

# TECH FOR TYKES

A Center for Inclusive Design and Engineering (CIDE)  
Early Childhood Program

Early Intervention  
COLORADO

COLORADO  
Department of Early Childhood

## ANNUAL DATA REPORT June 22, 2022 - June 21, 2023

Tech for Tykes is a groundbreaking program that is changing the lives of young children with disabilities through the use of assistive technology (AT). Children with developmental delays or disabilities often have difficulty playing and interacting with the world around them. AT provides them with opportunities to be active participants in life rather than passive bystanders.

### Assistive Technology Loan Library

**553** Devices borrowed
