3364

(See the International Students (p. 43) section of the catalog.) All applicants for admission must submit complete credentials as outlined in the instructions that accompany the application materials.

Programs
• Engineering and Applied Science, PhD (p. 308)  
• Mechanical Engineering, MEng (p. 309)  
• Mechanical Engineering, MS (p. 310)

Faculty
Associate Professors:
R. Dana Carpenter, PhD, Stanford University  
Kannan N. Premnath, PhD, Purdue University  
Ronald A. L. Rorrer, PhD, Virginia Polytechnic Institute and State University, PE-Colorado  
Samuel W. J. Welch, PhD, University of Colorado Boulder  
Christopher M. Yakacki, PhD, University of Colorado Boulder
Assistant Professors:
Brecca Gaffney, PhD, University of Denver
Guoying Dong, PhD, McGill University
Kai Yu, PhD, Georgia Tech
Linyue Gao, PhD, Iowa State University
Maryam Darbeheshti (clinical teaching track), PhD, University of Denver

Senior Instructor:
Joseph F. Cullen Jr., MS, University of Colorado

Instructor:
Douglas Gallagher, BS Engineering Physics, Colorado School of Mines

Professors Emeriti:
James Gerdeen, PhD, Stanford University
Peter E. Jenkins, PhD, Purdue, MBA, Pepperdine, PE-Texas
J. Kenneth Ortega, PhD, University of Colorado Boulder

Associate Professor Emeritus:
B. Thomas Ambger, MS, University of Colorado

Mechanical Engineering (MECH) Courses

MECH 5001 - Seminar: Introduction to Research (1 Credit)
This course is intended to introduce graduate students to the fundamental skills and methods needed to perform research. Topics include writing technical papers, presentation skills, testing methodology, hypothesis creation and more. Max Hours: 1 Credit. Grading Basis: Letter Grade

MECH 5020 - Biomechanics (3 Credits)
Static and dynamic biomechanical analysis, effects of mechanical loading on bone and cartilage, design considerations in orthopaedic devices, muscle function, biomechanics of human movement, cardiovascular biomechanics. Restriction: Graduate standing or permission of the instructor required. Cross-listed with MECH 4020. Max hours: 3 Credits. Grading Basis: Letter Grade

MECH 5024 - Mechanical Behavior of Materials (3 Credits)
Students will learn about the mechanical behavior of materials using a multi-scale, materials oriented approach. The course will relate how atomistic and molecular mechanisms relate to macroscopic and continuum properties of materials across acute and long-term time scales. Restriction: Graduate standing or permission of the instructor required. Cross-listed with MECH 4024. Max hours: 3 Credits. Grading Basis: Letter Grade

MECH 5025 - Advanced Biomechanics (3 Credits)
This course provides training in computational and experimental methods for biomechanical engineering analysis. Topics include finite element analysis of biological systems, orthopedic device design, medical imaging analysis, mechanical characterization of biological tissues, and biomechanics of human movement. Prereq: MECH 4020 or MECH 5020. Max Hours: 3 Credits. Grading Basis: Letter Grade

MECH 5030 - Experimental and Computational Methods of Human Movement (3 Credits)
The objective of this course is to provide an overview of the various experimental and computational tools to measure and study human movement. Using a motion capture laboratory and musculoskeletal modeling, these tools will be used to develop a thorough understanding of how engineering principles can be used to address the major challenges of human movement biomechanics, with a primary emphasis on experimental measurement methods and simulations of movement. These tools will be used to explore the interaction of musculoskeletal properties, including whole-body and joint level biomechanics, with the environment during dynamic motion. Course topics include neuromuscular mechanics, balance performance, inverse dynamics, simulation of dynamic muscle#tendon mechanics, and musculoskeletal model development. Cross-listed with MECH 4030. Term offered: fall, spring. Max hours: 3 Credits. Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

MECH 5110 - Numerical Methods for Engineers (3 Credits)
Introduces numerical analysis. Solution of linear and nonlinear equation systems. Numerical methods for ordinary and partial differential equations. Engineering applications. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4110. Max Hours: 3 Credits. Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

MECH 5112 - Introduction to Internal Combustion Engines (3 Credits)
This course provides an introduction to the major characteristics of internal combustion engines and defines the major parameters used to describe the engine operation and design conditions. Students perform analysis of the thermal performance of the engines. Restriction: Graduate standing or permission of the instructor required. Cross-listed with MECH 4112. Max hours: 3 Credits. Grading Basis: Letter Grade

MECH 5114 - Designing with Composites (3 Credits)
Analysis and design of polymers and polymer-based composites. Failure criteria include static strength, stiffness, creep, fatigue, impact and fracture toughness. Design criteria include strength-to-weight ratio and cost-to-strength ratio. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4114. Max Hours: 3 Credits. Grading Basis: Letter Grade

MECH 5115 - Applied Plasticity and Creep (3 Credits)
Plastic deformation of materials applied to bulk and sheet metal manufacturing processes such as extrusion, rolling and sheet metal. Linear and nonlinear viscoelastic creep with applications to plates and shells. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4115. Max Hours: 3 Credits. Grading Basis: Letter Grade

MECH 5120 - Methods of Engineering Analysis (3 Credits)
Selected topics from real analyses with applications to engineering analyses. Topics include vector calculus, ordinary differential equations, partial differential equations and calculus of variations. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4120. Max Hours: 3 Credits. Grading Basis: Letter Grade

MECH 5121 - Finite Element Methods (3 Credits)
Introduction to finite element methods for structural and non-linear problems. Linear static and dynamic problems of solids and thin plates. Cross-listed with MECH 4121. Max Hours: 3 Credits. Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

MECH 5125 - Advanced Finite Element Methods (3 Credits)
Advanced finite element methods for structural and non-linear problems. Linear static and dynamic problems of solids and thin plates. Cross-listed with MECH 4125. Max Hours: 3 Credits. Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

MECH 5130 - Fracture Mechanics (3 Credits)
Analysis of static and dynamic fracture mechanics and fracture toughness. Design criteria include strength-to-weight ratio and cost-to-strength ratio. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4130. Max Hours: 3 Credits. Grading Basis: Letter Grade

MECH 5141 - Finite Element Analysis (3 Credits)
Introduction to finite element methods for structural and non-linear problems. Linear static and dynamic problems of solids and thin plates. Cross-listed with MECH 4141. Max Hours: 3 Credits. Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

MECH 5143 - Nonlinear Elasticity (3 Credits)
Nonlinear elasticity of compression and tension. Cross-listed with MECH 4143. Max Hours: 3 Credits. Grading Basis: Letter Grade

Typically Offered: Fall, Spring.

MECH 5150 - Advanced Materials and Manufacturing (3 Credits)
Advanced materials and manufacturing processes. Cross-listed with MECH 4150. Max Hours: 3 Credits. Grading Basis: Letter Grade

Typically Offered: Fall, Spring.
MECH 5121 - Introduction to Fluid Dynamics (3 Credits)
Physical properties of gases and liquids; kinematics of flow fields; equations describing viscous, heat-conducting Newtonian fluids. Exact solutions and rational approximations for low- and high-speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows. Graduate standing or permission of instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5122 - Macroscopic Thermodynamics (3 Credits)
Axiomatic presentation of fundamentals of classical thermodynamics (first law); energy, work and heat. Equilibrium, reversible, and irreversible processes; entropy production and the second law. Applications to stability and phase equilibrium. Irreversible thermodynamics and the Onsager reciprocal relations. Restriction: Graduate standing or permission of instructor required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5123 - Introduction to Continuum Mechanics (3 Credits)
Cartesian tensor notation. Deformation, strain, strain rate and compatibility. Definition of stress vector and tensor. Fundamental balance laws of mass, momentum and energy; entropy production inequality. Constitutive equations for elastic, viscoelastic and plastic materials; ideal, compressible, and viscous fluids. Beltrami-Mitchell and Navier-Stokes equations. Restriction: Graduate standing or permission of instructor required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5124 - Yield-Limited Behavior of Materials (3 Credits)
Analysis of material behavior within the "elastic range," with emphasis on the phenomenon of yield and factors that influence it. Examination of the theory of dislocations; study of strengthening mechanisms in solids. Consideration of various time-dependent but reversible (inelastic) deformation phenomena. Presentation of appropriate engineering case studies to augment various topics. Graduate standing or permission of the instructor required. Prereq: MECH 5143 with a grade of B- or higher. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate standing or higher

MECH 5133 - Theory of Inelastic Materials (3 Credits)
Mathematical theory of linear viscoelasticity. Finite elements models. Solution of boundary-value problems in linear viscoelasticity. Non-Newtonian flow. Selected topics in nonlinear material behavior. Graduate standing or permission of the instructor required. Prereq: MECH 5143 with a B- or higher. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate standing or higher

MECH 5141 - Viscous Flow (3 Credits)
Viscous incompressible fluid flows. Topics include derivation of equations governing viscous compressible fluid motion; specializations to simple flows; boundary-layer theory; similarity solutions; introduction to turbulence and Reynolds stresses. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4141. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5142 - Statistical Thermodynamics (3 Credits)
Introduces the molecular interpretation and calculation of thermodynamic properties of matter, thermodynamic probability, distribution functions, Schrodinger wave equations and solutions and ensemble theory. Applications to ideal and real gases, solids, liquids, radiation, conduction electrons, and chemical equilibrium. Restriction: Graduate standing or permission of instructor required. Max hours: 3 Credits.
Grading Basis: Letter Grade

MECH 5143 - Theory of Elasticity (3 Credits)
Review of the basic equations of linear theory of elasticity. St. Venant torsion and flexure. Plane strain, plane stress, and generalized plane stress. Application of conformal mapping and Fourier transform techniques. Restriction: Graduate standing or permission of instructor required. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5144 - Plasticity and Creep (3 Credits)
Inelastic deformation of materials such as metals, alloys, glasses, composites and polymers from the phenomenological and structural point of view. Case studies of plastic and creep deformations in engineering materials. Prereq: MECH 5143 with a grade of B- or higher and graduate standing or permission of the instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate standing or higher

MECH 5161 - Compressible Flow (3 Credits)
Energy, continuity, and momentum principles applied to compressible flow; one-, two-, and three-dimensional subsonic, supersonic and hypersonic flows. Normal and oblique shocks, and method of characteristics. Prereq: MECH 5141 with a grade of B- or higher and graduate standing or permission of the instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5141 with a B- or higher Restriction: Restricted to graduate standing or higher

MECH 5162 - Heat Transfer I (3 Credits)
Review of equations governing transport of heat by conduction and radiation. Analytical and numerical solution of boundary value problems representative of heat conduction in solids. Radiation properties of solids, liquids and gases; transport of heat by radiation. Prereq: Graduate standing or permission of instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5163 - Dynamics (3 Credits)
Review of Newtonian dynamics, Lagrange's equation for particles, systems and rigid bodies. Conservative and non-conservative systems, moments of inertia, principal axes, angular momentum and Euler equations. Illustrations from spinning bodies, including tops, gyroscope and rotating machinery. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4163. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students
MECH 5166 - Computerized Numerical Control (CNC) Manufacturing (3 Credits)

Modern manufacturing engineering concepts using computerized numerical control (CNC). The students learn state-of-the-art CNC methodologies, including digitizing, drawing, generating codes, and manufacturing using modern CNC machines. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4166. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5172 - Heat Transfer II (3 Credits)

Review of equations governing transport of heat in fluids in motion. Description of heat transfer in free and forced convection, including laminar and turbulent flow. Dimensional analysis and heat transfer correlations, numerical methods and combined heat transfer mechanisms. Graduate standing or permission of the instructor required. Prereq: MECH 5141 with a B- or higher. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5141 with a B- or higher Restriction: Restricted to graduate standing or higher

MECH 5175 - Finite Element Stress Analysis (3 Credits)

Students learn basic theory of finite element analysis (FEA) as it applies to stress analysis and design of mechanical components. Commercial package will be used giving students practical experience in the use of FEA. Graduate standing or permission of the instructor required. Prereq: MECH 5143 with a B- or higher. Cross-listed with MECH 4175. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5143 with a grade of B- or higher Restriction: Restricted to graduate standing or higher

MECH 5176 - Introduction to Sports Engineering (3 Credits)

Sports Engineering requires working both with the principles of biomechanics and the principles of engineering design and analysis. Using biomechanics is necessary in understanding the forces on the interface between the human athlete and his/her equipment. Prereq: Graduate standing or permission of the instructor required. Cross-listed with MECH 4176. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5177 - Energy Conversion (3 Credits)

This introductory Energy Conversion course introduces the basic background, terminology, and fundamentals of various forms of energy conversion. The topics covered will include: fuel cells, batteries, photovoltaic systems, solar thermal, and wind energy. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4177. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5178 - Solar Engineering (3 Credits)

This course provides the student with the basic ideas and calculation procedures on how solar processes work and how their performance can be predicted. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4178. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5179 - Introduction to Turbomachinery (3 Credits)

This introductory Turbomachinery course introduces the basic background, terminology, and fundamentals of various forms of turbomachines. The analysis of the various turbomachines will be focused on the performance of the turbomachine. Prereq: Graduate standing or permission of instructor required. Cross-listed with MECH 4179. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate students

MECH 5180 - Advanced Heat Transfer (3 Credits)

This course provides fundamental concepts and applicable mathematical techniques for understanding the physics of various modes of heat transfer. Topics include heat conduction in finite and semi-infinite domains, phase change, microscale heat conduction, laminar forced and free convection, turbulence forced and free convection, and thermal radiation. Prereq: Graduate standing or permission of instructor required. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate level students.

MECH 5182 - Microscale Transport Phenomena (3 Credits)

This course provides the foundations on the physics of microscale transport phenomena, where continuum effects break down, with applications in MEMS and NEMS. Topics include gas microflows, liquid microflows, surface tension-driven flows, electrokinetics transport, kinetic theory, simulation techniques, lattice Boltzmann methods. Restriction: Restricted to graduate students in the College of Engineering, Design and Computing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to graduate standing majors in the College of Engineering, Design and Computing

MECH 5188 - Introduction to Turbulence (3 Credits)

This course provides an introduction to turbulence, which is ubiquitous in nature and having a wide range of applications in engineering. The chaotic phenomena in such a class of flows poses major challenges in their understanding and modeling. The topics covered in this course include the statistical 4 tools and spectral analysis for turbulence description, basic equations of motion and flow instability, Reynolds decomposition of flow, energy transport by mean and turbulence motions, turbulence scales, vortex motion, classical turbulent flow configurations, such as free shear flows (jets, wakes, mixing layers) and wall bounded flows (channels, boundary layers), Kolmogorov and other phenomenological theories, and turbulence modeling. Restriction: Restricted to students with graduate standing, or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing.
Typically Offered: Fall, Spring.

MECH 5208 - Special Topics (1-3 Credits)
Subject matter to be selected from topics of current technological interest. Credit to be arranged. Cross-listed with MECH 4208. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

MECH 5228 - Special Topics (1-3 Credits)
Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
MECH 5238 - Special Topics (1-3 Credits)
Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to graduate students
MECH 5840 - Independent Study (1-3 Credits)
Available only through approval of the graduate advisor. Subjects arranged to fit needs of the particular student. Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to graduate students
MECH 5939 - Internship (1-3 Credits)
Students gain engineering design experience involving application of specific technical concepts and skills in a supervised industrial environment. (Must have approval from MECH faculty.) Max hours: 3 Credits.
Grading Basis: Letter Grade
MECH 5950 - Master's Thesis (1-6 Credits)
Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Restriction: Restricted to graduate students
Additional Information: Report as Full Time.
MECH 5960 - Master's Report (3 Credits)
Master of Science in Engineering report. Students seeking the Master of Science in Engineering, and who do not choose to do a thesis, must complete an individual project of an investigative and creative nature under the supervision of a member of the graduate faculty. Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to graduate students
Additional Information: Report as Full Time.
MECH 5970 - Graduate Problem Course (3 Credits)
The graduate problem course is for the solution of specific problems in MECH specialty areas. Each student is assigned a set of problems of some difficulty requiring the use of the literature of the various areas covered. Prereq: 15 hours of graduate level courses in MECH. Max Hours: 3 Credits.
Grading Basis: Letter Grade
MECH 6184 - Advanced Fluid Mechanics (3 Credits)
This course provides a description of the advanced concepts for understanding the physics of fluid motion under different regimes. Topics include kinematics, stresses, equation of motion, vorticity transport, low Reynolds number flow, irrotational flow, interfacial flow, acoustics&waves, hydrodynamic stability & transition, turbulent flow. Prereq: MECH 5141.
Restriction: Restricted to students with graduate standing, or permission of instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: MECH 5141. Restriction: Restricted to students with graduate standing.

MECH 8990 - Doctoral Dissertation (1-10 Credits)
Restriction: Graduate standing or permission of the instructor required. Repeatable. Max hours: 10 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 10.
Restriction: Restricted to graduate students
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring.
Engineering and Applied Science, PhD

Introduction

The multidisciplinary Engineering and Applied Science Doctor of Philosophy degree program is offered by the College of Engineering, Design and Computing (p. 236) and consists of a primary and secondary concentration. Applicants apply and enter the program through one of four departments, called the host department, which is chosen based on the applicant’s intended primary concentration of study. The four departments that serve as host departments are:

- Civil Engineering (p. 250)
- Computer Science and Engineering (p. 270)
- Electrical Engineering (p. 287)
- Mechanical Engineering (p. 303)

Each host department offers several concentrations. A list of concentrations can be found on each department’s website. Go to engineering.ucdenver.edu (http://engineering.ucdenver.edu) to learn more.

The required secondary concentration can be chosen from any remaining department within the college, including the Department of Bioengineering (p. 238). The secondary concentration may also be chosen from another CU Denver school or college. A student chooses his/her secondary concentration with the help of a faculty advisor after entering the program.

Graduate Education Policies and Procedures apply to this program.

Requirements for Admission

Requirements for admission to the Engineering and Applied Science PhD program can be found at engineering.ucdenver.edu/graduate-admissions.

Program Requirements

The minimum degree requirements consist of:

- 30 semester hours of course work in the primary and secondary areas of concentration
- 30 semester hours of research/dissertation credit
- Each candidate for the degree is expected to take a preliminary examination by the end of the second year. After successful completion of this exam, the student is required to take the comprehensive examination and the doctoral dissertation defense examination.
- Additional requirements are outlined in the Rules and Regulations document that each student signs after being admitted to the program. Each student must also satisfy the degree requirements of the CU Denver Graduate School.
- Program must be completed within eight years of the date the student begins the degree program.

NOTE: for students applying through the Department of Civil Engineering, students must hold an earned master’s degree before they can be admitted to a doctoral program in the Department of Civil Engineering; there is no direct admission from a bachelor's program to the doctoral program. However, a student enrolled in a master’s program may apply for the doctoral program before the master’s degree is granted, as long as the master’s degree is conferred before they enroll as a doctoral student at CU Denver.
Mechanical Engineering, MEng

Introduction
The Master of Engineering (MEng) is an interdisciplinary degree program designed to meet the needs of those practicing engineers who wish to follow an integrated program of studies in engineering and allied subjects related to the individual student’s professional work. Students can combine advanced engineering coursework with graduate-level non-engineering courses such as business administration, environmental sciences, social sciences, biological sciences, or public administration. There are also tracks in biomechanics and sports engineering.

Prospective students are required to present a well-defined objective in order to be admitted to the program. An academic program is developed in consultation with faculty advisors to meet this objective.

An advisory committee will be appointed for each student by the department. The advisory committee that guides the student is responsible for approving the individual’s degree program, and admission to candidacy, and the student’s written report and awarding the degree.

Graduate Education Policies and Procedures apply to this program.

Program Requirements
The requirements for admission are the same as those for the MS degree awarded through the College of Engineering, Design and Computing. A minimum of 30 semester hours of academic work is required for the MEng degree. At least 15 of these hours must be at the 5000 level or above in mechanical engineering. A maximum of 12 semester hours may be taken outside of engineering.

In addition to course work, a written report is required in the MEng program as a final project (3 semester hours). The report may be related to the student’s professional work. The report will be of the same general quality as that required for the Master of Science thesis and must be defended orally. It may be based on work done for credit under independent study.
Introduction

Program Options

Students in each of the plans may choose one of four options. In the first three options, the student may choose to specialize in thermal science, mechanics or biomechanics. The fourth option is the general mechanical engineering option.

- The **thermal science option** requires 12 semester hours of course work in analytical methods, numerical methods, fluid mechanics and thermodynamics. The student then selects 9 semester hours of course work in approved electives from a selection of thermal science electives.

- The **mechanics option** requires 12 semester hours of course work in analytical methods, numerical methods, elasticity and dynamics. The student then selects 9 semester hours of course work in approved electives from a selection of mechanics electives.

- The **biomechanics option** requires 30 credit hours to graduate. Please contact the mechanical engineering department or visit the biomechanics website for more information.

- The **general mechanical engineering option** requires the student to take 18 semester hours of required course work in analytical methods, numerical methods, fluid mechanics, thermodynamics, elasticity and dynamics.

After meeting the course requirements for any of the four options the student may select any mechanical engineering graduate course to complete the credit-hour requirements. The student may also take courses approved by an advisor outside of the mechanical engineering department.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

For the Master of Science (MS) degree in mechanical engineering, students may choose between three plans with each plan totaling 30 semester hours.

- Plan I - Students following Plan I (thesis option) take 24 semester hours of formal course work plus 6 semester hours of thesis work.

- Plan II - Students following Plan II (project option) take 27 semester hours of formal course work plus a 3-semester hour final project requiring a report.

- Plan III - Students following Plan III (10-course option) take 30 semester hours of formal course work plus a final comprehensive exam.

Students following Plan I or Plan II must submit a proposal to their examination committee prior to the semester in which they register for their thesis or project semester hours, and the examination committee must approve the proposal for the thesis or project.
College of Liberal Arts and Sciences

Leadership

DEAN
Pamela Jansma, Professor of Geography and Environmental Sciences

ASSOCIATE DEANS
Richard Allen, Associate Dean for Academic and Strategic Planning; Professor of Psychology
Laura Argye, Associate Dean for Research and Creative Activities; Professor of Economics
Faye Caronan, Associate Dean for Faculty and Staff Affairs; Associate Professor of Ethnic Studies
Marjorie Levine-Clark, Associate Dean for Diversity, Outreach and Initiatives; Professor of History
John Swallow, Associate Dean for Student Success; Professor of Biology

College of Liberal Arts and Sciences Educational Goals

A CU Denver liberal education combines world-class knowledge in specific disciplines with the comprehensive skills and dispositions that students need for success and that our society needs its citizens to possess. In a world where content knowledge rapidly becomes obsolete and where graduates may have a dozen different jobs, these skills and dispositions are crucial. Employers increasingly look for employees who can think critically, communicate clearly, and solve complex problems. A liberal education may be the most vocational education that today’s student can earn. A liberal arts and sciences education truly is “learning with purpose”.

The College of Liberal Arts and Sciences defines liberal education as including four major components:

1. Central elements of knowledge including:
   a. knowledge of the diversity and significant dimensions of human culture and a specific understanding of American culture, including its political and ethnic diversity;
   b. aesthetic awareness and appreciation of the cultural contributions made to the human experience by the social sciences and humanities;
   c. an understanding of the methods of inquiry and development of theory that form the basis of knowledge in the natural and physical sciences;
2. Essential skills for critical analysis, writing, computation, communication and decision making;
3. The development of a constructive orientation toward society through the enhancement of the individual's capacity to make informed and responsible choices based on reflective consideration of the democratic principles of due process, civil liberties and the balance between individualism and the common good;
4. The ability to apply knowledge of the arts and sciences to society's specific needs.

The mission of the College of Liberal Arts and Sciences is to foster academic excellence, to create and impart knowledge critical to a modern society and a global economy, and to ensure the acquisition of skills essential for professional careers and graduate study. Our vision is to enact a new paradigm for a liberal arts education that retains the proven values of a broad education while imparting research and career-oriented skills throughout the curriculum.

The College of Liberal Arts and Sciences (CLAS) offers a variety of excellent graduate programs, ranging from the highly specialized PhD in Clinical Health Psychology to the broad interdisciplinary MA in Humanities or Social Sciences. CLAS faculty members are recognized as research leaders, dedicated mentors, and engaged scholars. Bringing real-world experience and academic expertise to our classrooms, CLAS faculty are dedicated to instilling in students a lifelong love of learning and inquiry, cutting-edge research training, respect for free thinking and commitment to collaborative endeavors. Our graduate programs draw on our downtown location and make use of the city's many resources partnerships with Denver businesses and non-profit organizations. CLAS students have excellent opportunities to participate in first-class research in collaboration with faculty and the community.

While establishing a broad foundational education, CLAS gives students the opportunity to dig deeply into disciplinary and interdisciplinary programs, which train them in scholarly fields, traditions, and methods of analysis. This combination of breadth and depth prepares students for our twenty-first century world, which requires flexibility and mobility, as new jobs develop and careers change at an ever-faster pace. CLAS graduates enter a wide variety of occupations and pursue advanced degrees in academia and in professions like law and medicine.

The College of Liberal Arts and Sciences offers a selection of master’s and doctorate degrees across fourteen departments. Our graduate programs provide students the opportunity to work with cutting edge facilities and renowned faculty. In addition to high-quality classroom instruction, graduate students are encouraged to take opportunities to participate in seminars, workshops, and experiential opportunities to develop additional real-world skills necessary to successfully transition into their careers. The college offers graduate certificate programs that demonstrate proficiency in a specialized field of study. Certificates may cross traditional disciplinary boundaries and may be awarded independently of formal graduation. Certificate programs are open to degree-seeking students as well as those who aren't seeking a degree but want to enhance their professional expertise. Many programs offer funding opportunities, Teaching and Research Assistant positions and participate in the Western Regional Graduate Program (https://gratuateschool.ucdenver.edu/admissions/western-regional-graduate-program/).

Explore CLAS Graduate programs here (p. 312).

For more information about CLAS, visit our website. (https://clas.ucdenver.edu/academic-programs/graduate-programs/)

Graduate Education Information and Academic Advice

Graduate students in the college are expected to assume responsibility for planning their academic programs under the guidance of their faculty advisor. Students must follow Graduate Education Policies.
and Procedures, CLAS policies and degree program requirements. Graduate students must work with the CLAS Graduate Academic Services Coordinator in addition to their faculty advisor upon matriculation into the college, to stay on track to graduate.

- The CLAS Graduate Academic Services Coordinator is responsible for managing degree audits and tracking student progress, providing guidance regarding policies and procedures and for certifying that degree requirements have been met for graduation purposes.
- The faculty advisor is responsible for providing guidance on coursework and degree requirements and for certifying that program requirements are complete at graduation. Students should consult with their faculty advisor at least once a semester following admission to the program. While students are strongly encouraged to meet with their faculty advisor every semester, they must meet with their faculty advisor at the beginning of their last semester to verify that all degree requirements have been met and to have their candidacy form approved and signed. This must be done before the campus census date and is considered an absolute deadline.

To learn more about admissions, transfer credits, readmission, changing degree programs, graduate courses, GPA requirements, residency requirements, academic probation, incomplete grades, thesis/project/dissertation procedures and defense, research protocol, comprehensive exams, application to graduate and candidacy to graduate, deadlines and time limits, please consult with your faculty advisor and the CLAS Graduate Academic Services Coordinator at clasgraduate@ucdenver.edu.

**Continuing and Professional Education (CPE)**
The College of Liberal Arts and Sciences (CLAS) participates in the University’s Continuing and Professional Education (CPE) programs, which include credit courses offered through extended studies during evenings, weekends and at off-campus sites. CPE also includes non-credit courses offered for continuing education units (C.E.U.s) or for professional development and personal enrichment.

For more information about CLAS CPE programs, visit our website. (https://clas.ucdenver.edu/cpe/)

**College of Liberal Arts & Sciences Graduate Departments and Programs**

Graduate degree programs offered by CLAS are listed below. Many degrees provide the opportunity for students to specialize in concentrations within the discipline; these are noted below the degree title.

- Anthropology (p. 314)
  - Anthropology, MA (p. 320)
- Chemistry (p. 325)
  - Chemistry, MS (p. 331)
- CLAS Interdisciplinary Certificates (p. 334)
  - Digital Studies Graduate Certificate (p. 335)
  - Social Justice Graduate Certificate (p. 337)
- Communication (p. 339)
  - Communication, MA (p. 344)
  - Health Communication Graduate Certificate (p. 345)
  - Strategic Communication Graduate Certificate (p. 347)

- Dual Degrees (p. 348)
  - Economics MA/Applied Mathematics MS Dual Degree, with a Focus in Applied Statistics (p. 349)
  - Economics MA/Finance MS Dual Degree (p. 350)
  - Economics MA/Public Administration MPA Dual Degree (p. 351)
- Economics (p. 352)
  - Health Economics, MS (p. 359)
  - Health Economics, PhD (p. 360)
  - Economics, MA (p. 361)
  - Applied Econometrics and Data Analytics Graduate Certificate (p. 362)
  - Health Economics and Outcomes Research Graduate Certificate (p. 363)
- English (p. 364)
  - English, MA (p. 371)
  - Teaching College-level Language and Literacy Graduate Certificate (p. 372)
  - Teaching College-Level Literature and Film Graduate Certificate (p. 373)
  - Teaching English Language Learners Graduate Certificate (CTELL) (p. 374)
- Ethnic Studies (p. 375)
  - Ethnic Studies Graduate Certificate (p. 378)
- Geography and Environmental Sciences (p. 380)
  - Applied Geography & Geospatial Science, MA (p. 391)
  - Environmental Sciences, MS (p. 394)
  - Environmental Science Education Graduate Certificate (p. 398)
  - Free and Open Source Software for Geospatial Applications Graduate Certificate (p. 400)
  - Geographic Information Science Graduate Certificate (p. 402)
  - Sustainable Urban Agriculture Graduate Certificate (p. 404)
- Health and Behavioral Sciences (p. 406)
  - Health and Behavioral Sciences, PhD (p. 411)
- History (p. 413)
  - History, MA (p. 421)
  - Public History, MA in History (p. 426)
  - Global History Graduate Certificate (p. 428)
  - U.S. History Graduate Certificate (p. 429)
- Humanities (p. 430)
  - Humanities, MH (p. 434)
- Integrated Sciences (p. 439)
  - Integrated Sciences, MIS (p. 441)
- Integrative Biology (p. 443)
  - Biology, MS (p. 449)
  - Integrative and Systems Biology, PhD (p. 450)
- Mathematical and Statistical Sciences (p. 451)
  - Applied Mathematics, MS (p. 464)
  - Applied Mathematics, PhD (p. 469)
  - Statistics, MS (p. 471)
  - Applied Statistics Graduate Certificate (p. 473)
- Modern Languages (p. 474)
  - Spanish, MA (p. 482)
- Political Science (p. 484)
  - New Directions in Public, Non-Profit and Community Leadership, Political Science, MA (p. 494)

---

312 College of Liberal Arts and Sciences
• Political Science, MA (p. 496)
• Political Science MA / Master of Business Administration (MBA) Dual Degree (p. 498)
• Labor Leadership Graduate Certificate (p. 500)
• Public, Nonprofit and Community Leadership Graduate Certificate (p. 501)
• Psychology (p. 503)
  • Psychology, Clinical Health Psychology, PhD (p. 510)
• Social Science (p. 513)
  • Social Science, MSS (p. 517)
• Sociology (p. 521)
  • Sociology, MA (p. 526)
• Women’s and Gender Studies (p. 528)
  • Women’s and Gender Studies Graduate Certificate (p. 532)

College of Liberal Arts and Sciences Policies

For additional information regarding CLAS policies and procedures, please visit the CLAS Academic Policies website (https://clas.ucdenver.edu/faculty-staff/content/academic-policies/).

All programs must follow the Graduate Education Policies and Procedures.

Independent Studies

Independent studies are faculty-mentored, individually structured courses or research or creative projects designed and scheduled outside of the standard course grid. Independent study allows for investigations beyond the structured curriculum and classroom and exploration of content material that closely relates to faculty and student interest. However, the College of Liberal Arts and Sciences does not guarantee that credit earned through an independent study will count toward graduation requirements or be accepted as transfer credits.

The CU Denver campus requires manual registration using a Special Processing Form for students participating in independent study. This form constitutes the course syllabus agreement between faculty and student. The Special Processing Form requires

1. project title,
2. short, detailed project description, including texts and practical application of skills, and
3. explicit performance or grading criteria.

The faculty should separately negotiate a schedule of meetings and deadlines with the student. The form is reviewed and approved by a CLAS Associate Dean/Assistant Dean prior to student registration.

The College faculty developed the following requirements relating to student and faculty participation in independent study. Faculty seeking to waive or modify any of the policies below should work with the appropriate CLAS Associate Dean/Assistant Dean.

Student Requirements

• Enrollment as a CLAS student or, if enrolled in another major/minor, school/college, or institution, signed authorization on the Special Processing Form by the advisor/chair/dean of the originating school/college or institution prior to review by the CLAS associate or assistant dean.

• Graduate student status for 5840 (or higher), junior or senior status for 4840, sophomore status for 2840.
• Minimum GPA of 2.5 for undergraduates and 3.0 for graduate students.
• Submission of the Special Processing Form prior to the third week of a regular semester. After the third week, a petition to add is required. Summer and intensive sessions will have different deadlines.

Faculty Requirements

• CLAS tenured, tenure-track, Clinical Teaching Track, Senior Instructor, or Instructor rank.
• CLAS graduate faculty status for faculty sponsoring graduate independent study.
• Direct, not indirect, supervision by the designated CLAS faculty member.
• For instructor-rank faculty, approval by the department chair, though all untenured faculty should limit the number of independent studies and are advised to consult with the chair before taking them on.

Project Requirements

• CLAS discipline or directly discipline related content, though may be interdisciplinary.
• Unique or individually executed project content for each student.
• Not available as, or part of, a structured course offered during the same term.
• 3 student participation hours per week for each credit hour requested. Note: 4:1 ratio in summer.
Anthropology

Chair: Marty Otañez
Program Assistant: Connie Turner
Office: North Classroom Building 4002
Undergraduate Advisor: Tiffany Terneny
Graduate Director: Charles Musiba
Telephone: 303-315-7328
Fax: 303-315-7336
Website: clas.ucdenver.edu/anthropology/ (http://clas.ucdenver.edu/anthropology/)

Overview

Graduate Education Policies and Procedures apply to this program.

The unique intellectual challenge of anthropology is to integrate knowledge from many disciplines for a global understanding of cultural and biological diversity in the past and the present. Individual courses in cultural and biological anthropology and archaeology cut across lines of the humanities and social and natural sciences. Because of this integrative perspective on the human condition and the training provided in objectively assessing cultural patterning and social interaction—in archaeology graduates have a strong and versatile base for careers in a variety of fields. Graduates of our program get jobs as professional archaeologists; work in international NGOs as researchers in the health sciences and public health; as college teachers and in international development; while others have been very competitive in prestigious PhD programs (e.g., Berkeley, Pennsylvania, McMaster, Oxford, Stanford).

Specialties and Tracks

CU Denver's Department of Anthropology provides an outstanding graduate education in anthropology, giving students a broad yet thorough grounding in the three major subfields of anthropology, as well as specialized instruction in one or more research orientations in which department faculty have substantial expertise. The graduate faculty in anthropology are particularly known for their research and publications in medical anthropology; immigrant health and immigration; disability; maternal and child health; human growth and development; human evolution; modern human variation; human locomotion; experimental economics; visual anthropology; ethnicity and identity; political economy; Southwestern, Mexican and Neanderthal archaeology; paleoenvironment; and urban and community anthropology. Across the specializations there is a strong emphasis on research design and methodology, providing students concrete job-related skills. Area studies emphases include Latin America, East Africa, the Mediterranean, and the US Southwest. Students also have opportunities to study abroad, to participate in one of several field schools, and to gain international research experience.

Topical Concentrations

- Medical Anthropology
- Archaeology
- Biological Anthropology

Click here (p. 320) to learn about the Anthropology MA Plans of Study.

The graduate program in Anthropology is an active participant in the Western Interstate Commission for Higher Education's Western Regional Graduate Program (www.WICHE.edu (http://www.WICHE.edu)). Students from WICHE states (Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming) pay in-state tuition while maintaining residency in their home state. Just indicate in your application packet that you wish to take advantage of this program.

