

Tricuspid Annular Plane Systolic Excursion (TAPSE)

Summary of important TTE views

RV metrics	Views	Notes
Qualitative systolic function	<ul style="list-style-type: none"> - Parasternal short axis of basal RV (RV inflow&outflow) - Parasternal short axis of basal RV (at pap muscle level) - Parasternal long axis - Apical 4C view 	Grade as normal, mild, moderate, or severe systolic dysfunction
TAPSE	Apical 4C view	Using M-mode through lateral annulus

Thank you!
