

Dr. Dennis DeBay, Ph.D., serves as an Assistant Professor of STEM Education at the University of Colorado Denver. With over a decade of high school teaching experience, he obtained his PhD in Curriculum and Instruction, specializing in Mathematics Education from Boston College. Dr. DeBay passionately humanizes math education for diverse learners, utilizing play and technology to foster inclusive learning environments. He directs ThinkStudio, aligning his work with CU Denver's strategic goals to become the nation's first equity-serving institution and a university for life, where learning is accessible across diverse life stages and career paths, catalyzing social mobility and nurturing a dynamic workforce for the future.