Financial Aid

The department offers limited tuition assistance, teaching assistantships and research assistantships for graduate students on a semester-by-semester basis. Appointment is competitive and is typically based on a student's academic credentials, GRE scores and preparation in anthropology. Contact the department for details. For information on grants, federal work-study programs, scholarships and loans, contact the CU Denver Financial Aid Office (https://www.ucdenver.edu/student-finances/financial-aid/).

Application Process

Application is open to holders of a BA, BS or higher degree in any field. We welcome applications from individuals pursuing particular interests and careers, especially those related to one of the areas of concentration noted above. The priority departmental deadline for review of applications is February 15. Our final application deadline is March 15 for admission the following fall. Applications received by February 15 will receive priority consideration for funding, and those received after that date will be considered on an as-needed basis.

Acceptance to the program is competitive and based on the application as a whole rather than preference in any one area:

- an undergraduate record of good quality (3.0 GPA or higher for all undergraduate studies)
- prior training in Anthropology
- three letters of recommendation
- a statement of the applicant's goals, both in graduate school and in their career, after completing the degree
- One copy of transcripts from all undergraduate/graduate institutions attended
- Optional: GRE scores (verbal, analytic and quantitative)

If you have no prior anthropology training, we encourage you to gain the necessary background as a non-degree student before applying to the graduate program.

1 Students may be admitted without prior anthropology training, but may be required to make up deficiencies without graduate credit during the course of their graduate study.

2 GRE scores are optional, not required. We will not penalize you if you don't take the GRE or submit GRE scores; we will evaluate your application on the basis of the evidence you submit. We understand that there are multiple methods of demonstrating your ability to succeed in graduate school. GREs are only one measure, and thus if submitted will be taken into account along with all other submitted material.

Programs

Anthropology, MA (p. 320)

Faculty

Professors:
Christopher Beekman, PhD, Vanderbilt University
Sarah Horton, PhD, University of New Mexico
Tammy Stone, PhD, Arizona State University
Anthropology (ANTH) Courses

ANTH 5000 - Special Topics in Anthropology (1-6 Credits)
Designed to give students a chance to evaluate critically some practical or theoretical problem under faculty supervision and to present results of their thinking to fellow students and instructors for critical evaluation. Prereq: Permission of instructor. Restriction: Restricted to Anthropology graduate students. Cross-listed with ANTH 4000. Repeatable. Max hours: 9. Credits: 9.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Anthropology graduate students

ANTH 5014 - Medical Anthropology: Global Health (3 Credits)
This course is concerned with the underlying biological and cultural determinants of health throughout the human life cycle in global and cross-cultural perspective. Note: The first of a two-course sequence in medical anthropology and global health studies; the second is ANTH 5024. Prereq: Graduate standing. Cross-listed with ANTH 4010. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5053 - Quantitative Methods in Anthropology (3 Credits)
Surveys the ways of deriving meaning from anthropological data by numerical means, including, but not confined to basic statistical procedure. Note: this course assumes that students have completed a college-level algebra course. Prereq: Graduate standing. Cross-listed with ANTH 4050. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5080 - Global Health Practice (3 Credits)
A travel-study course that provides students the opportunity to work on global health issues in the context of a supervised internship experience. In addition to a formal internship placement or directed research opportunity, students attend formal lectures and participate in seminars devoted to addressing those health issues most relevant to the country in which the course is being taught. Note: this course assumes that students have completed HBSC/ANTH 4010/5014, HBSC/ANTH 4020/5024, HLTH 6070 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4080 and PBHL 4080. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5121 - Zooarchaeology (3 Credits)
Introduction to the theory and methods of zooarchaeology through lectures, readings, and hands-on lab work identifying and analyzing mammalian skeletal material. Students will learn what mammalian remains indicate about biological and cultural evolution of humans. Cross-listed with ANTH 4121. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5200 - Gender in Cross-Cultural Perspective (3 Credits)
A comparative analysis of gender-based status and social roles of women and men, with women's status and roles emphasized due to their near-universal construction as the "other" sex. Examines, in cross- and sub-cultural context, the relations among women's status and their subsistence and reproductive activities; and the division of labor by sex, ideology and political economy. Prereq: Graduate standing. Cross-listed with ANTH 4200. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5230 - Fieldwork Methods (3 Credits)
This experiential course explores anthropological critiques, decolonizing approaches, and multi-media strategies to fieldwork methods with a focus on oral histories, visual narratives, community based participatory research, and indigenous ways of knowledge creation. At the end of the course, the student should have the cultural understanding and the methodological skills to complete a team-based fieldwork project successfully. Prereq: Graduate standing. Cross-listed with ANTH 4230. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5260 - Human Reproductive Ecology (3 Credits)
Considers the determinants of fertility variation within and among traditional human societies. Biocultural and ecological perspectives on pubertal timing, marriage patterns, birth seasonality, duration of birth intervals and reproductive senescence. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4260. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ANTH 5260 - Human Reproductive Ecology (3 Credits)
Considers the determinants of fertility variation within and among traditional human societies. Biocultural and ecological perspectives on pubertal timing, marriage patterns, birth seasonality, duration of birth intervals and reproductive senescence. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4260. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ANTH 5270 - Anthropology of the Body (3 Credits)
Explores how society, through culture, creates collective and individual bodies; embodied experience across the life course; and the body as an expression of social power, bodily modification and adornment. Prereq: Graduate standing. Cross-listed with ANTH 4270. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.
ANTH 5290 - Anthropology and Public Health (3 Credits)
This course critically explores anthropological approaches to public health problems. Through a number of key issues and case studies, we examine how public health practice can be enhanced through anthropological research, theory and methodology. Prereq: Graduate standing. Cross-listed with ANTH 4290. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5300 - Migrant Health (3 Credits)
This course examines health issues associated with transnational migration from an anthropological point of view. Drawing upon case studies, we examine the health of migrant communities in both host and sending nations. Prereq: Graduate standing. Cross-listed with ANTH 4300. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5320 - Archaeology of Mexico and Central America (3 Credits)
Surveys the major prehistoric and protohistoric cultures and societies of that area of Mexico and Central America identified with the evolution of Meso-American civilization. Major topics include early human colonization of the Americas, the domestication of plants and animals, the emergence of regionally-based cultures and societies, trade and exchange and the evolution of urbanism and the state. Primary emphasis on such ancient cultures and societies as those of the Olmec, Zapotec, Maya, Teotihuacan, Toltec and Aztec. Note: this course assumes that students have completed an introductory archaeology course. Prereq: Graduate standing. Cross-listed with ANTH 4320. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5330 - Lithic Analysis (3 Credits)
Examines the theoretical basis and methodological tools used by archaeologists in the analysis of prehistoric stone tools. Topics of discussion include the mechanics of stone fracture, typologies, use wear analysis and core reduction techniques. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4330. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5350 - Anthropology of Globalization (3 Credits)
This course provides an overview of anthropological contributions to the study of globalization. Particular attention is devoted to: transformations in global capitalism, state and immigration policy, transnational families, health and transnationalism. Note: previous coursework in anthropology is strongly recommended for success in this course. Prereq: Graduate standing. Cross-listed with ANTH 4350. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5380 - Archaeology of Hunters-Gatherers (3 Credits)
Explores the theory and methods used by archaeologists to investigate prehistoric hunter-gatherers. Topics of concern include mobility, subsistence, procurement, and socio-political organization. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4380. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5400 - Archaeology of Power and Inequality (3 Credits)
Addresses inequality and power through a long-term archaeological and theoretical perspective. Discusses explanations for the origins of power and inequality and their role in early small-scale societies and emerging complex politics. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4400. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5440 - Museums in the 21st Century (3 Credits)
This is an advanced course on natural history/anthropology museums. It will examine practical issues facing museums, and consider the complex questions that museums raise. The class includes lectures, discussions, and hands-on collection work, and exhibit/outreach development. Prereq: Graduate standing. Cross-listed with ANTH 4440. Cross-listed with ANTH 4440. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5500 - Advanced Issues in Human Evolution (3 Credits)
This flexible course offers an advanced treatment of issues in human biological evolution. Topics may emphasize morphological evolution, behavioral evolution, the environment of human evolution, non-human primate comparative information. Prereq: Graduate standing. Cross-listed with ANTH 4500. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5560 - Human Ecology (3 Credits)
Studies demographic and ecological variables as they relate to human populations. Aspects of natural selection, overpopulation and environmental deterioration are considered. Note: this course assumes that students have a background in biological or physical anthropology. Prereq: Graduate standing. Cross-listed with ANTH 4560. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5570 - Landscape Archaeology (3 Credits)
Introduces spatial archaeology through intrasite analysis and regional studies. Methods treated include site location and quantitative spatial organization. Theoretical topics include definitions of community, ancient urbanism and the impact of subsistence and politics on relations to the landscape. Note: this course assumes that students have completed ANTH 1302 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4570. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5580 - Neanderthals and the Origin of Modern Humans (3 Credits)
Focuses on the human fossil record for the taxon Homo sapiens, including the earliest members of this group ("early" or "Archaic" Homo sapiens), the Neanderthals and so-called "Anatomically modern" Homosapiens. The goal of the course is to survey the major issues within the area of modern human origins, and to learn about the evolutionary relationships, lifeways and behaviors of these groups. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4580. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ANTH 5590 - Primate Behavior (3 Credits)
Studies nonhuman primate behavior with emphasis on understanding social behavior, ecology and issues related to human evolution. Note: this course assumes that students have completed ANTH 1303 or equivalent. Prereq: Graduate standing. Cross-listed with ANTH 4590. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5600 - Medical Anthropology (3 Credits)
Introduces students to the theories and concepts of medical anthropology, the study of human health and illness. Explores conceptions of the body, modalities of healing, the clinical encounter, and new medical technologies. Prereq: Graduate standing. Cross-listed with ANTH 4600. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5650 - Disability Anthropology (3 Credits)
Drawing from anthropology and interdisciplinary disability studies, this course explores disability and impairment across time and space. Course materials integrate ethnography, archives, novels, films, podcasts, and social media to develop a holistic, empirically grounded understanding of disability as part of human diversity. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ANTH 4650. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5800 - Special Topics in Medical Anthropology (3-9 Credits)
Seminar series on current issues in medical anthropology. Faculty offer a range of different courses, including the political economy of drugs, health and human rights, and reproductive health. Prereq: graduate standing. Repeatable. Cross-listed with ANTH 4800. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5810 - Integrating Anthropology (3 Credits)
Designed to build on specialized course work in the subdisciplines of anthropology, this course emphasizes the basic concepts that integrate and unite the discipline and give it unique perspective. These are the concepts of culture, adaptation and human evolution. In the last several weeks of the course, students consider the applicability of the anthropological perspective to specific human issues. Note: Centers on the critical examination and discussion of presentations made by department faculty and graduate students. Restriction: Restricted to Anthropology graduate students. Cross-listed with ANTH 4810. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Anthropology graduate students
Typically Offered: Fall.

ANTH 5840 - Independent Study (1-6 Credits)
Directed study based on a specific subfield of anthropology. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Permission of instructor required. Repeatable. Max Hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.

ANTH 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade

ANTH 5910 - Field Experience in Archaeology (3-6 Credits)
Students participate in archaeological field research and data recovery and conduct laboratory analysis of materials recovered in the field. Emphasis is placed on excavation technique and accuracy of record keeping. Note: this course assumes that students have a background in archaeology. Prereq: Graduate standing. Cross-listed with ANTH 4910. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ANTH 5959 - Global Study Topics (3-9 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Max Hours: 9 Credits.
Grading Basis: Letter Grade

Additional Information: Global Education Study Abroad.

ANTH 6000 - Seminar in Current Research Topics (1-3 Credits)
An inquiry into current research of critical and general interest to anthropologists. Variable format. Note: students should receive permission from the instructor prior to registering for this course. Prereq: Graduate standing. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6040 - Advanced Topics in Medical Anthropology (1-4 Credits)
A flexible seminar format for dealing with topics of special interest in medical anthropology on an advanced graduate level. Topics to be considered vary from semester to semester. Examples include high altitude adaptation, anthropological perspectives on substance abuse, epidemiology, environmental and occupational health, the health consequences of cultural change and cross-cultural psychiatry. Note: Topics vary from semester to semester. Note: students should receive permission from the instructor prior to registering for this course. Prereq: Graduate standing. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ANTH 6041 - Human Genetics: Legal, Ethical and Social Issues (3 Credits)
Examines legal, ethical and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice and property rights. Prereq: Graduate standing. Cross-listed with HBSC 6320 and 7320. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6063 - Qualitative Research Design and Methods (3 Credits)
Much of the data collected in the social sciences is interview and text-based. This course explores methods for collecting and analyzing these data and theoretical paradigms that underlie these methods. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade

ANTH 6103 - Anthropological Perspectives on Language (3 Credits)
An intensive introduction to linguistic anthropology. Following a brief survey of technical linguistics, focus is on: the roles of language in society; multilingualism; language and identity; language and worldview; language, gender, class and power; language as social action; and other topics. Students carry out investigations based on models from their reading, as well as responding to the theoretical approaches of the field. Note: First course in a two-course required graduate sequence. Note: this course assumes that students have completed undergraduate coursework in cultural anthropology. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6133 - Current Theory in Ethnography (3 Credits)
An in-depth inquiry into important theories in cultural anthropology through extensive primary source reading. Practice in formulating theory, critical thinking and theoretical writing are emphasized. Note: First course in a two-course required graduate sequence. Note: this course assumes that students have completed undergraduate coursework in cultural anthropology. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6307 - Archaeological Research Design and Analysis (3 Credits)
Examines the methods and techniques used in archaeology, including theory-building, hypothesis testing and middle range theory. Core materials emphasize the learning and critique of basic archaeological assumptions and the methods and theories used to scrutinize the collection and interpretation of data. Topics include chronometric applications and paleo-environmental reconstruction. Note: this course assumes that students have completed ANTH 6307 or equivalent. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6317 - Biological Anthropology Core: Modern Human Variation (3 Credits)
Examines the historical development and modern practice of biological anthropology, including the theoretical and methodological foundations of this field. Emphasis is placed on the evidence for human and non-human primate evolution and the processes that influenced this evolution. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ANTH 6480 - Independent Study: ANTH (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
ANTH 6950 - Master’s Thesis (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
Anthropology, MA

Introduction

Please click here (p. 314) to see Anthropology department information.

The unique intellectual challenge of anthropology is to integrate knowledge from many disciplines for a global understanding of cultural and biological diversity in the past and the present. Individual courses in cultural anthropology, biological anthropology and archaeology cut across lines of the humanities, social sciences and natural sciences. Because of this integrative perspective on the human condition, the training provided in objectively assessing biological, cultural patterning and social interaction, an advanced degree in anthropology provides a versatile base for career development.

Students in our terminal Master’s program have the benefit of receiving the faculty’s full attention. Our program is unique in several respects. First, for students wishing to find employment after their MA, the department offers a mentorship program (https://clas.ucdenver.edu/anthropology/programs/master-arts-anthropology/mentorship-program/) that pairs them with alumni who have forged careers in students’ fields of interest. Second, our program also offers students a range of opportunities for professional development (https://clas.ucdenver.edu/anthropology/programs/master-arts-anthropology/career-opportunities/) that are unusual in programs that focus on PhD students. For students considering the possibility of doctoral-level work in anthropology, the department has an excellent record in placing students in top-tier graduate programs. Students with residency in 14 states are eligible for in-state tuition, and funding opportunities (https://clas.ucdenver.edu/anthropology/programs/master-arts-anthropology/funding-opportunities/) in the form of Teaching Assistantships and graduate fellowships are available to students on a competitive basis. MA students may pursue the thesis or non-thesis option.

The University of Colorado Denver Department of Anthropology provides outstanding graduate education in anthropology, giving students a broad yet thorough grounding in three (out of the four) subfields of anthropology as well as specialized instruction in one or more of a number of research orientations and/or geographic area concentrations. These orientations encompass the areas of research and application in which department faculty have substantial expertise.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Anthropology faculty advisor to confirm the best plans of study before finalizing them.

Some students may benefit from adding a specific skills-based certificate program onto their graduate program. For example: archeology students may wish to gain expertise in Geographic Information Systems through the GIS certificate (p. 402) offered through the Department of Geography and Environmental Sciences, while medical anthropology students may benefit from the certificate in public health offered through the School of Public Health. Graduate-level courses in certificate programs can often fulfill elective requirements in the anthropology program.

One doctoral program at the CU Denver campus that may be of particular interest to graduates of the anthropology MA program is the PhD in Health and Behavioral Sciences (p. 411). It is highly interdisciplinary and a natural extension of a master’s degree in medical anthropology.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a total of 30-36 credit hours.
2. Students must complete a minimum of 30-36 graduate (5000 and above) level credit hours.
3. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.
4. All credits for the degree must be completed with CU Denver faculty. A maximum of 12 credits of relevant graduate work may be transferred from another university with the program director’s approval.
5. Students must comply with all Graduate Education Policies and Procedures

Program Restrictions, Allowances and Recommendations

1. The university allows up to seven years to complete a master’s degree, but students are strongly discouraged from spending more than four years. While it is possible to finish the MA in two years, most of our students work part-time, which limits the time they can dedicate to the program; most finish within three years.
2. Thesis track students must complete a minimum of 30 total credits and non-thesis track students must complete a minimum of 36 credits.

Your graduate anthropology education begins by taking ANTH 5810 Integrating Anthropology plus two core courses each from two sub-disciplines of Anthropology. After completing this core, you will select from among the specialized elective courses in the research concentrations described in more detail below. You will work closely with an advisor in selecting the range of courses appropriate both to a problem orientation and to your career objectives.

As part of the MA degree, all students take a minimum of 9 elective credits.
Students will round out the program by selecting from the diverse range of courses offered in the Anthropology department according to their particular interests, career goals and plans for future graduate study.

Students may focus on one of the following research concentrations or explore courses outside of the Anthropology department. The courses listed are not intended to be comprehensive; students must work closely with their advisor in constructing their particular program of study.

Archaeology

The archaeological studies program concentrates on the study of past human societies using archaeological data collected in field and museum settings. While a quantitative and scientific approach is emphasized, the theoretical perspectives employed draw heavily from political economy and cultural ecology. The department offers a variety of theoretical, methodological and area courses, which may be supplemented by others in the geography and environmental sciences and history departments. Internships are available in local museums and historic preservation offices in the Denver metropolitan area.

Biological Anthropology

The biological anthropology concentration is concerned with modern human biological diversity and the past evolutionary history that has led to such diversity. Students in this concentration develop a firm understanding of the evolutionary processes that lead to physical and behavioral variation in humans and nonhuman primates. The concentration also emphasizes the theoretical and quantitative methods used to explore and explain this variation. Students may take courses in diverse areas including evolutionary biology, genetics, ecology, ethnobiology, epidemiology, nutrition, medical anthropology, paleoanthropology, paleontology and primatology. Because biological anthropology is multidisciplinary in nature, students are encouraged to consider courses offered outside the department.

Medical Anthropology

Our MA program in cultural anthropology offers a unique focus on Medical Anthropology. Medical anthropology is a sub-discipline of anthropology that includes the study of all aspects of health, illness and disease in human communities and populations. It draws on all of the perspectives that distinguish anthropology as a unique discipline: the analysis of human evolution and adaptation; cultural development, expressions, and variability; and historical change and continuity. Medical anthropology takes as its subject a broad range of specific topics, including the study of health care systems, factors that affect the distribution and determinants of disease in populations, maternal and child health, nutrition and food habits, human development, political ecology, health policy, health disparities, community-driven wellness practices, visual storytelling, social media designed to promote health equities, and language and communication in health care contexts.

Faculty members take a variety of theoretical approaches to the topic, but our program is distinguished by its applied and engaged perspectives. A particular strength of our program is its integration of theoretical knowledge with community- and field-based training opportunities and challenges. We prepare students for careers in nonprofit and community groups, non-governmental organizations, advocacy, public health, health care institutions, and health sciences research; our graduates also attend doctoral programs at selective institutions. Courses in the department are complemented by electives in other departments (sociology, biology, psychology, history, geography, political science) and programs on the CU Denver campus (public affairs, education, health administration) and at the Anschutz Medical Campus (Schools of Medicine, Public Health, Pharmacy and Nursing).

Students who are earning their MA with a concentration in Medical Anthropology may also want to consider simultaneously earning a certificate offered through the CU School of Public Health (http://catalog.ucdenver.edu/cu-anschutz/schools-colleges-programs/colorado-school-public-health/certificate-programs/).

Note: Students are encouraged to take elective courses in GIS mapping (geography), ecology (biology/anthropology), public policy, public health, epidemiology and biostatistics as it is relevant to their course of study.

Non-Thesis Option
This track is defined by additional course work in lieu of a thesis. The decision to pursue the non-thesis option should be made by the semester following the completion of 18 credit hours.

The non-thesis option allows students to pursue their own educational goals through the selection of additional courses that fit their interests. We strongly encourage students who choose this option to consider an internship position arranged around an area of expertise or the development of a skill-set. The internship may be in a governmental agency or non-governmental organization in Colorado, the U.S. or internationally. Successful completion of an internship will be acknowledged on the transcript of the MA program.

Non-Thesis students must complete a portfolio according to this rubric. (http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/anthropology/anthropology-ma/Portfolio_Track_-_Proposal_Rubric.pdf)

Thesis Option
Students pursuing the thesis option must develop a topic and research proposal that specifies their plans in the semester after their completion of 18 credit hours.

A thesis is characterized by three factors: it is based in a research question or problem; it involves original research; there is a fully developed research proposal. A thesis can also encompass a range of format alternatives to the traditional thesis (e.g. article submitted for publication to a peer-reviewed journal, or a video production, internship or museum exhibit, each generally accompanied by a companion paper developing a theoretical or problem-oriented question).

The thesis is a major requirement for those in the MA in anthropology thesis track. The thesis should demonstrate the student’s ability to apply knowledge and skills gained from the anthropology department’s curriculum. A desirable goal for an excellent thesis would be a work of sufficient rigor and quality that it could be considered for publication. Original data collection (“fieldwork”) is recommended but not required for the thesis. Analysis of secondary data—whether quantitative, qualitative, visual or other formats—is perfectly acceptable as long as the research is informed by a clearly articulated research question and under-girded by a research proposal.

The traditional thesis is a single document that often incorporates a literature review, definition of a problem, discussion of methods to address the problem, the subsequent research activity and results. However, the student may design a thesis with different emphases, in consultation with their advisor. For example, the goal may instead be a more compact paper submitted to a peer-reviewed journal. Other thesis plans may combine some research activity such as a video production, museum exhibit or an internship, with an accompanying paper.

The thesis must be defended before a committee of three faculty, at least two of whom need to be on the Department of Anthropology faculty (which includes senior instructors and research faculty). The structure of the thesis is largely determined by the Graduate Education Policies and Procedures; i.e., a thesis must conform to the rules.

1. For the thesis, students must prepare a full research proposal which must be approved by their thesis chair before beginning their research. This proposal must be completed by the semester after the student has completed 18 credit hours. Sections of the proposal should include, at a minimum:
   a. Introduction and statement of the problem: Should include a one sentence statement of the problem on the first page, and a discussion of its significance (i.e., why is it important that this topic be researched).
   b. Literature review covering theoretical and topical material.
   c. Research design and methods including a data analysis plan. Note: Wenner-Gren and National Science Foundation both provide good models and templates for the research proposal. Those in the medical anthropology track might want to consider following the NIH model, depending the nature of their research questions and career goals.

2. All students proposing to work with humans or data on modern humans must apply for and receive approval from the Human Subjects Research Committee before they begin their research. Note: most of the material for the application will be drawn from the research proposal.

3. The draft thesis must be reviewed and approved as “defensible” by the student’s thesis committee faculty chair before a thesis defense date can be set. Defensible means the chair has reviewed the draft and suggested changes have been made.
   a. The draft sent to the student’s committee must be substantively complete: All references must be in the text and properly formatted in a references cited section; there should be no “track changes” comments in the text; the text should be formatted according to Graduate Education requirements.
   b. Given the complexity of faculty and student schedules, consultation on a defense date should be done as far in advance as possible.
   c. There must be a minimum of three weeks between the agreed-upon date for the defense and distribution of the draft thesis defined as defensible by the student’s chair. If you would like feedback from your committee members before the defense, you should plan to distribute the thesis at least 4 weeks before the defense date. Note: If you intend to graduate the same semester you defend your thesis, you must schedule, successfully defend, and complete all recommended changes in accordance with CU Denver thesis and dissertation guidelines (http://catalog.ucdenver.edu/cu-denver/graduate/schools-
colleges-departments/college-liberal-arts-sciences/anthropology/anthropology-ma/GS_thesis_and_dissertation_format-guide.pdf). This effectively translates to having the thesis completed and "defensible" before the middle of the semester.

To learn more about the Student Learning Outcomes for this program, please visit our website (https://clas.ucdenver.edu/anthropology/graduate-learning-outcomes/).
Chemistry

Chair: Scott Reed
Office: Science Building, 3071
Telephone: 303-315-7634
Fax: 303-315-7366
Website: clas.ucdenver.edu/chemistry/ (http://clas.ucdenver.edu/chemistry/)

Overview
Chemistry is the study of matter and its transformations, from the smallest scale - atoms and subatomic particles - to the macromolecules that provide structure and function to living organisms. Chemistry is often called the "central science" because it touches on other STEM disciplines including physics, biology, medicine, environmental science, geology, mathematics, materials science, technology, and many others. A degree in Chemistry can prepare you for a wide range of meaningful careers discovering and applying scientific knowledge. Modern chemistry combines computer modeling and experimental observation using procedures that are much safer and more environment-friendly than in past generations. Learning chemistry also teaches you important critical thinking skills that can be valuable in any career. Students with MS degrees have job opportunities in research and technical laboratories. In addition, flexible programs can be designed to combine chemical knowledge and skills with other interests of the MS-level student (i.e. biology or environmental science).

Graduate Program
The MS degree offered at CU Denver is a broad-based chemistry degree that allows students to take courses and do research in the following basic fields: analytical, biochemistry, inorganic, organic, physical or environmental chemistry.

The MS program is available to both full- and part-time students. The chemistry faculty strives to ensure that students receive excellent advising and supervision of work. Students enrolled in the program have an opportunity to be appointed as laboratory teaching assistants. Research activities on the part of the chemistry faculty provide opportunities for graduate students to obtain research assistantships.

For more information contact the Graduate Advisor: Haobin Wang at HAOBIN.WANG@UCDENVER.EDU.

Admission Requirements
Applicants must meet Graduate student admission requirements according to the Graduate Education Policies and Procedures in addition to the following requirements of the Department of Chemistry.

An undergraduate major in Chemistry or a closely related discipline is required, including two semesters of organic chemistry as well as training in analytical chemistry, physical chemistry, and inorganic chemistry. Students missing more than one of these courses may be limited in the tracks that they are eligible to select. Students missing more than one of these courses may be provided a provisional admission. An undergraduate GPA of 3.0 (on a 4 point scale) is desired although each application is considered on its own merits.

- The GRE examination is recommended but not required.
- International students have additional admission requirements concerning immigration status, proof of financial responsibility and acceptable TOEFL or IELTS scores or completion of the CU Denver English as a Second Language Academy.
- Students currently in a BS program at CU Denver or elsewhere may want to consider the Chemistry BS/MS. This option includes the opportunity to enroll in graduate classes before enrolling in the MS program at CU Denver. At least 20 credits must be earned on campus. However, for the remaining courses, enrollment through 
CU ONLINE or on one of the other CU campuses is possible. Furthermore, the Chemistry Master's Program accepts transfer credits from accredited Universities with approval from the Graduate Program Director.

Programs
- Chemistry, MS (p. 331)

Faculty
Professors:
- David Engelke, PhD, Washington University (St. Louis)
- Doris Kimbrough, PhD, Cornell University
- Hai Lin, PhD, University of Science and Technology of China
- Scott Reed, PhD, University of Oregon
- Haobin Wang, PhD, Wayne State University
- Xiaotai Wang, PhD, University of Virginia

Associate Professors:
- Jefferson Knight, PhD, Yale University
- Yong Liu, PhD, University of Michigan
- Xiaojun Ren, PhD, Jilin University
- Marino Resendiz, PhD, University of California, Los Angeles
- Liliya Vugmeyster, PhD, State University of New York at Stony Brook

Assistant Professors:
- John (Nick) Fisk, PhD, University of Wisconsin, Madison
- Emilie Guidez, PhD, Iowa State University
- Jung-Jae Lee, PhD, University of Notre Dame
- Woonghee Lee, PhD University of Wisconsin – Madison

Clinical Associate Professors:
- Marta Maron, PhD, University of Colorado

Clinical Assistant Professor:
- Priscilla Burrow Crocker, PhD, University of Colorado

Instructors:
- Vanessa Fishback, PhD, University of Northern Colorado
- Kyoung Kim, PhD, University of Notre Dame

Chemistry (CHEM) Courses
CHEM 5010 - Advanced Inorganic Chemistry (3 Credits)
Covers the fundamental principles of inorganic chemistry. Topics include atomic structure and periodicity, molecular symmetry, bonding, structural chemistry, main-group chemistry, coordination chemistry, and organometallic chemistry. Requisite knowledge in Undergraduate Inorganic and Physical Chemistry assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4010. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.
CHEM 5073 - RM-MSMSP Research Experience for Teachers - Chemistry Cohort (1-6 Credits)
The Research Experience for Teachers (RET) program will be a five-week research exploration in which twelve RM-MSMSP teachers will raise their level of relevant scientific understanding by engaging in a "hands on" workshop, transforming what they have learned into new curricular materials that will improve the scientific abilities of their students and hopefully stimulate them to consider a STEM career. Note: Credit may not apply toward any CLAS degree. Department consent required. Max Hours: 6 Credits.
Grading Basis: Letter Grade

CHEM 5110 - Advanced Analytical Chemistry (3 Credits)
Explores the fundamental principles of analytical chemistry. Topics will focus on meteorology (the science of making measurements), measurements based on energy transfer (e.g. spectroscopic analysis), and measurements based on mass transfer (e.g. chemical separations and electrochemistry). Requisite knowledge in Undergraduate Instrumental Analysis is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4110. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.

CHEM 5221 - Practical Applications of Spectroscopy (3 Credits)
This course surveys spectroscopic methods in order to deduce the structure of organic compounds from an examination of spectra, with an emphasis on infrared spectroscopy, mass spectrometry, nuclear magnetic resonance spectroscopy, and ultraviolet spectroscopy. Students will be introduced to a wide array of powerful and elegant tools for obtaining qualitative information about the structure of matter. This course will require a good amount of thought, yet all of the concepts and associated mathematical manipulations are within the reach of a student who has met the prerequisites. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4221. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5310 - Advanced Organic Chemistry (3 Credits)
An exploration of structure, bonding and reactivity in organic modules that includes extensive analysis of the chemical literature, culminating in written and seminar presentations of individual projects. Requisite knowledge in Undergraduate Organic Chemistry and Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4310. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5388 - Nucleic Acid Technologies I (2 Credits)
This laboratory is intended to provide hands-on experience on the synthesis, characterization, and analyses of oligonucleotides of DNA and RNA. The laboratory will cover the basics to understand structural aspects of these biopolymers, using UV-vis, circular dichroism, electrophoresis, HPLC and mass spectroscopy. (All students will be expected to prepare, and turn in, three written reports; and three oral presentations. Every class member will also be required to keep an organized laboratory notebook, thus the class will be exposed to basic research aspects and literature searches. The course will also require students to design a successful experiment, that will prepare them for conditions they may likely encounter in an industrial, or advanced academic setting. Specifically, each student will choose a DNA sequence and probe their oligonucleotide model towards the recognition of a particular target, e.g., metabolite, protein, or molecular ion. In assessing these concepts, every student will be exposed to the basics of DNA/RNA structure as well as the chemistry of solid-phase chemistry. Every student will be required to present current topics (from recent literature) in front of the class as a way to enhance skills in oral presentation and scientific communication, aspects that will also enrich the scientific writing experience. To enhance the writing experience and provide a broader perspective on contemporary research, that is related to the course, students will be required to attend two seminars (from the departmental seminar series) and prepare a short written report. It is worth noting that this course will provide exposure to techniques that are commonly used in an industrial setting, e.g., in the development of RNA-based drugs and therapeutics, thus preparing them for a successful transition onto their next academic/professional step). Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4388. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5411 - Bioconjugate techniques and Theranostic Nanomedicine (3 Credits)
The selective making of chemical bonds to biological molecules in complex mixtures enables a wide variety of applications in bio- and nano-materials science, bioengineering, and diagnostic and therapeutic (nano-)medicine. This course will discuss theory and practical current methods for chemical modification and conjugation of proteins and other bio- and nano-materials: Topics include permanent and cleavable cross-linkers, protein modification reagents, immobilization of enzymes/DNA, enzyme-antibody conjugates, protein-protein interactions, PEGylation and labeling of proteins, and solid-phase peptide synthesis. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4411. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5421 - Cannabis Chemistry (3 Credits)
An exploration of the terpene to cannabinoid compounds including biosynthesis pathways; human receptor structures and mechanism; current analytical methods for Quality Assurance and Quality Control and current research in medical applications. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4421. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.
CHEM 5510 - Computational Chemistry (3 Credits)
Classical and ab initio molecular dynamics are covered from theory to application. Students have access to high-performance computational resources and cover current topics in the field. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4510. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

CHEM 5530 - Advanced Physical Chemistry (3 Credits)
Explores fundamental properties of molecules (bond length and strength, the potential energy surface, reaction rates, etc.) and examines how these properties are measured, using original literature as the primary source, and culminating in written and seminar presentations of individual projects. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4530. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 5548 - Physical Biochemistry Laboratory (2 Credits)
Experimental techniques of physical chemistry emphasizing thermodynamics, kinetics, and spectroscopy of biological molecules. Fulfills the Physical Chemistry Lab requirement for Biochemistry Emphasis majors. Restriction: Restricted to degree-granting graduate programs. Prereq: or Recommended Preparation CHEM 4810. Cross-listed with CHEM 4548. Term offered: fall, spring. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring.

CHEM 5550 - Applications of Group Theory in Chemistry (3 Credits)
Introduces the basic principles of the group theoretical method as well as its applications in organic, inorganic, and physical chemistry. Covers Mo's for main-group and transition metal compounds, ligand field theory, molecular vibrations, and electron absorption spectroscopy. Requisite knowledge in Undergraduate Physical Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

CHEM 55580 - Molecular Informatics (2 Credits)
This course resides at the intersection between Chemistry, Biochemistry, and Data Science. The course covers fundamental concepts of Chemical and Biochemical Informatics and provides students with hands on experience in using computational tools to manipulate chemical and biochemical data. Students will learn fundamentals of data science, database management, data structure, data representation, data visualization, and data analysis as applied to Chemistry and Biochemistry. The course requires a basic understanding of programming but does not require extensive programming experience. Examples explored in class and in homework will be built using Python code within Jupyter Notebooks or Google Colab notebooks such that students can explore new topics while remaining focused on the underlying molecular concepts and computer methods which allow them to manage large amounts of molecular information and to find relationships between the structure and properties of molecules. Data mining approaches will be explored as will classification algorithms and chemical similarity analysis methods. Students will learn about the applications of cheminformatics in drug discovery, such as compound selection, virtual library generation, virtual high throughput screening which can check for potential molecules that have the potential to be developed into drugs. Note: While this course is not a pre-requisite for 4510 Computational Chemistry, CHEM 4640 AI in Chemistry and Biochemistry, or CHEM 4845 Molecular Modeling and Drug Design, the skills developed in this course will work synergistically with those courses and will allow you to get more from your experiences in those courses or from your experience in a research lab. Restriction: Restricted to students in degree-granting graduate programs or Prereq: CHEM 3411 and CHEM 4630 or MATH 1376 or BIOS 6642 or MOLB 7900 or CSCI 1410 with a C- or higher. Cross-listed with CHEM 4580. Max hours: 2 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students in degree-granting graduate programs
Typically Offered: Spring.

