Interim Report on Examinee Performance between 2023 - 2025

This report presents overall results for examinees from your medical school taking Step 2 CK of the United States Medical Licensing Examination (USMLE[®]) from July 1, 2025 to February 13, 2026. If available, data from your previous two full academic years are also presented. Examinees who asked that their individual results be withheld are excluded from the school data for this report, unless the number of examinees making this request within an academic year was five or greater.

The tables below describe your examinees' performance along with the national group of examinees from LCME-accredited schools*. The first table summarizes performance for first-time examinees. The second table shows performance for examinees who failed Step 2 CK in the academic year but repeated the examination later in the same year. This table only includes the most recent attempt for examinees repeating the examination multiple times within the same academic year.

Please visit the [MyNBME[®] Services Portal](#) for additional guidance on interpreting the various sections of this report.
