presents

The Science of Patient Centered Decisions: An ACCORDS Seminar Series

“Shared Decision Making in Practice: ICDs/LVADs”

Seminar Objectives:

- To explore the effectiveness of shared decision making as applied to two cardiovascular interventions (defibrillators and ventricular assist devices)
- To compare on contrast the implementation of shared decision making as applied to two cardiovascular interventions.

Daniel Matlock, MD, MPH

Associate Professor, Department of Medicine
Director, ACCORDS Colorado Program for
Patient-Centered Decisions

Dr. Matlock is board certified in Internal Medicine, Geriatrics, and Palliative care. His research is aimed at fundamentally changing and improving how patients make decisions around invasive technologies.

Larry Allen, MD, MHS

Professor of Medicine, Division of Cardiology

Dr. Allen spends his clinical time as Associate Division Head for Clinical Affairs in Cardiology and Medical Director of Advanced Heart Failure at the University of Colorado. The other half of his time he does research with the Colorado Program for Patient Centered Decisions helping to improve our ability to anticipate progression into end-stage heart failure and then help patients make tough choices regarding invasive therapies and palliative options.

For live remote access:

<https://ucdenver.zoom.us/j/840154316>

Or Telephone: 1.646.876.9923

Meeting ID: 840 154 316

Lunch will be provided to the first 30 participants.
No registration required.