CHEM 5600 - Graduate Topics in Chemistry (1-3 Credits)
Graduate students in chemistry or a related discipline explore a special topic in chemistry or biochemistry. A description of topics to be covered in the current semester is maintained on the Chemistry department website. Restriction: Restricted to degree-granting Graduate programs. Term offered: spring. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.

CHEM 5610 - Understanding & Presenting Chemical Research (1-2 Credits)
This course will improve your ability to systematically search for chemical information, help you interpret the information you find, & improve your ability to summarize and present that information. Restriction: Restricted to degree-granting Graduate programs. Cross-listed with CHEM 4610. Term offered: fall, spring. Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 2.
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring.
Typically Offered: Spring.

Restriction: Restricted to degree-granting graduate programs

Grading Basis: Letter Grade

Cross-listed with CHEM 4700. Term offered: spring. Max hours: 3 Credits.

assumed. Restriction: Restricted to degree-granting Graduate programs.

knowledge in Undergraduate Organic and Analytical Chemistry is assumed. Restriction: Restricted to degree-granting graduate programs. Cross-listed with CHEM 4630. Max hours: 1 Credit.

Grading Basis: Letter Grade

Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall.

Restriction: Restricted to degree-granting graduate programs

Typically Offered: Fall.

Typically Offered: Spring.

Restriction: Restricted to degree-granting graduate programs

Typically Offered: Spring.
**CHEM 5840 - Independent Study** (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

**CHEM 5845 - Molecular Modeling and Drug Design** (3 Credits)
Advanced course in biochemistry. An introductory course on modern molecular modeling techniques and their applications to computer-aided rational drug design. Restriction: Graduate standing. Cross-listed with CHEM 4845. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall.

**CHEM 5860 - Bioinorganic Chemistry: Bioinorganic compounds in medicine** (3 Credits)
Explore the roles of metals in biochemistry and medicine by studying chemical/physical properties of metal coordinated compounds. The course focus on metal coordination resulting biopolymer folding and the function of macromolecules that is involved into iron cytochromes, zinc and copper enzymes, iron sulfur proteins, oxygen transport, iron storage, electron transfer, inorganic model compounds, metals in medicine, and toxicity of inorganic species. Topic is extended to biomedical application such as chemotherapy. Prereq: CHEM 3810 or CHEM 4810 or CHEM 5810 with a C- or higher. Cross-listed with CHEM 4860. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: CHEM 3810 or 4810 or 5810 with a C- or higher

**CHEM 5880 - Directed Research** (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

**CHEM 5939 - Internship** (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

**CHEM 5950 - Master's Thesis** (1-8 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Term offered: fall, spring, summer. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 8.
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

**CHEM 6000 - Chemistry Seminar** (1-3 Credits)
Faculty and student presentations of CU-Denver research projects and other current chemistry topics. Note: All chemistry students are encouraged to attend, but credit is given only to those who present seminars. Requisite knowledge in Undergraduate Physical or Environmental Chemistry is assumed. Restriction: Restricted to degree-granting Graduate programs. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Fall, Spring, Summer.

**CHEM 6001 - Master's Research Seminar** (1 Credit)
Students present a formal seminar to the department describing their master's research work. Note: Required for all students completing a thesis-based master's degree; optional for those completing master's projects. Prereq: CHEM 6000 with a B- or higher. Term offered: fall, spring, summer. Max hours: 1 Credit.
Grading Basis: Letter Grade
Prereq: CHEM 6000 with a B- or higher
Typically Offered: Fall, Spring, Summer.

**CHEM 6002 - Chemistry Seminar I** (1 Credit)
The art of listening to and giving a chemistry seminar. Introduces the chemical literature, the pedagogical techniques of seminar giving, and the critical thinking skills required to understand a technical presentation. Note: Seminar presentations by faculty, outside speakers, and advanced graduate students are analyzed by the students participating in the course. Restriction: Restricted to degree-granting Graduate programs. Max Hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

**CHEM 6003 - Chemistry Seminar II** (1 Credit)
Students prepare and give a chemical seminar based on a literature paper. Note: Seminar presentations by students and outside speakers are analyzed by students in the course. Restriction: Restricted to degree-granting Graduate programs. Max Hours: 1 Credit.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

**CHEM 6840 - Independent Study: CHEM** (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
CHEM 6950 - Master's Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Term offered: fall, spring, summer. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

CHEM 6960 - Master's Report (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
Chemistry, MS

Program Director: Haobin Wang  
Email: HAOBIN.WANG@UCDENVER.EDU

Introduction

Please click here (p. 325) to see Chemistry department information.

The MS program in chemistry focuses on providing students with the skills and knowledge necessary to conduct specialized research in preparation for careers in chemistry and related disciplines. Completing an MS in Chemistry at CU Denver can provide valuable experience that can help students land a job in the pharmaceutical, biotechnological, or other industry or can serve as a stepping stone for admission to a competitive PhD or health sciences program. Our faculty serve as mentors and advisors and assist students on the path to a more satisfying career in science. Prospective students are encouraged to contact the Graduate Program Director visit the Department of Chemistry website for additional details concerning the chemistry program, admission procedures, financial assistance and faculty research interests.

These program requirements are subject to periodic revision by the academic department and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

All Chemistry MS students must meet the following requirements for graduation:

1. Students must complete a minimum of 30 credit hours.
2. Out of the 30 credit hours students must complete a minimum of 24 graduate (5000 and above) level credit hours. Up to 6 4000-level credits may be counted as electives with prior approval, provided that they have not been earned as part of an awarded undergraduate degree. Among these 6 credit hours 3 may be taken as Chemistry lectures and another 3 may be taken outside Chemistry.
3. Students must earn a minimum of 20 semester hours in formal lecture or lab courses in the Department of Chemistry. Additional credits can be acquired through research, internships, thesis work, independent study, transfer credits, etc. within the department and in other departments. Course selections outside of the department must be approved by the Graduate Program Director.
4. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.

Program Restrictions, Allowances and Recommendations

1. Compliance with all Graduate Education Policies and Procedures
2. Every student must select a thesis or non-thesis plan. As most of the requirements overlap, a student may switch between these plans with permission from the Graduate Program Director.
3. In addition to choosing a plan, every student must select a content emphasis track. Each track has separate placement examinations, therefore switching between tracks requires approval from the Graduate Program Director.
4. Although degrees can be completed in as little as one year, all work must be completed within five years after enrolling in the first graduate class in the department unless an exception is granted by the program director.
5. Students are eligible to apply for a research assistantship or a teaching assistantship positions. Students who are interested in improving teaching skills can enroll in CHEM 5655 Teaching Assistant Bootcamp. This course is required for all students who are interested in working as a teaching assistant in the department.

Plan I- Thesis

Plan I (Thesis) is a research oriented program involving a minimum of 30 semester hours with the following requirements:

- Successful completion of a content emphasis track.
- 3 semester hours of CHEM 6950 Master’s Thesis.
- An acceptable formal thesis consistent with the Graduate Education Policies and Procedures.
- Successful oral defense of the master's thesis before a committee of at least three Regular Graduate Faculty, two of whom must be tenure track faculty members and have a Graduate Education appointment through the Department of Chemistry.
- All thesis students must complete 1 credit of CHEM 5610 Understanding & Presenting Chemical Research no later than the semester before they defend their thesis.
- Completion of a high quality research project suitable for publication in a peer-reviewed journal.

Plan II- Coursework

Plan II (Course Work) is a coursework oriented program involving a minimum of 30 semester hours with the following requirements:

- All Plan II students are required to take a final written examination about primary research articles in their discipline. This exam may be taken any semester after 20 semester hours of graduate course work have been completed. Students may attempt the exam once per semester a maximum of three times and must be registered during the semester that they attempt the final examination.
- All non-thesis students are encouraged to take 1 credit of CHEM 5610 Understanding & Presenting Chemical Research
- Plan II students may arrange for an internship at a local company that employs Chemists and take up to 6 credits of CHEM 5939 Internship must be in good academic standing and have completed 6 graduate semester hours at CU Denver before starting an internship. Approval of the graduate program director is required prior to selecting an internship and enrolling for credit.
to solve practical problems in chemistry, biochemistry, biophysics, and material sciences.

CLAS Interdisciplinary Certificates

- Digital Studies Graduate Certificate (p. 335)
- Social Justice Graduate Certificate (p. 337)
Digital Studies Graduate Certificate

Introduction

From social media and mobile phones to the algorithms in self-driving cars, digital and information technologies are everywhere. The Digital Studies Certificate provides both degree-seeking and non-degree-seeking post-baccalaureate students with the opportunity to investigate the relationships between new communication technologies and society and to develop skills creating digital media messages and products. Students who attend any CU Denver school or college, or others who have BA degrees in any discipline are welcome.

Social sciences and humanities students can use this certificate to develop and demonstrate their technical skills, while science and engineering students can use it to build expertise in understanding the social and cultural aspects of new technologies.

Degree-seeking graduate students, or non-degree seeking post-baccalaureate students

Students who earn the Digital Studies Certificate will be able to demonstrate to a wide range of potential employers or graduate schools that they have both technical skills and the ability to critically analyze new media.

Students who successfully complete the Digital Studies Certificate will be able to:

• Describe and analyze the relationships between digital media and their cultural, social, political, and ethical contexts
• Use digital media to communicate messages to a variety of audiences
• Use digital media to solve problems in a range of disciplines and situations
• Use digital media and related analytical skills as career-building tools

Program Delivery

• This is a hybrid program, with courses on-campus and online.

Admissions and Declaring this Certificate

• Eligibility: CU Denver graduate students in any discipline can enroll in the program at any point in their graduate studies. Non-degree-seeking students with who have a bachelor’s degree in any discipline are welcome to apply.
• The Certificate can be earned as a stand-alone University certificate, or it can be applied to a current or future degree program.
• CLAS’s Interdisciplinary Studies program sponsors the certificate, and the CLAS Director of Digital Initiatives will provide advising and administrative management.
• Any student wishing to declare the Digital Studies Certificate should schedule a certificate advising appointment with the CLAS Director of Digital Initiatives in order to register their intent to pursue it and to develop a curriculum plan.
• Application Procedures: Students enrolled in any CU Denver graduate program are encouraged to apply for the Digital Studies Certificate at any point in their studies. To apply, students in degree programs should print and complete a Digital Studies Certificate Application and submit it to the CLAS Director of Digital Initiatives. Non-degree-seeking students should also submit an official transcript from their undergraduate programs.

• Students who are not already enrolled at CU Denver must also complete an online Application for Non-Degree Admission prior to registering for courses.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Digital Studies advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 12 credit hours of required courses chosen from the approved courses in each cluster: one course (three credits) from each of the three clusters (for a total of nine credits), plus the remaining three credits from any one of the three clusters.
2. Students must complete a minimum of nine graduate level (5000 or above) credit hours in approved coursework.
3. Students must earn a minimum grade of B (3.0) in all courses that apply to the certificate and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Courses taken using P+/P/F or S/U grading cannot apply to certificate requirements.
4. Students must complete all credits applied to the certificate with CU Denver faculty.

Digital Studies Certificate Course Clusters

• Theory and Analysis: Courses in this cluster focus on theorizing, explaining, and describing the relationships between digital, media, and communication technologies and society. They enable students to critically assess and analyze digital media and information, such as understanding the biases in seemingly neutral Google search results or examining how people use Twitter to build social movements
• Digital Media Production: Courses in this cluster focus on developing hands-on skills in the use of digital, media, and communication technologies. They provide opportunities for students to develop their skills with a variety of digital tools, such as digital photography, mapping, and social media management.
• Integration: Courses in this cluster bring together both understanding and using digital, media, and communication technologies.

Other courses may apply to each cluster with the approval of the Director of Digital Initiatives certificate advisor.

Social Justice Graduate Certificate

Introduction
The Social Justice Program works to connect our campus to the Front Range community through internships, collaborative research with local partners, and by hosting speakers, trainings, and events that promote transformative dialogue and intellectual growth. We create learning opportunities that emphasize an integrated understanding of the social, political, economic, and cultural dimensions of the major challenges facing humanity in the new millennium. By cultivating engaged and informed citizens, we seek to create future leaders who will have the skills and knowledge necessary to effect meaningful change.

Program Delivery
• This is a hybrid program, with courses on-campus and online.

Admissions and Declaring this Certificate
Students may be enrolled as a CU Denver graduate student in any discipline, or as a CU Denver non-degree seeking graduate student with a bachelor’s degree.

International students must submit TOEFL scores or otherwise satisfy the University’s English Language Proficiency requirement.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Social Justice faculty advisor to confirm the best plans of study before finalizing them.

For more information about the Social Justice Graduate Certificate, please email the Dr. Margaret Woodhull: Margaret.Woodhull@ucdenver.edu

Graduate Education Policies and Procedures apply to this program.

Program Requirements
1. Students must complete a minimum of 12 credit hours of approved courses.
2. Students must complete all courses at the graduate level (5000-level or above).
3. Students must earn a minimum grade of B- (2.7) in all courses applied to the certificate and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Courses taken using P+/P/F or S/U grading cannot apply to certificate requirements.
4. Students must complete all credits applied to the certificate with CU Denver faculty.

Communication

Chair: Lisa B. Keränen
Graduate Director: Amy Hasinoff
Program Assistant: Michelle A. Médal
Internship Director: Megan Hurson
Office: Student Commons Building, 1201 Larimer Street, 3rd Floor, Room 3014
Telephone: 303-315-1919

Overview

Our vibrant community of scholars and teachers is committed to providing a real-world, hands-on, and theoretically robust master’s degree that will enrich students’ communication knowledge and skills for the twenty-first century. Our program is a 33-credit generalist degree designed to enhance students’ intellectual and professional growth through the understanding and practice of effective communication. Our faculty members are nationally and internationally recognized leaders in their field. Students who complete our program often receive offers to top-notch PhD programs or accept positions related to communication management, public relations, human relations, and corporate and non-profit communication.

Graduate Program

Click here (p. 344) to learn about the Master of Arts in Communication.

Grade Requirements

Students must maintain a GPA of 3.0 or higher across all courses applied to a graduate degree or to a graduate certificate.

Course Transfer Policy

A maximum of 12 semester hours of relevant graduate course work may be transferred from another university. Students cannot receive credit for transferred courses in which less than a B grade was earned. Course work transferred from another university must be approved by the director of the MA program and must not have been used for another graduate degree.

Time Limits for Completion of Degree

Students have seven years from the date of the beginning of their course work to complete all requirements for a master’s degree in communication.

Graduate Certificate

Click here (p. 347) to learn about the Strategic Communication Graduate Certificate.

Grade and Residency Requirements for Certificates

A grade of B or better must be earned in each course completed as part of the certificate (B- is not acceptable). All semester hours for a certificate must be earned at CU Denver.

For more information about admission requirements please visit our website (https://clas.ucdenver.edu/communication/programs/master-arts/admissions/).

Application Procedures for U.S. Citizens

Students must submit the following materials to apply for admission to the MA program:

- letter of application explaining career plans and reasons for interest in the degree
- online graduate admission application
- three letters of recommendation, preferably from university faculty (those writing the recommendations must use the request for recommendation form and their own letterhead stationery)
- official transcripts from every college or university attended
- preferred 3.25 undergraduate GPA
- resume or vita
- academic writing sample (showing ability to make and sustain an argumentative analysis)
- Optional GRE scores
- $50 application fee (nonrefundable)
- international students need TOEFL scores

Deadlines for Application

February 15: Priority deadline for fall semester start and full consideration for Graduate Teaching Assistantships (GTA). Applications will be considered until May 1, which is the non-priority deadline for fall semester start and excludes GTA consideration.

October 1: Deadline for spring semester start.

All application materials not uploaded through the online application process should be sent to:

Graduate Admissions
University of Colorado Denver
Campus Box 167
1201 Larimer Street, Suite 1005
PO Box 173364
Denver, CO 80204
Phone: 303-315-2601
Email: graduateadmissions@ucdenver.edu

Students are notified by e-mail of the graduate admission committee’s decision concerning their admission.

Application Procedures for International Students

Students who are not U.S. citizens should begin the process of application to the MA program in Communication by contacting the Office of International Affairs (website: www.ucdenver.edu/academics/InternationalPrograms/OIA/admissions/Pages/default.aspx) at CU Denver. This office will assist students in compiling their application materials, which then are submitted to the Communication department. See the International Students (p. 43) chapter for further information.

- Strategic Communication Graduate Certificate (p. 347)

Faculty

Professors:

Sarah Fields, PhD, University of Iowa
**Communication (COMM) Courses**

**COMM 5000 - Communication and Sport (3 Credits)**
While sports are often sought for entertainment, they are more than just a game: they both mirror and shape our understandings of gender, race, class, sexuality, ability, nationality and more. This class addresses these issues while also thinking about sports in global frameworks. Cross-listed with COMM 4000. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Max hours: 3 Credits. Grading Basis: Letter Grade

**COMM 5021 - Perspectives on Rhetoric (3 Credits)**
Rhetorical criticism is the study of how language works to persuade. This class surveys major thinkers to offers students a range of methods, which are then applied to address specific case studies. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4021. Max hours: 3 Credits.

**COMM 5040 - Communication, Prisons, and Social Justice (3 Credits)**
This class examines the U.S. prison-industrial complex and enables students to envision ways of reducing crime and improving democracy by engaging in community service. Note: This course fulfills the communication department’s exit class requirement. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. COMM 2020 is recommended preparation for this course. Cross-listed with COMM 4040. Term offered: spring. Max hours: 3 Credits.

**COMM 5051 - Advanced Strategic Communication (3 Credits)**
Provides senior-level training in hands-on communication environments where targeted messaging seeks specific outcomes. All students complete projects for community group, media outlet or corporation they choose. Students will not receive credit for this class if they have already received credit for COMM 5640. Cross-listed with COMM 4051. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Term offered: fall, spring. Max hours: 3 Credits.

**COMM 5081 - Introduction to Digital Studies (3 Credits)**
Develop marketable skills such as building websites, making interactive maps, recording podcasts, and analyzing data while also studying the cultural and ethical dimensions of these technologies. Cross-listed with COMM 3081, HIST 3260, and HIST 5260. Max hours: 3 Credits.

**COMM 5152 - Perspectives on Rhetoric (3 Credits)**
Rhetorical criticism is the study of how language works to persuade. This class surveys major thinkers to offers students a range of methods, which are then applied to address specific case studies. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4021. Max hours: 3 Credits.

**COMM 5040 - Communication, Prisons, and Social Justice (3 Credits)**
This class examines the U.S. prison-industrial complex and enables students to envision ways of reducing crime and improving democracy by engaging in community service. Note: This course fulfills the communication department’s exit class requirement. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. COMM 2020 is recommended preparation for this course. Cross-listed with COMM 4040. Term offered: spring. Max hours: 3 Credits.

**COMM 5051 - Advanced Strategic Communication (3 Credits)**
Provides senior-level training in hands-on communication environments where targeted messaging seeks specific outcomes. All students complete projects for community group, media outlet or corporation they choose. Students will not receive credit for this class if they have already received credit for COMM 5640. Cross-listed with COMM 4051. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Term offered: fall, spring. Max hours: 3 Credits.

**COMM 5081 - Introduction to Digital Studies (3 Credits)**
Develop marketable skills such as building websites, making interactive maps, recording podcasts, and analyzing data while also studying the cultural and ethical dimensions of these technologies. Cross-listed with COMM 3081, HIST 3260, and HIST 5260. Max hours: 3 Credits.

**COMM 5152 - Religion & Communication (3 Credits)**
This course focuses on the dynamics between religion, culture, and communication and how these have led to intercultural peace, centuries of war, and/or different visions of belonging. This class addresses these dynamics to improve intercultural dialogue and conflict resolution processes, foregrounding the search for justice. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with COMM 4152, INTS 4152, RLST 4152, INTS 5152, and RLST 5152. Max hours: 3 Credits.

**COMM 5051 - Advanced Strategic Communication (3 Credits)**
Provides senior-level training in hands-on communication environments where targeted messaging seeks specific outcomes. All students complete projects for community group, media outlet or corporation they choose. Students will not receive credit for this class if they have already received credit for COMM 5640. Cross-listed with COMM 4051. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Term offered: fall, spring. Max hours: 3 Credits.

**COMM 5081 - Introduction to Digital Studies (3 Credits)**
Develop marketable skills such as building websites, making interactive maps, recording podcasts, and analyzing data while also studying the cultural and ethical dimensions of these technologies. Cross-listed with COMM 3081, HIST 3260, and HIST 5260. Max hours: 3 Credits.

**COMM 5152 - Religion & Communication (3 Credits)**
This course focuses on the dynamics between religion, culture, and communication and how these have led to intercultural peace, centuries of war, and/or different visions of belonging. This class addresses these dynamics to improve intercultural dialogue and conflict resolution processes, foregrounding the search for justice. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with COMM 4152, INTS 4152, RLST 4152, INTS 5152, and RLST 5152. Max hours: 3 Credits.

**COMM 5051 - Advanced Strategic Communication (3 Credits)**
Provides senior-level training in hands-on communication environments where targeted messaging seeks specific outcomes. All students complete projects for community group, media outlet or corporation they choose. Students will not receive credit for this class if they have already received credit for COMM 5640. Cross-listed with COMM 4051. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Term offered: fall, spring. Max hours: 3 Credits.

**COMM 5081 - Introduction to Digital Studies (3 Credits)**
Develop marketable skills such as building websites, making interactive maps, recording podcasts, and analyzing data while also studying the cultural and ethical dimensions of these technologies. Cross-listed with COMM 3081, HIST 3260, and HIST 5260. Max hours: 3 Credits.

**COMM 5152 - Religion & Communication (3 Credits)**
This course focuses on the dynamics between religion, culture, and communication and how these have led to intercultural peace, centuries of war, and/or different visions of belonging. This class addresses these dynamics to improve intercultural dialogue and conflict resolution processes, foregrounding the search for justice. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with COMM 4152, INTS 4152, RLST 4152, INTS 5152, and RLST 5152. Max hours: 3 Credits.

**COMM 5051 - Advanced Strategic Communication (3 Credits)**
Provides senior-level training in hands-on communication environments where targeted messaging seeks specific outcomes. All students complete projects for community group, media outlet or corporation they choose. Students will not receive credit for this class if they have already received credit for COMM 5640. Cross-listed with COMM 4051. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Term offered: fall, spring. Max hours: 3 Credits.

**COMM 5081 - Introduction to Digital Studies (3 Credits)**
Develop marketable skills such as building websites, making interactive maps, recording podcasts, and analyzing data while also studying the cultural and ethical dimensions of these technologies. Cross-listed with COMM 3081, HIST 3260, and HIST 5260. Max hours: 3 Credits.
COMM 5221 - Research Methods: Qualitative (3 Credits)
This class applies qualitative research methods to human communication practices, including the processes of designing qualitative studies, collecting data, analyzing and interpreting data, and reporting results. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4221. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

COMM 5240 - Organizational Communication (3 Credits)
Churches, schools, companies, NGOs, the government—these are all organizations. This class addresses the theories of how organizations succeed or fail and stresses functional workplace skills and practices. Restriction: Restricted to Graduate and Graduate Non-Degree majors; Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4240. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

COMM 5255 - Negotiations and Bargaining (3 Credits)
This class engages Principled Negotiation theory and practice and involves numerous negotiation simulations. These are skills-based exercises that emphasize communication strategies and traverse a number of different negotiation contexts. Through the simulations, both group and dyadic work is practiced. Restriction: Restricted to Graduate and Graduate Non-Degree majors; Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4255. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

COMM 5260 - Communication and Conflict (3 Credits)
Sometimes it seems like our days are full of conflict—why is that? This class studies the influence of communication on intrapersonal, interpersonal, intragroup, and intergroup conflict situations, and offers communication skills for building better relationships. Restriction: Restricted to Graduate and Graduate Non-Degree majors; Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4260. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

COMM 5270 - Intercultural Communication (3 Credits)
The age of globalization means we are all neighbors, working across national boundaries and even continents. This class examines the philosophies, processes, problems, and potentials unique to communicating across cultures to address issues of social justice and ethical intercultural practices. We will consider the important role of context in interactions across cultures and subcultures, globally, transnationally, and within the U.S. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring, summer. Cross-listed with COMM 4270 and INTB 6270. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring, Summer.

COMM 5282 - Environmental Communication (3 Credits)
Our world is shaped by policies and practices that threaten life on Earth. With such high stakes for making a more livable, just, and equitable future, this course examines storytelling, naming, framing, and the other communication concepts that are essential for navigating our shared planet. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4282. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

COMM 5430 - Communication, China, & the US (3 Credits)
This course provides a senior-level opportunity to study how China and the USA have spoken about and to each other, from the Opium War through the Cyber Wars, thus situating both nations in a world of globalizing communication and interdependence. Note: this course fulfills the communication department’s exit class requirement. This course may count for the International Studies major or minor. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Cross-listed with COMM 4430. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

COMM 5450 - Health Communication (3 Credits)
This class examines the role of communication in a wide range of health contexts. Topics include cultural constructions of health and illness, public health communication campaigns, client-provider interactions, telemedicine, community-based health programs, and medical journalism. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4500. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

COMM 5550 - Rhetorics of Medicine & Health (3 Credits)
This senior seminar explores why it matters how we talk and think about medicine and health. Case studies explore contagion, contested illnesses, the body, death, and biopower. The course requires extensive discussion of readings and an original research project. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with COMM 4550. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

COMM 5557 - Crisis and Emergency Communication (3 Credits)
This course examines strategic communication practices throughout the three stages of a crisis or emergency event. Special emphasis is placed on crisis planning, emergency messaging, media relationships, image restoration, ethical responses, and organizational learning. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with COMM 4557, PUAD 4620, and PUAD 6620. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.
COMM 5558 - Digital Health Narratives (3 Credits)
This course blends readings, discussions, and activities about health narratives with digital media production skills to teach students how to create compelling digital stories about health-related topics. Students produce digital messages for the community group of their choosing. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Cross-listed with COMM 4558. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

COMM 5575 - Designing Health Messages (3 Credits)
Examines the roles of communication in the design and impact of health messages/campaigns. We will design and assess health communication messages/campaigns in a participatory, process-oriented way using varied communication tools. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with COMM 4575. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

COMM 5601 - You Are What You Eat: Food as Communication (3 Credits)
Food is a source of identity, culture, and belonging. It communicates heritage and belonging. Because food provides communication channels for much of who we are as individuals, as a community, and as a society, this course analyzes food as a form of communication. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with Permission of instructor. Cross-listed with COMM 4601. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

COMM 5660 - Queer Media Studies (3 Credits)
Queer Media Studies, a discussion-based seminar, investigates the history of a variety of LGBTQ+ media — including news, film, television, comics, games, music, and the Internet. Students engage in a variety of media projects to explore LGBTQ+ histories, queer aspects of media production, reception, and media messages. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with COMM 4660, WGST 4660, WGST 5660. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 5558 - Political Communication (3 Credits)
Examines the communication processes involved in mediated political events. Topics include the stages of the campaign process, media coverage of the political campaign process, and literacy skills needed to understand political advertising. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll by permission of instructor. Cross-listed with COMM 4682. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 5710 - Topics in Communication (1-3 Credits)
Special classes for faculty-directed experiences examining communication issues and problems not generally covered in the curriculum. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll by permission of instructor. Cross-listed with COMM 4710. Term offered: fall, spring. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 5720 - Dynamics of Global Communication (3 Credits)
This class explores global communication dynamics by analyzing the relationships between world media, international events, economics, and geopolitics. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with COMM 4720. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 5722 - Communicating Latinx Cultures (3 Credits)
Communicating Latinx/o/x Cultures centers historical and contemporary vernacular and institutional discourse sand narratives about, by, and for Latinx/o/x people and communities. Drawing on theories, methods, and practices to understand the complexities of Latinx/o/x cultures and lives, we will investigate how different actors and activists express and experience borders, migration, dispossession, citizenship, colonialism/ coloniality, colorism, white supremacy, environmental racism (including anti-Blackness), mono- and multilingualism, self-determination struggles, power, representation, resistance, and mutual support networks for alternative worldmaking. To situate these concepts and concerns, we will explore contexts and places ranging from Colorado to the Caribbean. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Term Typically Offered: Spring. Cross-listed with COMM 4722, ETST 4722, and ETST 5722. Max hours: 3 credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Permission of instructor. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

COMM 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.
COMM 5939 - Internship (1-6 Credits)
Applies communication or technical communication concepts and skills in supervised employment situations. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

COMM 5995 - Global Study Topics (1-15 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Term offered: fall, spring, summer. Max hours: 15 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Global Education Study Abroad.
Typically Offered: Fall, Spring, Summer.

COMM 6013 - Introduction to Graduate Work in Communication (3 Credits)
Designed to familiarize students with the philosophical, ideological, and methodological bases of study in communication. Note: Required of all graduate students in M.A. program in communication. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

COMM 6400 - Communication, Globalization and Social Justice (3 Credits)
This course offers students an introduction to the intersections of communication as a discipline, globalization as a world process, and social justice as a contested, ever-evolving goal of activists. Note: This course may count for the International Studies major or minor. See your INTS advisor for more information. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 6700 - Thesis and Project Practicum (3 Credits)
Focuses on strategies of research design and writing for undergraduate students working on theses for Latin honors. Students pick their own research topics. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Undergraduates with senior standing may enroll with permission of instructor. Cross-listed with COMM 4700. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

COMM 6711 - Topics in Communication (1-15 Credits)
Special classes for faculty-directed experiences examining communication issues and problems not generally covered in the curriculum. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Repeatable. Max hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

COMM 6950 - Master's Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.

COMM 6960 - Master's Project (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring, Summer.
Communication, MA

Introduction

Our vibrant community of scholars and teachers is committed to providing a real world, hands-on, and theoretically robust master's degree that will enrich students' communication knowledge and skills. Our program is a 33-credit generalist degree designed to enhance students' intellectual and professional growth through the understanding, analysis and practice of effective communication. Our faculty members are nationally and internationally recognized leaders in their fields, and our students hail from all over the world.

Some students who complete our program receive offers to top-notch PhD programs while others accept or continue in positions related to communication management, strategic communication, public relations, media relations, human relations, and corporate and non-profit communications.

For more information please visit our website (https://clas.ucdenver.edu/communication/programs/master-arts/).

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 33 credits from approved courses.
2. Students must complete a minimum of 27 credits at the graduate level.
3. Students must earn a minimum grade of B (3.0) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as P+/P/F or S/U.
4. All credits for the degree must be completed with CU Denver faculty. A maximum of 12 credits of relevant graduate work may be transferred from another university with the program director's approval.
5. Students must comply with all Graduate Education Policies and Procedures.

Students must take two graduate Communication seminars (6000-level or higher), in addition to the required COMM 6013 course. The optional COMM 6950 Master's Thesis or COMM 6960 Master's Project do not count as seminars.

Seminars are Communication courses at the 6000 level and are often special topics classes taught in faculty areas of expertise.

Students must complete seven elective courses.

All electives must be at the 5000 or 6000 level; however, 1 course (3 credits) is permitted at the 4000 level with prior approval of the student's advisor and the Director of Graduate Studies. A total of 6 credits may be outside the Communication department.

All students must pass a comprehensive examination at the end of course work.

Total Hours 33

1 Courses that count as electives include:
   • Any Communication courses taken at the 5000 or 6000 level that do not fulfill another program requirement.
   • Communication internships (max six credit hours)
   • Communication independent studies (max six credit hours)
   • Courses from outside the Communication department (max six credit hours; more with the approval of the student's advisor and the Director of Graduate Studies).
   • Project or Thesis credit, if applicable. Students who choose to complete a project or thesis must register for between 3-6 semester hours of project or thesis work, which may substitute for one or two elective courses. Students who complete a project or thesis still complete a total of 33 credit hours.

Introduction

Please click here (p. 339) to see Communication Department information.

The Graduate Certificate in Health Communication (CHC) offers learners the opportunity to acquire and demonstrate expertise in health communication. The certificate program will provide students with a theoretically rich and practically relevant education in how health messages are generated, negotiated, assessed, and understood across a wide range of communication contexts, spanning intrapersonal communication to digital and mass media.

The Graduate Certificate in Health Communication seeks to impart the knowledge and skills necessary for creating, analyzing, and assessing health communication in a diverse and global world, where health occupies an increasingly prominent portion of our public life. Specifically, students in our program will be able to:

1. Utilize health communication concepts and theories to solve problems in professional, personal, and community/civic life.
2. Select and use appropriate methods to collect, analyze, and interpret data to answer health communication research questions.
3. Develop ethical and effective health communication messages and campaigns; orally, in writing, and across digital platforms.
4. Identify, critique, and evaluate research from across major areas of health communication research.

Application Procedures and Additional Information

- Students should declare interest in completing the Graduate Certificate in Health Communication by emailing Dr. Tamara Powell at tamara.powell@ucdenver.edu. (tamara.powell@ucdenver.edu)
- Students who are not already enrolled at CU Denver must also complete an online Application for Non-Degree Admission prior to registering for courses. Access the Graduate Non-Degree application here (https://www.ucdenver.edu/admissions/-apply-now/).
- Before the end of their final semester, students must send a completed certificate application (http://catalog.ucdenver.edu/cu-denver/graduate/schools-colleges-departments/college-liberal-arts-sciences/communication/health-communication-graduate-certificate/CHC_grad_application.docx) to Dr. Tamara Powell at tamara.powell@ucdenver.edu. (tamara.powell@ucdenver.edu)
- The approved certificate will be mailed to the student, and recorded on their transcript, after final grades are posted for the semester.
- Additional information about the graduate certificate in Health Communication may be obtained from Dr. Tamara Powell, Student Commons Building 3311, 303-315-0310, or tamara.powell@ucdenver.edu.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Health Communication advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 15 credits from approved courses.
2. Students must complete all courses at the graduate level (5000 or above).
3. Students must earn a minimum grade of B (3.0) in all courses applied to the certificate and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Courses taken using P+/P/F or S/U grading cannot apply to certificate requirements.
4. All of the credit hours for the certificate must be earned from faculty at the University of Colorado Denver.

To learn more about the Student Learning Outcomes for this program, please visit our website ([https://clas.ucdenver.edu/communication/graduate-certificate-health-communication-learning-outcomes/](https://clas.ucdenver.edu/communication/graduate-certificate-health-communication-learning-outcomes/)).
Strategic Communication Graduate Certificate

Introduction

Strategic Communication has been defined as the management function that entails planning, research, publicity, promotion and collaborative decision-making to help any organization's ability to listen to, appreciate and respond appropriately to those persons and groups whose mutually beneficial relationships the organization needs to foster as it strives to achieve its mission and vision. The Graduate Certificate in Strategic Communication is designed to provide students with the principles and theories that guide the work of public relations practitioners in commercial, public and nonprofit contexts.

Non-degree students who enroll in the MA program following completion of the certificate may transfer up to 12 hours of credits earned for the certificate into credits for the MA degree. The certificate also is designed for students enrolled in a CU Denver's master's program, including the Department of Communication's MA program. For such students, the certificate can be completed as part of or in addition to the coursework required for the master's degree.

Recipients of the Undergraduate Certificate in Strategic Communication are ineligible to complete this certificate.

Application Procedures and Additional Information

• Students should declare interest in completing the Graduate Certificate in Strategic Communication by emailing Dr. Hamilton Bean at hamilton.bean@ucdenver.edu (hamilton.bean@ucdenver.edu).

• Before the end of their final semester, students must send a completed certificate application (https://clas.ucdenver.edu/communication/certificates/) to Dr. Hamilton Bean at hamilton.bean@ucdenver.edu (hamilton.bean@ucdenver.edu).

• The approved certificate will be mailed to the student, and recorded on their transcript, after final grades are posted for the semester.

• Students who are not already enrolled at CU Denver must also complete an online Application for Non-Degree Admission prior to registering for courses.

Additional information about the Graduate Certificate in Strategic Communication may be obtained from

Dr. Hamilton Bean
Department of Communication
Student Commons Building
1201 Larimer Street, Suite 3010
303-315-1909
Hamilton.Bean@ucdenver.edu

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 12 credits from approved courses.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B (3.0) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as P+/P/F or S/U.
4. All of the credit hours for the certificate must be earned from faculty at the University of Colorado Denver.

