## Faculty Assembly Candidate Statement – Secretary 2026

I have been committed to supporting faculty needs since I became part of the Lynx community. Such a commitment has allowed me to work with different faculty groups and leaders, which has led to implementing research-informed data collection methods. Being able to take on this work at a larger capacity would allow me to engage across campus in a more formal manner and embrace a different avenue of committing to faculty needs. For me, it is about listening and implementing action pertaining to the diverse needs of faculty- not just about my experience and school. I am thankful for the work that FA has and continues to do. Being able to work along some amazing folx, many of whom would be new community members to me is exciting as I am always eager to learn from others. I also would like to highlight that I am confident in serving as a secretary not only because of the passion, communication, and investment I hold for faculty but also because I value collaboration (I know we can learn from our broader community-students and staff) and because I serve as a secretary in two other capacities (something I will touch on during my three minute campaign speech on 5/5). It would be an honor to support faculty at a larger level and champion the diverse needs of us all-this is an honor I would not take lightly, as I invite inquiry and being called in.
