

Dissemination and Implementation (D&I) Science Program Mission

Director: Russell Glasgow

Consultation and Evaluation Lead: Jodi Holtrop

Core Members: Bethany Kwan, Amy Huebschmann, Dan Matlock,
Hillary Lum, Borsika Rabin

*We use stakeholder engagement and **pragmatic D&I models, methods and measures:***

- *to **build D&I capacity** within scientists, systems and communities, and*
- *to **develop, test and disseminate** sustainable and equitable solutions to real world problems.*

Description: Service/Education/Training

- Research consultation program (1-2 contacts) and process
- Training and mentorship (individual and recent institutional K12 award for T4 science)
- **High quality workshops**, education programs and courses
- **On-line resources** (web-based, eBooks, fillable PDFs)
- Co-I on proposals
- Adding dissemination (designing for dissemination) aim or section to T2-T3 research

Description: Research

- Pragmatic models and **frameworks for D&I** (RE-AIM; PRISM; Evidence Integration Triangle; Dynamic Sustainability Model)
- Development and testing of **pragmatic measures and assessments**, including adaptations and context- both patient-reported outcomes (PROs) and mixed methods
- Evaluation of costs from the perspective of multiple stakeholders and dissemination
- Content areas: primary care; geriatrics; multi-level behavior change; designing for dissemination, illness self-management

Strengths and Challenges

- Strengths

- Unique and nationally recognized D&I expertise: RE-AIM, shared decision making, rural primary care, designing for dissemination
- Existing D&I courses and on-line resources (Google “ACCORDS D&I”)
- Connections and collaborations with other leading D&I programs
- Partnership with other ACCORDS programs and cores

- Challenges

- Exceeding capacity for mentoring and co-PI partnerships
- Not enough T4 science focus (lots of T3 and T3 ½)
- Limited expertise in organization and systems issues

Future Directions

- Recruit new mid-career investigator(s)
- Enhance Dissemination (D) activities of our D&I program
- Enhance partnerships (VA, Denver Health FQHC, Cancer Center)
- Expand Training and Capacity Building (leverage recent NHLBI K12 T4 science program)- D&I certification, on-line courses and resources, etc.
- Center grant (one pending) and program projects

IF AN INTERVENTION WORKS

AND NOBODY CAN USE IT.....

DOES IT STILL MAKE AN IMPACT?