Total Hours 12

1 Students may be permitted to take courses other than those listed above to fulfill the requirements for the certificate if those courses fit their professional goals better. Requests for approval for substitute courses, including an explanation for the substitution, must be made in writing to Dr. Hamilton Bean.

2 The elective must be approved in consultation with the Department of Communication.

Dual Degrees

Programs

- Economics MA/Applied Mathematics MS Dual Degree, with a Focus in Applied Statistics (p. 349)
- Economics MA/Finance MS Dual Degree (p. 350)
- Economics MA/Public Administration MPA Dual Degree (p. 351)
Economics MA/Applied Mathematics
MS Dual Degree, with a Focus in
Applied Statistics

Introduction

Graduate Advisors:
Economics - Andrew Friedson, Chloe East, and Andrea Velasquez
Applied Mathematics - Click here. (https://clas.ucdenver.edu/mathematical-and-statistical-sciences/degree-requirements-dual-mams-economics-and-applied-mathematics/)

The fields of mathematics and economics are inextricably linked. In economics, mathematics and statistics are used extensively in theory construction, tests of existing theories and discovery of regularities to inform new theories. Economics also gives mathematicians/statisticians new challenges, new outlets and new ideas to incorporate in mathematics. These complementarities have long been recognized and economics graduate students have always been advised to take advanced courses in statistics.

A “dual” degree means that students who complete the program earn two master’s degrees: MA in economics and MS in applied mathematics. Students interested in completing the dual degree in economics and applied mathematics must apply separately to each program, and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student may not graduate under the dual degree program. Students may apply to both programs at the same time or apply to the economics program first, and then to the applied math program after their first semester, or vice versa. Both programs must be completed in the same semester to take advantage of the dual degree program. Further information about this program can be obtained from either the Department of Economics or the Math Department.

Click here (p. 361) for admissions requirements for the MA program in Economics

Click here (p. 464) for admissions requirements for the MS program in Applied Mathematics

There are an increasing number of economics MA students wishing to obtain graduate training and a degree in statistics. Having an MA degree in economics and an MS degree in Applied Mathematics will make a student highly employable in the job market and provide them an edge in applying for elite PhD programs.

Graduate Education Policies and Procedures apply to this program.
Program Requirements

1. The requirements for the dual degree in economics and applied mathematics include completing 21 credit hours in ECON and 21 credit hours in MATH (42 total credit hours).
2. Students are expected to meet all course prerequisites. ECON 5803 Mathematical Economics is a prerequisite for ECON 5073 Microeconomic Theory and ECON 5813 Econometrics I. This prerequisite requirement is waived for students who are currently admitted to the MS Applied Mathematics program.
3. Students must complete all ECON and MATH credits at the graduate level (5000-level or higher).
4. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements. No course may be taken more than twice and only one attempt will retain the credit.
5. Students must complete all coursework with CU Denver faculty.

Students must complete a minimum of three credit hours of ECON 6053 Seminar In Applied Economics / ECON 6054 Seminar In Applied Economics II. Students may complete all three credit hours in one of the courses or they may complete 1.5 credits in each course. After completing the three required credit hours as part of the required coursework, additional credits may be counted as electives.

Students may complete a different course given prior approval by the student’s advisor and the Director of the Program.

Except MATH 5000-5017 and MATH 5198. Contact a graduate advisor in the Math Department for information about Math course requirements.

To learn more about the Student Learning Outcomes for the MS program in Applied Mathematics, please visit our website.

To learn more about the Student Learning Outcomes for the MA program in Economics, please visit our website (https://clas.ucdenver.edu/economics/programs/master-arts-economics/).
Economics MA/Finance MS Dual Degree

Introduction

Graduate Advisors: Andrew Friedson, Chloe East and Andrea Velasquez

For students interested in combining the quantitative skills of an economics degree with the specific applications of a business degree, we offer an MA economics / MS finance dual degree. This 42-semester-hour program is offered jointly with the Business School.

A “dual” degree means that students who complete the program earn two master’s degrees: MA in economics and MS in finance. Students interested in completing the dual degree in economics and public administration must apply separately to each program, meet the admission requirements of each program, and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student may not graduate under the dual degree program. Further information about this program can be obtained from either the Department of Economics or the Business School.

Click here (p. 361) for admissions requirements for the MA program in Economics

Click here (p. 143) for admissions requirements for the MS program in Finance and Risk Management

The dual degree program is intended to create highly-skilled research professionals with considerable econometric skill as well as familiarity with their chosen financial institutions. Given the similarity in course work within the two programs, there can be considerable time savings for the student. Essentially, the program allows students to complete the two programs that separately would require 60 hours of course work with 42 hours of combined course work.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. The requirements for the dual degree in economics and finance include completing 21 credit hours in ECON and 21 credit hours in FNCE (42 total credit hours)

2. Students are expected to meet all course prerequisites.

3. Students must complete a minimum of 42 upper-division (5000-level) or higher ECON and FNCE credit hours.

4. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements. No course may be taken more than twice and only one attempt will retain the credit.

5. Students must complete all coursework with CU Denver faculty.

Economics MA/Public Administration
MPA Dual Degree

Introduction

Graduate Advisors: Andrew Friedson, Chloe East and Andrea Velasquez

The fields of public administration and economics are inextricably linked. Economists provide much of the theory and analytic foundation that administrators use to evaluate and implement policy. Given that the capital of the state of Colorado is in Denver, there is great need for administrators that fully understand methods of program evaluation and have the theoretical background needed to forecast how individuals and institutions will respond to new proposals. Similarly, good theory and practice must take into account how the proposals will be implemented and results interpreted. Both administrators and economists need to be engaged in constructive dialog for either to be fully effective.

A "dual" degree means that students who complete the program earn two master’s degrees: MA in economics and MPA in public administration. Students interested in completing the dual degree in economics and public administration must apply separately to each program, meet the admission requirements of each program, and be accepted by each program. If one program accepts a student for the dual degree but the other program does not, then the student may not graduate under the dual degree program. Students may apply to both programs at the same time or apply to the economics program first, and then to the public administration program after their first semester, or vice versa. Both programs must be completed in the same semester to take advantage of the dual degree program. Further information about this program can be obtained from either the Department of Economics or the School of Public Affairs.

Click here (p. 361) or admissions requirements for the MA program in Economics
Click here (p. 683) for admissions requirements for the MPA program in Public Administration

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. The requirements for the dual degree in economics and public administration include completing 21 credit hours in ECON and 27 credit hours in PUAD (48 total credit hours).
2. Students are expected to meet all course prerequisites.
3. Students must complete a minimum of 48 graduate (5000-level) or higher ECON and PUAD credit hours.
4. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements. No course may be taken more than twice and only one attempt will retain the credit.
5. Students must complete all coursework with CU Denver faculty.

Economics

Chair: Brian Duncan
Program Assistant: Christine Lukvec
Office: Lawrence Street Center, LW-470
Telephone: 303-315-2030
Website: econ.ucdenver.edu/home/ (http://econ.ucdenver.edu/home/)

Overview
Economics is the science of decision making. The rigorous and general approach that characterizes economics lends itself to a remarkably wide field of practical application. Economists are noted for major contributions in a number of fields including government policy, taxation, law, regulation, political economy, international trade and finance, international and U.S. development, marketing, environmental studies, medical policy, portfolio management and banking. The broad and rigorous training of economics majors accounts for their significant demand in virtually every industry and government agency. Economics provides excellent preparation for advanced graduate study as well. Recent studies indicate that economics is a preferred degree for prestigious MBA programs and law schools.

Graduate Program
The Department of Economics offers an MA program in Economics and MS and Ph.D. programs in Health Economics. The MA program in Economics trains students in quantitative and applied economic skills and is directed toward two groups:

1. those who look on the MA as a key to career development in business or government service, and
2. those who desire to go on to pursue the PhD in economics or related fields.

The strong quantitative emphasis of the department’s MA program is ideally suited for the pursuit of both these goals. Our graduates are sought out by energy companies, defense contractors, health care agencies, consulting firms, financial institutions, and other companies looking for employees who know how to use real-world data to answer research questions. Many of our graduates use their MA degree in economics at CU Denver as a springboard towards pursuing a Ph.D. degree in economics at highly ranked programs across the country.

The MS and Ph.D. programs in Health Economics are designed to train scientists to engage in modern economic research related to questions pertinent to health policy, health behaviors, and health care services. Both programs are collaborative among faculty in the Department of Economics (ECON), housed in the College of Liberal Arts and Sciences, and the Department of Health Systems, Management & Policy (HSMP), housed in the Colorado School of Public Health. The ECON coursework grounds students in rigorous economic theory and modern statistical methods, whereas the HSMP coursework connects students to institutional details of the health care sector, study design, quantitative methods, cost-effectiveness analysis, and grant writing. The Health Economics programs equip students with an applied interdisciplinary skill set that integrates creative knowledge with the technical expertise that is in demand in the health care industry, enhancing their career and professional development.

Health Economics, MS
Admission Requirements

1. Meet all general graduate admission requirements (including a 3.0 undergraduate grade-point average).
2. Submit three letters of recommendation (at least two letters should come from individuals who are familiar with your scholarly record. The third can be an additional academic reference or professional reference from someone who knows you well and can comment on your potential as a graduate student).
3. Submit official transcripts from all colleges attended.
4. Have completed 15 credit hours of undergraduate economics, including intermediate microeconomic theory and econometrics (upper division courses).
5. Have completed courses in calculus and statistics (preferably a year of calculus. A course in linear algebra and/or differential equations is recommended).
6. Submit GRE scores. All applicants, international and domestic, must submit GRE scores regardless of prior degrees, course work, or work experience. The institution code for CU Denver is 4875. GRE scores are used in conjunction with other indicators of academic success at the Master’s level. Applicants must show strong evidence of quantitative ability either through high grades in math, statistics, and economics courses, a high quant score on the GRE, or preferably both.
7. International students must submit TOEFL, IELTS, or PTE Academic scores. The institution code for CU Denver is 4875. The minimum required score is 203 (computer-based TOEFL), 75 (IBT-based TOEFL), 537 (paper-based TOEFL), 6.5 (IELTS), or 51 (PTE). Minimum subscores also apply. More information about TOEFL, IELTS, or PTE waiver requirements can be found on the International Admissions’ website. Please contact the International Admissions office if you have questions about this requirement.

Application Deadlines
Fall: June 1 Spring: December 1

The Department of Economics accepts late applications after these official deadlines. However, there is no guarantee that a late application will be processed in time for the start of the semester. Students are encouraged to apply well in advance the application deadline.

International students who apply after the June 1 or December 1 deadline may not have time to obtain a student visa. Being admitted to the M.S. program in Health Economics does not guarantee that a student will receive a student visa in time for the start of the semester. International students who are admitted to the MS program, but fail to obtain a visa in time, may defer admission for up to one year. All questions about student visas should be directed to the Office of International Education.

Health Economics, PhD
Admission Requirements

1. Meet all general graduate admission requirements (including a 3.0 undergraduate grade-point average).
2. Submit three letters of recommendation (at least two letters should come from individuals who are familiar with your scholarly record. The third can be an additional academic reference or professional reference from someone who knows you well and can comment on your potential as a graduate student).
3. Submit official transcripts from all colleges attended.
• Have completed 15 credit hours of undergraduate economics, including intermediate microeconomic theory and econometrics (upper division courses).
• Have completed courses in calculus and statistics (preferably a year of calculus. A course in linear algebra and/or differential equations is recommended).
• Submit GRE scores. All applicants, international and domestic, must submit GRE scores regardless of prior degrees, course work, or work experience. The institution code for CU Denver is 4875. GRE scores are used in conjunction with other indicators of academic success at the PhD level. Applicants must show strong evidence of quantitative ability either through high grades in math, statistics, and economics courses, a high quant score on the GRE, or preferably both.
• International students must submit TOEFL, IELTS, or PTE Academic scores. The institution code for CU Denver is 4875. The minimum required score is 203 (computer-based TOEFL), 75 (IBT-based TOEFL), 537 (paper-based TOEFL), 6.5 (IELTS), or 51 (PTE). Minimum subscores also apply. More information about TOEFL, IELTS, or PTE waiver requirements can be found on the International Admissions’s website. Please contact the International Admissions (p. 43) office if you have questions about this requirement.

### Application Deadlines

**June 1**

Students are encouraged to apply by February 1 for full consideration of financial aid. The final application deadline is June 1.

### Economics, MA

#### Admission Requirements

- Meet all general graduate admission requirements (including a 2.5 undergraduate grade-point average).
- Submit three letters of recommendation (at least two letters should come from individuals who are familiar with your scholarly record. The third can be an additional academic reference or professional reference from someone who knows you well and can comment on your potential as a graduate student).
- Submit official transcripts from all colleges attended.
- Have completed 15 credit hours of undergraduate economics, including intermediate microeconomic theory and intermediate macroeconomic theory (upper division courses).
- Have completed courses in calculus and statistics (preferably a year of calculus and a course in econometrics or similar upper division statistics course. A course in linear algebra and/or differential equations is recommended).
- Submit GRE scores. All applicants, international and domestic, must submit GRE scores regardless of prior degrees, course work, or work experience. The institution code for CU Denver is 4875. Most students admitted to the MA program in economics score 154 or above (690 or above using the prior test scale) on the quantitative section of the GRE. However, this is not a minimum GRE cutoff score, nor is it a score above which admission is guaranteed. GRE scores are used in conjunction with other indicators of academic success at the Master's level. Applicants must show strong evidence of quantitative ability either through high grades in math, statistics, and economics courses, a high quant score on the GRE, or preferably both.
- International students must submit TOEFL scores. The minimum required score is 203 (computer-based TOEFL), 75 (IBT-based TOEFL), 537 (paper-based TOEFL), or 6.5 (IELTS). The institution code for CU Denver is 4875. The minimum TOEFL scores are a requirement of the Graduate School and cannot be waived by the department of economics. The Graduate School may waive the TOEFL requirement for applicants who have attended a college or university in the United States as a full-time student and have completed two semesters of academic work with a "B" average (3.0 GPA or higher). Please contact the International Admissions office if you have questions about this requirement.

### Application Deadlines

**Fall: June 1 Spring: December 1**

The Department of Economics accepts late applications after these official deadlines. However, there is no guarantee that a late application will be processed in time for the start of the semester. Students are encouraged to apply well in advance the application deadline.

International students who apply after the June 1 or December 1 deadline may not have time to obtain a student visa. Being admitted to the MA program in economics does not guarantee that a student will receive a student visa in time for the start of the semester. International students who are admitted to the MA program, but fail to obtain a visa in time, may defer admission for up to one year. All questions about student visas should be directed to the Office of International Admissions (p. 43).

### Applied Econometrics and Data Analytics Graduate Certificate

#### Application Process

Applicants for a Graduate Certificate Program will send the following documents to the Certificate Program Director:

- **Graduate Certificate Application Form:**
- **Official Transcripts**
- **Resume**
- **Letter of interest**

Upon approval of the student’s admission by the Graduate Certificate Program, the program director will send the student’s certificate admission file to graduate admissions. Graduate admissions will confirm the applicant’s credentials, will determine whether the student meets the general academic requirements, will admit the student and inform the student of his/her admission to the Graduate Certificate Program.

#### Additional Requirements

- Students may be enrolled as a CU Denver graduate student in any discipline, or as a CU Denver non-degree seeking graduate student with a bachelor's degree.
- Students should have completed ECON 4811 Introduction to Econometrics or equivalent coursework, or have professional experience in statistical analysis.
- International students must submit TOEFL scores or otherwise satisfy the University’s English Language Proficiency requirement.
Health Economics and Outcomes Research Graduate Certificate

Application Process
Applicants for a Graduate Certificate Program will send the following documents to the Certificate Program Director:

- Graduate Certificate Application Form
- Official Transcripts
- Resume
- Letter of interest

Upon approval of the student’s admission by the Graduate Certificate Program, the program director will send the student’s certificate admission file to graduate admissions. Graduate admissions will confirm the applicant’s credentials, will determine whether the student meets the general academic requirements, will admit the student and inform the student of his/her admission to the Graduate Certificate Program.

Additional Requirements

- Students may be enrolled as a CU Denver graduate student in any discipline, or as a CU Denver non-degree seeking student with a bachelor’s degree.
- Have completed ECON 4811 Introduction to Econometrics or equivalent coursework, or have professional experience in statistical analysis.
- International students must submit TOEFL scores or otherwise satisfy the University’s English Language Proficiency requirement.

Programs

- Health Economics, MS (p. 359)
- Health Economics, PhD (p. 360)
- Economics, MA (p. 361)
- Applied Econometrics and Data Analytics Graduate Certificate (p. 362)
- Health Economics and Outcomes Research Graduate Certificate (p. 363)

Faculty

Professors:
Laura M. Argy, PhD, University of Colorado Boulder
Brian J. Duncan, PhD, University of California at Santa Barbara
Daniel I. Rees, PhD, Cornell University
W. James Smith, PhD, University of Colorado Boulder
Buhong Zheng, PhD, West Virginia University

Associate Professors:
Andrew I. Friedson, PhD, Syracuse University
Hani Mansour, PhD, University of California at Santa Barbara

Assistant Professors:
Ryan P. Brown, PhD, Duke University
Chloe East, PhD, University of California Davis
Maulik Jaghani, PhD, Cornell University
Phillip Luck, PhD, University of California Davis
Andrea Velasquez, PhD, Duke University

Clinical Teaching Assistant Professors:
Enoch Cheng, PhD, University of California-Los Angeles
Ernest Boffy-Ramirez, PhD, University of California at Santa Barbara
Soojae Moon-Anderson, PhD, University of Colorado Boulder

Instructors:
Debbie Evercloud, PhD, University of Virginia
Nicholas Golding, MA, Ohio State University
Lawrence Hamelin, MA, University of Colorado Denver
Kyle J. Hurst, MA, Baylor University
Kyle Montanio, PhD, University of Rhode Island
George K. Quansah, MA, University of Colorado Denver
Yue Shen, PhD, Queen’s University
Kawin Thamtanajit, PhD, University of Delaware
Chun-Chieh Hu, PhD, Syracuse University

Economics (ECON) Courses

ECON 5030 - Data Analysis with SAS (3 Credits)
Covers techniques for handling and interpreting economic data and conducting econometric analyses using SAS programming. Provides hands-on data management and analyses with large data sets with applications to business and economics, and prepare students for SAS Base Programmer certification exam. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Statistics with Computer Applications(ECON 3811) or a similar course is strongly recommended as preparation for this course. Cross-listed with ECON 4030. Term offered: fall, spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Fall, Spring.

ECON 5050 - Special Economic Problems (1-8 Credits)
Provides students the opportunity to critically evaluate some practical and theoretical problems under supervision, and to present results of their thinking to fellow students and instructors for critical evaluation. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Cross-listed with ECON 4050. Max Hours: 8 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).

ECON 5073 - Microeconomic Theory (3 Credits)
Fundamental features of partial equilibrium theory of the firm, consumer and market. General equilibrium and welfare economic topics are examined. Features of the models that have empirical applications are accentuated. Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor’s to Master’s program (ECON BA-BMA).
Typically Offered: Fall.
ECON 5083 - Macroeconomic Theory (3 Credits)
Examines the major macroeconomic models within a common framework. Differences in the foundations, structure, and policy implications of the competing models are analyzed. Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).
Typically Offered: Spring.

ECON 5090 - History of Economic Thought (3 Credits)
Traces the development of economic thought from ancient times to the 20th century. Considers the context in which these ideas were developed and their relationship to modern economic thought and contemporary economic problems. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Microeconomics (ECON 2022) and Macroeconomics (ECON 2012) or similar coursework is strongly recommended as preparation for this course. Cross-listed with ECON 4090. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).
Typically Offered: Fall.

ECON 5150 - Economic Forecasting (3 Credits)
Teaches forecasting techniques used in business and government to project trends and short-term fluctuations. Actual data are employed in instruction and labs. State-of-the-art spreadsheet and algorithms are introduced as part of the course work. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Statistics with Computer Applications (ECON 3811) or similar coursework is strongly recommended as preparation for this course. Cross-listed with ECON 4150. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).
Typically Offered: Fall.

ECON 5410 - International Trade (3 Credits)
Trade theory identifies who wins and loses from trade and why there are usually overall gains. Explores issues in immigration, globalization, income inequality, tariffs, dumping, the WTO, the environment, wages and growth strategies among others. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Cross-listed with ECON 4410. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).

ECON 5530 - Economics of Natural Resources (3 Credits)
Examines economic models of renewable resource management and models of exhaustible resource depletion. Analyzes decisions made by private firms and governments affecting the methods and rate of resource development. Examines the effects of resource development on economic growth and environmental quality and the effects of economic development on resource scarcity. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Cross-listed with ECON 4530. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).

ECON 5540 - Environmental Economics (3 Credits)
Economic approach to environmental problems: relationship between ownership structures, externalities and environmental damage; poverty, population pressure, and environmental degradation; valuation of environmental amenities; sustainability of economic activity; cost-benefit analysis applied to the environment; evaluation of alternative instruments for environmental control. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Cross-listed with ECON 4540. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prerequisite ECON 5073 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).

ECON 5560 - Health Economics (3 Credits)
Introduces students to analytical skills and economic methods, and demonstrates how these methods can be applied to issues in health policy and management. Topics include: demand for health and medical care; health care costs, health reform, medical technology; market for health insurance; physicians, hospitals, and managed care; pharmaceuticals; regulations in the U.S. health care sector; demand for addictive substances; infant and maternal health; international comparisons of health care systems. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).

ECON 5740 - Industrial Organization (3 Credits)
Examines the determinants of, and linkages between, market structure, firm conduct, and industrial performance. Topics include: determinants of the market size; impact of different market structures on prices and outputs; strategic behavior of firms to prevent entry or induce exit of rival firms; collusion; price discrimination; advertising; competition, monopoly, and innovation; implications for economic efficiency and public policy. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Cross-listed with ECON 4740. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).
ECON 5800 - Special Topics (1-3 Credits)
Current economics topics to be determined by the instructor.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).

ECON 5803 - Mathematical Economics (3 Credits)
Application of mathematical techniques in micro-and macro-economic analysis. Topics include single and multivariable differentiation, basic matrix algebra, optimization, and integration with applications to economic models of consumption, production, market equilibrium, national accounting, and growth. Restriction: Students must be admitted to the MA in ECON, MS or PhD in Health Economics. Cross-listed with ECON 4803. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Students must be admitted to the MA in ECON, MS or PhD in Health Economics.
Typically Offered: Spring.

ECON 5813 - Econometrics I (3 Credits)
Theory and application of statistical techniques used to analyze economic problems. Topics include simple and multiple regression models, simultaneous equation models, and the problems encountered in their application. Students formulate models, obtain data, estimate models, interpret results and, forecast. Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students with graduate standing and coreq ECON 5803 or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).

ECON 5823 - Econometrics II (3 Credits)
Second course in the econometrics sequence, covering intermediate topics in cross-section and time series analysis. Topics include limited dependent variables, autoregressive and distributed lag models, longitudinal data analysis and unit roots, co-integration and other time-series topics. Prereq: ECON 5813 with a B- or higher. Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA). Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5813 with a B- or higher Restriction: Restricted to Graduate and Graduate Non-Degree Majors or undergraduate majors in the Bachelor's to Master's program (ECON BA-BMA).
Typically Offered: Fall.

ECON 5839 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 6. Typically Offered: Fall, Spring, Summer.

ECON 5840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.

ECON 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 6. Typically Offered: Fall, Spring, Summer.

ECON 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9. Typically Offered: Fall, Spring, Summer.

ECON 5950 - Master's Thesis (1-4 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Max hours: 4 Credits.
Grading Basis: Letter Grade with IP
Additional Information: Report as Full Time.

ECON 6010 - Advanced Microeconomic Theory (3 Credits)
Recent and contemporary literature on fundamentals of economic theory. Consideration of value theory with particular emphasis on methodology, theory of demand, theory of the firm, and theory of distribution. Prereq: ECON 5073 with a B- or better. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing.

ECON 6020 - Advanced Macroeconomic Theory (3 Credits)
Considers general equilibrium and aggregative analysis in economic theory, with particular emphasis given to the theory of employment, consumption and investment. Prereq: ECON 5083 with a B- or higher. Restriction: Restricted to student with graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5083 with a B- or higher. Restriction: Restricted to student with graduate standing.
ECON 6022 - Federal Data for Health Research & Policy (1-3 Credits)
Students will develop the knowledge and skills required to effectively use a variety of federal and statistical data sets for health research and policy analysis. Each week is devoted to one or two federal statistical data sets--data collection methods; why they are collected and what health issues they are designed to address; what population they represent and at what geographic scale. Most critically, students will be able to distinguish between questions that can be addressed with a public version of the data and questions that require restricted versions of the data that are protected by federal law and guidelines. Students will read, discuss and present research from various perspectives (Demography, Economics, Geography, Public Health, Sociology) using these data sources and apply their knowledge of data analysis from a variety of perspectives. Students will learn how to gain access to restricted data, how to protect individual anonymity with best practice disclosure avoidance techniques and will develop a research proposal for confidential research access. Note: Familiarity with SAS (preferable) or other statistical software such as SPSS or Stata and statistics or data analysis is recommended. Restriction: Restricted to degree-granting graduate programs. Cross-listed with HBSC 6022, GEOG 5022, and SOCY 5022. Max hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs
Typically Offered: Spring.

ECON 6053 - Seminar In Applied Economics I (1.5 Credits)
Familiarizes students with applied research in economics. Students read, discuss, and critique articles in economic journals. Emphasis is placed on research design and methods employed in these articles to prepare students for development of their own research projects in subsequent courses. Topics vary with instructor, and may include international economics, labor economics, monetary theory, public finance and development economics. Prereq: ECON 5813 with a B- or higher. Coreq: ECON 5823. Restriction: Restricted to students with graduate standing. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade
Prereq: ECON 5813 with a B- or higher Coreq: ECON 5823 Restriction: Restricted to students with graduate standing

ECON 6054 - Seminar In Applied Economics II (1.5 Credits)
Familiarizes students with state-of-the-art applied economic research. Students read, discuss, and critique articles published in economic journals. Note: Topics vary with the instructor. Prereq: ECON 5813 with a B- or higher. Coreq: ECON 5823. Restriction: Restricted to students with graduate standing. Term offered: spring. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade
Prereq: ECON 5813 with a B- or higher Coreq: ECON 5823 Restriction: Restricted to students with graduate standing
Typically Offered: Spring.

ECON 6060 - Special Topics (1-3 Credits)
Special topics in advanced microeconomics. Consideration of value theory based upon methodology, theory of demand, and theory of distribution. Restriction: Restricted to students with Graduate standing. Introduction to Mathematical Economics (ECON 3801) or similar coursework is strongly recommended as preparation for this course. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Max Hours: 3 Credits. Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ECON 6073 - Research Seminar (3 Credits)
Focuses on training students to do rigorous research in economics. Topics include the analysis of large data sets, further development of econometric skills, and writing a research paper. Note: Students attend lectures and also meet regularly with the instructor in the process of doing a sophisticated research project. Prereq: ECON 5073 and ECON 5823 with a B- or higher and either ECON 6053 or ECON 6054 with a B- or higher. Restriction: Restricted to students with graduate standing. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5823 with a B- or higher and either ECON 6053 or ECON 6054 with a B- or higher. Restriction: Restricted to students with graduate standing
Typically Offered: Fall.

ECON 6210 - Public Finance (3 Credits)
Advanced economic theory applied to the problems of public and private sector decision making. Applied topics in taxation, education, voting theory, welfare economics, externalities and public goods. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing
Typically Offered: Fall.

ECON 6410 - International Trade (3 Credits)
Contemporary and classical literature on theories of international trade. Topics include the determination of the pattern and terms of trade, the relationship between growth and trade, and commercial policy. Prereq: ECON 5073 with a B- or higher. Restriction: Restricted to students with graduate standing. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 6420 - International Finance (3 Credits)
Topics in international finance, including exchange rate determination, the adjustment process, international financial markets and the international monetary system. Prereq: ECON 5073 with a B- or better. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing

ECON 6610 - Labor Economics (3 Credits)
Advanced study of the labor market, including: history, nature, and function of labor organizations; the process of wage determination; and the formation of public policy. Prereq: ECON 5073 and 5813 with a B- or higher. Restriction: Restricted to students with Graduate standing. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5813 with a B- or higher Restriction: Restricted to students with Graduate standing
Typically Offered: Spring.
ECON 6666 - The Economics of Health Behaviors (3 Credits)
This course teaches an economic approach to studying health behaviors and the policies that affect them. Special attention will be paid to analyzing the effects of excise taxes and to understanding the quasi-experimental approach to doing applied research in economics. Prereq: ECON 5073 and ECON 5813 with a B- or higher. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5813 with a B- or higher Restriction: Restricted to students with Graduate standing
ECON 6770 - Development Economics (3 Credits)
This course provides a theoretical and empirical framework for analyzing economic problems in developing countries focusing on the role of individuals, families and institutions. Topics include poverty traps, human capital accumulation, gender discrimination, microcredit and violent conflict. Prereq: ECON 5073 and 5803 with a B- or higher. Cross-listed with ECON 4770. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5803 with a B- or higher. Typically Offered: Fall.
ECON 6801 - Advanced Mathematical Economics (3 Credits)
Addresses economic dynamics, formal mathematical modeling in economics, and optimization in economic theory. Prereq: ECON 5803 with a B- or higher or permission of instructor. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5803 with a B- or higher.
ECON 6810 - Econometrics and Forecasting (3 Credits)
Covers advanced topics in cross-sectional and time-series analysis. Emphasizes important theoretical and empirical issues encountered in applied work in economics and business. Topics include problems of structural change and model misspecification, instrumental variables, simultaneous equations models, distributed lags, maximum likelihood estimation, qualitative and limited dependent variables, Arima models, vector-autoregressions, issues on exogeneity and causality. Through the use of econometric software programs and actual data, students learn to execute estimation and forecasting projects soundly. Prereq: ECON 5813 and 5823 with a B- or higher. Restriction: Restricted to students with Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 and ECON 5813 with a B- or higher Restriction: Restricted to students with Graduate standing
ECON 6840 - Independent Study (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9. Typically Offered: Fall, Spring, Summer.
ECON 7073 - Advanced Microeconomic Theory II (3 Credits)
This is a second-semester Ph.D. level course in microeconomics. The first semester course discussed consumer and producer theory; this course will discuss game theory, market equilibrium, and information economics. Prereq: ECON 5073 with a B- or better. Restriction: Restricted to students with Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: ECON 5073 with a B- or better Restriction: Restricted to students with Graduate standing
Typically Offered: Spring.
ECON 7661 - Health Economics I (3 Credits)
This is the first course in the Ph.D field sequence for Health Economics. The goal of this course is to familiarize you with the basic theory and empirical findings in the part of health economics which focuses on the market for medical care and the policy that surrounds it. Prereq or Coreq ECON 5823. Students must enroll in both courses concurrently or have completed ECON 5823 with a B- or better. Restriction: Restricted to students with graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-requisite ECON 5823 OR prerequisite ECON 5823 with a grade of B- or better. Restricted to students with graduate standing. Typically Offered: Spring.
ECON 7662 - Health Economics II (3 Credits)
This course teaches an economic approach to studying the various polices that affect these risky health behaviors. The extensive economic literature on the causes and consequences of risky health behaviors will be studied. Prereq or Coreq: ECON 5823 with a grade of B- or better. Restriction: Restricted to students with graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Co-requisite ECON 5823 OR prerequisite ECON 5823 with a grade of B- or better. Restricted to students with graduate standing. Typically Offered: Fall.
ECON 8990 - Doctoral Dissertation (1-10 Credits)
Designed to allow doctoral students to conduct research for course credit prior to advancement to candidacy. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring. Repeatable. Max hours: 50 Credits.
Health Economics, MS

Introduction

Program Director: Andrew Friedson, Ph.D.
Graduate Advisor: Chloe East, Ph.D. and Andrea Velasquez, Ph.D.

The M.S. program in Health Economics provides graduate-level training in economics, specifically in the economics of the health care industry. Our M.S. program emphasizes extensive training in mathematical and quantitative analysis, including substantial exposure to applied econometrics, working with large and diverse data sets, and a wide range of statistical software. The M.S. in Health Economics builds off the strengths of the Economics Department, which is housed in the College of Liberal Arts and Sciences, and the Department of Health Systems, Management and Policy (HSMP), which is housed in the Colorado School of Public Health, allowing students to take courses on both the downtown Denver and Anschutz Medical campuses. The program gives students the applied skills that employers demand, provides those pursuing advanced degrees an edge in gaining admission to top-flight Ph.D. programs, enhancing the student’s career and professional development.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Health Economics faculty advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 30 credit hours of coursework, of which 21 hours are core requirements. Each student’s plan will be worked out in conjunction with the graduate advisor. Students are expected to meet all course prerequisites.

2. Students must complete a minimum of 30 graduate (5000 and above) level credit hours.

3. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements. No course may be taken more than twice and only one attempt will retain the credit.

4. Students must complete all credits for the degree with CU Denver/CU Anschutz faculty.

Health Economics, PhD

Please click here (p. 352) to see Economics department information.

Introduction

Program Director: Andrew Friedson, Ph.D., Department of Economics
Program Co-Director: Marcelo Perraillon, Ph.D., Health Systems, Management & Policy

The Ph.D. in Health Economics is designed to train scientists to engage in modern economic research related to questions pertinent to the health care sector and to personal and public health. Students take courses both from the Economics Department, which is housed in the College of Liberal Arts and Sciences, and from the Health Systems, Management & Policy (HSMP) Department, which is housed in the Colorado School of Public Health. The ECON coursework grounds students in rigorous economic theory and modern statistical methods, whereas the HSMP coursework connects students to institutional details of the health care sector, administrative data methods, grant writing, and the development of interdisciplinary health care research.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Health Economics faculty advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 76 credit hours, including 36 hours of core requirements, and a minimum of 30 dissertation credit hours. Each student’s plan will be worked out in conjunction with the graduate advisor. Students are expected to meet all course prerequisites.

2. Students must complete a minimum of 30 graduate (5000 and above) level credit hours.

3. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements. No course may be taken more than twice and only one attempt will retain the credit.

4. Students must complete all credits for the degree with CU Denver/ CU Anschutz faculty.

To learn more about the Student Learning Outcomes for this program, please visit our website (https://clas.ucdenver.edu/economics/programs/phd-health-economics/).

Ph.D. students must defend their dissertation proposal after completing or registering for all non-dissertation coursework and concurrent with applying for admission to candidacy. Students are advanced to candidacy for the Ph.D. once they have completed all required coursework and examinations, and have successfully presented their dissertation proposal to their dissertation committee.

After students are advanced to candidacy, they must complete a total of 30 hours of dissertation credits to complete the Ph.D. Each fall and spring semester, students are expected to register for a minimum of 5 semester hours of dissertation research; if unable to register for at least 5 semester hours, students must request a leave of absence from the PhD program until able to complete the minimum dissertation requirement. Students may take up to two semesters’ leave of absence before they are unenrolled from the program. Students then would need to reapply to the program.

Each student must write and defend a dissertation containing original contributions and evidence of significant scholarship that the student's primary advisor and dissertation committee deem satisfactory.

Total Hours 76

1 Students must complete two credit hours of HSMP 7010 Foundations in Health Services Research.

Complete a minimum of 30 dissertation credits. 30

ECON 8990 Doctoral Dissertation

Preliminary Exam, Dissertation Proposal, and Dissertation

Students must successfully pass a preliminary examination covering topics in microeconomic theory, econometrics, and health economics by the start of their fourth semester coursework to ensure that they are qualified for doctoral study.

Ph.D. students must defend their dissertation proposal after completing or registering for all non-dissertation coursework and concurrent with applying for admission to candidacy. Students are advanced to candidacy for the Ph.D. once they have completed all required coursework and examinations, and have successfully presented their dissertation proposal to their dissertation committee.

After students are advanced to candidacy, they must complete a total of 30 hours of dissertation credits to complete the Ph.D. Each fall and spring semester, students are expected to register for a minimum of 5 semester hours of dissertation research; if unable to register for at least 5 semester hours, students must request a leave of absence from the PhD program until able to complete the minimum dissertation requirement. Students may take up to two semesters’ leave of absence before they are unenrolled from the program. Students then would need to reapply to the program.

