Presents

Leveling the Playing Field: Achieving Equity and Eliminating Racial/Ethnic Disparities in Children's Health and Healthcare

Racial/ethnic disparities in children's health and healthcare are extensive, pervasive, persistent, and occur across the spectrum of health and healthcare. For example, among those with Down's Syndrome, African-Americans die at a substantially younger median age than whites. In this session, attendees will learn about key racial/ethnic disparities in children's health and healthcare, programs that have been successful in eliminating disparities, and practical steps to take to achieve equity for minority children.

Glenn Flores , MD, FAAP

Chief Research Officer; Director of the Health Services Research Institute; Professor and Associated Chair of Research, Dept. of Pediatrics, UConn Health Connecticut Children's Medical Center and The University of Connecticut School of Medicine
