

ASTROLABE DIAGNOSTICS

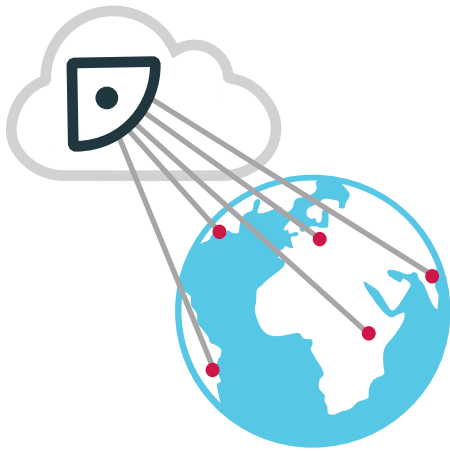

Transforming Data to Insights

The Astrolabe Cytometry Platform is a cloud-based solution for analyzing single-cell data. Astrolabe is unique with its emphasis on bioinformatics, getting you from data to insights in just a few hours. It's like having a computational biologist doing the heavy lifting for you!

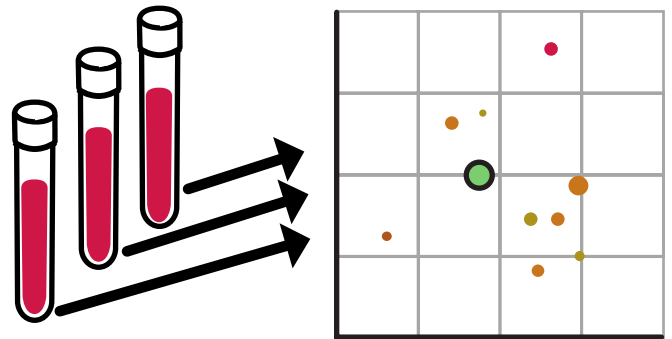

Fast and Scalable

Astrolabe harnesses the power of Amazon Web Services to provide you with fast results wherever you are in the world.

Powerful Statistics

We combine state-of-the-art machine learning with literature-based analytics. Delve into individual sample data or find statistically-supported insights with our composite experiment tools.

I am happy that the Immune Monitoring Center has partnered with Astrolabe. I cannot emphasize how much time it has saved me personally -- JC Villasboas Bisneto, M.D.