Each student must write and defend a dissertation containing original contributions and evidence of significant scholarship that the student's primary advisor and dissertation committee deem satisfactory.

Total Hours 76

1 Students must complete two credit hours of HSMP 7010 Foundations in Health Services Research.

Applied Econometrics and Data Analytics Graduate Certificate

Introduction
The Graduate Certificate in Applied Econometrics & Data Analytics provides students with a strong graduate-level foundation in modern applied econometrics and quantitative analysis. The unique analytic skill set delivered in this certificate is sought out by energy companies, defense contractors, health care agencies, consulting firms, financial institutions and other companies in the Denver area that are looking for employees who know how to use real world data to answer research questions. Upon earning the certificate, students will be able to:

1. Explain the potential outcomes framework and how it informs empirical research.
2. Distinguish between causal and correlational relationships.
3. Set-up randomized experiments and understand factors that could contaminate them.
4. Identify natural experiments and how to apply them in research.
5. Understand the Difference-in-Difference estimator and its applications.
6. Apply matching techniques.
7. Use Panel data models, such as fixed effects estimators.
8. Understand the use of Instrumental Variables and how they are applied in research.
9. Apply the Regression Discontinuity estimator and apply it in economic research.

Program Delivery
• This is an on-campus program.

Admission Requirements
• Degree: BA/BS
• A minimum GPA of 3.00 is recommended

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Applied Econometrics and Data Analytics advisor to confirm the best plans of study before finalizing them.

Certificate Restrictions, Allowances and Recommendations
1. Students have seven years to complete this certificate.
2. Students should evaluate course descriptions to determine if the prerequisites or corequisites have been completed in order to move forward in the certificate.
3. No course may be taken more than twice.
4. Graduate level ECON credit counted towards the Graduate Certificate in Applied Econometrics and Data Analytics may be subsequently counted towards a CU Denver graduate degree in Economics. Certificate students are not guaranteed admission to the M.S. program in Health Economics. However, certificate students can apply to the M.S. program in economics at any time.
5. Students who complete the Graduate Certificate in Applied Econometrics and Data Analytics and later apply to the M.S. program in Health Economics at CU Denver may submit their certificate in place of GRE scores and letters of recommendation.
6. Students admitted the to the M.A., M.S., or Ph.D. programs in economics at CU Denver may complete the graduate certificate concurrently with their degree program. However, courses that have already been counted towards any degree already awarded (undergraduate or graduate) may not be counted towards the certificate retroactively.

Program Requirements
1. Students must complete a minimum of 12 ECON credit hours.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B (3.0) in all certificate courses completed at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as P+/P/F or S/U.
4. All credit hours for the certificate must be earned at the University of Colorado Denver.

Health Economics and Outcomes Research Graduate Certificate

Please click here (p. 352) to see Economics department information.

Introduction

Graduate Certificate in Health Economics & Outcomes Research is designed to train scientists to engage in modern economic research related to questions pertinent to health policy, health behaviors, and health care services. The unique analytic skill set delivered in this certificate is sought out by health care agencies, state agencies, and consulting firms in the Denver area that are looking for employees who know how to use health data to answer research questions. Upon earning this certificate, students will:

1. Have sufficient knowledge of econometric theory and techniques to make them an effective consumer and producer of empirical research in health economics.
2. Understand the challenges in identifying causal relationships using health data.
3. Understand the fundamentals of the potential outcomes framework, randomized experiments, natural experiments, panel data models, matching, instrumental variables and regression discontinuity designs.
4. Understand the economic approach to studying the healthcare sector, health behaviors, and health outcomes.
5. Understand how different markets function in the health care sector, such as the market for health care, health insurance, health labor (such as physicians and nursing), and pharmaceuticals.

Program Delivery

• This is an on-campus program.

Admission Requirements

• Degree: BA/BS
• A minimum GPA of 3.00 is recommended

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Health Economics and Outcomes Research advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

General Requirements

Click here (p. 39) for information about Academic Policies.

Program Requirements

1. Students must complete a minimum of 12 ECON credit hours.
2. Students must complete a minimum of nine ECON credits at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as P+/P/F or S/U.
4. All credit hours for the certificate must be earned at the University of Colorado Denver.

Certificate Restrictions, Allowances and Recommendations

1. Students have seven years to complete this certificate.
2. Students should evaluate course descriptions to determine if the prerequisites or co-requisites have been completed in order to move forward in the certificate.
3. No course may be taken more than twice.
4. Graduate level ECON credit counted towards the Graduate Certificate in Health Economics & Outcomes Research may be subsequently counted towards a CU Denver graduate degree in Economics. Certificate students are not guaranteed admission to the M.S. program in Health Economics. However, certificate students can apply to the M.S. program in economics at any time.
5. Students who complete the Graduate Certificate in Health Economics & Outcomes Research and later apply to the M.S. program in Health Economics at CU Denver may submit their certificate in place of GRE scores and letters of recommendation.
6. Students admitted to the M.A., M.S., or Ph.D. programs in economics at CU Denver may complete the graduate certificate concurrently with their degree program. English

Chair: Wayne Miller
Associate Chair: Rodney Herring
Program Coordinator: Francine Olivas-Zarate
Program Assistant: Emilio Marquez
Office: 1015 9th Street Park
Telephone: 303-315-7830
Fax: 303-315-7826
Website: clas.ucdenver.edu/english/ (http://clas.ucdenver.edu/english/)

Overview

The English Studies graduate program provides a strong foundation in primary knowledge areas, including the major genres and the theory of genre, approaches to literacy, English language study, and the impact of technology on reading and writing. The program invites MA candidates to build on this foundation by developing an expertise in teaching, and by expanding their content knowledge with courses in rhetoric, literature, film, and applied linguistics.

Additional Information

For additional information on majors, options, minors and certificates call the Department of English office at 303-315-7830.

The English department also offers a graduate certificate in teaching English to speakers of other languages.

English, MA

Requirements for Admission

The deadline for summer or fall admission is April 1; the deadline for spring is October 1. Although these are preferred application deadlines, the department will review and consider applications submitted after these dates and admit students on an ongoing basis.

Complete applications must include the following:

• A completed University of Colorado graduate application
• One copy of all graduate and undergraduate transcripts, and for any non-degree courses previously taken
• Three letters of recommendation in which the recommender specifically addresses the candidate’s ability to pursue successfully the program chosen
• Graduate Record Exam scores are optional. You may provide them if you wish, but they are no longer required.
• Evidence of a 3.0 GPA in previous courses
• A one-page statement of purpose
• 10-page critical writing sample

In addition to these requirements, applicants for the program must have successfully completed 24 semester hours in English courses (graduate or undergraduate), excluding courses in composition, creative writing or speech. At least 15 of these semester hours must be at the upper-division level.

Transfer of Credits from Other CU Campuses

Students admitted to graduate study in English may complete all of their course requirements for the MA degree at CU Denver. Up to 9 semester hours (total) may be transferred from the University of Colorado Boulder, University of Colorado Colorado Springs or other graduate programs; however, such transfer requires the written approval of the graduate advisor. Only 9 semester hours of courses taken at CU Denver before acceptance into the program can be counted toward the degree. Further, work already applied toward a graduate degree received at the University of Colorado or at another institution cannot be transferred toward another graduate degree of the same level at CU Denver. (For other rules concerning transfer of graduate credits, see the Graduate Education Policies and Procedures) For more information, contact the graduate program director at 303-315-7847.

Andrew Scahill, PhD, University of Texas, Austin

English (ENGL) Courses

ENGL 5000 - Studies of Major Authors (3 Credits)
An intensive study of works of one major British or American author. Examples: Dickens, Woolf or James. Prereq: Graduate standing. Cross-listed with ENGL 4000. Term offered: fall, spring. Repeatable. Max Hours: 15 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 15.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.
ENGL 5001 - Special Topics (1-6 Credits)
This variable credit course offers intensive study of the teaching of writing in a collaborative action-oriented approach. Prereq: Graduate standing. Repeatable. Max Hours: 12 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 12. Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5002 - Special Topics. (3 Credits)
These courses offer intensive study of specialized topics in English and American literature and in rhetoric, applied language, technical communication, and the teaching of writing. Max hours: 9 Credits. Grading Basis: Conversion Repeatable. Max Credits: 9.

ENGL 5080 - History of the English Language (3 Credits)
Examines how English has changed since A.D. 800 through examples of writing from different periods, with attention to the way various groups have enriched our vocabulary and altered our syntax. Note: this course assumes that students have completed ENGL 2070 or one year of college level coursework in a foreign language. Prereq: Graduate standing. Cross-listed with ENGL 4080. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5093 - Teaching of Writing (3 Credits)
Deals with the analysis of rhetorical theory with an emphasis on practical applications in the classroom, with attention to alternative pedagogies in teaching. Prereq: Graduate standing. Term offered: summer. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5100 - Introduction to Graduate Studies (3 Credits)
Introduces students to scholarly methods & key debates in English Studies. Familiarizes students with department's specializations in film, linguistics, literature & rhetoric. Offers new MA students training in the primary forms of scholarly writing within the discipline(journal article, conference abstract, synopsis, book review). Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5110 - Denver Writing Project (3-9 Credits)
An intensive extended workshop in the development of one's personal and professional writing and in the teaching of writing. Open to those who are members of the Denver Writing Project. Prereq: Graduate standing. Term offered: summer. Max hours: 9 Credits. Grading Basis: Letter Grade Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5120 - Denver Writing Project Advanced Institute (1 Credit)
Advanced institutes provide intensive examination of an issue related to the teaching of writing. The specific issues are of two kinds–repeatable ones such as “Alumni Institute” and “Writing Retreat” and variable, such as “Action Research” and “Writing Across the Curriculum.” Prereq: Graduate standing. Term offered: summer. Repeatable. Max Hours: 9 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 9. Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5135 - English Language Study (3 Credits)
Introduces students to varieties of English in use today, while tracing range of "new Englishes" back to origins of language. Students will develop an understanding of English as a global language, why it spread throughout the world and how, paying specific attention to print history of English and relationship to other print languages. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5140 - Special Topics with NWP (3 Credits)
This online University of Colorado Denver English Department and Denver Writing Project course will focus on teaching argument writing to grades 3 - 12+ with the National Writing Project's College, Career, and Community Writers Program. Coursework will provide participants the opportunity to engage in the study of research-based pedagogy for the teaching of evidence-based argument writing while nurturing themselves as writers. Term offered: irregular. Max hours: 3 Credits. Grading Basis: Letter Grade

ENGL 5145 - Theory (3 Credits)
Designed to enrich students’ understanding of a variety of modes of theoretical discourse that have influenced modern critical practice in English studies. While the course explores the evolution of criticism, it gives primary emphasis to recent developments. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits. Grading Basis: Letter Grade

ENGL 5150 - Research Methods (3 Credits)
Designed to prepare students for graduate scholarship in language, literacy, and the teaching of writing: should be taken soon after entering the program. Introduction to the research methods and stylistic standards for graduate-level writing. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade

ENGL 5155 - Genres of Writing (3 Credits)
Explores work of major contributors to genre and narrative theory. Offers students exposure to emergent genres in new media, while situating these new genre in relation to historical precedents. Gives students an introduction to the evolution of central genres in literary studies, such as novel, poem, political speech and western film. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade

ENGL 5160 - Special Topics (1-6 Credits)
This variable credit course offers intensive study of the teaching of writing in a collaborative action-oriented approach. Prereq: Graduate standing. Repeatable. Max Hours: 12 Credits. Grading Basis: Letter Grade Repeatable. Max Credits: 12. Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ENGL 5160 - Poetics (3 Credits)
"Mechanics" of poetry in English, including meter, rhythm, rhyme, line, and other systems of measurement and logic. Emphasis is on historical development of poetic art in English. Note: this course assumes that students have completed ENGL 1400. Prereq: Graduate standing. Cross-listed with ENGL 4160. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5165 - Literacy and Technology (3 Credits)
Studies the material forms in which English language has circulated e.g., the history of the oral and manuscript tradition; the history of the book; and the impact of digital technologies on print culture. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5166 - History of American Poetry (3 Credits)
Examines major American poets and poetic trends from the colonial period to the present, with attention to cultural contexts and to development of distinctively American practices. Cross-listed with ENGL 4166. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5170 - Advanced Topics in Writing, Rhetoric, & Linguistics (3 Credits)
Focuses on particular issues in rhetoric and writing as they pertain to reading and writing, including language and gender, language and culture, and language of political action. Cross-listed with ENGL 4190. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

ENGL 5200 - Survey of the English Novel to 1900 (3 Credits)
Rise and development of the English novel from its beginnings in the 18th century through the end of the 19th century, including such writers as Defoe, Fielding, Austen, Shelley, the Brontes, Thackeray, and Dickens. Cross-listed with ENGL 4200. Prereq: Graduate standing. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

ENGL 5210 - History of the English Novel II (3 Credits)
Overview of the English novel from mid-19th century to World War II, emphasizing the important developments which the form underwent in the hands of notable novelists, including Charles Dickens, the Brontes, George Eliot, Henry James, Joseph Conrad, D.H. Lawrence and Virginia Woolf. Cross-listed with ENGL 4210. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 5220 - African-American Literature (3 Credits)
Surveys African-American literature with special emphasis on post-Civil War writing. Cross-listed with ENGL 4220, ETST 4220 and ETST 5220. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENGL 5230 - The American Novel (3 Credits)
Surveys major developments in the American novel from the 18th century to the 21st century. Cross-listed with ENGL 4230. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5235 - Faulkner (3 Credits)
Studies the works of Faulkner's high period with special attention to southern themes and Faulkner's experimentation with narrative form. Cross-listed with ENGL 4235. Prereq: Graduate standing. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5236 - The American Short Story (3 Credits)
Traces the development of the short story in the United States, from its beginnings in colonial tales to its contemporary renaissance as a dominant literary form. Cross-listed with ENGL 4236. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
ENGL 5240 - Topics In Contemporary American Literature (3 Credits)
Seminar focusing on a segment of contemporary American literature. Cross-listed with ENGL 4240. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA).
Typically Offered: Fall.

ENGL 5250 - Twentieth Century Fiction (3 Credits)
Deals with novels originating in a variety of countries in an effort to see the similarities and differences that varying nationalities bring to the genre. Cross-listed with ENGL 4250. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

ENGL 5280 - Proposal and Grant Writing (3 Credits)
Students learn how to find funding sources, write proposals, and manage grants for nonprofit, research, and industry contexts. Students practice the entire process of proposal and grant writing: 1) describing the problem in context; 2) identifying sponsors, building relationships, and finding a match; 3) designing, writing, revising, and completing all proposal components; 4) conceptualizing and using persuasive visual and design elements; 5) responding to sponsors and managing grant funds. Often, students work with academic, industry, and community partners on a grant writing project. Prereq: Graduate standing. Cross-listed with ENGL 4280. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

ENGL 5300 - History of British Drama (3 Credits)
Intended as a survey of British drama from the miracle plays of the medieval period, through the Renaissance and Restoration, to the “kitchen sink” realists of the 1960s. Cross-listed with ENGL 4300. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

ENGL 5306 - Survey of Feminist Thought (3 Credits)
Examines changes and continuities in feminist thought from the 18th century to the present, using historical and literary materials. Explores the ways that women's characteristics, experiences, and capabilities have been understood and challenged. Cross-listed with ENGL 4306, HIST 4306, 5306, WGST 4306, 5306. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

ENGL 5320 - History of Poetry in English (3 Credits)
Studies the major schools and eras of English prosody, including the poetry of Great Britain and the United States, from the medieval period to the present. Cross-listed with ENGL 4320. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5350 - History of American Drama (3 Credits)
Studies American drama from its foundations in the 18th century through movements including realism, expressionism, symbolism, agit-prop, black nationalism, feminism, and performance art. Drama read as both text and performance, as sometimes supporting the status quo and as sometimes subverting it. Cross-listed with ENGL 4350. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5400 - Old English I (3 Credits)
Instruction in the Old English language. Note: this course assumes that students have completed ENGL 2070 or one year of college level coursework in a foreign language. Prereq: Graduate standing. Cross-listed with ENGL 4400. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5410 - Old English II: Beowulf (3 Credits)
Continuing training in the reading of Old English and intensive reading of Beowulf. Note: this course assumes that students have completed ENGL 4400 or 5400. Prereq: Graduate standing. Cross-listed with ENGL 4410. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5420 - Film Theory and Criticism (3 Credits)
(1) Familiarizes students with some of the central concepts and debates in film theory and criticism, both classic and contemporary, (2) enables students to develop advanced analytic and interpretive skills, and (3) guides students toward discovering and articulating original critical and theoretical perspectives. Note: this course assumes that students have completed ENGL 2250, 3070, and 3080 or equivalent. Prereq: Graduate standing. Cross-listed with ENGL 4420. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5440 - Contemporary World Literature (3 Credits)
Surveys literature written by world writers since World War II. Note: Texts read in English. Cross-listed with ENGL 4460. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5500 - Medieval Literature (3 Credits)
Introduces representative writers from the Norman Conquest to about 1550. Emphasis on a variety of genres, including religious poetry, Arthurian romance, dream vision and drama. Cross-listed with ENGL 4500. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Spring.

Typically Offered: Fall.

Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Grading Basis: Letter Grade

Typically Offered: Spring.
ENGL 5510 - Whores and Saints: Medieval Women (3 Credits)
Studies how women are presented in texts, as well as works by women. Investigates the roles open to women and societal attitudes toward women, who were considered seductresses, saints, scholars and warriors in the middle ages. Note: this course assumes that students have completed at least 9 hours of literature coursework. Prereq: Graduate standing. Cross-listed with ENGL 4510, RLST 4730/5730, WGST 4510/5510. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
 Typically Offered: Spring.

ENGL 5520 - English Renaissance (3 Credits)
Introduces some of the important writers in this major period of English literature (1500-1660). Special attention to the works of Sidney, Milton, Spenser, Shakespeare, Donne, Herbert and Johnson. Cross-listed with ENGL 4520. Prereq: Graduate standing. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
 Typically Offered: Spring.

ENGL 5530 - Milton (3 Credits)
Extensive reading in John Milton's poetry (Lycidas, Paradise Lost, Paradise Regained, Samson Agonistes) as well as his political, social and theological writings. Cross-listed with ENGL 4530. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
 Typically Offered: Fall.

ENGL 5540 - Restoration and the 18th Century (3 Credits)
Introduces some of the important writers of the "Age of Reason." Emphasis on such figures as Bunyan, Burke, Dryden, Johnson, Pope and Swift. Cross-listed with ENGL 4540. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
 Typically Offered: Fall.

ENGL 5550 - English Romanticism (3 Credits)
Studies major works of the chief English writers of the first part of the 19th century, with emphasis on such representative figures as Wollstonecraft, Godwin, Blake, Wordsworth, Coleridge, Hazlitt, Byron, Keats and Shelley. Cross-listed with ENGL 4550. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
 Typically Offered: Spring.

ENGL 5560 - Modernism (3 Credits)
Modernist literature from the beginning of the 20th century through World War II, including such writers as Eliot, Joyce, Forster, Ford, Yeats, Woolf and Barnes. Examines the social-political influences as well as the aesthetic and stylistic elements which define modernist writing. Cross-listed with ENGL 4600. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
 Typically Offered: Fall.

ENGL 5600 - Modernism (3 Credits)
Examines the main currents of Victorian thought in prose and poetry from about 1830 to the end of the century, including such writers as Browning, Carlyle, Mill, Newman, Ruskin, Swinburne and Tennyson. Cross-listed with ENGL 4580. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
 Typically Offered: Fall.
ENGL 5730 - Chaucer (3 Credits)
Extensive reading in Chaucer’s works in Middle English, including his
lyrics, dream visions, Troilus and Criseyde, and the Canterbury Tales.
Examines sources, historical and ideological factors influencing the texts.
Prereq: Graduate standing. Cross-listed with ENGL 4730. Term offered:
spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENGL 5735 - Philosophy and Literature (3 Credits)
Considers the philosophical dimensions of literature. Cross-listed with
ENGL 4735, PHIL 5730, 4730. Prereq: Graduate standing. Max hours: 3
Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5745 - Humanistic Writing About Medicine and Biology (3 Credits)
Investigates medical and biological writing over the last two centuries
with an emphasis on reception, ethical issues, and the differences
between professional and popular writing. Prereq: Graduate standing.
Cross-listed with ENGL 4745. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5755 - Illness & Disability Narrative (3 Credits)
Narratives of mental, chronic or terminal illness, and disability have
become common over the past decades. There are a number of ways
in which these stories are told by those reflecting on their experiences:
individuals choosing to tell such stories must consider how their
stories will be received and what they are revealing about themselves
in dealing with their conditions. Many issues arise when looking at the
production and reception of these narratives, including acceptance
and assimilation, stigmatization, access and quality of treatment,
discrimination, accommodation, pity and stereotyping responses.
These narratives are consumed, usurped, and reacted to by clinicians,
communities and society at large with their own agendas, expectations,
fears and judgments of the stories and of the individuals telling their
stories. This course is about the issues and concerns of producing an
illness or disability narrative and the consumption/reception of those
narratives by health professionals, communities, and society at large.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Cross-listed with ENGL 4755. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 5770 - Topics in English: Film and Literature (3 Credits)
May look at specific genres, aesthetic approaches to literature,
ideological or socio-political agendas, or other special topics in literature
and/or film. Prereq: Graduate standing. Cross-listed with ENGL 4770.
Term offered: spring, fall. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade
Restrictable. Max Credits: 12.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ENGL 6120 - Special Topics in Film (3 Credits)
An intensive study of specialized topics in film. Note: May be repeated when topics vary. Prereq: Graduate standing. Repeatable. Max Hours: 30 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 30.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENGL 6840 - Independent Study (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Term offered: fall, spring. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

ENGL 6920 - Directed Readings (3 Credits)
Offers graduate student’s instruction on an individual basis. Serves as preparation for the MA (literature) comprehensive examination. Prereq: Graduate standing. Department consent required. Term offered: fall, spring. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

ENGL 6950 - Master’s Thesis (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Term offered: fall, spring. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring.

ENGL 6960 - Master’s Project (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Department consent required. Term offered: fall, spring. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Report as Full Time.
Typically Offered: Fall, Spring.

ENGL 6970 - Portfolio Exam (3 Credits)
In the portfolio exam, students prepare the culminating document of students’ MA work, a portfolio combining reflection on work done at CU Denver with a forward look at students’ career goals. Prereq: Graduate standing. Department consent required. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

Introduction

Program Director: Gillian Silverman
E-mail: gillian.silverman@ucdenver.edu

The English Studies graduate program provides a strong foundation in primary knowledge areas, including the major genres and the theory of genre, approaches to literacy, English language study, and the impact of technology on reading and writing. The program invites MA candidates to build on this foundation by developing an expertise in teaching, and by expanding their content knowledge with courses in rhetoric, literature, film, and applied linguistics.

Contact the graduate program director for more information on this program.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 30 ENGL credit hours.
2. Students must complete all courses at the graduate (5000 and above) level.
3. Students must earn a minimum grade of B- (2.7) in all courses that apply to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.
4. Students must complete a minimum of 21 ENGL credits with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. All courses are three credit hours unless otherwise noted.
2. All courses must be completed in the ENGL subject code.
3. Students must complete all required coursework satisfactorily.
4. Students must demonstrate a commitment to language diversity. Students must demonstrate satisfaction of this requirement to their program advisor, through one of the following ways:
   a. A language other than English is spoken in the home and competency is confirmed by the CU Denver department of Modern Languages or an equivalent body.
   b. Completion of two semesters (or the equivalent) at the college level of any second language, including Old English, American Sign Language, computer coding, translation.
   c. Completing ENGL 5601 Teaching English Language Learners: Theory and Practice, as an elective course.
5. Compliance with all graduate education policies and requirements is required.
6. Graduate students may only count six credit hours of Independent Study toward the English MA degree.
7. Candidate for Degree: Graduate students must be registered for at least one credit hour during the semester that they graduate. Those who have completed all required courses and requirements may register for CAND 5940 Candidate for Degree section 900.
8. Teaching Assistantships: Graduate students who receive a teaching assistantship must take ENGL 5913 Practicum in Language and Rhetoric in the fall during their first semester as a teaching assistant. ENGL 5913 Practicum in Language and Rhetoric may also be counted as an elective.

Office: 1061 9th St. Park, Room 102
Phone: 303-315-7848
E-mail: Rodney.Herring@ucdenver.edu

Overview
The English Department at the University of Colorado Denver offers a Graduate Certificate in Teaching College-level Language and Literacy. It fulfills the increasing needs of educators seeking to deepen and to broaden their specialization. It allows an English Master's Candidate to specialize in an area of study in addition to the primary area of degree focus. The certificate does not grant state licensure. It ensures competency for those who already are licensed, provides documentation in expertise for those teaching in community colleges, and enables specialization for those with master's degrees in related fields (i.e. Rhetoric, Composition, Literature, Film Studies, Humanities, Education).

This certificate can be completed fully online, fully on campus, or a combination of the two.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Teaching College-level Language and Literacy advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements
1. Students must complete a minimum of 18 ENGL credit hours
2. Students must complete all 18 ENGL credits at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all certificate courses taken at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate course requirements as P+/P/F or S/U.
4. All credits for the certificate must be completed with CU Denver faculty.

Program Restrictions, Allowances and Recommendations
1. All courses must be completed with ENGL subject code.
2. All candidates must possess a Bachelor’s of Arts in any field.

Teaching English Language Learners Graduate Certificate (CTELL)

Please click here to see English department information.

Program Advisor: Joanne Addison, Professor
Office: 1059 Ninth Street Park, Room 104
Telephone: 303-315-7000
E-mail: Joanne.Addison@ucdenver.edu

Program Description
To meet the increasing needs of individuals seeking advanced training in teaching English as a second language, the English department at CU Denver offers a graduate Certificate in Teaching English Language Learners (CTELL).

The certificate program, which can be completed through CU Online, is designed to build the necessary skills to teach adults English as a second language through focused preparation. It is primarily aimed at native speakers of English who want to teach overseas, but may serve the needs of international students wanting to teach English in their home country or other countries.

Upon successful completion of the program, CTELL participants will be able to:

- Discuss the theoretical basis of second language instruction
- Demonstrate a variety of effective ESL teaching techniques
- Explain, in pedagogically relevant ways, the linguistic structures of the English language

Additional Information
Length of Time
The course of study will typically last one academic year, including the summer session.

When You May Begin
You may begin in any semester. There is no fixed deadline for application for admission.

Prerequisites
All applicants must have a bachelor's degree or the equivalent, with a 3.0 GPA, to be accepted to the program. Graduate students at CU Denver will also be permitted to apply for the certificate while they are concurrently completing another graduate degree. Permission may not be granted to graduate students in the applied linguistics option of the Master of Arts in English program.

Non-native speakers of English are required to submit an official TOEFL (Test of English as a Foreign Language) report showing a score of at least 600. Those who score below 600 but above 500 on the TOEFL may be admitted conditionally to the program. Under these conditions, students will have their English language skills assessed by the faculty of the program immediately after they arrive on campus to determine whether further courses are needed to develop English language proficiency. After assessment, the students may be assigned to full-time language study in an intensive English program, permitted to take graduate-level classes on a conditional basis along with further designated language study or permitted to begin graduate study without further restrictions.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Teaching English Language Learners advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements
1. Students must complete a minimum of 12 ENGL credit hours
2. Students must complete all 12 ENGL credits at the graduate (5000 or above) level.
3. Students must earn a minimum grade of B- (2.7) in all courses that apply to the certificate and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate course requirements as P+/P/F or S/U.
4. All credits for the certificate must be completed with CU Denver faculty.

Program Restrictions, Allowances and Recommendations
1. All courses must be completed with ENGL subject code.
2. All candidates must possess a Bachelor's of Arts in any field.

Ethnic Studies

Chair: Rachel Harding
Business Operation Coordinator: Alexandria Joo
Office: Plaza Building, Ste. 102
Telephone: 303-315-7205
Fax: 303-315-7206

Overview
Ethnic Studies programs are designed to help students majoring in the liberal arts and sciences develop a sophisticated and broad understanding of ethnicity and its role in contemporary American society. They provide students with the theories and concepts needed to comprehend and interpret relations between and among ethnic groups in the United States. Students are better prepared to live and work in a diverse society when educational institutions foster a positive learning environment in which differences contained within various U.S. communities can be studied not as a social problem, as is often the case, but for their history of struggles and contributions.

The interdisciplinary nature of the ethnic studies program curriculum provides students the opportunity, through academic investigation, to develop a greater understanding of the cultural diversity of the present-day United States and to acquire skills needed in professional and social service fields. This multidisciplinary, comparative approach to contemporary and historical research methodologies provides the basis for students to analyze the diverse social, economic, political and cultural facets of ethnic groups in the United States. Special emphasis is given to new perspectives that recover the history, creative expression of underrepresented groups.

Programs and courses reflect prevailing thought in ethnic studies, draw parallels between various groups in the United States and link the studies of their country of origin with current and historical research on race and ethnic relations in the United States. They reflect critical analysis of the dominant perspectives through which ethnic groups have been described and perceived. Also investigated are the intersections of ethnicity with social and cultural power, all of which are emphasized through the study of materials and works by and about previously excluded groups. The cultural processes through which ethnic groups have sustained or altered their cultural identities are emphasized, as well as the pressures faced by members of various ethnic groups to maintain traditional values and conform to mainstream U.S. society.

Ethnic Studies Graduate Certificate

Admission Requirements
• Degree: BA/BS
• A minimum GPA of 3.00 is recommended

Application Process
Applicants for a Graduate Certificate Program will send the following documents to the Certificate Program Director:
• Graduate Certificate Application Form:
• Official Transcripts
• Resume
• Letter of interest

Upon approval of the student’s admission by the Graduate Certificate Program, the program director will send the student’s certificate admission file to Graduate student admissions. Graduate admissions will confirm the applicant’s credentials, will determine whether the student meets the general academic requirements, will admit the student and inform the student of his/her admission to the Graduate Certificate Program.

Programs
• Ethnic Studies Graduate Certificate (p. 378)

Faculty
Associate Professors:
Faye Caronan, PhD, University of California, San Diego
Rachel E. Harding, PhD, University of Colorado, Boulder

Associate Professor Clinical Teaching Track
Elizabeth Garcia, PhD, University of California Berkeley
Katherine Mohrman, PhD, University of Minnesota Twin Cities

Assistant Professor
Chad Shomura, PhD, Johns Hopkins University

Senior Instructors:
Dennis Green, ABD, University of New Mexico

Emeritus Professors:
Paula Espinoza, PhD, University of Colorado Boulder
Donna Martinez, PhD, University of Washington

Ethnic Studies (ETST) Courses

ETST 5000 - Research Methods in Ethnic Studies (3 Credits)
Emphasizes the acquisition of a variety of data or information collection and analytic skills, especially those applicable to historical and social inquiry in ethnic studies. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ETST 4000. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ETST 5020 - Race, Culture and Immigration (3 Credits)
In this course, we will consider the social and legal construction of race and immigration. We will also explore how immigrants have been racialized both historically and in the current moment. In addition, we will consider the role of culture in shaping the immigrant experience and immigrant outcomes. Restriction: Graduate standing or instructor permission. Cross-listed with SOCY 4020, ETST 4020 and SOCY 5020. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ETST 5021 - Black and Latino Children in Families and Schools (3 Credits)
With a focus on application of scholarship to practice, this interdisciplinary course will introduce graduate students to scholarly literature from family sciences, sociology, education and related fields to understand Black and Latino children within family, school and community systems. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HDFR 5020. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ETST 5030 - Race, Religion and Belonging in the United States (3 Credits)
Race/ethnicity and religion are conconstitutive social and cultural formations that have played a fundamental part in determining the boundaries of belonging of the United States. In this course, students will interrogate when, why and how race/ethnicity and religion have been used to delineate borders, determine citizenship, navigate legal classifications, dictate social mobility, and regulate economic possibilities. We will analyze both primary sources such as sermons, reality TV shows, court cases and graphic images as well as scholarly writing to explore how formations of race and religion have shaped notions of belonging in the US nation/state, thereby constructing the boundaries of the state itself. Restriction: Graduate standing or instructor permission required to register. Cross-listed with ETST 4030, RLST 4030, RLST 5030, HIST 4209 and HIST 5029. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
ETST 5165 - Cultural Diversity Awareness in the Workplace (3 Credits)
This course will analyze the impact and effectiveness of cultural diversity awareness in a variety of workplace settings including educational institutions, businesses, health care organizations, and non-profit organizations. Students will learn how implicit biases and structural inequality impact workplace culture, a work place's productivity, and a work place's ability to fulfill their mission. By the end of the course, students will acquire the skills to advocate for and implement inclusive workplace policies. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ETST 4165. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ETST 5220 - African-American Literature (3 Credits)
Surveys African-American literature with special emphasis on post-Civil War writing. Cross-listed with ETST 4220, ENGL 4220, and ENGL 5220. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall.
ETST 5297 - Theorizing the Transpacific (3 Credits)
What is the transpacific? Though this term is most associated with global trade and economic interests, this course will examine the migratory and cultural precedents for this term. What do other perspectives from Oceania and from pacific rim countries offer us to theorize the meaning of the transpacific(s). How might a social and cultural understanding of the transpacific engage with the political and economic understandings of the transpacific undergirded by trade relations? Note: Recommended that ETST 3297 Social History of Asian Americans be completed first. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ETST 4297. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
ETST 5305 - Women of Color Feminisms (3 Credits)
This course is an overview of women of color feminist theorizing (thinking) and praxis (practice) in the U.S. We will explore these feminisms through the written word, art, and organizing efforts of women and trans, femme, and non-binary people of color with a focus on key themes and concepts including identity, difference, oppression, intersectionality, representation, violence, resistance, empowerment, solidarity, and coalition. Texts for the course highlight key issues in the feminist theorizing and praxis of Black, Latina/x, Chicana/x, Asian (American), Pacific Islander, Indigenous, and Arab (American) women and trans, femme, and non-binary people of color, especially the politics of identity and representation; structural oppressions and violence; and practices of survival, resistance, and activism. Not only will we examine how these feminists have critiqued oppression(s) based on race, class, gender, sexuality, nationality, and religion, (as well as how these systems of domination intersect), but what kinds of approaches, strategies, and changes these thinkers and activists have organized for and promoted. Cross-listed with ETST 4305, WGST 4305 and WGST 5305. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
ETST 5457 - American Political Thought (3 Credits)
Critical examination of American political life at the intersections of social categories such as race, class, gender, sexuality, disability, and Indigeneity. Exploration of key and marginal thinkers through a variety of texts and genres. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ETST 4457, PSCI 4457, and PSCI 5457. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ETST 5574 - Topics in Ethnic Studies (3 Credits)
Topics vary from term to term, based upon interest and availability of instructors in specialized areas. Restricted to Graduate and Graduate Non-Degree Majors. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.
ETST 5722 - Communicating Latinx Cultures (3 Credits)
Communicating Latina/o/x Cultures centers historical and contemporary vernacular and institutional discourse and narratives about, by, and for Latina/o/x people and communities. Drawing on theories, methods, and practices to understand the complexities of Latina/o/x cultures and lives, we will investigate how different actors and activists express and experience borders, migration, dispossession, citizenship, colonialism/coloniality, colorism, white supremacy, environmental racism (including anti-Blackness), mono- and multilingualism, self-determination struggles, power, representation, resistance, and mutual support networks for alternative worldmaking. To situate these concepts and concerns, we will explore contexts and places ranging from Colorado to the Caribbean. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Term Typically Offered: Spring. Cross-listed with COMM 4722, COMM 5722, and ETST 4722. Max hours: 3 credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ETST 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

ETST 5939 - Graduate Internship in Ethnic Studies (1-6 Credits)
Designed experiences involving application of specific, relevant concepts and skills in supervised employment situations. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Note: Students must have graduate standing and must work with Experiential Learning Center advising to complete a course contract and gain approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

ETST 5960 - Capstone in Ethnic Studies (3 Credits)
Provides a broad overview of social research methods pertinent to the study of race, ethnicity, gender, and culture. Explores theories concerning “ethnicity and race” as both social construct and constituent feature of people’s identities and lived experiences. Ethnic Studies is an interdisciplinary major where students make connections across diverse fields of inquiry; this course provides a structure for integrating an interdisciplinary examination of the intellectual, cultural, and social dimensions of racial and ethnic groups. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ETST 4960. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ETST 6950 - Independent Study, Ethnic Studies (1-18 Credits)
Independent study in ethnic studies. Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Max hours: 18 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 18.
Additional Information: Colorado State University.
Ethnic Studies Graduate Certificate

Introduction

Please click here (p. 375) to see Ethnic Studies department information.

