

## Pediatric Residency Program, University of Colorado Welcome Letter

Our program provides a broad and truly outstanding pediatric educational experience. The program includes clinical rotations at Children's Hospital Colorado (consistently ranked in the Top 10 in the country), Denver Health (a unique, comprehensive community health center), and the University of Colorado Hospital.

Children's Hospital Colorado and the University of Colorado Hospital feature state-of-the-art facilities together on the Anschutz Medical Campus in Aurora, the eastern part of metropolitan Denver. This provides a tremendous environment for our patients and your education. Your education will include exposure to a full spectrum of pediatric clinical problems in a challenging and stimulating learning environment. This includes the most common pediatric problems such as asthma and gastroenteritis as well as the most severe and unusual pediatric illnesses.

The faculty of the Department of Pediatrics are leaders in their respective fields. You will find faculty with a focus on subspecialty clinical care, primary care, research, education and advocacy. The interactions between residents and faculty are consistently rated as one of the most important and stimulating parts of our program.

I can tell you that Denver is a wonderful place to live. It combines the elements of a cosmopolitan city environment and all of the outdoor activities available year round in the Rocky Mountains. I look forward to meeting you in person and sharing my enthusiasm for pediatric programs in Denver with you. I know that you will be as excited as I am about the educational and career development opportunities here.

Sincerely,

Stephen R. Daniels, MD, PhD  
Chairman, Department of Pediatrics

## Pediatric Residency Program, University of Colorado Welcome Letter

Our program is designed to offer stimulating and comprehensive educational training in the specialty of pediatrics. It attracts a pediatric population that allows residents exposure to all major acute and chronic diseases of childhood. The program provides a broad educational experience that includes clinical rotations at Children's Hospital Colorado, Denver Health, and the University of Colorado Hospital.

Denver is a regional referral center, caring for children from a 500,000 square mile area. As a result, our residents are exposed to a tremendous range of problems, from core "bread and butter" pediatrics to the most challenging and unusual cases.

We have more than 850 full-time faculty at our main and affiliated institutions and more than 500 clinical faculty members, many of whom you will meet and befriend. The diversity of the faculty and the residents assures an exciting learning environment that thrives on challenging questions and new approaches to pediatric issues. Denver is also a wonderful place to be. Denverites take advantage of both a sophisticated city and the incomparable mountains of Colorado.

We are committed to maintaining and expanding our role as pediatricians and advocates for children in the world. We are proud of the fact that four CU physicians have served as president of the American Academy of Pediatrics in the past 25 years. We hope you will find time to visit our program in the near future and look forward to meeting you at that time.

Sincerely,

Adam A. Rosenberg, MD  
Residency Program Director
