Agenda:

Introductions

Admission Life Cycle Spreadsheet

Thank you for submissions, Registrar's Office to apply this information for future planning purposes

Admissions/UIS Processes (Phillip Curry)

CU-SIS Duplicate Record Submission Process

PeopleTools 8.58 and Campus Solutions Admin Fluid

Moving to PeopleTools 8.58 in February 2021 (see subsequent page for screenshots)

Classic configuration in February

Targeting full fluid in October 2021

What do you need from UIS to make the transition to fluid more successful?

Continuous feedback is appreciated!

Residency Updates

Academic Catalog Updates

Registrar's Office to work with individual programs to verify admission information for catalog

Miscellaneous Updates

Update on new Registrar site redirect links: Redirects in place for the next couple months; recommended to update any linking sites as soon as possible to maintain continuity

CU-SIS “Fluid” Configuration

February 2021

Current experience

Example #1:

- ICS experience “A”
- **Summary:** Classic home, classic branding and breadcrumbs

Positives:

- Fastest path to PT8.55
- Least amount of near-term work

Negatives:

- Would be moving to a situation where Classic Navigation is out of support

Thoughts:

- Would still need a long-term plan to move to Fluid navigation

The screenshot shows two views of the current CU-SIS interface. On the left is the 'Home page' which features a top navigation bar with 'Home', 'Worklist', 'MultiChannel Console', 'Add to Favorites', and 'Sign Out'. Below this is a search bar and a large, multi-level navigation menu on the left side. The main content area is mostly blank. On the right is the 'Content Page' showing a 'Person Information' record for a student. The record includes fields for 'Biographical Details', 'Addresses', 'Regional', 'Person Information', 'Biographical History', 'National ID', and 'Contact Information'. The interface has a classic, somewhat cluttered look with many buttons and links.

October 2021

Fluid Branding / Fluid home

Example #5:

- Intermediate ICS experience “E”
- **Summary:** Fluid home (with homepages), fluid branding and Navigator (no breadcrumbs). Content page shown with a navigation collection

Positives:

- Moves Admin to Future-State
- Advanced UX Possibilities

Negatives:

- Must develop Business Process based navigation

Thoughts:

- Would allow to remain in support.
- Admin: Long-Term Solution
- Student: ?-Term Solution

The screenshot shows two views of the proposed fluid branding interface. On the left is the 'Home page' which features a top navigation bar with 'Campus Solutions Administrator' and a search icon. Below this is a grid of six service tiles: 'Student Customer Service', 'Campus Community', 'Recruiting and Admissions', 'Student Records', 'Financial Aid', and 'Student Financials'. The tiles are modern and use icons. On the right is the 'Content Page' showing a 'Person Information' record. The record is similar to the current interface but has a more modern, clean look with a 'Campus Community Collection' header. The interface is more streamlined and user-friendly.