Ethnic Studies is the interdisciplinary study of race and ethnicity in local, national, and global contexts. Recent events have shown a spotlight on systemic racial and ethnic inequities in the United States. As a result, businesses are adopting diversity, equity, and inclusion initiatives, environmental researchers are examining how climate change disproportionately impacts Black, Indigenous, and people of color, educators are concerned with how to address racial inequities in schools, doctors and other health care workers wonder how to best reach and treat BIPOC communities, and so on. An interdisciplinary graduate certificate in Ethnic Studies trains both academic researchers and professionals who can apply Ethnic Studies concepts in their fields, is invaluable to any number of students who want to apply a racial and social justice lens to their intended future profession. The Ethnic Studies graduate certificate offers two paths for students: an academic path and an applied path. The academic track prepares students to pursue a PhD in Ethnic Studies or to apply an ethnic studies analysis in a traditional academic discipline. This track is for students interested in a career in the academy. The applied track prepares students to identify and address racial and ethnic inequities in their chosen professional field and is designed for students interested in a wide variety of careers, including primary and secondary education teaching, higher education administration, community organizing, community and government service, journalism and the media, environmental science, global economics, health care, legal services, library science, music, and publishing.

Upon earning the certificate, students will be able to:

- Understand how Ethnic Studies historically challenged traditional disciplinary knowledge production.
- Identify and analyze racial and ethnic inequities in popular culture, society, communities, and organizations.
- Integrate diverse methodologies to design interdisciplinary research projects focusing on race and ethnicity.
- Develop resources for building/strengthening healthy, multiracial institutions and communities.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Ethnic Studies advisor to confirm the best plans of study before finalizing them.

Additional information about the Ethnic Studies Graduate certificate may be obtained from the Ethnic Studies Office Plaza Building, Suite 102.

Phone: 303.315.7205 https://clas.ucdenver.edu/ethnicstudies

Faculty Advisor: Professor Faye (https://clas.ucdenver.edu/ethnic-studies/faye-caronan/) Caronan email: Faye.Caronan@ucdenver.edu (Faye.Caronan@ucdenver.edu)

Program Delivery

- This is an on campus program with some courses available online.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 12 credit hours.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B (3.0) in all certificate courses completed at CU Denver and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Students cannot complete certificate or ancillary course requirements as P+/P/ F or S/U.
4. All credit hours for the certificate must be earned at the University of Colorado Denver.

Program Restrictions, Allowances and Recommendations

1. No course may be taken more than twice.
2. Courses cannot double count for the MH/MSS track in Ethnic Studies and the Ethnic Studies graduate certificate.
3. Students may be enrolled as a CU Denver graduate student in any discipline, or as a CU Denver non-degree seeking graduate student with a bachelor’s degree.
4. International students must submit TOEFL scores or otherwise satisfy the University’s English Language Proficiency requirement.

1 Students may complete ETST 5000 Research Methods in Ethnic Studies and ETST 5165 Cultural Diversity Awareness in the Workplace for this certificate. One will apply as a required course and the other will apply as an elective.

To learn more about the Student Learning Outcomes for this program, please visit our E [https://clas.ucdenver.edu/ethnic-studies/certificates/#ethnic_studies_graduate_certificate-172](https://clas.ucdenver.edu/ethnic-studies/certificates/#ethnic_studies_graduate_certificate-172) Ethnic Studies Learning Outcomes page [https://clas.ucdenver.edu/ethnic-studies/sites/default/files/attached-files/etstlearning_outcomes.pdf](https://clas.ucdenver.edu/ethnic-studies/sites/default/files/attached-files/etstlearning_outcomes.pdf).
Overview

In the United States and around the world, balancing the preservation of the natural environment with concerns for social equality and well-being has led to a growing demand for broadly trained individuals who can identify and understand pressing social and environmental issues, collect and analyze relevant data, and develop and implement innovative solutions.

Geographers explore factors affecting the distribution of people and their activities on the surface of the earth with the goal of providing meaningful solutions to problems faced by society. Geography’s broad and holistic approach is ideally suited for liberal arts majors interested in exploring a concepts and techniques on environmental and sustainability issues, socioeconomic problems and planning policies. Environmental Sciences constitute a multidisciplinary study of the environment that integrate work from chemistry, biology and ecology, physics, geology, geography, anthropology, engineering, political science, law, economics, and the health sciences. Students in all programs are introduced to coursework in the geospatial sciences, a set of techniques that enables scholars and policymakers to use maps and geographic information systems (GIS) to explore and analyze a huge range of topics.

Careers in geography and the environmental sciences encompass a broad range of professions, from those with a strong foundation in the natural/physical sciences or engineering to those based in the social sciences and/or humanities. The Department of Geography and Environmental Sciences offers a broad range of programs designed for students at multiple stages of their career, including a BA in Geography, an MS in Environmental Science, and an MA in Applied Geography and Geospatial Sciences. In collaboration with the College of Architecture and Planning (CAP), we also support a PhD in Geography, Planning and Design. Students interested in exploring one of the subfields can pursue minors in Geography, Environmental Sciences, or Urban and Regional Planning. We also offer certificates in Geographic Information Systems (GIS), FOSS4G (open-source GIS), Environmental Science Education, and Sustainable Urban Agriculture.

Requirements for Admission to the Environmental Sciences, MS

The program is for students who either have baccalaureate degrees or have a significant background in one of the natural/physical sciences or engineering. In addition, minimum undergraduate science and math requirements are:

- one semester of upper-division statistics
- either two semesters of general chemistry with lab or two semesters of general biology with lab or one semester of each
- one semester of physics

If an applicant is missing one prerequisite, they can be admitted but must take an approved course as an elective before the start of their second year in the MS in Environmental Sciences degree. If two prerequisite courses are lacking, students may similarly be admitted, but must take both courses in the first year in the program. Applicants who have fulfilled all prerequisites have a better chance of acceptance. Applicants may be required to take additional prerequisite courses (necessary for completing particular core or elective courses). The prerequisite courses will not count toward the MS in environmental sciences degree.

Application Process

We accept applications once per year, on February 1st, for admission in the following fall.

As part of the admission review process, applicants are required to submit:

- an online graduate application
- a minimum of three letters of recommendation (letters from both professional and academic sources are accepted, though academic letters are preferred).
- official transcripts from all institutions previously attended
- the GRE is not required. However, applicants will less than a 3.0 GPA are welcome to submit GRE scores as further evidence of their qualifications

CU Denver has a minimum requirement of a 3.0 undergraduate GPA for applicants to graduate programs. Admissions for students with a GPA below 3.0 may be possible under special circumstances. The program admits new students for the fall semester only, and the number of students admitted to the program depends, in part, on space availability. Applicants must submit all materials by the February 1st deadline.

Requirements for Admission to the Applied Geography & Geospatial Science, MA

Applicants must hold a Bachelor’s degree from an accredited institution.

The University of Colorado Denver has a minimum requirement of 3.0 undergraduate grade point average (GPA) for applicants to graduate programs. The number of applicants admitted to the MA in Applied Geography & Geospatial Science in any year depends, in part, on space availability. The program is competitive, and we generally discourage applicants whose undergraduate GPA is below 3.0. Notification of acceptance or refusal for admission into the program is mailed to the applicant approximately six weeks after the deadline for submission of applications.

Application Process

We accept applications once per year, before or on February 1st, for admission in fall of the same year.

As part of the admission review process, applicants are required to submit:

- a graduate application
- statement of purpose that articulates the goals of pursuing a graduate degree in this program
• a minimum of three letters of recommendation (letters from both professional and academic sources are accepted, though academic letters are preferred).
• official transcripts from all institutions previously attended
• the GRE is not required. However, applicants with less than a 3.0 GPA are welcome to submit GRE scores as further evidence of their qualifications

Programs
• Applied Geography & Geospatial Science, MA (p. 391)
• Environmental Sciences, MS (p. 394)
• Environmental Science Education Graduate Certificate (p. 398)
• Free and Open Source Software for Geospatial Applications Graduate Certificate (p. 400)
• Geographic Information Science Graduate Certificate (p. 402)
• Sustainable Urban Agriculture Graduate Certificate (p. 404)

Tim Connors
Alicia Cowart
Hope Dalton
Richard DeGrandchamp

Geography (GEOG)
GEOG 5022 - Federal Data for Health Research & Policy (1-3 Credits)
Students will develop the knowledge and skills required to effectively use a variety of federal and statistical data sets for health research and policy analysis. Each week is devoted to one or two federal statistical datasets—data collection methods; why they are collected and what health issues they are designed to address; what population they represent and at what geographic scale. Most critically, students will be able to distinguish between questions that can be addressed with a public version of the data and questions that require restricted versions of the data that are protected by federal law and guidelines. Students will read, discuss and present research from various perspectives (Demography, Economics, Geography, Public Health, Sociology) using these data sources and apply their knowledge of data analysis from a variety of perspectives. Students will learn how to gain access to restricted data, how to protect individual anonymity with best practice disclosure avoidance techniques and will develop a research proposal for confidential research access. Note: Familiarity with SAS (preferable) or other statistical software such as SPSS or Statas and statistics or data analysis is recommended. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ECON 6022, HBSC 6022, and SOCY 5022. Max hours: 3 Credits.
Grading Basis: Letter Grade

GEOG 5022 - Applied Spatial Statistics (3 Credits)
Practice and application of spatial analytical and statistical methods using modern GIS and spatial statistical software. Topics include spatial data handling, interpolation, pattern analysis, cluster detection, visualization, and modeling. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Note: an introductory course in statistics is strongly recommended for success in this course. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade

GEOG 5050 - Remote Sensing I: Introduction to Environmental Remote Sensing (3 Credits)
An in-depth treatment of the use of aerial photographs and other forms of imagery for the analysis of urban-industrial patterns, vegetation, agriculture, landforms, and geologic structure. Cross-listed with GEOG 4060. Completion of GEOG 2080 with a C or better is recommended for optimal student success. Prereq: Graduate standing. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.
GEOG 5070 - Remote Sensing II: Advanced Remote Sensing (3 Credits)
Focuses on digital image processing of satellite and aerial images. Students explore the nature of digital image data, gain an understanding of image analysis using PCs, and learn about the use of analysis products in the development of GIS databases. Prereq: Graduate standing and GEOG 4060/5060 with a B- or better or permission of instructor. Cross-listed with GEOG 4070. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4060/5060 with a B- or better.
Typically Offered: Spring.

GEOG 5080 - Introduction to GIS (3 Credits)
Introduces Geographic Information Systems (GIS), including justification, hardware/software, database design, and data conversion. GIS is a computer-based mapping system providing a graphical interface to locational and relational attribute data. Includes hands-on use of a GIS workstation. Cross-listed with GEOG 4080. Prereq: Graduate standing. Term offered: fall, spring, summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring, Summer.

GEOG 5081 - Cartography (3 Credits)
Provides an introduction to the art and science of cartography (map making). Students will learn about design principles, tools and techniques of map production, culminating in the creation of a high-quality map through hands-on exercises. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of C or better. Note: Completion of GEOG 2080 with a C or better is recommended for optimal student success. Cross-listed with GEOG 4081. Term offered: fall, spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of C or better.
Typically Offered: Fall, Spring.

GEOG 5085 - GIS Applications for the Urban Environment (3 Credits)
Takes a more detailed look at basic concepts presented in the introductory GIS course, concentrating on how GIS is used to solve real-world geographic problems. Various GIS applications within both the natural and social sciences are highlighted. The selection of specific topics is flexible, based on the interests of enrolled students. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Cross-listed with GEOG 4085. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better.
Typically Offered: Fall, Spring.

GEOG 5086 - FOSS4G Systems Integration (3 Credits)
Focuses on the integration of different FOSS4G (Free and Open Source Software for Geospatial Applications) software and technologies to create geospatial information systems that access data from different sources, storage structures, and formats to provide information to support decision making processes. Prereq: Graduate (including non-degree graduate) standing and GEOG 4091 or 5091, and GEOG 4092 or 5092 with a B- or higher. Cross-listed with GEOG 4086. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate (including non-degree graduate) standing and GEOG 4091 or 5091, and GEOG 4092 or 5092 with a B- or higher.

GEOG 5090 - Environmental Modeling with Geographic Information Systems (3 Credits)
Applies raster spatial analysis and modeling to study processes and spatial relationships to support decisionmaking in natural and built environments. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Cross-listed with GEOG 4090. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better.
Typically Offered: Fall.

GEOG 5091 - Open Source Software for Geospatial Applications (3 Credits)
Students will master the individual use and integration of a stack of the most powerful Free and Open Source Software for Geospatial Applications (FOSS4G) to analyze spatial problems and create Spatial Data Infrastructures in different technological, socio-economic and organizational settings. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Cross-listed with GEOG 4091. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better.
Typically Offered: Fall.

GEOG 5092 - GIS Programming and Automation (3 Credits)
Students will learn the most commonly used programming language to automate GIS geoprocessing tasks and workflows in the latest versions of the most popular GIS systems. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Cross-listed with GEOG 4092. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better.
Typically Offered: Fall.

GEOG 5095 - Deploying GIS Functionality on the Web (3 Credits)
Covers the core principles and technologies that allow the deployment of geographic information system (GIS) functionality over the World Wide Web. Hands-on exercises make use of the latest commercial software as well as open source technologies. Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better. Cross-listed with GEOG 4095. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Graduate standing and GEOG 4080 or GEOG 5080 or CVEN 5381 with a grade of B- or better.
Typically Offered: Spring.

GEOG 5150 - Place, Landscape, and Meaning (3 Credits)
Investigates the concepts of place, landscape, and their meanings. Incorporates theoretical and experiential perspectives to understand how socio-spatial interactions construct diverse identities and their implications for equity. Note: this course assumes that students have completed an introductory human geography course. Prereq: Graduate standing. Cross-listed with GEOG 4150. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
GEOG 5220 - Environmental Impact Assessment (3 Credits)
The objective of this course is to provide the foundation for understanding the environmental impact assessment process, its legal context, and the criteria and methods for procedural and substantive compliance. Cross-listed with GEOG 4220, URPL 6549. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Restrictively Offered: Fall.

GEOG 5230 - Hazard Mitigation and Vulnerability Assessment (3 Credits)
Examines hazard mitigation and its planning and policy implications, emphasizing how vulnerability assessments play an integral role.
Students explore how mitigation minimizes the impacts from hazards and use GIS to conduct a local study. Note: this course assumes that students have completed GEOG 2202 or equivalent. Prereq: Graduate standing. Cross-listed with GEOG 4230. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5235 - GIS Applications in the Health Sciences (3 Credits)
Examines how GIS is used throughout the health care industry and public health. Covers environmental health, disease surveillance, and health services research. Students critically review current literature and gain hands-on experience with GIS software. Note: this course assumes that students have completed GEOG 4080 or GEOG 5080 and/or have a background in public health. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with GEOG 4235, HBSC 7235. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Restrictively Offered: Fall.

GEOG 5240 - Applied Geomorphology (3 Credits)
Uses hands-on tasks and field trips to investigate processes behind Earth's changing landforms in a variety of physical landscapes (aeolian, volcanic, coastal, fluvial, karst, glacial and periglacial) as related to rock decay, soils and climatic forcings. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072 and GEOG 3232. Prereq: Graduate standing. Cross-listed with GEOL 4240, 5240 and GEOG 4240. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5250 - Fluvial Geomorphology (3 Credits)
Examines interactions between Earth's surface and flowing water across spatial and temporal scales. Considers structure and function of the major components of fluvial systems, with particular attention to the variety of fluvial systems to hydrologic, geologic and anthropogenic controls. Cross-listed with GEOG 4251, GEOL 4251 and GEOL 5251. Restriction: Restricted to Graduate and Graduate Non-Degree students. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOG 5255 - Sustainability in Resources Management (3 Credits)
Sustainability and sustainable development are the dominant economic, environmental and social issues of the 21st century. Follows a multidisciplinary approach to these concepts. Case studies demonstrate their implementation in different geographical, ecological and socio-economic conditions worldwide. Note: this course assumes that students have completed ENVS 1042 or equivalent. Prereq: Graduate standing. Cross-listed with GEOG 4255. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

GEOG 5260 - Children's Geographies (3 Credits)
This seminar is an investigation of children, childhood, and environment from geographical perspectives. Theoretical and methodological lenses are used to understand young people's interactions with/in different spaces. Cross-listed with ENVS 5300. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Restrictively Offered: Spring.

GEOG 5335 - Contemporary Environmental Issues (3 Credits)
Provides an in-depth view of the processes and systems found in glacial environments. Topics include: evidence of past glaciation; present-day glacial extent; glacier dynamics; glacial erosional processes and landforms; glacial depositional processes and landforms. Note: this course assumes that students have completed GEOG 1202 or GEOL 1072 or equivalent. Prereq: Graduate standing. Cross-listed with GEOG 4335. GEOG 4270, GEOL 4270 and GEOL 5270. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5350 - Environment and Society in the American Past (3 Credits)
Overview of the geographical development of North American society from the late 15th century to the mid-20th century. A comparative regional approach emphasizing relationships between natural resource exploitation, cultural landscape formation and environmental change. Cross-listed with GEOG 4350. Prereq: Graduate standing. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
GEOG 5380 - Anthropocene Futures (3 Credits)
We are living in the “Anthropocene”—an era of rapid environmental and societal changes, and of decline and loss resulting from accelerating human interactions with Earth systems. Warming climates, wildfires, floods, water and food insecurity, novel ecosystems, and even pandemics such as COVID-19, are phenomena of the Anthropocene. With a still growing human population and a finite planet, understanding and overcoming such challenges is more pressing than ever, if people are to co-evolve with Earth toward a sustainable future. This interdisciplinary seminar course tells the scientific story of humanity’s intensifying interactions with the planet and explores possible future paths. Through presentations, readings and discussion, students will examine topics that include the origin and significance of Anthropocene in Earth’s evolutionary history, the debates and evidences for a new geologic epoch, large-scale trajectories of environmental change, a safe operating space, and planting seeds for a “good” Anthropocene. In doing so, students will acquire skills and experiences in critical thinking and analytical reasoning to grapple with many uncertainties and tensions of the Anthropocene.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors.
Cross-listed with GEOG 4380, ENV 4380, and ENV 5380. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5420 - The Politics of Nature (3 Credits)
*Examines how economic systems, scientific discovery, institutional policies, and environmental knowledge converge to shape the environment and mediate the way societies understand, manage and respond to environmental changes in both the United States and the developing world. Cross-listed with GEOG 4420. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.*
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 5440 - Science, Policy and the Environment (3 Credits)
Examines the social, economic and political forces shaping scientific discovery and the development and enforcement of environmental policy. Students will examine perspectives on issues such as risk, expertise, uncertainty and objectivity that influence the problem-defining, standard-setting and policy-making process. Cross-listed with GEOG 4440. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5680 - Urban Sustainability: Perspectives and Practice (3 Credits)
Examines various perspectives on sustainability, including ambiguities and opportunities of sustainability as a conceptual framework. Class also examines what sustainability looks like in practice, using numerous topics such as poverty and urban farming to water and climate change. Cross-listed with GEOG 4680. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5710 - Disasters, Climate Change, and Health (3 Credits)
Provides a review of the impacts of disasters and climate change on human health, using a broad framework of preparedness, mitigation, response, recovery, and adaptation. Note: this course assumes that students have completed GEOG 2202 or GEOG 3501. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 5720 - Climate Change: Causes, Impacts and Solutions (3 Credits)
Examines science behind past, present & future climate change & environmental, social & political implications & solutions. Explores recent scientific research, syntheses & mainstream literature advancing knowledge about causes & consequences of natural & anthropogenic climate change. Cross-listed with GEOG 4720/ ENV 4720/ ENV 5720. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 5740 - Soil Science and Geography (3 Credits)
Reviews chemical and physical properties of soils, soil development, and geographic distributions of soil types in the context of the role that soils play in natural and human-altered ecosystems. Prereq: graduate standing or permission of instructor. Cross-listed with GEOG 4740, ENV 4740, ENV 5740. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

GEOG 5750 - Beeography: Geography of Bees (4 Credits)
Beeography is an introduction to the bee world and the amazing diversity in Colorado and beyond. The course will examine the distribution of bees and the pressures they face in different environmental and cultural contexts. It will examine different methods to support and increase bee populations and pollination services, especially in populated environments, including backyard beekeeping of honeybee and native bee populations. Field and lab activities will include beekeeping, native bee collection and identification, bee dissections, pollen processing and identification, and trips to area bee museum collections and apiaries.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors.
Cross-listed with GEOG 4750, ENV 4750, and ENV 5750. Term offered: spring. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
GEOG 5757 - Urban Climate and Air Quality (3 Credits)
Explores how people alter climates on micro- to regional scales, and how this in turn affects human health and society. Focusses on recent scientific research, physical processes within cities, and the role of urbanization in global climate change. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ENVS 5757. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
GEOG 5840 - Independent Study (1-3 Credits)
Section 1, economic; 2, physical; 3, urban; 4, social; 5, quantitative; 6, transportation. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
GEOG 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Department consent required. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
GEOG 5990 - Special Topics In Geography (1-6 Credits)
Course content varies from semester to semester, depending on faculty member teaching the course. Prereq: Graduate standing. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 5995 - Global Study Topics (3-9 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with ENVS 4995, ENV 5995, and GEOG 4995. Max hours: 12 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 12.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Global Education Study Abroad.
GEOG 6300 - Foundations Seminar in Human-Environmental Interaction (3 Credits)
This seminar allows students to gain a deeper appreciation for historical and contemporary geographical approaches to understanding the relationship between society and the environment through a survey review of seminal concepts, theories and debates that have shaped the discipline. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
GEOG 6700 - Integrated Methods (3 Credits)
Geographers employ a variety of quantitative and qualitative methods in their research. The course presents these methods as a continuum, rather than separate typologies, and reviews the difference between integrated and mixed methods. Students will evaluate how and when to apply various methods to most appropriately elicit data. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 6750 - Research Design (3 Credits)
Reviews research framework common to all geographers. Reviews the key steps in designing and executing high-caliber independent research, including topic selection, literature review and data collection analysis. Students will develop competence in applying relevant theories from the natural and social sciences through projects. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
GEOG 6800 - Community-Based Research Practicum (4 Credits)
For students to apply the concepts and skills presented throughout the masters program in a community setting. Students will participate in a real-world, studio-based project that meets the needs of a government, non-governmental, or private sector organization and will produce a scoped product. Prereq: GEOG 6300 with a B- or higher. Cross-listed with ENVS 6800. Term offered: spring. Max hours: 4 Credits.
Grading Basis: Letter Grade
Prereq: GEOG 6300 with a B- or higher.
Typically Offered: Spring.
GEOG 6840 - Independent Study: GEOG (1-3 Credits)
Independent research for graduate major students. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Permission of department. Max hours: 3 Credits.
Grading Basis: Letter Grade
GEOG 6950 - Master's Thesis (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Report as Full Time.
GEOG 8990 - Doctor’s Thesis (1-8 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 8 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Report as Full Time.

Environmental Science (ENVS)
ENVS 5010 - Landscape Biogeochemistry (3 Credits)
A holistic approach to studying the role chemical elements play in synthesis/decomposition cycles, and the resultant environment from interaction of the lithosphere with the hydrosphere, atmosphere, biosphere, and pedosphere during geological, and ecological timeframes, together with anthropogenic activities. Note: this course assumes that students have completed an introductory college-level physical geography or environmental science course. Prereq: Graduate standing. Cross-listed with GEOG 4010/GEOL 4010. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENVS 5020 - Earth Environments and Human Impacts (3 Credits)
This course examines the multitude of impacts that humans have exerted on Earth’s biomes and physical environment in a systems context, including vegetation, animals, soils, water, landforms and the atmosphere. It considers the ways in which climate changes and modifications in land cover have altered the environment, and how such changes will still accelerate in the coming decades. The course also explores emergent topics such as rewilding, novel and no analogue ecosystems, and ecosystem services. Additionally, it assesses the future impact of a growing human population on the planet within a context of the "anthropocene,” an era dominated by human activity. Prereq: Graduate standing. Cross-listed with GEOG 4020, GEOL 4020. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

ENVS 5280 - Environmental Hydrology (4 Credits)
Examination of hydrologic processes in relation to climate, soils, vegetation, land-use practices, and human interactions. Natural scientific perspectives emphasized; field and laboratory included. Note: this course assumes that students have completed GEOG 1202 and one of: 1) GEOG 3232; 2) GEOG 4240/GEOL 4240/GEOG 5240; 3) GEOG 4010/GEOL 4010/ENVS 5000. Prereq: Graduate standing. Term offered: spring. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENVS 5300 - Children’s Geographies (3 Credits)
This seminar is an investigation of children, childhood, and environment from geographical perspectives. Theoretical and methodological lenses are used to understand young people’s interactions with different spaces. Cross-listed with GEOG 5300. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENVS 5305 - Water Quality and Resources (3 Credits)
Introduces water resources aimed at students with little or no background in the field. This is a broad course covering topics ranging from the physical aspects of water to water politics and international law. While the course is largely a lecture format, discussion of current issues is a significant part of the class. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with GEOG 4305. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

ENVS 5340 - Equity & Culture in Science Education: Local/Global (3 Credits)
This course examines literature in science education related to issues of culture and equity. Topics will be framed by an understanding of equity in diverse classrooms and how it informs research, curriculum and instruction. Cross-listed with SCED 5340 and SCED 4340. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5380 - Anthropocene Futures (3 Credits)
We are living in the “Anthropocene”—an era of rapid environmental and societal changes, and of decline and loss resulting from accelerating human interactions with Earth systems. Warming climates, wildfires, floods, water and food insecurity, novel ecosystems, and even pandemics such as COVID-19, are phenomena of the Anthropocene. With a still growing human population and a finite planet, understanding and overcoming such challenges is more pressing than ever, if people are to co-evolve with Earth toward a sustainable future. This interdisciplinary seminar course tells the scientific story of humanity’s intensifying interactions with the planet and explores possible future paths. Through presentations, readings and discussion, students will examine topics that include the origin and significance of Anthropocene in Earth’s evolutionary history, the debates and evidences for a new geologic epoch, large-scale trajectories of environmental change, a safe operating space, and planting seeds for a “good” Anthropocene. In doing so, students will acquire skills and experiences in critical thinking and analytical reasoning to grapple with many uncertainties and tensions of the Anthropocene.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors.
Cross-listed with GEOG 4380, GEOG 5380, and ENVS 4380. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.
ENVS 5403 - Unsaturated Zone Hydrology (3 Credits)
Focuses on water and contaminant transport through the unsaturated zone, infiltration and drainage, and heat and gas transport. Students learn to design, perform field installation, and collect data in order to model and predict contaminant movement on/off site. Note: this course assumes that students have prior coursework in chemistry, physics, or calculus. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5410 - Aquatic Chemistry (3 Credits)
Course objectives are to: (1) identify and understand chemical and physical principles and processes that control the composition of natural water, (2) prepare students to critically evaluate scientific literature and experimental design related to water quality and environmental remediation, and (3) examine the validity of environmental water data. Note: this course assumes that students have completed general chemistry and/or CHEM 4700. Prereq: Graduate standing. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5450 - Urban Food and Agriculture: Perspectives and Research (3 Credits)
Provides an overview of research and practices in urban farming. Critically reviews emergent models of local food production/distribution. Compares new practices to traditional agribusiness. Assesses the prospects for solving sustainability problems within the modern agro-food system. Note: this course assumes that students have completed GEOG 3401. Prereq: Graduate standing. Cross-listed with GEOG 4450. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5460 - Sustainable Urban Agriculture Field Study I (3 Credits)
Provides a field-based overview of urban farm planning and management. Topics: range/land conservation, native/invasive species, water distribution, animal husbandry, government interaction, local markets, community relations, conservation easements and issues pertaining to urban farming. Note: this course assumes that students have completed ENVS 5450. Prereq: Graduate standing. Cross-listed with GEOG 4460. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5470 - Sustainable Urban Agriculture Field Study II (3 Credits)
Provides a field-based overview of current practices in local agricultural production. Emphasis will be placed on sustainable practices and their most efficient situation. Special consideration will be given to plausible solutions for food insecure communities both local and global. Note: this course assumes that students have completed ENVS 5450 and 5460. Prereq: Graduate standing. Cross-listed with GEOG 4470. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5480 - Urban Vegetable CSA: Planning, Production & Distribution (3 Credits)
This course outlines the planning, production, and distribution in an active urban vegetable CSA (community supported agriculture) model. It is offered as a part of the GES Sustainable Urban Agriculture Certificate. Cross-listed with GEOG 4480. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5500 - Topics in Environmental Sciences (1-6 Credits)
Topics may vary from one offering to the next. Prereq: Graduate standing. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5560 - Applied Statistics for the Natural Sciences (3 Credits)
Surveys statistical techniques including: quick review of basic statistics, tests for normality and outliers, display of data; simple and multiple regression; ANOVA and its relation to regression. Emphasis on computer or stat-pak analysis and interpretation of statistical results. Note: this course assumes that students have completed college algebra and GEOG 3080 or equivalent. Prereq: Graduate standing. Cross-listed with GEOG 4770. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5620 - Health Risk Communication (3 Credits)
We are bombarded all day with communication expressing a sense of risk, of danger, of threats to our individual and communal well-being. This class acquaints students with contemporary theory, research, and practice in health risk communication across a variety of threats both real and imagined. Cross-listed with COMM 5620, COMM 4620, and PBHL 4620. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5650 - Environmental Education (3 Credits)
This course links the theory and practice of environmental education to inform curricular development and pedagogical knowledge. Prereq: Graduate standing. Cross-listed with ENVS 4650 and SCED 5650. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5660 - Introduction to Smart Cities (3 Credits)
This course will explore some of the most change-making technological innovations in the 21st century and their impact on public policy in cities through a survey of best practices, model policies, and lessons learned from cities across the United States and globe. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ENGR 6299, PUAD 5627, and URPL 6299. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ENVS 5700 - Synthesis for Interdisciplinary Science (3 Credits)
Synthesis is an approach in interdisciplinary research and education that links ideas, data and methods. This course develops synthesis skills through the lens of systems theory. It includes exercises for synthetic thinking, examination of integrative tools, and a service-learning project. Cross-listed with GEOG 4700. Breadth and depth training in environmental sciences. Interest in interdisciplinary collaboration. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5720 - Climate Change: Causes, Impacts and Solutions (3 Credits)
Examines science behind past, present & future climate change & environmental, social & political implications & solutions. Explores recent scientific research, syntheses & mainstream literature advancing knowledge about causes & consequences of natural & anthropogenic climate change. Cross-listed with GEOG 4720/ GEOG 5720/ ENVS 4720. Prereq: Graduate standing. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENVS 5730 - Air Quality Modeling and Analysis (3 Credits)
Emphasizes the use of air dispersion modeling tools. Topics include: sources and effects of air pollution, use of the WWW, and analysis of modeling results. Note: For graduate students in environmental sciences or engineering, and for those working in the environmental field. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENVS 5731 - Mountain Biogeography (4 Credits)
This hands-on research course will focus on the current and past distribution of plants and changes in disturbance regimes in the mountains using environmental proxy data preserved in lake sediment cores. A field trip will occur early in the semester. Restriction: Restricted to Graduate and Graduate Non-Degree students. Cross-listed with GEOG 4731. Term offered: fall. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENVS 5740 - Soil Science and Geography (3 Credits)
Reviews chemical and physical properties of soils, soil development, and geographic distributions of soil types in the context of the role that soils play in natural and human-altered ecosystems. Prereq: graduate standing or permission of instructor. Cross-listed with GEOG 4740, GEOG 5740, ENVS 4740. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENVS 5750 - Beeography: Geography of Bees (4 Credits)
Beeography is an introduction to the bee world and the amazing diversity in Colorado and beyond. The course will examine the distribution of bees and the pressures they face in different environmental and cultural contexts. It will examine different methods to support and increase bee populations and pollination services, especially in populated environments, including backyard beekeeping of honeybee and native bee populations. Field and lab activities will include beekeeping, native bee collection and identification, bee dissections, pollen processing and identification, and trips to area bee museum collections and apiaries. Restriction: Restricted to Graduate and Graduate Non-Degree Majors.
Cross-listed with GEOG 4750, GEOG 5750, and ENVS 4750. Term offered: summer. Max hours: 4 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Summer.

ENVS 5757 - Urban Climate and Air Quality (3 Credits)
Explores how people alter climates on micro- to regional scales, and how this in turn affects human health and society. Focusses on recent scientific research, physical processes within cities, and the role of urbanization in global climate change. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with GEOG 5757. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Typically Offered: Fall.

ENVS 5780 - Aquatic Ecology (3 Credits)
This course explores the physical, chemical, and biological (including human) properties of aquatic ecosystems, and how the interrelationships between these properties define and influence advanced ecological processes. Special focus is given to lakes, reservoirs, wetlands, streams, rivers, and groundwater. Learning is facilitated through lectures, discussions, student presentations, laboratory and data exercises, and periodic (often virtual) field excursions. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ENVS 4780, BIOL 4780, and BIOL 5780. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 5840 - Independent Study: ENVS (1-3 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

ENVS 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
ENVS 5995 - Global Study Topics (3-9 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Prereq: Graduate standing. Cross-listed with ENVS 4995, GEOG 4995, and GEOG 5995. Repeatable. Max hours: 12 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 12.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Global Education Study Abroad.

ENVS 6000 - Environmental Sciences Seminar (1 Credit)
Student and faculty presentations of UCDHSC research projects and other current environmental sciences topics. All environmental sciences students are encouraged to attend, but credit is given only to students who present seminars. Two semesters of this course are required to receive a M.S. in Environmental Science degree; these students must register for this seminar and give presentations the first semester they are in the M.S.E.S. program and the semester in which they defend their master's project. Prereq: Graduate standing. Term offered: fall. Repeatable. Max Hours: 2 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 2.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

ENVS 6002 - Research Topics in Environmental Sciences (3 Credits)
Introduces research and professional development in the environmental sciences, focusing on current issues and trends in the field, methods of developing research, reading scientific literature, and guiding students in designing their course of study. Students are introduced to the environmental sciences faculty and their research programs. Prereq: Graduate standing. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 6.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall, Spring.

ENVS 6004 - Research Methods in Environmental Science (3 Credits)
This core MS Environmental Science course will explore a range of methods commonly encountered in environmental science fields and how to develop a research project and proposal. Prereq: ENVS 6002 with a C or higher. Max hours: 3 Credits.
Grading Basis: Letter Grade Prereq: ENVS 6002 with a C or higher.

ENVS 6100 - Research Topics in Environmental Management (3 Credits)
This is one of 4 core MS Environmental Science courses that will review and apply the principles and methods involved in designing and implementing effective environmental management. Prereq: ENVS 6002 with a C or higher. Max hours: 3 Credits.
Grading Basis: Letter Grade Prereq: ENVS 6002 with a C or higher.

ENVS 6220 - Community-Based Research Practicum (4 Credits)
Examines the roles of technology and society in the etiology and control/prevention of adverse health outcomes associated with releases of toxic substances. Examples come from experience and the literature on occupational cancer and reproductive hazards, occupational and environmental regulation of hazardous wastes, air, and water pollution. Cross-listed with HBSC 7210. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Fall.

ENVS 6210 - Human Health and Environmental Pollution (3 Credits)
Introduces the field of toxicology. Emphasizes the mechanisms by which chemicals produce toxic effects and the methods for assessing toxicity. Note: Designed for students in the environmental sciences and occupational health fields. Note: this course assumes that students have completed one year of college chemistry and one year of college biology. Prereq: Graduate standing. Cross-listed with HBSC 7360. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to Graduate and Graduate Non-Degree Majors Typically Offered: Spring.

