## **CULTURAL DIVERSITY GENERAL EDUCATION LEARNING OUTCOMES AND ASSESSMENT RUBRICS**

By cultural diversity we mean the diversity of social and cultural contexts in which humans live their everyday lives. The goal of the cultural diversity requirement is for students to examine issues of race, ethnicity, religion, socioeconomic status/background, gender, age, disability, physical characteristics, and sexuality, with an emphasis on the United States; to understand the contributions of diverse populations to the modern world; and to understand the impact of power relations on individuals and communities.

In the Cultural Diversity core area, students will be able to:

- 1) *Marginalization*. Explain theories and histories of marginalization and discrimination and their effects on contemporary events and future implications.
- 2) *Social Access and Rights*. Analyze how diverse social positions impact economic, legal, and political access and rights.
- 3) *Collective Identities*. Describe the evolution and social construction of social identities.
- 4) *Self-Awareness*. Assess their own individual attitudes, sense of self-awareness, and identities within the context of cultural diversity, and how these impact personal and professional interactions.
- 5) *Societal Contributions*. Summarize how diverse groups have made major contributions and have affected changes to educational, social, legal, religious, political, and cultural institutions and society.