ENVS 6230 - Environmental Epidemiology (3 Credits)
Provides a basic understanding of the methods used to study the effects on human health of exposures to physical, chemical, or biological factors in the external environment. The course explains the use of epidemiologic methods through a problem solving approach to investigating environmental health case studies. Note: this course assumes that students have completed a basic statistics course. Prereq: Graduate standing. Cross-listed with HBSC 7310. Max hours: 3 Credits.
Grading Basis: Letter Grade Restriction: Restricted to Graduate and Graduate Non-Degree Majors

ENVS 6800 - Community-Based Research Practicum (4 Credits)
For students to apply the concepts and skills presented throughout the masters program in a community setting. Students will participate in a real-world, studio-based project that meets the needs of a government, non-governmental, or private sector organization and will produce a scoped product. Prereq: ENVS 6002 with a grade of B- or higher. Cross-listed with GEOG 6800. Term offered: spring. Max hours: 4 Credits.
Grading Basis: Letter Grade Prereq: ENVS 6002 with a grade of B- or higher. Typically Offered: Spring.

ENVS 6840 - Independent Study: ENVS (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Department consent required. Repeatable. Max hours: 3 Credits.
Grading Basis: Letter Grade Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
ENVS 6950 - Master's Thesis (1-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 11 Credits.
Grading Basis: Letter Grade with IP
Repeatable. Max Credits: 11.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Report as Full Time.

ENVS 6960 - Master's Report (3-6 Credits)
Department consent required. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Graduate standing. Repeatable. Max hours: 6 Credits.
Grading Basis: Letter Grade with IP
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Additional Information: Report as Full Time.
Applied Geography & Geospatial Science, MA

E-mail: Rafael.Moreno@ucdenver.edu
Web site: MS in Environmental Sciences

Introduction
In the United States and around the world, balancing the preservation of the natural environment with the imperatives of economic development along with concerns for social well-being has led to a growing demand for broadly trained individuals who can identify and understand pressing social and environmental issues, collect and analyze relevant data, and develop and implement innovative solutions. Graduates of the M.A program in Applied Geography and Geospatial Science will have the knowledge, training, and tools to become leaders in this rapidly growing field.

The program's research focus is human-environment interaction, a longstanding hallmark of the discipline of Geography. Within this area of critical geographic inquiry, the program emphasizes geospatial science, a federally recognized STEM subject area that includes geographic information systems (GIS) as well as computer cartography, remotely sensed image analysis, and spatial statistics. Students apply their geospatial research skills in the context of hands-on, faculty-led research projects that stress professional development through community engagement and interactive service learning.

Financial Aid
There are three types of financial aid available: teaching assistant student hourly positions; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office on the Denver campus.Incoming students will be automatically considered for program-distributed assistance at the time of admission to the program. Continuing students will be regularly apprised of available aid and positions. All other aid should be requested through the

CU Denver Financial Aid Office
Student Commons Building, 5th floor
Campus Box 125
P.O. Box 173364
Denver, CO 80217-3364
Telephone: 303-315-1850

Internships
Students in the Applied Geography & Geospatial Science MA program are strongly encouraged to contact the Experiential Learning Center for internships and paid positions related to geographical sciences. The Experiential Learning Center is located in the Tivoli Student Union, Suite 260. Telephone: 303-556-2250. Many students have had internships in federal agencies, such as the U.S. Environmental Protection Agency and the U.S. Geological Survey.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

The program is offered by the faculty of the Department of Geography and Environmental Sciences in the College of Liberal Arts and Sciences. Students undertake 36 credit hours over a two-year period. These 36 hours include required core classes, a required service learning studio, required geospatial science methods coursework and electives. Students can elect to undertake either of two tracks: the first "coursework" track involves additional elective courses, whereas the second "thesis" track involves required courses, including preparation of a written thesis.

1. Students must complete a minimum of 36 credit hours from approved courses.
2. Students must complete a minimum of 36 graduate (5000-level) or higher credit hours from approved courses.
3. Students must earn a minimum grade of B (3.0) or better in all core courses, a B- (2.7) in all other courses applied to the degree and must achieve a minimum cumulative program GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Courses taken using P+/P/F or S/U grading cannot apply to degree requirements.
4. Students must complete all coursework with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Many of the electives have prerequisites students must have met these requirements in order to take the course.
2. Courses applied to either a certificate or an MA degree may later be applied toward the other if all pertinent coursework is completed within a five year time period.
3. Students should fill out and submit all relevant department forms for their files. Importantly, all petitions for course substitutions and identification of where courses fit as electives, with the subsequent approval/denial, should be submitted to this file.
4. By the end of the first semester, each student should identify and declare whether or not s/he is pursuing the thesis or non-thesis option. If intending to pursue the thesis option, the student should identify and gain agreement from a content advisor for guiding the thesis, filling out and submitting the appropriate departmental form.
5. Many of the electives have pre-requisites; students must have met these requirements in order to take the course.
6. Students may transfer up to nine hours of approved graduate-level credit into the program. These courses must be approved by the Graduate Director and they may not replace core courses.
7. Students may count up to six credit hours of independent, with a maximum of 3-credit hours per independent study towards elective credit in the major as approved by the Graduate Director. No more than 3 credit hours of independent study may be taken with the same instructor and they may not be taken in the same term.
8. Students may count up to six credit hours of internship in total, but 3-credit hours per internship and per entity (sponsorship may be with same professor sponsor)
9. Students may not count 4000-level courses towards electives in the program; this may be petitioned to the Graduate Committee in exceptional cases.

10. Students may take a maximum of two online courses, or petition to the GES Graduate Committee beyond two.

11. Students may enroll in thesis preparation and writing hours only after submission of signed committee form, which requires approval of the thesis proposal.

12. Students electing to follow the MA Thesis Track can allocate 3 to 6 credits toward their thesis work. If they choose to allocate six credits toward the thesis work, three of those credits can replace a three credits elective course requirement.

13. Students will not receive a grade for thesis preparation and writing hours until the thesis is successfully defended.

14. Students must follow the graduate admissions deadlines for submission of paperwork for the graduation application, comprehensive exam, and any other deadlines. Links to these can be found on the GES/MS website.

15. Work submitted for the environmental sciences options must have a grade of B (3.0) or better.

16. GES offers Geospatial, Environmental Education, and Urban Agriculture independent graduate certificates. These certificates may be earned without entrance into the MS in environmental sciences program. (See the Geographic Information Science Graduate Certificate (p. 402), Sustainable Urban Agriculture Graduate Certificate (p. 404), and Environmental Science Education Graduate Certificate (p. 398) descriptions.)

E-mail: Rafael.Moreno@ucdenver.edu
Website: MS in Environmental Sciences (https://clas.ucdenver.edu/ges/programs/master-science-environmental-sciences/)

Overview

Environmental Sciences is a multidisciplinary study of the natural/physical environment. Academic fields involved in environmental sciences include chemistry, biology and ecology, physics, geology, geography, anthropology, engineering, political science, law, economics and the health sciences. Students planning to pursue the MS in Environmental Sciences must either have earned a bachelor's degree or have taken significant course work in the natural/physical sciences or engineering and completed several other prerequisites (see the following graduate information).

Environmental careers encompass a broad range of professions, from those with a strong foundation in the natural/physical sciences or engineering to those based in the social sciences and/or humanities. Students interested in environmental issues and careers should investigate all program options and specializations before deciding which path to follow. At CU Denver, the MS in Environmental Sciences emphasizes the natural/physical sciences and engineering with the addition of the social sciences and humanities.

The MS in Environmental Sciences degree is designed to provide training in natural/physical sciences and social sciences. The goals of the program are (1) to enhance the interdisciplinary communication and analytical skills of the student, and (2) to provide a multidisciplinary approach for intensive and hands-on studies of particular environmental issues. Students will receive instruction in the physical and biological dynamics of various ecosystems, environmental engineering and socioeconomic issues associated with environmental analysis.

Graduates of the MS in Environmental Sciences program are involved in many different areas, such as reviewing environmental impact statements, monitoring groundwater quality or air quality and communicating with the public. Our students have great success finding employment in various agencies (U.S. Environmental Protection Agency, U.S. Geological Survey, Colorado State Department of Public Health and Environment) and private-sector environmental consulting and engineering firms.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor to confirm the best plans of study before finalizing them.

Financial Aid

There are four types of financial aid available: student hourly teaching assistantship; research assistantship positions funded by grants to specific program faculty; paid internships and part-time employment organized through the department with professional organizations; and the regular package of financial aid (primarily loans) available through the financial aid office on the Denver campus. Our program also accommodates working students and offers many of core classes one/week or in the evening to accommodate work schedules. Incoming students will be automatically considered for program-distributed assistance at the time of admission to the program. Continuing students will be regularly apprised of available aid and positions. All other aid should be requested through the CU Denver Financial Aid Office, Student Commons Building 5th floor, Campus Box 125, P.O.Box 173364, Denver, CO 80217-3364. Telephone: 303-315-1850.

Internships

Students in the MS in Environmental Sciences program are strongly encouraged to contact the Experiential Learning Center for internships and paid positions related to environmental sciences. The Experiential Learning Center is located in the Tivoli Student Union, Suite 260. Telephone: 303-556-2250. The LynxConnect Career Center also located in the Tivoli Student Union Suite 439. Many students have had internships in federal agencies, such as the U.S. Environmental Protection Agency and the U.S. Geological Survey.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 36 credit hours from approved courses.
2. Students must complete a minimum of 36 graduate (5000-level) or higher credit hours.
3. Students must earn a minimum grade of B (3.0) or better in all core courses, a B- (2.7) in all other courses applied to the degree and must achieve a minimum cumulative program GPA of 3.0. All graded attempts in required and elective courses are calculated in the program GPA. Courses taken using P+/P/F or S/U grading cannot apply to degree requirements.
4. Students must complete all coursework with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. Many of the elective courses have prerequisites; student must have met these requirements in order to take the course.
2. A given course may only be used for one option, even if it is listed in several options. Other courses maybe offered that will be acceptable as electives with approval of the option advisor and the director of the program.
3. Courses applied to either a certificate* or an MS degree may later be applied toward the other if all pertinent coursework is completed within a five year time period.
4. Students should fill out and submit all relevant department forms for their files. Importantly, all petitions for course substitutions and identification of where courses fit as electives, with the subsequent approval/denial, should be submitted to this file.
5. By the end of the first semester, each student should identify and declare whether or not they are pursuing the thesis or non-thesis option. If intending to pursue the thesis option, the student should identify and gain agreement from a
content advisor for guiding the thesis, filling out and submitting the appropriate departmental form.

6. Students may count up to six credit hours of independent study, with a maximum of three credit hours per independent study towards elective credit in the major as approved by the Graduate Director. No more than three credit hours of independent study may be taken with the same instructor and they may not be taken in the same term.

7. Students may count up to six credit hours of internship in total, but three credit hours per internship and per entity (sponsorship may be with same professor sponsor).

8. Students may not count 4000-level courses towards electives in the program; this may be petitioned to the Graduate Committee in exceptional cases.

9. Students may take a maximum of two online courses, or petition to the GES Graduate Committee beyond two.

10. Students may enroll in thesis preparation and writing hours only after submission of a signed committee form, which requires approval of the thesis proposal.

11. Students will not receive a grade for thesis preparation and writing hours until the thesis is successfully defended.

12. Students must follow the graduate admissions deadlines for submission of paperwork for the graduation application, comprehensive exam, and any other deadlines. Links to these can be found on the GES/MS website.

13. Work submitted for the environmental sciences options must have a grade of B (3.0) or better.

14. All students must complete two GES-approved, graduate-level techniques/methods-based class (not including the practicum).

15. Elective credits may be completed using up to three credit hours of Independent Study and/or three credit hours of Internship Study.

16. The Geospatial, Environmental Education, and Sustainable Urban Agriculture options of the program lead towards independent graduate certificates. These certificates may be earned without entrance into the MS in environmental sciences program. (See the Geographic Information Science Graduate Certificate, Sustainable Urban Agriculture Graduate Certificate, and Environmental Science Education Graduate Certificate descriptions.)

17. The number of credits required to reach 36 total credits will depend on (a) whether a student is on Plan 1 or Plan 2, and (b) how many credit hours are compiled in the core classes.

18. See the MS in Environmental Sciences courses are offered in both GES and our partner departments. The degree is offered through the College of Liberal Arts and Sciences with the cooperation of the College of Engineering, Design and Computing. In addition, some courses offered by the College of Architecture and Planning, the College of Liberal Arts and Sciences with the cooperation of the GES and our partner departments.

The MS in Environmental Sciences is a 36-hour program that provides students with two alternate plans: Plan I is a thesis path, while Plan II is a non-thesis path.

To learn more about the Student Learning Outcomes for this program, please visit our website ([https://clas.ucdenver.edu/ges/programs/master-science/ms-learning-goals-objectives/](https://clas.ucdenver.edu/ges/programs/master-science/ms-learning-goals-objectives/)).
Environmental Science Education Graduate Certificate

Certificate Advisor: Bryan Wee
E-mail: bryan.wee@ucdenver.edu

Introduction
Please click here (p. 380) to see Geography and Environmental Sciences Department information.

Certificate Objectives
1. Students will synthesize environmental science content with relevant educational practices
2. Students will recognize, understand and apply environmental science education in either formal or informal educational settings
3. Students will utilize education research methods to support disciplinary learning
4. Students will identify a broader set of career options (see list below)

Sample List of Career Options
• K-12 Teacher or curricular specialist
• UNICEF/UNESCO/World Heritage Foundation
• National Parks Service or U.S. Forest Service
• Non-profit organizations (e.g. Colorado Alliance for Environmental Education)
• Regulatory Agencies (e.g. U.S. Environmental Protection Agency)
• Environmental and/or Educational Consultancy Firms
• Adjunct lecturer or instructor

Program Delivery
This is both an on-campus and field-based program.

Declaring This Certificate
Please see the Certificate advisor.

Eligibility
Environmental Science Education has broad applications across many disciplines. Students who already hold a bachelor's degree from CU Denver or other institutions in any major may be admitted as a CU Denver graduate student or a non-degree-seeking student, depending on enrollment status.

Current CU Denver Students
A student may begin the program in any semester or during the summer by making arrangements with the Certificate advisor. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

Former CU Denver Students or Graduates of Other Universities
In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

Admissions: https://www.ucdenver.edu/admissions/non-degree-admissions (https://www.ucdenver.edu/admissions/non-degree-admissions/).

Specific questions about enrollment or tuition should be addressed directly to the University Registrar's Office or Bursar's Office.

Program Expectations
Because a certificate is a CU Denver certification of a students’ specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver. Only in rare circumstances will exceptions be made regarding this policy. Courses taken within the Environmental Science Education Certificate may be used towards one other degree requirement. Any changes to the standard curriculum program must be approved in writing by the Certificate advisor. Please pay close attention to prerequisites for specific courses.

Performance Expectations
Students must earn a 3.0 GPA average with no course below a "B-" in all approved courses for the certificate. For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student's transcript.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Environmental Science Education Graduate Certificate advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements
1. Students must complete a minimum of 12 credit hours.
2. Students must complete a minimum of 12 graduate (5000-level or higher) credit hours.
3. Students must earn a minimum grade of B- (2.7) in all course applied to the certificate and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Courses taken using P+/P/F or S/U grading cannot apply to certificate requirements.
4. Students must complete all coursework with CU Denver faculty.

Free and Open Source Software for Geospatial Applications Graduate Certificate

Please click here to see Geography and Environmental Sciences department information.

Certificate Advisor: Rafael Moreno
E-mail: rafael.moreno@ucdenver.edu

Certificate Objectives
1. Provide students and working geospatial professionals with the knowledge and skills for the effective use and development of FOSS4G solutions in diverse application contexts. This complements and enhances the knowledge and skills they have in the use of geospatial proprietary software solutions.
2. Students will be exposed to several FOSS4G alternatives to address the needs of a geospatial information infrastructure from desktop, database management systems, systems automation/customization, all the way to Web/Cloud-based applications and enterprise level solutions.
3. Students will acquire the necessary knowledge and skills to effectively use the most advanced FOSS4G alternatives to develop solutions for each of levels of a geospatial information infrastructure previously mentioned.
4. Students will have the knowledge and hands-on skills that will enable them to design and develop hybrid geospatial information infrastructures that make use of proprietary software and FOSS4G incorporating each them in a combination that maximizes efficiency of the end infrastructure.

Current CU Denver Students
A student may begin the program in any semester or during the summer by making arrangements with the FOSS4G Certificate Coordinator. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

Former CU Denver Students or Graduates of Other Universities
In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

Admissions: https://www.ucdenver.edu/admissions/non-degree-admissions.

Specific questions about enrollment or tuition should be addressed directly to the University Registrar’s Office or Bursar’s Office.

For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student’s transcript.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Free and Open Source Software for Geospatial Application advisor to confirm the best plans of study before finalizing them.

Program Requirements

Complete the following courses: 12
- CVEN 5385 GIS Relational Database Systems
  Students learn the principles and techniques to design a spatial database and perform multiple analyses and functions in a FOSS4G spatial database management system.
- GEOG 5086 FOSS4G Systems Integration
  This course functions as the capstone for the certificate. It concentrates on applying all the knowledge and skills previously obtained and adding more in the area of integration of geospatial information infrastructures based on FOSS4G. Students work on integrating systems from desktop to Web/Cloud-based applications.
- GEOG 5091 Open Source Software for Geospatial Applications
  This course exposes students to the diversity of FOSS4G solutions that exist for each of the elements of geospatial information infrastructure. They acquire the necessary hands-on skills to effectively use one FOSS4G to address the needs of each of the levels of a geospatial information infrastructure.
- GEOG 5092 GIS Programming and Automation
  Students learn programming principles and techniques to automate processes and customize a geographic information system (GIS), and to integrate and coordinate the functions of diverse geospatial software (e.g., a database management system with a GIS).

Total Hours 12

Optional Courses

- BIOL 3763 Biostatistics
- BIOL 6764 Biological Data Analysis

Program Restrictions, Allowances and Recommendations

1. The students will have the option to take other courses above and beyond the core requirements for the certificate.
Both of these courses use the open source software R for environmental data analysis including spatial statistics and geostatistics.

<table>
<thead>
<tr>

<td>Deploying GIS Functionality on the Web</td>
</tr>
</tbody>
</table>

This course is offered annually as part of the GES offerings. It also uses R for data analysis including spatial statistics and geostatistics.

This course uses FOSS4G for database analysis and creation of Web-based GIS systems.

To learn more about the Student Learning Outcomes for this program, please visit our website (https://clas.ucdenver.edu/ges/programs/certificates/free-and-open-source-software-geospatial-applications-foss4g/).
Geographic Information Science Graduate Certificate

Please click here to see Geography and Environmental Sciences department information.

GISci Certificate Advisors: Peter Anthamatten and Rafael Moreno-Sanchez
E-mail: Peter.Anthamatten@ucdenver.edu and Rafael.Moreno@ucdenver.edu

The Geographic Information Science (GISci) Certificate in the Department of Geography and Environmental Sciences is designed to provide CU Denver undergraduates and graduates, as well as non-degree seeking students interested in professional development, with proficiency in the application of spatial thinking, geographic information science, and geo-technologies in the social and physical sciences, spanning the natural, built and human environments and emphasizing human-environment interconnections. The GISci Certificate core establishes a broad foundation in spatial technologies and methodologies, including geographic information systems, remote sensing, cartography, spatial extensions to database management systems, and statistics. From this base, students can delve into various specialization areas depending on their interests.

Upon successful completion of the certificate, students will be able to:

• articulate and apply basic theoretical underpinnings of spatial analytical principles, methodologies, and techniques;

• effectively utilize at least three different types of software used for spatial analysis;

• apply geo-spatial thinking, geographic information science, and geo-technologies appropriately; and

• analyze diverse real-world problems that have a spatial dimension and develop alternative solutions to them.

Eligibility

Geographic information science and geo-technologies have broad applications across many disciplines. Students who already hold a bachelor’s degree from CU Denver or other institutions in any major may be admitted as a CU Denver graduate student or a non-degree-seeking student, depending on enrollment status.

You must complete the Application for GISci Certificate, which can be obtained from the GISci Certificate Coordinator. The application requires copies of former transcripts indicating that an undergraduate degree has been previously granted or an unofficial transcript from CU Denver showing that you are a current undergraduate or graduate student. This application is required to be formally registered in the GISci Certificate program, and must be completed no later than the semester prior to the scheduled completion of the certificate.

Current CU Denver Students

A student may begin the program in any semester or during the summer by making arrangements with the GISci Certificate Coordinator. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

Former CU Denver Students or Graduates of Other Universities

In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

Admissions: https://www.ucdenver.edu/admissions/non-degree-admissions/.

Specific questions about enrollment or tuition should be addressed directly to the University Registrar’s Office or Bursar’s Office.

Program Expectations

To earn the certificate, students must complete a specific set of geospatial classes. Because a certificate is a CU Denver certification of a students’ specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver. Only in rare circumstances will exceptions be made regarding this policy. Courses taken within the GISci Certificate Program may be used towards one other degree requirement. Any changes to the standard curriculum program must be approved in writing by the GISci Certificate Coordinator. Please pay close attention to prerequisites for specific courses.

Performance Expectations

Students must earn a 3.0 GPA average with no course below a "B-" in all approved courses for the certificate. For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student’s transcript.

Procedure to request the issuing of GIS Certificate

When you have completed all the courses required for the Graduate or Undergraduate GISci Certificate with a grade of B- or above, send the following information to the GIS coordinators (Rafael Moreno (rafael.moreno@ucdenver.edu) and Peter Anthamatten (peter.anthamatten@ucdenver.edu)). Students must complete the certificate and submit a notification of completion to the GIS coordinator(s) before graduation.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Geographic Information Science certificate advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 18 credit hours.
2. Students must complete a minimum of 18 graduate (5000-level) or higher credit hours.
3. Students must earn a minimum grade of B- (2.7) in all courses applied to the certificate and must achieve a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are
calculated in the certificate GPA. Courses taken using P+/P/F or S/U grading cannot apply to certificate requirements.

4. Students must complete all coursework with CU Denver faculty.

Program Restrictions, Allowances and Recommendations

1. It is assumed that graduate students have some prior knowledge in basic mapping skills, therefore GEOG 2080 Introduction to Mapping and Map Analysis is not required. All core classes are required for completion of the GIS Certificate and are offered at least on a yearly basis. The statistics course requirement can be filled by enrolling in the GEOG 5050 Applied Spatial Statistics or one of several graduate level (5000 or above) classes offered by CU Denver and approved by the certificate coordinator.

2. If you are currently a graduate student at CU Denver and also attended CU Denver as an undergraduate, you may apply only one three credit hour undergraduate course (4000 level) to the GISci Certificate.

3. There is a prerequisite requirement of a basic statistics class taken at the undergraduate college level prior to taking any graduate level statistics class at CU Denver. Any additional two electives can be taken from the elective list.

Sustainable Urban Agriculture Graduate Certificate

Introduction
Please click here (p. 380) to see Geography and Environmental Sciences Department information.

Certificate Advisor: Amanda Weaver
E-mail: amanda.weaver@ucdenver.edu

The goal of the certificate program is to provide GES students advanced training in sustainable urban agriculture through the integration of university classroom study and field-based practicum conducted at the department's field research station. Requirements for the certificate are therefore divided between on-campus courses and field courses.

Upon successful completion of the certificate, students will:
• Have knowledge of the history of urban farming
• Understand the modern agro-food system
• Participate in sustainable urban agricultural practices

Program Delivery
• This is both an on-campus and field-based program.

Declaring This Certificate
• Please see the Certificate advisor.

Eligibility
Sustainable Urban Agriculture has broad applications across many disciplines. Students who already hold a bachelor's degree from CU Denver or other institutions in any major may be admitted as a CU Denver graduate student or a non-degree-seeking student, depending on enrollment status.

Current CU Denver Students
A student may begin the program in any semester or during the summer by making arrangements with the Certificate advisor. This should be done as soon as you have decided to pursue the certificate, and no later than the semester previous to completion of all the courses required to obtain the certificate.

Former CU Denver Students or Graduates of Other Universities
In order to start the certificate program, you will need to apply to the university as a non-degree seeking student if you are not already enrolled in a graduate program within CU Denver. Once accepted, you will be able to enroll in all of the appropriate classes.

Admissions: https://www.ucdenver.edu/admissions/non-degree-admissions (https://www.ucdenver.edu/admissions/non-degree-admissions/).

Specific questions about enrollment or tuition should be addressed directly to the University Registrar’s Office or Bursar’s Office.

Performance Expectations
For graduate and non-degree seeking students, the certificate will be awarded upon completion of the program and be added to the student’s transcript.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Sustainable Urban Agriculture advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements
1. Students must complete a minimum of 12 credit hours taken from approved courses.
2. Students must complete all courses at the graduate level (5000 or above) to fulfill the requirements of the certificate.
3. Students must earn a minimum grade of B- (2.7) in all courses that apply to the certificate and a minimum cumulative certificate GPA of 3.0. All graded attempts in required and elective courses are calculated in the certificate GPA. Courses taken using P+/P/F or S/U grading cannot apply to certificate requirements.
4. All 12 credit hours for the certificate must be earned at the University of Colorado Denver.

Program Restrictions, Allowances and Recommendations
1. Because a certificate is a CU Denver certification of a students’ specialized knowledge in an advanced subject matter, all courses in a certificate program are expected to be taken in residency at CU Denver.
2. Any changes to the standard curriculum program must be approved in writing by the certificate advisor.
3. Courses taken within the Sustainable Urban Agriculture Certificate Program may be used towards one other degree requirement.
4. Please pay close attention to prerequisites for specific courses.

Program in Health and Behavioral Sciences
Campus Box 188
P.O. Box 173364
Denver, CO 80217-3364

Overview

The mission of the health and behavioral sciences (HBSC) program is to apply social science theory and innovative research methods to critically address emerging issues in health. The program trains students to confront issues affecting the health of communities and populations by focusing on social determinants of health and diseases. These determinants can be more influential on population health than the health care system.

The program’s overarching framework integrates social, cultural and biomedical perspectives to understand the underpinnings of health and the conditions essential for its creation and maintenance. Students and faculty conduct interdisciplinary research on topics including emerging diseases, maternal/child health, substance abuse, health disparities and global health. Graduates are innovative researchers, effective educators and leaders directly engaged in the practice of population health.

Population health is working to protect the environment, identifying sources of illness in population groups, controlling disease outbreaks, evaluating the economic impacts of changing demographics, developing interventions to promote healthy behavior, and producing health policy legislation. Population health draws from a broad array of disciplines, such as the social and behavioral sciences, sociology, anthropology, psychology, medicine, economics, statistics, epidemiology, law and biology, and each provides unique insights for the diverse set of activities involved in population health practice.

PhD Program in Health and Behavioral Sciences

The doctor of philosophy degree in health and behavioral sciences is rooted in the realization that our ability as a global society to overcome some of the most significant and intractable public health problems today rests on the willingness of biomedical and social science researchers to innovate across traditional disciplinary boundaries. Students are trained in theory from multiple disciplines and in both quantitative and qualitative research methods.

A master’s degree is not provided by the health and behavioral sciences department.

A student’s particular research focus constitutes a key part of his or her doctoral program. A range of possible foci exists, given the particular student’s interest and faculty expertise.

Examples of HBSC research foci include:

- Social determinants of health. Such research interests include studies on the health-related influences of socioeconomic position, social and economic inequality, discrimination, social networks and support, social capital, work conditions and psychological states including stress.
- Community health. This area of research involves community health assessment; program design and evaluation; translation of evidence-based interventions to diverse populations and communities; participatory research and community mobilization; policy analysis and advocacy for health-related problems.
- Biosocial ecology. Within this area are studies of the interplay of biological (including physiological, genetic or others of the biomedical health sciences), social, cultural and environmental characteristics influencing maternal/infant health, exercise performance or susceptibility to disease.
- Global health. Topics include social, cultural and biomedical factors influencing transmission of disease and health disparities on an international (as well as national) scale.

Recent student research exemplifying such foci includes:

- perinatal stressors and fetal and child health in New Zealand
- gender differences in access to effective HIV care in sub-Saharan Africa
- the factors that shape whether minority owned businesses offer employee sponsored health insurance
- decision making around healthy food choices among school-aged children
- community representation in health organizations in Colorado
- race/ethnic and socioeconomic disparities in exercise, sleep, and nutrition behaviors among U.S. adults

Graduates of the HBSC program acquire skills that situate them for academic careers and leadership roles in population health. Depending upon a student’s concentration, the successful graduate will gain expertise in research design and methods; social, cultural and biobehavioral determinants of health and disease; the structure and organization of health care systems; the contribution of individual, social and cultural factors for deciding health behaviors; and how guided change in health care systems may enhance quality, efficacy and access. The significance of these skills in addressing current complex health issues ensures that graduates will be in demand in a number of employment sectors ranging from community and public health organizations, to academic institutions, to nonprofit research organizations and to private health care settings.

Requirements for Admission

A master’s or equivalent graduate degree, or substantial research experience, is recommended for admission to the PhD program. Students applying without prerequisites may be admitted, but will be required to complete appropriate courses before being permitted to complete the core curriculum.

In addition to the general admission requirements for graduate admission, the specific admission requirements for the PhD in health and behavioral sciences are as follows:

1. Knowledge from prior course work or vocational experience in Epidemiology (3 semester hours or the equivalent work experience). The applicant should have an understanding of the basic concepts and methods of epidemiology, including measures of risk, mortality,
the distribution of disease, the role of bias and confounders, and study design.

2. Demonstrated academic excellence as evidenced by strong undergraduate and graduate GPAs. Admission to the program is highly competitive.

The applicability of a student’s prior course work will be decided by the program executive committee after reviewing the student’s transcript and additional materials. If the student does not have the requisite educational background or GPA, the student may be admitted on a conditional or provisional basis and additional course work required in accordance with Graduate Education Policies and Procedures.

Prospective students should not be dissuaded from applying to the program if they do not meet all of the requirements for admission. In some cases, employment experience may be counted toward meeting a requirement. In other cases, students may be admitted conditionally upon their completion of a list of prerequisite courses that will be established at the time of admission. Students should be sure to address this issue in completing the graduate application by specifying the academic and vocational experience they possess that meets, in part or full, the admission requirements described above.

### Master's Level Preparation for the Doctoral Program in Health and Behavioral Sciences

The program does not currently offer master’s-level training in HBSC.

### To Apply For Admission

At the Denver campus, all graduate applications are now submitted electronically. To begin the application process, go to the online admissions website. If you have any difficulties, call the administrative assistant at 303-315-7157. The program admits students only for the fall semester, which typically begins in mid- to late August. The deadline for the receipt of all application materials is January 1 for admission the following August.

Applicants should invest considerable thought and effort in preparing their application. For instance, in the essay, applicants should provide information on:

1. their research interests and plans for graduate study;
2. how they see their research interests fitting into our program;
3. academic or professional research experiences including publications, theses, and research in progress;
4. academic and professional experiences in their proposed or related fields, including non-course education, teaching or other relevant employment, or other scholarly activities.

Applicants should also submit a brief writing sample that showcases their current skills in writing and analytical thinking. It is more important that the writing sample reflect their best work than that the topic match their planned area of study in our PhD program. Examples could include a class paper, a selection from a thesis, a lead or sole authored paper, an op-ed style essay, a policy brief, or other sample.

Applicants should provide a current resume or CV to support their application.

In addition to the required recommendation form, letters of recommendation are required from at least three individuals in a position to judge the applicant’s ability to complete the program. Recommenders may be employers, colleagues or professors; however, the applicant should be sure that the letters address the quality of, and aptitude for academic work as well as personal characteristics and qualities.

The program does not require GRE scores, but applicants may submit their scores if they believe it will strengthen their application.

### Financial Aid

There are five kinds of financial aid available: graduate student stipends/ fellowships; tuition assistance; teaching assistantships; research assistantship positions funded by grants to specific program faculty; and the regular package of financial aid (primarily loans) available through the financial aid office.

Newly admitted, out-of-state, and students demonstrating outstanding scholastic achievement receive priority when assigning departmental sources of funding. Students interested in research assistantships should contact the individual faculty member with whom they wish to work regarding potential assistantship positions.

All other aid should be requested through the CU Denver Financial Aid Office (https://www.ucdenver.edu/student-finances/financial-aid/)

### Advisors

Upon admission to the program, each student will be assigned a first-year advisor. The student or the faculty will then choose the faculty advisor who will guide the student through the core and elective course work. This faculty advisor may or may not be the student’s dissertation advisor. The student selects his or her dissertation advisor and a minimum of three additional committee members who oversee the student’s comprehensive examination and dissertation research.

### Programs

- Health and Behavioral Sciences, PhD (p. 411)

### Faculty

#### Professors:
- jimi adams, PhD, Ohio State University
- Ronica Rooks, PhD, University of Maryland College Park
- Karen Spencer, PhD, Indiana University
- David P. Tracer, PhD, University of Michigan
- Sara Yeatman, PhD, University of Texas Austin

#### Associate Professors:
- Patrick Krueger, PhD, University of Colorado

#### Assistant Professors:
- Jennifer Boylan, PhD, University of Wisconsin-Madison
- Emma Bunkley, PhD, University of Arizona
- Hyeyoung Oh Nelson, PhD, University of California Los Angeles

### Research and Clinical Faculty:
- Jorge Ivan Ramirez, PhD, Michigan State University
- Jean Scandlyn, PhD, Columbia University

### Faculty Affiliates:
- Karen Hampanda, PhD, University of Colorado, Denver
Health and Behavioral Science (HBSC) Courses

HBSC 5999 - Topics in the Health and Behavioral Sciences (1-3 Credits)
An in-depth study of selected social science perspectives/theories and their applications to population health. Topics will vary from semester to semester, with a particular emphasis on current, salient population health problems. Prereq: Graduate standing or permission of instructor. Cross-listed with PBHL 4999. Max hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 6022 - Federal Data for Health Research & Policy (1-3 Credits)
Students will develop the knowledge and skills required to effectively use a variety of federal and statistical data sets for health research and policy analysis. Each week is devoted to one or two federal statistical datasets—data collection methods; why they are collected and what health issues they are designed to address; what population they represent and at what geographic scale. Most critically, students will be able to distinguish between questions that can be addressed with a public version of the data and questions that require restricted versions of the data that are protected by federal law and guidelines. Students will read, discuss and present research from various perspectives (Demography, Economics, Geography, Public Health, Sociology) using these data sources and apply their knowledge of data analysis from a variety of perspectives. Students will learn how to gain access to restricted data, how to protect individual anonymity with best practice disclosure avoidance techniques and will develop a research proposal for confidential research access. Note: Familiarity with SAS (preferable) or other statistical software such as SPSS or Stata and statistics or data analysis is recommended.
Restriction: Restricted to degree-granting graduate programs. Cross-listed with ECON 6022, GEOG 5022, and SOCY 5022. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to degree-granting graduate programs

HBSC 6320 - Human Genetics: Legal, Ethical and Social Issues (3 Credits)
Examines legal, ethical, and social issues that have come about with advances in human genetics. Topics include privacy, informed consent, discrimination, forensics, medical malpractice, and property rights.
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HBSC 7320, ANTH 6041. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 6500 - Women and War (3 Credits)
Appraise women's experiences and selected issues related to war-time service, including women's roles during war, gender-specific policies, military sexual trauma, reintegration, and effects of deployment on mental and physical health. Restriction: Restricted to Graduate and Graduate Non-Degree major. Term offered: summer. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Summer.

HBSC 6840 - Independent Study: HBSC (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

HBSC 7001 - Colloquium Series in the Health and Behavioral Sciences (1 Credit)
Features presentations by core, affiliated and adjunct faculty; alumni; distinguished guest speakers; and students nearing completion of the dissertation. The goal is to expose students to cutting-edge applications of health-related social and biological science research and to introduce students to the research interests of core and affiliated HBSC faculty, advanced students, and alumni who they might otherwise not have the opportunity to meet. Note: Required for ALL first and second year students but open to all graduate students and faculty. May be taken up to three times for credit. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Repeatable. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 3.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HBSC 7011 - Theoretical Perspectives (3 Credits)
Covers the following subject areas: philosophy and epistemology of the social and behavioral sciences as they are applied in public health and health care contexts; historical perspectives of Western biomedicine and public health; crosscultural perspectives on health systems; class, ethnic, and gender correlates of health and sickness; critical perspectives on Western health and health care models; and the structure and organization of health care systems. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).
Typically Offered: Fall.

HBSC 7031 - Human Ecology and Environmental Adaptation (3 Credits)
Focuses on the interplay of biology, environment, culture, and behavior in the causes and exacerbation of disease. The course includes the following topics: health in environmental and evolutionary contexts; models of causation in biomedicine and other medical systems; individual, community, and population manifestations of health and disease; and biocultural interaction in disease process. Specific case studies drawn from contemporary health problems are used to illustrate in detail the nature of these processes. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).
Typically Offered: Fall.
HBSC 7041 - Research Design and Methods in the Health and Behavioral Sciences I (3 Credits)
This course has four principal aims: (1) to provide students a working knowledge of research methodology as applied to field research efforts; (2) to enable students to apply research methodologies to areas of particular interest in the health and behavioral sciences; (3) to expose students to data manipulation techniques common to social science quantitative research; and (4) to teach basic research proposal development techniques. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).
Typically Offered: Spring.

HBSC 7051 - Qualitative Research Design and Methods (3 Credits)
Much of the data collected in the social sciences is interview- and text-based. This course explores methods for collecting and analyzing these data and theoretical paradigms that underlie these methods. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HBSC 7061 - Quantitative Methods in the Health and Behavioral Sciences (3 Credits)
This course introduces students to multivariate regression methods - a set of statistical models that relate an outcome variable to a set of predictor variables. The course emphasizes understanding and applying regression models to address social science research questions. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

HBSC 7071 - Applications of the Health and Behavioral Sciences (3 Credits)
The purpose of this course is to help students select and refine a dissertation research topic. Each student, through presentations and discussions of their work, will receive feedback from fellow students and the instructor, and will have an opportunity to improve written and oral presentation skills. Prereq: Admission to the Health and Behavioral Sciences program and HBSC 7041 with a B- or higher or permission of the instructor. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Prereq: Admission to the Health and Behavioral Sciences program and HBSC 7041 with a B- or higher.
Typically Offered: Spring.

HBSC 7120 - Human Reproductive Technologies and the Law (3 Credits)
Examines the legal, ethical, and social issues that have come about with advances in assisted reproductive technologies (ART). Illustrates how lawyers, judges, bioethicists, legislators, and policy makers have addressed these issues. Prereq: Graduate standing. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HBSC 7161 - Quantitative Methods in Health&Behavioral Sciences II (3 Credits)
This course introduces students to advanced multivariate regression methods (e.g., generalized linear models, survival models, hierarchical models). This course emphasizes the application of advanced regression methods to test social and behavioral science theories related to health. Prereq: Admission to the Health and Behavioral Sciences program or permission of the instructor. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to students admitted into the Health and Behavioral Sciences program (HBSC-PHD).

HBSC 7210 - Human Health and Environmental Pollution (3 Credits)
Examines the roles of technology and society in the etiology and control/prevention of adverse health outcomes associated with releases of toxic substances. Examples come from experience and the literature on occupational cancer and reproductive hazards, occupational and environmental regulation of hazardous wastes, air, and water pollution. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with ENVS 6210. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

Health and Behavioral Sciences, PhD

Please click here (p. 406) to see Health and Behavioral Sciences department information.

Overview
The PhD in Health & Behavioral Sciences (HBS) prepares students to be leaders in the interdisciplinary field of population health. Our program draws on theories and methods from the social, behavioral, and health sciences, to understand health, health behaviors, and health care. A few recent research topics in our program include the AIDS epidemic, the social contexts of medical care, the diffusion of health behaviors through social networks, the ethics of health care, biases that shape decision making, the mechanisms that link social conditions to biological health, and the determinants of health disparities. Graduates from our program are leaders in analyzing the conditions that give rise to the inequitable distribution of health within and across populations.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Health and Behavioral Sciences faculty advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

There are three dimensions to the required curriculum:

1. A core curriculum that focuses on problem-oriented, interdisciplinary approaches to theory and method
2. Elective course work intended to provide the student with a solid base from which to launch the dissertation research
3. Dissertation research and writing

The curriculum is subject to change. What appears below is intended to give students a general idea of the extent, shape and content of the curriculum. Students should check with the program office for up-to-date information on specific course requirements and scheduling.

1. Students must complete a minimum of 62 credit hours with a minimum of 32 credits of coursework, and 30 credit hours of dissertation.
2. Students must complete all credit hours at the graduate (5000-level or higher) level.
3. Students must earn a minimum grade of B- (2.7) in all courses applied to the degree and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to program requirements.
4. Students must complete all credit hours with CU Denver faculty.

Complete the following required courses:

</table>

Complete six credit hours of elective coursework, drawn from the graduate level (7000 and above) health and behavioral sciences courses (HBSC) at CU Denver. Students will be expected to fulfill the necessary prerequisites for taking these courses, and final authority as to whether a student may enroll in the course will rest with the department in which the course is offered.

<table>

<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>The doctoral dissertation research topic is chosen by the student.</td>
<td>30</td>
</tr>
</tbody>
</table>

The student is expected to define a research question in health and behavioral science, identify the research strategy to be used for answering the question, conduct the research required and document the project in the form of a doctoral dissertation. The student will be guided in this process by a doctoral dissertation advisor and the additional members who comprise the student’s doctoral dissertation committee (see below). A minimum of 30 semester hours of dissertation work is required. Students must register for a minimum of 5 dissertation credits each semester of their dissertation work. Students may not take more than a year’s leave of absence or fail to enroll for semester hours more than three semesters before they are dropped from the program.

Formal Review

A formal review of each student’s progress will be undertaken at the end of each year of study. Students who are deemed not to be making satisfactory progress will be informed in writing as to the nature and final result of the review before the end of June.

The Dissertation Prospectus and the Comprehensive Examination

Before a student advances to candidacy, they must complete a dissertation prospectus and defend it successfully in the context of an oral comprehensive examination. The dissertation prospectus is a complete description of the question or hypothesis that the student wishes to research for the dissertation project, the research design and study techniques and an assessment of the proposed project’s contribution to the field. It will include a comprehensive review of the relevant literature. If the student chooses to undertake research in a particular ethnic or cultural community, they must also demonstrate sufficient understanding of that setting including adequate knowledge of the language. This prospectus must be approved by the student’s advisor prior to scheduling the comprehensive examination.

The comprehensive examination will be an oral format based in part on, but not restricted to, the material presented in the dissertation prospectus. This exam must take place before the student’s advancement to candidacy and will typically occur by the end of the third year of study. A committee comprising the advisor and a minimum of three faculty members will supervise the completion of the dissertation prospectus. This committee will conduct the oral examination and will recommend to the faculty by a majority vote whether or not the student should be advanced to candidacy.

The Doctoral Dissertation and Final Exam

After advancement to candidacy, the student in consultation with his or her advisor will appoint a dissertation committee comprising the chair and a minimum of three faculty members. The dissertation advisor and composition of the committee will be subject to approval by the faculty. The dissertation advisor will be responsible for overseeing the research and writing of the doctoral dissertation. The committee will review drafts of the dissertation and, when the dissertation is completed to its satisfaction, will conduct the final exam, which will be based on the doctoral dissertation and related materials. The final examination will be open to the public.

Overview
The special responsibility of historical studies is understanding the past. History courses integrate many branches of knowledge, cutting across the lines of the social sciences and the humanities, and even the natural sciences. Identifying forces of stability and processes of change, history students develop their research, writing and analytical skills, which serve them well beyond their university years.

Graduate students in history develop skills in critical thinking, writing and independent research. Our program prepares students for a wide variety of professions, including teaching, government service, museum and archive management, and historic preservation, as well as further degree work in history, law, librarianship and business. The department expects that students graduating with an MA in history will master the following general skills for their degrees:

• The ability to pursue independent historical research projects
• The ability to analyze historiographical arguments
• The ability to analyze primary documents and develop arguments from them
• The ability to create bibliographies using archival, library, and Internet resources
• The ability to write in a variety of formats, including historiographical essays, book reviews, and research papers

Students will also master knowledge of the basic historical content of both their major and minor fields, and an understanding of the historiographies and historical methods in their major and minor fields.

Admission Requirements
• In addition to the general graduate students admission requirements, the Department of History requires an undergraduate GPA of at least 3.25.
• Applicants are required to submit a sample of written work, usually a term paper or project of similar length.
• All applications must include three letters of recommendation, preferably from college or university faculty.
• Applicants should address any gaps, weaknesses, or special circumstances in their academic records in the statement of purpose portion of the application. In special circumstances, the department may modify its admission standards.

Application Deadlines

Carl E. Pletsch, PhD, University of Chicago
Myra L. Rich, PhD, Yale University
James B. Whiteside, PhD, University of Colorado
James B. Wolf, PhD, University of California, Los Angeles
History (HIST)

HIST 5002 - Race, Gender and Religious Nationalisms in Asia and the US (3 Credits)
This course investigates ideologies and practices of race, caste, ethnicity, and gender at the foundations of several contemporary religious nationalist movements in Asia and the US. The course focuses first on the ways that religious ideologies and practices of gender help to define and police the borders of race, caste, and ethnicity as social identities. We will examine how these ideologies emerge in religious texts and how they have been challenged in literature and practice, both historically and in the modern era, while privileging the works, voices, and perspectives of women and queer caste-oppressed and racialized philosophers, activists, and thinkers. The course then seeks to give students conceptual and theoretical foundations to understand the relationship between race/caste/ethnicity and gender in religious nationalism, while presenting case studies from Asia and the US to reflect on and challenge these models. Students will have the opportunity to conduct further research into these issues in Asia, the US, and other parts of the world. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 4002, CHIN 4002, ETST 4002, INTS 4002, and RLST 4002. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HIST 5003 - From Buddha to BlackLivesMatter: The Past and Future of Nonviolence (3 Credits)
Why is “Nonviolence” central to many of the religious traditions of South Asia? What has nonviolence looked like historically and how has its meaning and practice changed in the modern world? In traditions such as Hinduism, Jainism, and Buddhism, the practice of nonviolence relates to ethics through concepts of “karma”-our actions. This course begins with an investigation of the theories of karma and the roles they play in these traditions’ ideas about the self, the other, and the world. We will take a focused look at the way each tradition regards the idea and practice of ahimsa, nonviolence, as both an ethical and personal good. That is, how does each tradition consider what is proper social action and how do they relate it to the attainment of salvation (i.e. moksha, nirvana)? The course puts Indian thought in conversation with western philosophies to question how we might develop a critical vocabulary for the comparative study of ethics. Turning to the modern era, we will examine Gandhi’s philosophy and practice of nonviolent action in the anti-colonial struggle for India’s independence, as well as how Rev. Dr. Martin Luther King adapted Gandhi’s ideas to the struggle for civil rights in the US. Finally, we will examine recent critiques of nonviolence from American philosophers, activists, and communities of color to see ways that nonviolence continues to play a role in rethinking major issues for fostering equality and equity in the US and global contexts, including policing and religious and ethnic nationalism. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with ETST 3003, HIST 3003, INTS 3003, PHIL 3003, and RLST 3003. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HIST 5027 - Enlightenment and Revolution (3 Credits)
In this course students explore the relationship of ideas and events in Europe during the 17th and 18th centuries. Modernizing trends in the European economy, religion, science, states and international affairs leading up to the French Revolution. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 4027. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5028 - Nations and Classes: 19th Century Europe (3 Credits)
Focuses on material and ideological changes in 19th century Europe, exploring social, cultural, political, economic, and intellectual developments. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4028. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5029 - Age of Anxiety in Europe (3 Credits)
Looks at Europe at the end of the nineteenth century in an effort to determine if there is any relation between the peculiarities in culture at the time and the horrors in politics that followed. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4029. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5030 - Europe During the World Wars (3 Credits)
Covers the history of the two world wars and their origins, political and social upheaval during the interwar economic crisis, the rise of communism, Italian fascism and Nazism, with an emphasis on cultural production and intellectual life. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4030. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5032 - Globalization in World History Since 1945 (3 Credits)
An interdisciplinary course on contemporary world history and globalization. While the course is historically structured, economic, political, and sociological matters are explored. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4032. Term offered: fall, spring, summer. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5035 - Crisis and Transformation: Europe's 20th Century (3 Credits)
This course examines 20th century European history focusing on themes of crisis and transformation. We will explore how devastating wars, economic depression, stark ideological divisions, and revolutionary social, political and cultural movements dramatically changed Europe over the course of the century. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4035. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
HIST 5046 - Victorians and Victorianism (3 Credits)
Taking an interdisciplinary perspective, this course examines English people and English life during the reign of Queen Victoria, 1837-1901. What were the defining features of the Victorian age? What did it mean to be “Victorian”? When and why did the Victorian paradigm break down? Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4046. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5051 - Britain and The Empire (3 Credits)
Examines 19th and 20th century British history, addressing social, cultural, and political themes. Explores industrialization, state growth, and imperialism; relationships between race, gender, and class; and the ways in which colonizers and the colonized experienced empire. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4051. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5055 - The Atlantic Slave Trade: Africa, Caribbean and U.S. (3 Credits)
Presents a broad overview of the slave trade in the Atlantic World, including discussion of the slave plantation, the creation of Caribbean societies and the consequences of independence from Britain. Restriction: Restricted to Graduate Level students.
Cross-listed with HIST 4055. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5062 - Modern France: 1789 to the Present (3 Credits)
Considers the shaping of modern France from the 18th century Bourbon Monarchy and aristocratic society to today’s liberal democracy, in which multiculturalism, globalization and supranational institutions call into question the very nature of French identity. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4062. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5071 - Modern Germany (3 Credits)
Surveys the major political, institutional, social, economic, and cultural developments that have occurred in Germany since the late 18th century. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA).
Cross-listed with HIST 4071. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5074 - Post-War Germany (3 Credits)
Historical survey of Germany since the second world war, with an emphasis on culture and society. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4074. Term offered: Spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HIST 5075 - Travel Stories and Origins of Cultural Anthropology (3 Credits)
Examines the early history of cultural anthropology by means of classic travel literature. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4075. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5076 - History of Modern Science (3 Credits)
Surveys the history of science from the 18th century to the present. Treats all disciplines, from physics to physiology, in an attempt to understand how the natural world came to dominate our sense of ourselves. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4076. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5083 - Russia Since 1917 (3 Credits)
Studies the development of the Soviet Union from its formation in the October Revolution, through the Civil War, the new economic policy, industrialization, collectivism, the Stalinist purges, up to the present. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4083. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5133 - Management of Material Culture and Museum Collections (3 Credits)
This course provides in-depth knowledge of the rudiments of material culture documentation, preservation and management. While we have designed this class for those interested in working in history museums, this is also appropriate for those students who want to learn the place of artifacts in studying history. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4133. Term offered: Spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HIST 5201 - Core Themes in U.S. History (3 Credits)
This course surveys major themes in U.S. history. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4201. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5209 - Race, Religion, and Belonging (3 Credits)
Race/ethnicity and religion are conconstitutive social and cultural formations that have played a fundamental part in determining the boundaries of belonging of the United States. In this course, students will interrogate when, why and how race/ethnicity and religion have been used to delineate borders, determine citizenship, navigate legal classifications, dictate social mobility, and regulate economic possibilities. We will analyze both primary sources such as sermons, reality TV shows, court cases and graphic images as well as scholarly writing to explore how formations of race and religion have shaped notions of belonging in the US nation-state, thereby constructing the boundaries of the state itself. Cross-listed with ETST 4030, ETST 5030, RLST 4030, RLST 5030 and HIST 4209. Restriction: Graduate standing or instructor permission required to enroll. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HIST 5210 - The American Revolution (3 Credits)
The crisis of the British Empire in North America from the end of the French and Indian War to the ratification of the American Constitution. Topics include the emerging economy, constitutional arguments against Britain, the conduct of the war, and the definition of a republic. Restriction: Restricted to Graduate and Graduate Non-Degree majors.
Cross-listed with HIST 4210. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5240 - National Parks History (3 Credits)
Introduces how the National Park Service uses history to identify, designate, preserve, and interpret America’s most outstanding historic and natural history sites. After tours of NPS sites, students select from a wide range of projects. Note: Open to all students. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4240. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5244 - Interpretation of History in Museums: Exhibits and Education (3 Credits)
This course allows students to gain in-depth knowledge of historical interpretation through exhibits and education in a museum setting. This class is designed for those preparing to work in history museums but is also appropriate for teachers and others who want to learn how museum programs interpret history with artifacts and other historical materials. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HIST 4244. Term offered: fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall.

HIST 5250 - Introduction to Digital Studies (3 Credits)
Develop marketable skills such as building websites, making interactive maps, recording podcasts, and analyzing data while also studying the cultural and ethical dimensions of these technologies. Cross-listed with HIST 3260, COMM 3081, and COMM 5081. Term offered: spring. Max hours: 3 Credits.
Grading Basis: Letter Grade
Typically Offered: Spring.

HIST 5261 - Working With Data (3 Credits)
Teaches the technical skills of data collection, processing, analysis, and visualization, along with the history and ethics of how societies, corporations, and governments have used and abused data over time. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 4261. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5306 - Survey of Feminist Thought (3 Credits)
Examines changes and continuities in feminist thought from the 18th century to the present, using historical and literary materials. Explores the ways that women’s characteristics, experiences, and capabilities have been understood and challenged. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with ENGL 4306, 5306, HIST 4306, WGST 4306, 5306. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5307 - History of Sexuality (3 Credits)
Explores the relationships between gender and norms, sexual practice, and ideas about sexuality in Europe and the United States. Examines how sex and sexuality have changed over time and how those changes relate to social, cultural, political, and economic history. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4307 and WGST 4307/5307. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HIST 5308 - Crime, Policing, and Justice in American History (3 Credits)
Focuses on changing legal and cultural definitions of crime, the role of the police, the evolution of punishment in theory and practice, and the role of mass culture in shaping the social history of crime and justice. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4308. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HIST 5343 - Women & Gender in US History (3 Credits)
This course will explore women and gender as drivers of US history. From politics to popular culture, jobs to sexual empowerment, civil rights to economic restructuring, we will use gender as a lens to re-envision familiar stories about American history. Cross-listed with HIST 3343, WGST 3343, and WGST 5343. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5348 - Mind and Malady: A History of Mental Illness (3 Credits)
Examines the history of mental illness from the mid-18th century to the present, focusing on the institutionalization of the mentally ill, the origin of psychiatry, the development of models of mental illness and the evolution of clinical treatment. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4348. Max Hours: 3 Credits.
Grading Basis: Letter Grade

HIST 5350 - Colonial Latin America (3 Credits)
Surveys the creation of colonial empires by Spain and Portugal, 1492-1808. Topics include Native American responses to European incursions, women in colonial society, and slavery in Latin America. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 3350 and ETST 3350. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Spring.

HIST 5356 - Nature and Power in American History (3 Credits)
This course explores the relationships between human societies and environmental change in the history of North America. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 3356. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5411 - Modern Mexico (3 Credits)
Designed to familiarize students with the critical issues in Mexican political, economic and social history. Traces the emergence of independence and the difficult consolidation of an independent nation state. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4411, ETST 4411. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Grading Basis: Letter Grade
Max hours: 3 Credits.

everyday living intertwined with politics. Restriction: Restricted to scholarship. This course pays particular attention to the ways people's (1949-1976) through an exploration of material culture, movies and

Introduces students to ordinary people's daily life in Mao's China

Typically Offered: Spring.

Typically Offered: Spring.

A general introduction to the history of China from the advent of historic civilization to the point of the great encounter with the West. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4420. Max hours: 3 Credits.

Typically Offered: Spring.

Cross-listed with HIST 4421 and CHIN 4421. Max hours: 3 Credits.

Cross-listed with HIST 4417. Max hours: 3 Credits.

Cross-listed with HIST 4415. Max hours: 3 Credits.

Cross-listed with HIST 4417. Max hours: 3 Credits.

Cross-listed with HIST 4412. Term offered: spring. Max Hours: 3 Credits.

Cross-listed with HIST 4462, RLST 4462, RLST 5462. Term offered: spring. Max Hours: 3 Credits.

Cross-listed with HIST 4451. Max Hours: 3 Credits.

Cross-listed with HIST 4455. Term offered: fall. Max Hours: 3 Credits.

Cross-listed with HIST 3460. Max hours: 3 Credits.

Cross-listed with HIST 4451. Term offered: spring. Max Hours: 3 Credits.
HIST 5475 - The Vietnam War (3 Credits)
Covers the conflict in Vietnam, with roots in the period prior to World War II. Main topics include the rise of nationalism in French Indochina, the war against the French, the Northern moves to unify Vietnam, American intervention, and eventual victory of the Northern regime. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4475. Term offered: spring. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Spring.

HIST 5490 - Weapons of Mass Destruction (3 Credits)
Weapons of mass destruction have affected politics, health, and environments around the globe. This course will examine the development, use, and consequences of these modern technologies of war and terror. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDGR-NHL and NDGR-NLA). Cross-listed with HIST 4490. Term offered: summer, fall. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Summer.

HIST 5494 - Red and Blue America: U.S. History, 1973-Present (3 Credits)
This course explores American history during a period of immense cultural and political polarization. After 1973, the United States experienced the rise of the New Right, changing attitudes towards sexual "permissiveness," and rapid advancements in technology. Both "law-and-order" politics and the rights campaigns led by immigrants, women, people of color, and LGBTQ+ peoples all reshaped democracy. These developments in the United States, meanwhile, influenced and were shaped by the nation’s "hot" and "cold" conflicts in Europe, Latin America, the Middle East, and the rest of the globe. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed HIST 4494, WGST 4494, and WGST 5494. Term offered: fall. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
Typically Offered: Fall, Summer.

HIST 5616 - Global History of Energy (3 Credits)
Explores the history of human energy use on local, national, and international scales, examining its social, political, and economic effects, and its implications for the environment. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Cross-listed with HIST 3616. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors
HIST 5621 - Explorers and Exploration (3 Credits)
Examines the history of travel and exploration from the 13th century to the present. Readings draw primarily from first-person accounts to understand why people voyage, what they hope to discover, and what happens to them along the way. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4621. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5622 - Oceans In History (3 Credits)
Explores transoceanic exchanges, relations, and transformations in modern world history. Examines how historians analyze and conceptualize global interactions. Topics include voluntary and forced migrations, resistance and revolution, transoceanic economic relations, piracy, and environmental change. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4622. Max Hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5645 - Archival Management (3 Credits)
This course studies theory and principles pertaining to the management of current and non-current records, public and private archival materials, as well as the administration of archival manuscript depositories for housing records of historical value. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4645. Max hours: 3 Credits.
Grading Basis: Letter Grade
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5810 - Special Topics (1-3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Cross-listed with HIST 4810. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Restriction: Restricted to Graduate and Graduate Non-Degree Majors

HIST 5840 - Independent Study: History (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.

HIST 5880 - Directed Research (1-6 Credits)
Students will engage in original research projects supervised and mentored by faculty. Students must work with faculty prior to registration to develop a proposal for their project and receive permission to take this course. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 6 Credits.
Grading Basis: Letter Grade
Typically Offered: Fall, Spring, Summer.

HIST 5939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max Hours: 9 Credits.
Grading Basis: Letter Grade
Repeatable. Max Credits: 9.
Typically Offered: Fall, Spring, Summer.
HIST 5995 - Global Study Topics (1-15 Credits)
This course is reserved for CU Denver faculty-led study abroad experiences. The course topic will vary based on the location and course content. Students register through the Office of Global Education. Restriction: Restricted to Graduate and Graduate Non-Degree majors. Repeatable. Max Hours: 15 Credits. Grading Basis: Letter Grade

HIST 6013 - Introduction to the Professional Study of History (3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall. Max hours: 3 Credits. Grading Basis: Letter Grade

HIST 6014 - Graduate Research: Special Topics (1-6 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Typically Offered: Fall, Spring, Summer. Repeatable. Max Hours: 6 Credits. Grading Basis: Letter Grade with IP

HIST 6840 - Independent Study: HIST (1-3 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 9 Credits. Grading Basis: Letter Grade

HIST 6930 - Master’s Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade with IP

HIST 6931 - Readings: Special Subjects in History (3 Credits)
Readings in topics in history with varying subtitles reflecting course content. Restriction: Restricted to Graduate and Graduate Non-Degree Majors. Term offered: fall, spring. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade

HIST 6939 - Internship (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Repeatable. Term offered: spring, summer, fall. Max Hours: 9 Credits. Grading Basis: Letter Grade

HIST 6950 - Master’s Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade with IP

HIST 6951 - Masters Project: Advanced History Curriculum Development (1-6 Credits)
Students develop curricula for secondary-level history courses; must demonstrate thorough knowledge of subjects; understanding of historiographic and methodological problems; command of primary sources and their uses in teaching; and describe teaching strategies, methods, and assessments to be used in the curricula. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Prereq: Permission of instructor. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade with IP

HIST 6952 - Master's Project: Public History (1-6 Credits)
Public history students may use one to six credits to complete a single public history project. Projects can entail creating an exhibit, organizing a museum or archival collection, conducting a preservation survey or similar activities. Students are required to prepare a paper describing the process and results of the project. Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade with IP

HIST 6953 - Master’s Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade with IP

HIST 6954 - Master’s Thesis (1-6 Credits)
Note: Students must submit a special processing form completely filled out and signed by the student and faculty member, describing the course expectations, assignments and outcomes, to the CLAS Graduate Academic Services Coordinator for approval. Term offered: fall, spring, summer. Repeatable. Max hours: 6 Credits. Grading Basis: Letter Grade with IP

HIST 6971 - Seminar: Special Subjects in History (3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Repeatable. Max hours: 9 Credits. Grading Basis: Letter Grade

HIST 6989 - Seminar: Special Subjects in History (3 Credits)
Restriction: Restricted to Graduate and Graduate Non-Degree majors. Term offered: fall, spring. Repeatable. Max hours: 9 Credits. Grading Basis: Letter Grade

HIST 6990 - Seminar: Colorado Studies (1-6 Credits)
This advanced interdisciplinary seminar on Colorado starts with a survey of the published literature. Students then select a research topic of their own and complete a publishable paper using primary sources. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDQR-NHL and NDQR-NLA). Max Hours: 3 Credits. Grading Basis: Letter Grade

HIST 6992 - Seminar: Colorado Studies (3 Credits)
This advanced interdisciplinary seminar on Colorado starts with a survey of the published literature. Students then select a research topic of their own and complete a publishable paper using primary sources. Restriction: Restricted to Graduate and Graduate Non-Degree majors (NDQR-NHL and NDQR-NLA). Max Hours: 3 Credits. Grading Basis: Letter Grade

Restriction: Restricted to Graduate and Graduate Non-Degree Majors
History, MA

Introduction

Please click here to see the History department’s information

The master of arts in history requires 36 semester hours (12 courses). Students applying for admission to the program should have some background in history, though not necessarily a BA in the subject. The department encourages applications from individuals of any age interested in continuing or resuming their education. Graduate students in history develop skills in critical thinking, writing and independent research. Our program prepares students for a wide variety of professions, including teaching, government service, museum and archive management, and historic preservation, as well as further degree work in history, law, librarianship and business. The department expects that students graduating with an MA in history will master the following general skills for their degrees:

- The ability to pursue independent historical research projects
- The ability to analyze historiographical arguments
- The ability to analyze primary documents and develop arguments from them
- The ability to create bibliographies using archival, library, and Internet resources
- The ability to write in a variety of formats, including historiographical essays, book reviews, and research papers

Students will also master knowledge of the basic historical content of both their major and minor fields, and an understanding of the historiographies and historical methods in their major and minor fields.

Graduate Advising

Early in their first semester, students should contact the history department graduate advisor to discuss their path through the program and to receive advice regarding the selection of major and minor fields.

Degree Tracking Responsibility

Although faculty will provide reasonable guidance, it is up to students to monitor their own progress through the program in consultation with the graduate advisor and their major and minor advisors; this includes knowledge and understanding of application and graduate deadlines, degree requirements, comprehensive exam expectations and processes, thesis guidelines, etc.

Major Fields, Minor Fields, and Concentrations

The MA in history seeks to provide students with a balance of breadth and depth in the study of history. Major fields are broad areas of study within which students gain a general picture of historical processes. Concentrations provide focus for developing expertise within the major, either regionally or thematically. Minor fields provide a complementary or comparative area and must sit outside the major field.

Advisors and students together will work out Plans of Study, which indicate the courses students intend to take to meet their requirements, based on their selection of major and minor fields. Students should make every effort to enroll in courses that best fit their major field, major concentration and minor field.

The department has core readings for the Public History and US History fields. Students will draw on these readings for their comprehensive exams. Students working in all fields will coordinate their readings with their major and minor advisors.

Major Field Concentrations

Students work with advisors to select one of the major field concentrations listed below. Concentrations provide thematic or regional focus to a broad geographical or methodological major (e.g. for the global history major, students could concentrate on trade, borders, imperialism, etc. or any of the areas of regional expertise of our faculty). Readings for the major field concentration are in addition to the core reading list. Note that students may select their concentrations and the options for minors from the same lists.

Minor Fields

Students can define their minor field as a specialization within one of the four major fields or as topics from the list of concentrations. Note that students may select their concentrations and the options for minors from the same lists.

Choosing Advisors and Fields of Study

All history MA candidates choose a major field and a minor field. Students will take courses in these fields and will be tested in these fields. After consulting with the graduate advisor, students are responsible for securing two field advisors, one to oversee their progress in the major field, the other to oversee their minor field. All students should have chosen their fields and advisors by the end of the semester in which they have complete 12 credit hours. Students will also need a third advisor for the comprehensive examinations. This third advisor is typically in their major field and students should always consult with them during preparation for the examinations.

These program requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their program advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 36 credits from approved courses.
2. Students must complete all credits for the degree at the graduate (5000 or higher) level, with a minimum of 18 credits at the 6000 level.
3. Students must earn a minimum grade of B- (2.7) in all major courses taken at CU Denver and must achieve a minimum cumulative major GPA of 3.0. All graded attempts in required and elective courses are calculated in the major GPA. Students cannot complete major or ancillary course requirements as P+/P/F or S/U.
4. All credits for the degree must be completed with CU Denver faculty. A maximum of 12 credits of relevant graduate work may be transferred from another university with the program director’s approval.
Program Restrictions, Allowances and Recommendations

1. With approval from the graduate advisor and the appropriate faculty, students may transfer up to nine graduate-level credits accrued before enrollment in the CU Denver MA history degree program, provided that they earned a grade of B+ or better in these courses. Students must submit a syllabus for each course they wish to transfer, and faculty may require students to complete additional assignments to meet the expectations of the department. The department will not accept transfer of courses comparable to HIST 6013, Introduction to the Professional Study of History.

2. Students who undertake their master’s program when they are already teachers can choose to construct curriculum projects relevant to their teaching practice.

Students will not be allowed to fulfill the research seminar requirement with an independent study or internship. Any independent study or internship at the 6000-level needs the permission of the graduate advisor. Students interested in pursuing an independent study or internship must find a faculty member willing to oversee their work, and they should expect the workload to equal or exceed that required for other courses at the same level.

Complete six elective credit hours of graduate level HIST courses.

Students should use electives to explore other fields and identify a second field advisor for your capstone project. Elective courses are opportunities to explore secondary thematic or geographical fields that intersect with major fields and capstone projects.

If the student has sufficient 6000-level credits to graduate, the extra elective does not need to be a 6000-level course.

Complete three credit hours from the following Public History electives.

This will allow you to think intentionally about how you would like to disseminate your work.

<tbody>
<tr>
<td>Complete six credits of the following:</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>HIST 6950  Master's Thesis</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total Hours 6

Students writing theses are expected to develop an original research agenda resulting in an extended paper. Students work with their major field advisor, who will help guide them through the process of research and writing. Before registering for HIST 6950 Master's Thesis, students should have a thesis proposal and initial bibliography approved by their major advisor.

A thesis is evaluated by a committee of three faculty, including the major advisor and two other faculty members chosen by the student in consultation with the major advisor. Upon completion of the thesis, the student meets with the committee members, who ask questions about the research and conclusions which the student must defend. In most instances, the committee will require further revisions, sometimes major in scope, before the thesis is accepted and cleared for submission to the Graduate School in fulfillment of degree requirements.

**Project Requirements**

<table>

<tr>
<td>Complete six credits of the following:</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>HIST 6952  Master's Project: Public History</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total Hours 6

In lieu of a thesis, public history majors may choose to enroll in three credit hours of HIST 6952 Master's Project: Public History to complete a public history project. Projects, which are usually conducted in collaboration with a public history organization, can entail creating an exhibit, developing a museum master plan or organizing an archival collection, conducting a preservation survey, or other activities as approved by their advisor. Students are required to prepare an analytical paper describing the process and results of their project.

**Curriculum Projects**

<table>

</tr>
</thead>
<tbody>
<tr>
<td>Complete six credit hours of the following:</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>HIST 6951  Masters Project: Advanced History Curriculum Development</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total Hours 6

Licensed teachers and students who intend to become teachers may choose to complete a curriculum development project. Students arrange curriculum development projects with a sponsoring faculty member. Generally, students are expected to develop and submit a complete course curriculum plan for each 3-semester-hour project. Projects need to show evidence of familiarity with the relevant historiographies and primary sources. Students may apply the hours from HIST 6951 Masters Project: Advanced History Curriculum Development to either the major field or the minor field, depending on the project subjects. Curriculum plans must meet minimum criteria established by the history department in the document Advanced History Curriculum Development Projects.

Public History, MA in History

Introduction

Please click here to see the History department’s information.

The MA program in history offers graduate-level major and minor fields in public history. Public history is a field of study that applies historical methods to the public sphere. This graduate major requires a concentration, in either museum studies or historic preservation. Public history majors can minor in any sub-specialty the department currently offers. Students majoring in U.S., European or Global history can also minor in public history.

These degree requirements are subject to periodic revision by the academic department, and the College of Liberal Arts and Sciences reserves the right to make exceptions and substitutions as judged necessary in individual cases. Therefore, the College strongly urges students to consult regularly with their Public History faculty advisor to confirm the best plans of study before finalizing them.

Graduate Education Policies and Procedures apply to this program.

Program Requirements

1. Students must complete a minimum of 36 credit hours from approved courses.
2. Students must complete all courses at the graduate (5000-level and higher). A minimum of 18 credit hours must be completed at the 6000 level or higher.
3. Students must earn a minimum grade of B- (2.7) in all courses taken at CU Denver and must achieve a minimum cumulative GPA of 3.0. All graded attempts in required and elective courses are calculated in the GPA. Courses taken using P+/P/F or S/U grading cannot apply to degree requirements.
4. Students must complete all credits with CU Denver faculty.

Complete six additional graduate level HIST courses. Students may select additional courses from the list above or to explore secondary thematic or geographical fields that intersect with interests and their capstone project.

Project Requirements

Students must complete either a thesis or project.

Thesis Requirements (p. 426)

Students interested in pursuing an independent study or internship must find a faculty member willing to oversee their work, and they should expect the workload to equal or exceed that required for other courses at the same level.

1 Independent Studies and/or Internships
Candidates may register for up to six hours of internships or independent study by taking HIST 5840 Independent Study. History, HIST 6840 Independent Study: HIST, or HIST 6939 Internship, only one of which may be at the 6000-level. Students will not be allowed to satisfy the research seminar requirement via independent study. Any independent study or internship at the 6000-level needs the permission of the graduate advisor. Students interested in pursuing an independent study or internship must find a faculty member willing to oversee their work, and they should expect the workload to equal or exceed that required for other courses at the same level.

2 Students who undertake their master’s program when they are already teachers can choose to construct curriculum projects relevant to their teaching practice.

Students must complete HIST 6989 Seminar: Special Subjects in History before starting the Capstone. For the thesis, semester one consists of preliminary research: identifying historiographical trends and locating sources for your project. For the project, semester one consists of preliminary research: identifying historiographical trends, identifying a community partner, developing an action plan, and locating resources for your project. At the end of the semester students will prepare and present a Research Prospectus to their committee. In semester two, students complete and defend their thesis or project.
